30...♗xb4? A very logical move, but a mistake. [Black should have tried 30...♗a3! 31.♖b2 ♗a4 32.♖c3 ♗a2 and she would have kept some chances to win the game.]

31.♗a1! White is of course going for Black's a-pawn.

31...♗a4 To enter the pawn endgame Black's idea, but is it really a winning one?!

32.♗xa4 bxa4 33.g4! A very precise move! White is fixing Black's pawn structure.

33...♖g6 34.h4 h5 After this move all of Black's hopes vanish. [34...a3 was the only try. 35.♖c3 ♖f7 36.f4 ♖e6 37.♖c2 White can't do much but keep on waiting, but it seems to be enough to hold a draw. 37...h6 38.♖c3 ♖d6 39.♖c2 a5 40.♖c3 a4 41.♖c2 Black has improved her position to the maximum and only has one try left...

41...♔c5 And now White is holding with 42.g5! fxg5 43.fxg5 hxg5 44.hxg5 ♔d6 45.g6 ♔e6 46.e5 With an easy draw.]

35.♔b2 a6 36.♔b1 ♔h6 37.♔b2

37...♔g6 White can't do anything and Black neither, so the position is just a draw.

38.♔b1 ♔h6 39.♔b2 a5 40.♔b1 ♔g6 41.♔b2 ♔h6 42.♔b1 ♔g6 43.♔b2 ♔h6 Pawn endgame es are always based on exact calculation, so one must be very careful entering one and be sure the calculation job is done carefully! 1/2-1/2

(16) Tomashevsky, E.(2703)-Dominguez Perez, L.(2757)

Paris GP, 2013.09.27

[CE Team]

Black had won a pawn earlier in the game, but because of the opposite colored bishops White holds the draw without any difficulty. The obligatory task to achieve this is to trade the knights off the board.

32.♖c5! ♖xc5 [32...♖c3 is met by 33.♖xa6= (33.♖a5? would fall into Black's trap since after 33...♖e2+ 34.♖f1 ♖b5 Black manages to save the extra pawn.)]

33.♖xc5

We have reached this theoretical endgame, which we can quite frequently find in practical games. Let's examine the holding technique on the highest level.

33...♟b5 34.♟b4 It is better to stop the passed pawn as less advanced as possible.

34...♞g6 35.♟c3 White prevents the Black king from approaching the a-pawn by attacking the g7 pawn. Black is forced to put his f-pawn onto a dark square in order to continue the journey.

35...f6 36.f3 White prepares to activate his king and also takes the e4 square under control.

36...♞f5 37.♞f2 The single bishop is not enough to stop the a-pawn, he needs his king over there.

37...♞e6

38.h4 Tomashevsky starts to settle his pawns on dark squares, where he can protect them with his own bishop, while Black cannot attack them.

38...h5 [38...♞d5 39.♟b4 Because of the Bf8 threat, Black is forced to play h5 and it transposes to the game.]

39.♟b4 ♞d5 40.♟f8 g6 41.♟e7 f5 White succeeded in fixing all the pawns on the kingside, therefore he does not need to worry about any kind of breakthroughs. He is free to transfer his king to stop the a-pawn.

42.♟d8 A little finesse to win another tempo by preventing a5.

42...♞c4

43.f4! The f4 and h4 pawns are perfectly blocking the 3 pawns, White does not even need his g-pawn later on.

43...♞b4 44.♞e3 a5 45.♞d2 The king easily reaches the corner.

45...a4 46.♞c2 ♞c4 47.♞b2 ♞d4 48.g3 ♞e3 49.♞a3 ♞f3 50.♟g5 ♞xg3 White was playing on this position in the entire endgame. His king holds the a-pawn, while the bishop and two pawns are blocking the three pawns. Despite the two extra pawns, Black has to agree to a draw. We should try remember this defensive method.

51. ♖b4 ♔g4 52. ♖a3 ♔g3 53. ♖b4 ♔g4 54. ♖a3 ♔g3
55. ♖b4 1/2-1/2

Clash of the Titans

(17) Euwe, Max-Alekhine, Alexander[A90]

Amsterdam m2(10), 1926

[Kamil Miton]

1. ♘f3 e6 2. c4 f5 3. g3

3... ♘c6!? Usually Black plays Nf6-Be7-d6 or Nf6-c6-d5. The knight on c6 helps Black to play e5 in the future but the problem is that White has the idea to push d4-d5.

4. d4 ♙b4+ 5. ♙d2 [5. ♘bd2 Keeping the bishop pair is always a good idea in this kind of structure.]

5... ♙xd2+ 6. ♙xd2 d6 7. ♘c3 ♘f6 8. ♙g2 Black's main idea is play e5 to fight for the space in the center and try to limit the white bishop after e4. We will that to achieve this is not an easy task.

8... O-O [8... e5 9. dxe5 dxe5 (9... ♘xe5 10. ♘xe5 (10. c5 10... ♘xf3+ 11. ♙xf3 dxc5 12. ♙xd8+ ♔xd8 13. ♘a4 c4 White has compensation but as he needs some time to recapture the c4 pawn, I think that Black should be able to equalize.) 10... dxe5 11. ♙xd8+ ♔xd8 12. O-O-O ♔e7 13. e4!↑ A strong move. White is preparing Re1 and doesn't allow Black to play e4.) 10. ♙xd8+ ♔xd8

11.O-O-O 12.e4 Another typical idea, otherwise Black limits the bishop by playing e4 himself. 12...fxe4 13.g5 14.gxe4+]

9.♖d1 The rook is well placed on d1 as Black's plan is to push e5. [9.d5 9...♗e5 (9...exd5 10.cxd5 ♗e5 11.♗d4 White has a stable advantage thanks to his better structure and a potential pressure on the c-file.) 10.♗xe5 (10.b3 is too slow as after 10...♗xf3+ 11.♗xf3 e5 Black has a good position.) 10...dxe5∞With the idea of playing e4 next. 11.e4 f4 12.gxf4 ♗h5 A typical trick. Black will now get counterplay on the dark squares.]

9...♗e7 Black transfers the knight to g6 to avoid the d5 idea. An interesting option was [9...♗e4!? 10.♗xe4 (10.♖c2 10...♗xc3 11.♖xc3 ♖f6 12.O-O e5) 10...fxe4 11.♗g5 d5

(11...♗xd4 12.♗xh7 ♖xh7 13.♖xd4) 12.O-O+ With the idea to play f3 next in order to activate the pieces.]

10.O-O ♗g6 The knight on g6 supports the e5 idea, but black lost too much time.

11.♖c2! White prepares the typical e4 break in the center.

11...c6 [11...f4!? could temporarily disturb White's idea to play e4.; 11...♖e7 12.e4 f4 13.e5! And White gets to play e5 first! The position is now very bad for Black.; 11...d5 Not allowing e4, but that is not why the knight went to g6. 12.e3+]

12.e4+ [12.b4 was also possible in order to open the position with b5.]

12...♖a5 [12...f4 13.e5±]

13.exf5 [13.♖fe1 13...fxe4 14.♗xe4 ♗xe4 15.♖xe4 ♖xa2

16.c5 With the idea of getting control over the dark squares. White has a huge initiative. (16.h4?! 16...d5∞; 16.♖e3 Threatening Ra3. White can also play c5 to win the e5 square, or h4-h5 to make the black king weaker.) 16...dxc5 17.♗e5↑]

13...exf5 [13...♙xf5 14.♙xf5 (14.♙e2 also looks good for White because the black pieces are badly coordinated.) 14...exf5 White has two plans: Rfe1 with the idea to play c5 and get control of the dark squares or d5 and after c5 Ng5, with the idea of putting an unpleasant knight on e6, as then after Bxe6 the bishop on g2 becomes very strong.]

14.d5 cxd5 [14...c5 15.♗g5 With the idea Ne6. White is much better as he has more space and the black queen is badly placed on a5.]

15.♗xd5 ♕d7 16.♗d4 White has a stable advantage thanks to his better structure, but the position is still not easy because of some possibilities for Black to put pressure on the kingside after f4-Ne5 etc.

16...f4

17.♖de1?! It looks a bit strange to put this rook on e1. [17.♙b3 With two threats, the simple Qxb7 or Nxf6 and c5.; 17.b4!? 17...♙d8 18.♗f5↑]

17...♗xd5 18.♕xd5+ ♖h8 19.♗e6 [19.♕xb7 19...♖ab8 20.♕d5 ♙xa2 (20...♕h3 21.♗c6)]

19...♖f6 20.♗g5 ♖af8 The Ne6-Ng5 maneuver had no big sense as White lost two tempi and allowed Black to double the rooks on the f-file. The position is already unclear.

21.♙b3 [21.♗e4 21...♕f5∞; 21.♖e2 The white rook simply escapes from some tactical threats which we will see in the next comment. 21...♕f5 22.♙d2 A good place for the queen in order to fight for the important f4 square. (22.♙b3 22...♗e5∞) 22...♙xa2 This endgame is of course good for White. 23.♖fe1↑ And now the white pieces nicely get activated, for instance: 23...h6

24.♗f7+!? ♖6xf7 25.♕xf7 ♖xf7 26.♖e8+ ♗f8 (26...♖h7 27.♙d5) 27.♙xd6 ♖g8 28.♙d5 g5 29.♖8e7 ♕g6 30.♖xb7 ♙a6 And Black only manages to defend by finding only moves.]

21...fxg3

22. ♖xg3? A mistake. White could have forced a draw after [22.hxg3 22...♖xf2 23.♖e3 ♖xf1+ 24.♖xf1 ♖xf1+ 25.♔xf1 The black king is now very weak and it is enough for White to make a draw. 25...h6 26.♘f7+ or (26.♖e4 26...♖d2 27.♖xg6 ♖c1+ 28.♔g2 ♖d2+ 29.♔f3 ♖d1+ 30.♔f2 ♖d2+=) 26...♔h7 27.♘g5+ With perpetual check because after 27...hxg5? 28.♖xg5 ♘h3+ 29.♔e2 ♘g4+ 30.♖xg4 ♔h6 31.♖d4± White is better.]

22...♘f4→ 23.♖e7 ♖g6 24.♖f7? The decisive mistake! White could still fight after [24.♘f7+ 24...♖xf7 25.♖xf7 ♘e2+

26.♔h1! (26.♔g2 26...♖d8! 27.♖xg6 hxg6 28.♖e1 ♘d4 29.♖ee7 ♘c6 30.♖xg7 ♘xd5+ 31.cxd5 ♘f5 32.♖h7+ ♔g8 33.♖xb7 a5—+) 26...♘xg3+ 27.fxg3 h5 Black needs the h6 square to escape

with the king. 28.♖xd7 ♖f6 29.♖xf6 gxf6 30.♖xb7 ♖xa2 31.♔g2 With good drawing chances.]

24...♖xf7 25.♘xf7+ ♔g8 26.♘e5+

26...♖xd5! And Black is winning material...

27.cxd5 ♘e2+0-1

Editorial Preface

And we are having again a super week of chess.

In the Russian Championship it seems like it is going to be a fight between Svidler and Kramnik for the Title. We can expect a very interesting finish. In the Russian women Championship the things are looking much more unclear. Gunina, Kosteniuk, Kovanova are all in the game, and as well many others with just half a point behind.

The 6th Bilbao final Masters 2013 seems to go to Aronian, who had a bad start but then won 2 games in a row with Black. To be sure in the result we have to await the last round.

In the 7th Kings Tournament 2013 in Bazna Caruana is making slowly his way to the title with +2. There is nobody else over the 50% mark. Still many rounds to go, but it seems that Caruana is going to be hard to stop.

From the big event Indonesia Open is about to start as well as the German Bundesliga.

Enjoy the CEWN Nr85 with the selection of the best games from the past week.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kramnik, Vladimir(2796)
- Shomoev, Anton(2579) [A05]

66th ch-RUS 2013(1.1), 2013.10.05
[Arkadij Naiditsch]

We are in the 1st round of the Russian Championship. Quite surprisingly, Kramnik is participating too. Usually Vladimir avoids playing non Top GMs, but as he showed just a month ago by winning the World Cup, he is very good at beating weaker players.

1.♘f3 ♘f6 2.g3 As usual in not super important events, Kramnik avoids playing main theoretical lines. Of course this doesn't mean that he is not preparing at all. We can be sure that every sideline he plays is very well analysed.

2...b6 Not a bad move, but of course 2...d5 would lead us to most critical positions of the Reti opening.

3.♗g2 ♗b7 4.O-O e6 5.d3 Once again White avoids the main theory. It was not too late to come back into well-known lines with 5.c4 or even 5.d4.

5...d5 A logical move. To take the center is never wrong.

6.♗bd2 White has many different plans here. One of them is to play b3-Bb2 next, another one could be to play c4 followed by cxd5 or maybe to play Qe1 and e4.

6...g6 Not bad, but very strange. It is not always a good idea to have a double fianchetto, but of course at the current moment it is not that stupid. White is planning to put the bishop on b2, so Black is putting his to g7. [6...♗e7 followed by O-O and c5 would be the usual way of playing with an about equal position.]

7.c4 ♗g7

8.b4?! A very risky decision by White, but an interesting one. The game is getting very forced now.

8...♗e4! Black accepts the invitation and is absolutely right to do so. [After the more passive 8...O-O 9.♗b2 the White pawn on b4 would be much better placed than on b3. Black is not capable of playing c5 anymore because of bxc5 bxc5 and Rb1 with domination on the b-file and a5 would also be a wrong reaction for Black because of b5.]

9.cxd5 White is going for the gamble. [It was still not too late to refuse the tactical action by playing 9.d4 but of course Black should be doing fine here... White's d3 followed by d4 cannot give White any advantage.]

9...exd5 [Of course not 9...♗xa1?! 10.♗xe4 Followed by Bg5 with a great position for White.]

10.♗b3 Already on move 10 both players spent quite some time and with a good reason. The position is very complicated and it is very difficult to judge the evaluation. [10.dxe4 10...♗xa1 11.exd5 ♗xd5]

10...♗xa1 11.♗xa1 So White is an exchange down, but Black's weak dark squares give White good attacking chances. The position should be pretty unclear.

11...♖d6 12.♗g5 White is weakening Black's structure even more.

12...f6 13.♗f4

13...a5! A very strong move by Black. [After the less creative 13...O-O 14.♗d4 ♖e8 15.♗b3 ♗f7 16.♖c1 all of White's pieces would be nicely placed. White's next idea could be to play Nc2-Ne3. I would not say that White is better here, an exchange is an exchange after all, but from a practical point of view the game is very open.]

14.bxa5 ♖xa5 Now the black rook is very nicely placed on the open a-file and in addition the c5 move will cut all of the white knight's play.

15.♗c2 c5 16.♗b3 ♖a7 It looks like Black managed to survive the first wave of White's attacks, he is controlling the center and is an exchange up. Black should be better here.

17.♗xc5! I am giving a "!" to this move not because it is a super strong one, but because it is clearly the best practical choice. In a difficult position White finds his best chances to continue.

17...bxc5 18.♗xc5 ♖a6 Once again it seems like Black has consolidated and White is a full rook down.

19.♖b1 White brings the last piece into the attack.

19...♗d7?? And Black blunders... [19...♗a8! would have been the right choice, as everything is protected! 20.♗d4 ♗d7 And I think that under normal circumstances Black should be winning here. A rook up is just too much. Of course White still has many tricks, but objectively his position should be very bad.]

20.♗e3+! A very strong check. Black loses a full piece.

20...♗f7 [After 20...♗e7 21.♗xd6 ♗xe3 22.fxe3 White would already be the one with a small material advantage and the initiative.]

21.♗xd6 ♗a8 22.♗f4 The threat is to play Ng5 next.

22...♖e8 23.♗d4 The game is almost over. White has a strong attack and all his pieces are very nicely placed, which is too much to handle for Black.

23...♖xa2

24.♗h3 Simply everything is hanging in Black's position.

24...♖xe2 Black panics, but it was already hard to advice anything to Shomoev.

25.♘xe2 ♖xe2 26.♔h6 And the h7 pawn cannot be protected. All in all it was not a very deserved win by White, who clearly made a "bluff" by sacrificing and was on the edge of losing the game. **1-0**

(2) Svidler, Peter(2740) - Andreikin, Dmitry(2706) [C65]

66th ch-RUS 2013(4.3), 2013.10.08
[A.Naiditsch]

The Russian Championship is always very strong and sometimes super strong, it depends on whether the very Top players are participating. This year from the Top players only Grischuk and Morozevich are missing. Usually Peter Svidler does great at this tournament and it is no different this year. Out of the first 5 rounds he won 3 games and made 2 draws. Many were excited about Andreikin's play, who came 2nd in the World Cup. So far Andreikin won his White games (against Karjakin and Kramnik!) and lost his both Black ones, which is very unusual for his solid style of play.

1.e4 e5 Andreikin tried 1...c6 in the second round against Nepomniachtchi and lost.

2.♘f3 ♘c6 3.♙b5 ♘f6 Another game in the Berlin.

4.d3 Svidler avoids the main line with 5. 0-0 and the endgame.

4...d6 [4...♘c5 is a much more popular move.]

5.0-0 ♘d7 A possible move, but 5...Be7 is also normal, or 5....g6.

6.c4!? A rare continuation, but it makes a lot of sense. White

secures the d5 square for the Nc3-Nd5 idea and a d4 push somewhere could lead to a slightly better position because of the strong center.

6...g6 An usual development for Black.

7.♘c3 ♘g7 8.♘e3 O-O 9.h3 White prevents any Bg4 ideas in the near future, in order to win control over the d4 square. A very logical decision.

9...♘b8?! This move looks very strange. [9...a6 10.♘a4 ♖e8; 9...♘e7 would have been a more logical continuation for Black.]

10.♖b3! Nice play, White does not hurry to move his bishop away from b5!

10...c6 [After 10...♘xb5 11.cxb5 gets the squares c6 and a6 under control. White's position looks clearly better to me.]

11.♘a4 ♖c8 Protecting the b7 pawn and preparing Na6-Nc5.

12.♖d1 White plays for the d4 push. [12.♖a3 12...c5 13.b4 also looks nice for White.]

12...♘a6 13.d4 Now we can see that Black's move c6 was also quite risky. The pawn on d6 is weak.

13...exd4 14.♘xd4 We have some sort of King's Indian pawn structure, but it looks to be better for White. Black is not in

time to create something concrete in the center, which gives White enough time to put all his pieces to central positions.

14...♘e6 I don't like this move too much for Black either... The bishop on e6 is only provoking White's Ng5-f4-f5 pushes. Maybe it was better for Black to play Re8 followed by Nc5 and Ne6.

15.♖e2 ♖e8 16.♖ad1 To put the rook on d1 can't be wrong.

16...♘c5 17.♘c2 ♘cd7 Black is very passive and White is starting his crushing attack.

18.♘g5! Nice and logical. White is going for the black king. f4-f5 is a very dangerous threat now.

18...♖c7 [A freedom kick doesn't seem to work: 18...d5 19.cxd5 cxd5 20.♘b5 White is much better.]

19.f4 ♖a5 Black is preparing Qa6, with some pressure on the c4 pawn.

20.a3 A prophylactical move that was not so needed. White could have gone for much more direct play, like for example: [20.♘xe6 20...♖xe6 21.f5 gxf5 22.♖f2 With a very dangerous attack.]

20...h6 21.♘f3?! This looks quite strange... [The simple 21.♘xe6 21...♖xe6 22.♖f2 with the idea of playing f5 next seems to almost win the game!]

21...♘h5 Maybe Black tries to free himself slightly too early. [21...♖ad8!? would bring the last piece into the game and now the idea of Nh5 or d5 would become quite possible.]

22.♙xg7 ♖xg7 23.♚d2 It is hard to imagine Black being OK here, the pawn on d6 is hanging and White can push f5 at any moment now.

23...♚b6+ Black is going for the c4 pawn.

24.♖f2 ♙xc4 It is hard to say if Black has blundered the next move of White, but Andreikin's position was already on the limit anyway.

25.♘a4! Chasing the black queen away.

25...♚c7 26.♚c3+ ♘hf6 27.♚xc4 b5 Black is winning back the piece, but losing the central "blockpost" d6 pawn.

28.♚b4 bxa4 29.♖xd6 Things are looking very dark for Black. White's e4-e5 push is unstoppable, which means a complete crush of the position.

29...♖ab8 30.♚d2 ♖ed8 [30...♖xb2 was of course losing too. 31.e5 ♘d5 32.♚d4 With a double attack on the rook b2 and the threat to play e6 check.]

31.e5 White's mission is completed, the move e5 is on the board.

31...♘e8 32.♚c3 White has a deadly double threat again: to

play e6 or Rxc6. The game is basically over.

32...♘b6 33.♖xc6 ♚b7

34.f5 White is not happy with being just a tempo up, but continues totally dominating the game and launching the final attack.

34...♘d5 35.♚c5 The most solid and most simple move.

35...♚xb2 36.fxg6 What a domination of the white pieces! Black's position is a complete mess.

36...f6 37.♘d4 And this was even too much for Andreikin. A very nice win by Svidler with great positional play and a nice crushing attack in the end. **1-0**

(3) Dominguez Perez, Leinier(2757) - Caruana, Fabiano(2779) [B48]

FIDE GP Paris(11.2), 2013.10.04

[Balogh Csaba]

This is a highly important game from the last round of the Paris Grand Prix. Caruana shares the lead with Gelfand, but he needs to take clear first place in order to qualify to the Candidates tournament next year. Gelfand had the White pieces against Ponomarev and it was quite expectable that that game should end in draw. Therefore Caruana needed a win, but Dominguez is a very solid player with a stable repertoire. Let's see what happened.

1.e4 c5 Black should aim for a sharp game and of course the Sicilian is a clever decision to get it.

2.♟f3 e6 3.d4 cxd4 4.♞xd4 ♞c6 This is Caruana's surprise. He usually plays 4...a6 when he needs a win, but now he wanted to play something different, which he never employed before and might catch his opponent by surprise.

5.♞c3

5...♞c7 White has a wide range of choices here, but Dominguez as usual sticks to his repertoire and goes for the sharpest line with queenside castling.

6.♞e3 a6 7.♞d2 ♞f6 8.O-O-O ♞e7 8... Bb4 is by far the most common move, but recently the variation played in our game becomes more and more popular.

9.f3 Both sides start to launch an attack, White goes ahead with g4-g5, while Black plays b5. A typical Sicilian game.

9...b5 10.g4

10...♞xd4! This is the new fashion. It was played for the first time this year and Black has huge success with it. At the moment it is not clear how White should fight for the advantage, even the 1.e4 expert Sergey Karjakin got into trouble quite easily against Topalov.

11.♞xd4 [11.♞xd4 is the other option. 11...♞b7 12.g5 Black always reacts with 12...♞h5 This is basically the new idea. In the previous lines, Black usually quickly tried to castle kingside with the idea to free the e8 square for the knight to retreat. Here is a game that shows the typical ideas of Black in this position: 13.♞e2 White takes the f4 square under control and prepares to play Ng3, getting rid of the h5 knight, which blocks White's attack. 13...♞c8! Black creates the threat of Bxg5, deflecting the queen from c2. 14.h4 O-O 15.♞b1

And here Black executes the standard central break and overtakes the initiative: 15...e5! 16.♘e3 d5! 17.exd5 ♗xd5. With a big advantage for Black, as the bishop cannot be taken because of Qxc2 followed by Rfd8. [Kobalia-Movsesian, 2013.]

11...♗b7 12.g5 ♖h5

13...♗c8! Quite an original idea, played almost without thinking by Dominguez, which shows that he is still in his preparation. [The main and probably the most critical move is 13.♖b1 13...♗c8 14.♗d2 with the idea Bh3-g4 or Ne2-g3. In any case, White needs to kick out the h5 knight in order to proceed with his attack, but Black also has many different ways to play.]

13...♗c8! Caruana replies with the most logical move, but he had to foresee White's idea. Black had no other move as 0-0 would have left the d7 pawn unprotected, while after b4,

White had Na4-b6. Black is intending to play Bc5 now, which forces a mass of exchanges on c5, but in the arising endgame Black's chances would be excellent, since suddenly the g5 pawn becomes weak and the h5 knight gets very strong after jumping to f4.

14.♗xb5!? This sacrifice is known from many different Sicilian lines, both sides must always take it into consideration.

14...axb5 15.♗xb5 We have reached the critical position, Black must decide where to go with the queen.

15...♗c6 [15...♗d8!? is the alternative. 16.♗a7 ♗c6 (16...0-0 is possible, although I don't believe that Black has enough compensation for the pawn after 17.♗xb7 ♗xg5 18.♗xg5 ♗xg5 19.♗c3+ (Or 19.a4 is also possible.)) 17.♗b6 ♗xb5 18.♗xd8 ♗xd8 Grischuk considered this option to be extremely unclear

with good chances for both sides. Black is materially down, but his minor pieces become very active and he might also hope for an attack after castling kingside followed by Ra8. He believed that Black should have gone for this position, especially with the given tournament situation, that Black needs a win. Caruana considered this position to be clearly better for White and he preferred to repeat with repetition. He gave the moves 19.♔e3 O-O 20.f4 with a potential attack with f5 beside the material advantage, however things are very far from clear. Black could for instance play 20...f5 21.gxf6 ♖xf6 22.♖g1 ♘c6 with a sharp game. 23.♖dg2 ♗f7]

16.♘a7 ♔c7

17.♘b5! The best move objectively and also the most painful from Caruana's point of view. White is happy with the draw and prefers to repeat the moves. [17.♘xc8?! 17...♔xc8 18.♖hd1 ♘c6 White is materially better here with the rook and two pawns against the two minor pieces and he would have a clear advantage with the queens off the board. However with the queens, it is very risky to go for this line, as Black might get a really strong attack after O-O, Qa6 and switching the rook to the queenside. White should realize his material advantage on the queenside, but any kind of pawn push would seriously weaken his position in front of his king.]

17...♔c6 18.♘a7 ♔c7 19.♘b5 A last chance to change the

mind and go for Qd8, but Black repeats.

19...♔c6 A very difficult decision, when you need to choose between two options, either to repeat moves when the draw is completely unsatisfactory for you, or to go for a position that you believe is lost or at least clearly worse. From the opening point of view another successful game for Black as an excellent theoretician was unable to show something. 1/2-1/2

(4) Nakamura, Hikaru(2772) - Gelfand, Boris(2764) [B90]

Elancourt FRA(10.3), 2013.10.03

[Balogh Csaba]

In the penultimate round, Nakamura had the sole lead with +3 and Gelfand shared the second place with Caruana, half a point behind him. We could expect an interesting fight for the first place.

1.e4 c5 2.♘f3 d6 The first surprise. Gelfand chooses his old weapon, the Sicilian Najdorf. Since his World Championship match against Anand, he almost always plays the Sveshnikov variation, which starts with 2...Nc6.

3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 We are at the initial position of the Najdorf and Nakamura goes for one of the most popular setup.

6.♙e3 ♘g4 7.♙c1 ♘f6 8.♙e3

8...♘g4 An interesting situation. Nakamura could have forced a draw with Bc1, which would have been a perfect result for him to win the tournament. However, to make a draw like this is so shameful that a player with a lot of ambition plays on without any hesitation.

9.♙g5 h6 10.♙h4 g5 11.♙g3 ♙g7 12.h3 A few weeks ago,

Nakamura himself retreated with his knight to f6 against Kamsky. That was another extremely exciting game, which we have also analyzed here in CEWN. Gelfand plays the most common move:

12...♘e5 13.f3 ♘bc6 14.♙f2 ♙e6 A typical move in this variation. Black wants to occupy the c4 square later on.

15.♚d2 [Black is not afraid of 15.♘xe6 15...fxe6 The doubled e-pawns are useful here to control all the important central squares and his minor pieces are excellently placed on the dark squares, especially the one on e5. White should only take this option into consideration if he could quickly organize an attack against the e6 pawn, but here it is not possible, since Bc4 is controlled by the knight.]

15...♖c8 Following the main line, both sides make their most useful developing moves.

16.0-0-0 At first sight it looks dangerous, but this is the only way for White to fight for the advantage. His plans are connected with Nd5 and opening the position on the kingside with h4!

16...♘xd4 17.♙xd4 ♚a5 18.a3! This is Nakamura's improvement over Gelfand's previous game. White defends the a2 pawn, which was not advisable with 18.Kb1 because of the exchange sacrifice on c3. We can see that Gelfand uses the same ideas in both games. [Karjakin had played 18.♙f2 18...♖c6! Gelfand defends in the same way against the threatening Bb6. 19.g3 O-O 20.f4 ♘d7 The same retreat with the knight. 21.h4 g4 Black closes the kingside again in the same style as in the game. 22.♘d5 ♙xd5 23.exd5

23...Rc5! A great exchange sacrifice, which could not be accepted, because then White could not oppose anything to the beast on g7. 24. Qxg7 (24. Qxc5 24... Rxc5) 24... Qxg7 25. Qb1 Rxd5 Black won a pawn and soon the game as well. Karjakin-Gelfand, Wijk aan Zee 2012.]

18...O-O

19.h4! White must try to organize an attack on the kingside, as it is principled in case of opposite side castling.

19...g4! This is the official novelty, Gelfand played it without thinking, clearly showing that he is still in his preparation.

20. Qf2 [20. Qe3!? comes into consideration with the same Bb6 idea and here Black should probably react with 20... Rc4 (20... Rxc6 is less effective because of 21.f4 Rfc8 22. Qb1 Black can never take on c3.) 21. Qxc4 Rxc4 22. Qxg7 Qxg7 In my opinion, this is the critical position from the opening point of

view. 23.fxg4 Rfc8 It seems like Black has strong counterplay on the queenside.]

20...Rc6! Black not only prevents Bb6, but prepares to double his rooks on the c-file, which could be very dangerous with the idea of dismantling White king's position with an exchange sacrifice on c3!

21.f4! White must act, otherwise he gets crushed.

21...Rfc8! This sacrifice was the main idea of Gelfand's preparation. Impressive analysis!

22. Qg3? Nakamura usually feels comfortable in such complicated positions, but this time he loses the thread. [22.f5! was the best move for White, which actually leads to a forced draw in all the lines. The move is pretty illogical for the human mind, since it leaves an excellent outpost for the

knight on e5! However chess is a concrete game! 22...♙c4! (The passive 22...♙d7 could be met by 23.♚e3! preventing the sacrifice on c3. White wants to play Kb1 and it is not easy for Black to proceed with the attack. For instance 23...b5 is met by 24.♙b1 b4? 25.axb4 ♚xb4 26.♙d5+- and the e7 pawn is hanging.) 23.♙xc4 ♙xc4 (23...♚xc4? is a blunder 24.♙b6! Trapping the queen!) 24.♙xg7 (On 24.♙d5 Black must find

24...♙xb2!! 25.♙xe7+ ♙h7 26.♙xc6 ♚xa3 27.♙d2 ♚xc6 Black is more than fine!) 24...♙xg7 25.f6+!

Things are getting really tense now! Both sides are more or less ready for the mating attack, a typical Sicilian game! 25...♙g8! The only move! (25...exf6 loses to 26.♙d5 White arrives first! 26...♙xa3 27.♚xf6+ ♙h7 28.♚xf7+ ♙h8 29.♚f6+ ♙h7 30.c3+-) 26.♙d5 leads to a draw after (26.fxe7 26...♙xb2! The only move, but a good one! 27.♚hf1 f5! Another only

move and suddenly Black has succeeded in winning some time in order to be ahead in the attack.) 26...♙xa3! 27.♙xe7+ ♙f8 28.♙xc6 ♚xc6 29.bxa3 ♚xa3+ 30.♙b1 (30.♙d2? is refuted by the following little combination: 30...♚xc2+! 31.♙xc2 ♚a2+ 32.♙c3 ♚xf2+-) 30...♚b4+=; 22.fxe5? loses to 22...dxe5 23.♙e3 ♚xc3! 24.bxc3 ♚xa3+ 25.♙d2 ♚xc3+ 26.♙c1 And here Black has more than a perpetual by deflecting the queen from the c2 square. (26.♙e2 26...♙c4+ 27.♚d3 ♚xc2+-+ wins.) 26...g3! 27.♚e2 ♙g4! Another deflection! 28.♚d3 ♙a1+ 29.♙d2 ♚xd1#]

22...♙d7! Just like in the game against Karjakin, Gelfand retreats his knight to d7 with the idea to trade the dark squared bishops and with this makes the sacrifice on c3 more effective!

23.♙xg7 ♙xg7 24.f5 There is no way back, White must go forward and hope that the sacrifice will not lead to mate. [On 24.♚d3 Black can strengthen the pressure on the c3 square by playing 24...♙c5! 25.♚e3 ♙a4!+-]

24...♚xc3 Gelfand plays the most tempting human move! [The computer points out that 24...♙e5! was even stronger. 25.fxe6 ♚xc3! 26.bxc3 ♚xc3 27.♚d3 ♙xd3+ 28.♙xd3 The win still requires precise play: 28...♚xa3! Threatening mate in two after Ra1 and Qa3. 29.♚xg4+ ♙f8 30.♙d1 The only move to avoid mate, but here the rook falls: 30...♚a1+ 31.♙e2

♖xh1 This is still not the end of the variation... 32.exf7 ♕e1+ 33.♔f3 Black now has to find 33...♖d1+! 34.♗e2 ♖f1+! 35.♔e3 (35.♔g3 35...♖e1+ 36.♔h2 ♖h1#) 35...♖c1+ 36.♔d3 ♖xf7 37.♖c8+ ♔g7 38.♖g4+ ♔h7—+ And now it is finally over!]

25.bxc3 ♖xa3+ 26.♔d2

26...♗f6! A very unpleasant intermediate move, which seriously increases Black's chances for a successful attack.

27.♖d3 ♗c4 28.♖d4

28...d5! Following the principles. Gelfand opens the central files in front of the white king. [Gelfand showed a fantastic line

at the press conference. He said that his original idea was to play 28...b5 with the threat of Bxf1 followed by Rc4, winning the e4 pawn, but White has 29.♗d3 and after 29...♗xd3 30.♖a1! ♖b2 31.♔xd3 ♖c4

32.♖hb1! ♖xd4+ 33.cxd4! the queen is suddenly trapped and White wins!]

29.exd5 [29.♖e1 29...♗xf1 30.e5 is refuted by 30...♖c4! 31.exf6+ exf6 32.♖e3 The strongest is 32...d4! (32...♗xg2 also wins) 33.cxd4 ♖a5+ 34.♔d1 ♖a1+ 35.♔d2 ♖xd4+—+]

29...♗xd5 30.♖g1! Calm defence by Nakamura. White wants to put his bishop to d3 to close the d-file. [30.♗d3 30...♗xg2 31.♖hg1 ♗f3—+ Black is better even materially.]

30...♗e4! [30...♖d8 31.♗d3 is unclear. Black must waste an important tempo on defending the d8 rook in order to make the discovery attack with the d5 bishop possible, but then White is already in time to consolidate. For instance after 31...♖d7 32.♖b4! solves the problems!]

31. ♖d3

31... ♖a5! Another great move with multiple ideas. The main one is the Rd8 threat, but Black also wants to grab the f5 pawn, collecting further pawns for the exchange. [31... ♖xd3 was the alternative. 32. cxd3 ♖b2+ 33. ♖e3 ♖xc3 34. ♖c1 ♖xc1+ 35. ♖xc1 ♖xc1 White should be able to hold this endgame.]

32. ♖b4 ♖c7! [32... ♖xf5 33. ♖gf1 was unclear.]

33. ♖xe4? The decisive mistake. [After very resourceful defence, Nakamura was already very close to survival. He should have tried to hide his king with 33. ♖c1 It is not obvious how Black should continue his attack. Probably the best is to play 33... a5 34. ♖d4 ♖d8 35. ♖c4 White just manages to cover the c3 pawn, but 35... ♖xc4 36. ♖xc4 ♖xd1+ 37. ♖xd1 (37. ♖xd1? 37... ♖xg2+) 37... ♖xf5 White must suffer for a draw, but with perfect play it should be possible to achieve it.]

33... a5! Excellent calculation by Gelfand! [33... ♖f4+ was also winning, but it was much more difficult to find. 34. ♖d3 ♖xe4! (34... ♖d8+ spoils the win as after 35. ♖c4 the king finds shelter on b3.) 35. ♖d4+ (35. ♖xe4 35... ♖xc3+-) 35... ♖h7 36. ♖gf1 (36. ♖df1 36... ♖d2+ 37. ♖xe4 ♖e2+ 38. ♖f4 ♖c4+-)]

36... ♖xc3+! 37. ♖xc3 ♖g3+ 38. ♖f3 (38. ♖xe4 38... ♖xc3+-) 38... ♖f2+! 39. ♖c4 gxf3+- Black wins because the d1 rook is also hanging.]

34. ♖xb7 [34. ♖d4 34... ♖d8+-]

34... ♖f4+! 35. ♖e2 [35. ♖d3 is refuted by 35... ♖d8+ 36. ♖c4 ♖xe4! 37. ♖xd8 ♖d6+ 38. ♖b3 ♖xb7+-]

35... ♖c7! The last difficult intermediate move to find. Black takes on e4 next and the attack finally breaks through! [35... ♖xe4 36. ♖xc8 Black only has perpetual check here: 36... ♖g3+ 37. ♖d3 ♖e4+ 38. ♖d2 ♖f4+=]

36. ♖b6 [36. g3 36... ♖e5+- does not change anything.]

36... ♖xe4 37. ♖d4+ ♖h7 White has no defence!

38. c4 [38. ♖gf1 loses to 38... ♖xc3+! 39. ♖xc3 ♖xf1+! 40. ♖xf1 ♖xc3+-]

38...♖d7! The final blow!

39.♔e3 [39.♕xd7 39...♕f2+ 40.♔d3 ♘c5+ 41.♔c3 ♘xd7--]

39...♘g3+ 40.♕xg3 ♕xg3 41.♖xd7 ♕e5+ A fantastic game with which Gelfand overtook the lead and won the tournament! Gelfand is rather known for his outstanding understanding of the game, but as we see, his tactical skills are also amazing! **0-1**

Endgame section

(15) Andreikin, Dmitry(2706)-Shomoev, Anton(2579)

66th ch-RUS 2013(5.5), 2013.10.09

[CE Team]

After an average game we finally reached a very interesting rook endgame. At first sight White's pawns are looking very dangerous, but Black has a free d-pawn and the h-pawn could eventually also become strong.

37. ♔g3 ♖b4? A very passive move in a dynamic position. This can't be the right choice! [It was time to make use of the free d-pawn: 37...d3 38. ♖d7]

38...d2 And because of the threat Kf8-Ke8 White has nothing better than to exchange one of the connected passed pawns

for the black d-pawn. 39.b6 (39. ♔h3 39... ♔f8) 39... ♖xb6 40. ♖xd2 And only Black could push here a little, but of course the position is a draw.]

38. ♖d7! White is using the fact that Black is not in time to take on a4.

38... ♔f8? Another mistake. [Of course not 38... ♖xa4 39.b6 ♖b4 40.b7 followed by Rd8 and White is winning.; But Black could still have escaped by playing 38...d3 39. ♔f2 White tries to stop the d-pawn with his king. 39...h4! Once again Black is securing a draw.]

39.a5! And the game is almost over! Black cannot stop the white passed pawns...

39... ♔e8 At least Black is chasing the white rook from the 7th rank.

40. ♖d5 h4+

41. ♔h3 Now all Black's chances are gone. White just wants to put one of his pawns to the 6th rank and put the rook on the 8th. The game is over and Andreikin is showing us why.

41... ♔e7 42.a6 The first step is completed.

42... ♔e6 43. ♖d8 The rook is on the 8th rank and the a-pawn is a queen.

43...♖xb5 44.a7 ♖a5 45.a8=♚ ♖xa8 46.♖xa8

46...♚d5 Of course it is not a problem for White to win the game with a rook up.

47.♖a5+ ♚c4 48.♖xg5 Followed by Rxg6 and Rd6. Another nice example on how important it is in rook endgames to play each move as if it could be your last one! :) 1-0

(16) Gunina, V.(2506)-Goryachkina, A.(2436)

Russian Woman Championship, 2013.10.05
[CE Team]

White gets a winning pawn endgame by force.

39.♚e7! ♚xg4 Black had no choice, otherwise the loss is even simpler.

40.♚xf6+ ♚g8 41.♚xd8+ ♚g7 42.♚g5+! ♚xg5 43.hxg5 Here we are! White has correctly traded the queens as the pawn endgame is won, however as we will see things are not as easy as they might look at first sight.

43...♚g6 44.f4 h6! The best chance!

45.gxh6 ♖xh6 From now on a series of mutual blunders are coming. Despite the limited material, even such decent players were unable to produce a good move. [On 45...f5 White wins after 46.♖g2 ♖xh6 47.♖f2! (47.♖f3 47...♖h5) 47...♖h5 48.♖f3! Black is in zugzwang. 48...♖g6 49.♖e3+- Kd4 next wins.]

46.g4? [46.♖g2! was the only way to win. 46...♖g6 47.♖f3 ♖f5 (47...f5 48.♖e3 ♖f6 49.♖d4 ♖e6 Black is not in time as 50.♖c5 wins.) 48.g4+ ♖e6 We reach this position after the 49th move in the game.; 46.♖h3 leads to a draw after 46...f5 47.♖g2 (47.♖h4 leads nowhere as the king needs to retreat after 47...♖g6=) 47...♖g6 48.♖f3 ♖f6 49.♖e3 ♖e6 50.♖d4 ♖d6= And Black holds by opposition.]

46...♖g6? White is winning after this. [46...f6! holds the draw.

47.♖g3 ♖g6 48.♖f3 ♖f7! 49.♖e4 ♖e6= Black is in time to get this position. We will discuss this later in the game...]

47.♖g3? This move spoils the win again. [47.f5+! was the only winning move. The game is automatically winning after this. Let's see the technique: 47...♖f6 (47...♖g5 48.♖g3 f6 is hopeless after 49.♖f3 ♖h6 50.♖f4 ♖g7 51.♖e4 ♖f7 52.♖d5 ♖e7 53.♖c6+-) 48.♖g3 After reaching this position, basically all possible moves are winning for White. Let's see some examples: 48...♖g5 (48...♖e5 49.♖f3 ♖d6 50.♖f4 f6 51.g5 fxg5+ 52.♖xg5 ♖e7 53.♖g6+-) 49.♖f3 ♖f6 50.♖f4 ♖e7 51.♖g5 ♖f8 52.♖f6 ♖g8 53.g5 ♖f8 54.g6 fxg6 55.fxg6 ♖g8 56.g7+-]

47...♖f6? This spoils the draw again! [47...f6! holds, as we will see later.]

48.♖f3 [48.f5 also wins as we saw in the 47.f5 line.]

48...♔e6

49.♔e3? White blunders again. [White automatically wins after 49.f5+! as we saw in the 47.f5 line and here is one more option: 49...♔e5 50.♔g3 ♔e4 (50...f6 51.♔h4 ♔f4 52.♔h5+—) 51.♔h4 ♔f4 52.♔h5+— is over.; 49.♔e4? is the worst, because Black draws immediately after 49...f5+! 50.gxf5+ ♔f6=]

49...f6! The game is drawn again.

50.♔e2 [50.♔e4? is once again met by 50...f5+ This only comes into consideration when it is coming with check, otherwise White plays g5 and wins with the protected passed pawn. 51.gxf5+ ♔f6=; 50.f5+ 50...♔e5 51.♔f3

51...♔d6! It is very important that Black should be in time to arrive to the kingside if White tries to break on that side. 52.♔g3 (52.♔e4 52...♔e7! is the only move. (52...♔c6 53.♔f4

♔d6 54.g5+—) 53.♔d5 ♔d7= Black holds the opposition.) 52...♔e7 53.♔h4 ♔f7 54.♔h5 ♔g7!= Just in time.; 50.♔d4 50...♔d6 51.♔e4 (51.f5 51...♔c6 52.♔e4 ♔d6=) 51...♔e6= White cannot make any progress.]

50...♔d5? The final blunder! [50...♔e7! Black holds the draw with distance opposition. Let's check some attempts: 51.♔d3 (51.♔f3 51...♔e6 52.♔g3 ♔f7 53.♔h4 ♔g6=) 51...♔d7! The only move, holding the opposition! 52.♔c4 ♔c6! 53.♔d4 ♔d6 54.♔e4 ♔e6 White cannot win...]

51.♔d3! White gets the opposition and manages to squeeze the Black king move by move.

51...♔e6

52.♔c4! This is the only way, as 52.Ke4 as usual runs into f5!

52...♔d6 53.♔d4 ♔d7 [53...♔e6 54.♔c5+—]

54.♔c5 ♕c7 55.♕d5 Black resigned as 55...Kd7 is met by f5 Ke7 Kc6. We can see that even so simple looking endgames can sometimes be really difficult. **1-0**

Clash of the Titans

(17) Spassky, Boris V-Suetin, Alexey S[B48]

URS-chT, 1967

[Miton Kamil]

1.e4 c5 2.♘f3 ♘c6 3.♘c3 e6 4.d4 cxd4 5.♘xd4 ♔c7 6.♙e3 a6 7.♘b3 It is not good to take the knight away from a central and active square without any reasons . White more often plays [7.♔d2 With the plan f3, 0-0-0 and g4.; 7.♙e2 With the idea of castling kingside.]

7...♘f6 8.f4 ♙b4 Black decides to destroy the white structure. If the knight is already on b3, the move 8...d6 with the idea of transposing position to the Sheveningen is good for Black as well.

9.♙d3 0-0 10.0-0 ♙xc3 11.bxc3 d6

12.♖f3! White has to hurry with an active play otherwise with his bad structure and knight on b3 (which is very far from the kingside) Black can very easily get a big advantage.

12...e5 [12...♘g4!? Now White cannot avoid the exchange because of the check on b6. 13.♖h3 ♘xe3 14.♔h5 h6 15.♖xe3 b5 16.♖g3 Without a defending knight on f6 the position seems to be risky for Black, but it is only an illusion. 16...♔h8

17.f5 And now White's attack is easily stopped after 17...f6=+ (Xe5;Xc3)]

13.f5 White is going to put pressure on g7 and Black needs to look for counterplay in the center.

13...d5! 14.♖g3 ♘h8 We make these kind of moves without thinking because they are very natural. In this case the threat Bh6 was dangerous according to the engine: [14...dxe4 15.♕h6 (15.♕g5!?)

15...exd3! 16.♕xg7 And now comes the tricky (16.♖xg7+ 16...♙h8--+) 16...♙b6+! 17.♘d4 (17.♙h1 17...♘e4--+) 17...♕xf5 18.♕xf6+ ♕g6 19.♙d2 And White is not in time with Qh6 because after 19...♘xd4 The bishop on f6 is hanging and Black is winning, but of course it was impossible to see

this variations during the game.; 14...♘e7 With the idea of crushing the white center and here Bh6 is also not enough.]

15.exd5 ♘e7 [15...♘xd5 16.♙h5 f6 (16...♘xe3

17.f6! Otherwise Black plays f6 and avoids the attack. 17...g6 18.♙h6 ♖g8 19.♖xe3 ♙d6 20.♖f1↑ White has a strong initiative because of the weak black king. One of the ideas can be Re4-Rh4.; 16...♘f6 17.♙h4 ♖g8 18.♖f1↑ With a huge initiative as well.) 17.♖h3 And now comes the following forced line for example: 17...g6 (17...h6 18.♕xh6+-) 18.fxg6 ♕xh3 19.♕h6 ♖g8 20.♙xh3 ♘f4 21.♕xf4 exf4 22.♘c5 The knight is finally back in the fight. 22...♘e5 23.♘e6 ♙b6+ 24.♙h1 ♘xg6 25.♙f5 ♖af8 26.♘xf8 ♖xf8 27.♖e1 With more less equal play, but the white pieces are more active.]

16.♕c5 Thanks to this move Black is forced to take on d5 with the knight from f6 and then the white queen can be improved.

16...♘fxd5 17.♙g4 ♖g8 [17...g6 This move is inhuman because it makes the dark squares around the king weaker, but on the other hand the idea is very concrete: just to win the f5 pawn. 18.♙h4 (18.♖f1!?) 18...♘xf5 19.♕xf5 ♕xf5 20.c4

20...f4 21. f6+ g8 22. xf8 xf8 Black has a pawn for the exchange and White a bad structure, which is why the position is with compensation. 23. e1 23. Qxf5 doesn't work because of Ne2+. (23. e3) 23... h5 24. xf5 xg3 25. xe5 xe5 26. xe5 f5 27. c5∞Xb7]

18. h3 Preparing the Rxh7 sacrifice and not allowing Black to put the pawn on f6. [18. f1 18...f6 19. h3 h6 And black is very solid.]

18...f6 19. g5 ed5 20. f1 b6 A logical move. Black is developing his last pieces, the bishop and the rook. [20...f4 is a mistake as after 21. xf4! exf4 22. d4 d6 23. c5 White has a decisive attack.]

21. e4 Black needs at least two moves to consolidate his position, so White needs to play in a very dynamic way.

21...b7 [21...f4 22. xf4 exf4 23. d4 (23. xa8 23...bxc5+)]

23...b7! (23...xe4 24. fxh7+ xh7 25. h5#) 24. xb7 xb7 25. h4 d5! 26. xf6 d1+ 27. f2 xc2+ And Black will take on f5 next, with a very good position. Of course it was very hard to see this line.]

22. xd5 xd5 After this move White can still keep the pressure because the dark squared bishop can try to eliminate the strong knight on f6. It was much easier for Black to play [22...bxc5 23. xb7 xb7 White will probably manage to win one of the pawns but the position will be at least equal for Black.]

23. e7! Maybe Black missed this simple tactical trick. Objectively Black is still fine but he needs to solve some unpleasant practical threats.

23...c6? This move looks very natural because it supports two black pieces, but it is mistake. Let's check out other

possibilities: [23...♟xg2 The next inhuman idea showed by the engine. 24.♞xg2 ♞c6+ 25.♞ff3 ♞a7 Now Bxf6 doesn't work because of the pin on the g-file. 26.♟a3 ♞d7 A funny position. Black has only a pawn for the piece but White has many problems, a weak structure and his pieces are out of the play. Anyway it is hard to believe that Black has full compensation here.; 23...b5! was the correct move for Black! The idea is the same as in the game, to support the f6 square (Qb6 idea). 24.♞f2 Controlling the g2 square and not allowing any check from b6. (24.♞h6 Compared to the game, Black has the strong 24...♟xg2!-+) 24...♞c6 With the idea Rae8 or Ne4. 25.♞h6 ♟e4 26.♞xc6 ♟xg5 And now compared to the game the pawn on b6 is not hanging and the rook on f2 will be attacked with tempo with Ne4. Black is just better.; 23...♞xe7?? 24.♞xh7+ ♟xh7 25.♞h4+-]

24.♞h6! A strong move. White is very close to get rid of the strong knight on f6. [24.♞e1 gives white strong pressure as well. 24...♟e4 (24...h6

25.♟d4! ♟h7 (25...exd4 26.♞e6! And now the black queen is cut from protection over the 6th rank. 26...♟h7 27.♞hxh6 gxh6 28.♟f6+ ♟xf6 29.♞xf6+ ♞g7 30.♞xc6+-) 26.♟xc6 ♟xg5 27.♟xg5 ♟xc6 28.f6 White gets a strong attack even without the queens. For example: 28...♞ge8 29.♟xh6 gxh6 30.♞xh6+ ♟g8 31.♞e3+-) 25.♞h5 (25.♞h4 25...h6 26.c4 ♞xc4 27.f6 ♟xf6 28.♟xf6 ♞xh4 29.♟xh4 f6 From a practical point of view Black is back in the game.) 25...h6 26.c4 ♟xc4 (26...♞xc4 27.f6 ♟h7 28.fxg7 ♞c6 29.c4+-) 27.♞h4 ♟d5

28.c4! The same nice idea. White sacrifices both c pawns in order to disturb the black pieces. After 28...Bxc4 Black lost the knight and after 28...Qxc4 it is possible to push 29.f6+-.]

24...♖e4 [24...♗xg2? doesn't work because of 25.♖xf6+—; 24...♔c7 It is hard to admit one's mistake during a game, but maybe Black should have played this move. 25.♔h4 (25.♗xf6 25...gxf6 26.♔xf6+ ♖g7⇒ (Xg2;Xc3)) 25...♔c4 26.♔h3 gxf6 27.♗xf6+ ♖g7 28.♔xh6 ♖g8 29.♖f2 ♔xc3 30.♖d2 White activates his rook. 30...a5 (Xe1) 31.♔g5 a4 32.h4 axb3 33.axb3

It looks like Black is not able to avoid h5-h6.]

25.♖xc6 ♗xg5

26.♖d6! A strong move which forces Black to exchange a strong bishop for a bad knight.

26...♗xb3 [26...♗c4 27.♗xg5 ♗xf1 28.♔xf1 ♖gc8 29.♗d2±]

27.axb3 ♗e4 28.♖xb6 ♗xc3

29.f6! +— Otherwise Black would have played f6 himself.

29...♖ge8 [29...♖gc8]

30.fxg7+ ♔xg7 [30...♔g8!? Sometimes your opponent's pawn can work like a defender.]

31.♖b7 [31.♗f6+ 31...♔g8 32.♖f5 ♗e4 33.♗xe5 ♖ac8 34.♖b4 f6 35.♖xe4 ♖xe5 36.♖xe5 fxe5 37.c4]

31...♗e2+ 32.♔h1 ♗f4 Black decides not to give any material, but he knows the knight will be completely out of play. [32...♖ab8 With the idea of exchanging the active rook. Black lost the pawn now but at least he keeps some activity. 33.♖xb8 ♖xb8 34.♗f6+ ♔g6 35.♗xe5±]

33.g3 ♗g6 34.♗d6 ♗h8 35.c4 ♔g6 36.g4 Preventing f5 and Nf7.

36...♖e6 [36...f6 37.♗e7+—]

37.c5 White is winning and he only needs some more technical moves.

37...♔g5 38.h3 e4 39.♔g2 e3 Now the e-pawn will get lost.

40.♗f4+ ♔g6 41.♖b6 e2 42.♖e1 ♖c8 43.b4 a5 Black is trying to reduce the material but with a knight on h8 he has no chance to continue the fight.

44.♖xe2 axb4 45.♖xe6+ fxe6 46.♗e5 h5 47.♖xe6+ ♔f7

48.♖b6 hxg4 49.hxg4 ♔e7 [49...♘g6 50.♖f6++-]

50.♙xh8 ♖xh8 51.♖xb4 ♔e6 52.♖c4 ♔d5 53.♖c1 ♖g8
54.♔g3 ♔c6 55.♔f4 ♖f8+ 56.♔e5 ♖g8 57.♔f5 ♖f8+
58.♔e6 ♖g8 59.♖g1 1-0

Editorial Preface

What a fantastic week of chess has just ended, with many top tournaments and a lot of surprising results.

Let us start with the main events:

The Russian Championship was decided in a rapid tiebreak between Svidler and Nepomniachtch, who was very lucky to win the last round against Kramnik by just defending a bad looking position until Kramnik risked too much and lost. Svidler managed to win the Championship for the 7th time(!) by beating Nepomniachtchi 1.5-0.5 in a very convincing way in the tiebreaks.. The 3rd place went to Vitiugov.

24 In the female section first place went to Gunina, 2nd to Kosteniuk and 3rd to Pogonina.

27 In the Bazna Kings tournament nobody could stop Caruana. Second place went to Wang Hao and 3rd to Nisipeanu.

27 The Bilbao Masters was won by Aronian, 2nd place went to Adams and 3-4th to Mamedyarov and Vachier Lagrave.

The Indonesian Open was clearly won by Dreev with a very good 8.5/11. There was a big share for the 2nd place, all with 7.5/11, with names like Short, Moiseenko..

In the German Bundesliga the OSG Baden Baden had a very good start with 4/4 and is already the sole leader.

As usual, we are trying to bring you the most interesting commented games from the past week and the most spectacular combinations. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Adams, Mi(2753)

- Aronian, L.(2795) [C84]

6th Final Masters(5), 2013.10.11

[Balogh Csaba]

The decisive game of the Bilbao Masters tournament. We are in the penultimate round, when Adams and Aronian were leading the event with the same score.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♗f6 5.O-O ♙e7
Aronian was heading to his favorite Marshall Gambit and Adams decided to avoid it by the recently highly popular continuation.

6.d3

6...d6 Black delays playing b5. It has the advantage that after b5 Bb3, White cannot start a direct attack against the weakened queenside pawn structure with a4, but it has a minus as well, that after the text move, the white bishop is ready to retreat to the c2 square and it does not need to lose a tempo on the Bb3 move. [6...b5 is the other main line.]

7.c3 O-O 8.♖e1 By overprotecting the e4 pawn, White is ready to occupy the center with d3-d4! The forthcoming black reaction is a typical fight against this plan.

8...b5 9.♙c2 d5 Marshall players especially like this motif.

10.♘bd2 [In comparison to the Marshall, where the bishop stands on b3, after 10.exd5 Black does not need to sacrifice his e5 pawn and is able to recapture with the queen: 10...♙xd5]

10...d4 White is usually happy to see this slightly committing move, but on the other hand it leads to a highly unbalanced game, which was exactly what Aronian needed in this game. Black's optimal position would be to have the c7 pawn on c5. Now he is facing some difficulties in dealing with the d4 pawn, as the dxc3 bxc3 changes of the pawn structure clearly favor White as it strengthens his center. [10...dxe4 is the main line, which leads to a calm position where White's chances are considered to be slightly better. 11.dxe4]

11.h3 Useful prophylaxis against Bg4.

11...♘d7 Black improves his knight by transferring it to c5, where it could press the d3 pawn.

12.♘b3 White prevents Nc5 and tries to force Black to take on c3. Black has only one way to continue from a positional point of view. [12.♙b3!? is another motif that shows the drawback of the f6 knight's regrouping. White would like to install his bishop to d5.]

12...a5! Black saves his d4 pawn by the intermediate move of attacking the b3 knight, however it also allows White to improve his pawn structure on the queenside.

13.a4! Using the fact that Black cannot hold his b5 pawn anymore. [13.cxd4?! 13...a4 14.♘bd2 exd4 would be completely fine for Black. Next move is Nc5.]

13...bxa4 14.♘bd2! White intends to take back the pawn with the bishop and immediately transfers his knight to the nice c4 square after getting rid of the b5 pawn. [14.♖xa4 is a worse version than in the game. Black could play 14...♘b6 15.♖a1 a4 16.♘bd2 with a complex game.]

14...♘c5 [If Black tries to control the c4 square with 14...♘b6 15.♙xa4 ♘xa4 otherwise the e5 pawn falls 16.♙xa4 ♙d7 17.♘c4+= we end up in a slightly similar position to the game and White is better.]

15.♘c4 f6 16.♙xa4 ♘xa4 17.♖xa4 [It made sense to lure the bishop away from the a6 square by attacking c6. 17.♙xa4! 17...♙d7

18.♙c2+= Followed by cxd4 exd4 and Bd2 . White should be better with his strong knights and the target on a5.]

17...dxc3 18.bxc3 ♙a6! Black is looking for counterplay with the idea of Bb5 and when the rook leaves a4, he will play Bxc4.

19.♙b3 White temporarily saves the c4 knight by pinning the king, but later on it moves into the tempo Rb8 or Qb8. age

19...♙h8 20.♖d1 After protecting the d3 pawn, White threatens to take on a5.

20...♙b8! An excellent move! Aronian foresees the consequences and establishes the right placement of the pieces. [20...♖b8 was more natural, but it would have been an inaccuracy in view of 21.♙c2 ♙b5 22.♖a1 ♙xc4 (Black cannot save the a-pawn by playing 22...a4 23.♘a3!± as White will soon win the a4 pawn.) 23.dxc4 ♙c8

24. **Qd5**+= Followed by Qa4, Be3 and Black is lacking active counterplay. White could also try to collect the a5 pawn by playing Nd2-b3 later on. The doubled c-pawns are not bad at all, moreover the c3 pawn is especially strong as it controls the very important b4 and d4 squares.]

21. **Qc2** [The tactical justification lays behind the d1 rook. White cannot win the a5 pawn because of 21. **Qxb8** 21... **Rxb8** 22. **Qxa5?** is met by 22... **Qb5!** 23. **Qxc6** **Qxa4** 24. **Qxb8** **Qxd1**—+]

21... **Qb5** 22. **Ra2** **Qxc4** [22... **a4** 23. **Qa3** The a-pawn becomes more vulnerable on a4 than on a5, where the c6 knight safely protects it.]

23. **dx c4** Just like in the 20... **Rb8** line, White would like to put his rook to d5 and his bishop to e3. Aronian finds a clever maneuver to improve his knight.

23... **Qd8!** The knight is heading to c5! Black also plans to advance his pawn to c6 in order to control the d5 square.

24. **Qe3** **Ra6** Black has to guard his a-pawn, he intends to do it with his queen.

This is the moment, when Adams loses the thread and he finds a wrong plan, after which the initiative passes to Black. [24... **Qe6** 25. **Qda1**+= The a5 pawn will fall.]

25. **Qa4?** With ideas like invading on d7 or playing Qb5, but as we will see, Black is just in time to consolidate his position and then the white queen just gets under attack. [His idea was correct, but he should have started with 25. **Qd5!** 25... **Qa8** (25... **Qb7** is better, although White's position is preferable. 26. **Qh4**!) 26. **Qa4!** **Qb7** 27. **Qd7**± With a clear advantage for White. He must also play for an attack with Nh4-f5!; 25. **Qh4** also comes into consideration.]

25... **Qe6** 26. **Qb5** [26. **Qd7** runs into 26... **Qc5!**; The problem of the previous move is that after 26. **Qd5** Black has 26... **Qb1+**! 27. **Qh2** **Qxe4** dropping the important pawn.]

26...Qa8! Black obviously avoids to improve White's pawn structure. He is threatening with the strong positional idea of consolidating the c5 square by c6 and when the queen leaves, then Bc5.

27.c5 This is a weakening, but White was already in deep positional trouble. [27.♖da1 is strongly met by 27...c6! 28.♙a4 ♟c5=+; 27.♖d7 once again runs into 27...c6 28.♙a4 ♟c5+]]

27...♖b8 28.♙c4 ♙c6! Black wins the c5 pawn.

29.♟e1 [29.♖d5 just temporarily saves the pawn. 29...♙b5 (29...a4+ followed by Ra5 is also good.) 30.♙xb5 ♖xb5+]]

29...♟xc5 [29...♟xc5+ was also strong.]

30.♖d5 ♟b3+ Black ended up with a clear extra pawn and the a5 pawn becomes a dangerous passer. White's position is basically hopeless.

31.♙d3 ♖aa8 32.♟c2 ♟f8 After some preparation, Black is going to advance his a-pawn.

33.♟a3

33...♙a4! This forces White to trade queens in order to avoid dropping a piece, but it helps Black to convert his advantage.

34.♙c4 ♙xc4 35.♟xc4 a4 36.♟f1 a3 Black threatens to play Ra4, kicking out the knight from its outpost.

37.♖d7 [37.♟e2 37...♖a4 38.♟d3 is met by 38...c6 39.♖d7 ♟c5=+ Black works out the c5 square for his knight.]

37...♟g8 [37...♟a5 38.♟xa5 ♖xa5 39.♖xc7 ♖b2 40.♖c8 ♟g8=+ was another way to win.]

38.♟e2 White already wants to take on c7 as in comparison to the 38.Rxc7 line, White will be able to protect his knight with Kd3 at the end. [After 38.♖xc7 Aronian wanted to play

38...♖c8! 39.♖xc8 ♖xc8 Winning the c3 pawn as the a3 pawn is untouchable. 40.♟xa3? ♖a8=+]]

38...♖b7 Ra4 is coming next.

39.♔d3 ♜a4 40.f3 [40.♜d8 40...♔f7—+ is also over.]

40...♞c5 The knight's jump to c5 would be fatal from White's point of view.

41.♞d2 ♔f8 [41...♞a7—+ was strong also, with Nc5 next.]

42.g4 ♞a7 43.♞d6 cxd6—+ White resigned in view of Nc5 checking the rook. It was amazing that only one wrong plan with Qa4-b5 has completely changed the outcome of the game. **0-1**

(2) Ponomarev, R.(2751)

- Caruana, F.(2779) [B40]

7th Kings Tournament(8), 2013.10.14

[Balogh Csaba]

Caruana was already a point ahead of the field, but he continues to play aggressively in all his games, even with the black pieces.

1.e4 c5 2.♞f3 e6 Black is heading for the Paulsen defence.

3.g3 This harmless-looking move is becoming more and more popular even on the highest level. Mainly thanks to the efforts of, Michael Adams who uses this weapon really effectively against his opponents.

3...♞c6 4.♞g2 ♞f6 5.♔e2 White's future plan is connected with occupying the center by playing c3-d4, therefore he protects the e4 pawn with the queen and not with d3.

5...e5!? This is basically the novelty on the highest level. Definitely a prepared one by Caruana, because he was also suffering before against this opening.

6.O-O ♞e7 Caruana spares the d7-d6 move, as we will see, not without reason.

7.c3 O-O 8.d4 Ponomarev tries this tempting pawn sacrifice in order to grab the initiative, but Caruan was very well

prepared! [8.♘a3 is another plan. Black had probably prepared 8...♖e8 9.♘c4 ♕f8 with the idea to play d5 in one move.]

8...cxd4 9.cxd4

9...d5!? This spectacular move came more or less without thinking, showing that Caruana had serious analysis about this position. [It is not obvious how White wanted to reply on the simple 9...exd4 10.e5 ♘e8! 11.♖d1 d6 Black seems to be fine here as well.]

10.exd5 [10.♘xe5?! is bad in view of 10...♘xd4! 11.♖d1 dxe4=+; Black is completely fine after 10.dxe5 10...dxe4 11.exf6 exf3 12.♖xf3 (Black takes more in the line 12.fxe7? 12...fxe2 13.exd8=♖ exf1=♖+ 14.♕xf1 ♖xd8=+) 12...♕xf6 13.♘c3 With a balanced game.]

10...♘xd4 11.♘xd4 [The point is that 11.♖xe5? loses to 11...♘c2!-+]

11...exd4 12.♖e5 [12.♖d1?! is met by 12...♕g4! White hardly wanted to play f3, nor to trade the bishops.; 12.♖c4 12...♖b6 After developing the Bf5, the rook comes to c8 with an important tempo.]

12...d3 13.♘c3 [13.♖d4 13...♕f5 Black saves the pawn.]

13...♖e8!

14.♕f4? A blunder or just a misevaluation of the arising position?! The e7 bishop has a good square to use for a discovered attack. [14.♖d4 should have been played. 14...♕f5 With a playable position for both sides.]

14...♕a3! 15.♖d4 ♕xb2 16.♖xd3 [16.♖ab1? loses to 16...♕xc3 17.♖xc3 ♘xd5-+]

16...♕xa1 17.♖xa1 ♠ White has pinned his hopes on the bishop pair and the strong d-pawn. On the other hand Black is a clear exchange up and he is able to block the d-pawn properly on d7.

17...♕d7 18.h3 [18.d6 is met by 18...♕c6! 19.♕xc6 bxc6 ♠ White lost his bishop pair.]

18...♖c8 Bringing the last piece to the game.

19.♕e3! White transfers the bishop to d4 in order to stabilize

his c3 knight. [19.♖d1 is met by 19...♙a5! –+]

19...♙f5 Caruana decides to simplify the position. The main achievement would be to get rid of one of the bishops, but at the moment it is not possible.

20.♙xf5 ♖xc3 21.♙d4 [21.♙xa7? naturally does not work since after 21...b6 22.♖b1 ♘d7 the bishop gets trapped.]

21...♖c4 22.♖d1 White also coordinates his pieces, but he is still just an exchange down.

22...♙d6 [The machine suggests 22...a6! in order to avoid the idea that happened in the game and also to start advancing the queenside pawns with b5, which will be necessary in the future to convert the advantage.]

23.♙f1 ♖b4 24.♙c3 The bishop pair starts to work. They are chasing the rooks.

24...♖be4 25.♙b5 [25.♙d3? runs into 25...♙xd5! 26.♙xd5 ♘xd5 27.♙xe4 ♘xc3 –+]

25...♙c5!! Only with this great move Black preserves his advantage, but it required a lot of calculations! [25...♖e7 would already have been met by 26.♙d3! and suddenly Black is facing problems...

26...♙xd5? does not work anymore because of the weak back rank: 27.♙xd5 ♘xd5 28.♙xe4 ♘xc3 29.♖d8+]

26.♙xf6?! [26.♙xe8 was more tenacious, although White remains in trouble in the end: 26...♙xc3 27.♙b5 g6! 28.♙g5

28...♖e5! Black wins material: 29.♙c1 (29.♙f4 29...♘xd5+; 29.♙xf6 29...♖e1+! is the point!) 29...♙xc1 30.♖xc1 ♖xd5+]

26...♖e1+! Black wins in all the lines now. [Of course not 26...♙xb5?? 27.♙g5 ♖e1+ 28.♙h2+– g6 29.♙h6]

27.♙h2 [27.♖xe1 27...♖xe1+ 28.♙g2 (28.♙h2 28...gxf6 29.♙d3 ♙f8 –+; 28.♙f1 28...gxf6 –+) 28...♙xb5 wins for Black. He is covering the back rank mate on e8, while after 29.♙g5 Black mates first: 29...♙f1+! 30.♙f3 ♙e2+ 31.♙g2 ♙e4+ 32.f3 ♙e2#; 27.♙g2 27...♙xb5 28.♖xe1 ♖xe1 transposes to 27.Rxe1 line.]

27...♖xd1! [White gets very good drawing chances after 27...gxf6 28.♙xe8 ♖xd1 29.♙g4+! ♙f8 30.♙xd1 ♙xf2+ 31.♙h1 ♙xe8 32.♙a4+]

28. ♖xe8

28... ♖xd5! Perfect calculation by Caruana! [28... gxf6 would once again have been met by 29. ♖g4+ ♔f8 30. ♖xd1]

29. ♖e5 [29. ♖g4 29... ♖xf2+—+; 29. ♖xf7+ is also hopeless: 29... ♔xf7 30. ♖e5+ ♔e7 White quickly runs out of checks and he loses. 31. ♖g5+ ♔e8—+]

29... ♖xe5 30. ♖xf7+ ♔h8 The game is basically over. White is a complete exchange down without any compensation. The rest is easy. Caruana had foreseen this line before playing 25... Qc5!

31. ♖d7 ♖e7 32. ♖f4 White tries to keep the queens on the board to retain some minimal practical chance.

32... ♖f6 33. ♖d2 b5 Black starts to create his passed pawn.

34. ♖g4 h5! A clever idea to weaken the position of the white king and to disturb him later on with annoying checks.

35. ♖d1 h4 36. ♖g4 ♖e8 37. gxh4 ♖xh4 38. ♔g2 ♖e7 Black is not in a hurry. He can do whatever he wants, he will keep his winning advantage because White is unable to create any compensation for the exchange.

39. ♖f3 ♖d8 40. ♖f4 ♖f6 The time trouble is over. Ponomarev continues to play on for a while.

41. ♖g4 g6 42. ♖e4 ♖g5+ 43. ♔f1 a5 44. h4 ♖f5 45. ♖c6 ♖f8

46. ♖c3+ ♔h7 [White resigned in view of 46... ♔h7 47. ♔g2 b4 48. ♖e3 ♖xf3+! 49. ♖xf3 ♖xf3 50. ♔xf3 a4—+ A convincing victory! It will be interesting to follow the development of the 5...e5 move.] **0-1**

(3) Bacrot, Etienne(2730) - Giri, Anish(2749) [B52]

Bundesliga 2013-14(1.1), 2013.10.12
[Arkadij Naiditsch]

We are in the first round of the Bundesliga season 2013/2014. Our opponent Emsdetten came out with an almost full line-up, so we did not expect to have an easy match, but we won it with an amazing 6.5-1.5. The first one to bring us in the lead was Etienne, who really completely outplayed his younger opponent from an about equal position and managed to finish the game with a bang!

1.e4 c5 2.♘f3 d6 3.♙b5+ Of course this is not the main move to fight for an opening advantage, but it is well known that Giri is usually very well prepared and it is a good idea to take him out of opening as soon as possible.

3...♙d7

4.c4 It seems like the French players have been working a bit on this rare move. Just a few weeks ago Fressinet tried it against Gelfand, but without any success.

4...♘f6 [The idea behind the move 4.c4 becomes clear after 4...♙xb5 5.cxb5 and the Black knight cannot develop to his optimal square c6.]

5.♘c3 g6 Very solid play by Black. The bishop on g7 is going to take a nice position.

6.O-O ♙g7 7.d4 Sooner or later White needs to push d4 anyway move, so there was no reason to wait...

7...cxd4 8.♘xd4 O-O 9.♙xd7 ♖xd7 Now we got a position that could also be reached by playing 4.Bxd7, so we are more or less back to the main line after a different move order.

10.b3!? This is probably one of the only moves to go on for White. [10.f3 with the idea of playing Be3 next doesn't lead to anything for White: 10...♖c8 11.b3 d5! This move is nothing new, it was already played many times. 12.exd5

12...♘xd5! Easy but pretty! :) **13.♘xd5 e6** Black wins the piece back with an equal position.]

10...♘c6 11.♙b2 a6 A logical move with the idea to play Nxd4 and b5 next, breaking White's pawn structure, but I am not sure it was the best one. [11...e6!? followed by Rfd8 and d5 could be an interesting option for Black, as it is hard to imagine that White has big chances to be better here.]

12.♘xc6 Another tricky move by White, giving Black the choice with what to take on c6.

12...♖xc6?! This already looks like a clear positional mistake. [Better was 12...bxc6 13.♖e1 ♖c7 and if White is better, it is a

minimal advantage.]

13.♘d5! With this move White is fixing his slightly better position. It is already time for Black to be careful in order to not get into serious trouble.

13...♘xd5?! Once again Black doesn't feel the danger. [13...♖fe8 And only then decide whether to take on d5 or not would have been a clearly better choice. Black should not be afraid of 14.♘xf6+ ♕xf6 15.♕xf6 exf6 followed by Re6, with an about equal position.]

14.exd5 ♖c5 15.♕xg7 ♔xg7

16.♖e1 Only heavy pieces are left on the board and we can clearly see that White is better. The pressure on the e7 pawn is quite unpleasant and Black's play with b5 is a bit too late.

16...♖fe8 [Maybe Black could have tried 16...e5 17.dxe6 fxe6 but after 18.♖d2 White has a slightly better position and very pleasant play by putting pressure on the d6 and e6 pawns.]

17.♖d2 The queen is perfectly placed on d2. White has multiple ideas: to play Rac1 and b4 or maybe to play Re4-Rae1 and Rh4, with some attack on the black king.

17...b5? Another positional mistake by Giri. [It was really time to look for some play: 17...e5 18.dxe6 ♖xe6 And Black is still holding, although the position is already very unpleasant.]

18.♖ac1! Simple and very strong! Black is suddenly in big trouble! White wants to play b4 next.

18...♖a7?! Once again Black doesn't choose the best and after this move White's position is probably almost winning! [18...bxc4 19.♖xc4 of course looks very bad for Black.; The best chance was to play 18...b4 and of course White is better, but Black is still in the game.]

19.b4! Etienne gives his opponent a very hard time. Black now has a choice whether to give away the c-file or let White play c5. Both options sound very bad.

19...bxc4 [19...♖ac8 20.c5! And of course Black cannot take on c5 because of the check on d4. 20...dxc5 21.bxc5 ♖xc5 22.♖d4+]]

20.♖xc4 h5 [It would be great for Black to exchange one pair of rooks, but of course it doesn't work: 20...♖ac8? 21.♖c3+--]

21.♖c3+ ♔g8 22.♖c7 ♖b6 White reached all that he could dream about. The c-file is under control, the 7th rank is covered and Black doesn't have any counterplay at all.

23.a4! Another strong move by White. Black's only counterplay could be based on playing a5 at some moment and opening the line, but this could never work because of White's b5 reply.

23...♖ab8 24.♗e4 White blocks all of Black's counterplay again.

24...f6 Black's position is hopeless but how to finish the game?!

25.g4! Another very nice strategic decision. White is not only going to put pressure on the queenside, but also crush the kingside.

25...♖b7 Giving White a nice finishing move...

26.♗xf6! And Etienne found it! I guess it was a great pleasure for him to win such a game, completely outplaying his opponent and scoring an important win for the team. 26...Qxc7 27. Qxg6 Kf8 28.Rf4 mate could have illustrated the game even more! :) **1-0**

(4) Caruana, F.(2779)
- Wang Hao(2733) [C42]

7th Kings Tournament(9), 2013.10.15
[Arkadij Naiditsch]

Caruana is playing really great chess lately and it was no different in the Bazna Kings tournament. We are in the 9th round and Caruana was already leading the event with 1.5 points advantage. In today's game, there been more pressure for Caruana than just the tournament victory as in case of a win he would cross the 2800 mark for the first time in the live rating list. He was so close before making a mistake and letting Wang Hao take control over the game.

1.e4 e5 2.♘f3 ♘f6 Somehow in the last games, the Petroff is back. For many years it was played by Gelfand and Kramnik and was solid as a rock. Then both Gelfand and Kramnik switched to the Sicilian and Berlin and the Petroff was left alone.

3.♘xe5 d6 4.♗f3 ♘xe4 5.♗c3 One of the most popular lines, which was played a lot by Karjakin for example.

5...♘xc3 6.dxc3 ♕e7

7.♕e3 White's idea in this line is to castle queenside and launch quick play on the kingside against the black king. On the other hand, Black's position is very solid.

7...O-O 8.♔d2 b6 A rare move. Usually Black was playing 8...Nc6 which also looks like the most logical move to me.

9.O-O-O ♘b7 10.♞d4! A very nice move. White quickly realized that by developing the bishop to b7, Black has weakened the f5 square, which is a very nice one for the white knight.

10...♞c6! A nice reply by Black. Wang Hao is planning to get the rid of the white knight on f5 by playing Ne7 in the future.

11.♞f5 ♘f6 12.♞g3 [12.h4 also looks like a possible way to play for White.]

12...♞e7 13.♞h5 ♞f5 14.♘f4 The most fighting move for White. [White could also just have played the simple 14.♞xf6+ 14...♔xf6 15.♘f4 and I think that thanks to the bishop pair White's position should be slightly better.]

14...♘e5 White has to give up the bishop pair.

15.h4! A very typical move. White's idea could also be to play Rh3 next.

15...g6 [15...f6 16.♘d3 With a nice position for White.]

16.♘d3! White is going for the complications and this is absolutely the right decision.

16...gxh5 17.♘xf5 ♔f6 18.♘xe5 dxe5 19.♘d3 So some exchanges have been made and we have to take a fresh

look at the position. Things are pretty complicated, but the position of the white king is much safer than Black's one and in the future White could maybe combine the play on the queenside with the attacking chances. All in all White should be better here.

19...♔g7 A solid move as the king will be better placed on g7 than on g8 anyway.

20.♔e2 White is attacking the h5 pawn and thereby forcing the black queen to take a bad position on h6.

20...e4 21.♘c4 ♔h6+ 22.♔b1 ♖ad8 Now White has a wide range of nice moves.

23.a3 Caruana does not hurry to launch the final action. [23.g4!? also looks interesting.]

23...f5 Black has consolidated his position a little bit.

24.♘b3 White wants to keep another attacking option, to play Qc4 at some point.

24...♔g6? A very strange move. Black kills his own queen on h6. [24...c5 looks much more solid, with pretty unclear play.]

25.♖h3! A very nice move. White is provoking Black to play f4, which will weaken the structure.

25...f4 26.♖xd8 [26.g4 immediately also looks interesting.]

26...♖xd8 27.g4 The black king is in big danger!

27...c5 This move is needed to protect against White's Qc4.

28.♖h1 A very natural move. White brings his rook back into play.

28...f3 White was threatening to play gxh5 and Rg1.

29.♖c4 ♜d5 Black is just about holding things together with only moves !

30.♖a4 ♜xb3 31.cxb3 White is threatening to play Qxe4 or Qc6.

31...♖f4 Once again Black finds one of the only moves!

32.♖e1?! This move looks strong, but it gives Black enough time to escape. [32.♖c6+! would put Black in front of big problems... 32...♖f7 33.♖b7+ ♜f8 34.gxh5 White should be much better here.]

32...hxg4! Wang Hao doesn't miss his chance.

33.♖xe4 ♖f5 Winning a tempo by pinning the white rook.

34.♜a2 And here comes the fantastic

34...♜h5!! The black king is not only defending the g4 pawn, but it will soon become the main piece of Black's play.

35.♖e1 h6 Not the best move, but both players were probably

already in time trouble.

36.♖xa7 g3! This was Black's key idea! His king is going to h3 and g2 via g4!

37.fxg3?! [White missed his chance to make a draw by playing 37.♖g7 37...gxf2 38.♖e5 ♖xe5 39.♖xe5+ ♜g4 White's position looks lost, but in fact it is a draw: 40.♖e4+ ♜g3 41.♖g6+ ♜h2 42.♖c2 ♜g2 43.♖g6+ ♜h1

44.♖b1+ Black doesn't have anything better than a draw.]

37...f2 38.♖f1 ♜g4 Now it is clear that Black took over the game and the position is probably close to winning for Black.

39.♖g7+ ♜f3 40.g4 White is trying to somehow find some counter chances, but there are none...

40...♖f4 Black stays solid.

41.♖b7+ ♜e2 The black king has reached his final destination! :)

42.♖b1 ♖d3 This move is also winning, but Black missed the following pretty win: [42...f1=♖ 43.♖e7+ ♜d2 44.♖xd8+ ♜c2! What a position! 45.♖xf1

45...xf1 And White is hopeless against the mate on b1.]

43. g2 White is hoping for his g-pawn to save him. [43.xb6 43...f1= would lead just to a winning position for Black, as a rook up is too much.]

43...d1 Wang Hao is chooses the most simple win.

44.xd1 xd1 45.f1+ d2 White cannot do anything against Qg3-Qg1.

46.g5 hxg5 47.hxg5

47...g3 48.b5 d3 This game was clearly a big pity for Caruana who had his opponent on the ropes, but the creative play of Wang Hao and a bit of luck brought him back into the game. What is sure is that we will very soon see Caruana over the 2800 ELO line. **0-1**

Endgame section

(15) Bezold, M.(2524)-Bartel, M.(2638)

German league, 2013.10.13

[CE Team]

Black has some initiative due to the space advantage and his superior knight. However it should not objectively be possible to win this, as White has no weakness and his queen is ready to create counterplay by Qe8 or Qxa7. The very resourceful Polish GM finds a very deep idea for Black...

35...♖f3+ 36.♗xf3 [36.♔f1? would have lost on the spot after 36...♕d2! with decisive threats. White can only defend with 37.♕d1 but it drops two pawns after 37...♕xd1+ 38.♗xd1 ♘d2+ 39.♔e2 ♘xc4-+]

36...exf3 White was in huge time trouble and he fails to realize his opponent's deep idea.

37. ♕xa7? [37. ♖e8! was more careful. 37... ♔g4 And now White has (37... ♕d3 is met by the same draw as it could have happened in the game after 37. Qxa7 Qd3.) 38. ♕g8+! ♔h3 39. ♕d5!= A very important defence and White wins the f3 pawn and solves all his problems.]

37... ♔g4!! Black is heading to g2 with his king, where it is going to be covered from all the checks and attacking the critical f2 pawn. He also creates the threat of Qd3-e2 mate. [At first sight 37... ♕d3 looks like a win, but White survives after 38. ♕g7+! (38. ♕e7+ 38... ♔h5 39. ♕f7+ (39. ♕h4+ 39... ♔g6—+) 39... ♔g4 40. ♕g6+ ♔h3—+) 38... ♔h5

39. g4+! The only move and White gives perpetual check after (39. ♕f7+? 39... ♔g4—+) 39... fxg4 40. ♕e5+ ♔h4 41. ♕h2+ ♔g5 42. ♕e5+ ♔g6 43. ♕e6+=]

38. ♕g7+? [38. ♕a4! was White's only practical chance. However after 38... ♕e5! Black seems to be winning. (White's idea was to meet 38... ♔h3? with 39. ♕d1! and the f3 pawn is under attack. 39... ♕c6 40. ♕d5±) 39. ♕c2 ♔h3 Black threatens to play Kg2 and it leads to a similar position as in the game. The only move is 40. ♔f1 ♔h2!

Due to his weak king, White cannot save his position. Let's see some examples: 41. ♔d1 is the most tenacious move, but it also loses after (41. ♔d2 41... ♔e4—+ Black wins in view of the Qb1 and Qxc4 threats.; 41.a4 is met by 41... ♔e4 42. ♔xe4 fxe4—+ and White cannot create a passed pawn anymore with b4, so he will soon end up in zugzwang and lose the f2 pawn.) 41... ♔e4 42.b3

42...h5—+ In this fantastic position, despite his extra pawn, White is in zugzwang. 43. ♔e1 ♔g2—+ And again White has no moves...]

38... ♔h3 39. ♔b7 [39. ♔c3 39... ♔g2 40.b4 was another defensive attempt, but it also fails for instance after 40...cxb4 41.axb4

41...h5! Black intends to open a route to the f2 pawn. 42. ♔a3 (42.c5 42...bxc5 43.bxc5 ♔a6—+) 42...h4 43.gxh4 ♔h2—+ followed by Qg1-f2 and the f-pawn promotes automatically.]

39... ♔g2 40. ♔d5 ♔f6 41. ♔d2 h5! With the idea of h4 gxh4 Qxh4 and winning the f2 pawn because of the mate threat with Qh1. [White resigned despite being a pawn up. His decision is completely justified in view of the following lines: 41...h5 42. ♔c2 (42. ♔c3 The pawn endgame loses after 42... ♔xc3+ 43.bxc3 ♔g1—+ Black only plays Kg1-g2 until White runs out of waiting moves.) 42...h4 43.gxh4 Otherwise h3-h2... 43... ♔xh4 44.b4 ♔h1+ 45. ♔d2 ♔f1—+ followed by Qxf2 and the f3 pawn promotes soon. A very interesting endgame, which shows that even in queen endgames the activity is the most important factor. White's extra pawn was completely useless.] **0-1**

(16) Mamedyarov, S.(2759)-Vachier Lagrave, M.(2742)

6th Final Masters(5), 2013.10.11

[CE Team]

41. ♖e4 After a very fighting game, Black is so close to win the game. A passed pawn on the c-file plus a chance of getting another passed pawn on the h-file give Black very good winning chances because as we know, in knight endgames passed pawns are becoming especially dangerous.

41...g4! Black doesn't wait and immediately creates a passed h-pawn, which looks like the right plan.

42. ♘f5 White transfers his knight to d4, from where it will stop the c-pawn from advancing and at the same time push away the black king.

42...h3 43.gxh3 gxh3

44. ♜d4+ We are at the critical moment of the game now.

44...♔d7? What a miscalculation. Maybe Maxime was thinking that any move is winning?! [44...♔f7! was the correct move! 45. ♖f3 ♜d5 46.e6+ And here comes the difference to the game: 46...♔f6! The black king is taking a perfect position on f6. 47. ♖g3 ♜f4 Now Black is easily winning, White cannot do anything about Black's next move Nxe6 or if the white knight would leave the d4 square, then Kxe6. 48.e7 (48. ♖h2 48...♜xe6 Black is winning.) 48...♔e7 49. ♖xf4 h2 50. ♜f5+

50...♔f6! Here is the difference to the game: in the game the black king is on e6 and it means a loss of a very important tempo for Black. 51. ♜g3 c3 52. ♖e3 ♖g5 53. ♖d3 ♖g4 54. ♜h1 ♖f3 55. ♖xc3 ♖g2 56. ♖d2 ♖xh1 57. ♖e2 ♖g2 And Black is just in time to win the game.]

45. ♖f3 ♜d5 46.e6+! It sounds shocking, but it seems to be a draw!

46...♔e8 [46...♔e7 47. ♖g3 ♜f4 48. ♖xf4 h2 49. ♜f5+ ♔xe6 50. ♜g3 The same position with the black king on f6 is winning, but now it is a draw. 50...c3 51. ♖e3 ♖e5 52. ♜h1 c2 53. ♖d2 ♖f4 54. ♖xc2 ♖f3 55. ♖d2 ♖g2 56. ♖e2 ♖xh1 57. ♖f1 Draw.]

47. ♖e2! The white knight is stopping the c-pawn while the king takes care about the h-pawn.

47... ♜e7 48. ♜g3 ♜xe6 49. ♜xh3 ♜e5

50. ♜g3 Once again the white king is just in time to come back.

50... ♜e4 51. ♜f2 ♜d3 52. ♜e1 And Black has no chances to advance the c-pawn. The position is a draw.

52... ♜c2 53. ♖d4+ ♜b2 54. ♖e2 ♜c2 55. ♖d4+ ♜c3 56. ♖e2+ ♜d3 57. ♖c1+ ♜c2 58. ♖e2

58... ♜b3 59. ♜f2 And Vachier Lagrave had enough.

59... c3 60. ♖xc3 ♜xc3 What a super interesting endgame!
1/2-1/2

Clash of the Titans

(17) Tal, Mihail-Sokolov, Andrei[E04]

World Cup, 1988

[Miton Kamil]

1.d4 ♘f6 2.c4 e6 3.g3 d5 4.♙g2 dxc4 5.♘f3

5...c5 One of the solid lines against the Catalan. Black immediately fights for the center.

6.O-O ♘c6 7.♘e5 White had two other options: [

a) 7.dxc5 7...♙xd1 8.♖xd1 ♙xc5 9.♘bd2 c3 A typical move which destroys the white structure. 10.bxc3 O-O 11.♘b3 (11.♘e1!? An interesting plan recently.) 11...♙e7 12.♘fd4 ♙d7 (12...♘xd4!? 13.cxd4 ♘d5 With the idea b6-Bb7. The white structure improved but the knight on b3 is not perfectly placed.) 13.♘xc6 ♙xc6 14.♙xc6 bxc6 15.c4 With a small plus for White in the endgame.;

b) 7.♙a4 7...♙d7 (7...cxd4 8.♘xd4 ♙xd4 9.♙xc6+ ♙d7 10.♖d1 ♙xd1+ (10...♙xc6 11.♙xc6+ bxc6 12.♖xd4 White has a huge strategical advantage because of the weak black structure.) 11.♙xd1 ♙xc6 With good compensation.) 8.♙xc4 cxd4 (8...b5 With c4 next, leading to more complex kinds of positions.) 9.♘xd4 ♖c8 10.♘c3 ♘xd4 11.♙xd4 ♙c5 12.♙h4 O-O 13.♙g5

(13.♙xb7 13...♖b8 With Rb4 next.) 13...h6 14.♙xf6 ♙xf6 15.♙xf6 gxf6 16.♙xb7 ♖b8=]

7...♙d7 Black is going to solve the problems with the h1-a8 diagonal as soon as possible.

8.♘a3 [8.♘xc6 8...♙xc6 9.♙xc6+ bxc6 10.dxc5 ♙xc5 11.♙a4 O-O 12.♙xc4 ♙d5] In this case White of course has a better structure but Black's development is very good and is enough to create counterplay on time.]

8...cxd4 9.♘axc4 ♙c5 Black had two other options which were good as well. [9...♙e7 ; 9...♖c8]

10.♙b3 O-O 11.♙f4 Black is a pawn up but White has compensation thanks to his active pieces. [11.♙g5!?!; 11.♙xb7 11...♘xe5 12.♘xe5 ♖b8 And Black is fine.]

11...♔c8?! Black wants to defend the knight on c6 to play b6 next and solve the problems with the b7 pawn. It seems to be logical but is not accurate. Black should have played [11...♖c8 The idea is the same, just play b6 and now if White takes 12.♔xb7 then 12...♘xe5 13.♘xe5 (13.♙xe5 13...♘d5 With Bc6 next or if White takes twice on d5, then Black gets a strong initiative over the light squares.) 13...♖b8

Xb2 14.♔xb8 ♔xb8 15.♘xd7 ♔b5 16.♘xf8 ♙xf8 And in this case the queen should be better than two rooks, two white pawns are hanging and Black also has the plan e5-e4.]

12.♖fd1 [12.♘d3 12...♙e7 13.♘d6 ♙xd6 14.♙xd6 ♖d8 15.♖fc1 ♘d5∞; 12.♖ac1 12...♘d5 13.♘xd7 ♔xd7 14.♘e5 ♘xe5 15.♙xe5 ♖ac8 16.♖cd1 After taking the pawn on d4 White will only keep a symbolic advantage because the bishop will be better than the knight, even if Black already doesn't have any problems with the b7 square.]

12...♖d8 [12...♘d5 13.♘xd7 ♔xd7 14.♘e5+=]

13.♖ac1 The white pieces are perfectly placed, Black has less space and is not easy to play for him.

13...♘d5 [13...♙e8 14.♘xc6 ♙xc6 15.♙xc6 bxc6 (15...♔xc6 16.♘a5 ♔b6 17.♘xb7 ♖dc8 18.♘xc5 ♖xc5 19.♖xc5 ♔xc5 20.♔b7+= With Rc1 next.) 16.♘e5 ♖d5 17.♔a4 With strong pressure over the c-file.]

14.♘xf7! A nice tactical idea! After Qc8-Rd8-Nd5, all black pieces moved away from the kingside, which is why this hit on f7 is very unpleasant.

14...♔xf7 15.♘e5+ ♘xe5 16.♙xe5 b6 The only move. Now we also can see the disadvantage of the queen being placed on c8.

17.♔f3+ ♔g8 18.♔g4 The white pieces are coming to the other side with tempo in order to pressure the black king.

18...g6 19.♙e4 [19.b4 19...♘xb4 20.♔h4 ♖f8 And black avoids the threats of Qf6 and Qh6.]

19...♙e8? The decisive mistake. Black wants to defend the g6 square but he is now losing the control over e6. Correct was [19...♙c6 20.♙xg6 hxg6 21.♔xg6+ ♔f8 and after sacrificing on g6 the position is probably unclear because White is already

two pieces down and is not easy to find a forced win. 22.♖d3 ♘e7∞]

20.b4! (Xe6)

20...♗xb4 doesn't help... [20...d3 21.bxc5 (21.♖xd3 21...♗xf2+) 21...dxe2 22.♖xe2 bxc5 23.♗a1 With a decisive attack over the dark squares.]

21.♗xa8 ♖xa8 22.♖xe6+ ♗f7 23.♖f6 ♖f8 24.♖h8+ ♖e7 [24...♗g8 25.♖g7+-]

25.♗f6+ ♖d7 26.♗xd8 ♗c6 [26...♖xd8 27.♖xd4+ ♗xd4 28.♖xd4+ ♗d5 29.e4+-]

27.♗f6 ♖xh8 28.♗xh8 ♗xa2 White has a winning material advantage but still needs a few accurate moves because two passed pawns can bring Black some practical chances.

29.e3 a5 30.♗xd4 ♗xd4 [30...♗xd4 31.exd4 ♖d6 Nothing changed at all.]

31.exd4 ♗d6 32.d5 The main idea now for White will be to give the rook for bishop and pawn.

32...a4 33.♖c6 ♗c5 [33...b5 34.♖b6 And now for example: 34...♗c4 35.♖b7+ ♖d8 36.♖e1 White activates the rook next. 36...a3 37.♖e6 ♗c5 38.♖xh7 a2 39.♖a6 ♗xd5

And now comes the nice trick 40.♖a8+ ♗xa8 41.♖h8+ ♖e7 42.♖xa8+-]

34.♖c1 ♗d4 [34...♗xd5 35.♖6xc5 bxc5 36.♖xc5 ♖d6 37.♖a5+-]

35.♖6c4! ♗xc4 36.♖xc4 b5 37.♖xd4 a3 38.♖d1 b4 39.♖a1 ♖d6 40.♖f1 And White is on time!

40...♖xd5 41.♖e2 After 41...Kc4 42 Kd2 Kb3 43 Rb1! Ka4 44Kc2 a2 comes the very important 45 Rd1! with the idea that after 45. ..Ka3 46 Rd3 b3 47 Rxb3 Ka4 48 Rb8 wins. **1-0**

Editorial Preface

The main attention of the week clearly goes to the European Club Cup. Almost everyone is there. After 5 rounds, the number 1 seated team of SOCAR, with an average rating of 2750 ELO(!), is leading as they managed to win all their matches. On the clear second place is the "G-Team Novy Bor" with 4 wins and 1 draw. The 3rd place is already shared by a lot of strong teams. The last 2 rounds are going to be very exciting, but it is hard to imagine that something could still stop SOCAR from getting the medals.

In the female section the team of "Cercle d'Echecs de Monte-Carlo" is just too strong, with Hou Yifan, Koneru and Anna Muzychuk on the first 3 boards, which is why their result of 5/5 is not really surprising.

The 17th Corsican Circuit in Bastia and Ajaccio was won by Ivan Saric, who managed to defeat Almasi in the final stage.

The Unive Crown Group is a one man show, as Wesley So is simply crushing everyone else and is leading with a result of 3.5/4. It is a bit strange to see Adams on 1.5/4 after his great performances in the last events.

In the open section Maxim Rodstein and Viktor Moskalenko are leading with 6/7 and 2 rounds to go.

Enjoy CEWN Nr87!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Korobov, Anton(2716)

- Vitiugov, Nikita(2729) [E21]

29th ECC Open 2013(4.2), 2013.10.23

[Arkadij Naiditsch]

After a great performance in the World Cup, where he beat Nakamura and only lost to Kramnik in the quarter finals, Korobov continues his rise to the chess elite. In a great attacking game he defeated the very solid Vitiugov, who just came 3rd at the Russian Championship.

1.d4 ♘f6 2.c4 e6 3.♘f3 ♙b4+ Lately 3...Bb4 (the Bogolubov) became more popular and has been played by Vitiugov a lot.

4.♘c3 White decides to go back into the Nimzovich with a different move order. [4.♘bd2 4...O-O 5.a3 ♙e7 6.e4 d5 7.e5 ♘fd7 is the other critical line, with a very unclear position.; 4.♙d2 4...♙xd2+ 5.♙xd2 O-O is also considered to be quite solid for Black.]

4...b6 [4...c5 5.g3 is the other main line.]

5.e3 is the most fashionable move at the moment. [5.♙g5 was the main move for many years.]

5...♙b7 6.♙d3 ♙xc3+ Black could of course have waited with

this move by playing O-O first and take only on the next move.

7.bxc3 d6 8.O-O O-O This position is quite interesting. We can see that Black's pawn structure is better and his idea should be to try and close the center by playing e5-c5 after which the white bishop pair would get weaker. White for his part should search for an open game.

9.♘d2! Very typical and strong. The white knight would become "stupid" on f3 after Black's Nbd7 followed by e5. Now White keeps the option of playing f4, putting even more pressure on the black center.

9...e5 10.e4 [After 10.f4 10...exf4 11.♙xf4 ♙e8 White's bishop on c1 would be slightly out of play, which makes the position quite unclear.]

10...♙e8 Black wants to play exd4 and provokes White into playing Re1. after which the f4 idea is getting lost.

11.♙e1 ♘c6 Once again Black is hoping for White to not be careful and play d5, which would be a horrible positional mistake. White has to keep a flexible center.

12.♙b2 ♘a5 Maybe it was also possible for Black to play Ne7-Ng6, but Vitiugov is targeting the c4 pawn. In many cases the Ba6 move could be unpleasant for White in the future.

13.♙e2?! A strange move. I think that 13.Qc2 looked much

more logical.

13...♔d7! A strong move! The black queen wants to take a nice position on a4 after which Black will be able to play Ba6 at any moment.

14.♘f1? This is already a serious mistake. Of course White's idea is correct and the knight is going to g3-f5, but Black is in time to protect everything and end up with a material advantage.

14...exd4! Of course! Why not to take a pawn if you can!?

15.♔c2 ♘c6! Once again Vitiugov chooses the best move. Black needs his knight back in defence and to win the pawn back on d4 is still not possible.

16.♘g3 [16.cxd4? of course didn't work as after 16...♘b4 Black is winning the e4 pawn: 17.♔c3 ♘xd3 18.♔xd3 ♘xe4]

16...dxc3 White already wanted to take on d4.

17.♘xc3 We are at the critical moment of the game now.

17...♔d8? A very passive move and maybe it is what Korobov was hoping for. Now White is getting great play. [17...♘e5! was the right solution and I have no idea what White wanted to do here... 18.f4 (18.♘f5 doesn't seem to work as after 18...♘xd3 19.♔xd3 ♘xe4 20.♔xe4 ♘xe4 Black is almost winning.) 18...♘xd3 19.♔xd3

19...♔e6 As I cannot imagine that White has enough compensation for the pawn I prefer Black's position here.]

18.f4! Preventing Ne5.

18...♘d7 19.♔ad1 A solid move. [It might have been interesting to play 19.e5 19...dxe5 20.♘xh7+ ♔h8 21.♘e4 Followed by Rad1 and I think Black's position is very dangerous.]

19...♘e7 [Black cannot play 19...♘c5 because of the killing 20.♘h5! and the g7 pawn cannot be protected.; Maybe the best chance for Black was to avoid Nh5 at any costs: 19...g6 followed by f6 and Nc5. Of course Black's position is very dangerous, but maybe the game is still unclear.]

20.♘h5 We can see how well a strong pawn center is working with a bishop pair. Black is a pawn up but we have the feeling that White is at least a piece up.

20...g6 Black doesn't have a choice. [After 20...f6 21.e5! Black's position is falling apart.]

21.♘f6+ ♘xf6 22.♘xf6 ♔d7 Black wants to play Qe6 next.

23.f5 Of course! White's idea is to mate Black by playing Qd6-Qh6 next. Bb2 followed by Qc3 is another idea.

23...h6 In order to be able to play Kh7 after Qd2.

24.♔f1! Another very nice move by White. It looks like White

should have something concrete, but maybe not. So Korobov decides to bring an extra piece into the attack. This is a great "positional" way of attacking the black king.

24...♔c6 Black is hoping to somehow get his queen into play.

25.♘d4 Taking away more squares of the black queen. Black's position seems to be lost.

25...g5 26.h4 White continues what he started, to open Black's king position to the maximum.

26...♖f8 Maybe Black wanted to play Ng8 followed by f6, but it is just too late...

27.hxg5 hxg5 28.♔d2 The most simple. The g5 pawn is falling.

28...f6 29.♘xf6 ♔c5+ 30.♖f2 ♖f7 31.♘xg5 It is already White who is a pawn up now.

31...♖g8

32.♘e2! A nice finishing move in a totally winning position.

32...♘c6 33.♘h5+ ♖f8 34.♘f6 A great attacking game by Korobov, but if Vitiugov had played 17.. .Ne5! maybe we would have seen the opposite result. **1-0**

(2) Svidler, Peter(2740)

- Papaioannou, Ioannis(2633) [B51]

Rhodes GRE(3.3), 2013.10.22

[Balogh Csaba]

A nice positional crush by the fresh Russian Champion!

1.e4 c5 2.♘f3 d6 3.♘b5+ This was considered as a completely harmless move in the near past, but recently, thanks to the efforts of several top GMs, this check must be taken very seriously. White players are usually using it in order to avoid the long theoretical discussions in the Najdorf and Dragon variations of the Sicilian defence. White might play for a small edge here.

3...♘d7 3...Bd7 and 3...Nc6 are equally common moves.

4.O-O [4.d4 was the old main line.]

4...a6

5.♘d3!? This unusual idea was introduced by Caruana in 2012. He achieved a big advantage with it against Topalov. The point is quite simple. White wants to play c3 followed by Bc2 and d4, occupying the center. The bishop is going to stay perfectly on c2, we could be familiar with this ideas from the Spanish Opening.

5...♘gf6 6.c3 Black can choose between various plans. It is

not clear yet which one is the best. The most common is a setup with e5 and Be7. Black played differently in this game.

6...b5 7.♘c2 ♘b7 8.♖e1 White is ready to play d4 after defending the e4 pawn. As it is known from the Spanish opening, the rook stands well on e1 as it prepares for the further plan of improving the b1 knight by transferring it to the kingside through d2-f1-g3.

8...e6 [8...e5 9.d4 ♘e7 is definitely a better idea, at least to keep some pressure on the white center to avoid him to do whatever he wants. 10.♘bd2 O-O 11.♘f1]

9.d4 cxd4 10.cxd4 ♘e7 Svidler got the chance to develop his knight to c3 due to the premature take on d4, however he still prefers to employ the Spanish plan...

11.♘bd2 O-O 12.♘f1 ♖c8 13.♘g3+ = White achieved a small but stable edge. Thanks to his strong center, he has more space for maneuvering with his pieces.

13...♖e8

14.h3 In this position it was not necessary at all, but in any case a very useful move, which perfectly fits to this structure. White opens his back rank and prevents Ng4 after the Be3-Qd2 development.

14...♘f8 15.♘d2 White would like to use this bishop on the queenside. He wants to occupy the a5 square to further reduce the mobility of the black pieces. He can do it either by playing Bc3-Qd2 or with a4, followed by taking on b5 and Ba5. 15.Be3 was of course also possible with an advantage.

15...♖c7 16.♖c1 ♖b8 17.♘a5! Black is getting more and more squeezed. He soon runs out of useful moves.

17...g6 Black would like to improve his bishop with Bh6, but Svidler parries it with an easy prophylactic move.

18.♖d2! ♖a8 Black is not threatening anything, but what else

could he do in such a cramped position.

19.a3!? Another useful waiting move, just like 14.h3. White is curious about his opponent's next move.

19...♖c4

20.♕d3 Svidler finds a nice plan to improve his position. He decides to trade a pair of rooks, but it is more important to keep one left, which supports his center well. Black cannot use the c-file, as all the invading squares are perfectly controlled by the bishops. The center is going to be fixed, therefore White is ready to launch a kingside attack.

20...♖xc1 21.♔xc1 White keeps the control over the e4 pawn.

21...♖c8 22.♔d2 Although Black succeeded in getting rid of a rook, he is still lacking any space to do something useful with his remaining pieces.

22...♔a7 [22...d5 is always met by 23.e5 ♘e4 24.♔f4± With a huge advantage after kicking out the e4 knight. The b7 bishop remains closed forever.]

23.h4! White follows his plan. It is very unpleasant as Black just to sit and watch how his opponent crushes him, therefore he decides to change the pawn structure.

23...e5 [23...h5 would have been a serious weakening. 24.♔f4± Followed by Bc3, (protecting the d4 pawn) Ng5 and e5, pressing the f7 pawn.]

24.♕c3 ♘g4! Black must try to keep his center. [Black would quickly collapse after 24...exd4? 25.♕xd4 ♔a8 26.♔f4± Different kind of sacrifices like Nf5 are in the air and h5 is also coming.]

25.♕b1! Another great plan! Svidler immediately makes use of the changes in the pawn structure. With the e5 move, Black has weakened the a2-g8 diagonal. The bishop is going to exert very strong pressure on the f7 pawn from a2.

25...♟g7 26.♟a2 Ng5 is in the air and also dxe5 followed by invading with the queen along the d-file are decisive threats.

26...exd4 27.♟xd4 ♟xd4 28.♞xd4 Of course White needs his queen in order to lead a successful attack.

28...♞de5

29.♞d1! Excellent positional moves non-stop. White does not need his rook on e1 anymore. He overprotects the d4 knight in order to be able to use his queen on the kingside!

29...♟a8 30.f3 Svidler feels that all his pieces are prepared for the final break. He decides to search for a direct way to win. [30.♞g5+- was equally strong!]

30...♞f6 31.♞g5 ♞e8

32.♞f5! White creates the double threat of Ne7 and Nxd6 Nxd6 Qxe5, which Black cannot prevent. The game is over!

32...♞f8 33.♞xd6! ♞xf3+ [33...♞xd6 34.♞xe5+-]

34.gxf3 ♞xd6 35.♞f6 ♞c5 36.b4 [Black resigned in view of 36.b4 36...♞c7 (36...♞b6 37.♟xf7+-) 37.♞e6++- This game showed that chess is sometimes a very easy game and it is enough just to improve our pieces.] **1-0**

**(3) Jobava, Baadur(2694)
- Navara, David(2703) [A01]**

29th ECC Open 2013(3.1), 2013.10.22

[Arkadij Naiditsch]

When Jobava is playing, we can practically expect anything and when we add Navara, the game almost MUST be crazy! We will see one of the most spectacular openings I have ever seen on the high level!

1.b3 Jobava has already started using this move more and more often some time ago. Of course White cannot hope for any efficient opening advantage, but there is also no reason for him to be too worried and 1.b3 sort of provokes Black into action.

1...d5 [1...e5 2.♘b2 ♞c6 3.e3 should be the other critical line.]

2.♘b2 ♘g4!? I am not sure if this move is good, but it is a very funny one! Black is trying to stop White from playing e3 or Nf3 next.

3.f3 About this move I can only say WOW ! I think most of us would never even think about playing such a move which weakens the white king a lot and kills the structure, but once again 3.f3 is very strange move, but not a bad one... [3.♘f3 3...♘xf3 Here Black's idea would come true. After 4.gxf3 c5 looks good and after 4.exf3 Black's pawn structure also looks

solid, even after 4...Nf6 followed by e6-Be7 and 0-0.]

3...♘f5 4.e3 Sooner or later White needs to play e3, the bishop has to go somewhere from f1, and this is not clearly not on g2.

4...e6 The most simple development for Black.

5.f4 White "corrects" the pawn structure.

5...♞f6 6.♞f3 ♘e7 And we are back into sort of "normal" position. Black does not hurry with playing c5 because of Bb5 and he wants to castle short first.

7.d3?! This already looks like clearly too much creativity. It was time for White to finish his development by playing Be2 and 0-0.

7...c5! A good move! The black pawns are now ready to become active in the center at any moment.

8.h3?! A very strange move by White again. g4 is not really a threat and White should rather be thinking about moving his king to a safer place.

8...♞h5?! And Black lets himself be tempted into big complications which were not needed at all. [After the simple 8...♞c6 9.g4 ♘g6 Black would reach a very comfortable position which I think should already be better. Black could try to push d4 next or maybe even c4, but an easy move like

Qc7 followed by 0-0-0 is not a bad option either.]

9.g4! Jobava reached what he wanted, total chaos on the board!

9...♘g3 10.♖g1 [Trying to win the knight of course doesn't work: 10.gxf5? 10...♘h1 And White has no chances to trap the black knight. Black will play Ng3 next.]

10...♘xf1 11.♔xf1 Moving the king away from the e-file, which can be useful.

11...♕f6! A strong move. [11...♕g6?! 12.♕xg7 I don't think Black has enough play for the pawn here.]

12.♕xf6 ♖xf6

13.♘a3!? Both player continue being very creative. White is trying to make use out of his slightly better development.

13...♕g6 14.♘b5 ♖e7 15.e4 Played with a lot of temper again, but to me it looks like too much... [15.c4!? would make space for the white knight on c3 and attack the black center. The position should be very unclear.]

15...a6! It is important to not let White play e5 followed by Nd6.

16.♘c3 dxe4 17.dxe4 White just wants to win the piece by playing f5.

17...f6 The black bishop is escaping to f7. If Black managed to play Nc6-Rd8 White's position would simply be very bad, but it is still White's turn!

18.f5! Very well played, there is no time to lose. White is getting the d5 square for his knight.

18...♕f7 19.fxe6 ♖xe6 20.♘d5 What a beautiful knight on d5.

20...♖d6 Black's position is solid, but looking a bit dangerous.

21.♘e3 It is hard to say if White has anything better. [21.c4 21...♘c6 And I like Black's position here.]

21...♖f4 [21...♖xd1+ 22.♖xd1 followed by Nf5-Nd6 with a small edge for White.]

22.♘f5? Jobava overestimates his position and plays too hard for the win. [22.♘d5 22...♖d6 would be a funny draw after a totally messy game.]

22...O-O 23.g5 White goes for a direct attack on the black king but we should not forget that the position of the white king on f1 is not the safest one either...

23...♖xe4! A cool and very strong move! Black is not only winning a pawn, but he is also getting rid of the main enemy, the knight on f5.

24. ♖d6 ♜e6 I guess that by now Jobava realized that he is just a pawn down and soon Black will be the one with the attack.

25. ♖xf7 It is already difficult to give White any advice. No tactics are working...

25... ♜xf7 26. ♜g2 White tries to escape with "only" one pawn down.

26... ♖c6 27. c3

27... ♜f5! Another very nice move. The black queen is perfectly placed on f5, supporting the future fxg5 plan and also the Rd8-Rd3 maneuver.

28. ♜h2 ♖e5 The most easy way. Black is not going for the mate but is happy with entering a rook endgame with 2 pawns up.

29. ♜g3 White's position is hopeless.

29... ♖xf3+ 30. ♜xf3 ♜xf3 31. ♜xf3 fxg5 Of course many rook endgames are tricky, but not this one. Without the g5 pawn Black's winning chances would be very good, but with 2 clear pawns up his position is simply winning.

32. ♜af1 ♜af8 The most simple move.

33. ♜xf7 ♜xf7 34. ♜d1 White has the choice between leaving the f-file or entering a pawn endgame... Both options are

equally painful.

34... ♜f2+ 35. ♜g3 ♜xa2 And another white pawn is gone.

36. ♜d8+ ♜f7 37. ♜d7+ ♜g6 38. ♜xb7 What to comment here?! I guess even a hobby player would win this position with Black.

38... ♜c2 The most simple move, Black is putting his rook to a place where it attacks the white pawns.

39. c4

39... h5 It is time to create a passed pawn.

40. ♜f3 h4 Black threatens to play Rh2 next and White cannot do anything against it...

41. b4 This move doesn't change anything.

41... ♜xc4 42. bxc5 ♜xc5 43. ♜b6+ ♜h5 44. ♜xa6 ♜c2 Black wants to play Rh2 again.

45. ♜a3 ♜h2 46. ♜e4 The h3 pawn is protected, but...

46... g4 It is now finally over.

47. ♜a7 g6 All in all, we did not see a very high quality game, but certainly a game with one of the most funny openings, supported by creative play until the moment where White misjudged his chances and made a suicidal attempt to play for a win. **0-1**

(4) Mamedyarov, Shakhriyar(2759) - Vocaturo, Daniele(2557) [D72]

29th ECC Open 2013(3.1), 2013.10.22

[Balogh Csaba]

This game is a good demonstration that in the Gruenfeld defence, the d-pawn might become extremely dangerous when it is not blockaded well.

1.d4 ♘f6 2.c4 g6 3.g3 ♙g7 [3...c6 followed by d5 is the most solid system against the g3 setup.]

4.♙g2 d5 Black uses the last moment to get the Gruenfeld structure, otherwise White would have already prevented d5 by playing Nc3 next.

5.cxd5 ♘xd5

In comparison to the 3.Nf3, 4.g3 system, White has a dangerous extra option here, to develop his knight to e2.

6.e4 ♘b6 7.♘e2 c5 8.d5 [8.dxc5 8...♙xd1+ 9.♙xd1 ♘a4 is perfect for Black.]

8...O-O 9.O-O e6 We are just at the beginning of the theory. Black plays in the spirit of the Gruenfeld and puts pressure on the central pawns.

10.♘ec3 White follows the main line. The other option is to develop the other knight to c3, but then the knight on e2 gets slightly misplaced. Here the main idea is to push a4-a5, working out the c4 square for the b1 knight, which jumps there in two moves.

10...♘a6 11.♙f4 This is basically the novelty. Earlier 11.a4 and 11. Na3 were mainly played. The bishop stands perfectly on f4 as it supports the advancing of the d-pawn.

11...exd5 [11...e5!? followed by Nc4-d6 seriously comes into consideration. Black sets a safe blockade on d6 and later on he starts his counterplay with f5. This is a common plan in this kind of pawn structures.]

12.exd5 ♙f5 With the idea of playing Nb4, threatening on c2 and d3. Unfortunately for Black, White has a very strong move now!

[Black cannot create a successful blockade on d6 anymore with 12...♘c4 13.♘d2! ♘d6 (13...♘xb2 14.♙c2 The knight gets trapped.) 14.♙e1 The d2 knight is soon going either to e4 or to c4.; 12...c4 would have been principled with the idea of playing Nc5-d3, but Black is not in time to react on 13.a4! ♘c5 14.a5 ♘bd7 15.♘d2± And the c4 pawn falls.]

13.g4! Forcing Black to act before bringing his knight to b4. The pawn on g4 is not really a weakening, because both white bishops are defending the king's position.

13...♙xb1?! [Black should have preserved his bishop with 13...♙d7 14.h3 ♖e8 15.♘a3 followed by Qd2 Rad1 and advancing the d-pawn at some point. A complex game with mutual chances. I would personally prefer White, but the machine is less optimistic...]

14.♖xb1 c4! Black wants to drive his knight to d3. [14...♘c4 Black fails to block with Nd6 because of 15.d6±]

15.♞d2?! White protects the c3 knight in order to play b3, undermining the outpost of the d3 knight. [15.d6! was preferable. 15...♘c5 16.♙g3!? was also possible to delay Nd5. Now Nd3 leaves the b7 pawn unprotected. (16.♘d5 16...♘d3 17.♘e7+ ♔h8 18.♙g3+=) 16...♞d7 (16...♘d3 17.♙xb7) 17.♘d5 With a clear advantage. The d3 square is useless now because of 17...♘d3 (17...♘xd5 18.♞xd5+=) 18.b3!±]

15...♞d7 16.h3 ♘c5 [16...f5 is always met by 17.g5 Keeping the kingside closed. White might use the e6 square later on, which is why Black should not think about playing f5 unless there is something concrete...]

17.b3 ♖fe8 It was time to advance the pawn. All White's chances are pinned on this pawn. [17...♞ac8! would have given strong counterplay along the c-file. Black creates

tactical ideas against the c3 knight. 18.♙e3 (18.♘e2 18...♞fe8 With Ne4 next.; 18.d6 is met by 18...♘e6! Black is fine.) 18...♞fd8 The rook stands better on d8 compared to the game, as it blocks the d-pawn.]

18.d6 ♞ac8 19.♙e3 Mamedyarov leaves from the Ne6 idea, which would create the double threat of cxb3 and Nxf4.

19...♞e6 [Capturing the d-pawn by 19...♙xc3 20.♞xc3 ♞xd6 is too risky, as it leaves the black king vulnerable on the dark squares. 21.bxc4]

20.♞fd1! This move is obvious, but it requires strong intuition as it involves an exchange sacrifice, which consequences could hardly be foreseen.

20...cxb3 21.axb3

21...♙xc3! Black goes for the critical continuation.

22. ♖xc3 ♜e4 Nc3 is coming next in any case. Let's see on what Mamedyarov has pinned his hopes.

23. ♖a5! White wants to take on a7, which destroys the outpost of the b6 knight.

23... ♞c3 24. ♖xa7 ♜xd1! [24... ♞xb1 was also possible, although from practical point of view the text move was much stronger. 25. ♖xb6 (25. ♖xb1? 25... ♖xd6) 25... ♞c3 26. ♖d3 ♜e4 27. ♙f4 offers White more than enough compensation with the bishop pair, the d6 pawn and the exposed position of the black king.]

25. ♖xd1 ♜a8? This is a blunder! Black was already in big time trouble and he loses the thread in the complications. [25... ♖xd6! was the only move and it leads to a draw: 26. ♖xd6 ♖xd6 27. ♖xb6 (27. ♙xb6 is a bit risky, but also ends in a draw after perpetual check: 27... ♖c1+ 28. ♙f1 ♖d3 29. ♖b8+ ♙g7 30. ♖e5+ ♙g8 31. ♖e8+=)]

27... ♖c1! Black had probably missed this move! (He only calculated 27... ♖xb6 28. ♙xb6 ♖c1+ 29. ♙h2 ♖b1 and here White is able to save his pawn and he ends up with a technically winning endgame: 30. ♙d5!±) 28. ♙f1 ♖xb6 29. ♙xb6 ♖b1! Black wins the b-pawn and he saves the game.]

26. ♖xb7 The black pieces are losing their coordination.

26... ♖d8 [26... ♖xb7 also loses after 27. ♙xb7 ♖d8 28. ♙xa8 ♖xa8

29. ♙b6!+- Followed by Bc7 and d7-d8. Black is unable to block the pawn on d7.]

27. d7 [Black resigned in view of 27.d7 27... ♖b8 28. ♖xb8! ♖xb8 29.d8=♖+- The d-pawn finally promotes. A typical Gruenfeld game with many complications.] **1-0**

Endgame section

(15) Caruana, F.(2779)-Wang Hao(2733)

Bucharest, 2013.10.15

[CE Team]

This interesting endgame was reached, where both sides have their plusses and minuses. It is difficult to evaluate which ones are more important. Black's king is exposed and the two heavy pieces might create dangerous threats. On the other hand White would need some additional pieces to have a crushing attack. White is also ready to take some pawns on g4 and a7, which would lead to further losses of pawns. White cannot use his rook with full efficiency, because it has to protect the back rank against the annoying Rd1 idea, connected with Qb1 mate. Black's big trump is the pawn majority on the kingside, which is ready to break through with g3-f2. The outcome was affected by mutual time trouble.

34. ♖a2 White had to unpin himself to be able to use his rook.

34... ♔h5! An excellent decision to protect the g4 pawn in this way. It is always difficult to make such moves when the queens are on board, but actually Black's king stands much safer in the enemy's camp than in his own.

35. ♖e1! The only move! A necessary prophylaxis against

Rd1. White has to cover his back rank, but it is much harder to create serious threats with a passive rook. [35. ♖f4? 35... ♗g6—+ followed by Rd1 or Kxh4-h3.; 35. ♗c6? is not dangerous. 35... ♖d1! 36. a4 Black wins for instance after 36... ♗g6 to avoid Kxh4 Qh6 check. Obviously without the queens on the board, Black simply breaks through on the kingside. 37. ♗b7 ♔xh4—+]

35...h6 A good time trouble move. [However Black missed the direct 35...g3! 36. fxg3 f2

37.g4+ (37. ♖f1 37... ♗f3—+ is similar to the game. Black wants to improve his rook by playing Rd3-e3-e1 and if White allows it, he marches with his king to g2 through g4-h3 to support the f-pawn. Black wins soon.) 37... ♗xg4 38. ♖e5+ ♔xh4 39. ♖e4

Wang Hao didn't have enough time to evaluate this position in the time pressure. Actually Black wins after 39... ♖d4!!

40. ♖xg4+ ♖xg4 41. ♖b5 (41. ♖xa7 41... f1=♖ 42. ♖xh7+ ♔g3 Black has to work, but he should win later on with the extra rook.) 41... ♖f4! 42. ♖f1 ♔g3 43. b4 (43. ♖d3+ It makes no sense to leave the blockading square as White has no chance for perpetual check. 43... ♔g2—+) 43... h5! Black uses his h-pawn to deflect the queen and he is faster to promote his pawns than White... Let's examine a line: 44. bxc5 bxc5 45. b4 c4 46. b5 h4 47. a4 h3 48. a5 h2 49. b6 axb6 50. axb6 h1=♖ 51. ♖xh1 f1=♖ 52. ♖xf1 ♖xf1 53. b7 ♖f8—+ Black is just winning by one tempo, but it is enough!]

36. ♖xa7

36...g3! Black needs to search for counterplay and he finds it in his f-pawn.

37. fxg3 f2 38. ♖f1 ♔g4! The king is heading to g2. Actually he does not even want to take the g3 pawn on his way, because it protects him against the queen checks. After all it is clear that Black had the upper hand in our initial position, although White can fight.

39. ♖g7+ [39. ♖xb6 would have lost after 39... ♖d2! 40. ♖xh6 ♖c2! Black creates new threats, White does not have a perpetual. 41. ♖g7+ ♔f3 42. ♖b7+ ♔xg3 43. ♖g7+ ♔h2 A spectacular run of the king. 44. c4 (44. ♖e5+ 44... ♔g2 White runs out of checks. 45. ♖b1 ♖xb1+! 46. ♔xb1 f1=♖+—+)

44... ♖d1! 45. ♖e5+ ♔g2—+ Once again White has to sacrifice his rook and he finds himself lost.]

39... ♔f3 40. g4 [On 40. ♖b7+ 40... ♔e2—+ wins.]

40... ♖f4! The time trouble is over and White ended up in hopeless situation. The f-pawn is too strong.

41. ♖b7+ [41. g5 41... hxg5 42. hxg5 ♔g2—+]

41... ♔e2 42. ♖b1

42... ♖d3!? Wang Hao chooses the human win. [The machine recommends the highly spectacular 42... f1=♖! At first sight it looks like a terrible blunder, but... 43. ♖xf1 ♖xf1 44. ♖e7+ ♔d2 45. ♖xd8+

45... ♔c2!—+ White cannot parry Qb1 mate, despite having three extra pawns.]

43. ♖g2 [43. ♖e7+ does not change anything: 43... ♖e3
44. ♖d8 f1=♖ 45. ♖xf1 ♔xf1—+]

43... ♖d1! The last precise move by Black. The arising queen ending is simple winning for him!

44. ♖xd1 ♔xd1 45. ♖f1+ ♔d2 Black promotes his f-pawn by transferring his queen either to g1 or to e1.

46. g5 hxg5 47. hxg5 ♖g3 48. ♖b5 [48. g6 48... ♖g1 49. g7 ♖xf1
50. g8=♖ ♖d3—+]

48... ♖d3 0-1

(16) So, Wesley(2706)-Van Kampen, Robin(2607)

17th Unive Crown(3.2), 2013.10.22
[CE Team]

As we know, rook endgames can be very tricky. If the black pawn was not placed on f6 but on g6, we would face the famous drawish endgame. Can White make use of Black's bad pawn structure?! Wesley So will show us how to do it...

34. ♖xa7 ♖c2 35. ♔f3 It makes no difference for White whether he starts pushing the a-pawn first or if he walks out with his king.

35... ♔g6 Black is trying to activate his king.

36. a4 ♖a2 The black rook is ready to give checks.

37. a5

37... h6? This is already nothing else than waiting for death...

[37...♖a3+ was Black's only chance. He needs to start attacking the white pawns. 38.♔g2 The most simple way to win the game, making a use of Black's very bad pawn structure. (38.♕e4 38...♖a2 39.♕e3 Winning half a tempo. 39...♖a3+ 40.♔d4 ♖a2 41.a6 ♖xf2 And White's position should be winning, but it can all just be a question of one tempo, which is of course quite unpleasant for White who has a technically winning position. 42.♖c7 ♖xh2 Black is taking the second pawn, as he does not really have a choice. 43.a7 ♖a2 44.♕c5 ♕g5 45.♕b6 ♕g4 And as we see, we really need to count this position, which is of course very hard to do during a practical game.) 38...h5 39.♖a8 ♕g7 40.a6 ♕h7 41.♕h3 ♖a4 42.f4 ♖a2 43.a7 ♕g7 44.f5 ♕h7 45.g4 hxg4+

46.♕xg4 White is easily winning and the plan is to bring the pawn to h6, forcing the Black king to keep his position on h7 and after bringing the white King to e7, to take the f7 pawn.]

38.a6 ♕f5 39.♖a8 White succeeds with his plan, now the movement of his king to the a-pawn is deadly because White is so many tempi up.

39...♕g6 Black was afraid of a7 and the black king would be cut from moving anywhere from the f5 square because of the check on the 8th rank.

40.♕e4 White is starting the last stage of his plan.

40...♕g7

41.♕d5 It is of course important to not put the pawn on a7, after which Black would be able to hold the position by giving checks to the white king. The a7 square is a very important "safe house"!

41...♖xf2 Winning one pawn is not enough to hold the draw.

42.♖b8 ♖a2 43.♖b6 Followed by Kc6-Kb7. Nice technique by White, but Black made it too easy... **1-0**

Clash of the Titans

(17) Krogius, N.-Smyslov, V.[E11]

URS-ChT Soviet Union 1967

[Miton Kamil]

1.d4 ♘f6 2.c4 e6 3.♘f3 ♘b4+ 4.♙d2 a5 Black also had other options: [4...c5 5.♙xb4 cxb4 With very solid play for Black, the plan is to play b6-Bb7 or d6-e5, with the idea of getting control over the dark squares.; 4...♚e7 leads to the Bogolubov System.]

5.g3 d6 [5...d5 transposes to the Catalan.]

6.♙g2 ♘bd7 7.O-O e5

8.e3 A calm move. White could play a bit more aggressively: [8.♙e3 Probably the best option for White. 8...exd4 9.♙xd4 O-O 10.a3 ♙c5 11.b3 Not allowing Black to fix the structure after a4. 11...♚e8 12.♘c3 c6 13.♚c2+= And white is slightly better. The plan is to keep the pawn on e2 or e3 (not on e4!) and then try to push the typical b4-b5.; 8.♙g5 8...exd4 9.♘xd4 h6 10.♙f4 O-O∞; 8.♘c3 8...O-O 9.♚c2 ♚e8∞]

8...♙xd2 9.♚xd2 [9.♘fxd2 9...O-O 10.♘c3 With the plan to play a3-b4, but without the dark squared bishops Black's position is very solid.]

9...c6 Black is preparing for e4.

10.♘c3 e4 Otherwise White will play e4 and get more space in the center. [10...O-O 11.e4+=]

11.♘h4 [11.♘g5 11...d5 12.cxd5 cxd5

13.f3 h6! 14.♘h3 (14.♘xf7 14...♚xf7 15.fxe4 dxe4 16.♘xe4 ♚f8 And the black king escapes.) 14...exf3 15.♙xf3 ♘b6 The black pawn on d5 is protected enough and Black has counterplay against the e3 pawn. 16.♘f4 O-O 17.♚ac1 (17.♚g2 17...♙e6) 17...♚e8=]

11...♘b6 [11...d5 12.cxd5 cxd5 13.f3 (13.♘f5? 13...♘b6 14.♘xg7+ ♙f8—) 13...exf3 14.♘xf3 O-O 15.♚ac1+= Compares to the line with a knight on f4, now after Nb6 White will put a strong knight on e5 with a good chance to get the initiative.]

12.♘xe4

[12.c5 12...dxc5 13.♘xe4 cxd4 14.♚fd1 ♙g4 (14...♘xe4 15.♙xe4 O-O 16.♚c2 g6 17.♚xd4 ♚e7 18.♚ad1 ♙e6 The pawn on g6 limits the white pieces very well and the position is equal. 19.♙xg6 doesn't work now as after 19...hxg6 20.♘xg6 fxg6 21.♚xg6+ ♙h8 White only has perpetual check because after 22.♚h4+ Black has 22...♚xh4! 23.gxh4 ♚g8—)]

15. ♖xd4 ♙xd1 16. ♘d6+ ♔f8 17. ♚xd1↑ With very complex play.]

12... ♗xe4 13. ♙xe4 ♘xc4 14. ♚e2 d5 15. ♙d3

15... ♗d6 The position transposes to the Karlsbad structure. Because there are not too many pieces on the board, Black has no problems at all.

16. ♚h5 White is trying to disturb Black a bit with his development and trying to create some weaknesses. [16.f3 The Botvinnik plan of playing f3-e4 makes no sense when there are not many pieces on the board... 16...O-O 17.e4 ♚b6 18. ♚f2 ♙h3 19. ♚fe1 dxe4 20.fxe4 ♚ad8 Black gets great play against White's hanging central pawns. 21.e5 ♗b5 22. ♙xb5 cxb5 23. ♚ad1 f6⇝]

16... ♚e7 17. ♚fe1 ♙e6 Less accurate is [17...g6 18. ♚h6 ♚f8 19. ♚f4 ♚e7

20.e4! White is on time with the break in the center: 20...dxe4 21. ♙xe4 ♗xe4 22. ♚xe4 ♙e6 23. ♗f3 h6 24.d5! cxd5 25. ♚e5 With huge initiative over the dark squares.]

18. ♚ac1 g6 19. ♚d1 [19. ♚h6 19... ♚f8]

19...O-O 20. ♚c2 The position is equal. White is not able to create any problems because typical plans like a3-b4 or f3-e4 are not enough now.

20... ♚fc8 Both sides are waiting a bit. I am not sure if Black wants to play b6-c5.

21. ♗g2 ♙f5 In this structures it is usually good for Black to exchange the light squared bishops.

22. ♗f4 ♙xd3 23. ♗xd3 ♚e8 24. ♗f4 [24. ♗c5 24... ♚g7 25. ♗g2 With equal play.]

24... ♚f6 25. ♚f1 The position slowly becomes unpleasant for White. Compare to White, Black can prepare some pressure on the kingside.

25... ♚e7 26. ♚ce1 ♚ae8 27.b3 Taking control over the c4 square, but on the other hand Black will keep the possibility of opening the position after a4 at some point. [27. ♚c3 27... ♚f5 28. ♚xa5 g5→ With the idea of playing Qh3-Re6 for example

and the white king will quickly find himself in trouble.]

27...♖e4

28.f3?! After this move the pawn on e3 will be weak.

28...♗d6 29.♗g2 ♗f5 30.♖d2 b6 Protecting a5 and preparing to play c5 at some moment.

31.♖f2 [31.♖e2? 31...♗xd4; 31.♖f2 31...h5 32.♖fe2

32...h4! 33.g4 ♗d6 And White has no time to play h3 because the f3 pawn is hanging. 34.♖f1 h3 35.♗f4 ♖xf4! 36.exf4 ♖xe2 Followed by Rg2-Re2 and White is winning.]

31...♖g5 [31...c5 32.dxc5 bxc5 33.g4 ♗g7 34.♖d2↪Now Black has problems with the d5 pawn and after d4, White will simplify the position.]

32.g4

32...♗xe3! Nice! Black's decision is to change the character of the position but keep the initiative. [32...♗d6 Of course after that move Black is slightly better, but one weakness on e3 is still not enough to win the game.]

33.h4 [33.♖d2 White is not able to take advantage of this pin: 33...h6 34.h4 (34.♖xe3 34...♖xe3 35.h4 ♖e7+) 34...♗xf1↪]

33...♗xg2 34.hxg5 ♗xe1 Black controls the e-file and will soon create a strong passed d-pawn. White needs to hurry with counterplay.

35.♖g3 A good move, activating the queen.

35...♖e3 36.♖f4 [36.♖c7 36...♗xf3+ 37.♖g2 ♗xg5 And the f7 pawn is protected. 38.♖xc6 ♖8e4↪ XKg2]

36...c5

37.♗h1 White is escaping from the check on f3, but the

problem is that king will never be safe on the first rank. An interesting defending idea was [37.♔h2 On g3 the king will be more safe and will also protect the f3 pawn. 37...cxd4 (37...c4 38.bxc4 dxc4 39.d5 c3 40.d6 It is very hard to say who is better here.) 38.♔g3 d3 39.♕d4 ♖e2 40.♗f2 d2 41.♗xe2 ♗xe2 42.♕xd5 And White is fine because the pawn cannot promote and Black is not able to avoid perpetual check.]

37...♗e2 38.dxc5 White could defend the position after [38.♕f6 38...♗xa2 (38...♗2e6 39.♕f4 ♘d3 40.♕c7 cxd4 41.f4♣ With f5 next.; 38...cxd4 39.♕xd4♣) 39.♕c6 ♗ee2

40.♗f2! To see this nice defending trick was very hard. 40...♗xf2 41.♕e8+ ♔g7 42.♕e5+ ♔f8 43.♕b8+ ♔e7 44.♕c7+ With a draw.]

38...bxc5 39.♕d6 d4 40.♕xc5 The decisive mistake. After this move White will be not able to stop the strong d-pawn. The last chance was to create some ideas over the f-file.

[40.f4 40...♗xa2 (40...d3 41.f5 d2 42.fxg6 hxg6

43.♗xf7 Another nice tactical trick which allows White to hold the position. 43...♔xf7 44.♕f6+=)

41.♕d5!♣(But not 41.f5? 41...♘f3!)]

40...d3 41.♕d5 d2 42.♕d7 ♘xf3 43.♗xf3 d1=♕+ After winning the queen, Black will play Re5, grab the g5 pawn and easily win the rook endgame. **0-1**

Editorial Preface

Once again we had a great week of chess, with a fantastic result by one of your weekly contributors, Csaba. Let us start with this...

The 18th Casino de Barcelona closed event was won by Csaba Balogh, who took clear first with 4.5/7! Congratulation for this great performance!

Now probably to the biggest surprise:

The European Club Cup was clinched by the G-Team Novy Bor with a fantastic result of 13/14 points. Navara and especially Wojtaszek showed a fantastic performance. The 2nd place went to Malachite, a star Russian team, and 3rd to SOCAR, the number 1 seated "Super Star collection" (Topalov, Mamedyarov, Radjabov, Wang Hao, Caruana...).

The Unive Crown Group was won by So as expected, with a very good 4.5/6. 2nd-3rd places were shared by Adams and Van Kampen with 3/6. In the open section Rodshtein Maxim came first with a great score of 7.5/9. 2nd-3rd places were shared by Moskalenko and L'ami Erwin with 7/9.

Le Tropheé Anatoly Karpov in Cap D'Agde is coming to an end as well. In the final of the rapid event Etienne Bacrot and Karpov himself, who has been showing a fantastic performance, will meet to decide of the winner of this tournament!

We wish you a lot of fun with CEWN Nr88!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Giri, A.(2749)

- Bartel, Mat(2638) [D02]

29th ECC Open 2013(6.1), 2013.10.25

[Balogh Csaba]

The talented Polish GM Bartel Mateusz likes choosing unusual openings and taking risky decisions, therefore sometimes he is very successful, but on bad days he gets badly punished for them.

1.♘f3 d5 2.d4

2...a6 The first unusual move in the opening. It has its point, namely to fight against White's most natural move c4, as Black is ready to take it and protect it with b5 now and he does not need to worry about the typical a4 undermining anymore.

3.♙g5! I like this move a lot. It disturbs Black's development a bit and White wants to play e3 followed by c4, when the dark squared bishop does not get stuck behind the e3 pawn.

3...c6 The start of the next dubious plan. Black should have continued the development with Nf6 and e6, although in this case the a6 move is not the most useful.

4.e3

4...♖b6? The drawback of the early development of the c1 bishop is usually the b2 pawn. Black tries to make use of it, but in this case it is rather a poisoned pawn, as Black simply loses too many tempi to grab it.

5.♙d3! White obviously does not pay any attention to that pawn.

5...♖xb2 6.♘bd2 White has developed 4 of his pieces, while Black is only moving with his queen and he needs to waste a further tempo in order to avoid it being trapped.

6...♖a3 7.O-O ♙g4 The first developing move in the game by Black.

8.♖b1! A great move! In order to make use of his huge advantage in development, White needs to open up the position. He intends to do it by playing c4, but first he protects his d3 bishop and at the same time attacks b7.

8...b5 Black tries to keep the position closed, but after the following spectacular move he just fails:

9.c4!! White is able to open the position, using the fact that bxc4 is met by Qb7, trapping the rook.

9...♙xf3 [9...dxc4 loses to 10.♘xc4! bxc4 11.♙b7+—]

10.♘xf3 dxc4 11.♙xc4! e6 Black is ready to develop his kingside pieces in order to put his king into safety. White needs to act quickly to punish his opponent.

12.e4! Another excellent decision! White plays principled chess, he wants to push d5 to open the lines for his rooks in front of the opponent's king. The c4 bishop is always taboo because of Qb7.

12...♙e7 13.♙c1! A very nice attack by Giri. He preserves his bishop with tempo in order to make the d5 break even more effective.

13...♙a5 [13...♙b4 is met by 14.♙b3 ♘f6]

15.a4! The bishop suddenly arrives to a3! This was the main point behind Bc1.]

14.d5! Consequent play by White!

14...exd5? This is too much. Black even opens the e-file in front of his king. [14...cxd5 was the only move. 15.♙b3 (The point is that 15.exd5? is already met by 15...bxc4! because 16.♙b7 ♙xd5! saves the rook.) 15...♘f6 16.exd5 exd5 17.♙e1 Black's position is highly suspicious, but he can still fight.]

15.exd5 ♘f6 Black is only one tempo away from his dream to castle, but he fails after the energetic play by Giri! [15...bxc4 16.♙b7+—]

16.d6! [16.♙e1? was bad in view of 16...O-O! 17.♙xe7 bxc4 18.♙b7 ♘bd7 and suddenly Black is winning.]

16...♙xd6 17.♖e1+ This is a deadly check, which means that Black must forget about castling in this game.

17...♔f8

18.♖f5! Giri continues playing the most aggressive moves. Qc8 threatens with mate and after

18...♘bd7 19.♙xf7! ♘e5 Black tries to play against the White back rank and also attacks the f7 bishop. Unfortunately for him White has a nice win. [19...♙xf7 leads to mate after 20.♖e6+ ♔f8 (20...♙g6 21.♘h4+ ♙h5 22.♖f5+ ♙xh4 23.♖h3#) 21.♖xd6+ ♔g8 22.♖e6+ ♔f8 23.♙f4 and Bd6 or on g6 Bh6 mates.; 19...♖xe1+! was the only move to extend the fight. Black gets rid of some attacking pieces. 20.♘xe1 ♙xf7 21.♘f3 ♖he8 22.♙b2 White should win later on.]

20.♖xe5! ♙xe5 21.♙b3 White preserves his bishop. Black cannot defend. [21.♖xe5 was also strong and the point is that after 21...♙xf7 22.♘g5+ ♔g6

23.g4!!+- Qf5 is unavoidable.]

21...♖e8 22.♙e3 Bc5 is the next threat against which Black has only one move.

22...b4

23.♙f4! [Black resigned in view of 23.♙f4! 23...g6 24.♘xe5!! gxf5 25.♙h6+ ♔e7 26.♘xc6+ ♔d6 27.♘xa5+- White ends up with decisive material advantage and he continues attacking. What a fantastic game by Giri!] **1-0**

(2) Karpov, Ana(2619)
- Pelletier, Y.(2578) [E32]

2nd Karpov Trophy Prelim(5.3), 2013.10.27
[Balogh Csaba]

Karpov was unstoppable in the rapid tournament of Cap'd Agde. This game presents well his chess from his best years.

1.d4 ♘f6 2.c4 e6 3.♞c3 ♙b4 4.♚c2 The Qc2 system of the Nimzo-Indian defence is a solid setup for White with the aim of gaining the bishop pair with a3 without making a structural weakening.

4...O-O 5.e4 This is the aggressive handling of the variation. 5.a3 is the starts of the main line.

5...d5 6.e5 ♞e4

7.a3!? Karpov was always very clever in choosing the opening. The move he played was fashionable and very dangerous once, but at some point Black found the right setup against it and the players turned to the 7.Bd3 main line. However, grandmasters need to keep so many lines in their head that sometimes it is a very good practical decision to take a sharp forgotten line, especially in a rapid game, where the opponent has limited time to recall his old analysis.

7...♙xc3+ 8.bxc3 White threatens to play Bd3, so Black needs to find quick counterplay against the center.

8...c5 9.♙d3 ♚a5 [9...cxd4 10.cxd4 ♚a5+ is the other option for Black, but Pelletier lost a game like this last year against Morozevich. 11.♚f1 ♙d7 12.♞e2 (On 12.f3 12...f5! is always Black's idea.) 12...f5 13.exf6 ♞xf6 14.♙d2 ♚d8 15.♙g5 h6 16.♙h4 ♞c6 17.cxd5 exd5 18.f3 White had better prospects with the bishop pair and the weak light squares, which could be used by Nf4 later on. Morozevich-Pelletier, Biel 2012.]

10.♞e2 cxd4 Black must explode White's center, otherwise he simply ends up in a worse position and f3 was also threatening to trap the knight. All this is still theory so far.

11.cxd5 exd5 12.f3! A very direct line, where both players need to play sharply.

12...♞xc3

13.♞xd4! White is not afraid of discovered checks. Obviously such a line can only be played with huge preparation behind it. At this point Pelletier prefers to enter a slightly worse endgame instead of going for the critical line with extreme complications.

13...♖b5+ [13...♗e4+! 14.♔e2

14...f5!! is the right move. Leko Peter found this idea back in 2006 and won a nice game against Vallejo Pons. Since then, theory considers it to be draw after the following line: 15.e6! ♗c6 16.♗xc6 bxc6 17.e7 ♖e8 18.♗xc6 ♖xe7 19.fxe4 fxe4 20.♗c4! dxc4 21.♗xa8 ♖e8 22.♗c6 ♗g4+ 23.♔f2 ♗e5 24.♖e1 ♖f8+ 25.♔g1 ♗xa1 26.♗xc4+ ♔h8 27.♗xe4 As it was played in the game Braun,A (2558)-Meier,G (2608) Saarbruecken 2009. Karpov was probably ready to make a draw like this, but the chance that Black could recall this ideas found 7 years ago was quite small. In any other case White just gets the initiative.]

14.♗d2 ♗xd4 15.♗xh7+! White restores the material balance with this move.

15...♔h8 16.♗xa5 ♗xc2+ White has a nice endgame with a better pawn structure and the bishop pair, but unfortunately for him Black is able to get rid of one of the bishops.

17.♗xc2 ♗c6 18.♗b4 [18.♗c3 could have been met by 18...d4]

18...♗xb4 [18...♖e8 19.f4 ♗xb4 20.axb4 could have arisen from the game as well.]

19.axb4 These kind of endgames were Karpov's favorites, from which he was scoring an amazing percentage. White has a minimal advantage due to his better pawn structure and his more active bishop. Black's queenside pawns are also rather

weak and the isolated pawn on d5 might also be a potential target. White's task to create dangerous passed pawns on the kingside is much easier.

19...f6 [19...♖e8 20.f4 f6 would have been principled to undermine the e5 pawn. Unfortunately for Black he does not equalize here either because of 21.♗g6! ♖e7 22.O-O fxe5 23.fxe5 Using the weak back rank. 23...♗e6? (23...♗d7 24.♖xa7! wins a pawn!)]

24.b5!+= Followed by Ra4 with the ideas of Rfa1, pressing the a7 pawn, or Raf4, threatening on the back rank.]

20.exf6 ♖xf6 21.♔d2! Karpov increases his advantage with each move. His king is excellently placed in the center. If the rooks were exchanged, White might simply win the d5 pawn by driving his king to d4 and his bishop to b3. White also

threatens to play Rhe1-e7 and once his kingside pawns start to march, it will be very difficult to stop them.

21...♙d7 22.♖he1 Karpov activates his rook. He intends to play either Re7 or Re5 next.

22...a6 Pelletier would like to use his a8 rook, but he had to lose an important tempo for that.

23.♖e7 ♖d8

24.♖ae1 All white pieces are playing. Black is standing without any counterplay. It is typical of Karpov's technique, that he always sets small tactical traps behind his positional moves. This time he threatens to take the bishop followed by Re8 mate.

24...♙g8 25.h4! Karpov starts to mobilize his kingside. The plan is to push h5 and settle the bishop to g6, completely paralyzing Black, followed by playing g4-g5 later on. Black can hardly do anything against it.

25...♙f8 26.h5 ♙e8 Pelletier aims for simplifications. [26...b6 was met by 27.♙g6! Threatening to play Rxd7 again. 27...♙g8 28.♖1e5! ♖d6 (Otherwise if the bishop moves, White doubles his rooks on the 7th rank. 28...♙c6 29.♖a7+—) 29.♙d3 With the double threat Bxa6 and Rg5. White wins material.; The best chance was definitely to trade a pair of rooks, although it is also doesn't solve all the problems.

26...♖f7 27.♖xf7+ ♙xf7 28.g4± White is going to have two connected passed pawns soon, supported well by the bishop and the rook.]

27.♖xb7 ♙xh5

28.♖h1! Very precise! True to his style, Karpov does not give any chance to his opponent.

28...♖h6 [28...♙f7 is refuted by 29.♖h8+ ♙g8 30.♙h7!+—]

29.g4 ♙e8 30.♖xh6 gxh6 31.♖b6! +— White wins a pawn and the game is basically over. One is worse than the other from Black's point of view. White either gets two pawns on the kingside or after taking on a6, the b-pawn decides the outcome of the game.

31...♙g7

32.♙d3! White does not allow any counterplay. [After

32.♖xa6 Black might hope for some chances with 32...♖b8 33.♔c3 ♖c8+ 34.♔b3 d4 although White should win after 35.♕e4 but the text move is much simpler.]

32...♖d7 33.♕xa6 ♖f7 34.♖b7! The bishop endgame is easily won with passed pawns on both sides.

34...♕d7 35.b5 ♔f6 36.b6 ♔e6 White wins after any move, but Karpov employs a little tactic to conclude the full point.

37.♕b5 [Black resigned in view of 37.♕b5 37...♕xb5 38.♖xf7 ♕xf7 39.b7+— A positional masterpiece by Karpov.] **1-0**

(3) Svidler, Peter(2740)

- Nakamura, Hikaru(2783) [E71]

29th ECC Open 2013(5.4), 2013.10.24

[Arkadij Naiditsch]

We will see a very interesting game with a lot of strange motives. It is clear that both players were not scared of going for a real fight. In a very complex position, Svidler suddenly started panicking and made a horrible miscalculation, putting all his resources into the attack on the black king and quickly got punished by very cool play of Nakamura.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♕g7 The King's Indian is back! For some time only Radjabov was playing it, but now more and more players are trying it out. It remains a very sharp and fighting opening.

4.e4 d6 5.h3 Not the main move, but a very tricky line.

5...O-O 6.♕g5 White's idea is to act against e5 move with d5 and then g4-Bg2 and Nge2, which is why White is not playing Nf3 right now.

6...♘a6 A development move and Black is also keeping both options open, to play e5 and d5 in the future.

7.f4 Svidler is trying some sort of new setup. After 7.Nf3 we would be back to more or less theoretical lines. 7.g4 looks a bit premature, as Black could try to play c6 followed by d5.

7...h5!? Black reacts immediately. White has a very strong center and it is clear that Black needs to do something against it quickly. The question is whether White can hold the center or if Black will rush over it.

8.g3 The g3 square has to be protected.

8...c5 When e5 is not possible, c5 is the solution.

9.d5 b5! It is hard to say if it is a good move, but it clearly makes a lot of sense. Black's play is on the queenside and he needs to act. If White was in time to play g4 followed by Bg2 Black's position could just be bad.

10.cxb5 Black's idea is simple, to play Rb8-Bd7 or a6 next and open the b-file.

11.a4 Black's idea is simple, to play Rb8-Bd7 or a6 next and open the b-file.

12...f6 13.g3 h6 Checking White. Of course it is very unpleasant to give up the bishop on f6 and it is usually the wrong thing to do.

14.h4 [14...xf6? 14...xf6 With great play for Black.]

14...h7!? Very original play again! Black suddenly wants to play g5 and the bishop on h4 is trapped.

15.d2 a6 This is the first critical position of the game. What to play for White?! Should he search for some attacking ideas or try to consolidate and hold the b5 pawn?

16.c4?! A logical move, but I think Black is taking over now. [Maybe it was better for White to keep the extra pawn: 16.bxa6 16...xa6 17.a5 Black of course has good play here too, but a pawn is a pawn.]

16...axb5 17.axb5 d7 Black continues what he started, to put pressure on the b-file.

18.e5?! I guess this is what Svidler was playing for, but can it be good to open the position so much with a king on e1?! [The only chance for White was to keep the b-line closed: 18.a5! With a very sharp position.]

18...xb5 [Of course not 18...dxe5? 19.d6 and the bishop on h4 is not very useful...]

19.xb5 The black knight wants to take a great place on d4.

20.a5 Svidler wants to escape into a worse endgame, but Nakamura shows no mercy.

20...Qe8! The American Super GM has a fantastic killing instinct and shows no mercy. There is no reason for Black to exchange the queens as the white king is too exposed and the bishop on h4 almost trapped. We see a perfect example of how dangerous it can get when a center starts to fall apart.

21.0-0 [21.Ke4 would not help White much as after 21...dxe5 22.f5 Nd6 Black is also close to be winning.]

21...g5 And the bishop on h4 is lost...

22.Bf5 White tries his last chance, a direct attack.

22...gxh4 23.Rae1 [23.Bxb5 was not better as after 23...Qxb5 24.Nxe7+ Qh8 Black is a piece up and winning.]

23...dxe5 Nakamura stays cool.

24.Rxe5 A Samurai attack with a machine gun! :) [To give the black knight from h7 a great square on g5 is not an option: 24.fxe5 24...Ng5+]]

24...fxe5 25.fxe5 Black is a full rook up, which is just too much!

25...e6! Another exact move to destroy any of White's hopes, if there were still any...

26.Nxh6+ Kg7 27.Qd2 Qd8 Black wants to play Qg5 next.

28.Rf6 Nd4 29.Nxf7 Nxf6 We saw a very instructive game and of course great play by Black. It is also clear that White's experimental idea with Bg5-f4 has failed completely. **0-1**

**(4) Lopez Martinez, Josep Manuel(2555)
- Balogh, Csaba(2632) [A20]**

18th Casino de Barcelona 2013(6.4), 2013.10.30

[Arkadij Naiditsch]

Finally we can see Balogh Csaba, your weekly commentator, on a rush in Barcelona. With this win, Csaba basically managed to secure the first place in this round robin event!

1.c4 e5 2.g3 White often chooses this move order to delay the development of the knight from b1 a little bit in order to avoid the lines with Bb4.

2...f6 3.g2 c6 [3...c6 is the other main line.; 3...d5 4.cxd5 dxd5 5.c3 b6 would lead us to another very popular line. Kramnik likes to play it with White for example.]

4.c3 White needs to develop the knight from b1.

4...b4

5.d5 This is not the main move. [5.f3 would lead to the very main position.]

5...c5 It looks like Black has lost a tempo, but in fact the exchange of a pair of knights is good for him.

6.a3 I personally think that to include a3-a5 is not useful for White.

6...a5 7.e3 d6 8.e2 O-O 9.O-O a7 Black is acting against White's d4 push. The bishop on a7 looks a bit stupid, but the white one on c1 is not much better either. After d4 exd4 the bishop on a7 would become very active.

10.xf6+ xf6 11.c3 White exchanges one knight and takes place on d5 with the second one.

11...d8 12.c2? It is hard to understand this move. [12.d5 12...e6 13.d3 d7 would lead to a normal position where Black completely equalized.]

12...e7! A very nice strategic decision. Black is preparing to play c6-d5!

13.f4? This is already a serious positional mistake. White should have been very careful and kept the f2-e3 pawn structure against the a7 bishop. [13.d3 13...c6 14.d2 would still lead to a normal position.]

13...c6 Now both white bishops are out of play.

14.f5 This was probably White's idea, but it just looks ugly. White is undeveloped and lets Black get control over the center.

14...d5! Of course! Who controls the center controls the game.

15.g4?! Another rather senseless move. [White is already in trouble and has to fight for survival: 15.cxd5 15...cxd5 16.f6 Maybe White would at least have some counter chances here.]

15...e4 Another strong move by Csaba, with a "secret idea".

16.cxd5 cxd5 17.d4 White clearly didn't expect Black's next move.

17...♗b8! Exactly! The bad bishop from a7 becomes a beast on b8! Black just wants to play Qd6 next.

18.♔f2 White still tries to hold things together, but here comes another shock!

18...♖a6! Excellent play by Black. All the pieces are just perfectly placed and working together beautifully. The black rook wants to take place on h6 and all Black needs to do next is just to open the kingside.

19.♘e2 h5 The white structure cannot stand the pressure.

20.♙h3 [After 20.h3 20...hxg4 21.hxg4 ♖h6 it is hard to imagine White surviving here for more than 5 moves.]

20...hxg4 21.♙xg4

21...♖f6 The most simple move, as the f5 pawn is falling.

22.♙d2 ♘xf5 23.♙xf5 ♙xf5 Black is a pawn up and he continues his attack.

24.♔g2 ♔d7 And it is all over. A nice strategical win by Csaba and of course a very good example of "what not to do with White" in closed pawn structures. **0-1**

Endgame section

(15) Karjakin, Sergey(2762)-Cheparinov, Ivan(2672)

29th ECC Open 2013(7.3), 2013.10.26

[CE Team]

33. ♖a4 What can we say about this position, at first sight it looks very close to a draw, but Black still needs to be careful, as White's passed b-pawn gives him theoretical chances of being better, for example if he managed to exchange his rook and proceed with the pawn to b5. During the next 20 moves, Karjakin will show very nice technique from which we can learn, although we have to admit that Cheparinov was rather helpful to White's success.

33... ♘b5?! Clearly not the best move. More accurate was [33...d5! Of course it is important for the defensive side to exchange as many pawns as possible. 34.exd5+ ♔xd5 followed by f5 and I don't think that Black should be too worried. The position looks equal to me.]

34. ♔d3! A very important move. White takes his chance to get his king to c4.

34...♖c7 35.♔c4

35...g6? Black keeps on waiting, which is already a serious mistake. [It was the last chance for 35...d5+ 36.exd5+ ♖xd5 37.♖a6+ ♖b6+ and again Black should be perfectly fine.]

36.♖a7! Another very strong move, not giving Black any further chances for the "freedom kick" d5.

36...♔b6 37.♕e3+ ♔c6 38.b4 Black kept on waiting and as we can see, it is getting quite dangerous.

38...d5+ Finally, but it is already too late. [If Black continued being passive by playing 38...f5 39.g4 Black would somehow slowly be running out of moves.]

39.exd5+ ♖xd5 40.♕c5 White controls the 7th rank and the black knight needs to come back.

40...♖c7

41.g4 In a next step, White is fixing Black's pawn structure.

41...f5 42.g5 ♖a8 It is already difficult to give Black any advice. [42...♖b7 leads to a lost endgame: 43.♖xb7 ♔xb7 44.b5 Sooner or later the white king will take all the black pawns.; 42...♖d8? was of course losing immediately: 43.b5+! ♖xb5 44.♖a6+ White is a piece up.]

43.b5+ ♔d7 44.♖xa8 ♖xa8 White's dream plan came true. The rooks are exchanged and the pawn is on b5. The next step should be to secure the king's position on d5 or somehow play b6 and get a winning pawn endgame.

45.h4 White does not hurry and there is no reason for it. h4 can be an useful move in the future.

45...♖c7 46.b6 Winning control over the d5 square.

46...♖e6 47.♔d5 And the game is basically over.

47...♖xc5 Black's last try, but of course the pawn endgame is lost. White just wanted to play Kxe5 with a totally winning position.

48.♔xc5 ♔c8

49.♔d5 It is not hard to see that White is faster.

49...e4 50.fxex4 f4 51.♔d4 ♔b7 52.♔d3 ♔xb6 53.♔e2 Really nice technique by Karjakin who won this endgame where he was only minimally better very convincingly. **1-0**

(16) Hracek, Z.(2636)-Wang Hao(2733)

ECC, 2013.10.25

[CE Team]

White is slightly behind in material, but the black king is squeezed and his only hope of winning the game, the a7 pawn, is very far from the promotion, especially considering the fact that anytime Black pushes a5, White plays Ra6 and advancing of the pawn is becoming very difficult. All these facts tell us that the game should end in a draw, but Wang Hao found a brilliant idea how to make progress!

35.h5! White not only pushes the king back to the back rank, but he also fixes the h7 pawn, which is attacked by the knight.

35...♖e2!! The start of the brilliant plan! Black transfers his rook to a8, from where it perfectly supports the a-pawn and also defends against the back rank mate.

36.h6+ [If White prevents Re8 with 36.♖c8 36...♖e5! is strong and the h5 pawn falls or after 37.f4 ♖e2 the white king is suddenly in a mate net.]

36...♔f8 37.♖f6+? White loses a very important tempo with this unnecessary check. [White should have played like in the game, but without the Rf6 move. 37.♔g2! 37...♖e8! 38.f4! White needs to look for counterplay by advancing the kingside pawns. 38...♖a8 39.♖a6

39...♖b7! This is the key! Black kicks out the blockading rook by playing Rb6. 40.f5 And here comes the critical tempo, that Black needs to waste a move on protecting the h7 pawn in order to play Rb6. This is the reason why 37.Rf6 was bad, he just sent the king to g8! 40...♔g8 41.♔e6 ♖b6 42.♖a5 a6! Slowly but surely Black advances his pawn. He is ready to play Rb5 now. 43.g4 ♖b5 44.♖a2 ♖b3 (Unfortunately for Black he cannot push his pawn immediately: 44...a5? 45.♔c7)

45.g5! White must focus on his counterplay. (45.♖a5? loses to 45...♖c8! Black suddenly changes his mind and plays for the mate.) 45...a5 46.g6 a4

47.♔f2! The only move, but it allows White to hold. 47...a3 48.f6 hxg6 49.f7+ ♔h7 50.f8=♚ ♜xf8 51.♞xf8 ♜b6 Black grabs the h6 pawn and the game is drawn.; 37.♞c8+? is met by 37...♞e8!]

37...♔g8 38.♔g2 ♞e8! We are already familiar with all the ideas from the 37.Kg2! line.

39.f4 ♞a8 40.♞a6 ♞b7! It was not easy to foresee this plan from our initial position.

41.f5 ♞b6 42.♞a5 a6! 43.g4 ♞b5 44.♞a2 a5

45.♞d2 White is looking for counterplay by activating the rook. Black must be careful. [45.♘e6 45...♞b4! Black must waste a move in order to leave from the Nc7 threat. 46.g5 a4 47.g6 a3 White is not in time to play Rf2 and f6, Rb2 comes too fast. 48.♔g3 ♞b2 49.♞a1 a2 50.♘g5 hxg6 51.fxg6

♞b1—+ Black wins. White cannot promote his pawns.]

45...♞b6! An excellent defensive move, attacking the h6 pawn. [After 45...a4?? 46.♞d7 White even wins the game.]

46.♘e6 [46.♞d7 46...♞xh6—+]

46...a4 47.♞d7 a3 Despite the attacking pieces White is unable to create a serious threat.

48.♘c7 [48.♞g7+ 48...♔h8 49.♘g5 ♞xh6—+]

48...a2 [White resigned in view of 48...a2 49.♘xa8 ♞b2+! Black saves his rook. 50.♔g3 a1=♚—+] **0-1**

Clash of the Titans

(17) Tarrasch, Siegbert-Alekhine, Alexander[C53]

Baden-Baden(3), 1925.04.19

[Miton Kamil]

1.e4 e5 2.♘f3 ♘c6 3.♗c4 ♗c5 4.c3

4...♗b6 It looks like Alekhine was afraid to force the pawns exchange after d4, or maybe he wanted to play something new. Of course the main move is [4...♘f6 5.d4 (5.d3 leads to main positions. Both sides have typical plans here. White: transfer the knight to g3, try to push d4 at the right moment to get the center and to get some space after a4-b4. Black: transfer the knight to g6 and it might also be interesting to push d5 at some moment.) 5...exd4 6.cxd4 (6.e5 6...d5 7.♗b5 ♘e4 8.cxd4 ♗b6 9.♗e3 O-O 10.♘c3 leads to complex play where Black should be fine.) 6...♗b4+ 7.♘c3 (7.♗d2 7...♗xd2+ 8.♘bxd2 And now of course 8...d5! A strong move which destroys the white center. 9.exd5 ♘xd5 10.♗b3 ♘a5 11.♗a4+ ♘c6=) 7...♘xe4 8.O-O ♗xc3 9.d5 The only one chance to play for the initiative. 9...♗f6 10.♗e1 ♘e7 11.♗xe4 d6 12.♗g5 ♗xg5 13.♘xg5 h6 (13...O-O 14.♘h7 ♗xh7 15.♗h5+ ♗g8 16.♗h4 And White has some unpleasant pressure.) 14.♗e2 hxg5 15.♗e1 ♗e6 16.dxe6 f6∞With the idea to play c6-d5.]

5.d4 ♗e7 6.O-O [6.♘g5 6...♘h6 7.O-O O-O The knight on h6 is not worse than the one on g5. (7...exd4 8.cxd4 ♘xd4 9.♘c3 c6 10.♘a4 White gets good compensation.) 8.d5 ♘d8

9.d6! White sacrifices the pawn to create some development problems for Black, otherwise Black would play d6 and f5 next, with great play over the f-file. 9...cxd6 10.♘a3]

6...♘f6 7.♗e1 d6

8.a4 One of the typical moves in this kind of positions. White is trying to get space, but on the other hand the b4 square will be weaker, we will see this important factor later.

8...a6 A normal move. An interesting but inhuman option was to provoke White to push d5 after [8...O-O 9.d5 ♘a5 Otherwise the black bishop would be caught immediately. 10.♗a2 ♘g4 11.♗f1 f5 This is the idea. Black sacrifices the piece on the

queenside but wants to get strong pressure against the white king. 12.♖bd2 ♗xf2 13.♗xf2 ♕xf2+ 14.♔xf2 fxe4 15.♗xe4 ♖h4+ 16.♔e3 ♗g4 17.♗e2 ♕f5∞]

9.h3 O-O 10.♕g5 I don't see the point of provoking the h6 move if White wants to develop the bishop to e3 anyway.

10...h6 11.♕e3 [11.♕h4 11...g5 Not obligatory yet, but it is a normal idea here. 12.♕g3 exd4 (12...♗h5 13.♗xe5 ♗xe5 14.♕xe5 dxe5 15.♗xh5 ♖g7 With compensation over the dark squares.)

13.e5! On time! (13.cxd4 13...g4 14.hxg4 ♕xg4 And White has problems with the d4 pawn.) 13...dxe5 14.♗xe5 ♗xe5 15.♕xe5 ♕e6 16.♕xe6 fxe6 17.cxd4 ♖ad8 18.♗c3 I prefer White because of the weak black king.]

11...♗d8?! Even if Black has a concrete idea, to lose two

moves in the opening (Qe7-Qd8) cannot be good. Of course the critical move was [11...exd4 12.cxd4 ♗xe4 (12...♗xe4 13.♕d3! Black has problems with the queen. (13.♗c3 13...♗h7∞; 13.♕xh6 13...♗g6 14.♕g5 ♗xd4+ 13...♗e7 (13...♗d5 14.♗c3 ♗h5 15.♗e2 With Nf4 next.) 14.♕xh6 ♕e6 15.♕g5± Black's position is very unpleasant because of the very weak position of his king.) 13.♗c3 (

a) 13.♕d5 13...♗f6 14.♕xh6 ♖d7 15.♗d2 ♗f5 16.♕xc6 bxc6 White will not be able to create any attack without the light squared bishop;

b) 13.d5 13...♗e5 14.♗xe5 (14.♕xb6 14...♗xc4 15.♕d4 f5) 14...♗xe5

15.♕xb6 cxb6 And Black holds the position thanks to a tactical trick: 16.f3 ♗xb2 17.♖a2 ♗b4 18.♖xe4 ♕f5!+=;)

13...♗xc3 14.bxc3 White has compensation because the black pieces are limited and White is ready to create some active play on the kingside.]

12.♕d3 [12.♗bd2 12...exd4 13.cxd4 d5 I suppose this was Alekhine's idea.; 12.dxe5!? 12...♗xe5 (12...dxe5 13.♗xd8 ♖xd8 14.♕xb6 cxb6 15.♗a3+=) 13.♗xe5 dxe5 14.♕xb6 cxb6 15.♗d2+= White is better because Black has problems with the bishop and the pawn on b6.]

12...♖e8 13.♘bd2+= ♘a7

14.♖c2?! White has several other options: [

a) 14.♖b1 14...exd4 15.cxd4 ♘b4 16.♙f1 a5 Black is fine because with the bishop on f1 and the queen on b1 White will not be able to create an attack after the e5 break.;

b) 14.a5 With the idea to get more space.;

c) 14.♖c1 With the idea to keep the b1 square for the bishop.;

d) 14.♖b3 With the idea to take control of the important b4 square.]

14...exd4! The correct move because now White is forced to recapture on d4 with the knight.

15.♘xd4 [15.cxd4 15...♘b4=]

15...♘e5 16.♙f1

16...d5! Black immediately takes the opportunity to equalize the position in the center.

17.♖ad1 [17.f4 17...♘g6 18.e5 A typical idea, but unfortunately for White the pawn is placed on h3 and after 18...♘h5 White has problems with the f4 pawn.; 17.♙f4 17...♘g6∞]

17...c5 [17...dxe4 18.♘xe4 ♘xe4 19.♖xe4 ♘c4 20.♘c6! ♘d6 21.♘xd8 ♖xe4 22.♙xa7 ♖xa7 23.♖xe4 ♘xe4 24.♖e1 White is better because of the bad rook on a7.]

18.♘4b3 [18.♘f5 18...♙xf5 19.exf5 ♖c7 With Rad8 next and Black is better.]

18...♖c7 [18...d4 19.cxd4 cxd4 20.♘xd4 ♙xd4 21.♘b3+=]

19.♙f4 [19.exd5 19...c4 20.♘d4 ♘xd5∞]

19...♘f3+ 20.♘xf3 ♖xf4

21.exd5? A mistake. White should have played [21.e5 21...♙f5 22.♖c1 ♖xc1 (22...♖xa4 23.exf6 ♖xb3 24.fxg7 ♙xg7 25.♖f4 ♙g6 26.♘h4!) 23.♘xc1 ♘e4

24. ♖xd5 (24.c4↑ looks logical to limit the bishop on a7, get the light squares and get rid of the knight from e4.) 24...c4 25. ♘d4 ♙e6 (XRd5) 26. ♙xc4 ♙xd5 27. ♙xd5 ♘c5 28.g3 ♖ad8∞]

21... ♙f5 22. ♙d3 [22. ♖d2 22... ♖xa4±]

22... ♙xh3!

23.gxh3? A decisive mistake. White could still fight after [23. ♖d2 The idea is to force Black to put the dangerous queen far away from the white king. 23... ♖xa4 (23... ♖g4 24. ♙f1 (XBh3)) 24.gxh3 c4 (24... ♖xb3 25. ♘e5 ♖xd5 26. ♖f4 With compensation over the light squares.) 25. ♘c1 cxd3 26. ♖xd3 ♖ad8 27.c4 b5 Black has the initiative but anything can happen in this position.]

23... ♖xf3 24. ♖xe8+ ♖xe8 25. ♙f1 Now all the black pieces can be connected to the attack and White's position is lost.

25... ♖e5 26.c4 ♖g5+ 27. ♙h2 ♘g4+ 28.hxg4 ♖xg4 0-1

Editorial Preface

The only big event that finished last week was the Anatoly Karpov trophée in Cap D'Agde. In the final the number one of the event Etienne Bacrot played against the one who gave his name to this tournament, Anatoly Karpov himself, who had been showing really fantastic chess. After the first 2 draws in rapid chess, Etienne managed to win his both blitz games, although one has to say he got a little bit lucky.

From next week on, we can follow what are probably the two biggest chess events of the Year 2013. These are of course the WCC match between Carlsen and Anand and the European Team Championship.

To give exact predictions for team events is always very hard, but the teams of Russia and Armenia are clearly big favourites for the first 2 places. It is a bit disappointing that the team of Israel is coming without any of their top players and Ukraine is also playing without Ivanchuk, Ponomarev and Eljanov.

Now let's talk about the WCC. We can find many opinions about the outcome of the matches on different chess sites, so we decided to give a short statement too.

Anand: One of the most talented chess players of all time and the current World Champion. Anand has not been showing very convincing play during the last years in different tournaments, but on the other hand he has always been in top shape for the WC matches. Being 43 years old, Anand could clearly get a problem from a physical point of view as he is playing against a much younger opponent. Can his experience in matches help him?! Surely a bit, but it is very hard to say if this will play a decisive role.

Carlsen: Maybe the right word to express his chess power is to call him a "Chess Terminator". No feelings, extremely

practical, smart, never slowing down chess killing machine. With an amazing rating of 2870 ELO points Carlsen seems to not even be at his top yet! Does Carlsen have any weak points?! Not many, if there are any... We only see him losing very rarely and almost only when he over pushed his position.

Our prediction for the match: If Anand was 10 years younger, it would probably have been much harder to say who is the favourite, but today, it is difficult to imagine a very human World Champion holding up in a 12 games match against the "Chess Terminator".

We will keep you updated live from the European Team Championship, as Csaba is in the team of Hungary and Arkadij plays for Germany.

Enjoy CEWN Nr89!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

**(1) Bacrot, Etienne(2730)
- Ivanchuk, Vassily(2733) [D15]**

2nd Karpov Trophy KO(1.1), 2013.11.01
[Balogh Csaba]

We are in the knock out part of the Cap'd Agde rapid tournament. Etienne Bacrot convincingly eliminated the 1st seed Ivanchuk with 2-0.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 It was considered to be kind of impossible to guess what Ivanchuk was going to play, but lately he plays the Slav with a6 in all his games against 1.d4.

4...a6 5.e3 b5 6.b3

6...♘f5 A relatively rare continuation. [The main line by far is 6...♘g4]

7.♘d3 [White has a more aggressive option too: 7.♘e5 7...h6 (7...e6 is strongly met by

8.g4! ♗g6 9.h4 and Black has problems with saving his bishop.) 8.g4 ♗h7 9.♗g2 e6 10.O-O Followed by f4 with a nice attacking position for White.]

7...♗xd3 [7...e6 seems to be a better option for Black, after which White has a much harder task to achieve the e4 plan which happened in the game. 8.O-O ♘bd7 Black should not be afraid of doubling his pawns. 9.♗xf5 exf5 10.♖c2 g6

This pawn structure is quite standard in many different openings. Black controls the central squares well. He develops his bishop d6 and gets a playable position.]

8.♖xd3 e6 9.O-O ♗e7

10.e4! White successfully executes the standard plan, after which he gets a stable positional advantage.

10...dxe4 [The tactical justification of the previous move is that after 10...b4 11.e5! bxc3 12.exf6 ♗xf6

13.♗a3! Black has problems with castling, or if he plays 13...♗e7 14.♗xe7 ♖xe7 he is going to miss his dark squared bishop and White will make use of by centralizing his knight on e5 later on. 15.cxd5 cxd5 16.♖fc1! The most exact move to win the pawn back. White immediately doubles his rooks on the opened file. 16...O-O 17.♖xc3± Followed by Rac1 and Ne5, with a clear advantage.]

11. ♖xe4 ♜bd7 12. ♙f4! The ideal square for the bishop, which intends to occupy the d6 square later on.

12... 0-0

13. ♖fd1! We might be familiar with this kind of position without the inclusion of the b5-b3 pair of moves. In that case Black has a slightly worse position with some space disadvantage, however he doesn't have any weaknesses and Black usually holds those games without any special efforts. However in our case, White has a clear target on c6, which is also the reason why he has put his f-rook to d1, he intends to play Rac1 next. Opening the b-file with bxc4-bxc4 always favors White as his bishop controls the b8 square and he gets a free hand to penetrate with his own rooks along the b-file.

13... ♙a5 A mysterious move. Ivanchuk probably wanted to pin the a1 rook to the defence of the a2 pawn, but he puts his queen out of the battle. [13... ♖xe4 14. ♙xe4 ♙c8 was more logical, although White gets an advantage here as well: 15. ♖ac1 ♖f6 16. ♙e2 ♙b7 17. ♖e5 White has very easy play, but Black still has chances to consolidate. 17... ♖ac8 18. ♙f3 ♖d7 19. ♖c3+= Followed by Rdc1 with the threat of taking on b5 when it hurts the most.]

14. ♖xf6+! Black has no good recapture. He must either let the bishop occupy the d6 square or the knight jump to e5.

14... ♙xf6 [14... ♖xf6 is also bad in view of 15. ♖e5 ♖ac8 16. ♙f3 ♙b6 17. a4! ♖fd8 18. ♙e3± Black is doomed to passivity.]

15. ♙d6 ♖fd8 16. c5 It is nice to have such a bishop on d6, especially when the knight is going to follow him to e5.

16... ♖f8 [16... e5

was the last chance to create some counterplay, although after the very strong 17.g4!! Black ends up in trouble. The point becomes clear later on, White opens the back rank with tempo because he is threatening to trap the bishop with g5. (17. ♙e4 17... exd4 18. ♖xd4 ♖e8! is White's problem and he cannot take on c6 because of Bxd4 and the mate on e1. ; 17.dxe5 17... ♖xe5! would be fine for Black.) 17... g6 18. ♙e4! exd4 19. ♖xd4 ♙xd4 20. ♖xd4± With a big advantage.]

17. ♖e5 ♙xe5 18. dxe5 The d6 bishop destroys all of Black's counterplay. White has many different ways to improve his position, but the best is to play on a kingside attack with h4-h5, Qe4, Rd3-Rg3.

19. ♔e4 ♖ac8 20.h4! An obvious attacking move!

21.h5 ♖e7 [21...♘f8 22.♖d3 is also quite hopeless.]

22.h6 [22.♘xe7! 22...♖xe7 23.h6+- was even stronger to deprive Black of any kind of counterplay by eliminating the knight. We transpose to the game if Black takes on h6, otherwise White mates with Qg4 g6 Qg5-f6.]

22...gxh6 [22...♘f5 was the only practical chance to keep the knight on board. 23.hxg7 ♔d8 24.♖d3 Objectively White is just winning, he can still do whatever he wants while the black rooks have no chance to join to the game.]

23. ♖xe7! White eliminates the only defender. His heavy pieces are coming fast to the attack and Black soon has no defence.

23...♖xe7 24.♔d3! The rook joins the attack along the 3rd rank.

24...♔c7 [24...♖h8 25.♗h4+- White gets his queen to f6 with tempo.]

25. ♖ad1 ♜f8 26. ♜g3+ ♔h8 27. ♜d6! The most precise way to win! White protects the e5 pawn in order to be able to drive his queen to f6. [27. ♜f4 would have allowed 27...f5!]

27...f6 [27...♖g8 is also hopeless: 28.♖xg8+ ♔xg8 29.♖xc6 ♕b7 30.♕g4+ ♔f8 31.♗d6 White has mating attack and the c-passed pawn are deciding the outcome.]

28.exf6 ♖xf6 29.♔d4 Black resigned. Ivanchuk definitely had a bad day, but it is still an impressive positional achievement by Bacrot! **1-0**

**(2) Pelletier, Y.(2578)
- Ivanchuk, V.(2733) [A04]**

2nd Karpov Playoff(6), 2013.10.31

[Arkadij Naiditsch]

Before the game, who can guess in what kind of shape Ivanchuk will be?! Lately we have seen him in rather poor shape, often blundering in important games, showing a lot of hesitations and often losing on time. But Ivanchuk, is still Ivanchuk and he proves this with a very nice positional crush over the Swiss number one, Pelletier.

1.♖f3 d6 You never know what Ivanchuk is going to play, even on the first move! :)

2.d4 g6 3.c4 ♘g7 4.♖c3 e5 [4...♗f6 5.e4 would lead us to the main KID.]

5.e4 [5.dxe5 5...dxe5 6.♙xd8+ ♔xd8 seems to be quite OK for Black.]

5...exd4 6.♗xd4 ♖e7 This is Black's idea. The knight is not taking place on f6 but on e7, which has some pluses and minuses. A clear plus is that Black often has the idea of playing f5 and a big minus is that he has no pressure on the e4 pawn.

7.♘e2 O-O 8.O-O ♘bc6 White has to take a first decision, whether to take on c6 or to play Be3.

9.♗xc6 The most principal. [After 9.♘e3 9...f5 Black's position should be close to equal.]

9...bxc6 A very fighting decision.

[After the more simple 9...♗xc6 10.♘e3 White should be doing slightly better. To play Bxc3 is never a real option for Black and now the f5 push is a bit weaker than before. Of course Black can continue with Re8, but the problem with the "bad" bishop on c8 is not that easy to solve and White has a bit more space in the center.]

10.♘e3?! "Too" simple. [I think that 10.♘g5! is a much stronger move, provoking Black into playing h6 first in order to have Qd2 with tempo. 10...h6 Black must get rid of the pin. 11.♘e3 c5 12.♙d2 And compared to the game, White is almost a tempo up.]

10...c5! Black is aiming for the d4 square. Nc6-Nd4 is coming next.

11.♙d2 ♗c6 12.b3 White continues being passive. [It was time for at least a little action: 12.♘g5 Once again this move is quite unpleasant for Black. 12...♙d7 (12...f6?! Of course this move is not really an option, as the bishop on g7 is dead.) 13.♗d5 And maybe White can hope for some advantage because of the bad position of the black queen on d7.]

12...♗d4 With such a strong knight on d4, Black's position is perfectly fine.

13.♘d3

13...a5! A very smart decision. Black is trying to be ready to open the a-file at a good moment by playing a4 and axb3, which is a serious positional threat.

14.♖ae1?! Another strange move by White. White should be thinking about being solid and not playing f4, which would just weaken the position. [14.♖ad1 followed by Rfe1 looks much more natural.]

14...♖e8 15.♘e2?! Another solid but unlucky decision. [15.f4 If you say A, then it is usually better to say B!]

15...♗xe2+ 16.♖xe2 a4 And we can see Black's idea coming true. The b3 pawn is getting weak and is a clear target.

17.b4 Whites tries to survive by finally playing an active move. [A waiting move like 17.♘c2 17...axb3 18.axb3 ♖a2 would leave White with a very unpleasant position. Black's control over the a-file as well as his future plan of playing Bb7 and Qa8 could cause White serious trouble.]

17...cxb4 18.♙xb4

18...c5! Of course Black doesn't let White play c5 himself.

19.♙d2 [19.♙a3 was probably stronger, but it is not a great feeling to have a queen on a3. 19...♘b7 20.f3 ♘c6 With a slightly better position for Black.]

19...♖b8 The b-file is covered and soon we will see how important the a-pawn is for Black.

20.♖d1?! To give up the b-file without a fight is not an option. [Of course 20.♖b1 was the best chance to continue the fight. 20...♖xb1+ 21.♘xb1 ♘e6 22.♘d3 ♙b6 With a clear advantage for Black, but the fight would still have gone on...]

20...♖b2 21.♙c1 And here comes the point:

21...a3! What a glorious moment for Black's strategy. The rook on b2 is now untouchable, which makes White's position almost lost!

22.♖ed2 ♘b7 Putting extra pressure on e4.

23. ♖b1

23... ♖e6 Black protects the d6 pawn in a cool way.

24. ♗f4 This move is losing but it is already hard to find a move which is not... [After 24. ♗xc5 24... ♗h6! looks crushing. 25. ♗e3 ♗xe3 26. fxe3 ♖b6 With an almost winning position for Black.]

24... ♗d4! The last important move and now the game is over. White has no protection against Bxe4 next.

25. ♖xd4 Yannick Pelletier resigns with a scream:

25... cxd4 26. ♖xd4 ♖b6 All in all, a great positional victory of Ivanchuk over a very solid/passive Pelletier. 0-1

(3) Zhao Xue(2579)

- Pelletier, Y.(2578) [E21]

2nd Karpov Trophy Prelim(10.1), 2013.10.29

[Balogh Csaba]

Black leads a very attractive attacking game.

1. d4 e6 2. c4 ♗f6 3. ♗c3 ♗b4 4. ♗f3 c5

5. d5?! A dubious continuation right at the beginning of the Nimzovitch Defense. Black gets a very good option to undermine White's central pawns. [5.g3 is the main line, which we can see quite often nowadays, even on the highest level.]

5... b5! An excellent reaction. This move involves a pawn sacrifice, but he receives an extremely powerful center, which gives him more than enough compensation.

6. dxe6 fxe6 7. cxb5 White decided to accept the material...

7...a6! Black plays in the spirit of the Volga gambit (1.d4 Nf6 2.c4 c5 3.d5 b5 4.cxb5 a6). He would like to develop his pieces with tempo and if his strong center starts to march with d5-e5, that might quickly swap White off the board...

8.bxa6 ♗xa6 9.a3 White would like to ease the pressure by getting rid of the bishop, but of course Black is not forced to take on c3.

9...♗a5! Keeping the bishop pair and the pin.

10.e3 White gives up castling, but there was nothing better. [White is not in time to develop with 10.g3 because of 10...d5 creating the threat of d4!]

10...♗xf1 11.♔xf1 O-O

12.b4?! White tries to make use of the pin on the a-file, but in fact she tricks herself with this move... [White could

not make some kind of artificial castling by playing 12.g3? 12...♗xc3 13.bxc3 ♖e4 wins for Black. Suddenly the f3 knight has lost its stability. 14.♔g2 ♗f6 Nxc3 threatens to win on the spot. 15.♗b2 The easiest is probably 15...♗c6 16.♖f1 ♗a5!—+ Followed by Nc4 with complete domination!; 12.♗d2! should have been played, although after 12...♗c6 followed by d5, Black has very strong compensation for the pawn and from a practical point of view it is much easier to play for him.]

12...♗xb4! Black can take this way! It is unclear whether the Chinese player simply missed this, or if she planned to play the following move, but she just misevaluated the arising position later on...

13.♗a4 White wins back her extra pawn, but the position slightly opens up, which of course favors Black with such a bad king on f1.

13...♗a5 14.♗xc5 ♗b6 Black always uses the chance if he can develop a piece with tempo.

15.♗d3 ♗e4! Black activates his pieces! Very nice dynamic play! White needs to deal with the king on f1 if she wants to use her h1 rook in this game.

16.♗b2 ♗c6 17.♖c1 [We had already seen that the g3-Kg2 plan destroys the stability of the important f3 knight. White can also not castle artificially by playing 17.h3 followed by Kg1-h2, because after a check on c7, he will need to retreat to g1. Black plays like in the game. 17...♖f5! 18.♔g1 ♖d5! is already more than unpleasant! Let's check a spectacular line to illustrate the strength of Black's attack!

19. ♖d4

19... ♖xf2! Black wins by force: 20. ♖xf2 ♖xd4 21. ♖xd4 ♖xd4! 22. exd4 ♖xd4+ 23. ♖e2 (23. ♖g3 is met by 23... ♖e3+ 24. ♖h2 ♖c7+-+ mates.) 23... ♖e4+! 24. ♖f1 ♖f8+ 25. ♖f2 ♖b6! +- Black wins in view of 26. ♖a2 ♖c4+-+]

17... ♖f5 A logical attacking move. Black intends to double his rooks on the f-file and also threatens to play Rd5 occasionally. [However the machine is right, that 17... ♖b5! 18. ♖g1 ♖c3! was stronger! White needs to be careful to not lose immediately and even if he finds the only moves he ends up in a suspicious position. 19. ♖xc3 (19. ♖xc3 19... ♖xa3! ♠ Black wins back the piece and continues attacking!) 19... ♖xc3 20. ♖xc3 ♖xa3 21. ♖c1! The only move! 21... ♖b3 22. ♖b2! Another only move! 22... ♖a2 Despite the material disadvantage, White can hardly solve the coordination between his pieces.]

18. ♖c2 [The computer suggests some massive defence with 18. ♖c4!? Black probably needs to play 18... ♖c5 (18... d5 19. ♖c2 ♖af8 20. ♖g1 is unclear.; 18... ♖xf3 19. ♖xe4 Otherwise Black would have played Nd2! 19... ♖f5 20. g3 ♖d5 21. ♖g2 ♖b5 22. ♖g4 g6 Things are unclear here as well.) 19. ♖xc5 ♖xc5 20. ♖xc5 ♖xb2 Black has compensation, but probably only enough for draw.]

18... ♖af8 19. ♖e2 White would like to rescue the h1 rook, but the king gets into trouble in the middle of the board.. . [19. ♖g1 was safer, although Black is doing well after 19... ♖d5! ♠ With the threat of Rxd3 and the bishop on b2 is hanging.]

19... ♖d2!? A highly attractive move with multiple tactical ideas...

20. ♖b1? This is the decisive mistake. [20. ♖xd2? loses to 20... ♖xf2+! 21. ♖xf2 ♖xf2+ 22. ♖d1 (22. ♖e1 22... ♖xe3+-+) 22... ♖xd2+ 23. ♖xd2 ♖xd2+- Black ends up with a winning material advantage.; 20. ♖cd1! was the only move to stay in the game. Black probably intended to play 20... ♖xf2 The point of the previous bishop move was to attack the e3 pawn. 21. ♖xd2! (21. ♖xd2 loses to 21... ♖xd3 22. ♖xd3 ♖c5 23. ♖b1 ♖b5 24. ♖d2 ♖b3+ 25. ♖c2 ♖a5+- With an enormous attack.) 21... ♖xh1 22. ♖d1 Very calm defence by White. It looks like Black has nothing better than 22... ♖b7! 23. ♖xh1

23...♖xf3! 24.gxf3 ♘d4+! 25.♙xd4 ♜xf3+ 26.♔d2 ♜g2+ 27.♙c1 ♜xh1+ 28.♙b2 ♜b8+ 29.♘b4 Only Black can win, but he still needs to work hard for it.]

20...♜a6! After this subtle move, White has no adequate defence. Black simply wants to play Rc5, making use of the pin.

21.♜bd1 ♜c5 22.♜b1 ♜b8 [22...♙c3—+ was even easier. Black is freeing the c3 square for the knight.]

23.♘xd2 [23.♜xd2 is met by 23...♘c3+! 24.♙xc3 ♜xb1 25.♜xb1 ♜xc3—+ With a technical win.]

23...♘c3+ [23...♜xb2! was the most precise move order, but the text move was winning as well. 24.♜xb2 ♘c3+ 25.♙e1 ♜xd3—+]

24.♙e1? [24.♙xc3 White could have set up some resistance

with 24...♜xc3!—+ (But not 24...♜xb1? 25.♘xb1 as suddenly White wins.)]

24...♜xb2! [Not the only way to win, but the nicest one. White resigned in view of 24...♜xb2 25.♜xb2 (25.♘xb2 25...♜e2#) 25...♜xd3 and Qe2 is unavoidable.] **0-1**

(4) **Leitao, R.(2632)**
- **Molina, Rob(2416) [D27]**

80th ch-BRA S/F 1 2013(6.1), 2013.11.03
[Arkadij Naiditsch]

Usually we only get a chance for a beautiful combination after a positional domination and in this game it is not different. Leitao outplays his opponent in the middle game and finishes him off with a very beautiful combination!

1.d4 d5 2.c4 dxc4 The Queen's Gambit accepted, still a popular opening after more than 100 years of existence.

3.♘f3 [3.e4 is the most popular move for White at the moment.]

3...♟f6 4.e3 e6 5.♙xc4 c5 We are now in the very main position.

6.O-O a6 Of course Black's plan is to play b5 followed by Bb7.

7.a4 The b4 square is not that important.

7...♟c6 8.♚e2 White is preparing to play Rd1, which is very typical for these structures.

8...♚c7 [8...cxd4 9.♚d1 And White is winning the pawn back.]

9.♟c3 ♙d6 [Black is already late with 9...cxd4 10.exd4 ♙e7 because of 11.d5 with a clear advantage for White.]

10.dxc5 Once the black bishop has made a move, White takes on c5 in order to win a sort of half tempo.

10...♙xc5 11.♙d2 White needs to hurry a lot. If Black manages to develop his queenside, the position will just be a draw because of the symmetrical pawn structure.

11...O-O 12.♚fc1 It is also typical in such positions to play Rfc1 and not Rac1. The rook on a1 can often be useful in helping White to play a5 or to disturb Black's play on the queenside.

12...♚d8! A nice move! Black is preparing the Bd7-Be8 maneuver, followed by Rac8 with an equal position.

13.♙d3 This is probably White's best try. Using his slightly better development, White creates the threat of playing Ne4 next and trying to make use of the c-file.

13...♟e5 Slightly risky play by Black. [13...♙d7 looks more solid and it seems like White will at most end up in a minimally better position. 14.♟e4 (14.♟b5?! doesn't work: 14...axb5 15.♚xc5 bxa4) 14...♙e7 15.♟xf6+ ♙xf6 16.♙c3 ♙xc3 17.♚xc3 With a minimal advantage for White.]

14.♙e4! This is exactly why Black should have been more careful!

14...♟xf3+ Now it is clear that White is better. [It is funny, but maybe Black should just have gone back: 14...♟c6 15.♙b1 The

white bishop is taking a better place on b1 than on d3, but nothing too dramatic has happened.]

15. ♖xf3 And Black is in trouble now. First of all Black needs to solve the problems on the c-file and in the long term the pressure on the b7 pawn can become very unpleasant as it is disturbing the development.

15... ♔e5 Black didn't have a choice... He is still hoping to be in time with Rb8 and Bd7.

16. g3! Another very strong move by White. In case Black played Rb8, White is preparing to play e4. At the same time White is defending against any tricks with Bd6 and creating a "safe hole" for the king on g2 in case of any trouble in the future.

16... ♗b4? This is already a serious mistake. [It was the last chance for Black to develop his pieces: 16... ♗d7! 17. ♗xb7 If White doesn't take on b7, Black should be more or less fine. 17... ♖ab8 18. ♗xa6 ♖xb2 With good compensation for the pawn.]

17. ♖d1 Logical and good. White wants to play e4 next.

17... ♖b8 I have no idea why, but Black seems to provoke the following move:

18. e4 Of course! White is better developed and starts the rush on the black defence.

18... g5 Nothing else could prevent Bf4.

19. h4! White opens the position in front of the black king as much as possible, which will be very useful for the future.

19... h6 20. hxg5 hxg5 21. ♗e3 White is taking over the d-file, which also makes the Bd4 move possible.

21... ♖xd1+ Not a nice move to play, but the position is close to lost already.

22. ♖xd1 ♗e7 23. ♗d4 White is on the finishing straight line.

23... ♖c7 24. e5! In a position with a lot of tempting continuations, Leitao chooses the most precise one!

24... ♗d7 25. ♗e4 ♗f8 Black is still hoping to escape with only "a blue eye".

26. ♖h5 ♗d7 Does it seem like Black has survived the worst?! No way!

27. ♗d5!! What a beautiful tactical solution.

27... exd5 [27... ♖d8 didn't help: 28. ♗f6+ ♗xf6 29. exf6 Followed by mate.]

28.e6 Very nice!

28...fxe6 [28...f6 29.♔f7+ ♔h8 And now comes the silent but deadly 30.♔g2 This is of course only one among several winning moves.]

29.♘h7+ What a fantastic final! White mates after 29...Nxh7 30.Qg6 Kf6 31.Bg7 Kg8 32.Bh6 Kh8 33.Qg7. **1-0**

Endgame section

(15) Nevednichy, V.(2590)-Saric, I.(2628)

Danube rapid, 2013.11.02

[CE Team]

It looks like a dead draw, but actually White needs to defend precisely in order to save the game.

60...Kb5 61.Kd3 White would like to get his king to b1 to achieve an easy draw.

61...Kb4 62.Kd2 f4+! Otherwise White plays Kc1-b1.

63.Kd3 [63.Kd1 63...Kc4 will transpose to the game.]

63...f5! White gets into zugzwang! He needs to make the first difficult decision.

64.Ke2! The correct defence! White drives his king to d1 to stay ready to play Kc1-b1. [64.Ke4? loses to 64...Kc4! The next step for Black is to transfer his bishop to c3. White cannot parry this. 65.f4 d2 66.f2 c3 67.a3 f6! Black frees the c3 square for his king. 68.Kc3 Kc3 69.Kc2—+ And Be7 next deflects the bishop and Black promotes his pawn.; 64.f5? also loses after 64...Kc4! 65.Kc4 Ka2 Black sends away the bishop from the a1-h8 diagonal and wins the game automatically. 66.Kb4 (66.f4 does not change anything: 66...c1 67.f5 b2 68.f4 f6 69.c1 e7—+ Followed by Ba3 and Black is winning.) 66...c1 67.Ka4 b2 68.f4 f6 69.a3 g5—+ White got into decisive zugzwang as Kb4 loses to Be7.]

64...Kc4! 65.Kd1 Kd3 66.f5 f4! We have reached the critical position. In order to save the game, White needs to find a mutual zugzwang position!

67.f2? White fails! He is lost after this move! The point is that in the position when the white bishop is on b2 and the black one on e3, we have a mutual zugzwang. In that position if Black is to play the game is drawn, while if White is to play he loses. Let's try to understand the reasons.

[67.♘f6 or any other bishop move along the a1-h8 diagonal holds the draw, only Bb2 loses. Black needs to send away the bishop from the long diagonal. 67...♘e3 And when the bishop goes to e3, White must play Bb2 with the idea of (67...♘d2 does not threaten anything and White can continue waiting, since after 68.♘e5 ♘c3 the pawn endgame is drawn. 69.♘xc3! ♔xc3 70.♔c1=)

68.♘b2! ♘d4 69.♔c1!= White easily holds the draw.]

67...♘e3! —+ The game is over now! Saric demonstrates it with good technique.

68.♘a3 [68.♘a1 68...♘d4 69.♘xd4 ♔xd4 The pawn endgame with the king on d4 is winning, despite the fact that White can temporarily take the opposition. 70.♔d2 ♔c4 71.♔d1 ♔d3! 72.♔c1 ♔c3 73.♔b1 b2—+; 68.♘e5 68...♘d4—+]

68...♔c3! White is in zugzwang again.

69.♘e7 [69.♔e2 69...♘c5 70.♘c1 ♔c2—+]

69...♔b2! Black drives his king to a2 and he wins with the technique we know from the 64.Be5 line.

70.♘f6+ ♔a2 71.♘c3 ♘c5 The bishop is heading to b2!

72.♘e5 ♘a3 73.♘c3 ♘b2 74.♘d2 ♘f6 75.♘c1 ♘e7 White resigned as Ba3 is coming next. [75...♘g5 was also good enough. A very instructive practical endgame.] **0-1**

(16) Buchal, S.(2312)-Delchev, A.(2643)

17th OIBM 2013(8.3), 2013.11.01
[CE Team]

After a long defence, Buchal, who is more than 300 ELO points lower rated than Delchev, finally reached a position which looks to be close to a draw. White seems to be taking both of the Black's pawns, but he has to give his bishop for it. Can Q+B mate against Q+K?!

57...♙f4 58.♙xe4 White got no choice, both black pawns have to be taken.

58...♙xf2 59.♙g1 The only move to defend from the mate on h2.

59...♙e2 Attacking the bishop on e4 and threatening to play f2 next.

60.♙xf3 White has no choice, but do things look that bad?! Usually Q+B against Q is just a draw, but in our case the white king is very badly placed on h1 and the black one on h4 is very active. Delchev will demonstrate how to make use of this during the next moves.

60...♙xf3+ If we take a look at the engine evaluation here, it is quite funny but White's position is totally lost!

61.♙g2 ♙d1+ [61...♙d3 would have saved us 2 extra moves.]

62.♙g1 ♙d5+ 63.♙g2 ♙d3! Delchev finds the right square for the queen. It is very important to take the f1 square under control. White is in zugzwang.

64.♙f2+ [64.♙g1 was also losing after 64...♙e3+ 65.♙h2 ♙d6+ 66.♙h1 ♙d1+ 67.♙h2

67...♙f4+]

64...♙g4 65.♙g2+ ♙g3 Black is threatening to check on h7 or on d1, depending on where the white queen will move.

66.♙g1 ♙d4+! Black sees the forced mate:

67. ♔h1

67... ♔a1+ 68. ♔g1 ♔h8+ Very beautiful geometrical play. Not often do we see such examples in a practical game. 0-1

Clash of the Titans

(17) Lasker, Emanuel-Janowski, Dawid Markelowicz[D32]

World Championship 11th(5), 1910.11.19

[Miton Kamil]

1.d4 d5 2.c4 e6 3. ♘c3 c5 4.cxd5 exd5 [4...cxd4 5. ♔a4+ ♕d7 6. ♔xd4 exd5 7. ♔xd5 ♘f6 And Black is trying to get the initiative for the pawn.]

5. ♘f3 ♕e6 Nowadays Black usually plays [5... ♘c6 6.g3 ♘f6 7. ♕g2 ♕e7 8.O-O O-O This is the main position of the Tarrasch Defense.]

6.e4 An interesting decision. Because of his better development Lasker is trying to play in the center. More solid was the typical plan [6.g3]

6...dxe4 [6... ♘f6 7.exd5 (7.e5?! 7... ♘fd7 After Nc6-Qb6 Black will get good pressure against the central white pawns.) 7... ♘xd5 8. ♕b5+ ♘c6 9. ♔a4 ♘xc3 10.bxc3 ♕e7 11. ♕xc6+ bxc6 12. ♔xc6+ ♕d7 13. ♔e4 O-O 14.O-O cxd4 15.cxd4 ♕e6 Black should have enough compensation thanks to the strong light squared bishop.]

7. ♖xe4 White could play more aggressively after [7. ♗b5+

The idea is to not lose any time for recapturing the pawn, but to develop the pieces and create threats as soon as possible. 7... ♖d7 (7... ♗d7 8. ♖e5 cxd4 (8... ♗xb5 9. ♖b3 A nice trick and White is winning.) 9. ♖xd7 ♖xd7 10. ♖xd4 a6 11. ♖xe4+ ♗e7 12. ♗e2 Thanks to the bishop pair White has a stable advantage.) 8. ♖e5 ♖f6 9. ♗g5 cxd4 10. ♖xd4 ♗e7 11. ♖d1 The black pieces are very unpleasantly pinned. 11... O-O 12. ♖a4 (12. ♗xd7 12... ♖xd7 13. ♗xe7 ♖xe7 14. ♖xd7 ♖fd8=) 12... ♖xe5 13. ♖xd8 ♖fxd8 Black solved the practical problems but of course objectively White is better.]

7... ♖c6 8. ♗e3?! [8. dxc5 8... ♖xd1+ 9. ♖xd1 O-O-O∞; 8. ♗g5 was the correct move. 8... ♖a5+ (8... f6 9. ♗d2 cxd4 10. ♗d3 Thanks to his better development and the bad pawn on f6 White has more than enough compensation.) 9. ♗d2 ♖b6 10. dxc5 ♗xc5 11. ♖xc5 ♖xc5 12. ♖c1 ♖e7 13. ♗e2 ♖f6 14. O-O O-O Black's position is solid but on the other hand White has the bishop pair.]

8... cxd4 9. ♖xd4 ♖a5+

10. ♖c3? A huge mistake! After this move White will have big problems to escape the pin on the d-file. [10. ♖d2 10... ♗b4 11. ♖c3 O-O-O And now as the queen is already on d2 White can play 12. ♖xc6 bxc6 13. ♖c1 ♖f6 14. ♗e2 ♖d5∞]

10... O-O-O 11. a3 [11. ♖d2 11... ♖xd4 12. ♗xd4 ♗c5 13. b4 The only move to not lose the piece. 13... ♗xb4 14. ♖c1 ♖b8-+]

11... ♖h6? What a weak move! Black is preparing Nf5 but why not play the simple [11... ♗c5 was just winning immediately! 12. b4 ♗xd4 13. bxa5 (13. ♗xd4 13... ♖g5-+) 13... ♗xc3+ 14. ♖e2 ♖xd1 15. ♖xd1 ♗xa5-+; 11... ♖xd4 12. ♗xd4 ♗c5 13. b4 ♗xd4 14. ♖xd4 ♖xd4 15. bxa5 ♖f6=+]

12. b4 ♖e5 13. ♖cb5 The position looks lost but somehow White holds the d4 square.

13...d5?! [13...a6 14.♖c1! axb5 15.♗xc6 bxc6 16.♖xc6+ ♕c7 (16...♖b8 17.♖c1→) 17.♖a6+ ♕b7 (17...♖b8 18.♖c1 ♕c8 19.♖xb5+ ♕b7 20.♖a4∞) 18.♖c1+ ♕c4 19.♖a5 ♕c7 Otherwise with the queens on the board White will get a strong initiative. 20.♖a6+ ♕b7=; 13...♗xd4! 14.♗xd4 ♕e7 15.♕e2 (15.♖c1+ 15...♖b8 16.♗f3 White solved the problem of the d-file but he lost a lot of time. 16...♖e4 17.♕e2 ♗g4 18.O-O ♗xe3 19.♖xe3 ♖xe3 20.fxe3 ♕f6 Black has a big advantage thanks to his strong bishops and better structure.) 15...♖b8 Avoiding Qc1 and with the idea to play Bf4 next. 16.♖d2 ♖a8± It is still not easy to escape from the pin.]

14.♖c1 White gets counterplay over the c-file and the position becomes unclear.

14...♗xe3 15.fxe3 ♖xe3+ 16.♕e2 ♕e7

17.♖c3! A logical move, with the idea to chase the active

queen, which prevents White from castling. [17.♗xa7+ 17...♖b8 18.♗axc6+ bxc6 19.♗xc6+ ♕b7 20.♖c2 It is hard to say which king is weaker... (20.♗xd8+ 20...♖xd8 21.♖c2 ♖c8→) 20...♖c8 21.♖c3 (21.b5 21...♕xa3±) 21...♖xc3+ 22.♖xc3 ♕f6 23.♖c5 ♖b6 24.♕f3∞]

17...♕h4+? Not an accurate move. Black had several other options: [17...♖xd4!? 18.♖xe3 ♖xd1+ 19.♕xd1 a6 20.♗c3 ♕g5 With good compensation.; 17...♖xc3+ 18.♗xc3 ♗xd4∞Black has good compensation here too.; 17...♖e5 18.O-O (18.♗xa7+ 18...♖c7 19.♗axc6 bxc6 20.♖xc6+ ♖b7 21.♖a4 only leads to perpetual check. 21...♖xd4 22.♖a6+ ♖b8 23.♖b6+=) 18...♖b8

19.♖xc6 a6 (19...♕f6) 20.♖xa6! bxa6 21.♗c6+ ♖b7 22.♗xe5 ♖xd1 23.♖xd1 axb5 24.♗xf7±]

18.g3 ♖e4 [18...♖xc3+ 19.♗xc3 ♕f6 20.♗cb5 ♗xd4 21.♖c1+ ♖b8 22.♖f4+→]

19.O-O ♕f6? The decisive mistake. Black could still fight after [19...♖b8 20.♖f4 ♗xd4 21.♖xe4 ♗xb5 22.♖d3 ♗c3 23.♖d2 ♗xe4 24.♖f4+ ♖a8 25.♖xh4 It is very important to win the dark squared bishop. 25...♖xd3 26.♕xd3 ♗f6 And it will take White a long time to convert this advantage.]

20. ♖xf6! Thanks to this sacrifice White solves the problems with the pin on the d-file and get strong pressure against the black king.

20...gxf6 21. ♕f3 ♖e5 Now White is winning by force!
[21...♕g4 22. ♕xg4+ ♖b8 23. ♘xc6+ ♗xc6 (23...bxc6 24. ♘d6
Followed by Rd3, with very well coordinated pieces.) 24. ♖xc6
♗xd1+ 25. ♕xd1 bxc6 26. ♘d4±]

22. ♘xa7+ ♖c7 23. ♘axc6 bxc6 24. ♖xc6+ ♖b8 25. ♖b6+ ♖c8 [25...♖a7 26. ♗a4+ ♖xb6 27. ♗c6+ ♖a7 28. ♗b7#]

26. ♗c1+ ♖d7 27. ♘xe6 fxe6 28. ♖b7+ ♖e8 29. ♕c6+ And after 29...Kf8 White has 30.Qh6. **1-0**

Editorial Preface

All eyes are on the Carlsen-Anand WCC match.

After the first 2 boring draws, in the 3rd game Anand finally had a quite good chance to go into the lead with the black pieces, but he played too harmlessly. The 4th game of the match was amazing, with both players playing just fantastically and Carlsen being extremely close to go into the lead with a win with Black in the Berlin. And finally Carlsen won the 5th game by pushing hard in a slightly better endgame. Can Anand come back-it is hard to imagine but who knows!

Let's now come to the European Chess Championship.

After 7 rounds France are having a huge run although they are playing without Fressinet, who seems to be one of Carlsen's seconds, and are leading the event. The team of Azerbaijan is also doing well, as well as the teams of Russia and Armenia. We can expect a dramatic finish with only 2 rounds to go.

In the current issue of the CEWN, we bring you commented 3 games of the WCC match plus a game of your commentator. Enjoy!

Arkadij Naiditsch & Csaba Balogh

(1) Anand, Viswanathan(2775)

- Carlsen, Magnus(2870) [C67]

WCh 2013(4), 2013.11.13

[Miton Kamil]

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Not a surprise. The Berlin and Najdorf are objectively the best openings nowadays.

4.O-O ♗xe4 5.d4 ♘d6 6.♙xc6 dxc6 7.dxe5 ♗f5 8.♚xd8+ ♗xd8 9.h3

9...♙d7 Black has many different plans here, with the king on e8 or c8, with pawn on h6 or h5, so this move looks very flexible. [9...♚e8 10.♘c3 h5 This is the most popular line. The idea of this move is not to allow White to easily get space after g4 and also to try and fix the white pawns after h4. The disadvantage is that the g5 square is weaker now. The first player who started to play this plan and make it popular is the Russian grandmaster Jakovenko.]

10.♚d1 ♙e7 11.♘c3 [11.e6 11...fxe6 12.♘e5 ♘d6=+]

11...♚c8 12.♙g5 Exchanging the bishops is a very logical choice. On the top level White also tried to play [12.g4 12...♘h4 13.♘xh4 ♙xh4 14.♘e4 b6 (14...h5 15.♘c5 ♙e8 16.g5

The idea of catching the black bishop doesn't work: 16...b6 17.♚d4 (17.♘d3 17...f6⇒) 17...♙xf2+ 18.♚xf2 bxc5 Black is fine here.) 15.♙g5 (15.f4 15...h5 16.f5 hxg4 17.hxg4 c5↑ And unexpectedly the white king becomes weak.) 15...♙xg5 16.♘xg5

16...h6! 17.♘xf7 ♚e8 The knight is trapped. 18.f4 ♚f8 19.♚xd7 (19.♘xh6 19...♚xf4=) 19...♚xd7 20.f5 ♚e7 21.e6 ♚xf7 (21...g6∞) 22.exf7 ♚d8 23.♚e1+ ♚xf7 24.♚f2 ♚d2+ 25.♚e2 ♚d1 26.♚f3 c5 27.♚g3 a5 28.♚h4 ♚b1 29.c3 b5 Black is in time with his counterplay on the queenside. 30.♚h5 c4 31.h4 b4 = Dominguez Perez,L-Navara,D/Linares ESP 2013]

12...h6 13.♙xe7 ♘xe7

14.♚d2 Both sides play very logically, but to get an advantage here for White will be very difficult. It is not easy to advance the white pawns on the kingside and Black should soon solve

the problem with his king and activate the bishop, when the position will be completely equal.

14...c5 15.♖ad1 ♕e6 16.♘e1 Vishy tries to make some progress on the kingside but it is a really hard task. [16.♘e2 Transferring the knight is typical here. 16...♕xa2 It is risky to grab the pawn here. 17.b3 c4 18.♘fd4

18...a6 (18...c5 19.♘b5 cxb3 20.cxb3 ♕xb3 21.♖b1 ♕d5 22.♘d6+ ♖c7 23.♘f4 White has the initiative.) 19.♘c3 c5 20.♘xa2 cxd4 21.♖xd4 cxb3 22.cxb3 ♘c6 23.♖c1 ♖c7 24.♘b4†; 16.a3 looks very slow. 16...b6 17.♘e2=]

16...♘g6 17.♘d3 b6 [17...c4 18.♘c5 ♘xe5 19.♖e2±]

18.♘e2 Vishy tries to show that he wants to press with the white pieces but objectively this move is very risky for him. [18.f4 18...c4 19.♘b4 ♘xf4 20.♘c6 A strange sacrifice. White has some compensation because after Kb7 White will play Nd8, take on e6 and then the rook comes to the active d7 square.; 18.b3 18...c4 Usually only Black can be better when he manages to get rid of the doubled pawns.]

18...♕xa2 A good decision based on simple calculation.

19.b3 c4 20.♘dc1 cxb3 21.cxb3 ♕b1 The bishop escapes...

22.f4 [22.♖d7

22...♖g8! A very strong move which prevents the e6 idea. (22...♘xe5 23.♖e7♖; 22...♖f8 23.e6†) 23.♖xf7 ♘xe5 24.♖e7 ♘c6 25.♖f7 ♕g6± And Black manages to get rid of the white rook on the 7th rank.]

22...♖b7 White has some compensation for the pawn, but of course objectively only the World Champion has to be careful in this position. [22...h5 23.♘d3 (23.♘c3 23...♕f5=+) 23...♕xd3 24.♖xd3 ♖e8 25.♖d7 ♖e7 26.♖d8+ ♖b7 27.♖xa8 ♖xa8 28.♖d8+ ♖b7 29.♖g8 a5 30.♖xg7 b5 The passed a-pawn gives Black the initiative.]

23.♖c3 ♜f5 24.g4 ♜c8 25.♘d3 White managed to slightly improve his position, take some space and limit the bishop, but Black is still a pawn up without any real weaknesses.

25...h5 A typical move. Black reduces the material and opens the h-file to activate his rook.

26.f5 ♘e7 27.♘b5 White needs to play actively and try to create some threats, otherwise Black will consolidate his position.

27...hxg4 28.hxg4 ♜h4 [28...g6 29.♜c2 Black has problems with both the c7 and d6 squares.; 28...a6 29.♘d4 c5 30.♘f3 g6

31.♘f4! gxf5 32.g5 The pawn on f5 is only disturbing Black. **32...♜e8 33.♜d6 ♘c6 34.♜f6 ♘d8 35.♜dd6†]**

29.♘f2 ♘c6 30.♜c2

30...a5 A logical move. Black is going to activate his rook and make the a6 square more safe for the king. [30...g6 The idea of this move is clear, Black wants to destroy the white structure and activate the bishop. 31.e6 (31.♜dc1 31...♘d7 32.e6 fxe6 33.fxe6 ♜e8=+) 31...fxe6 32.fxe6 (32.fxg6 32...♜h6 33.g7 ♜g6 34.♘e4 ♜xg7 (Of course not 34...♜xg4+? 35.♜g2) 35.♘ed6+ cxd6 36.♘xd6+ ♖b8 37.♜xc6 ♜xg4+ 38.♖f2 ♜b7 39.♘xb7 ♖xb7 40.♜xe6 ♜f8+ And Black is winning because White loses the b-pawn by force. 41.♖e1 ♜g1+ 42.♖e2 ♜g2+--+) 32...♜xe6 33.♜xc6 ♖xc6 34.♘d4+ ♖b7 35.♘xe6 ♜e8=+; 30...a6? 31.♜dc1 ♘d7 32.e6 fxe6 33.fxe6 ♜e8 34.♘d4±]

31.♜c4 Not allowing a4 and protecting the g4 pawn.

31...g6 One of the main ideas.

32.♜dc1 ♘d7 33.e6 fxe6 34.fxe6 ♜e8 35.♘e4 A good and active defence by Vishy! White sacrifices another pawn, but now he has the unpleasant idea Nd6.

35...♜xg4+ [35...♜d8 36.♘f6†]

36. ♔f2

36...♖f4+?! An inaccuracy. Black could have played a better move, but it was really hard to see even for Magnus. [36...♖d8! Preventing Nd6, but this move is based on huge calculation. 37. ♔e3 (37. ♘c5+ 37...bxc5 38. ♖xg4 ♘e5—+) 37...♖d5! 38. ♘bc3 ♖e5 39. ♔f3

And now comes the fantastic 39...♖gxe4! 40. ♖xe4 ♖xe6 41. ♖xe6 ♘d4+ 42. ♔e3 ♘xe6 I think Black is just winning here.]

37. ♔e3 ♖f8 38. ♘d4 ♘xd4 39. ♖xc7+ ♔a6 40. ♔xd4 With such active pieces White will have no problems to make a draw.

40...♖d8+ 41. ♔c3 White wants to keep the king close to the b3 pawn. [41. ♔e3 41...♖d5]

41...♖f3+ 42. ♔b2 ♖e3 43. ♖c8 ♖dd3 Magnus tries to keep some complications, but the position is drawish. [43...♖d4 44. ♘c5+ bxc5 45. ♖xe8 ♖dd3 46. e7 ♖xb3+ 47. ♔a2 ♖bd3 48. ♖a8+ ♔b7 49. e8=♖ ♖d2+ 50. ♔a1 ♖a3+ With perpetual check.]

44. ♖a8+ [44. ♖1c4!?

44...♔b7 45. ♖xe8 ♖xe4 46. e7 ♖g3 47. ♖c3 Black is not able to avoid the rook endgame with 2 against 1 on one side, which is completely drawn.

47...♖e2+ 48. ♖c2 ♖ee3 49. ♔a2 g5 50. ♖d2 ♖e5 51. ♖d7+ ♔c6 52. ♖ed8 ♖ge3 53. ♖d6+ ♔b7 [53...♔c5 54. e8=♖ ♖xe8 55. ♖d5+ ♔b4 56. ♖d4+ And Black cannot come to c3. 56...♔b5 (56...♔c3 57. ♖c4#) 57. ♖4d5+ ♔a6 58. ♖xe8 ♖xe8 59. ♖xg5=]

54. ♖8d7+ ♔a6 55. ♖d5 ♖e2+ 56. ♔a3 ♖e6 A last easy trap...

57.♖d8 but of course Vishy doesn't fall for it. [57.♖xg5? 57...b5-+]

57...g4 58.♖g5 ♜xe7 59.♖a8+ ♚b7 60.♖ag8 a4 61.♖xg4 axb3 62.♖g7 ♚a6 63.♖xe7 ♜xe7 64.♚xb3 And with a b-pawn White doesn't even need to know the Philidor idea! :-)
1/2-1/2

(2) Carlsen, Magnus(2870) - Anand, Viswanathan(2775) [A07]

WCh 2013(3), 2013.11.12

[Balogh Csaba]

After the first two "warm-up games" we started to see real fights in the World Championship.

1.♘f3 d5 [It is very interesting to go through the following game. Carlsen managed to squeeze home an even position against Karjakin earlier this year. He employed the same ideas in the same pawn structure as in our game. 1...♘f6 2.g3 d5 3.♕g2 c6 4.O-O ♕g4 5.c4 e6 6.d3 ♘bd7 7.cxd5 exd5 8.♖c2 ♕e7 9.♘c3 ♕xf3 10.♕xf3 d4 11.♘e4 O-O 12.♘xf6+ ♘xf6 13.♕d2 a5 14.a3 ♘d5 This position is considered to be even. A slow fight has started... 15.♖ab1 ♖d7 16.♖fc1 ♖fe8 17.♖c4 ♘c7 18.h4 a4 19.♕b4 ♘b5 20.♚g2 h6 21.♕c5 g6 22.♖b4 ♕f6 23.♖d2 ♚g7 24.♖c4 ♖a6 25.♖d1 b6 26.♕b4 c5 27.♕d2 ♘c7 28.♖cc1 ♘d5

29.♖h1 Just like against Anand, Carlsen tries to use his queen on the long diagonal. 29...♕e7 30.♚g1 ♖d8 31.♖c2 ♖e6 32.♖g2 ♖a7 33.♖e1 ♖ad7 34.♚h2 ♖c8 35.♖h3 ♖xh3+ 36.♚xh3 h5 The position was even, but Carlsen managed to outplay his opponent in a long struggle. 37.♖b1 ♖a8 38.♚g2 ♖a6 39.b3 axb3 40.♖xb3 ♕f6 41.♖c4 ♖d6 42.♚f1 ♚f8 43.a4 ♘c3 44.♕f4 ♖e6 45.e3 ♘xa4 46.♕d5 ♖e7 47.♕d6

b5 48.♙xe7+ ♗xe7 49.♖xb5 ♘b6 50.e4 ♘xc4 51.♖b8+ ♔g7 52.♙xc4 ♖a7 53.f4 ♙d6 54.♗e8 ♖b7 55.♖a8 ♙e7 56.♙g2 ♖b1 57.e5 ♖e1 58.♙f2 ♖b1 59.♖e8 ♙f8 60.♖c8 ♙e7 61.♖a8 ♖b2+ 62.♙f3 ♖b1 63.♙d5 ♖e1 64.♙f2 ♖d1 65.♖e8 ♙f8 66.♙c4 ♖b1 67.g4 hxg4 68.h5 ♖h1 69.hxg6 fxg6 70.♖e6 ♙h6 71.♙d5 ♖h2+ 72.♙g3 ♖h3+ 73.♙xg4 ♖xd3 74.f5 ♖e3 75.♖xg6+ ♙h7 76.♙g8+ ♙h8 77.♙f4 ♖c3 78.f6 d3 79.♙e3 c4 80.♙e6 ♙h7 81.♙f5 ♖c2 82.♖g2+ ♙h6 83.♖xc2 dxc2 84.♙xc2 ♙g5 85.♙d4 ♙a3 86.♙xc4 ♙b2 87.♙d5 ♙f4 88.f7 ♙a3 89.e6 ♙g5 90.♙c6 ♙f6 91.♙d7 ♙g7 92.e7 1-0 Carlsen,M (2861)-Karjakin,S (2780) Wijk aan Zee 2013]

2.g3 So, Carlsen repeats the Reti Opening, with the main concept to avoid the very long theoretical battles, just to obtain a normal playable position, where he could slowly outplay his opponent.

2...g6 Anand also repeats his successful setup of the first game.

3.c4 And here is the deviation. [3.♙g2 3...♙g7 4.d4 happened in the first round.]

3...dxc4 Anand took without hesitation, showing that he is well-prepared even against such rare sidelines.

4.♖a4+

4...♘c6! A strong reaction. Black is getting ready to occupy

the center with e5 after White takes on c4. At the moment White can focus on his development since Black cannot defend the c4 pawn.

5.♙g2 [White cannot make use of the pin with 5.♘e5? because of 5...♖d5!]

5...♙g7 6.♘c3 e5! Black already wants to play Be6, which was not good before because of Ng5, so Carlsen restores the material balance.

7.♖xc4 ♘ge7 8.O-O O-O

9.d3 The opening part is over. Both players were probably happy, because Anand has equalized, but Carlsen also got a playable position with all the pieces on board.

9...h6 A useful move, which fits to the position to prevent the Bg5 ideas. [It was probably better to start with 9...♘d4! because after 10.♘xd4 (10.♙g5 could be met by 10...♘xf3+ 11.♙xf3 c6 and h6 next, unpinning the knight.) 10...exd4 11.♘e4 Black is in time to get his bishop to d5, like he did in the game. 11...♙e6=]

10.♙d2 White finishes the development by connecting the rooks.

10...♘d4 Black wants to improve his pawn structure by active piece play.

11. ♖xd4 exd4 12. ♗e4 c6 [The drawback of the 9...h6 move becomes clear after 12...♗e6? as White has 13. ♔c1!± attacking the h6 pawn with tempo and creating another serious threat of Nc5, winning the b7 pawn.]

13. ♗b4? This very natural move spoils the initiative. The bishop is of course excellently placed on b4, but White should have executed this plan in a better version. [13. ♔c1! was strong, leaving from the Be6-d5 plan with a tempo and only after 13...♔h7 14. ♗b4 (Or 14. a4 With the idea of playing a5.)]

13... ♗e6! Black is able to oppose the g2 bishop by putting his own bishop to d5.

14. ♔c1 ♗d5 Suddenly Black is fine, maybe already a bit better.

15. a4 b6 Black would like to play c5, obtaining an excellent pawn chain and closing the dark squared bishop. [It would have been even stronger to start with 15...a5! 16. ♗a3 (16. ♗xe7 16...♔xe7) 16...b6 and this way Black could have prevented White's counterplay along the a-file.]

16. ♗xe7! To allow Black to lock the bishop out of the game with c5 would have been even worse for White.

16... ♔xe7

17. a5! At least White succeeded in creating counterplay on the a-file. Black can never play b5 because of the c5 square, while White is going to take on b6 on the most favorable moment.

17... ♖ab8 [Black cannot go for the e2 pawn with 17...f5 18. ♗d2 ♗xg2 19. ♔xg2 ♔xe2? as White recaptures a more important pawn after 20. axb6 axb6 21. ♖xa8 ♖xa8 22. ♔xc6± using the fact that the rook on a8 is hanging. The bishop on g7 is really poor now.]

18. ♖e1! White is not intending to open the e-file, he just needed to cover the e2 pawn against the threatening f5.

18... ♖fc8 Black could also have put this rook to e8. Probably Anand had in mind to advance his queenside pawns with c5-b5 and c4, which is of course a very logical plan.

19. axb6 axb6 20. ♔f4 Carlsen tries to invade the opponent's camp on the d6 square, but Anand easily parries this idea.

20... ♖d8 21. h4! White plays the last useful pawn move to reduce the mobility of the black pawns on the kingside. From now on the position becomes very static, and a piece play is awaiting us. The chances are about even at the moment.

21...♔h7 Protecting the h6 pawn in order to play Be5.

22.♘d2 White plays the right idea, to trade the light squared bishops. Later on, if the game develops in a positional manner, the knight might become a much stronger minor piece than the g7 bishop. If the pawn was on d5 instead of d4, we could have a completely different picture, but now the bishop is locked. Anand finds a clever way to preserve his bishop pair.

22...♙e5 23.♖g4 h5! [At first I thought Anand could have forced things by playing 23...♙e6 24.♖f3 ♘d5? but actually White gets an advantage after 25.e4! dxe3 26.♖xe3]

24.♖h3 ♙e6 25.♖h1 A very similar position compared to the game Carlsen-Karjakin. The queen looks ugly in the corner, but it might put pressure on the h1-a8 diagonal as well as support the trade of the bishops. The game is still balanced.

25...c5 Black tries to mobilize the queenside with b5-c4, which could be even more effective now, while the queen is away on h1.

26.♘e4 ♕g7 [To take control over the g5 square with 26...f6?! would have seriously weakened the 7th rank. White could fight for an advantage with doubling his rooks as Black cannot oppose it with Ra8. 27.♖a6]

27.♘g5 b5

28.e3?! Carlsen becomes too optimistic about his position and creates problems mainly to himself. [28.♘xe6+ 28...♖xe6 29.♙h3 would have led to a balanced game although after 29...♖f6 Black pushes c4 and he is the only one who could be better. (29...♖b3 30.♖c6) 30.♖f3 But White should hold thanks to the opposite colored bishops.; 28.♖a6 would have been met by 28...♙c8 and c4 next. Black has the initiative!]

28...dxe3 29.♖xe3 ♙d4 A practical decision by Anand.

[The machine has no fear of the position: 29...♙xb2! 30.♖ae1 ♖b6 31.♙d5! This is the critical position, which indeed looks a bit scary. It is not surprising that Anand refused to go for this line. However the materialistic computer is as always not afraid. (31.♘xe6+ 31...fxe6 followed by Bd4 and pushing the b-pawn is winning for Black. White cannot create counterplay against the damaged black king.)

30.♖e2

31. ♖xe6+ fxе6 32. ♗e4! cxd3 33. ♖d2! White prepares to win the d3 pawn back. Black has no chance to protect it, the

33... ♖b4 [33... ♖f8! was the best chance. 34. ♕xd3 (34. ♖h2 34... ♖b4 35. ♖ad1 ♕xf2 36. ♖xd3 ♖f7+ also looks clearly better for Black.) 34... ♖xf2! 35. ♖xf2 ♖d6 Black threatens to play Bxf2 and the d3 bishop is hanging and also Qxg3 when after Qg2 Bxf2 he ends up with two extra pawns. 36. ♖g2! ♖f8 (Not 36... ♕xf2+?? 37. ♖xf2 ♖xd3 38. ♖a7+ Black gets mated) 37. ♖f1 ♕xf2+ 38. ♖xf2 ♖xf2 39. ♖xf2 ♖xd3 40. ♖g2 It is hard to evaluate if White's drawing chances or Black's winning ones are better. Black will advance his extra pawn, but he will always need to count with perpetual check.]

34.♖ad1

35...♗f6 36.♖xd3 ♜xd3 37.♖xd3 [37.♗xd3 with the idea of

Rb1 was simpler to achieve a draw.]

37...♖d8 This is practically a draw offer. [37...♙d4! could still have caused some headaches, although White has two different ways to fight for the draw. 38.♙xg6!? is the most direct! (38.♚e2 38...♗f8 39.♗f3 White should have no problems with the draw, probably Carlsen would have chosen this line, as it is more practical. Black will have no chance to win with the opposite colored bishops. The b-pawn will be excellently blocked and White can create counterplay against the g6 pawn.) 38...♚e1+ 39.♙g2 ♖f8

It looks over, but... 40.♚xf8+! ♙xf8 41.♗xd4 b4 42.♗f4+ ♙g7 43.♙c2= followed by Rf3 and Bb3. White creates a perfect blockade and Black has no chance to win.]

38.♖xd8 ♙xd8 39.♙d3 White wins back the b5 pawn and the game is drawn.

39...♚d4 40.♙xb5 ♗f6 Anand offered a draw here. Carlsen decided to play on until all pieces disappear from the board.

41.♗b7+ ♙e7 42.♙g2 g5 Getting rid of the remaining pawns... The game is dead drawn.

43.hxg5 ♗xg5 44.♙c4 h4 45.♗c7 hxg3 46.♗xg3 e5 47.♙f3 ♗xg3+ 48.fxg3 ♙c5 49.♙e4 ♙d4 50.♙f5 ♙f2 51.♙xe5 ♙xg3+ A nice fighting game! 1/2-1/2

(3) Naiditsch, Arkadij(2727) - Socko, Bartosz(2661) [C19]

19th European Teams(2.7), 2013.11.09

[Arkadij Naiditsch]

We are in the second round. The pairing system of the tournament is quite random, so it is impossible to predict who is playing who and why!? We got the team Poland I (Poland has 3 teams participating).

1.e4 e6 After my opponent played 1...e6 (Socko plays a lot of different openings) I was very much hoping to get the variation that we will see in the game.

2.d4 d5 3.♘c3 ♙b4 4.e5 c5 5.a3 ♙xc3+ 6.bxc3 ♘e7 7.♗g4 So we are in the very main position of the French Defence. Black has 2 major choices here, to play 7... 0-0 or 7...Qc7. Both of them lead to very unclear play.

7...♙f8?! After this move I said to myself "yes". Socko had already been playing it a couple of times before so I was able to prepare a very unpleasant answer. In general, I can't believe that a move like 7...Kf8 can be a good one. It just looks too ugly!

8.a4! A very strong and logical move. The white bishop wants to go to a3.

8...♔c7 Black is going for the pawn and this is probably the best thing to do. If White was in time to play Nf3-Bd3-O-O and Ba3, Black's position would just fall apart.

9.♔d1 A logical move. Black wanted to play cxd4.

9...cxd4 10.cxd4 ♕c3+ 11.♙d2 ♕xd4 Black is a pawn up, but a better development and the very bad position of the black king on f8 make White's position quite enjoyable.

12.♘f3 ♕e4+ 13.♙e2 ♘bc6 Trying to take another pawn on e5.

14.♙c3 There is of course no reason to give it immediately.

14...♘g6 15.O-O I completed my development.

15...♘f4 A logical decision of my opponent, who tries to exchange my white squared bishop. [15...♘gxe5 would lead to a very dangerous position for Black: 16.♘xe5 ♘xe5 17.♖e1 White clearly has enough compensation for the two pawns thanks to the bishop pair and his open position.]

16.♙d3! I cannot avoid the exchange, but I can improve my pawn structure with it.

16...♘xd3 17.cxd3 ♕f5 Black's position is looking pretty dangerous, but it is clear that White needs to act quickly. If Black was in time to play h6-Kg8-Kh7 I would just be a pawn down.

18.a5 A rather logical move. My idea was to play Ra4 next, followed by maybe Qd2 and Rf4, bringing my rook into the attack.

18...a6? This move just cannot be good. Black is already in trouble and such a loss of a tempo is a serious mistake. [Black should hurry to secure his king's position on h7: 18...h6 19.♖a4 ♕g8 20.♕d2 I think White should have more than enough compensation for the pawn, but the position would remain

unclear.]

19.♕b1! A strong move. White's main idea is to stop Black from playing Bd7. Things are pretty forced now.

19...h6 Black has no choice...

20.♘d4 I am removing the only black defender from the c-file.

20...♘xd4 [Black is not in time for 20...♕xe5 21.♕b2! The most simple. 21...♘xd4 22.♙xd4 ♕g5 23.f4 ♕g6 24.♖f3 White brings all his pieces into the attack and during the game I was sure it had to end with a mate. 24...f6 25.♖g3 ♕f7 26.♖c1 Black's position is just lost.]

21.♙xd4 ♕g8 22.♖c1 At this moment I was thinking for quite a while. 22.Qb6 was also looking very tempting. [22.♕b6 If White was in time for Qc7 Black's position would just be lost, but it seems like I am not. 22...♕xd3 Black wants to play Bd7 next. 23.♖ab1 ♕h7 (23...♙d7 didn't work immediately: 24.♖fd1 followed by Qxb7 and White is winning.) 24.♖fd1 ♕c4 Once again I just don't have enough time for Qc7. 25.♖dc1 ♕a4 26.♖b4 ♕e8 I was calculating until here and could not see a way to stop Black from playing Bd7 next. The position is still unclear, but the move in the game seems to be much more convincing.]

22...♕h7 23.♖c7 ♖d8 So far everything was forced, but the question if Black is in time for Bd7 remains.

24. ♖c5! Probably the only move to keep me on the winning road. [It is a pity, but the most logical 24. ♖e7 doesn't work. 24... ♗d7 25. ♗b6 It seems like White won an exchange, but no... 25... ♗c6 26. ♗xd8 Now comes the fantastic

26...d4!! and White cannot play 27. Bb6 because of Qg5!, with a double attack on g2 and e7. The position is very unclear. I was very happy I found this defence for Black but I am very curious to know whether my opponent saw it as well.]

24...d4 What else to do?! [24... ♖xe5 25. ♖xf7 And White is close to be winning.; 24... ♗d7 25. ♗e7 White is an exchange up.]

25. ♗e7 I continue my plan of not giving Black any chance to play Bd7.

25... ♖d5 26. ♗d6 The black bishop got stuck on c8 and with it the rook on a8 too.

26...f6 Somehow I had a feeling that my opponent was not too upset with his position, but I was very happy with mine! :)

27. ♖e7 The most simple.

27...fxe5

28. ♖b6 The white queen is going to c7, then I play Re1 and Be5. The game is over.

28... ♖f8 This is losing, but nothing helps anymore.

29. ♖c7 b5 This move surprised me a little bit, as now I have a huge amount of winning moves.

30. ♖f7 [Of course 30. axb6 30... ♗b7 31. ♖f7 would end the game as well.]

30... ♖xf7 [30... ♖g8 31. ♖f8 And White has trapped the black queen.]

31. ♖xf7 ♖xd6 32. ♖c1 The most simple. Black still cannot develop the c8 bishop!

32... ♖d8 [32... ♗d7 33. ♖c7 ♖d8 34. ♖e7 And White is winning.]

33.♖c7 ♜g8

34.g4! A very easy move, but still quite beautiful. Black is totally paralyzed.

34...e4 35.g5 e5 36.♞h5 There is still no time to develop the bishop from c8.

36...♞h8 37.gxh6 gxh6+ 38.♞f1 The funny thing is that the bishop is still standing on its starting position on c8! :) It was a great pleasure to win such a game, but sadly the team played only 2-2. **1-0**

(4) Salgado Lopez, Ivan(2610)
- Balogh, Csaba(2630) [A15]

Warsaw POL(3.6), 2013.11.10

[Balogh Csaba]

I managed to win a nice game in the European Team Championship.

1.c4 My opponent almost always plays 1.e4, so this came as a surprise to me. I knew that he has very good preparation in general, so I decided to play something different than what I usually do.

1...♞f6 I usually play 1...e5 here.

2.♞f3 c6 3.♞c3 d5 4.e3 a6 This is the first time that I employ the Slav with a6. I was hoping to get my opponent to a slightly unexplored territory.

5.d4 b5 6.c5 [6.b3 is the other big main line.]

6...g6

7.♞e5 We are following the latest fashion. White wants to avoid the developing of the b8 knight by attacking the pawn on c6 and later on he also intends to fortify his knight with f4.

7...♞g7 8.♞e2 [I remembered a recent top game, which continued with 8.f4 8...a5! Black plays this against White's queenside approaches with b4 followed by a4! 9.♞e2 h5!

Black is getting ready to play on the light squares, so he works out the points. 10.O-O ♘f5 11.♘f3 ♚c7 To be able to play Nbd7. Very consequent play by Black. 12.♞d3 ♞bd7 13.♞f2 e6 14.♘d2 ♚e7= Black obtained a very comfortable position. Later on the game got even more closed and it finished in a draw. Gelfand-Ivanchuk, Paris 2013.]

8...O-O 9.O-O White did not play f4, so Black has an alternative to create counterplay in the center, which is the main idea in many lines in the a6 Slav.

9...♞fd7! If White takes on d7, Black will easily achieve e5, while if the knight retreats to d3, e5 is coming immediately with perfect perspectives for Black.

10.f4 ♞xe5 11.fxe5 f6 A principled move to undermine the center! White needs to react actively, otherwise Black quickly overtakes the initiative. [11...♘f5!? is an alternative to avoid the complications, followed by f6 later on.]

12.e4? White finds the right idea to explode the Black center, but executes it in the wrong move order. Now the advantage passes to Black. [He should have played 12.exf6 12...exf6 Black intends to play f5, blocking the e3 pawn, followed by Nd7-f7, Ra7-e7 with a very strong pressure against the backward weakness. 13.e4! b4 This is the critical move. Black wants to win the e4 pawn. 14.♞xd5! cxd5 15.exd5

♔e8 Black threatens to play Nf3 and if the queen retreats then Be6 and Rd8 are coming. Black has a clear edge.]

16...♘xe5 17.♙b3+ ♔h8 I must admit that I did not get the point of 16.Bd1. I thought that due to the threat of Nf3, the queen must retreat to d2 or d1, but both could be met by Bg4 and Rd8 next and Black is just close to be winning. My opponent had a very deep idea in mind.

18.♙e3!! ♘g4! Black takes the dark squared bishop and suddenly the one on g7 becomes the real "master" of the position. [The point is that 18...♘f3+? does not work because of 19.gxf3 ♙xd4 20.♙xd4+ and I am forced to give up my queen and end up being a piece down.; The same idea as in the game could not be done by 18...♘c4? because of 19.♙xc4! and again the queen is not hanging!]

19.♔d3 ♘xe3 20.♔xe3

20...♔f6! A nice plan of centralizing the queen. Otherwise the rook comes to f1 and the queen does not find its place on the board. On e5, it is going to control everything.

21.♖f1 ♔e5 White has no useful move. His heavy pieces are standing on their best positions, while the minor ones are completely paralyzed. The knight should be improved somehow, but then the b2 pawn simply falls. [The endgame after 21...♔d4?? would be excellent, but it is tactically refuted by 22.♖f8+!+-]

22.h3 The next step for Black was to develop the queenside pieces. I could have done it by playing Be6, but I thought the bishop pair could be extremely strong later on. So I was looking for another way to get my rook out from the corner.

22...a5! Black threatens to win with a4 followed by a3 when the bishop leaves and then the c3 knight loses its stability. [22...♙d7 is not as good. 23.♖d1 The bishop is passive on e8, while I also did not want to pin my own rook on d8...]

23.♖d1 [23.a3 23...♙a6 24.♖d1 transposes to the game.]

23...♙a6! The bishop just temporarily goes to a6, the main target was to get the rook into the game via f8.

24.a3 ♖f8 It is hard to dream about a better position than this one. All pieces are excellently placed, while White has no active moves. All the pieces are forced to defend something.

The question is to find out how Black should improve his position now...

25. ♖h1 h5! A good plan! I wanted to get my king to h7, when I often threatens to play Bh6, sending away the queen from the protection of the c5 pawn.

26. ♘c2 ♖h7 27. ♙b1 White simply had no move, so my opponent decided just to wait.

27... ♙c8 I already had the forthcoming actions in mind and decided to change the diagonal. [27...b4!? 28.axb4 axb4 29. ♖a4 ♙b5 was also winning. 30. ♖b6 (30.b3 30... ♙h6 31. ♙g1 This is the only square... 31... ♙g3—+) 30... ♙xb2—+]

28. ♙a2 ♙h6! 29. ♙g1 Otherwise Black takes on c5 and he continues enjoying all the advantages he had before, plus an extra pawn. However all the pieces are standing so well that the position screams for a final blow.

29...b4! Sending the knight to the edge of the board, otherwise the b2 pawn falls.

30.axb4 axb4 31. ♖a4

31... ♙xh3 [31... ♙xe4 32. ♖e1 ♙h4—+ was also winning.]

32. ♙h2 This is a kind of resignation. [32.gxh3 was the last chance, although Black can choose between two wins now: 32... ♙xe4+ is objectively even stronger. (32... ♖f3 seems to be

game over, but White has a very nice defence, which I had actually seen in the game:

33. ♙g8+!! (33. ♙g2 33... ♖g3—+ 33... ♙g7 (33... ♙xg8? 34. ♙xg6+ 34. ♙d4! White manages to trade queens and avoids getting mated, but still he ends up in a lost endgame. 34... ♖xh3+ 35. ♙g2 ♖g3+ 36. ♙f1 (36. ♙h2 36... ♙f4 37. ♙xe5+ ♙xe5—+ Black wins the piece back.) 36... ♙xd4 37. ♖xd4 ♙xg8—+ White is helpless against the h- and g-pawns.) 33. ♙g2 ♖f3 34. ♙e6! The only move to defend against Rxh3, but it does not save White. Black has several ways to continue the attack. 34...g5! (A more human win is 34... ♙e3—+ followed by Qf4 and Rf2. White can only watch this, he cannot create any counterplay with such poor pieces like the knight on a4.)]

32... ♙xh2+ [32... ♙xg2+! 33. ♙xg2 ♖f4!—+ was even stronger, but I decided to not risk a sacrifice when the position is winning automatically even without it...]

33. ♙xh2 ♙g4 Black has an extra pawn and the bishop pair continues dominating.

34. ♖d3 [34. ♖d4 34... ♖f1—+ White is in mate net.]

34... ♖f1 Black wants to play h4 followed by Bf4. The game is over.

35.g3 ♙f3 0-1

Endgame section

(15) Carlsen, M.(2870)-Anand, V.(2775)

WCh 2013(5), 2013.11.15

[CE Team]

We are in the 5th game of the WCC match. After the opening Magnus managed to get some advantage, but Anand defended very well. And as we can see now Black still has some work to do to achieve the draw.

43...♖d1 44.e5+ The only move. The white bishop from b1 must get activated.

44...♔d5 45.♘h7 ♜c1+? Maybe the first and the last big mistake of the whole game! This inaccuracy leads to huge trouble.

[Anand had to make an exact calculation: 45...♜a1! An ugly looking move, but probably Black is holding after it. 46.♘g8+ White still does not have anything better than to go for the rook endgame. 46...♔c6 47.♘xb3 ♜xa3 48.♔c4 I guess so far it was easy, but now Black needs to make another very strong move:

48...axb3! The only move which holds a draw. 49.♖h6+ ♔d7 50.♗xc5 b2 51.♞b6 Once again Black needs to be exact: 51...♞c3+! Fixing the result on the spot. During a practical game this is not easy to see at all. 52.♔d5 ♞d3+ 53.♕e4 ♞d2 With a handshake.]

46.♕b2 ♞g1 Anand is going for the g-pawn.

47.♘g8+ ♔c6 48.♞h6+! Great play by Magnus. The black king has to be cut to start with.

48...♔d7 [48...♕b5 didn't work: 49.♘xb3 axb3 50.♗xb3 And White wants to mate by playing a4. Black's position is lost.]

49.♘xb3 axb3 50.♗xb3 ♞xg2 51.♞xh4 White is temporarily 2 pawns up, but the pawn e5 is going to fall. It is still hard to say if this is winning or draw, but Magnus is showing us with his usual perfect technique how it is done. ..

51...♕e6 52.a4 White needs to push his pawns of course.

52...♕xe5 53.a5 ♔d6 If Black could play Kc7 now and hold the pawn with his king, the position would be a draw.

54.♞h7! Another strong move, not allowing the black king to come closer, but the best player in the world doesn't miss such chances.

54...♔d5 55.a6 c4+ Black is too late with his counterplay.

56.♕c3 Now we can see that the pawn on h2 is very useful, as there is no check on g3.

56...♞a2 57.a7

57...♕c5 58.h4 And White won. The idea is simple: bring the pawn to h6 and play Rg7-h7 and queen. The first decisive game of the match, and Magnus proved once again that he is not in India to joke around and that he is taking any chance he gets! 1-0

(16) Radjabov, T.(2715)-Swiercz, D.(2627)

European Teams, 2013.11.10

[CE TEAM]

The following endgame is a theoretical draw, but Black must know the right defensive method. One could believe that for grandmasters over 2600 it should not be a problem to hold it, but as we will see, this it is not true.

56.♖a7+ ♔g8 57.♕h5! The only chance for White. If he passively protects the pawn with Kf4, he will be unable to make progress.

57...♖xe4 58.♕g6 ♖g4+ 59.♕xf6 We have reached the famous drawish position. The right plan is to keep the king on the h- and g-file (on the short side), while giving checks from the a- and b-file (long side) with the rook.

59...♖b4! 60.♖a8+ ♔h7 61.♖e8! White tries to cover his king from the side checks. Now Black should just wait until White gets his pawn to the 6th rank.

61...♖b1 62.♕f7 ♖a1 It is better to keep the rook as far as possible from the king. Black is ready to check from the a-file and also from the first rank now.

63.f6 The following plan is very important!

63...♖a7+! [Further waiting with 63...♖a2? loses to 64.♕f8! White pushes f7 next and we get the game's position...]

64.♖e7 ♖a8! This is considered to be the most precise way to avoid the king's move to the 8th rank, but other rook moves are also drawn.

65.♖e6! The most tricky try by White.

[65.♕e6+ 65...♕g6 brings nothing for White.; On 65.♖e1 White must reply with 65...♖a7+! 66.♕f8 (66.♕e6 66...♖a6+=) 66...♕g6!]=]

72.♖e6 ♜a8 73.♞e8 ♜a6+ 74.♚e5 Black soon runs out of checks and the pawn promotes. We can see this theoretical endgame quite often, so it is useful to remember the ideas.
1-0

65...♜a7+? This is the losing move! Black had only two moves to save the game. The key is to keep the rook on the 8th rank! [This could be either done by 65...♜b8 66.♚e7 (66.♞e1 66...♜b7+=) 66...♚g6 67.f7+ ♚g7=; Or by 65...♚h6! White cannot win: 66.♚e7 (66.♞e1 66...♜a7+ 67.♚e8 ♜a8+ 68.♚d7 ♜a7+=) 66...♚g6 67.f7+ ♚g7=; Let's illustrate why the rook should be as far as possible: 65...♜c8? loses to 66.♞e8 ♜c7+ 67.♚e6 ♜c6+ 68.♚e7 ♜c7+ 69.♚d6 Black runs out of checks. 69...♜f7 (69...♜a7 70.♞e7++-) 70.♚e6+-]

66.♚f8! +- The game is over now! The point of putting the rook to e6 is to have f7 check after Kg6!

66...♜a8+ [66...♚g6 67.f7+ ♚h7+- transposes to the game.]

67.♞e8! ♜a6 [67...♜a7 68.♞e7++-; 67...♜a1 also loses. 68.f7 ♜b1 69.♚e7 ♜e1+ 70.♚d6+- White comes down to the rook and then promotes his pawn.]

68.f7 ♜a7 [68...♚g6 69.♚g8+-]

69.♞e1 White wants to check on h1 and on Kg6 Kg8 wins. The rest is very easy. [69.♞d8+- followed by Ke8 is also winning.]

69...♜a8+ [69...♜b7 70.♞h1+ ♚g6 71.♚g8 is the point of 69.Re1. 71...♜xf7 72.♞g1+ ♚f6 73.♞f1+-]

70.♚e7 ♜a7+ 71.♚f6 ♜a6+ [71...♜a8 72.♞e8 ♜a6+ 73.♚e5 ♜a5+ 74.♚d4+-]

Clash of the Titans

(17) Botvinnik, Mikhail-Keres, Paul[D36]

URS-ch20, 1952

[Miton Kamil]

1.d4 ♖f6 **2.c4** e6 **3.♗c3** d5 **4.cxd5** exd5 **5.♘g5** ♕e7 **6.e3** O-O
7.♘d3 ♖bd7 **8.♚c2** ♜e8 **9.♗ge2** Of course the other plan is to play 9.Nf3, 0-0 and White can continue with Rb1-b4 or Ne5-f4.

9...♗f8 **10.O-O** c6

11.♜ab1!? This move is logical but also tricky. White is preparing the typical plan b4 to create weaknesses on the queenside. If Black plays 11...a5 then White can come back to the plan f3-e4 (which is called after Botvinnik) because in many cases when Black will play the typical c5 then the b5 square will be very weak. [11.f3 This move was possible immediately. 11...♘e6 12.♜ad1 (12.e4 12...dxe4 13.fxe4 ♗g4 14.♘xe7 ♜xe7 15.♚d2 ♜d7 Black is in time with counterplay. 16.h3 ♜xd4 17.♗xd4 ♚xd4+ 18.♖h1 ♗e5 19.♜ad1 ♜d8 20.♚c1 ♗xd3 21.♜xd3 ♚xd3 22.♜d1 ♚xd1+ 23.♗xd1 ♘xa2=+) 12...♜c8 13.e4 (13.h3 White can also not hurry and for example play Bh4-Bf2-Kh1 but then Black will play over c5. 13...c5↗ 13...dxe4 14.fxe4

14...c5 A typical counterplay idea against the Botvinnik plan. (14...♗g4 15.♘xe7 ♜xe7 16.♚d2± Followed by h3.) 15.♘xf6 (15.♘b5 15...♗g4 With complex play.; 15.d5 15...c4! 16.dxe6 ♗xe6 17.♘xc4 ♚b6+!) 15...♘xf6 16.e5 ♘g5 (16...cxd4 17.exf6 dxc3 18.♘h7++-) 17.d5 ♘d7 18.e6 And White takes the initiative: 18...fxe6 19.dxe6 ♗xe6 20.♘h7+ ♖h8 21.♖h1!XKh8]

11...♘d6?! I don't like this move at all. Black is playing for the simple trick Bh2 but it makes no sense because the bishop will have to go back to e7. Black is losing time for nothing. The normal plan was to develop the pieces and prepare the c5 plan.

12.♖h1 ♗g6 **13.f3** White is preparing the typical f3-e4 break in the center. [13.b4 13...h6 14.♘xf6 ♚xf6 15.b5 ♘d7 16.bxc6 bxc6 And Black should have a good initiative on the kingside.]

13...♙e7 Now we see the drawback of the 11...Bd6 move. [13...h6 14.♙xf6 ♖xf6 15.e4 ♖h4 16.g3 (16.e5 16...♘xe5 17.dxe5 ♖xe5 18.g3 ♖f6 It looks like Black doesn't have enough compensation for the piece.) 16...♖h5 17.e5 ♙e7 18.f4 White is clearly better.]

14.♖be1 [14.e4 14...dxe4 15.fxe4 ♘g4 16.♙xe7 ♖xe7 17.♖d2 c5 A typical idea. Black is going to destroy the white center or win the e5 square for the knights. 18.d5 But even here White can be better thanks to his strong d5 pawn.]

14...♘d7 [14...h6 15.♙xf6 (15.♙xh6 15...gxh6 16.♙xg6 fxg6 17.♖xg6+ ♖h8 18.♖xh6+ ♘h7∞) 15...♙xf6 16.♙xg6 fxg6 White cannot take the g6 pawn as the e3 is also hanging. 17.e4 dxe4 18.fxe4 ♙xd4 19.♖d1 c5 20.♘xd4 cxd4 21.♘d5 ♙e6 22.♖xd4+= We can say that White is a pawn up but Black's position is very solid.]

15.♙xe7 ♖xe7

16.♘g3 White is waiting with the e4 move, but now was the right moment... [16.e4 16...dxe4 17.fxe4 c5 18.♘d5±]

16...♘f6 17.♖f2 Protecting the d4 pawn.

17...♙e6 [17...b6 With the idea of playing c5 and not allowing the e4 push, but of course White plays 18.e4 dxe4 19.fxe4 ♘g4 20.♖g1 c5 21.♘d5 (21.d5+=) 21...cxd4 22.♘xe7+ ♘xe7 With compensation.]

18.♘f5 White missed a good opportunity to get big advantage: [18.e4 18...dxe4 (18...♘f4 19.♙b1±) 19.fxe4 ♖d7 20.e5 ♘g4 Xd4; 18.f4! A strong move, which is hard to see because it is not connected with the f3-e4 plan at all. Now White is unexpectedly getting a huge initiative because the black pieces don't have enough space. 18...♘f8 19.f5 ♙c8 20.e4

20...dxe4 21.♘xe4 The strong pawn on f5 limits the black pieces. White only needs to get rid of the knight from f6 to get a decisive attack. 21...♖d7 22.♘xf6+ ♖xf6 23.♖e5 Followed by Ne4-f5, when White is almost winning.]

18...♙xf5 [18...♖e8 Why not this simple move and White doesn't have e4 anymore because of Bxf5. 19.g4!? Maybe this was Botvinnik's idea?!]

19. ♖xf5 Black is not able to prevent e4 now.

19... ♖b6 [19... ♖e8 20.e4 ♖c7 21.e5 ♖e6 22. ♖b1 ♖b6 23. ♖d1 ♖f8 24.g3 f6 25.exf6 ♖xf6 26.f4 With very unpleasant pressure on the kingside.; 19... ♖f8 20. ♖b1 ♖e6 21. ♖d1 With e4 next.]

20.e4 dxe4 21.fxe4 ♖d8

22.e5 ♖d5 23. ♖e4± A typical move. The knight is going to d6 and Black is not able to push c5 in order to destroy White's center.

23... ♖f8 24. ♖d6 ♖c7 25. ♖e4 ♖e6 26. ♖h4 Forcing Black to create weaknesses around his king.

26...g6 27. ♖xd5 cxd5 28. ♖c1 ♖d7 29. ♖c3 Xf7.Xh7

29... ♖f8

30. ♖f5 ♖fe8 [30...gxf5 31. ♖g3+ ♖g7 32. ♖f6+-]

31. ♖h6+ White doesn't need to win the rook on e7, this is simpler...

31... ♖f8 32. ♖f6 ♖g7 33. ♖cf3 ♖c8 34. ♖xf7 ♖e6 35. ♖g5 ♖f5 36. ♖h6 ♖g7 37.g4 1-0

Editorial Preface

Magnus Carlsen is the new World Champion!!!

By showing amazing play in all types of positions, Magnus Carlsen proves that nothing and nobody can stop him at the moment. As he beat Anand with a 6.5-3.5 score, Carlsen ends the match 2 games before the official end. Congratulations to the strongest chess player on the planet!

The European Team Championship ended in Warsaw with a win of the Azerbaijan team, the 2nd place went to France, who played a really great tournament and were just not lucky in the last rounds, and the 3rd place to the rating favorites from Russia, who were very lucky in the 8th round of the event.

In the current issue of CEWN we are analyzing the most exciting games from the WCC and some moments from the European Team Championships.

Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Anand, Viswanathan(2775)**
- **Carlsen, Magnus(2870)** [C65]

WCh 2013(7), 2013.11.18

[Balogh Csaba]

We just have passed the half-time of the match. Carlsen was leading to 4-2. After two bitter losses in a row, people were asking themselves whether Anand would try to come back into the match with an "all in game" and risk a third loss or first try to recover with a rather calm game...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Carlsen repeats the Berlin, which he employed successfully in the 4th and 6th games of the match.

4.d3 The deviation from the 4th game, where we had seen the Berlin endgame arise after 4.0-0 Nxe4, but we are still following the 6th game.

4...♙c5

5.♙xc6 Here is the new attempt by Anand. The other main line and the previous game continued with 5.c3. White gives up the bishop pair, but he creates some damage in Black's pawn structure.

5...dxc6 6.♘bd2 The pawn on e5 cannot be taken because of the double attack with Qd4!

6...♙g4!? This is the novelty on the highest level. [The most recent games continued with 6...♙e6 followed by Nd7. Black scored decently with this move, but both teams probably had their reasons to go for or to avoid this line.]

7.h3 ♙h5 Black saves his bishop pair for a while.

8.♘f1 White employs the typical regrouping of the knight to g3, with the idea of unpinning his other knight. [The point is 8.g4 8...♙g6 9.♘xe5? still does not work because of 9...♙d4!]

8...♘d7 9.♘g3

9...♙xf3 An interesting decision, combined with the next move. Black makes use of the fact that he hasn't castled yet. [9...♙g6!? was playable as well. Black plays f6 next and transfers his bishop to f7. In general when Black succeeds to save his two bishops this way, Black is considered to be fine.]

10.♙xf3 g6! This is Carlsen's point! He paralyzes the g3 knight by taking away its f5 and h5 squares. If Black had castled, then an attack with Bh6 and h4-h5 would be very dangerous, but now Carlsen intends to castle queenside.

11.♙e3 ♙e7 Carlsen is waiting for the trade of the bishops, since then he could win a tempo for reaching the ideal e6

square for his knight, from where it controls two significant central squares on d4 and f4.

12.0-0-0 0-0-0 Both sides have finished their developments and the game is balanced. White has a nominal advantage thanks to his slightly better pawn structure, but this can hardly be used. A slow, positional maneuvering fight begins, where both players try to improve their pieces.

13.♘e2 The knight had no future on g3, while from e2 it might support a d4 or an f4 break later on.

13...♖he8 Black prepares against the opening of the center.

14.♔b1 The a2 pawn was unprotected. Sometimes ideas like Qe6 followed by f5 could have come with a tempo.

14...b6 Just like Anand on the previous move, Carlsen also takes full control over the kingside by placing his king to b7.

15.h4 Finally some action!

15...♔b7 [15...h5 was also perfectly fine, but Carlsen believed that White is unable to create any serious threats by opening the h-file.]

16.h5 ♗xe3

17.♙xe3 [On 17.fxe3 Black might focus his pieces on the kingside. 17...♖g8 18.♖df1 ♗df8 With the idea of f5. Black has

no problems. 19.hxg6 actually just helps Black, he gets a very nice position after 19...fxg6! 20.♙g3 ♘f6! followed by h5 and Ng4. Now the doubled e-pawns are bad, Black overtakes the initiative.]

17...♘c5 The knight is heading to e6, or sometimes even Na4 and Qb4 plans could be dangerous.

18.hxg6 [18.♙h6 makes no sense, because Qxh7 is not a threat due to Rh8 Qg7 Rdg8 trapping the queen.]

18...hxg6 19.g3 [On 19.♖h7 Black uses the same motif to equalize as in the game: 19...♖h8 20.♖dh1 ♗xh7 21.♖xh7 ♙f6 White is unable to increase the pressure on the f7 pawn. Black plays Rh8 next with full equality.]

19...a5 [19...♖h8= was also even.]

20.♖h7 [20.f4 would have led to a mass exchange in the center after 20...f5! 21.exf5 gxf5 22.fxe5 ♙xe5 23.♙xe5 ♖xe5 With equality!]

20...♖h8 21.♖dh1 ♗xh7 22.♖xh7 ♙f6! Black prepares to eliminate the active rook with Rh8.

23.f4

23...♖h8! [Here was a chance to go wrong with 23...exf4 24.♔xf4! ♕xf4 25.gxf4 and suddenly the endgame is better for White. His rook is very active and his pawn structure is also better. 25...♖d7 26.♔c1+= With the idea of Ng3, Kd2-e3 and f5 later on. White could have pressed for very long here, but of course Carlsen does not allow such chances.]

24.♖xh8 [24.fxe5?? is a blunder because of 24...♔f1+ and Rxh7.]

24...♔xh8 25.fxe5 ♕xe5 Black achieved full equality. The fork with d4 does not work because of Qxe4!

26.♕f3 f5! The further trade of pieces brings the draw even closer.

27.exf5 gxf5 28.c3 ♖e6 29.♔c2 ♖g5 30.♕f2 ♖e6 31.♕f3 ♖g5 32.♕f2 ♖e6 A correct draw and another game where Anand was unable to create any initiative against the Berlin wall! **1/2-1/2**

(2) Carlsen, Magnus(2870)

- Anand, Viswanathan(2775) [C67]

WCh 2013(8), 2013.11.19

[Balogh Csaba]

1.e4 Carlsen has already played 1.Nf3 and 1.c4 and now he switches to 1.e4 for the first time during the match.

1...e5 2.♖f3 ♖c6 3.♘b5 ♖f6 Yet another Berlin defence! This is already the 4th time in the match, but the first time that Anand plays it with Black. A clear sign that Anand has not started his final attempts to stay in the match.

4.O-O ♖xe4

5.♔e1 A very solid decision by Carlsen. This line is known to be a very safe choice, when White wants to create a fight with zero chance to lose, but if Black reacts well it is just a draw. With his 2 points advantage, Carlsen is happy with all draws, even with the White pieces, as he gets closer and closer to take the chess crown.

5...♖d6 6.♖xe5 ♘e7 7.♘f1 ♖xe5 8.♖xe5 O-O 9.d4 ♘f6 10.♔e1 ♔e8

11.c3 Carlsen shows his willingness to make a draw in this game. From now on all the ideas are more or less known and unless one side blunders something the outcome is already sure. [The only critical move is 11.♟f4 This pawn sacrifice was discovered recently and if Black is unprepared he might end up in some trouble. 11...♞xe1 12.♞xe1 ♞e8! (The greedy 12...♟xd4 is a mistake since after 13.c3 ♟f6 14.♟xd6 cxd6 15.♞e4!+= Black has difficulties with finishing the development. Na3-c4 is coming next.) 13.♞c3! The only critical move, otherwise Black equalizes with d5. Now that could be met by Nxd5 because the e8 knight is hanging. 13...♟xd4 14.♞d5 c6 15.♞e7+ ♟f8 16.♞xc8

16...♞f6! This important move was played for the first time by Leko and Black reaches equality in all the lines at the end. One example is 17.♞b4+ c5 18.♞d2 (18.♞xb7? 18...♞xf4) 18...♞xc8

19.♞e1 (19.c3 19...♟e5 20.♟xe5 ♞xe5 21.♞xd7 ♞c7=) 19...g5! 20.♟xg5 ♟xf2+! 21.♞xf2 ♞xg5 22.♟b5 ♞d6 23.♟xd7 ♞d8= and Black has no problem.]

11...♞xe1 12.♞xe1

12...♞e8! A known idea. Black wants to occupy the center with d5 in order to obtain a balanced symmetrical position.

13.♟f4 d5 14.♟d3 [14.♞d2 immediately could be met by 14...♟f5!]=]

14...g6! Black solves the coordination of his pieces with this move. A normal development with Be6 could have led to a slightly inferior and passive position after Nd2-f3-e5, but now he is going to play Ng7 followed by trading the bishops on f5!

15.♞d2 ♞g7 16.♞e2 White tries a small positional trick.

16...c6! Good prophylaxis! [The direct 16...♟f5 would have been premature because of 17.♟xf5 ♞xf5 18.♞b5!+= Black is facing problems with his queenside pawns.]

17.♞e1 This is the official novelty, but it can hardly be called an improvement. [The previous draws were agreed for instance after 17.♟e5 17...♟xe5 18.♞xe5 ♟f5 19.♟xf5 ♞xf5 20.♞e1 ♞d6 21.♞b3 ♞xe5 22.♞xe5 f6 23.♞e2 ♟f7 24.♞c5 ♞d6 25.f3 ♞e8 26.♞xe8 ♟xe8= Rozentalis-Bruzon, Montreal 2013]

17...♙f5 18.♙xf5 ♖xf5 19.♘f3 ♘g7 A multifunctional move. Anand prepares to neutralize the e-file and he ensures to come to e8 with the rook. The knight could also be placed on e6. Of course there was nothing wrong with 19...Qd7 for instance either.

20.♙e5 White trades the bishops in order to be able to invade on e7. However this could easily be parried...

20...♘e6 21.♙xf6 ♖xf6

22.♘e5 The last attempts by White. He wants to create some attack on the holes around the black king. He drives his knight to g4, from where it is only one step away from the dangerous checks on f6 and h6. Anand finds the easiest way to neutralize this idea.

22...♖e8! 23.♘g4 ♖d8! [Other moves like 23...♖g7 are leading to some difficulties after 24.♖f3!]

24.♖e5 Black is close to be mated. Nf6 and Nh6 are in the air, but suddenly a small tactical blow saves him, which was obviously foreseen by both players very long ago... [Now on 24.♖f3 24...♘g5! 25.♘f6+ ♖f8 26.♖xe8+ ♖xe8= Black is fine.]

24...♘g7! 25.♖xe8+! The only move and it leads to an exchange of all pieces. Both knight checks would have lost on the spot, because of White's unopened back rank. [25.♘f6+?? 25...♖xf6! 26.♖xf6 ♖xe1#; 25.♘h6+?? 25...♖f8]

25...♘xe8 26.♖xe8+! ♖xe8 27.♘f6+ ♖f8 28.♘xe8 ♖xe8 The draw is inevitable. The players decided to lock the board on both sides before the handshake...

29.f4 f5 30.♖f2 b5 31.b4 ♖f7 32.h3 h6 33.h4 h5 There are 4 games left and Anand needs to show something extraordinary if he wants to retain his title. **1/2-1/2**

(3) Anand, Viswanathan(2775)
- Carlsen, Magnus(2870) [E25]WCh 2013(9), 2013.11.21
[Arkadij Naiditsch]

At this moment of the match Carlsen was leading with +2 wins and in the last games Anand rather made the impression of not wanting to lose any other games than of a fighter who wants to come back into the match. With only 4 games to go, Anand was forced to search for action on the board and that is exactly what he did this game. In a very sharp position, where any human player would choose White, Carlsen defended with amazing precision in the style of a computer, which clearly made Anand very nervous. In what was still an unclear position, Anand shocked everybody and just blundered in 1 move.

1.d4 Anand finally switches to 1.d4, as in the previous games after 1.e4 Anand couldn't do anything against the Berlin.

1...♘f6 2.c4 e6 3.♘c3 ♙b4 I guess it was a little surprise for Anand that Carlsen chose to play the Nimzovich, but of course not a big one.

4.f3! A very fighting move! Anand finally shows that he is ready to go for a real battle.

4...d5 5.a3 ♙xc3+ 6.bxc3 c5 One of the main lines. Anand has played quite a couple of games in this line before.

7.cxd5 exd5 [7...♘xd5 8.dxc5 is the very main line.]

8.e3

8...c4!? An interesting move, clearly prepared by Carlsen. Usually Black doesn't hurry with it and plays 0-0 first. The idea of the immediate c4 is not to let White play Bd3-Bc2. On the other hand, now the queenside is totally closed and it is more easy for White to start a direct attack on the kingside.

9.♘e2 A very logical move. White is preparing to play g4-Bg2-Ng3, which is quite a standard plan.

9...♘c6 The black knight is going to b3. [Maybe a move like 9...h5 would also make sense. Black stops g4 for a while and we know similar ideas with h5 from the Najdorf.]

10.g4 0-0 It is very usual for Black to castle kingside. The position looks dangerous, but with his opening, there is already no choice.

11.♙g2 ♘a5 12.0-0 ♘b3 13.♖a2! Another usual but nice move. The white rook is going to nice square like g2 or maybe even f2 over the 2nd rank.

13...b5 Black quickly starts his play on the queenside. [An attempt to stop White's attack for a while would not bring anything: 13...♖e8 14.g5 ♘h5 15.e4 White is faster.]

14.♘g3 a5 15.g5 White starts his crush on the kingside!

15...♘e8 An important move as it is always better to keep the

knight on e8 in such a structure.

16.e4 White wants to play Bf4 next.

16...♘c7 Black needs to take on c1, as letting White play Bf4 is not an option.

17.♔xc1

17...♖a6! A nice move. Black is at the same time defending against the white attack and preparing the b4 push.

18.e5 A logical move but maybe not the best one. [I think Anand could have been more tricky by starting with 18.f4!? 18...♘c7 (It seems like the position after 18...dxe4 19.♘xe4 b4 20.cxb4 ♔xd4+ 21.♔h1 axb4

22.♖d2 is better for White.) 19.f5 White is sort of trying to win a tempo.]

18...♘c7! A very difficult move to play for a human, but computers are very happy with Carlsen's decision. Black doesn't care about White's attack which looks very dangerous and just plays for the b4 push. The funny thing is that Black's only survival idea will soon be to play Ne8 back, but whether Magnus has calculated everything until the end or just trusted his feeling, we will never know. In any case amazing play!

19.f4 What can be more logical for White than to try and bring his pawn to f6!

19...b4 20.axb4 axb4 21.♖xa6 ♘xa6 White forces the black knight to go even more far away from his king.

22.f5 b3 From a human point of view, Black's position just looks lost. White's attack must just be crushing and the b3 pawn is very strong, but only in the endgame. After this move Anand thought for over 40 minutes!

23.♔f4 [Another attacking idea could maybe have been to play 23.♘h5 23...♘c7 24.♔e3 With a lot of different threats. The position is very complicated.]

23...♘c7! The black knight is going back to e8 to defend the g7 square. Really amazing cool play by Carlsen. If we didn't know that a human is playing Black, we might think that Anand is trying to mate an engine!

24.f6 I think Anand panicked a bit too early, or maybe miscalculated the line in the game. [24.♘h5 The position is still very unclear here.]

24...g6 Now the structure is fixed and White must go for the mate at all costs.

25.♙h4 ♘e8 To put the knight on e6 is of course bad because of Bh3.

26.♙h6

26...b2! A very funny position. All black pieces are on the 8th rank and the rook from f8 is just dead, but it seems like Black is not risking to lose this game! The idea of playing Qa5 or Qb6 next is just too strong.

27.♖f4 Probably the best move.

27...b1=♙+ 28.♘f1?? What a shocking blunder...

[28.♘f1 is the only move to go on. 28...♙d1 Black needs to give back his extra queen to prevent White from mating on the h-file. 29.♖h4 ♙h5 30.♘xh5 gxh5 31.♖xh5 ♘f5 It looks like Black is winning because of Bg6 at the next move, but 32.g6!! is very strong! 32...♘xg6 33.♖g5 With the idea of playing h4-h5 next. Maybe Black's best option is to play 33...Nxf6 and the game would probably end in a draw.]

28...♙e1 Black just stops White from playing Rh4 next and is a full rook up. What a game! Anand was clearly very disappointed that he was not able to mate Carlsen and this might be the only explanation behind his blunder on move 28. Now Carlsen is leading with +3 and there are only 3 games left, which basically makes him the new World Champion. Congratulations! **0-1**

(4) Vachier-Lagrave, Maxime(2742) - Papaioannou, Ioannis(2639) [B01]

19th European Teams(6.1), 2013.11.14
[Arkadij Naiditsch]

1.e4 Vachier-Lagrave was one of the top scorers in the French team which took the bronze medal. With his risky and energetic play he could push his opponent to the limit at an early stage in this game!

1...d5 Not many players still believe in the power of Scandinavian, but Papaioannou is one of them who does and plays it very regularly.

2.exd5 ♖xd5 3.♘f3 Not the main move. [3.♘c3 would lead us to the main lines. 3...♗e5+]

3...♙g4!? A very practical reply for Black who is going for the very fast 0-0-0 and dynamic play.

4.♙e2 ♘c6 After just 4 moves we are almost out of theory, with a very unclear position! This usually happens very rarely in high level games.

5.O-O O-O-O

6.h3!? A good move. Before playing Nc3 or maybe even d4 move, White is checking where the bishop is going.

6...♙xf3 At first sight this move looks like a bad one, but in fact it is not. Black is playing for fast development. [After 6...♙h5 7.♘c3 ♗d6 8.♖e1 White's position is maybe a bit better.]

7.♙xf3 ♗d7 Black's idea is to play Nd4 next and to exchange the knight against the monster bishop on f3, with an equal position.

8.c3 The only way to avoid Nd4.

8...e5 [Black could still have tried to go for the white bishop: 8...♘e5 9.d4 ♘xf3+ 10.♗xf3 With a slightly better position for White.]

9.♖e1 White is stopping f5 for the moment.

9...♘f6 [9...f5 of course didn't work: 10.♙xc6 ♗xc6 11.♖xe5 And Black doesn't have enough compensation for the pawn.]

10.b4 Very provocative play by White. A move like b4 is of course very logical but White is behind a lot with development.

10...♙d6?! Too passive. Now White's bishop pair is going to be very effective. [I think Black should have tried his chances by playing against White's development: 10...e4 11.♙xe4 ♘xe4 12.♖xe4 f5 Being a pawn down is never nice, but the black pieces are much better placed. 13.♖e1 ♙d6 14.d4 ♖de8 And I think Black would have enough play for the pawn.]

11.d3 This move does not stop Black from playing e4.

11...♗f5?! Once again Black doesn't want to give up the pawn.

[11...e4 was clearly the best chance to fight. 12.♙xe4 (12.dxe4 12...♗e6 With an unclear position.) 12...♘xe4 13.♖xe4

13...f5 And Black has enough compensation for the pawn again.]

12. ♖a4 A very aggressive move. [The silent 12. ♖c2 followed by Nd2-Nc4 gives White a clear advantage.]

12... ♗xd3 Black needs to accept the invitation.

13. b5 ♘b8 14. ♕e3! White is very fast with his development his pieces and the monster bishop on f3 will play a decisive role.

14... ♖f5 [It is a pity for Black but 14...e4 doesn't work because of 15. ♖d1 and the black queen on d3 has no moves.]

15. ♘d2 White's last piece is out and now it is of course time to play Qxa7.

15... ♕c5 There are no good moves in a bad position...

16. ♘e4! White continues playing very well. After the black

squared bishop is gone, the white knight will take a great place on c5.

16... ♕xe3 17. ♖xe3 We can now perfectly see why Black should have taken more care about the white bishop on f3.

17... h5 Protecting against Bg4 in some variations.

18. ♖xa7 The a7 pawn died and the b7 is going to die soon. The game is over.

18... ♘d5 19. ♘c5 Black cannot protect the b7 pawn anymore, but with the next move Papaioannou shows us that he has a good sense of humor! :)

19... ♘xe3!! This is clearly more funny than resigning...

20. ♖xb7# And White misses his chance of mating with the bishop by playing 20. Bxb7! :) Great play by Maxime and a very nice game from which we can clearly see how dangerous a bishop pair can be! 1-0

Endgame section

(15) Anand, V.(2775)-Carlsen, M.(2870)

WCh 2013 Chennai, 2013.11.16

[CE Team]

This interesting endgame was reached after passing the first time control. Black has a healthy extra pawn, but his rook is passive. On the other hand the white rook is excellently placed on the 6th rank. It attacks the pawns and stays ready to attack the b5 pawn as well if Black tries to activate his rook. White should be able to hold this.

43...♔f7 [43...h5!? was a better chance according to Carlsen. He admitted that he missed Anand's move in the game... 44.♔g3 ♔f7 45.♔f3 ♖e7 This was in Black's mind. He transfers his rook to e5, which is a serious improvement obviously, but still it should not be enough to win the game.. 46.♖b6 ♖e5 47.g3

Followed by waiting with Kf2-f3. It will be very difficult for Black to make further improvements.]

44.h5! A clever pawn sacrifice to destroy the healthy pawn structure. White will only temporarily be two pawns down... [44.♔g3 was also possible. Black will have nothing better than transposing to the 43...h5 line at some point.]

44...gxh5 [44...g5?! is not advisable because it fixes his own pawn on h6. 45.♔g3 ♖e7 46.♗b6 ♗e5 47.♔f3= White plays g4 next and Black cannot make progress.]

45.♗d5! Otherwise Black transfers his rook to e5 and preserves both extra pawns.

45...♔g6 [45...b4 with the idea of bxc3 and Rb3 is always met by 46.♗c5!= Winning the c4 pawn and achieving a draw.]

46.♔g3 ♗b6

47.♗c5! A strong waiting move, using the fact that Black has no useful move. If he wants to do something, he must give one of his pawns back.

47...f5 48.♔h4 ♗e6 There was really no more improvement. Carlsen decides to give up his b5 pawn in order to activate his rook. [48...f4 49.♗xh5=]

49.♗xb5 ♗e4+

50.♔h3 The game should be an easy draw. I still find it hard to believe that the World Champion simply lost it. Black has two extra pawns on the kingside, but the double isolated h-pawns can hardly be counted as full pawns. Anand was probably expecting a quick finish here, but Carlsen had a very deep last attempt in mind...

50...♔g5 51.♗b8 h4 52.♗g8+ ♔h5

[52...♔f4 53.♖c8 (53.♔xh4? is bad in view of

53...♖e1! Threatening Rh1. 54.♔h5 (54.g3+ 54...♔f3 55.♔h5 loses to the tactical 55...f4! Black creates a passed pawn, because the f4 pawn cannot be taken: 56.gxf4 ♖h1+ 57.♔g6 ♖g1+ 58.♔h7 ♖xg8 59.♔xg8 ♔xf4— and the h-pawn promotes...) 54...♖e2! 55.♔xh6 ♖xb2 Black plays Rc2 next, while after 56.♖c8 ♖xg2 57.♖xc4+ ♔e3 the f-pawn runs and the white king is poorly placed.) 53...♔e3 54.♖c5 ♖f4 55.♖d5= White holds easily.]

53.♖f8 ♖f4 54.♖c8 Anand curiously waits to see how Black tries to make progress... [White could always play 54.♖b8 followed by b3. White should also take care of the Rf1-h1 and rook checks along the 3rd rank, but both can be prevented with the simple Kh2.]

54...♖g4 55.♖f8 ♖g3+ 56.♔h2 ♔g5

57.♖g8+? Anand misses the fantastic idea of Carlsen... Both players said this was the decisive mistake at the press conference. However the computer would still have saved White with some miraculous line... [White should simply have forced the rook back to g4. 57.♖c8 57...♖g4 58.♔h3= And a draw would have been agreed soon.]

57...♔f4!! Brilliant! At first sight it looks like a blunder because White obtains connected passed pawns after Rc8, but Black is able to create a passed f-pawn, which turns out to be much more relevant than the white ones.

58.♖c8! [58.♖e8? loses to 58...h3! 59.gxh3 ♖e3 Suddenly White is in trouble... 60.♖c8 ♖e2+ 61.♔g1 ♔g3 62.♔f1 ♖xb2 63.♖xc4 f4— wins.]

58...♔e3 59.♖xc4

59...f4! White cannot avoid h3! and suddenly the f-pawn becomes extremely dangerous. What a change in the game in just 2 moves. Instead of agreeing to a draw, Black has decisive threats!

60.♖a4? This is actually the decisive mistake. [The machines found the study-like salvation for White with 60.b4! The only move! 60...h3 61.gxh3 ♖g6 62.♖c8 f3 63.♖e8+ ♔d3

64.b5! f2 (64...♖g2+ 65.♔h1 ♜b2 The king must be cut along the g-file and not on the 2nd rank, because now 66.♔g1! holds. In comparison to the lines after 60.Ra4, the black king always stands on e3 and there he wins after Rb1 and f2, as White does not have Kf2...) 65.♜f8 ♔e2 66.♜e8+ ♔d2 (Black cannot make progress after 66...♔f1 67.c4 ♜g2+ 68.♔h1 ♜g1+=) 67.♜f8=; 60.♜c8 immediately loses to 60...♔f2! 61.♜f8 ♜xg2+ 62.♔h3 f3 63.b4 ♜g3+ 64.♔xh4 ♔g2--+]

60...h3! 61.gxh3

61...♜g6! Black is ready to advance his f-pawn. A very interesting situation, because without the c- and b-pawns White could easily hold by giving side checks. White is unable to get rid of the pawns...

62.c4 [62.b4 62...f3 63.♜a8 ♜g2+ 64.♔h1 ♜e2! loses like in the 63. Ra8 line.]

62...f3 63.♜a3+ [63.b4 63...f2 transposes to the game.; Now 63.♜a8 loses to 63...♜g2+ 64.♔h1 ♜e2! 65.♜e8+ (65.♔g1? 65...♜e1+ 66.♔h2 f2) 65...♔d2 66.♜d8+ (66.♜f8 66...f2 67.♔g2 ♔e1--+) 66...♔e1 67.♜a8 ♜e5--+ Freeing the e2 square for the king and f2 next wins.]

63...♔e2 64.b4 f2 65.♜a2+ ♔f3 66.♜a3+ ♔f4 White should continue checking with his rook, but his pawns are preventing this. Really shocking...

67.♜a8 [67.♜a1 loses to 67...♜e6! and Re1 next. 68.♔g2 (68.♜f1 68...♔f3--+) 68...♜e1--+]

67...♜g1! White resigned. A really painful loss, especially in such an important game. Probably only Carlsen could believe that he can still win this game. **0-1**

(16) Morozevich, Alexander(2727)- Van Kampen, Robin(2618)

19th European Teams(8.3), 2013.11.16
[CE Team]

We are in the 8th round in the final game between Russia and the Netherlands. At the moment the score is 2-1 for Russia, so Van Kampen has to win the game and his position is totally winning. It is never easy to play under big pressure but for a professional chess player this is one of the important things you must be able to do.

51. Nc3 Rg1+ Black had a lot of winning moves but this move looks like the most simple one. The g5 pawn is attacked by the rook and Black has enough time to bring the king closer.

52. Kf4 Kc6

53. Kf5! Morozevich takes his practical chance.

53... Kd6? This move is still winning, but it is a bad practical decision. In winning positions it is important to win as fast as possible to give yourself no chances of going wrong. [53... Rg3! would end the game on the spot. 54. Nc2 (54. Kf4 didn't help either: 54... Rg2 [

54. g6 Now White at least has some theoretical chances for a draw. White's idea is to give back the g6 pawn and quickly run back to d3 with the king.

54... Rg3 The usual idea.

55. Nc2 Rg2 56. Nc3 Rf2+! Van Kampen chooses the right path. White cannot stop Black from playing c2 next.

57. Kf4

57... Ke6?? What a shocking mistake. I have to admit that the arising position looks totally winning, which can be a little excuse, but I think that Robin's team mates had a bit of a heart attack when they saw this move. [To win the game Van Kampen had to make a little calculation: 57...c2 58.g7 The moves are forced. 58...c1=Q 59.g8=Q Qb1+ 60.Kd4 Qd2+ With mate to follow in a few moves.]

58. g7 White is pushing the black king as far away as possible.

58...♔f7 59.♔d3 ♚f3 I guess Van Kampen thought that this position should be easily winning, but in fact it is already a draw!

60.♔d4 ♔xg7 61.♘c2 ♔f6 62.♔c4 We have a funny position. White cannot win the c-pawn, but on the other hand the black king cannot come closer, only over the g3 square, which would give White enough time for Kb3-Nb4 and Nd5. What a dramatic finish of the game.

62...♔e5 63.♘b4 ♔e4

64.♘c2 ♚h3 65.♘b4 ♚g3 66.♘c2 ♚f3 Van Kampen tries, but he can't cross the 3rd rank with his king.

67.♘b4 ♔f5 68.♘c2 ♔g4 Now that the black king is far away, White is in time to win the c-pawn.

69.♘d4 ♚g3 70.♔b3 Black cannot do anything against Nb5-Nxc3 next.

70...♚e3 71.♘b5

71...♔f4 72.♘xc3 ♔e5 73.♔c4 And of course there are no practical chances of winning such an endgame at all.

73...♚h3 74.♘b5 ♚h8 75.♘c3 ♚c8+ Van Kampen keeps on playing for a few moves just to let the air out.

76.♔d3 ♚d8+ 77.♔c4 ♚d4+ 78.♔c5 ♚d3 79.♔c4 ♚xc3+ 80.♔xc3 What a lucky end for the Russian team and a big disaster for Van Kampen! **1/2-1/2**

Clash of the Titans

(17) Bronstein, David I-Kortschnoj, Viktor[D87]

Belgrade(15), 1964

[Miton Kamil]

I chose this game because it was suggested to me by one of our readers, so if there is a game you would like to see commented, don't hesitate to drop us an email!

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 4.cxd5 ♘xd5 5.e4 ♘xc3 6.bxc3 ♙g7 7.♙c4 c5 8.♘e2 O-O 9.O-O ♘c6 10.♙e3 We are at the beginning of the Bc4-Ne2 line in the Grunfeld Defence. Now Black has several ways to play.

10...♘a5 One of the typical moves in this opening because very often Black's idea is to play over the c-file and c4 square. Black could also play [

a) 10...♙g4 11.f3 ♘a5 12.♙d3 (12.♙xf7+ 12...♙xf7 13.fxg4 ♙xf1+ 14.♙xf1 This famous position was played many times between Kasparov and Karpov.) 12...cxd4 13.cxd4 ♙e6 14.d5 Otherwise Black will come to c4. 14...♙xa1 15.♙xa1 f6 16.♙d4 White has the initiative on the dark squares.;

b) 10...♙c7 With the idea of playing Rd8.;

c) 10...e6 has recently become popular as well and the idea is not to allow the h4-h5 plan which sometimes makes sense.;

d) 10...b6!?]

11.♙d3 [11.♙b5 The idea of this move is to provoke a6 and then the b6 square can be weak but of course Black can simply answer 11...♙d7∞]

11...b6

12.♙a4!? White had to develop the queen but this square is not the best one in my opinion. [12.♙d2!↑The main move. White's idea is play Bh6 to weaken the black king after exchanging the bishops and then start an attack (maybe with f4-f5).; 12.dxc5 This move usually gives Black good play because the bishop on g7 starts to play and the white structures is also destroyed. 12...♙c7 13.cxb6 axb6 With good compensation.]

12...e5 A logical move. Black is fighting for the center.

13.♙ad1 [13.d5 Usually the position with a strong pawn on d5 should be good for White but in this case Black will get a strong blocked knight on d6 and after the thematic f5 move Black will get counterplay on the kingside. 13...♘b7↪(13...♙d7 14.♙b5 ♙xb5 15.♙xb5 This option without the light squared bishops is better for White.)]

13...♙d7 [13...cxd4 14.cxd4 exd4 15.♘xd4 ♙b7∞]

14.♙a3 Now when the pawn is already placed on e5 White

has more options to take on c5, so Black plays

14...cxd4 [14...c4? When the pawn is still on d4 this move makes no sense. 15.♖c2 With idea f4.]

15.cxd4 exd4

16.♖xd4! Black's position is very solid and without weaknesses so White's chance is to create pressure against the black king, which is why White exchanges bishops. [16.♗xd4 16...♖xd4 (16...♖c8 17.♖a6+; 16...♖e8 simplest 17.h3!? Preparing f4. 17...♖e7 And Black is very solid.) 17.♖xd4 ♖g4 18.♖a1 ♖xd1 19.♖xd1∞]

16...♖xd4 17.♗xd4

17...♖g4? It is hard to believe that this active move which forces further exchanges is bad for Black. Black should have played [17...♖f6 18.♖a6 ♖fe8 with Rad8 next, then Black's

position should be very solid and White's plans to push f4-e5 will be not easy to realize.]

18.♖e2 ♖xe2 19.♗xe2 After the bishops exchange White has more chances to attack the black king, especially when the knight will come to d5. And additional problem for Black is that the knight on a5 is very far from the play and needs 2 moves to be improved.

19...♖e8 [19...♖f6 20.♗c3 ♗c4 21.♖b3 ♖ac8 22.♗d5 ♖e6 23.f4↑XKg8; 19...♖g5 20.f4 ♖c5+ Exchanging the queens will not help Black now as the c-pawn will be weak. 21.♖xc5 bxc5 22.♖d5 ♖fc8 23.♖c1 ♗b7 24.♗f2 Xc5]

20.♗c3 f6

21.♗d5↑ ♖f7 [21...♖xe4 22.♖fe1 ♖c2 23.♖e7 The black pieces are too far to help the king. 23...♖f7 24.♗xf6+ ♗g7 25.♗e8+ ♗g8 26.♖h4 ♖c3 27.♖e7+--]

22.♖fe1 Preparing the e5 break.

22...♖f8 23.♖g3 The queen comes to the kingside and the white pieces are very well placed.

23...♞c6

24.h4 With the idea to further weaken the black king.

24...♞h8 [24...♞e8 25.h5 g5 26.f4 h6 27.e5! My intuition tells me that White should be close to winning here. 27...fxe5 28.fxg5 hxg5 29.♞f1 ♞h8 30.♞xg5 ♞e6 31.♞xf7 ♞xf7 32.♞f1→]

25.♞c1 ♞b4 26.♞c7 [26.♞c7 26...♞xd5 27.exd5 ♞d8 28.d6 ♞xc7 29.dxc7 ♞c8 30.h5± Black should not be able to hold this position with an unpleasant pawn on c7 and a weak king.]

26...♞c8 27.h5 [27.♞e6 27...♞xc1 28.♞xc1 ♞e8 29.♞d6 ♞d3 30.♞c7 ♞e5 (30...♞xc7 31.♞xc7 ♞f7 32.♞d8+ ♞g7 33.♞e8+- Xf6) 31.f4 ♞g4 32.♞xf7 ♞xf7 33.♞d8+ ♞g8 34.♞e7 White is dominating thanks to his active pieces.]

27...♞xa2? Black missed his chance to create more problems

as after taking the a2 pawn the knight will be not able to help defending the king anymore. [27...♞h6 The c7 knight is temporarily pinned and White lost some coordination. 28.e5!? than 28...♞d5 29.exf6 ♞xf6 30.hxg6 ♞xg6 The knight on f6 is much stronger than on a2! The black king is safe now. 31.♞e5]

28.♞c4 [28.hxg6 28...♞xc1 29.gxf7 ♞d3 30.♞a1 ♞xf7 31.♞b5 ♞c1+ 32.♞xc1 ♞xc1∞]

28...b5? is losing immediately. Black could still have fought after [28...♞g8 Not a bad place for the queen because it is protecting the g6 pawn and creating some ideas over the a2-g8 diagonal, but it was not easy to find this move. 29.h6 (29.e5 29...♞xc7 30.♞xc7 ♞xc7 31.exf6 ♞c1 32.♞xc1 ♞xc1 33.♞e5 ♞f7 And Black is fighting.) 29...♞d7 30.♞d5 ♞xc4 31.♞xf6 ♞d8 32.♞xd7 ♞xd7 33.♞b3 White recaptures the knight and although the material is equal White has an advantage because the black king is so weak. 33...♞a4?

This move loses because of the nice 34.♞d1! ♞g8 35.♞d8+ ♞f7 36.♞f3+ ♞e6 37.♞g4+ And White is mating.; 28...♞b4 29.♞ec1→; 28...gxh5 29.♞e6 ♞e8 30.♞xc8 ♞xc8 31.♞d6 ♞d7 32.♞f4 ♞f7 33.♞f5+- Black is not able to prevent a few threats like Rd1-Rd8 or Ng5.]

29. ♖e6 ♜e8 30. ♖xc8 ♜xc8 31. hxg6 hxg6

32. ♜h4+ ♜g8 33. ♜g4 Black is forced to make further weaknesses.

33...g5 [33...♜h8 34. ♖d1+-]

34. ♜f5 ♜d7 35. e5+- Now Black's position is hopeless.

35...fxe5 36. ♜xg5+ ♜h8 37. ♜xe5+ ♜g8 38. ♜g5+ White is simply winning.

38...♜h8 39. ♜h5+ ♜h7 [39...♜g8 40. ♖e5+-]

40. ♜e5+ ♜g8 41. ♜g5+ ♜h8 42. ♜f6+ 1-0

Editorial Preface

At the moment we can only see one major chess event going on and this is the World Team Championship in Turkey. Russia, Ukraine, Armenia, USA and China all came here with their best team to win the competition. After 5 rounds, Armenia has a solid lead but we can expect very exciting games and moments in the last 4 rounds.

In the German Bundesliga there are no changes as the team of Baden Baden keeps on winning.

In the current issue we are analyzing the games from the World Team Championship and from the Bundesliga.

We wish you a lot of chess fun with the current issue of CEWN!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kramnik, Vladimir(2793)
- Aronian, Levon(2801) [D44]

World Teams 2013(1), 2013.11.26
[Balogh Csaba]

It is always nice to watch the World Nr.2 against the Nr.3, especially when they play such an exciting game.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 c6 5.♙g5 dxc4 The Botvinnik variation of the Slav defence is a guarantee for a very interesting fight!

6.e4 b5 7.e5 h6 8.♙h4 g5

9.♘xg5 hxg5 10.♙xg5 This is of course just the beginning of the theory. Thousands of games were played here so far according to the database. It is very interesting to follow the battle of the probably two best-prepared players of our time in such a sharp line.

10...♙e7!? This is the first surprise. 10...Nbd7 is by far the most common move, but of course the text is also a well-analyzed one.

11.exf6 ♙xf6 12.♙xf6 ♖xf6 13.g3 White had alternatives here, but Kramnik follows the main line.

13...♙b7 14.♙g2

14...♘a6 It is clear that both players were still just at the beginning of their preparation. There are still hundreds of games in the database. Here theory considers 3 main moves.

15.♘e4 The most common move again. [15.♘xb5 seems to lead to a draw after 15...O-O-O! 16.♖a4 cxb5 17.♙xb7+ ♖xb7 18.♖xb5+ ♖a8 White is forced to give perpetual check. 19.♖c6+ (19.♖xa6? loses to 19...♖f3! and White gets mated. 0-0 runs into Rxh2 and mate in a few moves.) 19...♖b8 20.♖b5+ ♖a8 21.♖c6+; 15.a4 is the third option.]

15...♖e7 16.O-O O-O-O Here comes the novelty!

17.h4!? As we will see, White wants to attack with a4, but in that case Black gets strong counterplay with f5. The point of the novelty is to work out the g5 square for the knight.

It is clear that Aronian's camp has also analyzed this idea. [17.a4 happened before in all the games, when Black replies with 17...f5 18.axb5 (18.♘c3!? was considered to be the critical line before this game. It is clear that both players know something here. 18...b4 19.♘e2 c5 20.♙c2) 18...cxb5 19.♖xa6 ♗xa6 20.♘c5 ♙xc5 21.dxc5 ♖xd1 22.♖xd1 b4 is given as a draw after a few more moves.]

17...c5! Black needs to act quickly, otherwise his king gets much more vulnerable after a4!

18.a4! The standard attack. White wants to open the a-file, which is why Black is forced to push b4, but then the c4 pawn becomes a target.

18...♖xd4 19.♙e2 b4 The following couple of moves are all connected to the c4 pawn.

20.♖fd1 White tries to remove the defender of the c4 pawn.

20...♗d5 Black stabilizes.

21.♖ac1! Showing a clear intention for an exchange sacrifice. After taking on c4, Black loses his strong bishop on d5 and suddenly the queen combined with the two very active minor pieces are creating serious threats against the naked black king.

21...♖xd1+! Black lures the rook away from the c4 square. [Some random move, for instance 21...♖d8 would run into 22.♖xd4 cxd4 23.♖xc4+! ♗xc4 24.♙xc4+ ♘c7 25.♘c5 With a huge attack.]

22.♖xd1 ♖d8

23.♖c1! Kramnik returns to his strategy! Additionally he wants to play Nd2, gaining the c4 pawn without a sacrifice.

23...♔b7!? Aronian is searching for counterplay along the h1-a8 diagonal. He threatens to win a piece with f5. However Kramnik found a very strong answer!

24.♖xc4! ♕c6 How to deal with the f5 threat? [24...♗xc4 loses to 25.♘d6+ The queen is hanging with check. 25...♔b8 26.♕xc4 ♕b6 27.♘xf7+- Black is hopeless.]

25.h5!! Brilliant! Kramnik realizes that f5 is not really a threat, so he advances his passed pawn. [25.♖c1 is bad because of 25...f5 26.♗xc5 ♘xc5]

25...f5 26.♗xc5! ♗xc4 [And the point is that 26...♗xc5? runs into 27.♕c2! and White wins!]

27.♕xc4 ♕xc5 28.♕xe6+! White takes another pawn before capturing the knight, otherwise Black could have protected it with Kd7.

28...♔c7 29.♕xa6 White is slightly better materially with two pawns and a bishop against the rook and the h-pawn has a big power. The question is whether Black is able to organize counterplay against the white king or not.

29...♖d1+ [On 29...♖d2 Kramnik intended to play 30.♕b7+ ♔d6 31.♕b8+ ♔d7 32.♕f4 White consolidates and the b2 pawn cannot be taken because of 32...♖xb2 33.h6+-]

30.♔h2 f4 [On 30...♕xf2! was stronger. 31.h6! f4! seems to save Black. White has nothing better than perpetual check.]

31.♕b7+ [White might have tried 31.♕e2! 31...fxg3+ 32.fxg3 ♖d7 33.♗f3+= Keeping the initiative, but of course it will be very difficult to convert the advantage.]

31...♔d8 32.♕a8+ ♔e7 33.♕e4+ ♔d8 34.♕a8+ Getting closer to the first time control.

34...♔e7 35.♕e4+ ♔d8 36.♕xf4 A good practical decision to keep the pawn shield around the white king. [A nice line is 36.♕f3 36...♖d2 37.h6 ♖xf2 38.h7 White seems to win, but... 38...fxg3+ 39.♕xg3 ♖xg2+! 40.♕xg2 ♕c7+ 41.♔g1 the pawn cannot be taken because of Qa8 and Qxa7 wins the queen, but after 41...♕c1+ 42.♕f1 ♕g5+= Black holds the draw.]

36...♕xh5+ 37.♗h3 ♕c5! Black consolidates. The only way to make progress would be to advance the pawns, but that is risky because it opens the king's position.

38.a5 ♖d5 [38...♕xa5 was also possible and White probably doesn't have anything better than perpetual, but Aronian did not want to take his queen away from its active position.]

39. ♖f6+ ♔e8 40. ♖e6+ ♔f8 41. ♖f6+ ♔e8 The time trouble is over. Kramnik continues pushing.

42. ♗g4 ♚d4 Black would happily trade the queens because the kingside pawns are not advanced far enough, therefore he has enough time to catch the b2 or the a5 pawn.

43. ♖e6+ ♔f8 44. ♖h6+ ♔e7 45. ♖e6+ ♔f8 46. ♗g2 ♖d6 47. ♖c8+ ♔g7 48. ♖c7+ ♔f8 49. ♖c8+ ♔g7 A great fighting draw! **1/2-1/2**

**(2) Nakamura, Hikaru(2786)
- Kramnik, Vladimir(2793) [E32]**

World Teams 2013(2.2), 2013.11.27
[Arkadij Naiditsch]

We know that these two players don't like each other too much and recently Nakamura showed great personal results against Kramnik. In the current game it seems like Kramnik manages to almost equalize but not completely and this is where Nakamura is taking over with great positional play and a very pretty final calculation. We will see a great game by the American Number 1.

1.d4 ♘f6 2.c4 e6 3. ♘c3 ♗b4 4. ♚c2 Quite an interesting choice by Nakamura. Lately Kramnik showed great results in the Nimzo with 4. Qc2 but it seems not to bother the American.

4...O-O 5.a3 ♗xc3+ 6. ♖xc3 d5 7. ♘f3 We are in the main line, nothing new so far.

7...dxc4 8. ♖xc4 b6 Black's main idea in this line is to develop quickly and push the c5 move, with big exchanges.

9. ♗g5 ♗a6

10. ♖c3!? An interesting move. The main one is 10.Qa4.

10...h6 A very logical move and quickly played by Kramnik. White needs to decide what to do with the bishop on g5.

11.♗xf6 [After 11.♗h4 11...♞bd7 Black keeps the important option of playing g5 in a good moment.]

11...♞xf6 12.g3 Of course White has to develop his bishop.

12...♗b7 13.♗g2 ♞a6 A very strange looking move to me. I think Black could have avoided placing the knight to such a passive position. [13...c5 looks much more logical. 14.dxc5 (14.O-O 14...♞d7 just looks equal.) 14...♞xc3+ 15.bxc3

15...♞c8 And I think this position is just a draw.]

14.O-O c5 15.♞ac1 The position looks like it is close to equal, but Black has to suffer a bit because of the bad knight on a6.

15...♞ac8 Preparing for cxd4.

16.♞e5! A very good practical choice. With this move White chases the queen from f6 and the knight a6 is still in danger of not finding any good square.

16...cxd4 After this move the position is getting very tricky for Black. [Maybe the best option was still to play 16...♗xg2 17.♞xg2 ♞f5 and the black queen is coming back into the game.]

17.♞xd4 ♗xg2 18.♞xg2 ♞c5 The black knight is finally out, but not for long.

19.b4! White is using the moment. b4 is a typical strategic decision in an endgame as the threat of playing b5 followed by Nc6 could be deadly.

19...♞b3 The black knight has nowhere to go.

20.♞xc8 ♞xc8 [Black can of course not take the queen: 20...♞xd4 21.♞xf8+ ♞xf8 22.♞d7+-]

21.♞d7! Another very good move. White is forcing the black rook to go back to a passive square on f8.

21...♞f8 22.f4 An aggressive approach. [After 22.♞f3 Black would face huge trouble. The knight on b3 is almost caught. White's position is much better.]

22...♞f5 Better later than never. Black finally activates his queen.

23.♞f3 ♞c2 24.♞d3 A good move. The endgame is far away from being a draw.

24...♞xd3 25.♞xd3 ♞c1 The black knight is almost caught.

26.♞d2 [I think that after 26.♞d7 26...♞xe2 27.♞xa7 White should also have very good winning chances.]

26...♖c8

27.h4 An usual move, Nakamura just wants to play h5 and fix the black pawn structure. The knight on c1 is cut and is going nowhere. [The direct 27.b5 would probably also lead to about the same position as in the game.]

27...h5 28.b5 The knight is going to the best possible position on c6.

28...♖c7 29.♘c6 ♔h7 Black's position is very ugly. White just wanted to play Rd8-Ra8 and win a pawn.

30.♖b2 The black knight is totally cut off.

30...a5 31.♔f2 Nice technical play. White is improving the position of his king and wants to play Ke3-Kd2 next.

31...♖d7 32.♘e5 Now Ne5 comes with a tempo.

32...♖c7 33.♖d2! White returns to the d-file, but now Rd6 or Rd7 are both looking deadly as the b6 pawn is going down.

33...f6 34.♘d7 ♘b3 35.♘f8+ Nakamura calculates until the end. [35.♖d6 would also lead to a winning position for White.]

35...♔g8

36.♖d7! was Nakamura's key idea. Before taking the pawn on e6 White is fixing the 7th rank, so Black is forced to exchange the rooks.

36...♖xd7 37.♘xd7 ♘d4 Kramnik tries his last practical chance, but of course Nakamura has calculated it before playing 36. Rd7!

38.a4 ♘xb5 If Black lost the b6 pawn White would be winning anyway.

39.axb5 a4 40.♘c5 Of course! The white knight easily stops the a-pawn and the game is over.

40...a3 [40...bxc5 41.b6 a3 42.b7 a2 43.b8=♔+ White is queening first with a check.]

41.♘b3 a2 42.♔e3 It is hard to say why Kramnik continued the game here... The rest doesn't need any comments.

42...♔f7 43.♔d4 ♔e7 44.e4 e5+ 45.fxe5 ♔e6 46.♘a1 fxe5+ 47.♔c3 g5 48.♔b2 gxh4

49. gxf4 ♔d6

50. ♖b3 All in all a great game by Nakamura who made great use of the bad position of the black knight and finished the game with a great combination on move 36. **1-0**

(3) Aronian, Levon(2801)
- Nakamura, Hikaru(2786) [D56]

World Teams 2013(3.5), 2013.11.28

[Arkadij Naiditsch]

We will now face a very important game from the 2 leading teams, the USA and Armenia. The clash between these two Top 5 players ended in favor of Aronian, who once again showed a great preparation followed by very nice place in the rook endgame. Let's take a more detailed look at what happened.

1.d4 d5 2.c4 e6 3.♘f3 ♘f6 4.♙g5 Could it be Aronian is avoiding the Vienna?! [4.♘c3 4...dxc4]

4...♙e7 5.♘c3 And we are back in the main Queen's gambit.

5...h6 6.♙h4 O-O 7.e3 ♘e4 [7...b6 is the other very popular line.]

8.♙xe7 ♔xe7

9.♞c1 This is still theory and will be for many moves. From a general point of view it is easy to see what's going on. White is a bit better developed but Black's position is very solid. Black is trying to exchange as much as possible to reach a little worse position but hold on to a draw.

9...c6 10.♙d3 ♘xc3 [Of course a move like 10...f5 just looks

bad...]

11.♖xc3 dxc4 12.♖xc4!? A very interesting approach. The main move is 12.Bxc4.

12...♘d7 Black is of course playing for the main idea in the line and that is to play e5.

13.0-0 e5 14.♙c2 This seems to be White's key idea. The threat of playing Qd3 next is quite unpleasant and if Black would play 14...exd4 15.Rxd4 White would be dominating on the d-file, which would leave him with some advantage.

14...♘b6 The most critical move.

15.♖c5 [Of course not 15.♖d3?? 15...e4]

15...exd4 16.♖d3 It is clear that Aronian is still in his preparation, but Nakamura was already probably out as he was spending quite some time for his next moves.

16...g6 The only move.

17.♙b3! By threatening to play Qxg6 next White is winning an important tempo and the control over the d5 square.

17...♙g7 [17...♖xc5 is of course losing. 18.♖xg6+ ♔h8 19.♖xh6+ ♙g8 And after the very strong 20.e4!! White is totally winning.]

18.♖xd4+ ♖f6 19.♖e5 White should of course keep the queens on the board.

19...♙d7 [Maybe Black could have tried 19...♖d8 20.♖b4 ♘d5 21.♙xd5 cxd5 but here too after 22.♖e7 White seems to be better.]

20.h4! a great move and played very quickly by Aronian. What a preparation one more time by the World Nr2.

20...♖ad8 The most logical reply in a complicated position.

21.h5 And now we can see White's main idea is to crush Black's pawn structure on the kingside.

21...♙f5 Once again Black finds a very safe move. The bishop is taking a great place on f5.

22.♖c3 It seems like this move just leads to an about equal endgame. [Maybe a better try would have been 22.♖b4 With a very complex position.]

22...♙g4? After playing great defensive moves, Nakamura makes a mistake. [I think the endgame after 22...♘d7 23.♖a5 ♖xc3 24.bxc3 ♙d3 looks pretty equal, maybe White could be a little better, but this is the maximum.]

23.hxg6 The position is very sharp, but Black is in a bit of trouble.

23...♙xf3 24.gxf3 Now the white king is open, but the white rook on e5 is taking a great place and controlling the very important 5th rank.

24...♘d5 What else to do... [24...♘d7 is not good as after 25.♖e7! the position is very forced but everything is working out for White: 25...♙xc3 26.bxc3 ♙xg6 27.♖d1 ♘c5 28.♖xd8 ♖xd8 29.♙xf7+ ♙f6 30.♖c7 With very good winning chances for White.]

25.♙xd5 cxd5 26.gxf7 Now White is a clear pawn up.

26...d4! A very good practical decision. Black is destroying White's pawn structure in the hope of getting into a rook endgame and save it. A very logical move.

27.exd4 ♖xf7 28.d5 [We would get about the same rook endgame after 28.♖fe1 28...♙xf3 29.♙xf3 ♖xf3 30.♖1e3 With similarly good winning chances as in the game.]

28...♙xf3 29.♙xf3 ♖xf3 30.♖d1 At first sight it is very hard to say if this position is closer to a win or to a draw. If Black managed to exchange one of White's pawns for the h pawn, the position would probably be a draw, but it is not that simple to do.

30...♙f7 31.♖d4!

31...♖e8 Another very logical move. Black cannot continue playing with 2 pairs of rooks on the board with such an open king on f7.

32.♖xe8 ♙xe8 33.♙g2 ♖f5?! This move looks a little strange to me. [33...♖f7 Black would probably have the best drawing chances here although the position is of course still very difficult.]

34.f4 ♙d7 35.♙f3 ♙d6 36.♙e4 Both kings are in the center.

36...♖f8 Black puts his rook behind the pawn, which is correctly played.

37.♖d2 h5 loses on the spot. [Another try was 37...♖e8+ 38.♙f5 ♖f8+ 39.♙g4 h5+ 40.♙g5 h4 41.♖d3 ♖h8 42.♙g4 and here White should probably win the game as well.]

38.f5! White's pawn is now too close.

38...h4 39.♖h2 [A bad idea for White would have been to play 39.♖g2 39...♖h8 40.♖g6+ ♙e7 41.♙e5 h3 and Black might be in time to make a draw.]

39...♖e8+ 40.♔f4 ♖h8 [40...♔xd5 would not have saved Black either.]

41.♖d2+! White is driving the black king even further away. [41...♔c6 42.f6 And White is winning.]

41.f6 ♖e8 [41...♔xd5 42.♔f5]

42.♖xh4 A great game by Aronian with simply no mistakes! We could see one more time how strong Aronian can be, with a very good preparation followed by a great technical game.
1-0

**(4) Vallejo Pons, Francisco(2705)
- Grabarczyk, Miroslaw(2465) [D53]**

Bundesliga 2013-14(3.4), 2013.11.23

[Balogh Csaba]

A very interesting game from the German Bundesliga. Despite Black's lower rating, he was fighting really resourcefully in a difficult position.

1.c4 e6 2.d4 d5 3.♘c3 ♘f6 4.♙g5 ♙e7 The Queen's Gambit is highly popular and a solid option for Black nowadays.

5.e3 h6 6.♙h4 O-O

7.♖c2 White tries to make use of the fact that he has not developed his knight on g1 yet. Nf3 would always transpose to the huge main lines.

7...♘e4!? Just like in the positions with the knight on f3, this kind of simplification is an existing plan for Black. [7...b6 is an alternative for Black, it leads to different structures.]

8.♙xe7 ♖xe7 9.♘ge2!? This is the novelty of the game. A natural one, as the knight stands well on c3. [The pawn should not be taken 9.♘xe4 9...dxe4 10.♖xe4 because of 10...♖b4+ Black wins back the b2 and the king remains unsafe.; On 9.cxd5 Black has the intermediate move 9...♘xc3 followed by exd5 and Black keeps the material balance. However after the

text move White already threatens to win a pawn with cxd5.]

9...♖xc3 10.♗xc3 c6 Black keeps his center.

11.0-0-0!? This was the whole idea behind Vallejo's setup. Probably he has prepared this at home. White plans to launch an attack with g4-h4-g5. In this kind of positions the placement of the h6 pawn helps White in the attack!

11...♗d7 12.g4 White does not waste any time, he immediately launches his attack.

12...♗f6 [I believe Black should have followed the principles that against a side attack one must open the center. This could have been done by 12...dxc4 13.♗xc4 e5! Black seems to get adequate counterplay in any case.]

13.♖g1 e5! Black needs to open the position, otherwise g5 comes with a crushing attack. It is clear that Black must search for counterplay in the center as a counter attack on the queenside would be too slow...

14.g5 hxg5 15.♖xg5 exd4 16.♖xd4 The game is getting very sharp. Black needs to be careful because White is ready to switch his rook to h4, creating decisive threats. From a positional point of view Black has an excellent position without having a single weakness. Without the queens on the

board Black would have the advantage thanks to his better pawn structure. However the main question is clearly if the attack is breaking through or not...

16...♗e4 Black prevents the Rh4 idea. [The calm 16...♖d8! came into consideration. Black is ready to trade further pieces after dxc4, while after 17.♖h4 the point would be to play (17.cxd5 17...♗xd5 is also OK for Black.) 17...d4! 18.exd4 ♖e1+ 19.♖d1 ♖xf2 Black is fine.]

17.♖g1! White rightly does not change the pawn structure. [To get the pawn to e4 would seriously decrease the chances for a successful attack. 17.♗xe4? 17...dxe4 18.h4 (18.♖g1 18...♗f5 Black has nothing to worry about.) 18...f6! 19.♖xe4 ♖b4 Black's counterplay comes either by Bf5 or Qe1.]

17...♗f5 Black goes for the complications! [17...♗xc3 18.♖xc3 White is eyeing on the g7 pawn. He directly threatens with Rxg7, followed by Rg4 and Qg7 mate. Black is forced to play 18...♖f6 19.cxd5 cxd5 20.♖xd5 ♖xc3+ 21.bxc3+= With an extra pawn, although with the 4 pawn islands it is going to be very difficult to win.]

18.cxd5! Black has no good square to jump to with the knight, however the opening of the c-file looks very dangerous at first sight. On the other hand a pawn is a pawn.

18...cxd5 19.♘xd5 ♖e5 [19...♖e6 would have been met by the elegant

20.♗h3! ♗xh3 (20...♖ac8 **21.♗xf5! ♖xc2+ 22.♖xc2** White gets too many pieces for the queen and he continues the attack. **22...♗c6+ 23.♖b1+-**) **21.♗xe4 ♖ac8+ 22.♖b1±** With a healthy extra pawn, since Bf5 now or after the trade of queens runs into Ne7!]

20.f4! Forcing the queen to a wrong place.

20...♗e6 21.♘c7! A brave decision! White plays materialistically. [He could also have continued like in the 19...Qe6 line: **21.♗h3 21...♗xh3 22.♗xe4±**]

21...♗e7 [The nice idea is that **21...♗xa2** runs into

22.♖a4!+- Trapping the queen!]

22.♘xa8 ♖xa8 23.♗d3! Everything seems to be under control. White has just neutralized the f5 bishop, while on Rc4 he has Rc4. The game seems to be over, but Black finds a nice idea to stay in the game.

23...♖c8

24.♖c4?! Vallejo wants to keep all his material advantage. [It was preferable to give something back with **24.♗xc8+!** **24...♗xc8 25.♖xe4+-** White still has an extra pawn and the two rooks are also stronger than the queen.]

24...♘c5!! This great move suddenly shakes up the board. Black threatens to take on e3 and on g1 afterwards, both with checks.

25.♖xg7+!! Here comes the counterblow!

25...♖xg7 26.♗c3+! White protects the e3 pawn with check before taking on f5!

26...♖g6? Black overlooks a nice tactical idea. [26...♖h6 **27.♗xf5 ♘a4!** was the only way to stay in the game. **28.♗d4 ♖xc4+ 29.♗xc4 ♗xe3+ 30.♖b1 ♘b6** With excellent drawing chances for Black.]

27. ♖xf5+ ♔xf5

28.e4+! Suddenly the black king gets into a mating net in all lines.

28...♔g6 [28...♖xe4 29.♖h3+ ♔xf4 30.♖xc8+–; 28...♔e6 29.♖h3+! is an important detail. 29...♔d6 30.♖xc8+–; 28...♔xf4 29.♖g3#]

29.♖g3+! ♔h5 Both players were probably in some time trouble after such a difficult game, so White decides to repeat once. [29...♔h7 30.♖h3+ ♔g7 31.♖xc8+–]

30.♖f3+ ♔h4 31.♖g3+ ♔h5 32.♖f3+ [Surprisingly Black has nothing after 32.♖h3+ 32...♖h4 33.♖xc8 ♖e1+ 34.♔c2 White is able to escape the checks: 34...♖e2+ 35.♔c3 ♖e3+ 36.♔b4 ♖d3+ 37.♔a3+– and b3 next. Of course it is very risky to go for such a line, human players are looking for a more calm way to win in practical games.]

32...♔h4 33.♖c3!? [Black resigned in view of 33.♖c3 33...♖b3+! The only move to avoid mate. 34.axb3 ♖xc3+ 35.♖xc3! With two extra pawns for White, which should be a technical win. The e4 pawn is poisoned. (35.bxc3 35...♖a3+ is unclear.) 35...♖xe4 36.♖g3+ ♔h5 37.♖g5#] **1-0**

Endgame section

(15) Grischuk, Alexander(2785)-Bu, Xiangzhi(2683)

World Teams 2013(3.4), 2013.11.28

[CE Team]

Grischuk has been putting some small pressure all game long and Black's position still seems to be a bit worse. White has the bishop pair and theoretically if White managed to bring the rook from the h-file to the a-file, White would get some winning chances.

42. ♖f3

42... ♟d4+!! What a fantastic piece sacrifice! Black is creating a fortress.

43.cxd4 White has to take the piece...

43...cxd4 44. ♘c1 The white bishop has no other square than c1.

44... ♖c2! And the black rook is taking a perfect position on c2.

45. ♙g2 ♖a8 All Black needs to do now is keep on waiting on the a-file. It is a bit shocking, but White cannot improve his position. After Kg3 with the idea of playing f4, Black has the very unpleasant Ra1 move and White does not have the idea of Bf4 anymore because of exf4 check. [It would of course have been a blunder to play 45... ♖a1?

46. ♘f4! A move which is not too difficult to see. 46... ♖xh1 47. ♖xg7+ ♙xg7 48. ♘xe5+ ♙g8 49. ♙xh1 And White is easily winning.]

46. ♘b3 ♖c3 47. ♘c4 ♖c2 Black keeps on waiting and White just cannot improve his position!

48. ♖xg7+ This does not change much.

48... ♙xg7 49. ♖e1 ♖a7 Black continues waiting.

50. ♘b3 ♖c3 51. ♘c4 ♖c2

52. ♔g3

52... ♖b7 It was also possible to continue waiting on the a-file.

53. ♔h3 [53. ♕a3? was of course not possible because of the following nice little trick: 53... ♖xc4! 54.dxc4 ♖b3+]

53... ♖b6 What a surprising fortress by the Chinese player Bu!
1/2-1/2

(16) Bacrot, E.(2730)-Tazbir, M.(2544)

Bundesliga, 2013.11.23

[CE Team]

White has a better endgame thanks to his more active pieces, but it should be quite tough to convert this advantage as Black doesn't have any weakness.

32. ♕e6+! After this intermediate check, White is able to invade his opponent's camp with the rook.

32... ♔g7 33. ♖c8 ♖e7! Black tries to kick out the annoying rook with Re8 and in case of Rc7, he continues pursuing with Re7.

34. ♖b8! A very clever move! White manages to keep his rook in Black's camp.

34...♖e8 35.♖b6 White's next step to increase his advantage is to centralize his king with f3 and Kf2-e3.

35...e4? A very logical prophylactic move to prevent the f3Kf2 plan, but this appears to be the decisive mistake. After Bacrot's precise play, the e4 pawn becomes a crucial target. [White is also better after other moves: 35...h5 36.f3 g5 (Black cannot do anything active, since after 36...♔f6?! 37.♖b7 is unpleasant as Re7 runs into Bd8!) 37.♔f2 ♔g6

38.♔e3+= The next step could be h3-g4, followed by trading the light squares bishops with Bf5-d3. Afterwards the a6 pawn becomes really weak.]

36.♖b7+! Bacrot finds a very nice simplification!

36...♖e7 37.♖b8! In two moves it becomes clear why the rooks should be traded off on the e8 square!

37...♖e8 38.♖xe8 ♗xe8

39.♗d8! This is the key move! The bishop cuts the king off from the e4 pawn. The f8 bishop also remains passive.

39...♗b5 Black prevents the simple plan Kf1-e2-e3. [Knowing what happened in the game, Black could have tried 39...h5 although it allows 40.♔f1! ♗b5+ 41.♔e1 ♔h7 Kd2 could be met by Bh6, so White needs to play 42.♗g5! ♗g7 43.♔d2

43...♗d4 Black temporarily prevents Ke3, but he leaves the d6 pawn alone... 44.♗e3! ♗e5 45.♗f4! ♗xf4+ 46.gxf4± And White will soon win the e4 pawn.]

40.g4! An excellent positional move! White squeezes the king into the corner. He is threatening with mate in two after g5 and Bf6.

40...h6

41.h4! White needs to get his pawn to g5 in order to keep the black king out of the game.

41...♔h8 42.♟f6+ ♟g7 43.♟xg7+ ♔xg7 44.g5! Great job! White not only puts his own pawn on the opposite color of the Black bishop, he also fixes the g6 pawn on the same color as his own bishop. Additionally it prevents Kf6-e5. The rest is already easy, White only needs to walk towards the e4 pawn.

44...hxc5 45.hxc5 Black resigned in material equality. He can only watch the king's march to f4 and then after Bd3, White simply plays Bh3-g2 and wins the pawn and the game. A very nice positional victory! **1-0**

Clash of the Titans

(17) Szabo, Laszlo-Botvinnik, Mikhail[E44]

EU-chT (Men) 02nd(9.1), 1961.06.30

[Miton Kamil]

1.d4 ♘f6 2.c4 e6 3.♘c3 ♟b4 4.e3 Nowadays the line with 4.Qc2 is very popular.

4...b6 Of course Black had other possibilities to develop. The main alternative is to play over d5-c5 and fight for equality in the center.

5.♘e2 [5.♟d3 5...♟b7 6.♘f3 O-O (6...♘e4) 7.O-O d5 (7...c5 8.♘a4 cxd4 9.exd4 ♖e8 10.a3 ♟f8 11.b4 a5 A very important move because after 12.b5 d6= Black wants to play Nbd7-e5 and get control of the c5 square.) 8.cxd5 exd5 9.a3 ♟d6 10.b4 With more or less equal play. In the Carlsbad structure the white bishop should be developed on g5 but in this case White's plan is Bb2-Qb3-Ne2-Ng3 and try to open the position on the queenside, which will not be an easy task if the black pawn is placed on c7.]

5...♘e4 6.♟d2 [6.♖c2 6...♟b7 7.a3 ♟xc3+ 8.♘xc3 ♟xc3 9.♖xc3 O-O Black is very solid but White has the bishop pair. White should put the bishop on g2 and he can also try to immediately play Be2 with the idea to sacrifice the

pawn on g2, otherwise Black will equalize thanks to his better development.]

6...♘xd2 7.♙xd2

7...♗b7 looks very natural, but maybe more flexible was [7...O-O And if White will push d5 Black will not need to put the bishop on b7.]

8.a3 ♗e7 [8...♗xc3 9.♘xc3 O-O 10.d5 Followed by Be2-O-O-Rd1 and White will be slightly better thanks to his space advantage and the limited bishop on b7.]

9.d5 O-O 10.g3 c5 I don't like this move because it weakens the light squares. [10...a5 A typical move. Black prevents b4 and wants to transfer the knight to c5. 11.♗g2 ♖a6 12.O-O ♗c5 13.♞ad1 a4∞]

11.♗h3 Preventing d6 and forcing Black to close the position.

11...e5

12.f4! An interesting move. White is going to get the advantage because of the bad bishop on b7. An alternative plan was for example the less aggressive O-O-e4 and then maybe to improve the knight by playing Nc1-Nd3.

12...exf4 13.gxf4 Now the black bishop will be more active but on the other hand White gets a strong center and the possibility to put pressure on the g-file.

13...d6 14.O-O-O → ♞e8 Black is activating his pieces.

15.♗g3 ♗f8 16.♞hg1 White is preparing his attack. [16.♗ce4!? 16...g6 (16...♗d7 17.♙c3 g6 And now not 18.Bxd7 because of Bg7!., but 18.♗h5!→)]

17.f5 White doesn't care about the dark squares as a quick attack is more important. 17...♗g7! → (17...♗a6 18.♞hf1 ♗xc4 19.fxc6 hxc6 20.♗f6+ ♖h8 21.♗xe8 ♗xf1 22.♙c3+-) 18.♞hf1 ♗e5 19.♗h5 gxh5 20.f6 ♖h8 21.♗g5 ♞f8 22.♙d3 with mate]

16...g6 Of course Black needs to put his bishop on g7 and try to create counterplay on the kingside.

17.♗ce4 ♗g7 18.♗g5 Almost all white pieces are already on the kingside and my intuition start to tell me that it will be hard for Black to defend.

18...♗d7 19.e4 White could have played [19.♗h5 but this move had to be based on a deep tactical calculation. 19...gxh5

(19...♙h8 20.f5 White doesn't care about the e5 square again.
20...♘e5 21.fxg6 hxg6

22.♘xf7! ♔xf7 23.♖df1+ ♔g8 (23...♔e7 24.e4+- With the idea Qg5.) 24.♖c2 ♔h7 25.♖f7+-) 20.♖g2 ♘f8 21.♘xf7 ♖f6
22.♘xd6 ♖xe3 23.♖xg7+ ♖xg7 24.♖xg7+ ♔xg7 25.♘f5+ ♔f6
26.♘xe3±]

19...b5! It is time for Black to do something on the queenside.

20.cxb5 Too slow! White should not lose any time and immediately try to mate the black king... [20.♘h5!? White could still use this idea.; 20.e5! A logical and typical idea. White sacrifices the pawn to temporarily close the bishop on g7. 20...♘b6 (20...dxe5 21.♘xf7 ♔xf7 22.♙e6+ ♔e7 23.fxe5 ♙xe5 24.♘e4 With Qg5 next.) 21.e6 f5

22.♘xf5 only 22...♘xc4 (22...gxf5 23.♘xh7 ♔xh7 24.♙xf5+ ♔h8
25.♖xg7 ♔xg7 26.♖c3+ And White will mate.) 23.e7 (23.♖g2
23...♙xb2+ 24.♔b1 ♖a5 With some amazing position usually
called "who mates first".) 23...♖xe7 24.♘xe7+ ♖xe7 25.♖ge1]

20...c4 With the idea to push c3 or activate the knight over c5.

21.♖c2 [21.e5 21...♘c5 22.♔b1 dxe5 (22...♘d3 23.e6 ♙xd5
24.exf7+ ♙xf7 25.♘xf7 ♔xf7 26.f5→ And the black king is less
safe.) 23.fxe5

23...c3 (23...♖xe5 24.♘xf7 ♔xf7 25.♖f2+ ♖f6 26.♖xc5 ♖xd5
27.♖b4 ♔g8 Black solved the practical problems and thanks to his strong bishops he got the better position.) 24.♖xc3
(24.bxc3 24...♖a5±) 24...♖xg5 25.♖xc5 ♖xe5 Black is better
here as well.]

21...♘c5 22.♔b1 Compared to the position after move 19 White didn't improve his attack and at all in the same time

Black did a good job. The position is unclear now.

22...♖d3 [22...♖f6 23.♘h5 gxf5 24.e5 dxe5 (24...♖h6 25.♖xc4) 25.♖xh7+ ♔f8

26.f5 (26.d6!? With the nice idea Qh8!) 26...e4 27.♖g2→♔e7 28.d6+ ♔d7 29.♖xg7+; 22...♗c8 A logical move because the black bishop on b7 is much worse than the white one on h3. 23.♗xc8 ♖xc8 24.♘h5 ♗h8 (24...gxf5 25.e5 ♘d3 26.♖xd3 cxd3 27.♖xd3+-) 25.♖df1 With very complex play.]

23.♖xd3? It is clear that the knight on d3 is a very unpleasant piece but to give an exchange was too optimistic. White had two other options, for example [23.♘f5 The Hungarian grandmaster had at least a few moments to sacrifice the knight on h5 or f5, it is really strange why he didn't decide to do it especially when it was probably the only way to continue putting pressure against the black king. 23...♖f6 (23...gxf5

24.♗xf5 ♖f6 25.♘h7 ♖xb2+ 26.♖xb2 ♘xb2 27.♖df1→) 24.♘g7 ♖xg7 25.f5 With Rdf1 next.; 23.♘xf7 23...♔xf7 24.♗e6+ ♔f8 (24...♖xe6 25.dxe6+ ♔f8 26.f5→) 25.♖df1 With unpleasant pressure.]

23...cxd3 24.♖xd3 a6 25.bxa6? A very bad move. White gave Black everything! He lost material, opened the b-file, activated the bishops. Instead of this White could again play [25.♘f5!? but it was the last opportunity in this game. 25...♖b6 (25...gxf5 26.♗xf5 ♖f6 27.e5 dxe5 28.♗xh7+ ♔f8 29.♗f5↑ With practical chances.; 25...♗f8 26.♖d4→) 26.♖g3 And White is still fighting.]

25...♗xa6 26.♖c2

26...♗xb2! The decisive hit. Black is simply winning now.

27.♘f5 Sorry but now it is a bit late! :-) [27.♔xb2 27...♖b6+] 27...♖b6 28.♘h6+ ♔f8 29.♘h7+ ♔e7 30.♔a2 ♗c4+ 0-1

Editorial Preface

The World Team Championship is over. The Russian Team took the trophy in a convincing style, being the better team in most of the important matches. 2nd place went to China and 3rd to Ukraine, who lost 2 matches to the Netherlands and Russia after a fantastic start.

The best players on each board were:

1st board: Aronian - Armenia
2nd board: Korobov - Ukraine
3rd board: Fridman - Germany
4th board: Nepomniachtchi - Russia
5th board: Akobian - USA

Already next week we can look forward to the start of London Chess Classic and the Mind Games where basically the whole chess elite is participating.

In the current issue we bring you the most exciting games of the World Team Championship.

Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Movsesian, Sergei(2700)**

- **Ding, Liren(2711) [E71]**

Antalya TUR(4.2), 2013.11.29

[Balogh Csaba]

After Radjabov recently switched to more calm openings from the King's Indian defence, we now have a new pioneer of the line. The young Chinese GM Ding Liren scores impressive victories with black.

1.c4 g6 2.d4 ♘f6 3.♘c3 ♕g7 4.e4 d6 5.h3 O-O

6.♗g5 Aronian employs this line with big success recently. It is not an accident that his Armenian team mate Sergei Movsesian tries to repeat it. Black has several different options here and he goes for the most common one.

6...c5 [The point of Bg5 is to annoy the black queen with the pin and at the same time prepare to trade the bishops with Qd2 and Bh6. 6...h6 would be a serious weakening. White simple retreats with 7.♗e3 and Qd2 comes with tempo.]

7.d5 e6 8.♗d3 exd5 9.exd5 White would like to get a solid positional advantage with more space. If he succeeds in finishing the development with Nf3 and 0-0, he is going to

have a long-term advantage in the middlegame. [9.cxd5 is the other main move. A few months ago Grischuk introduced a very interesting novelty by playing 9...b5!? The line needs to be tested yet, but Ding Liren was probably also about to play something like this.]

9...♘bd7! With the threat of Ne5 and White cannot save his bishop with Bc2 because of the c4 pawn. Therefore White needs to develop his knight to f3, but it allows an unpleasant check.

10.♘f3 ♖e8+

11.♔f1! In a closed position avoiding castling should not be a problem. White could do it in an artificial way later on with g3 and Kg2. Black must continue acting actively, otherwise he still ends up in a very passive and bad position. [11.♗e3 11...♗h6 is fine for Black. He is going to get a strong e5 outpost for his pieces after the pawn gets on e3.]

11...♘e5! This is basically the novelty on the highest level, but the real novelty is still to come...

12.♘xe5 ♖xe5 13.♔d2 White wanted to maintain the pin with his bishop, but he soon turns out to be the one who is pinned. [Black also gets a playable position after 13.♗f4 13...♖e8 14.♔d2 It is important that Black does not need to worry about the pin anymore and can play 14...♘h5!]

13...b5!! Black has probably prepared this brilliant resource at home. He gets adequate counterplay in all the lines.

14. ♖xb5 [On 14.cxb5 the d5 pawn becomes weak. 14...♗b7 15.♕c4 ♔d7! Threatening Qf5. If White takes on f6, the King's Indian bishop on g7 would guarantee more than enough compensation for the pawn.]

14...♗e4! This is the point of the previous move. Black has deflected the knight from controlling the e4 square.

15. ♕xe4 [15.♕xd8? is bad in view of 15...♗xd2+ 16.♔g1 ♕f5! 17.♕xf5]

17...♗xc4! ♢ Black has this strong intermediate move to grab a pawn and protect d6. Black wins back one of the bishops and obtains an excellent position.]

15...♖xg5 White has an extra pawn, but the strong g7 bishop gives sufficient compensation. White also has the worse bishop, but with the dark squared one it would be a different story... Movsesian tries to make use of the temporarily misplaced rook on g5, but actually he just starts to weaken his own position, while the rook will be saved.

16.f4? [16.g3 followed by Kg2 was preferable, but Black has no problem anyway. He might retreat his rook to e5.]

16...♖g3! The rook is entering the white camp without any fear.

17. ♔f2 ♔h4 Movsesian was probably hoping that the loss of the d6 pawn would compensate the weakened position of his king. However the defects are too big, as Nxd6 would run into Bd4.

18. ♖d1! A resourceful defence. White prepares to sacrifice an exchange in case of Bd4. Unfortunately for him, Black is able to use this bishop from another diagonal as well... [18.♗xd6? 18...♕d4 is hopeless, for instance 19.♔d2 ♕e3—+ wins for Black as he will play Qxf4+ next.]

18...♕h6! The f4 pawn is lost in any case.

19. ♗c3! White finds the best defence again, he intends to play Ne2. [19.♗xd6 would have been met by 19...♕xf4 20.♗xc8 ♕e3! 21.♗e7+ ♔f8! 22.♔c2 Otherwise Black takes the e4

bishop. 22...♖xe7—+ Despite the extra pawn, White has a hopeless position because of his king. All Black pieces are attacking as Re8 and Qf6 are coming next.]

19...♙xf4 20.♘e2

20...♙g4!! An excellent tactical blow! White has 4 different captures, but none of them works.

21.♙f3! The only move to stay in the game! [21.hxg4 21...♖xh1+—; 21.♘xf4 21...♙xd1—; 21.♖xf4 21...♙xe2+ 22.♙xe2 ♖xf4—; 21.♘xg3 21...♙xg3 22.♖d2 ♙xd1 23.♖xd1 ♖xe4—]

21...♙f5! Ding Liren keeps all his attacking pieces on the board. As long as the h1 rook is stuck in the corner, Black does not need to worry about losing an exchange. Black simply wants to play Re8 next. [21...♙xf3!? 22.gxf3 ♖e8 also looks quite tempting, but the text move is even stronger.]

22.♘xf4 [On 22.♘xg3 22...♙xg3 23.♖e2 the best move to continue the attack is 23...♙f8!—+ supporting the rook to come to e8! White has no defence.]

22...♖xf4

23.♙e4! We must really admit that Movsesian uses all his imagination to keep his position together. Unfortunately for him, his opponent keeps on playing the most energetic moves.

23...♖g5! [23...♖h4 was bad in view of 24.♙xf5 gxf5 25.♖d3! White is alive.]

24.h4 White sacrifices a pawn in order to consolidate his position, but it does not save him. [24.♙xf5 24...gxf5 25.♙g1 At first sight it looks like White is able to hold here, but after 25...f4 26.♙h2 ♙h8! 27.♖hg1 ♖g8—+ Black has a winning attack. All the pieces are pinned to the g2 pawn, while Black wants to lift his rook to g6-h6, followed by Qg4 and sacrificing on h3. It takes a lot of time, but White has no adequate defence against it....]

24...♖g4! Attacking two pieces, so White is forced to give up his c4 pawn.

25.♙f3 ♖xc4+ 26.♙g1 ♖f4! Black has an extra pawn and a winning position as the h1 rook is still out of the game.

27.♙e4 Black simplifies the game into a technically won rook endgame.

27...♔xf2+ 28.♔xf2 ♖g4 29.♙xf5 ♖f4+ 30.♔g3 ♖xf5 Black is not only a healthy pawn up, but his pawn structure is also without any weaknesses and at the same time he has clear targets on d5 and b2.

31.♖he1 ♖b8 32.♖d2 ♔f8 Preventing the invasion of the rook to e7.

33.♖e3! White tries to activate his rook. He tries to get it to a6, from where it could pin two pieces into defence, but Ding Liren finds a clever idea to save one of his pieces from passivity.

33...a5! 34.♖a3 ♖b5 A funny position, where all rooks have reached their final destination. If White moves his a3 rook, Black is able to use his b5 rook and the story is the same with the f5 and d2 rooks. The black king joins the game and decides the battle...

35.♖a4 h5 36.b3 ♔g7 37.♔h3 ♔f6 38.g3 ♔e5! The king replaces the task of the f5 rook. It pins the d2 rook to the defence of the d5 pawn and Black has a free rook now.

39.♔g2 Otherwise Black would activate his rook by playing Rf1 or Rf3.

39...f6! 40.♖a3 [If White continues waiting with 40.♖d1 Black strengthens his positions step by step: 40...g5! 41.hxg5 fxg5 42.♖d2 g4! 43.♖d1 And here the easiest way to win is 43...♖b4! 44.♖xa5 ♖d4 45.♖e1+ (45.♖xd4 45...cxd4—+) 45...♔xd5 46.♖e2 ♖d3—+ followed by Rff3.]

40...♔e4 41.♖d1 g5 [41...♖xd5 was also good enough.]

42.♖a4+ ♔e5 43.♖a3 g4 Rf3 and f5-f4 are coming next. White is hopeless and he decides to set a last trap...

44.b4 ♖xb4 White resigned in view of 45. Re3 Re4. [44...axb4?? 45.♖e3# would have been a painful turn of the game.] **0-1**

(2) Ipatov, Alexander(2630) - Kramnik, Vladimir(2793) [A46]

World Teams 2013(6.4), 2013.12.02
[Arkadij Naiditsch]

It is really difficult to beat a weaker player with Black, especially when White's ambitions are just to hold a draw. In the current game it seems like White already managed to build a "pawn wall" but with a great sacrifice Kramnik breaks White's defence.

1.d4 ♘f6 **2.♘f3** e6 **3.♗g5** Ipatov was probably a bit afraid of playing the main theoretical lines.

3...h6 A provocation. Black usually chooses 3...c5.

4.♗h4 [4.♗xf6 4...♔xf6 5.e4 would lead us to a very sharp position. White has the center but Black the bishop pair.]

4...d6 Wow! We rarely see Kramnik play so directly for the win. Of course a move like 4... d6 just cannot be good.

5.e3? What a passive move by White. 5.Nc3 or 5.Nbd2 are much more logical moves, as White should clearly try to play e4.

5...g5 **6.♗g3** ♘h5 The black bishop is going to take a nice place on g7.

7.♗d3 ♗g7 **8.♘bd2** ♔e7

9.c3 White continues trying to be as solid as possible. Of course White is not worse here, but he can slowly get into a theoretically worse position. Black is going to have the bishop pair and if he manages to develop his queenside White's position could become a bit worse.

9...♘d7 There is no need to hurry with taking on g3 as the bishop is not going to run away.

10.♔c2 I would prefer to keep the white queen on e2, but that is probably a matter of taste.

10...a6 Black of course wants to put his bishop to b7 and it would be nice to have the b5 move played to have the b6 square for the knight.

11.O-O-O?! Once again White is playing solidly but not the best move. [I think it would make much more sense to castle kingside: 11.O-O 11...b5?! And in case of the careless b5 move White always has 12.a4!]

11...b5 **12.♘b3** Directed against Bb7.

12...♖b8 Preparing to play Bb7 and to have Ba8 after Na5.

13.♔b1 [13.♘a5 13...♖b6 would not bring much for White.]

13...O-O [To play 13...♗b7 14.♘a5 ♗a8 would have been an option as well.]

14.♘fd2 White continues his passive-solid play.

14...f5! A strong move! Black is taking over the center.

15.f3 The white bishop finally wants to run away.

15...g3 16.hxg3 c5! And again Black is giving White no time to regroup and he is controlling more and more squares in the center.

17.g4 a5 b6 18.f4 Another "ugly-solid" move by White. He is giving up the last hopes of creating some sort of play and just hopes to survive the game.

18...d5 19.b4 c4! Another good decision by Kramnik. [19...cxb4 would have led to a more unclear position as after 20.cxb4 Bxb4+ 21.gdb3 White is getting quite some play on the c-file.]

20.e2

20...f6 The position is now totally closed, but it is by far not a draw. Black has a few plans to break through. One of them is clearly to build up some play on the kingside.

21.fdf1 e8d7 The bishop on e8 is going to take a very nice position, controlling both the h5 and c6 squares.

22.d1 g4 Not giving White any hopes of playing g4 at some moment.

23.b2 f7 The black rook is going to h7.

24.c1 f8 25.c2 h7 26.h2 e8 27.fh1 d7 28.b2 h5 29.c1 White was just waiting for some moves and in the meantime Black has put his pieces to perfect positions. But what to play next?! Try to make a rush on the h-file by transporting the rook from b6 to the h-file and then play Bf6 and h4?! Kramnik finds another very effective way.

29...e5!! A great breakthrough in exactly the right moment.

30.dxe5 xe5 This was Black's main idea, a piece sacrifice for just a pawn!

31.fxe5 xe5 The pawns on e3 and g3 are hanging.

32.f1 g7 And now the c3 pawn is under attack. All white pieces are just terribly placed and the 2 rooks on the h-file are totally out of play.

33.a3? After this move there is no more hope for White. [Of course White should have kept the c3 pawn by playing 33.d2 and although the white pieces just have no moves, it would not be that easy for Black to finish the game.]

33...xc3+ 34.xc3 xc3 Now Black already has 2 pawns for the piece and there is still total domination on the board.

35.d1 e6 d4 might already be a killer at some moments now!

36.c2 g6 The white pieces still have no squares. The rook

on h7 is even not giving the white knight on a5 any moves.

37. ♖d2 White decides to finally get his pieces out, but all is already too late.

37... ♜xe3 And Black got the 3rd pawn.

38. ♖d1

38... ♕f6 Black's position is totally winning.

39. ♖hh1 d4 40. ♖de1 ♜he7 41. ♖xe3 ♜xe3 What a great finish of a great game! The black pieces are totally dominating the position. We faced a very instructive game, where we saw that by trying not to cross the 4th rank it is usually not possible to hold a draw, even with a rock solid pawn structure. **0-1**

(3) Amin, Bassem(2652)

- Vitiugov, Nikita(2741) [B40]

World Teams 2013(9.1), 2013.12.05

[Arkadij Naiditsch]

We are in the last round of the World Team Championship and Russia only needed a draw to become the Champions. Instead of boring-solid play, Vitiugov is going for a game full of action and a nice sacrifice.

1.e4 c5 For many years Vitiugov was playing the French, but lately he switched to Paulsen structures.

2. ♖f3 e6 3.d3 Such a sideline is of course not giving White an opening advantage, but it is clear that White is aiming for non-theoretical play.

3... ♖c6 4.g3 ♖ge7 Black doesn't choose the main set-up. [4...d5 5. ♕g2 ♖f6 should be the main line, with a huge amount of games being played here.]

5. ♕g2 g6 It is very important that Black has not played d6 before, so the d5 move is going to be played without the loss of a tempo.

6.O-O ♕g7

7.c3!? A very logical move. White is putting a "rock" against the bishop on g7 and at the same time he wants to play d4

next.

7...O-O It is hard to understand why Vitiugov is giving White the chance to play d4-e5. [To play 7...d5 first looks much more logical to me.]

8.d4 Of course!

8...cxd4 9.cxd4 d5 Black has to fight for the center, to play a move like 9...d6 is clearly not an option.

10.e5 f6!? The position is getting very sharp. If White is in time to keep his center he should be better, but Black has active light pieces play for it.

11.♖e1 [After 11.exf6 11...♙xf6 12.♘c3 ♘f5 Black has great play because it is so difficult for White to protect the d4 pawn.]

11...♚b6 Black is starting his attack against the d4 pawn. What can be more logical?!

12.♘c3 ♘f5 The d4 pawn is hanging.

13.♘a4 ♚c7 And now the e5 pawn is under attack.

14.g4 There is no time for White to play slow moves. [14.♙f4 would not lead to anything good as after 14...g5 15.exf6 gxf4 16.fxg7 ♚xg7 the d4 pawn is going to fall.]

14...fxe5! A nice piece sacrifice. [After the more solid 14...♘fe7 15.exf6 ♖xf6 16.♙e3 White's position is already

looking better. The d4 pawn is protected and the g4 pawn is stopping Black from playing Nf5 in the future.]

15.gxf5 [15.dxe5 was of course not possible as after 15...♘h6! the black knight is going to f7 over h6, whereafter the e5 pawn is going to be lost.]

15...e4 16.fxe6! A very good decision. There was no hope of keeping the piece as Black would just get too much play for it. [16.♘g5 16...♙xd4 Black seems to be doing better here.]

16...exf3 17.♙xf3 We are facing a really strange position which is very hard to evaluate. Black's development is better, but the pawn on e6 is really unpleasant as he is stopping the development of the bishop on c8 and the rook on a8. The position remains very sharp.

17...♘xd4 [Of course Black is not in time to take the e6 pawn: 17...♚d6 18.♘c3 ♙xe6? 19.♖xe6! ♚xe6 20.♙xd5 White is winning.]

18.♙xd5

18...♖xf2!? A very interesting decision. [The more simple 18...♚e7 19.♘c3 ♙xe6 20.♖e4 ♖ad8 would also give Black good play.]

19.e7+ ♙e6 The only move.

20.♙xe6+ ♘xe6 21.♙xf2 White has to take the rook.

21...♔xh2+ 22.♖e3 What a position! White is a full rook up but his king is running.

22...♔g3+ 23.♖d2

23...♔g5+ Black gives the "right" check. All other checks would give White good winning chances.

24.♖c2 [After 24.♔e3 24...♕d4 25.♔e2 ♕xe3+ 26.♔xe3 ♔d5+ it seems like the white king cannot escape the checks either.]

24...♔f5+! Once again Black is playing correctly. White cannot escape the draw.

25.♖d2 [Of course not 25.♖b3? 25...♕d4+ 26.♖a3 ♕c2+ With a win for Black.]

25...♔g5+ 26.♖c2 ♔f5+ A beautiful draw after a very interesting fight. **1/2-1/2**

**(4) Karjakin, Sergey(2756)
- Khenkin, Igor(2612) [C65]**

World Teams 2013(5.3), 2013.11.30

[Balogh Csaba]

A convincing outplaying of the Berlin defence is a tough challenge nowadays.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.d3 A logical approach. Karjakin as the stronger player prefers to keep all pieces on the board instead of heading for the Berlin endgame after 4.0-0.

4...♙c5 5.c3 [On 5.0-0 Black has the additional option to play 5...♘d4 which is why the text move is considered to be more precise.]

5...0-0 6.0-0 d6 [I like the alternative of Black to play 6...♔e8 as Carlsen also played against Anand in the WCC match.]

7.h3

7...♘e7 Black is following the latest fashion. He transfers his knight to g6, where it is clearly better placed. Later on he can more easily achieve the central break with d5. Karjakin introduces a novelty here.

8.♙a4!? This typical move was not played yet in this position. The idea is to avoid the trade of the bishops after Bd7. He is

now ready to play Bc2 in this case. [8.d4 was mainly played before. 8...♗b6 And here are some concrete problems, for example that after 9.♖e1 (9.♘bd2 9...exd4 10.cxd4 d5 11.e5 ♘e4 12.♗d3 ♗f5 13.♙e2 ♘c6! is also fine for Black as Kramnik pointed out!) 9...d5! Black equalizes.]

8...♘g6 9.d4 As they say, the idea behind playing d2-d3 in the Spanish is to play d3-d4 in better circumstances. White needs to fight for the center if he wants to get the initiative.

9...♗b6 10.♖e1 White protects the e4 pawn and he is ready to execute the standard maneuver of the b1 knight to g3.

10...♗d7 Khenkin tries to invent some unusual handling of the position, which turned out to be not a good idea after all... [It is important that Black cannot solve the opening problems directly by playing 10...d5 because of 11.exd5 exd4 12.c4!+= and the d4 pawn is a weakness.; Black should play 10...c6 11.♘bd2 ♖e8 12.♗c2 White needs to overprotect the e4 pawn in order to continue the journey of the knight. 12...h6 13.♘f1 ♘h5∞Standard play for both sides with mutual chances.]

11.♗c2 Karjakin manages to directly show the idea of his novelty 8.Ba4. White needs this bishop to keep realistic chances for an advantage.

11...♖e8 12.♘bd2 h6 Another move that I don't like.

[It was more circumspect to free a square for the b6 bishop against the Nc4 idea with 12...a6 although White has an easier game anyway after 13.♘f1 and Ng3 next.]

13.♘c4! White gets the advantage of the bishop pair. Additionally he has the unpleasant positional idea of playing a4 before taking the bishop. In this case he is threatening with a5, which could only be prevented by playing a6, but then Black is forced to damage his pawn structure by recapturing on b6 with the c-pawn.

13...♗b5 Black fights against the a4 move by trying to force the take on b6, but Karjakin finds a clever solution to refresh the same threat!

14.♘fd2! After this excellent positional move, Black ends up in a worse position as he is unable to parry the a4 idea.

14...exd4 This was the only way to force the take on b6, but it has the drawback that Black gives up the center.

15.♘xb6 axb6 16.cxd4+= White has achieved what he wanted. He has the bishop pair and a strong center against which Black is unable to create enough pressure.

16...c5 [16...d5 would have been met by 17.e5 and White is also clearly better here.]

17.d5 [17.♘f3!? was also possible to keep the tension. White can push d5 whenever he wants, but of course the text move is also fine.]

17...♘d7 Black tries to find counterplay on the dark squares, but he really misses his dark squared bishop.

18.♗f3 The next step for White is to develop the c1 bishop to the a1-h8 diagonal. Black tries to fight against it.

18...♖f6

19.♕d2! Another strong move! White reaches the c3 square with the bishop, using the small tactical trick that the b2 pawn cannot be taken because of Rb1 and the b5 bishop is lost.

19...♗f4 20.♖h2! A strong prophylactic move! After the direct Bc3, Black could have played Qg6 with the double threat of Qxg2 and Nxh3. However after getting the king to h2, in the line Bc3 Qg6 White simply plays g3 and Black is forced to retreat as the h3 pawn is protected.

20...♕e2?! A clear sign of despair... [20...♗d3? would have dropped a piece after 21.♕xd3 ♕xd3 22.♕c3 ♖f4+ 23.g3+-; 20...♕d3!? was the best attempt, although White gets a significant positional advantage after 21.♕c3 ♕xc2 22.♖xc2 White is better on both sides. He can either play a4 followed by transferring his knight to c4 or he can initiate a central rush with g3, Nd2, f4 and later on e5.]

21.♖xe2 ♗xe2 22.♖xe2 ♖xb2 Black is doing fine materially by taking two pawns, but his position now has serious damages.

23.♖d1! Defending both hanging pieces and Bf4 is coming next with strong pressure on the d6 pawn.

23...♖xa2 24.♖xa2 ♖xa2 25.♕f4! ♗f6 [The black pawns are too slow on the queenside: 25...b5 26.♕xd6 c4 27.e5+- White has a crushing attack.; 25...♗e5 opens the way for the passed d-pawn. The most effective is to play 26.♕xe5 dxe5 27.♕b3! ♖xf2 28.d6!+- followed by Qd5. Black cannot hold the multiple threats connected to the d-pawn.]

26.♕xd6 ♖xe4 This is equal to resignation. [26...♗xe4 does not change much as White wins after 27.♕xe4 ♖xe4 28.♕c7!+- and the d-pawn runs.]

27.♕xe4 ♗xe4 28.♕g3 White has an extra piece and he still owns the d-pawn.

28...♗c3 29.♖e1! [Black resigned in view of 29.♖e1 29...♗xd5 30.♖e8+ ♗h7 31.♖xf7+-] **1-0**

Endgame section

(15) Kryvoruchko, Y.(2701)-Esen, B.(2565)

World Teams, 2013.11.30

[CE TEAM]

The material is even. White has a nominal edge thanks to the protected passed pawn on d5, but it should not be enough for the win because of the opposite colored bishops. The only threat is Qh5, which Black should parry.

37...Qe3? A natural move to force the trade of queens, but surprisingly it might be a decisive mistake... [After 37...Qe1 White can hardly make any progress and the game should quickly end in a draw as 38.Qh5?? turns out to be a blunder: 38...Qf2+ 39.Qh3 Qf1+ 40.Qg4 Qe2+- wins the queen.]

38.Qxe3 Qxe3

39.d6! White not only succeeds in advancing his pawn to d7, but also opens a straight path for his king to the c6 square.

39...Kd4 Black forces the pawn to d7 in order to be able to get closer with his king.

40.Qf3 Qe5 41.d7 Qe7 42.Qe4 Qd8 The game progresses logically. White was threatening to collect the b6 pawn, so Black transfers his king to c7.

43.Qd5 Qc7 It seems like Black was just in time to control everything, but suddenly White creates new threats...

44.Kg4! White frees the e6 square to occupy it with the king, from where he is threatening with Ke7 and also to go for the kingside pawns.

44...h6 45.Qe6 Qd8 Otherwise Ke7 wins.

46.a4! After this great move, Black suddenly finds himself in

zugzwang. His king cannot move and the pawns are blocked. Only the bishop can move, but it needs to protect the f6 pawn, so all "legal" moves allow White to get to the b6 pawn with the king. [46.♔f7 is too slow as Black is in time to play 46...♙d4 47.♔g6 ♜g1 Black holds.]

46...♙d4 47.♔d6! ♜g1 Black is looking for counterplay, but the queenside pawns are more important.

48.h4 White is going to win the b6 anyway, so why not save some pawns on the kingside.

48...gxf4 49.gxf4 h5 It is a good strategy to get rid of the kingside pawns, but it does not save Black. Otherwise if White puts his pawn to h5 and creates a new passed pawn on the queenside, he would also have the option to go for the h6 pawn. [After 49...♙h2+ 50.♔c6 ♜c7 Black gets into zugzwang again. As he has no next move he must move with the bishop and lose the b6 pawn.]

50.♙xh5 ♙f2 51.♙g6 ♙xh4 52.♙f5 The situation is cleared on the kingside, the question is if Black is able to create a blockade on the other side...

52...♙e1 [52...♙g3+ 53.♔c6 ♙c7 does not change anything because after 54.♔b7 Black is in zugzwang.]

53.♔c6 ♙d2 54.♔xb6 ♙b4 It seems like everything is still under control. However if we take a slightly closer look, we quickly realize that if it was Black's turn, he would have no useful move. Therefore the task is easy, White only needs to make a triangulation with his king.

55.♔b7 ♙d2 [On 55...♙a3 56.♔a6 ♙b4 57.♔b6 Black is in zugzwang again.]

56.♔c6 ♙b4 57.♔b6! Here we are! It is Black to move now and he is forced to drop another pawn, as Ke7 allows Kc7.

57...♙d2 58.♔xc5 The rest is already easy...

58...♔c7 59.♔b5 ♙e1 60.c5 ♙d2 61.c6 ♙e1

62.d8=♔+! The final breakthrough!

62...♔xd8 63.♔b6 ♕f2+ 64.♔b7! [64.♔xa5 is also winning automatically, but the game is more easy and more in style.]

64...♕g3 65.b4! Black resigned! A highly instructive bishop endgame! We can see that sometimes opposite colored bishop endgames are drawn even with 3 extra pawns, but in other cases one side is winning despite the material equality. Chess is a hard game. :) **1-0**

(16) Sokolov, Ivan(2625)-Akobian, Varuzhan(2625)

World Teams 2013(9.3), 2013.12.05

[CE Team]

After a nice game Ivan Sokolov managed to get a rook endgame with 2 pawns up. White's position should be winning, but how to continue, with 31.Rf1 or 31. Rb5?!

30...♖cc2 31.♖b5! A very strong move and exactly the right decision. One extra pawn is totally enough to win the game. [After the very wrong 31.♖f1? 31...♖a2 followed by Rc4 White would end up in a rook endgame with 4 vs 3 pawns, which is a theoretical draw.]

31...♖xf2 [31...♖xb5 was not helping either, as after 32.axb5 ♖b2 White is in time to bring his rook to b8. 33.♖a8+ ♔g7 34.♖b8 With an easily winning position.]

32.♖xb2 ♖xb2

33.a5! White should push his pawn as far as possible to restrict the movement of the black rook.

33...♖b7 34.a6 ♖a7 The black rook cannot move, so it is time to activate the king.

35.♔f2 ♔g7 36.♔e2 The white king is going to b5.

36...♕f6 37.♕d3 ♕e5 38.♕c4 ♕d6 39.♕b5 ♕c7

40.♖d1 [Of course a move like 40.♔c5 would also lead to a winning position, but now Black can at least activate his rook. 40...♕b8 And the black rook is finally free.]

40...h5 [40...♕b8 was losing immediately: 41.♖d8+ ♔c7 42.♖f8]

41.h4 It will end in a pawn endgame, so White is preparing a nice pawn structure for it.

41...♖a8 42.♖c1+! The last exact move, after which the game is over.

42...♕d7 43.♖a1 Now Black cannot stop White from playing a7.

43...♕c7

44.a7 The black rook has no chances of freeing itself, so White changes the game into a completely winning pawn endgame.

44...♕b7 45.e4 ♖e8 46.a8=♔+ ♖xa8 47.♖xa8 ♕xa8 48.♕c6 A nice winning technique by Ivan Sokolov ! 1-0

Clash of the Titans

(17) Yates, Frederick-Alekhine, Alexander[C13]

Kecskemet-A(8), 1927

[Miton Kamil]

1.e4 e6 2.d4 d5 3.♘c3 ♘f6 4.♙g5 dxe4 5.♘xe4 We have the Rubinstein line in the French Defence.

5...♙e7 6.♙xf6 ♙xf6 [6...gxf6 leads to more complex play.]

7.♘f3 ♘d7

8.♙d3 [8.♙d2 White is preparing the typical plan of castling queenside and putting pressure on the kingside. Now it is not easy for Black to push c5. 8...c5 9.dxc5 ♙xb2 10.♘d6+ ♔f8 11.♚d1 ♘xc5 12.♙c4 With the idea of castling and playing Qf4. White has a strong initiative.]

8...c5 A typical way to fight for the center in this structure.

9.dxc5 [9.♘d6+?! 9...♙e7 10.♘xc8+ ♚xc8 White lost a lot of time and as the king on e7 is safe Black is just better.; 9.♘xf6+ 9...♙xf6 (9...♙xf6 10.c3 cxd4 11.cxd4 O-O

12.O-O It seems like Black should be fine because of the isolated pawn and the fact that there are not many pieces on the board, but White has better development and as long as Black doesn't solve the problems with the c8 bishop White has a chance to get the initiative. Let's see some example variations: 12...♘b6 (12...b6 13.♙c2 h6 14.♙e4 ♚b8 15.♙c7± Xa7; 12...e5 Exchanging the isolated pawn but helping to finish the development. 13.♙c2 g6 14.♙e4 exd4 15.♚fd1) 13.♙e4 ♘d5 14.♘e5 ♚d8 15.♚c1 b6 16.♙d3 h6

17.♚fe1 (17.♙xd5 17...♚xd5 18.♚c7? ♙xe5—+) 17...♙b7 18.♙xd5 ♙xd5 19.♚c7† Xf7) 10.dxc5 ♙a5+ 11.♙d2 ♙xc5 12.O-O O-O And if Black manages to develop his bishop in time then the position will be equal.]

9...♘xc5 10.♘xf6+ ♙xf6 11.O-O [11.♙b5+ 11...♙d7 12.♙xd7+ ♘xd7 13.O-O And now Black doesn't need to take on b2

but after the simple 13...♔e7 followed by 0-0 he will have equalized.]

11...♖xb2 [11...O-O And Black has no problems at all.]

12.♖b1

12...♔f6! [12...♔c3 was less accurate. 13.♘b5+ ♔e7 14.♔c1 f6 15.♔f4 e5 16.♖fe1 With the idea of sacrificing the knight on e5 for a strong initiative.]

13.♘b5+ ♔e7

14.♔c1! A good place for the queen which can be activated over a3 or on the c1-h6 diagonal.

14...b6 15.♖b4 ♘b7 16.♖f4 Both sides activate their pieces. White has to hurry because his only advantage is that the king is not safe on e7.

16...♔h6 17.♘e5 [17.♔e3 17...♖hd8 18.♘e5 f6=+]]

17...f6 18.♔e3? A big mistake. White should escape with his knight but objectively Black is already better.

18...♖hf8? Black could simply win after [18...fxe5 19.♔xe5 ♖ac8 20.♖d1 (20.♖g4 20...♖hf8 21.♖xg7+ ♖f7++) 20...♖hd8 21.♖xd8 ♖xd8 22.♔c7+ ♘d7++]]

19.♘g4 [19.♘d3 19...♔g5 (19...♘xd3 20.♔xd3 ♔f7 21.♖d4 ♔g8 22.♖d7 With compensation.) 20.f3 ♘xd3 21.♘xd3 ♖fc8+ With the idea Qc5.]

19...♔g5 [19...♔g6=+]

20.♔g3 White is preparing h4 and maybe for some tricks on the c7 square. [20.h4? 20...♔xh4 21.♘xf6 ♔h6++]]

20...♖f7? seems to be good because the rook on the 7th

rank protects the position and the king can escape over the f8 square, but it is mistake. [20...h5? 21.♖f5! Xc7; 20...♖fd8 This move gives Black the advantage.]

21.♖d4 Now Black has problems with both the d6 and d8 squares.

21...♗f8 [21...e5 22.f4! exf4 23.♖xf4 ♖f8 24.♙c4 ♖e7 25.♘xf6! ♖e1+ 26.♗f2 ♖xg3+ 27.hxg3+—]

22.h4! A strong move! White avoids some ideas with f5 or h5 to exchange the queens.

22...♖f5 [22...♖g6 23.♖fd1+— And now 23...f5 doesn't work because the queen on g6 does not control the d8 square.; 22...♖h5 23.♖fd1 g6 24.♖d8+ ♖g7 25.♖xa8 ♙xa8 26.♖d8 ♘e4 27.♖f4 e5 28.♖f3 f5 29.♘xe5 ♖xf3 30.gxf3 ♖e7 31.♖xa8 ♖xe5 32.♖xa7+ ♖h6 33.♙a4 ♘c5 34.♙b3+—]

23.♖fd1 e5 [23...♙d5 24.c4±]

24.♘h6?! The idea is of course correct, but White should have started with [24.♖d8+! 24...♖xd8 25.♖xd8+ ♖e7 26.♘h6! And now White is winning after 26...gxh6 27.♖g8+—]

24...♖c8

25.♖d8+?! Another mistake! It is nice to win the queen but now Black will solve all the problems with the king. White could have kept very unpleasant pressure after [25.♖g4 25...♖c7 26.♖d6→Now White has the threat Rxf6.; 25.♘xf7 25...exd4 26.♘d6 ♖e6 27.♘xb7 ♘xb7 28.♖f3 With an unpleasant initiative over the light squares.]

25...♖xd8 26.♖xd8+ ♖xd8 27.♘xf7 ♖xf7= Now Black gets easy play.

28.♙c4+ [28.♖a3 With the idea to force some structure weakening.]

28...♙d5 29.♖g4 ♙xc4 30.♖xc4+ ♖e7 31.♖g4 ♖f8 32.♖h2 It is hard to improve the position for both sides.

32...h6 33.♖h3 ♖f7 34.♖h5+ ♖e7 35.♖g6 ♘e6 36.g3 ♖d4

37.a3

37...♖f4! What a complicated position...

38.♔g2 [38.♚d3 38...♖xf2 39.♚a6 f5 40.♚xa7+ ♔f6 41.♚xb6 ♖xc2 With the idea of playing g5 next.]

38...♖xh4=+ With his 2 pawns up Black already has good winning chances.

39.♚d3 ♖d4 [39...♖a4 was a very active place for the rook.]

40.♚a6 ♖d7 41.♚c4 [41.a4 White should have tried to create some weaknesses. 41...♖c7 (41...♘c5 42.♚b5) 42.a5 bxa5 43.♚xa5 ♖xc2 44.♚xa7+ ♖c7 Black should manage to win this.]

41...♖c7 42.♚b4+ ♖c5 43.♚e4 ♔f7 44.♚b7+ ♖c7 45.♚d5 ♔e7 46.♚e4 It is not easy to improve the position because Black must avoid the checks.

46...♘d4 47.c3 ♘e6 [47...♖xc3 48.♚b7+ ♔f8 49.♚a8+ ♔f7 50.♚d5+ ♔g6 51.♚e4+ With perpetual check.]

48.♚b4+ ♖c5 49.♚a4 ♖a5 50.♚b4+ ♘c5 51.♚g4 ♔f7 52.♚c4+ ♔f8 53.♚a2 ♖a4 Black finally manages to improve his pieces.

54.♔h3 ♔e7 55.♔g2 ♖a5 56.♔f1 ♘e6 57.♚b3 f5 58.♚b4+ ♖c5 59.♔g2 g5 Of course pushing the pawns is the only way for Black to win the game but it gives White additional

chances to create counterplay.

60.f3 [60.♚a4 60...♖a5 (60...a5 61.♚c2 e4 62.a4 At least the b6 pawn is weak now.) 61.♚c6 ♖xa3 62.♚b7+ ♔f6 63.♚h7 ♖]]

60...h5 61.♔f2 ♔f6 62.♔e1 g4 63.♔f2 White is now without hope of getting counterplay while Black will slowly improve his position and win the game.

63...♘g5 64.f4 ♘e4+ 65.♔g2 exf4 66.gxf4 h4 67.♚d4+ ♔e6 68.♚h8 h3+ 69.♔h2 ♘f6 The knight on f6 controls many important squares and White doesn't have many checks.

70.♚b8 ♖d5 71.♚c8+ ♔f7 72.♔g3 ♔g6 73.♚c6 ♖d2 74.♔h4 h2 75.♔g3 ♔h5 0-1

Editorial Preface

The match between Shirov and Dubov was not as exciting as we might have expected. The match consisted in 6 classical games and ended in a crushing result of 5-1 in favor of Shirov.

Now to the top ongoing events:

In this year's London Chess Classic we can see a mix between Top 10 players and British players. As expected after the first qualification rounds all the top players went through (Anand, Kramnik, Caruana...). Under the Top 8 are also still the two best British players, Adams and Short, who qualified in a convincing way. We can be very curious about the knock-out rounds which are starting now, especially as one of the matches will be Anand-Kramnik.

The World Mind Games are under way as well. With blitz, rapid and "2 board simultaneous" play, we can see a very interesting structure. Top players like Grischuk, Karjakin, Mamedyarov, Wang Yue and many more are fighting for the attractive titles and prize money in China.

As usual we try to bring you the most exciting games in the current issue of CEWN.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Dubov, Daniil(2629)

- Shirov, Alexei(2695) [D44]

Battle of the Generations 2013(2), 2013.12.03

[Balogh Csaba]

The Shirov-Dubov match finished with a 5-1 victory for Shirov. The young Russian played very brave and sharp chess during the entire match, but it is not necessarily a clever decision against Shirov, who could show his best chess.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 e6 5.♙g5 dxc4 The Botvinnik variation of the Slav defence is considered to be one of the most exciting theoretical lines.

6.e4 b5 7.e5 h6 8.♙h4 g5

9.♙g3 A rare continuation. Dubov probably wanted to get his experienced opponent out of his preparation. [Two weeks ago I commented another spectacular game between Kramnik and Aronian, where White went for the main line with 9.♘xg5 9...hxg5 10.♙xg5]

9...♘d5 10.h4 Another rare move by White, which already seems to pass the initiative to Black. [The main and probably the most critical move is 10.♘d2 although after Black's correct reaction 10...h5! he seems to be fine at the end of the lines.]

10...♙a5! The most natural reply. In the next two moves Shirov develops two of his pieces with tempo by putting pressure on the c3 knight.

11.♖c1 ♙b4 [11...g4!? 12.♘d2 h5 was probably an even better option for Black. He would have kept the kingside locked.]

12.hxg5! The best chance. [After the passive 12.♙c2 Black can choose between two promising options 12...g4 (Or the greedy 12...gxh4 13.♙xh4 ♙xa2! Black is going to take on c3 next and trade queen, after which White would hardly have enough compensation for the sacrificed pawns...) 13.♘d2 ♘d7 followed by Bb7, 0-0-0 and c5 looks excellent for Black.]

12...♘xc3 13.bxc3 ♙xc3+ 14.♘d2

14...♘d7! I like this simple developing move the most. If Black manages to castle queenside, he might launch a very strong attack against the e1 king by opening the center with c5! [14...h5 was less convincing because of 15.♙e2 and after Bxh5, White is threatening with Bxf7, winning an exchange.]

15.♖xh6 [After 15.gxh6? 15...♙b7+ Black achieves what he wanted. The h-pawn is excellently blockaded and Black plays 0-0-0 and c5 next.]

15...♖g8! Black rightly preserves the rooks, otherwise the h-pawn gets too dangerous.

16. ♖e2 ♖b7

17. ♖h5! White is just in time to create counterplay. He is threatening with Rxe6.

17...O-O-O! I guess Shirov did not hesitate much before making this move. The safety of his king is more important than the pawns, from now on he can focus on the attack against the e1 king, but of course White also has his resources. [17...♖f8? is a blunder because of 18. ♖xf7+! ♖xf7 19. ♖f3+ and Rxc3. Suddenly the black king is much weaker.]

18. ♖xf7 ♖xg5 19. ♖xe6

19...♖xg3! Eliminating a strong defender! After this sacrifice it is clear that the white king will never find a shelter in this game. The question is if Black will be able to focus enough pieces on the attack or if White will manage to trade a few more and consolidate...

20. fxg3 ♖xd4 [20...♖b8 was an alternative to maintain the pin. Black now intends to play Nf8 or Nb6 to threaten with Rxd4. From a practical point of view, Black's chances are much better since one mistake could be fatal to White, but objectively White might hold things together... 21. ♖xd7 ♖xd7 22. ♖d6 ♖e7 (22...♖xd6 23. exd6 ♖c8 is also interesting.)]

21. ♖xd7+! At first I thought White should not have hurried with this capture, but after a bit deeper look the evaluations have changed. [On 21. ♖h7

Black replies with the very strong 21...♖a3! 22. ♖xd7+ ♖b8! Black is a full rook down, but he has an enormous attack... (But not 22...♖xd7? 23. ♖g4 ♖xc1+ 24. ♖e2+- Suddenly White mates.) 23. ♖f1 ♖xe5 Black plays c5 and the other bishop also joins to the game. White can hardly consolidate...; 21. ♖g4 is a similar story to 21. Rh7. 21...♖xe5 22. ♖h7 ♖a3! 23. ♖xd7+ ♖b8 And once again despite the extra rook White has difficulties due to his weak king and uncoordinated pieces.]

21...♖xd7 22. e6? [White should have continued with the simplification policy: 22. ♖d6! 22...♖xe5 23. ♖xd7 ♖xd7 24. ♖f1 ♖c7 It is very difficult to judge this position. In my opinion Black has no problems at all with the bishop pair, but on the other hand the dangers around the king are gone, so White should also be fine. 25. ♖e2 ♖d6 26. ♖e4 With an unclear fight.]

22...♖e7 23.♔f1?! Another inaccuracy, but of course it is extremely difficult to play such positions over the board... [White should have prevented the subtle Qa3 idea with 23.♕f3! 23...c5 24.♕f8+ ♖d8 25.♕xd8+ ♔xd8 Black is going to win the e-pawn with Bd5 and his pawn phalanx on the queenside supported by the two bishops will start to march. Although White has decent chances for counterplay after 26.♘f3 ♗g7 27.♞h5]

23...♕a3! With the idea of Qe3, which turns out to be hard to prevent, as Qe2 or Qf3 leaves the c1 rook unprotected.

24.♘f3 ♕e3! This is what Dubov probably missed when he played 23.Kf1. Black does not need to move the bishop, he can counterattack the h6 rook.

25.♘xd4? White collapses after the previous shocking move. It is a typical thing in chess that when someone is missing such a tactical blow like Qe3, he loses the game in a few moves because of psychological factors... [White still had 25.♕d2! after which the game goes on... 25...♕xd2 26.♘xd2 ♗e3 27.♞h8+ ♔c7 28.♔e2 ♞xe6 Black's chances are better, but he needs to work hard for the win.]

25...♕xh6 26.♘f5 ♕f6! Saving the rook.

27.g4 ♞xe6 Black is not only ahead materially but his bishop also joins the game after c5 next.

28.♕d2 c5 29.♔g1

29...♕d8 With such pawns on the queenside, Black is always ready to trade queens. White is in a hopeless situation because the endgame is lost, while if he keeps the queens, his king is still very weak...

30.♕f2 ♕d5 31.g5 ♔c7! Black moves his king to b6 to avoid any kind of unpleasant checks. A very strong prophylactical decision, after which the game is practically over.

32.a4 [32.♕g3+ 32...♔b6 33.g6 would have been nicely refuted by 33...♞e5! 34.g7 (34.♘h4 34...♞g5 35.♕f2 ♞g4--+) 34...♞xf5 35.g8=♕ ♕d4+ 36.♔h2 ♞h5+--]

32...♞e5 33.♘h4 [33.♞f1 was met by 33...♞xf5 34.♕xf5 ♕xg2#]

33...♞xg5 34.axb5 ♞g4 35.♞e1 ♕d4 White resigned as he either gets mated or after the queens trade the connected passed pawns are promoting automatically. **0-1**

(2) Shirov, Alexei(2695) - Dubov, Daniil(2629) [B48]

Moscow RUS, 2013.12.07

[Balogh Csaba]

We are in the 5th game of the match, when Shirov turns to 1.e4. His first two white games started with 1.d4.

1.e4 c5 2.♘f3 e6 3.d4 cxd4 4.♗xd4 ♘c6 5.♘c3

5...♔c7 The Taimanov variation of the Sicilian is very popular nowadays. Shirov stays faithful to his style and goes for the most aggressive setup with queenside castling.

6.♕e3 a6 7.♔d2 b5 This is a rare move that doesn't have a very good reputation. [The reason why players are going for this variation with Black is the line with 7...♗f6 8.O-O-O ♕e7 9.f3 b5 10.g4 ♗xd4 and after both recaptures Bb7. This is of course just the beginning of the recent theory, but at the moment Black shows excellent results with it.]

8.♗xc6 [8.O-O-O is the most common move, but Shirov's reply is also a natural reaction on b5.]

8...♔xc6 [8...dxc6 9.O-O-O e5 is the other plan, but it looks like White can get an edge after aggressive play: 10.f4 ♗f6 11.fxe5 ♗g4 12.♕d4 ♕e6 13.♕e2 ♗xe5 14.♔e3 ♕e7 Black is just one move away to get a perfect position with 0-0, but

White plays 15.♔g3! ♕f6 16.♕c5! as it happened in the Gashimov-Bocharov, Cappelle la Grande 2007 game and the black king got stuck in the center.]

9.O-O-O A provoking move. [9.f3 9...♕b7 10.O-O-O leads to the game by transposition.]

9...♕b7 Black does not try to make use of Shirov's move order and transposes back to the main lines. [9...b4 was the critical test of 9.O-O-O. Shirov definitely wanted to use the standard Sicilian sacrifice with

10.♗d5! exd5 11.exd5 The compensation proves to be enough in all the lines. Black does not have enough time to put his king into safety. It takes too much time to develop all the pieces. 11...♔a4 12.d6! ♔xa2 (12...♗f6 13.♔e1+- is already decisive.) 13.♔xb4 ♗f6 14.♕c5+- is the most precise and Black has no defence against Re1.]

10.f3 From now on White simply wants to retreat to e2 with his knight in case of b4.

10...♔c8 11.g4 Shirov immediately launches the standard kingside attack. He is going forward with g5-h4-h5. It seems a bit slow, but actually White arrives very fast and at the same time it is much harder for Black to create something serious on the queenside, where he should attack.

11...♗f6 [11...h6 just temporarily slows down the pawn march.

White plays 12.h4 followed by developing his bishop to h3 or d3 (unpinning his rook on the h-file) and then he is ready to push g5 next.]

12.g5 ♖h5 Black develops one of his pieces and also tries to block the advancing of the pawns. Unfortunately for him, the knight soon turns out to be misplaced at the edge of the board. Shirov obviously knows all these Sicilian ideas by heart...

13.♗h3! The bishop is heading to g4! Without the trade of the d4 and c6 knights, this maneuver is risky because Black could quickly activate his knight with Ne5-c4, but of course White does not need to worry about such things anymore.

13...♗e7 14.♗g4 g6 15.♗xh5 gxh5 White has made a clear achievement by destroying the pawn structure. From now on even positionally he is doing extremely fine, but his attacking chances are also clearly preferable.

16.h4! What could be the point of this move?! Actually it is a strong positional move, fixing the weakness on h5, which turns out to be target of the c3 knight, who only needs 3 moves to get there...

16...a5 It was time for Black to search for counterplay, otherwise White plays Ne2-f4-h5 anyway.

17.♖b1! The standard Sicilian prophylaxis.

17...b4 [17...♗b4 is never serious because of 18.♗d4 White simple neutralizes the pin and also settles his bishop to f6!]

18.♗e2 a4 19.♗f4! Black is very far from creating any serious threats on the queenside, so Shirov calmly continues his plan.

19...b3 [19...a3 is even worse. 20.b3+— followed by occupying the a1-h8 diagonal with the bishop. Black has zero chance to break through with the attack.]

20.cxb3 axb3

21.axb3! As simple as that. Black is very far from occupying the a-file with the queen and rook. [The other standard method to neutralize Black's attempt is 21.a3? however it does not work here because of 21...♖c2+ 22.♖a1 ♗xa3! and suddenly Black is crushing! 23.♖xd7+ (23.♖xc2 23...bxc2; 23.bxa3 23...b2+ 24.♖a2 b1=♖#) 23...♖f8—+]

21...♗b4 Trying to deflect the queen from the c2 square, but

of course White is not forced to accept the sacrifice... [If Black connects his rooks in order to regroup them to a8 and c8 by playing 21...O-O the g7 square suddenly becomes vulnerable: 22.♖xh5 ♖a8 23.♔d4+-]

22.♔f2! ♖a8 23.♖xh5 ♔e7 [White also mates faster after 23...♔a6 24.♖f6+ ♔f8 25.♕c5+ ♕xc5 26.♔xc5+ ♔g7

And here the key is 27.♖h5+! ♔g6 28.♖f4+ ♔g7 29.♔e5+ ♔g8 squeezing the black rook into the corner as without it there is no real threat... 30.♖h5 ♔a2+ 31.♔c2 ♖c8+ 32.♔d2+- Black has no more checks.; 23...O-O loses to 24.♖f6+ ♔h8 25.♕d4+- followed by a decisive discovered check.]

24.♖f6 ♖hc8 [24...d6 is refuted by 25.♖c1! Black cannot cover the c7 square. 25...♔a6 26.♖c7+ ♔f8 Here White has several ways to win as Black has only one check on a2. The easiest is probably 27.♔f1 trying to trade queens with two extra pawns and also to deflect the defender of the b7 bishop. 27...♔a2+ 28.♔c2 ♕a6 29.♔a1+- White wins after 29...♕d3+ 30.♔xd3 ♔xb3+ 31.♖c3!+-]

25.♖xd7+ ♔xd7 [25...♔f8 loses on the spot to 26.g6! and Bh6 or Rxf7 is coming with mate.]

26.♖xd7 ♔xd7 White ended up with a decisive material advantage and it is still not clear what Black is threatening

with. The rest is just a matter of technique...

27.♕a7 A spectacular move to close the a-file and to open the queen's route to b6.

27...♕a6 28.♖d1+ ♔e8 29.h5 Shirov decided to destroy the pawn structure in order to mate his opponent more easily. [29.♔b6? would have allowed 29...♕e2 and Black gets some counterplay...]

29...♕e7 30.g6! fxg6 31.hxg6 hxg6 The e6 pawn has become a target after the pawn sacrifice.

32.♔b6 ♔f7 [32...♕e2 makes no sense now because of 33.♖d2 ♕xf3 34.♔xe6+-]

33.♖d7 ♕e2 34.♔d6 Black resigned. A typical Sicilian game, where White's attack proved to be much more effective. **1-0**

(3) Caruana, Fabiano(2782) - Sutovsky, Emil(2657) [A48]

5th Classic GpD 2013(1), 2013.12.11
[Arkadij Naiditsch]

We will see a very nice "start-finish" win by Caruana in quite a tricky position.

1.d4 ♘f6 **2.♘f3 g6** Sutovsky plays the Gruenfeld as his main opening.

3.♗f4 This is why Caruana chooses to play less theoretical lines. After 3.Bf4 we are in some sort of reversed Reti with a tempo more for White. I played it a couple of times myself.

3...d6

4.h3 White wants to avoid the future tricky line with Nh5 and secures the h2 square.

4...c5 A rare move. [One of the main lines for Black is 4...♗g7 5.e3 O-O 6.♗e2 ♘fd7 with a fast e5 push. This position should be fine for Black.]

5.dxc5! A very strong move. Usually a move like dxc5 doesn't bring much to White, but this time it is the right decision. White is better developed and is looking for fast play.

5...♔a5+ Black needs to win the pawn back.

6.♔d2 ♔xc5 7.♘c3 ♗f5? A very strange decision by Black. [It was clearly time to develop the bishop and castle: 7...♗g7 8.e4 (8.♗h6 8...O-O doesn't bring much to White.) 8...O-O 9.♗d3 With a slightly better position for White.]

8.♘d4 A very logical move, putting the knight to a central square and attacking the f5 bishop.

8...♗e4 Black is following his wrong plan.

9.♘xe4 ♗xe4 And here comes the move Black probably blundered...

10.f3! A small, but very strong move. White is in time to put the pawn on e4 and this secures a clear advantage. The h3 move is now not really useful, but Black also lost a lot of time by playing c5-Qa5-Qxc5.

10...♗c6 11.e4 e5? Another bad move. Black continues to be principal, but right here it is already not making any sense at all. [11...♗d7 was better. 12.♗e3 ♔c8 And of course White's position is much better, but Black is still fighting.]

12.♗e3 Caruana calculates with great precision! [12.♘b3 12...♔b6 13.♗e3 would also leave White with a big advantage.]

12...exd4 13.♗xd4 Now the position is getting a bit messy but it seems like it is all working out well for Caruana.

13...♗h6 Black brings his bishop into the game.

14.♕f2 The white queen is aiming for the h4 square.

14...♖a5+ 15.♗c3 And the queen and rook are still both under attack.

15...♖d8 This is probably Black's only practical chance. The idea is to close the white bishop on h8 by playing f6 next.

16.♗xh8 f6 If Black was in time to play Nd7 next, the position would be pretty unclear, but White makes things clear with his next move...

17.♕h4! Caruana is playing a perfect game. The bishop on h6 and the f6 pawn are hanging, so Black needs to sacrifice more material.

17...♗g5 18.♕xh7 ♖a5+ 19.c3 ♘d7 Black finally brought some pieces into the game, but White is already too much material up.

20.♕xg6+ ♖e7 21.h4! Caruana continues giving zero chances to Black and with this move he already has a nice finishing idea in mind.

21...♗e3 22.♗xf6+ ♘xf6 23.♕g7+ ♖e6 And here comes the key move...

24.g3! Black is hopeless against the upcoming Bh3 move, with mate or a win of material.

24...♗f2+ Sutovsky tries the last tricks.

25.♖d2 Cool and good. Black will soon run out of checks.

25...♗e3+ 26.♖c2 ♗xe4+ Nothing helps anymore.

27.fxe4 ♖a4+ 28.b3 The white king is going to hide on b2.

28...♕xe4+ 29.♖b2 ♕f3 Sutovsky gives White the chance to almost mate him! :)

30.♗h3+ A very nice game by Caruana, taking advantage of all of Black's mistakes. **1-0**

(4) Kamsky, Gata(2721) - Ivanchuk, Vassily(2731) [C41]

SportAccord Rapid Men 2013(4.4), 2013.12.12
[Arkadij Naiditsch]

A game between 2 great fighters often ends in a long outplayed endgame, but this time things went more quickly. After very risky play in the opening, Ivanchuk quickly got into trouble and was mated by Gata in nice style.

1.d4 d6 Sometimes Black uses this move order against the 1.d4 players because usually players who play 1.d4 are not going for the Pirc.

2.e4 But Kamsky does.

2...f6 3.c3 e5 In the last years Black has not been afraid of the endgame which could arise after

4.f3 [4.dxe5 4...dxe5 5.♙xd8+ ♔xd8 6.♗c4 ♔e8 And as we can see in the games, White clear has no way to achieve an advantage.]

4...bd7 And we are in the main line of the Philidor.

5.♗c4 ♗e7 6.O-O O-O 7.a4 [7.♖e1 would lead to the same over a different move order.]

7...c6 8.♖e1

8...a5 A very fighting line, even a bit risky for Black. [8...b6

would be the main move here, with the idea of playing Bb7 and a6-b5.]

9.h3 A good prophylactic move against Bg4.

9...b6 I personally think the black knight is wrongly placed on b6, but the position is pretty direct. [Another way to go on for Black would be to play 9...exd4 10.♗xd4 ♗c5 and there are still a lot of games in this position.]

10.♗f1 A very solid move. [Another option was 10.♗d3 but it is not easy to guess where the bishop is better placed.]

10...exd4 11.♗xd4 d5 That was the idea behind 9...Nb6, to play with a quick d5.

12.e5 Thinking about 12. exd5 with an about equal position is of course not an option.

12...e8 Black's idea is to play Nc7, covering the c7 square, and to push c5-d4.

13.♗ce2! A very strong move by Kamsky. The white knight goes to g3 and after Ndf5 or Nh5 it could bring Black a lot of sorrows.

13...f6?! A very risky move, even if Black's idea is totally correct. With the very nice pawn structure c6-d5, if Black was in time to crush the e5 pawn, things would look very promising. [13...♗c7 was probably a better choice.]

14.e6! A very strong move. [Maybe White could also have gone for 14.f4 14...fxe5 Black has no other choice than to give the exchange: 15.fxe6 d6 16.fxf8 xf8 (16...xf8? didn't work as after 17.h5! the e8 knight and e5 pawn are under attack.) 17.b3 And I think White should be better here.]

14...c7 [Black is not in time to win the pawn by playing 14...c5 15.f5 xe6 16.feg3 Both black bishops are hanging now. 16...xf5

17.fxf5 And White clearly has much more than just compensation for the pawn.]

15.fg3 The white knights are heading towards the black king.

15...e8 [15...c5 of course didn't work as after 16.fdf5 fxe6 17.g4 Black will lose some material.]

16.f3! Another very strong move by Kamsky. Black wants to play 16.Ngf5 Bf8, attacking the e6 pawn and at the same time protecting the g7 square from Qg4.

16...g6 Black doesn't have a choice as White wants to play Qh5 or maybe even Bxh7 Kxh7 and Qh5 followed by Kg8 Qf7 and mate.

17.g4 Another good move. White just wants to play Bxg6 next.

17...h8 Black prevented Bxg6, but here comes another blow:

18.fg5! A great and active move by Kamsky, who doesn't give his opponent the time to breathe.

18...f8 Black tries to keep things together. [Of course after 18...gxf5 19.fxf5 White mates on h7.]

19.fh4 And Nxg6 is a deadly threat. Black has no defence against it.

19...e7 Any other move was losing too.

20.fxg6+! A nice finish of the game.

20...hxg6 21.fxg6 White wants to play Bf7 next or first Qh5, the game is over. A great victory by Kamsky, who was the World Number 2 player many years ago, playing a match against Kasparov for the chess crown. **1-0**

Endgame section

(15) Giri, Anish(2734)-Nepomniachtchi, Ian(2721)

SportAccord Rapid Men 2013(1.2), 2013.12.12
[CE Team]

After a great game Black managed to get this rook endgame, but is it a winning one? Hard to say, let's see how the game developed...

40. ♖a3 ♜f6! Of course Black doesn't lose any time and moves closer to the a-pawn with his king.

41. ♔f4 White also needs to take some active measures. The white king is going for the h5 pawn.

41... ♜e6! The only way to go on for Black. [If Black got too greedy and played 41... ♖g2? to protect the h-pawn, then 42. ♖a6+! would cut off the black king! 42... ♜e7 43. ♔f5 This position is probably already a draw. In case the black king walks to b7, White will be in time to play Kf6 and Kxf7 with a draw.]

42. ♜g5

42... ♖g2+! A very important move. In case of the careless 42... Kd5 White has 43.f4! and he would have some drawing chances by playing Kf6 next.

43. ♜xh5 ♜d5 The black king is coming closer to b4.

44. ♜h6 ♜c4 45. h5 White tries to be in time and of course he needs to push his h-pawn as far as possible.

45... ♜b4 46. ♖xa2 [46. ♖a7 was also losing as after 46... ♜b3 47. ♜h7 ♖g1 and a1Q next, Black is winning.]

46... ♖xa2 47. ♜g7 The position is very forced, but Black is in time to win the game with

47... f5!! A very strong final move. While the rook is catching the h-pawn, Black is going with his king to e3 and obtaining a winning pawn endgame. White resigned as he saw no

chances, but let us take a look at one more line: 48.h6 Rh2 49.h7 Kc3 50.h8Q Rxh8 51.Kxh8 Kd3 52.Kg7 Ke3 53.Kg6 f4 followed by Kxf3. **0-1**

(16) Czebe, A.(2451)-Horvath, A.(2531)

Hungarian Championship, 2013.12.10
[CE Team]

The following very interesting endgame arose between two very good friends of mine. Black is very close to victory, but White also has his hopes thanks to the b-pawn. The winning technique should be to advance the pawns, then to sacrifice the rook for the b-pawn and then promote one of the passers with the help of the king... Such positions are very good exercises to improve our calculating skills. In the game Black was living from the half minute increments, which of course makes his task much harder.

56...f5! The pawns should be advanced together.

57.b6 f4 It seems to be over as b7 loses quite easily, but White finds a very tricky attempt to complicate matters:

58.♖b5+! [The endgame after 58.b7 58...♖h8 59.b8=♙+ ♖xb8 60.♖xb8 is losing for White because of

60...f3! The only winning move!
(60...g3? 61.♖g8 ♙e4 62.♙d6 e5

(62...f3 63.♖g4+! forces the king into the pin 63...♙e3 64.♖xg3=) 63.♙e6! And this position is a draw as the following lines show: 63...f3 (63...♙d4 64.♙f5=) 64.♖g4+! ♙e3 65.♖xg3=) 61.♖f8 (61.♖g8 61...f2 62.♖f8 g3--+) 61...♙e4 and g3 next. 62.♖g8 f2 (62...♙f4 63.♖f8+ ♙e3--+) is also good enough.) 63.♖xg4+ ♙e5 64.♖g5+ ♙f6 65.♖g8 ♙f7--+]

58...♙e4 59.♖b4+ ♙f5 Black repeats twice to gain some time.

60.♖b5+ ♙e4 61.♖b4+

61...Kf5 [61...Kf3! was the best way to win. 62.b7 (On 62.Rb3+ 62...Kf2 63.Rb2+ (63.Rxh3 loses because the pawn promotes with check. 63...gxh3 64.b7 h2 65.b8=Q h1=Q+-) 63...Kg3 White has no more checks and f3 is coming next 64.b7 Rh8 65.b8=Q Rxb8 66.Rxb8 f3 67.Kd6 f2 68.Rf8 Kg2+-) 62...Rh8 63.b8=Q Rxb8 64.Rxb8

It is a nice exercise to calculate the win for Black: 64...Kg3! (64...g3 also wins, but only if Black finds 65.Kd6 Kg2!!+- (65...g2? spoils the win because of 66.Rg8 Kg2 67.Kg5! f3 68.Kg4 e5 69.Rg7= and White just waits with the rook and holds the draw.)) 65.Kd6 f3 66.Kxe6 (66.Kg5 does not change anything, Black wins after 66...f2 67.Rf8 Kg2 68.Kg4 g3+- and f1Q next.) 66...f2 67.Rf8 Kg2 68.Kg5 g3 69.Kg4 f1=Q 70.Rxf1 Kxf1+-]

62.Rb3+

62...e5? Surprisingly this most logical move spoils the win... [62...Ke4 would have been the best to transpose to the Kf3 lines, but here it already moves into threefold repetitions.; Therefore the last winning move was the very strange and unhuman 62...Kf6!! 63.b7 (63.Rb4 63...e5 64.b7 Rh8 65.b8=Q Rxb8 66.Rxb8

In the game they got the same position but with the king on f5 and that is drawn, while now Black is winning... It is very difficult to understand chess sometimes. 66...g3! (66...f3? 67.Kd5=) 67.Kd5 g2 68.Rg8 (Here is the difference to the game: 68.Rf8+ Now Black is not forced to go to g4, but plays 68...Kg7+-) 68...f3 69.Kg4 f2+-) 63...Rh8 64.b8=Q Rxb8 65.Rxb8

If Black had provoked the move e5 with 63.Rb4, g3 was the only winning move, while with the pawn on e6 only f3 wins! Amazing! 65...f3! (65...g3? draws now as after 66.♖g8 ♕f5 67.♕d6 e5 68.♕d5 White holds.) 66.♕d6 (66.♖g8 66...♕f5 67.♕d6 ♕f4 68.♕xe6 f2 69.♖f8+ ♕e3-- g3 next.; 66.♖f8+ 66...♕e5 67.♕d7 ♕e4 68.♕xe6 g3-- One of the pawns promotes.; 66.♕c5 66...♕e5! Sheltering the king and threatening with f2 after leaving from Rf8. 67.♖f8 ♕e4 And g3 next. 68.♖g8 f2! 69.♖xg4+ ♕e5 70.♖g5+ ♕f6 71.♖g8 ♕f7--+) 66...♕f5! 67.♖f8+ (67.♖b5+ 67...e5! 68.♖xe5+ ♕f4--+) 67...♕e4 68.♕xe6 g3--+]

63.b7 ♖h8 64.b8=♔ ♖xb8 65.♖xb8 And White holds now in all the lines:

65...g3 [65...♕e4 66.♖b4+! It is important to let the white king approach to the pawns. 66...♕e3 67.♕d5=; 65...f3

66.♕d5 g3 (66...♕f4 67.♖b4+! ♕g3 68.♕xe5 f2 69.♖f4=) 67.♖f8+ ♕g4 68.♕e4 f2 69.♕e3 ♕h3 70.♖xf2! Just in time, otherwise White loses. (70.♕e2? 70...♕g2 71.♖f7 e4 72.♖f8 ♕g1! 73.♖f7 e3!--+ and g2 next.) 70...gxf2 71.♕xf2 ♕g4 72.♕e3=]

66.♕d5! g2 [66...f3 transposes to the 65...f3 line]

67.♖f8+! The only move once again.

67...♕g4 68.♖g8+ ♕f3 69.♕xe5 ♕f2 70.♕xf4 g1=♔ 71.♖xg1 ♕xg1 Nice save by White! In such endgames we can only play well if we calculate flawlessly, there is no theoretical position to learn, only pure calculation! **1/2-1/2**

Clash of the Titans

(17) Fischer, Robert James - Benko, Pal C[C95]

USA-ch(4), 1965

[Miton Kamil]

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1 b5 7.♙b3 d6 8.c3 O-O 9.h3 We have the main position of the Ruy Lopez.

9...♘b8 The Breyer system is still very solid and popular nowadays.

10.d4 **bd7**

11. ♖h4!? An original idea. White immediately creates some threats on the kingside but without developing the queenside it should be too artificially. The main move is [11. ♖bd2 11... ♕b7 12. ♕c2 ♖e8 13. ♖f1 ♖f8 14. ♗g3 g6 Black's position is very solid but of course thanks to a bit more space White has a long term small plus. The plan now is to improve the position on the queenside after b3-Bb2 or a4. The idea to play Bg5 in order to provoke h6 deserves attention too.]

11...♖b6 Black has a few other options:
 [11...♖xe4 This move should be checked first. 12.♗f5 ♖df6
 (12...♗ef6 13.dxe5 dxe5

14. ♖h6! It looks that White gets the initiative now: 14...gxh6
 15. ♖f3 ♗c5 16. ♖g3+ ♗g4 17. ♖xg4+ ♕g5 18. ♕c2 ♖f6 19. h4 e4
 20. ♗xh6+ ♖xh6 21. ♖xg5+ ♖xg5 22. hxg5 ♕f5∞) 13. ♖f3 ♕b7
 (13...♕xf5 14. ♖xf5 g6 15. ♖f3 exd4 16. ♖xe4 ♗xe4 17. ♖xe4+=)
 14. ♕c2 ♗c5 15. ♖g3 ♗e6 16. dxe5 dxe5 17. ♗xe7+ ♖xe7
 18. ♖xe5 ♖ad8 White has the bishop pair but a worse
 development doesn't allow him to take advantage of this
 fact.; 11...♕b7 12. ♗f5 ♕xe4 13. ♖xe4 ♗xe4 14. ♕d5±; 11...g6
 This simple move looks fine too. 12. ♕h6 ♖e8∞]

12. ♘d2 c5 A normal move. Black is fighting for the center.

13.dxc5 dxc5

14. ♖f5 It is time to exchange one of the bishops. [14. ♔f3?!
14...c4 15. ♗c2 g6! XNh4 16. ♘f1 ♞e8]

14...xf5 [14...e8 15.f3 f8 16.f1+= The knight is already

on f5 so White has the typical initiative on the kingside.; 14...c4 15.♘c2 ♘c5 16.♚f3+= With the idea Nf1 and putting pressure on the kingside, which we can also see in Italian games or Berlin systems with d3.]

15.exf5 ♚c7 [15...c4 This move is needed anyway so it was better to play it immediately.]

16.g4↑ A logical move. White is putting pressure on the kingside. [16.c4 It was an interesting idea to win more light squares: 16...♘e8 (16...♚ad8 17.♚e2+=)]

16...h6 Temporarily stopping the pawns advance but in the future it will be more easy for White to open the h-file for the attack. [16...c4 17.♘c2 ♘fd5 18.♘e4 ♚ad8 19.♚f3↑]

17.h4 c4 18.♘c2

18...♘h7?! Objectively this is the best set-up to stop the

g5 break but putting the knight on h7 is very passive and has other disadvantages. More logical was [18...♘fd5 Black should be looking for counterplay on the queenside or over the d-file. 19.♘f3

19...b4!

There is no time to lose, otherwise g5-f6 will crush Black's position. 20.f6! An interesting idea to create pressure while winning tempi. (

a) 20.cxb4 20...♚ad8 With Nxb4-Nd3 next.;

b) 20.♘d2 20...bxc3 21.bxc3 ♘c5 22.g5 ♚ad8 (22...e4 23.♘d4∞) 23.gxh6 ♘xc3 24.♚c1 e4 With a very complicated position.)

20...♘xf6 (20...♘xf6 21.g5 hxg5 22.hxg5 ♘e7 23.♘xe5 ♘c5 24.cxb4 ♘xb4 25.♘e4 The bishop is very important. 25...♚ad8 26.♚g4 ♚fe8 27.♘f4 ♘d6

28. ♖h7+! A nice tactical idea. 28... ♔xh7 29. ♕h5+ ♔g8 30. ♖xf7 Now Qxf7 doesn't work because of g6 and mate. 30... ♖xf4 31. ♖xd8 ♖e7 (31... ♖xd8 32. ♖e8+ ♖xe8 33. ♕xe8+ ♔h7 34. ♕h5+ ♔g8 35. ♖e1+- XKg8) 32.g6 ♖h6 33. ♖e6→ With a strong attack and the knights are too far to help the black king.) 21.g5 hxg5 22.hxg5 ♖ad8 23. ♕e2 ♖fd5 24. ♖xe5 ♖c5∞]

19. ♖f3 f6 Black managed to stop g5 but now the knight on h7 is out of play and the light squares are weak.

20. ♖d2 White can now improve his set-up a bit. 20... ♖ad8 21. ♕f3

21...h5? The decisive mistake! It is hard to explain this weak move. White is going to win the game now thanks to the attack over the g-file. [21... ♖d7 Of course it is hard for Black to take advantage of the d-file but the idea of doubling rooks is not stupid for the future. 22. ♖e4 ♖fd8 At some moment the idea Rd3 might work.

23.g5 Now the g5 break doesn't give White any advantage, he should rather try and somehow improve his position on the queenside. (23.a4 23... ♖xa4 24.b3 cxb3 25. ♖xb3+ ♔h8 26. ♖xa4 bxa4 27. ♖xa4 ♖c6; 23.b3!?) 23...hxg5 24.hxg5 ♖xg5 25. ♖xg5 ffg5 26.f6 gxf6 27. ♖xf6+ ♖xf6 28. ♕xf6 ♖d6 29. ♕xd6 ♖xd6 30. ♖xe5 ♖d5=]

22.gxh5 ♖d5 23. ♖e4 ♖f4 24. ♖xf4 exf4 25. ♖h1 With a simple final attack on the g-file.

25... ♖h8 26. ♖g1 ♖f7 27. ♖g6 ♖d6 28. ♖ag1 ♖f8 Black was not able to create any counterplay and the white pieces are very well coordinated.

29.h6 ♖e5 30. ♖g4 ♖dd7 31.f3 White is in no hurry.

31... ♖c5 32. ♖xc5 ♖xc5 33. ♖xg7 ♖xg7 34.hxg7+ ♔g8 35. ♖g6 ♖d8 36. ♖e4 ♖c8 And now comes the nice tactical move..

37. ♖e8+! 1-0

Editorial Preface

We just had a fantastic week of chess, with almost all of the best players being active somewhere in the world.

The London Chess Classic was won by Nakamura. In the semi-finals he defeated Kramnik, where he got very lucky to win an almost lost endgame, but afterwards he dominated Gelfand in the final, winning the 1st game convincingly and easily drawing the second one. The open was won by J.L.Hammer, who was the second of Magnus Carlsen during his match against Anand.

In the World Mind Games we saw 3 different chess variations: Rapid, Blitz and Basque (this new variation where you play against the same opponent on 2 boards at the same time is a replacement for blindfold chess).

And here are the winners:

Basque: Karjakin, Mamedyarov, Ponomarev
Rapid: Wang Yue, Leko, Grischuk
Blitz: Karjakin, Aronian, Vachier Lagrave

And the women winners:

Blitz: Hou Yifan, Gunina, Muzychuk Anna
Basque: Zhao Xue, Hou Yifan, Yu Wenjun
Rapid: Gunina, Hou Yifan, Yu Wenjun

At the moment we can follow the World Youth Championships in Al-Ain. An event with around 2000 participants!

We want to wish everyone a Merry Christmas, a great celebration and of course many presents :) .

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Mamedyarov, Shakhriyar(2757)**

- **Karjakin, Sergey(2756) [D90]**

SportAccord Rapid Men 2013(7.4), 2013.12.13

[Arkadij Naiditsch]

Mamedyarov is probably one of the most fighting players currently. In some of his interviews he even said: "I just don't know how to make draws"! And of course he didn't disappoint his fans in this game either. After an interesting opening White quickly takes over and ends the game with a sparkling attack.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 Even Karjakin started to play the Gruenfeld.

4.♘f3 ♗g7 5.h4 A shocking looking move, but in fact it is almost the "latest fashion". White is preparing to play h5 as soon as the knight from f6 will move. At the moment White wants to play cxd5 and after Nxd5 to push the very unpleasant h5.

5...c6 [5...dxc4 is the other main option.]

6.♗g5 With this move White sort of changes his strategy to a more calm one. The idea is now to develop the pieces by playing e3-Be2 and hope that the h4 move will be useful someday. **6...♘e4** What can be more logical than to chase

the bishop from g5.

7.e3 It is hard to believe for me that Black can be worse with the bishop pair. [An interesting try could have been 7.♗f4!?]

7...♘xg5 There is no reason to think twice about such a move.

8.hxg5 I think we reached the first critical position.

8...e6? This move just looks terrible to me. Black is closing his own bishop without any reason and it is clear that he will not be in time to play c5 next. White doesn't lose any time and immediately shows where the problems of Black's position are. Now White just wants to play e5 next, so Black is almost forced to take on e4. [8...O-O looks much more logical. It is hard to imagine that White is in time to bring his queen to the h-file, which means that the position should be quite unclear.]

9.e4! dxe4 10.♘xe4 ♔a5+ is probably Black's only chance, as keeping the queens on the board with such an open king position would not lead to anything good.

11.♔d2 ♕xd2+ 12.♙xd2 Let us take a fresh look at the position. White's pawn structure is better and even though Black has the bishop pair, the hole on d6 and much more active pieces promise White very nice play.

12...♘d7 Black is still hoping to play c5, which would finally open the g7 bishop.

13.c5! Mamedyarov continues being principal and playing

against the bad bishop on c8.

13...h5?! The idea of this move is of course correct, it is nice to get rid of the threats on the h-file, but it gives White a full move to create new threats. [13...O-O followed by e5 would at least leave Black with some hope.]

14.b4 Securing the pawn structure, which is very important to keep the black pieces passive, but White was clearly not in a hurry to play it immediately. Maybe 14.Bc4 would have been a better choice.

14...O-O 15.♘c4 Already taking steps of preparation against e5, after which the pawn on f7 is going to become White's target.

15...♖d8 16.♙e3 e5 This move is premature. [Black should have included 16...a5! 17.a3 and only now 17...e5 The possibility of axb4 would give Black some extra chances. Of course White should still be better here.]

17.♘d6 As expected White is going for the f7 pawn.

17...exd4+

18.♙f4 Another important move. The white king not only finds himself in a safe position on f4, but he also takes away Black's opportunity of playing Ne5 next.

18...♘f8 [A very passive move like 18...♖f8 19.♖ae1 followed

by Re7 would lead to an almost winning position for White.]

19.♘xf7+ [19.♘xf7 19...♙e6 20.♘xd8 ♙xc4 Black has good practical chances here.]

19...♙h7 20.♖ae1 White brings his last passive piece into the game.

20...a5 And of course Black needs to look for some counterplay.

21.♘h2?! What a funny move! White just wants to play g4 next. But this kind of creativity was not really needed. [After the much more simple 21.♖e7 21...♖d7 (21...axb4 didn't help either since after 22.♘xc8 ♖axc8 23.g4 White is mating on the h-file.) 22.♖he1 axb4

23.♘e8 it is hard to imagine Black surviving.]

21...axb4 [White is probably also better after 21...d3 22.g4 d2 23.♖e4 and somehow White has covered all of Black's ideas.]

22.g4 It is very hard for Black not to get mated here.

22...♖xd6? Karjakin panics. [Black should have continued staying cool: 22...d3 23.gxh5 gxh5 24.♘f3 Even if Black's position looks lost, things are actually much more complicated. 24...♙g4! With a very complex position.]

23.cxd6 White is not only an exchange up, but he also has a strong passed d-pawn. Black's position is lost.

23...♖a5 24.♖e7 To put a rook on the 7th rank is never wrong.

24...d3 25.gxh5 White is finally opening the h-file.

25...gxh5 26.♗f3 ♕g4 Black defended from an immediate mate, but the problems on the 7th rank are unsolvable.

27.♗h4 With the threat of playing f3 next, a deadly threat...

27...♖xg5 The last trick.

28.f3 White is of course not falling for it! [Of course not 28.♖xg5?? 28...♕h6+ 29.♖f6 ♕g7+ 30.♖g5 ♕h6+ with a draw!]

28...♕f6 29.fxg4 White is already a full rook up.

29...♖xg4+ 30.♖f5 ♖xh4 And here comes the pretty

31.♖xf6 A very nice win by Mamedyarov, with good strategic play followed by a nice attack. **1-0**

(2) Anand, Viswanathan(2773)

- Kramnik, Vladimir(2793) [D40]

5th Classic KO 2013(1.2), 2013.12.14

[Balogh Csaba]

We are already in the KO part of the London Chess Classic rapid tournament. The first encounter between the two former World Champions was drawn, while in the second game Kramnik crushed Anand convincingly with the black pieces. Let's examine how it happened...

1.♗f3 d5 2.c4 e6 3.d4 ♗f6 4.♗c3 c5 Kramnik employs his favorite Tarrasch defence, like he often did throughout the entire year.

5.e3 Anand aims for a complex line by keeping all pieces on board. [The main line continues with 5.cxd5 5...♗xd5 6.e4 ♗xc3 7.bxc3 cxd4 8.cxd4 ♕b4+ 9.♕d2 ♕xd2+ 10.♖xd2 O-O The position has simplified a bit. The current theory evaluates Black's chances to be fine.]

5...♗c6 A symmetrical opening which requires many subtleties for both sides. In the following moves both players are intending to make their most useful developing moves without touching the f1 and f8 bishops in order to avoid the loss of an important tempo after Black takes on c4 or White on c5.

6.a3 With the idea to take on c5, followed by playing b4 and

fianchettoing the bishop.

6...a6 Black continues his symmetrical policy. The idea is the same as it was in White's previous move.

7.dxc5 White follows the main line and breaks the balance.

7...♙xc5 8.b4

8...♙d6 However this is a sideline, which will most likely become Black's main reaction after our present game. [The main move is 8...♙a7 9.♙b2 O-O 10.♙c2 followed by Rd1. White might hope for an edge according to the theory.]

9.♙b2 Anand plays like in the 8.. .Ba7 line. [Now or in the next move, White usually creates an isolated pawn by playing 9.cxd5 9...exd5 10.♙b2 (10.♙xd5?? obviously never works because of 10...♙xd5 11.♙xd5 ♙xb4+!-+) 10...O-O 11.♙e2 Now Black's most active arrangement of his pieces is 11...♙e8 12.O-O ♙g4 with active play for the isolated pawn.]

9...O-O 10.♙c2 White does not hurry to take on d5 to avoid the quick development of the c8 bishop to g4, while as we already mentioned he intends to make all the useful developing moves before touching the f1 bishop.

10...♙e7 11.♙d1 ♙d8

12.♙e2 Anand finally decides to move his bishop, as he could not find any further improvement of his position. [Slightly more promising was 12.cxd5 12...exd5 13.♙e2 although after 13...♙e6! (13...♙g4 could be met by 14.♙g5! and on 14...♙xe2? 15.♙xd5! wins the game as White mates after Qxh7.) 14.O-O ♙ac8 15.♙b1 ♙b8↪ Black could play Bg4 next with a very active position.]

12...dxc4! Kramnik immediately takes the pawn and wins a tempo as the bishop has left the f1 square.

13.♙xc4 b5 14.♙d3 ♙b7 15.♙e4 Anand tries the only and most direct attempt to fight for an advantage, but it is going to backfire. [Even after 15.O-O Black seems to get the upper hand after 15...♙ac8 16.♙b1 ♙e5! 17.♙xe5 ♙xe5 18.♙e2 ♙c7 19.♙xe5 ♙xe5 Black has the initiative thanks to his better pieces.]

15...♙xe4 16.♙xe4 White attacks two pieces at the same time, but Kramnik's counterplay arrives just in time.

16...Rac8! Pinning the queen makes the capture on h7 very risky.

17. ♖b1? It seems like after this most natural move, Black gets a significant advantage. [White should have gone for the critical 17. ♕xh7+ 17... ♖h8 18. ♖b1 Black needs to act urgently, otherwise he ends up with a pawn down. 18... ♗xb4! 19. axb4 ♕xb4+ 20. ♖e2 f5! Trying to trap the h7 bishop and also threatening with Be4. White is forced to give back his extra piece. 21. ♕xf5! (21. ♕g6? loses to 21... ♕e4 and Rc2 next.) 21... exf5 22. ♖xf5 White has an extra pawn, but his king on e2 allows Black to create counterplay. It looks like the game might finish with a forced perpetual check after 22... ♖f8 23. ♖h3+ ♖g8 24. ♖d7

And now: 24... ♕d5! 25. ♖xe7 ♕c4+ 26. ♖d1 ♕b3+ 27. ♖e2 ♕c4+=]

17...f5! 18. ♕d3 [18. ♕xc6 does not come into consideration as Black gets too strong on the light squares. 18... ♕xc6+]]

18...a5! Very strong play by Kramnik. After some less ambitious moves White consolidates with 0-0, but now he is just missing a tempo to solve the problems.

19. bxa5 [19. ♕xb5 could have been met by 19... ♕xb4+! winning a pawn and White does not have enough compensation. 20. ♖e2 (20. axb4 20... ♖xb4+) 20... ♕xa3+]]

19... ♗xa5 20. 0-0 [White does not have time to grab the pawn as after 20. ♕xb5 20... ♕e4 21. ♕d3 ♕xa3! 22. ♕xa3 ♖xa3 Black wins material because of 23. ♕xe4 ♖xd1+ 24. ♖xd1 ♖c1—+ This is the punishment for not connecting the rooks.]

20... ♗c4! The strongest move again. Black increases the pressure by improving his pieces. [20... ♕xf3 is less convincing. 21. gxf3 ♖h4 22. f4 Black has a perpetual, but to get more than that is difficult.]

21. ♕e2 [21. ♕xc4 21... bxc4+ is also quite hopeless. The c-pawn and the bishop pair, combined with the potential attacks after Bxf3 are just too strong.]

21... ♕e4! Activating the bishop with tempo and also preparing for the invasion of the rook to c2.

22. ♖a1 ♗xb2 23. ♖xb2

23...b4! And the game is suddenly over! Black creates a decisive double threat of Rc2, winning the bishop, and the simple bxa3. [On 23... ♖c2 White had 24. ♖xb5 and he is alive.]

24.axb4 [24. ♗d4 24...bxa3—+ is equally hopeless.]

24...♖c2 25. ♖b3 ♖xe2 26. ♗d4 Anand tries to complicate the matters a bit, but unfortunately for him Black has

26...♗d5! 27. ♖d3 ♖h4 [White resigned in view of the following lines: 27... ♖h4 28.h3 (28.g3 28... ♗xg3) 28... ♖g5 29.g3 ♗xg3—+ White gets mated in few moves.] **0-1**

(3) Wang, Yue(2723)

- Ponomarev, Ruslan(2731) [D91]

SportAccord Rapid Men 2013(1.3), 2013.12.12

[Balogh Csaba]

Wang Yue won the rapid section of the World Mind games. Let's analyze one of his victories.

1.d4 ♗f6 2.c4 g6 3. ♗c3 d5 A little surprise. Ponomarev chooses the Gruenfeld defence, which does not really belong to his main repertoire.

4. ♗g5 ♗g7 5. ♗f3 ♗e4 This is considered to be the right setup against the Bg5 systems.

6. ♗h4 ♗xc3 7.bxc3 dxc4 8.e3 b5 Black won a pawn, but White has a stable center and he can create strong counterplay on the queenside with a4. As we will see White gets good compensation for the sacrificed pawn. Quite an atypical line for the Gruenfeld defence, as usually Black plays against the center with active piece play, while here he took a pawn and intends to preserve it for as long as possible.

9. ♗e2 [A more common move order is 9.a4 9...c6 10. ♗d2 White is threatening with axb5 cxb5 Qf3, trapping the a8 rook. 10...a6 11. ♗e2 O-O 12.O-O (On 12. ♗f3 Black has 12... ♖a7! 13.O-O ♗f5 as Kasparov played back in 1997.

His opponent allowed him to settle the bishop on d3, but even if White plays 14.e4 ♖c8 the position would be perfectly fine for Black. Having provoked the e4 push is a huge achievement, from now on Black can play on c5 because the center is weakened. White also needs to forget about the Ne4-c5 plan, which is a common idea in this line.) 12...♔c7 With the idea of playing e5! 13.f4

13...♘d7! Black wants to consolidate on the light squares with f5 and Nf6, maybe even Be6-d5 later on. 14.e4 again weakens the d4 pawn and Black immediately makes use of it by playing (14.f5 14...♘f6; 14.♕xe7 14...♖e8 and the e3 falls.) 14...c5!]

9...♘d7 [For Black it seems to be better to play 9...a6 10.O-O O-O 11.a4 c6 12.♘d2 and we transposed to the 9.a4 line.]

10.a4 c6 11.♘d2! The standard regrouping in this line. The knight frees its square for the bishop and goes to e4-c5 or attacks the c4 pawn as it happens in the game.

11...a6 [11...O-O? was bad in view of 12.axb5 cxb5 13.♕f3± After winning back the pawn on a7, White achieves a perfect position.]

12.♕f3 ♕b7 13.O-O O-O

14.♔b1! An extremely strong subtle move. White creates the simple threat of Nxc4 by pinning the bishop and it turns out to be very difficult to parry.

14...♖b8 Black protects the bishop, but it moves into Bg3. [14...♘b6 would have been met by 15.♘e4! and the knight becomes highly unpleasant on c5! 15...♘d7 already runs into 16.♘d6!± winning back either the c6 or the e7 pawn.]

15.axb5 The only inaccuracy by White in this game. We will get the point a few moves later. [White should have played like in the game, but without including the axb5 axb5 pair of moves. 15.♖d1! 15...♖e8 16.♕g3 e5 (The difference is that 16...♖a8 makes no sense now because of 17.♘xc4!±) ; 15.♕g3 directly is premature because of 15...e5]

15...axb5 16.♖d1! White prepares to play Bg3, when Black's normal reaction is e5 and then the rook is going to be very well placed on the opening d-file.

16...♖e8 17.♕g3

17...e5? The most natural reaction, but a big mistake. Ponomariov underestimates the opening of the d-file. [Because of the opened a-file, Black had the option of playing 17...Ra8! without fearing Nxc4. Black is suddenly fine.]

18.dxe5! fxe5 Black still doesn't feel the danger of the pin... [18...fxe5 was better even if it immediately gives back the pawn. 19. Qxc4 Re7 20. Qxe5 fxe5 21. Ra7! fxe3 22. hxe3 Ra8 23. Ra2+= White is slightly better thanks to his more active pieces.]

19. Qe4! The main threat is Rxd7 Qxd7 Bxe5 and Nf6 wins next.

19...fxc8?! The decisive mistake. [a) 19...fxg3? is refuted by 20. Rxd7!+- winning a piece.;

b) 19...Kg7! was the only move to leave from the Nf6 check. 20. Qd6! (20. Qc5 wins material, but Black gets very strong counterplay after 20... Qxc5! 21. fxe5+ Rxe5 22. Rxd8 Rxd8 and suddenly Black is out of danger. Black is materially almost fine and also has a target on c3, which could be attacked by Na4 and Rd3.) 20...fxd6 21. Rxd6 With more than enough compensation for the pawn. The position has opened up and the bishop pair starts to work. 21...Re7 22. Ra7+=]

20. Ra7! Black is totally pinned! He cannot avoid losing material.

20...fxg3 [20...Rb7 drops the piece after 21. Rxb7 fxb7 22. fxe5 Rxe5 23. Rxd7+- Re7 24. Qf6+; 20...Rb6 loses to 21. Rxd7+-; 20...Kg7 gives one more move to strengthen White's position: 21. fxe5+ Rxe5 22. Qd6 Re7 23. fxc6+- The game is over.]

21. hxe3! As simple as that. White now threatens to take twice on d7 and play Nf6. [White should not be too greedy with 21. Rxd7 21...fxd7 22. Rxd7 Suddenly Black overtakes the initiative after 22...fxf2+! 23. Qxf2 Rh4+ 24. Qg1 Re6+= and Rae8 next. Black has two pawns and a rook against two minor pieces and White cannot create real threat against the king.]

21...Re6 [21...Kg7 loses to 22. Qd6 Re7 23. fxc6+-]

22. Qc5! Rb6

[22...Re7 23. fxc6+-] Ponomariov had pinned his hopes on this move, but it does not save Black. Wang Yue finds the refutation:

23. Nxd7! Qxa7 24. Nxb8 Qxb8 25. Rd8+ Kg7 26. Qb4!
+— The key move, which had to be foreseen. Black cannot parry the threat of Qf8 and the c8 bishop is lost.

26... Kf6 27. Qf81-0

(4) Wang, Yue(2723)

- Nepomniachtchi, Ian(2721) [A04]

SportAccord Basque Men 2013(4.1), 2013.12.18

[Arkadij Naidtsch]

The game quickly left the theory and then Black decided to grab a pawn, which was a very risky decision. Wang Yue did great in the complications, which was rewarded with a clearly winning position.

1. Nf3 c5 2. c4 Nf6 3. g3 d5 Lately Nepomniachtchi played a lot of games in this line, with both White and Black.

4. cxd5 Nxd5 5. Bg2 Nc6 6. Nc3 Nc7 A solid move. [Just a few months ago Kramnik played 6...g6 7. Ng5!? A very interesting new move which we will clearly see in a lot of future games.]

7. a3! I like this move a lot. White is trying to immediately get play on the queenside. It is very hard for Black to stop White from playing b4 next.

7... Bb8 [After 7...e5 White can simply play 8. b4 and now Black cannot win the pawn on b4 by playing 8...cxb4?! 9. axb4 Bxb4 because of 10. Nxe5! Nxe5 11. Qa4+ and White is much better.]

8. b4 cxb4 The start of a very risky plan by Black. [8...e6 was still not bad, with a slightly worse position for Black.]

9. axb4 b5 It is logical to block the white pawn on b4, but now a lot of black pieces are pretty dangerously placed and it is also not going to be easy for Black to escape with the king from e8.

10. O-O e6

11. ♖b2! Another strong move by White. Wang Yue doesn't care about the b4 pawn and is playing for the initiative.

11... ♗b7 [After 11... ♖xb4 12. ♘a2! With a double attack on g7 and Nxb4. 12... ♗f8 13. ♔c2 White has huge play for the pawn.]

12. ♘e4 Now the f8 bishop will not go anywhere...

12... ♖xb4 At least Black will suffer being a pawn up.

13. ♔b1 A nice move. Now the rook from f1 is going to take a very good position on c1.

13... a6 14. ♔c1 ♘bd5 All white pieces are almost perfectly placed, but Black's position is also looking pretty solid, so how to continue?!

15. h4!? An interesting decision. White does not hurry to force anything and improves his position. [Maybe a move like 15. ♔d3 could also have been an option.]

15... ♖c8 The bishop from f8 cannot move, which means that Black will not castle kingside...

16. h5 h6 White has provoked Black into playing h6 and now we will see why it is so useful for White...

17. ♘e5! If White had tried to play Ne5 before, Black had a move like f6 and now f6 is never possible because of the weakness on g6.

17... ♖g8 This move cannot be good, but it is already hard to give Black any advice. White completely dominates the game.

18. ♘c5 The most simple solution.

18... ♗xc5 19. ♖xc5 ♗g5 20. ♔c1 [20. ♔h7 looks even stronger as after 20... ♖f8 21. ♖ac1 Black cannot defend all his pieces on the c-file.]

20... ♘f4 Black is trying his last tricks.

21. ♗f1 Solid and simple. [21. ♖xc7 was leading to a much trickier win: 21... ♘xe2+ 22. ♗f1 ♘xc1 23. ♗c6+! But these kind of moves are hard to play in the game.]

21... ♔xh5 It seems like Black is a little bit back in the game, but his position is just lost.

22. ♘f3! Defending the h1 mate and at the same time the rook from c5 is attacking the black queen.

22... ♘fd5 23. e4 Black cannot avoid losing some material on the c-file.

23...♙xf3 24.♖g2 Now White is ready to take the black pieces.

24...♔e2 25.exd5 ♚d7! A very creative defence, but unfortunately for Black nothing can stop White from winning the game...

26.d6! Pretty and easy to find.

26...♞d5 27.♙xd5 Black's problem is the c7 square.

27...♔xd6 [27...♗xd5 28.♖c7+ and mate in 2.]

28. ♟xb7 A very nice game by Wang Yue which clearly shows how dangerous it can be to play without having castled, especially when your opponent has at least one open file for the rooks. **1-0**

Endgame section

(15) Kamsky, Gata(2721)-Dominguez Perez, Leinier(2754)

SportAccord Blitz Men 2013(1.4), 2013.12.14
[CE Team]

We are in a deep endgame and Black is very close to making a draw. Of course White is a pawn up, but the opposite colored bishop endgames are always very drawish.

58. ♖h3 e5! A good move. Black should not allow White to play Kh4-Kh5.

59. g5! White is also trying his only chance. After 59.fxe5 fxe5 the position is just a draw.

59...fxg5 60.fxe5 ♗g7 Black is getting his bishop out, as if White was in time for Kg4-Kf5 Black's position would just be lost. **61.e6**

61...♗c3? A very inaccurate move when the draw was so close... [All Black needed to do was to regroup his pieces: 61...♗e5! 62.♖g4 ♖f6 Black is in time to get his king to e5. 63.♖f3 ♗d6 The g3 pawn is still under attack. 64.g4 ♖e5 And White has no way to cross the 4th rank with his king.]

62.♖g4 ♗e1 63.♖f3 Now it is almost the same, but Black can't get his king to e5 because of the e7 move, so the white king is in time to place himself on the e4 square.

63...♖d6 64.g4 ♖e7 All Black can do is wait...

65.♖e4 ♗f2 [Black cannot let the white king go to f7: 65...♖d6 66.♖f5 ♗d2 67.♖f6 followed by e7 and White is winning.]

66.♖f5 doesn't change much, but 66. Kd5 would have been the more simple move.

66...♗e3 67.♖e5 ♗f4+

68.♖d5 ♖d8 69.♖c6 The white king is going for the a7 pawn.

69...♗e5 70.♖b7 ♗c3 71.♖xa7 ♗a5 Black tries to maintain the blockade. [71...♗d4 of course didn't work as after 72.♖a6 followed by a5 White is winning.]

72.♖b7 If Black could just pass now the position would be a draw, but Black is in zugzwang and needs to move his king.

72...♔e8 73.♖c7 ♔e7 74.♙f7 And another zugzwang for Black, but this time it's the last one.

74...♖f8 75.♖d7 ♙b4 and the final

76.a5! As we saw Black only had once chance to save the game. Many opposite colored bishop endgames are much more tricky than we could expect them to be. **1-0**

(16) Stefanova, A.(2486)-Gunina, V.(2509)

SportAccord Rapid Women, 2013.12.12
[CE TEAM]

It is interesting to study the following endgame and to find out whether Black is able to win with his strong b2 pawn or if White's counterplay arrives in time with Kf5.

53.♖b8+ ♔a5 [The idea of avoiding Kf5 with 53...♖a7 54.♖b3 ♖f2+ does not bring anything for Black, because of 55.♖g3! and the rook is forced to leave the f-file. 55...♖d2 56.♖f4]

54.♖f5 ♔a4 55.♖xf6 We have reached the first critical position, where Black fails to find the winning continuation.

55...♖a3? [55...♖e2!! would have won a significant tempo by directly preventing the Ke5-d5 idea. 56.♖f5 (The point is that

after 56. ♖e5 56... ♜xe3+ 57. ♖xd5 ♜b3! —+ wins.) 56... ♖a3 After Black has protected the b2 pawn, he is already threatening with Re1 and promoting the pawn. So the following checks are forced. 57. ♜a8+ (57. ♖f4? 57... ♜e1—+) 57... ♖b3 58. ♜b8+ ♖c2 59. ♜c8+ And here Black should go for the pawns. 59... ♖d3! 60. ♜b8 ♜xe3! (Not 60... ♖xe3? because it allows 61. ♖e5!) 61. ♜xb2 ♖xd4

This endgame is a theoretical win for Black, as the white king is badly placed on the longer side of the board... 62. ♖f4 ♜e1 63. ♖f3 ♖c3 64. ♜b8 d4 Black wins with the "bridge-building" method. The point of staying on the longer side with the king becomes clear in the following line: 65. ♜c8+ ♖d2 66. ♜a8 d3 And the wrong side is really too short for the rook to give enough checks. 67. ♜a2+ ♖c3 68. ♜a3+ ♖c2 69. ♜a2+ ♖b3—+ The board is not long enough to give one more check to force the king back to c2...]

56. ♖e5 White wins the d-pawn and he intends to sacrifice his rook for the b-pawn and then promote one of his pawns with the support of the king. The question is whether the black king is in time to catch the pawns or not.

56... ♜d3! The most challenging attempt by Black. Gunina is threatening to play Rb3! [56... ♜d1 leads also to a draw after 57. ♖xd5 b1=♚ 58. ♜xb1 ♜xb1 White holds for instance after 59. e4 ♖b4 60. e5 ♜e1 61. e6= and Kd6, e7, Kd7 next.]

57. ♜a8+! The only move to avoid Rb3 is to force the king to a bad square.

57... ♖b4 58. ♜b8+ [58. ♖xd5? loses to 58... ♜b3!]

58... ♖a3 59. ♜a8+ ♖b3

60. ♜b8+? The decisive mistake. White loses a fatal tempo with this unnecessary check. [60. ♖xd5! would have held the draw. The key is 60... ♖c2 61. ♜a2! White is able to stop the pawn this way... 61... ♖c1 62. ♜xb2 ♖xb2 White has an extra tempo compared to the game, which is already enough to save the game. 63. e4 ♖c3 64. e5 ♜xd4+ 65. ♖c6 ♜e4 66. ♖d6 ♖d4 67. e6= and e7, Kd7 next.]

60... ♖c2 61. ♜xb2+ White had no more checks because of Rc3 and Black was threatening to play Rb3, so this capture was forced.

61...♔xb2 62.♔xd5

62...♔c3!! The only way to win. In order to win Black needs to bring his king as soon as possible, wasting time on capturing the e-pawn would have spoiled the victory... [62...♖xe3 63.♔c6 The game is drawn in any case: 63...♔c3 (63...♖c3+ 64.♔b6 ♖d3 65.♔c5 ♔c3 66.d5= The rook blocks his own king, because the only winning technique could be Kd3-e4-e5... Now White promotes the pawn in time.) 64.d5 ♔d4 65.d6 ♔e5 66.d7 ♖d3 67.♔c7= Just in time!]

63.♔c5 ♖d1! Freeing the d3 square for the king.

64.d5 [In case of 64.e4

64...♔d3! Black must again focus on bringing the king! (Black again should not be greedy with 64...♖xd4? 65.e5=) 65.e5 ♔e4 66.e6 ♔f5 67.e7 ♖e1 68.♔d6 White is missing only one move with Kd7, but Black is in time again: 68...♔f6—+]

64...♔d3 65.d6 ♔e4 66.♔c6 ♔e5 And on d7 Ke6 arrives in time. An instructive endgame and an important victory for Gunina, who also went on winning the tournament later on.
0-1

Clash of the Titans

(17) Botvinnik, Mikhail-Smyslov, Vassily[D18]

World Championship 20th(12), 1954.04.10

[Miton Kamil]

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 dxc4 5.a4 ♗f5 [5...e6]

6.e3 The alternative is [6.♗e5 leads to more complex variations, but nowadays it is hard to say which line is better.]

6...e6 7.♗xc4 ♗b4 8.O-O ♘bd7

9.♗h4 The idea of this move is just to get a position with the bishop pair.

[9.♞e2 is the main move, preparing e4, after which White gets the advantage in the center. 9...♗g6 10.e4 O-O (10...♗xc3 is risky for Black since after 11.bxc3 ♗xe4 12.♗a3 White gets a strong initiative because the black king is weak, even if he escapes to the queenside after 0-0-0.) 11.♗d3 Supporting the e4 pawn. 11...♗h5 Preparing e5. 12.e5 (12.♗f4 is possible too, then Black will play Re8-Rc8 and wait a little bit, with a solid position for him.) 12...♗d5 13.♗xd5 cxd5 14.♞e3 ♗e7 (14...♗g6) 15.♗g5 ♗xg5 16.♞xg5 ♗g6 17.♗e2 Of course White keeps both bishops. 17...♞xg5 18.♗xg5 ♗b8 A typical maneuver with the idea to improve the knight.

This endgame is more or less equal.]

9...O-O [9...♗g4 10.♞b3+ =]

10.f3 [10.♗xf5 10...exf5 11.♞c2 With the idea to play f3-e4, but Black has a few options to get counterplay over the dark squares or after Rc8-c5. This line is fine for Black. 11...g6]

10...♗g6 11.e4 e5 [11...♗xe4? doesn't work because of 12.♗xg6 ♗xc3 13.bxc3 ♗xc3 14.♗xf8 ♗xa1 15.♗xd7 ♞xd7 16.♗e3]

12.♗xg6 hxg6 13.♗e3 ♞e7 14.♞e2 exd4 15.♗xd4

15...♗c5! A logical move. Black exchanges the bishops to get control over the dark squares.

16.♗xc5 ♞xc5+ 17.♗h1 g5 The idea behind this move is to get control of the dark squares and not to allow White to easily play the thematic f4-e5 plan.

18.g3 ♞ad8 19.♗a2 The position is more or less equal. White is trying to get an advantage thanks to his strong bishop, but on the other hand Black has good counterplay over the dark squares since the d4, e5 and especially the b4 squares are weak.

19...♖fe8 20.♞ad1 [20.f4 20...gxf4 21.gxf4

21...♞h5! To avoid pressure Black should exchange queens. (21...♜xe4? 22.♜xe4 ♞e7 23.♞ae1 ♜c5 24.♙b1+-) 22.♞g2 ♞g4 23.e5 ♞xg2+ 24.♜xg2 ♜g4 25.♞ae1 ♜c5 26.♞e2 ♞d3 And Black is on time with counterplay.]

20...♜f8 Black is going to reduce the material over the d-file but after this move White will be able to push the pawns on the kingside. [20...♞b4 A good square for the queen to put pressure on the many weaknesses: b2, a4 and after g4 even e4. 21.♞e3 g4 (21...♞xb2 22.♞b1 ♞a3 23.♞xb7 a5∞) 22.fxg4 ♜e5 23.♞xd8 ♞xd8 24.♞e2 ♜fxg4 25.♙xf7+ ♜xf7 26.♞xg4 ♞xb2 27.♞e6 ♞f8∞]

21.♞xd8 ♞xd8

22.e5! The only way to improve the position.

22...♜d5 23.♜xd5 [23.♜e4 23...♞e7 24.f4 gxf4 25.gxf4 ♜e6+- 26.f5 ♜ef4+]]

23...cxd5

24.♞d2! A good square for the queen to put pressure on both d5 and g5 and to support the f4 move. White also keeps the possibility of playing Rc1.

24...♜e6 25.f4 gxf4 26.gxf4 ♞c6 A slightly passive move.

[26...♜f8!? is always a prophylactic move. 27.f5 ♞d4+-; 26...♞d4 27.♞xd4 ♜xd4 28.♞d1 ♜e6 29.f5 (29.♞xd5 29...♞xd5 30.♙xd5 ♜xf4 31.♙xb7 ♜d3=) 29...♜f4 30.♞d4 (30.♜g1 And the knight on f4 can be under pressure.) 30...g5 31.fxg6 (31.h4 31...♞c8+- With counterplay because after 32.hxg5 Black will give perpetual check.) 31...♜xg6 32.♞xd5 ♞c8 33.♞d7 ♜xe5 34.♞xb7 ♞c2 35.♜g1+= There is not much material left on the board, but of course White has chances of winning this position.]

27.f5 ♜c5

[27...♜c7 Protecting the d5 pawn, but after 28.♞g5 (28.♞c1 28...♞xa4) 28...f6 29.♞h4↑ White has the initiative.]

28. ♕g5! A logical and strong move. Now the white queen is very active. [28.f6 was less accurate. 28...g6 (28...d4+ 29. ♖g1 ♕e4 30. ♕g5 ♕e3+=) 29. ♖c1 ♕xa4 30. ♗xd5 (30. ♖xc5 30... ♕xa2 31. ♕h6 ♕b1+ with perpetual check: 32. ♖c1 ♕e4+ 33. ♖g1 ♕g4+) 30... ♗e6 31. ♕h6 ♕f4 32. ♕xf4 ♗xf4 33. ♗xb7 ♗d3=]

28... ♖d7? The decisive mistake... [Black could still continue the fight after 28...f6 29. ♕g2 ♗d3 (29...fxe5

30.b4! ♗d3 31.f6 ♕d7 32. ♕e4 But not 32.Bxd5?? as the queen will be pinned. 32... ♗f4 33. ♕xe5 With decisive pressure.; 29... ♖f8 30. ♖c1±) 30.exf6 ♕xf6 31. ♗xd5+ ♖f8 32.b3 White is a pawn up, but a long fight is still ahead.]

29. ♖g1 f6 30.exf6 ♗e4

31.f7+! I suppose that Black missed this move when he played 28...Rd7?. White is simply winning now.

31... ♖xf7 32. ♕d8+ ♖h7 33. ♗xd5 Black lost material.

33... ♗f2+ 34. ♖g2 ♕f6 [34... ♖f8 35. ♕h4++-]

35. ♕xf6 ♖xf6 36. ♖xf2 ♖xf5+ 37. ♗f3 ♖f4 38. ♖g41-0

Editorial Preface

With the New Years issue of CEWN, we are closing the chapter on the Year 2013.

Clearly the biggest winner of 2013 is Magnus Carlsen. With his very convincing win over V.Anand he became the new World Champion.

The second winner of the Year is Vladimir Kramnik. He shared first place with Carlsen in the Candidates and won the World Cup.

In the current issue of CEWN, we are bringing to You a selection of the best moments-games of the Year 2013.

From the next issue of CEWN, we will make some design changes as well as the name will be not "Chess Evolution Weekly Newsletter" anymore.

We are wishing everyone a great new Year 2014 and big thank for staying with us!

Honestly,

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Aronian, Levon(2802)

- Anand, Viswanathan(2772) [D47]

75th Tata Steel GpA(4.5), 2013.01.15

[Arkadij Naiditsch]

How many times have we seen Aronian losing with White in under 25 moves? I can't remember any. We'll now see one of the most spectacular chess games. How much was Anand's analyses? This is hard to say, but probably almost until the end of the game. After the game, he admitted this was his preparation against Gelfand. All in all: super strong novelty, great play, very beautiful finish. A fantastic game.

1.d4 d5 2.c4 c6 Lately, the Slav became Anand's favorite opening.

3.♘f3 ♘f6 4.♘c3 e6 5.e3 ♘bd7 6.♗d3 dxc4 7.♗xc4 b5 8.♗d3 ♗d6 9.O-O O-O 10.♚c2 ♗b7 11.a3 ♚c8 Everything is theory until here and this is one of the most popular lines of the Meran.

12.♗g5 A fresh idea, which was introduced by Wojtaszek. [The main idea of the Black's move 11... Rc8 becomes visible

after 12.b4 12...c5! This amazing move was played by Anand's second Kasimdzhanov in his game against Topalov. 13.bxc5 ♗xf3 14.gxf3 ♘xc5 15.dxc5 ♚xc5 16.f4 ♘d5 17.♗b2 ♘xc3 18.♗xc3 ♚c7 19.♚fc1 ♚c8 Black is winning back the piece, the position is a draw,]

12...c5! A very strong novelty! Now the game is very tricky and pretty forced... [To win a pawn by playing 12...♗xh2+ 13.♚xh2 ♘g4+ 14.♚g1 ♚xg5 and it seems like Black is just a pawn up, but White is getting great play for it. 15.f3 ♘gf6 16.b4! White's bishop pair, plus his strong center and the very bad Black bishop on b7 is gives White better play.]

13.♗xh7 A very logical move. White needs to take the pawn on h7 - nothing else to do! [Another way to get the h7 pawn was to play 13.♗xh7+ 13...♚h8 14.♗e4 but now Black can equalize very easily by playing 14...♗xe4 15.♗gxe4 ♗b8 and Black is even more than fine. He has the bishop pair, an open position and an eventual attack on the White king. This is great compensation for just a pawn.]

13...♗g4 The beginning of a great mating idea!

14.f4 Aronian runs head first into Anand's preparation. [14.g3? would be a bad way to defend. 14...cxd4 (14...♚h4) 15.exd4 ♗xh2 and Black is easily winning. White can't take on h2 because of Qh4.; 14.h3 would have been a very possible reply, but here Black has excellent play as well. 14...♚h4 with a dangerous attack.]

14...cxd4 15.exd4 It seems like White is pretty solid and the Black rook on f8 is under attack. How to proceed? Anand has an amazing move in his pocket. What a level of preparation!

15...♙c5!! A really amazing move, and a winning one. I guess it might become the move of the Year 2013!

16.♙e2 [If White takes the bishop, it wouldn't help much. 16.dxc5 16...♘xc5 Black wants to take on d3 and, at the same time, to give a check on d4. White has no decent defense against this. 17.♙e2 ♔d4+ 18.♙h1 ♘f2+ and Black is giving mate.; 16.♘xf8 leads to a beautiful mate: 16...♙xd4+ 17.♙h1 ♔h4 18.h3 ♔xh3#]

16...♘de5!! Another wonderful move! Black creates multiple threats and keeps the knight on g4 alive. A really beautiful position.

17.♙xg4 [17.fxe5 and Black is mating after 17...♔xd4+ 18.♙h1 ♔g1+ 19.♙xg1 ♘f2#]

17...♙xd4+ 18.♙h1 ♘xg4 As we can see, things turned out terrible for White. At the moment, we have equal material and Black is attacking the White king with all his pieces.

19.♘xf8 If it's impossible not to die, at least let's get some material.

19...f5! Another very good move! Black wants to mate after Qh4. [Of course not 19...♔h4? 20.♔h7+!]

20.♘g6 White has protected from Qh4 for a moment.

20...♔f6 And the game is basically over. Black wants to play Qxg6 and Qh5 next. White has no defense against this.

21.h3 ♔xg6 22.♔e2 Nothing helps White anymore...

22...♔h5 23.♔d3

23...♙e3 What a great finish to a really amazing crush by Black. Anyway, it would be very interesting to know if Anand made any of the moves himself or if it was his preparation until the very end! **0-1**

(2) Kramnik, Vladimir(2801)
- Fressinet, Laurent(2706) [A07]

Alekhine Mem(5), 2013.04.25

[Balogh Csaba]

A brilliant victory by Fressinet! We do not see Kramnik losing in such style with the White pieces too often.

1.♘f3 d5 2.g3 After the Candidates tournament, Kramnik tried to play some "relaxing chess" and kept his deadly weapons for more important tournaments, but he got punished for that.

2...♘c6!? A brave decision by Black. He transposes to the Chigorin Defense, which does not have a good reputation at all, especially if White does not play c4 quickly.

3.d4! Otherwise, Black occupies the center with e5.

3...♙g4

4.♘bd2 A rare sideline, but it seems to be very strong. Black's plan in this whole setup is to castle queenside quickly after Qd7, followed by an attack in center with e5; or, if White castles kingside, he might launch a fast attack with h5-h4. However, White is ready for a quick attack as well, via c3-b4.

4...♚d7 5.h3! Preventing the trading of bishops with Bh3.

5...♙f5 6.c3 Here comes e b4 plan. Black cannot prevent it

with a5 since it does not fit into his strategy to castle long.

6...e5! Black explodes the center. This is a typical plan in this opening, but it usually does not lead to anything good... [Anyway, Black had to hurry with the counterplay, since after the slow 6...O-O-O 7.b4 f6 White gets a big advantage after 8.b5 ♞a5 9.♚a4 b6

10.♙a3! followed by Bb4. We can see in these lines that it is more useful to have the knight on d2 to control the c4 square and stay ready to play Nb3, than to have the bishop on g2. Very deep understanding by Kramnik on move 4.]

7.dxe5 [7.♘xe5!? seems to give a nice advantage as well. 7...♘xe5 8.dxe5 O-O-O 9.♘f3 It is not clear how should Black fight to recover the pawn or to get some compensation for that.]

7...O-O-O This is the point where Kramnik starts to lose the thread.

8.e3?! This is just a waste of tempo, which is enough for Black to get counterplay. [8.♘b3! should have been played. 8...♘ge7 9.♘bd4 with a clear advantage for White!]

8...♘ge7! Black is in time to play Ng6 now, and when he wins back the pawn, he is not worse anymore.

9.g4 White tries to prevent Ng6 by sending the Black bishop

to that square, but this weakens his pawn structure and Black will be ready to make use of it with h5! [9.b4 is too slow now. 9...♘g6]

9...♙g6 10.b4 h5! Fressinet has already foreseen his sacrifice, which Kramnik has probably underestimated.

11.b5 Kramnik has pinned his hopes to this move. When the knight leaves, the e5 pawn is not under attack anymore and he will be able to calmly continue his plans. However, Fressinet had a different idea in mind! [11.♖g1 was better, but Black is fine anyway. 11...hxg4 12.hxg4 ♔e6 and Nxe5 next move.]

11...hxg4!! Black gets two pawns for the piece, but they will dominate White's uncoordinated pieces.

12.bxc6 ♘xc6 13.e6 White tries to exchange some pieces, but it does not solve his problems. [13.♘d4 13...♘xe5 is also better for Black. White simply has no useful moves, while Black has many different ways to improve his position. He could do it by Be7-h4, or gxh3 is also possible to get a third pawn for the piece.]

13...♔xe6! [The tempting 13...fxe6? would have been a grave error because White wins the g4 pawn after 14.♖g1!]

14.♘d4 ♘xd4 15.cxd4

15...♙e7! Another great decision! Fressinet realizes the plan of his opponent - to play Qa4 Kb8 Ba3 -, and the trade of the bishops would seriously ease his position. He rather sends his bishop to the attack with Bh4. [15...♙b4! is also strong, suggested by the computer. Bc3 threatens to trap the rook and after 16.♖b3 ♙xd2+ 17.♙xd2 ♙e4! 18.♖h2 (18.♖g1 18...gxh3 White needs to give up his bishop for the pawn, but then he is simply lost.) 18...♖d6! Trapping the rook. White has an only move. 19.f4 Now on gxf3, Rf2 works, but much stronger is 19...g3! 20.♖e2 ♖g6! and g2 is coming next with a winning advantage. Bg2 is answered by taking and Rxh3.; 15...gxh3?! allows White to play 16.♖a4 ♙b8 17.♙a3∞]

16.♙g2 Forcing Black to take on h3, when the Black pawns become less flexible. On the other hand, it is going to be the third pawn for the piece. [Now on 16.♖a4 16...♙b8 17.♙a3 ♙h4! Black created the direct threat of Qxe3 and is ready to increase the pressure on the f2 pawn.]

16...gxh3 17.♙f3 ♙f5 Black prepares to push g5-g4! White's position is getting more and more unpleasant. He is unable to create any counterplay on the queenside, as the b1 square of the rook is under permanent control by the bishop.

18. ♖a4 [I tried to defend the position with 18. ♘f1 but it did not help. 18... ♜h4! 19. ♘g3 ♙b4+ 20. ♙f1 (20. ♙d2? loses to 20... ♜xd4!)]

20... ♜g6! (The idea of the defense comes after 20... ♙c3?! 21. ♙a3! ♙xa1 22. ♙e7!! Some kind of multi-attacking move. White is back in the game.) 21. ♘xf5 ♜xf5 Bc3 is threatened now and, for instance, after 22. ♙b2 g5! g4-g3 is coming with a crushing attack.]

18... ♙b8 19. ♙a3

19... ♙h4! Black follows his plan and keeps the bishops on the board. Qxe3 is threatened and g5-g4 is coming fast as well. White cannot create any serious threats without the rook on b1. Bc5 is always met with b6.

20. ♘f1 g5! 21. ♜h2 White has to make ugly moves like

this one. He strengthens his f2 weakness and also tries to blockade the h-pawn.

21...g4 22. ♙e2 ♙e4 Black continues pushing. He wants to settle his bishop on g2, trapping the h2 rook and making the f2 pawn more vulnerable. [According to the machine: 22... ♜dg8! was even stronger with the deadly threat of g3 fxg3 Rxg3.]

23. ♜c1 White seems to activate his rook, but actually he still unable to create any real threats. The three pawns on a7, b7, c7 cover all the potential of the queen, rook and two bishops.

23... ♙g2 24. ♜a5 ♜c8! Black had to bring a new defender, but he still has enough pieces left to break through on the other side.

25. ♜c3 Kramnik tries something on the third rank, but it is still unclear what he really wants...

Fressinet finds the way to finish the game in style! [Finally, White could have occupied the b-file, but this time it would have ran into 25. ♜b1 25... ♙xf2+! 26. ♙xf2 ♜f5+—+ and b1 falls.]

25... ♙xf2+!! Not the only way to win, but definitely the nicest and most effective.

26. ♙xf2 ♙xf1 Black simply wants and will promote his h- and g-pawns.

27. ♙xf1 [27. ♙xf1 leads to mate after 27...g3+! 28. ♙xg3 ♜f5!

blocking the king's path back to the f-file. 29.♖b2 ♖cg8+ 30.♔h2 Finally, White has some real threats, but Black is coming first! 30...♖g2+! 31.♗xg2 hxg2+ 32.♔xg2 ♖g8+ and mate to follow.]

27...g3 What to do?! The pawns are rolling!

28.♗f3 gxh2 Black threatens with Qf5 Ke2 Qxf3 Kxf3 h1Q.

29.♔e2 ♜hg8! with the idea of Rg2, closing the bishop's diagonal. On Bxg2, simply hxg2, promoting the pawns.

30.♗c5 a6 [30...b6 was also good.]

31.♗h1 ♜g2+ If White does not take, Qf5 mates.

32.♗xg2 hxg2 White resigned! A brilliancy by Fressinet and something that Kramnik should try to quickly forget. **0-1**

(3) Fridman, Daniel(2667)

- Naiditsch, Arkadij(2716) [E97]

1st GRENKE Chess Classic(6), 2013.02.13

[Arkadij Naiditsch]

Just yesterday I managed to win a nice attacking game against my colleague from the National Team.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♗g7 4.e4 d6 5.♘f3 O-O 6.♗e2 e5 7.O-O ♘c6 8.♗e3 [8.d5 8...♘e7 We are at the beginning of a huge Classical King's Indian line where both sides have a lot of different plans and ideas.]

8...♘g4 9.♗g5 f6

10.♗h4 [10.♗c1 10...f5 leads to complex play where recently Black has had good results. For example 11.♗g5 ♖d7 12.exf5 (12.d5 12...♘d4∞) 12...exd4 13.f6 (13.♘d5 13...♖xf5 14.h3 ♘ge5 15.♘xe5 dxe5 16.♗g4 ♖f7 17.♗xf5 ♗xf5) 13...♘xf6 14.♘xd4 ♘e4 15.♘xe4 ♘xd4 16.♗d3 ♘e6 17.♖c2 ♘xg5 18.♘xg5 ♖g4 19.♘e4 ♗d7 20.♘c3 ♖ae8 21.♗e4 c6 22.♖ad1 ♗e6 23.♘e2 ♗f5 24.♗xf5 ♖xe2 25.♗xg4 ♖xc2 1/2-1/2 Le Quang Liem-Gharamian,T/ Belfort FRA.]

10...g5 11.♗g3 ♘h6 12.dxe5 [12.d5 12...♘e7 Black is going to push f5 next. After exf5, White will get the e4 square but that's not enough to get a clear advantage because thanks to his active pieces, Black will have good chances to create an

initiative on the kingside.]

12...fxe5 This is the most fighting move. Daniel is a very solid player, so I thought I would get better chances in an unclear position. [12...dxe5 13.♖b3 ♕e7 14.♖ad1 ♖b8 15.♘d5 ♖f7 16.♖a3 a5 17.♖d2 ♙e6 18.h3 ♖fe8 19.♙d1 ♙f8 20.♖e3 g4 21.♘h4 gxh3 22.f4 hxg2 23.♖xg2 1/2-1/2 Ivanisevic,I-Djukic, N/Porto Carras GRE.]

13.h3!? Probably the idea of this move is to play Nh2, looking for an exchange of the light squared bishops in order to play on the light squares. The problem is that Black can push g4, when the White king will not be very safe.

13...♔h8 I was not sure whether to play Kh8 or Nf7. [13...♘f7!? with the idea of preparing Nd4 and after Nxd4 exd4 Nb5, Black will have c5. 14.c5 dxc5 15.♙c4=]

14.c5 Very logical move by White. Now if I manage to put the knight on d4, I will not have the c7-c5 move to support my knight's position.

14...g4 [14...dxc5 15.♖xd8 ♖xd8 16.♘g5 ♘d4= Even here, h the strong knight on d4, Black should not be worse, although this position is very difficult to evaluate.]

15.hxg4 ♙xg4 16.cxd6 cxd6 I think this is the critical moment. During the game I was mainly calculating 17. Nd5 Bxf3 18. Bxf3 Nd4 with a very unclear position. My main

problem is the knight on h6, so if I have enough time to get it to g5, Black should be doing pretty well, but in order to do that, I need 2 full moves which gives White time to create something.

17.♘d2 ♙c8 A nice move. Of course, Black should not exchange the light-squared bishops and my knight is going to g5. [A direct attack would lead nowhere: 17...♖g5 18.♙xg4 (18.♘c4 18...♘d4=) 18...♘xg4 19.♘f3 ♖h5 20.♘h2! and White is better.; 17...♙e6 18.♙c4=]

18.♘c4 ♘d4 19.♘e3 ♘f7 Finally my knight is coming into the game.

20.♘c2 I did not like this move by Daniel. White's knight should be placed on d5 and not on c2.

20...♘g5 [20...♘xe2+ 21.♖xe2 ♖g5 22.♖ad1 h5=]

21.♙d3?! White saves the bishop and prepares Nxd4-exd4-Nb5, but now comes

21...♘df3+! [21...♘de6 was the other option I was considering during the game, but Ndf3 was just too tempting :).]

22.gxf3 ♖d7! Important move. Now I am preparing to take on f3 and give checkmate with Qh3. [22...♘xf3+ 23.♙g2 ♘h4+ 24.♙g1 and Black should repeat moves because other options are worse. 24...♖g5 25.♙e2 ♙h3 26.♙h2 ♙xf1 27.♖xf1±]

23. ♖e2 [23. ♖e1 23... ♖f6→24. ♖a4 ♖f7 (24... ♖h3 Less accurate because the queen on e8 can create some problems for Black. 25. ♖e8+ ♖f8)]

23... ♖f6 That was the key move of a simple idea, just to give mate on the h-file!

24. ♖d5! only move [24. ♖e1 The idea to escape through the f1 square does not help either. 24... ♖h3+ Here Black has quite a few choices to finish the game. One of them is 25. ♖f1 ♖f4 26. ♖g1 ♖h6 27. ♖f1 ♖h3+ 28. ♖g2 ♖f7! A silent but deadly move. Qh5 next with Nf4 and mate can't be avoided by White; It doesn't help to play 24. ♖e3 24... ♖h3 25. ♖g4 ♖xg4 26. ffg4 ♖af8! followed by the lethal Rh6 next.]

24... ♖h6 25. f4 ♖h3+ 26. ♖g2 Here I had 2 options...

26... exf4 [26... ♖xf4+ 27. ♖f3 The position looks pretty unclear from a human point of view, and I was calculating the main Rh3, but the computer gives an amazing win: 27... ♖h2!! Amazing move! White can't defend from mate. Black wants to play Bh6 next and 28. ♖xh2 ♖h3+ 29. ♖g3

29... ♖g2!! followed by Bg4 mate. But how to find this over the board? I don't know :).]

27. ♖h2 A very human move by Daniel, but as usual, the computer finds a better defense. [27. ♖d4 was the only way to go for White. 27... ♖f7 (27... ffg3 28. ffg3 ♖g5 29. ♖f5 ♖xe4∞

During the game I thought I should be better here, but in fact, things are far from clear.) 28. ♖c1 ffg3 29. ffg3 ♖f2 30. ♖xf2 ♖h2+ 31. ♖xh2 ♖xf2+ 32. ♖h1 ♖xd4 33. ♖f1 What a defense by White! 33... ♖xf1+ 34. ♖xf1 ♖d7 Thanks to the pair of bishops, Black is slightly better, but White has good drawish chances.]

27... f3+ 28. ♖xf3 [28. ♖xf3 28... ♖g5+ 29. ♖e3 ♖xh2—+ Black has a free attack now.]

28... ♖g5 29. ♖f4 The only move to take control of the h3 square. [29. ♖g4 29... ♖xg4+ 30. ♖xg4 ♖xg4—+; 29. ♖g3 29... ♖h3+ 30. ♖g1 ♖g4 31. ♖g2 ♖xd1 32. ♖xh3 ♖f3 33. ♖g2 ♖h3+ 34. ♖h1 ♖f4+—+]

29... ♖xh2+ 30. ♖xh2 ♖e5 Not the most precise. [30... ♖f7! would finish the game quickly. 31. ♖g2 ♖xf4 32. ♖h1 ♖d7 followed by Rg8 with a mating attack.]

31. ♖g2 ♖xf4 32. ♖h1 ♖g7 33. ♖f1 ♖e6 [There was no need for 33... ♖h3+ 34. ♖xh3 ♖xh3 35. ♖g4 ♖g5 36. ♖f5∞]

34. ♖d4 Daniel just had a minute on the clock, which makes his position very difficult to play. Objectively, Black has a very strong initiative for the exchange.

34... ♖c4+ 35. ♖e2 ♖xe4 36. ♖xc4? Decisive mistake! Now White is losing by force. The only way to try to survive was [36. ♖g1 36... ♖f6 37. ♖f3 to prevent Nd2 37... ♖xe2+ (37... ♖xb2 38. ♖d4+ ♖xd4 39. ♖xd4∞ Black still has the initiative, but

of course, without the queen, it's not the same as before.)
38. ♖xe2 ♜e8 39. ♖b5 ♜f8→with a strong attack.; 36. ♘f3
36... ♘xf2→+ That's why White needed to play 36.Rg1 first.]

36... ♘d2+ 37. ♖e2 [37. ♖e1 37... ♖xd4 38. ♖h5 h6→+]

37...d5! A very nice move, especially during time trouble.
[Daniel prepared a nice trap: 37... ♖xd4? 38. ♜xh7+! ♔xh7
39. ♖h1+ and suddenly my king is under attack. 39... ♖g6
40. ♜g1+ ♘g5 41. ♘d3+ ♖f6 42. ♖h5 ♖e5+ 43. ♔d1 ♜g8 44. ♜g4
White is a piece down but has practical chances.]

38. ♖c2 [Now at 38. ♘xd5 38... ♖xd4 White has no saving
check on d3 with his bishop.]

38... ♜e8+ 39. ♖d1 ♘xc4 The game is over.

40. ♖c3 Here I had a lot of winning moves, but the move in
the game seemed to be the safest one.

40... ♜e4 41. ♘f5 ♘xb2+ 42. ♖c2 ♜e2+ 43. ♖b3

43... ♖xc3+ 44. ♖xc3 ♘e5+ 45. ♘d4 [45. ♖b3 45... ♘c4→+]

45... ♜e4 and we are in a rook endgame with 2 pawns down
for White and 0 hopes to make a draw. I was very happy when
Daniel gave me a handshake. A nice game to win! :) **0-1**

**(4) Ponomarev, Ruslan(2743)
- Eljanov, Pavel(2707) [C91]**

82nd ch-UKR 2013(2), 2013.06.16

[Balogh Csaba]

An excellent preparation by Ponomarev, which involved an intuitive pawn sacrifice that even the machines did not understand at first sight.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1
White returns to the mainlines instead of the recently so popular anti-theoretical move 6.d3.

6...b5 7.♙b3 d6 8.c3 O-O

9.d4 Ponomarev plays the alternative line to the main Spanish 9.h3. It is sometimes quite effective to search for improvements in slightly forgotten lines. Many hidden ideas can be found and the surprise effect on the opponent is also a decent factor.

9...♙g4 Black must try to put pressure on the center, otherwise White can simply spare the h3 move.

10.♙e3 This is the sharp handling of the position, while Kamsky's favorite 10.d5 is rather positional.

10...exd4 [10...♘xe4? is often a poisoned pawn in the Spanish. Here again White wins after a double attack: 11.♙d5!]

11.cxd4 d5 A typical method of countering White's ideas in the center. Otherwise if White gets his knight out to c3, Black remains without counterplay against the strong center. [The other main option for Black is 11...♘a5 12.♙c2 and Black must play either c5 immediately or after the inclusion of the Nc4-Bc1 pair of moves. Both are with huge theory.]

12.e5 ♘e4 13.h3 ♙h5 Here comes the new idea! In the previous games, White played Nc3 now or without the h3 Bh5 inclusion.

14.♘bd2! The positional point is obvious, White needs to get rid of the strong e4 knight, but it looks like a tactical blunder...

14...♘xd2 Seemingly White has no good takeback, since on Bxd2 the d4 pawn is hanging and after Qxd2 Bb4 wins an exchange. Black can even destroy the pawn structure first with Bxf3 and only then Bb4... What could the plan be?!

15. ♖xd2! ♜xf3 [On 15... ♜b4 16. ♖c2 ♜xe1

17. ♘g5! is very strong 17... ♜g6 18. ♖xc6 ♜a5 19. ♜xd5 White has sacrificed an exchange, but he got the most important d5 pawn and all his pieces are standing actively. Black is already in some trouble, because after 19... ♖b8 20.e6! seems to be very strong.]

16. ♖c3!! This is the whole point! White had to make this intermediate move to avoid Bb4. The game becomes very sharp, but as the following line shows, White has enough compensation everywhere. [16.gxf3 is bad as after 16... ♜b4 17. ♖c2 ♜xe1 18. ♖xc6 ♜a5 19. ♜xd5 ♖b8+ Black has huge plusses in comparison to the 15...Bb4 line.]

16... ♜xg2 Eljanov plays the computer's recommendation and grabs a pawn. After knowing what happened in the game, I doubt that he would repeat this decision.

[On 16... ♖d7 White needs to make another subtle intermediate move: 17. ♖ec1!! ♜b8 Now on Qxc7, Black could simple retreat the bishop. (17... ♜d8 18. ♖xc7! ♖xc7 19. ♖xc7 And both bishops are hanging. White wins the piece back and gets a big advantage.) 18.gxf3 c6 19. ♜h2 We get the same position as in the game, but here Black does not even have an extra pawn.; 16... ♜b4! is the best option in my opinion. 17. ♖xc6 ♜xe1 18. ♖xe1 ♜e4 19.f3 ♜f5 20. ♜xd5 White clearly has enough compensation for the exchange, but I am not sure if objectively he is better here. In any case, from a practical point of view, White has a much easier game.; 16... ♜xe5 seems to lead to a slightly worse position after 17.dxe5 ♜h5 18.g4! ♜g6 19. ♖ed1 ♜e4 20. ♖c6+= White wins the pawn back and his pieces are better placed.]

17. ♜xg2 ♜b8 18. ♖ac1 c6 Black managed to win a pawn, but at what cost!? White has the bishop pair, the c6 pawn must always be defended by the b8 knight, which locks the rook to the corner. If the c6 pawn falls, the d5 one will automatically drop as well. And the most important factor is that White has an easy and strong attack on the g-file, against which Black cannot launch any kind of counterplay. Black must try to defend, but without the b8 and a8 pieces it is going to be difficult.

19. ♜h2! Opening the g-file for the rooks.

19...f5 [19...a5 does not lead anywhere, White can simple continue his plan: 20.♖g1; Opening the game weakens the Black king too much: 19...f6 20.♖g1! fxe5 21.dxe5± Black has no good defence against Qd3-Bc2.]

20.♖g1 ♖a7 Using the poor rook to defend the g7 weakness along the 7th rank is a resourceful idea, but it does not save Black. [20...f4 critically weakens the b1-h7 diagonal: 21.♕d2 Qd3 and Bc3 are coming next and Black will collapse as he is missing a light-colored bishop.]

21.♖g2! Simple and strong!

21...♙d7 [21...♙e8 is also bad: 22.♖cg1 g6 23.♕h6 ♖f7 24.♕c2 White wants to prepare for the attack with h4-h5 and Qg3 for instance. 24...♕f8 25.♕xf8 ♙xf8 26.h4! ♙h6 27.♙h3 ♙f8 28.h5 Black collapses.]

22.♖cg1 ♖f7 Black tries to keep his pawn on g7 as long as possible to avoid the h4-h5 plan.

23.♕d1!! A very nice way of increasing pressure. Ponomarev drives his bishop to h5 to provoke the g6 weakening.

23...g6 24.♕h5! White does not even waste time on the h4-h5 plan, he goes for the most direct crush with sacrificing on g6.

24...♕f8 25.♕f4! Opening the 3rd rank for the queen in order to join the attack.

25...♙e8 [Black cannot fortify his g6 pawn: 25...♖g7 26.♕h6! ♖f7 27.♕xg6! hxg6 28.♖xg6+ ♙h7 29.♕xf8 ♖xf8 30.♙g3+- With mate to follow soon.]

26.♖xg6+!! A brilliant finish based on an exact calculation!

26...hxg6 27.♖xg6+ Black is simply unable to coordinate a defence because of the pin between the h5 bishop and the e8 queen.

27...♕g7 [On 27...♙h7 28.e6! ♖fe7 29.♖g5 ♙d8 30.♕g6+ ♙h8 31.♙g3 Black is a rook up, but gets mated soon. Too many threats are in the air: Qh4, Rh5, Bf7, Be5.]

28.e6 ♖f8 29.♙c5 [White could already have simplified to a completely winning endgame 29.♖xg7+ 29...♖xg7 30.♕xe8 ♖xe8 31.♕xb8 ♖xb8 32.♙xc6+- but Ponomarev played for more.]

29...♙e7 [On 29...♖e7 30.♖xg7+ ♖xg7 31.♕xe8 ♖xe8 32.♕e5+- is hopeless for Black.]

30.♕d6 ♙h4 31.♙xa7 There is only one check on f2 because of Rg2. A very well deserved victory after a deep preparation and a powerful attack. **1-0**

Endgame section

**(15) Kramnik, Vladimir(2784)-
Vachier-Lagrave, Maxime(2719)**

FIDE World Cup 2013(6.2), 2013.08.27
[CE Team]

We are in the second game of the World Cup semi-final. Is it a draw or a winning position for White?! In case of a white win, Kramnik would directly proceed to the final, while in case of a draw the players would have to go to tie-break.

44.♖b7 ♜d8! A very strong move. White had the idea of playing Nh4-Nf5, which is now impossible because of Rd7. The knight endgame should be a draw, which means White needs to keep the rooks on the board if possible.

45.♔g3 A waiting move just to check what Black wants to play next.

45...♔g8 Another good and solid move. Black keeps on waiting.

46.♔h4 ♔h7 47.♞a7 ♔g8 As we can see, White cannot really improve anything, so it is time for the last try.

48.f4! White is bringing his last resource, the f4 pawn. Now the move g5 next could be quite unpleasant for Black in many different situations.

48...♔h7 49.♞b7 Another waiting move and checking Black again...

49...♞e4 [49...♔g8 50.♞b4 Followed by g5. The black king would be better placed on h7 now...]

50.♞b4 ♞e8 Black is preparing against g5.

51.g5 ♞d6! Black wins the control over the 4th rank.

52.♞b6 This is probably White's only try. [52.♔g4 wouldn't lead to anything: 52...hxg5 53.fxg5 ♞e4+ And Black manages to exchange the rooks, which should be a huge step in the direction of a draw.]

52...♞f7

53.♞b5! A very good move! [53.♔g4 53...hxg5 54.fxg5 would

also give Black a chance for 54...♖e5+! Trying to find a rescue in the rook endgame... 55.♗xe5 ♜xe5 56.♞b7 ♞a5 57.h6 And here only 57...♙h8!! secures a draw! 58.♞xg7 ♞a4+ 59.♙f5 ♞f4+ 60.♙g6 ♞f6+ And the white king cannot escape the checks.]

53...♞e1 Maxime is going for a very forced line, which is very tricky. [53...♞a8 would have been a more safe way of playing for a draw. White cannot really make big progress here. Of course Black still needs to be careful, but it seems to be a draw.]

54.♗f8+ ♙g8 55.♞b8 The black king is in a mating net, but it is his move.

55...hxf5+ 56.fxf5 ♞h1+! The only chance.

57.♙g3 ♞g1+

58.♙f4! And once again White tries the best practical chance. [After 58.♙h2 58...♞xg5! secures the draw: 59.♗e6+ ♙h7 60.♗xg5+ ♗xg5 61.♙g3 ♗e4+ 62.♙f4 ♗f6 White is an exchange up, but the position is an easy draw.]

58...♞f1+? This move is already losing! [The right move was 58...♗d6! 59.♗g6+ ♙f7 60.♞f8+ ♙e6 With very good chances for a draw.]

59.♙e3 And it seems like Black is totally lost. White wants to

play Ne6 or Ng6 depending on what Black will do next.

59...g6! In an already lost position, Black finds the only practical chance.

60.hxg6 [Things are not clear after 60.♗xg6+ 60...♙g7 61.♞b7 ♞f5 With quite some chances to make a draw.]

60...♙g7 61.gxf7 ♙xf7 White is a piece and a pawn up, but to defend the pawn on g5 is pretty hard. Black wants to play Rf5 next.

62.♙e4? With this move White misses the win! [62.♗d7 was the only right move! 62...♞f5 63.♞f8+ ♙g6 64.♞g8+ ♙f7 And now 65.♙e4! Winning an important tempo. 65...♞a5 66.♞f8+ ♙g6 The position still looks like a draw, but White has a great trick again: 67.♗e5+! ♙xg5 68.♞f5+! And no matter where the black king is going to, White will give a check with the knight and take the rook on a5.]

62...♞e1+! And the position is a draw!

63.♙f3 ♞f1+ 64.♙g3 ♞g1+ 65.♙f4 ♞f1+ 66.♙e3 ♞e1+ 67.♙f3 ♞f1+ The white king cannot escape from the black checks.

68.♙g2 And once the white king is on the 2nd rank Black has

68...♞f5! 69.♗h7 [69.g6+ 69...♙g7 And the g-pawn is lost.]

69...♙g6 Forcing the white rook to come to the 7th rank.

70.♖b7 ♜f4! And Black is cutting the white king.

71.♔g3 ♜a4 It is funny, but White cannot improve his position.

72.♖e7

72...♜g4+ A funny move! :)

73.♔f3 ♜a4 74.♖b7 ♜h4 Black finally decides to take the g5 pawn, but just waiting on the 4th rank was also fine.

75.♘f6 ♔xg5 76.♘e4+ ♔f5 77.♖e7 ♜h8 And we have a theoretical draw. The rest of the game doesn't really need any comments, as the position is just too easy to hold...

78.♔e3 ♜d8 79.♖f7+ ♔e6 80.♜h7 ♜d1 81.♘c5+ ♔f5 82.♖f7+ ♔e5 83.♘d3+ ♔e6 84.♜a7 ♜h1 85.♔e4 ♜h4+ 86.♘f4+ ♔d6 87.♜a6+ ♔c5 88.♜g6 ♔c4 89.♜c6+ ♔b5 90.♜c1 ♜h8 91.♔e5 ♜h4 92.♜c8 ♜h1 93.♘e6 ♜h5+ 94.♔d6 ♜h6 95.♜c1 ♔b4 96.♔d5 ♜h5+ 97.♔e4 ♜h4+ 98.♘f4 ♔b5 99.♔e5 ♜h8 100.♜c2 ♜h4 101.♖f2 ♔c4 102.♔e4 ♜h8 103.♜c2+ ♔b5 104.♘g6 ♜h1 105.♘e5 ♜e1+ 106.♔d4 ♜d1+ 107.♘d3 ♔b6 108.♜c3 ♜b1 109.♔d5 ♜b5+ 110.♘c5 ♜b1 111.♘d7+ ♔b5 112.♜d3 ♜b4 113.♘e5 ♜b1 114.♘c4 ♔b4 115.♘d2 ♜b2 116.♔c6 ♜c2+ 117.♔b6 ♜b2 118.♔c6 ♜c2+ 119.♔b7 ♜c3 120.♜d8 ♜c5 121.♘e4 ♜c4 122.♜e8 ♜c2 123.♔b6 ♜e2 124.♔c6 ♜e1 125.♘d6 What a dramatic draw! 1/2-1/2

(16) Gelfand, Boris(2740)-Carlsen, Magnus(2872)

FIDE Candidates(3.3), 2013.03.17
[CE Team]

27...♜xc8 We are at move 27. Everything looks equal, so probably a draw agreement will come soon. No way! White's position is much more dangerous than it looks. Black has very good winning chances. Let us take a look.

28.d5! White is exchanging his d-pawn - a very correct decision. Black wants to play Qb7 followed by Ng6-Ne7 and Nd5, killing the f2 bishop.

28...exd5 29.♜xd5 During the next moves, Magnus will show us exactly how to handle such positions. ..

29...g6 securing the position of the knight on e6. 30.♔g2 ♘e6 31.♜f3

31...♔g7 There is no reason to hurry because White has no

direct drawing ideas.

32.a3 h5 Now Black wants to eventually play h4, so White is almost forced to play h4 himself, which weakens greatly the light squares.

33.h4 ♖c2 White's main idea here is to push f5, so Black stops him from doing it. Another idea for White is to exchange the queens, which would lead to an almost equal endgame.

34.♖b7 ♖a4 35.♖f3 By attacking the a-pawn, White is forcing Black's queen to leave the great square on c2.

35...b5! Black has no other ideas than to push his queenside pawns. However, this is strong enough! The next Black moves are simple: a5, Qc4, a4. We see the complete domination of the Black knight on e6 against the White bishop on f2.

36.f5! White has no time to waste.

36...gxf5 37.♖xf5 ♖xa3 38.♖xh5 a5 The position changes completely. The Black king is open, but his pawns on the queenside are just unstoppable. White's only hope to survive is to create something fast against the Black king, which is very difficult because of the "heroic" knight on e6.

39.♖g4+ ♖f8 40.h5?! In a difficult position, White chooses what might not be the best practical chance to fight for a draw.

[40.♖h5 would have given White better chances. The idea is to put the queen on h8 before starting the advance of the h-pawn. But anyway, White still has a lot of work to do here in order to get the draw.]

40...♖c1! Very good move, stopping White's only idea - to play h6.

41.♖e4 b4 The Black pawns are coming closer...

42.♗e3 ♖c7 42...Qc8 also seems to lead to a much better position.

43.♖a8+

43...♗g7! Very good move by Black. Before the exchange on d8, Black places his king on a better position than f8.

44.h6+ ♖h7 45.♖e4+ ♖g8 As we can see, the Black king on g6 feels very safe! White almost has no attacking ideas and Black's pawns are getting closer...

46.♖a8+ ♖d8 47.♖xd8+ This move loses by force, but it is hard to blame Gelfand for making this decision. [47.♖c6 would have kept the game going a bit longer, but the position just looks pretty lost for White in any case.]

47...♗xd8 48.♗f3 a4 49.♖e4 The White king tries to be on time to hold the Black pawns, but it is not...

49...c6! The last precise decision by Magnus. The game is over. White cannot stop Black from playing a3 followed by Na5-Nb3, winning a full piece.

50. c1 a5 51. d2 Gelfand tries the last trick...

51...b3 52. d3 c4 53. c3 a3 and the game is over!

54. g4 h7 55. g5

55...g6 White is in zugzwang. The bishop needs to leave the c3 square, which gives the Black knight the possibility to enter on d2.

56. d4 b2 57. c2 d2 Just a perfect play from Black, nothing to say about it. As we could see, the starting position was much trickier than it looked like! **0-1**

(17) Caruana, F.(2781)-Nakamura, Hi(2769)

75th Tata Steel GpA(10), 2013.01.23

[CE Team]

We got to this position after the time trouble. Thanks to the bishop pair, the weak dark squares and the better structure, Black is much better. Let's see how Naka converted his advantage.

40...g7 41. b2 d6 The bishop came here to avoid any pawn exchange.

42. b1 f6 43. f1 e7 44. e4 g8 45. h1 h4 To make moves like this, we have to be sure about everything, but Naka probably has already seen many winning ideas.

46. f3 f8 47. d1 d8 48. f1 g6 49. e4 h5 Of course, Black keeps the pair of bishops.

50. f3 f8 51. f2 g6 Naka didn't improve his position so much, but he's winning time. This is a typical strategy to convert a long-term advantage.

52. Nxe4 Caruana decides to change the way to defend. He found the other setup with a knight on e4. What would happen if he puts the knight on d3?

[52. Nxd3 Bc5+ (52... Bf4+ 53. Qe2 Bd8 54. Rf1 Bg3 55. c5 (55. Qe3 e5 56. Bd5 (56. Bxe4 Bf4+ 57. Qf3 Bh5+) 56... Bf6 An important place for the rook, in order to push e4. 57. Rf1 e4 58. Nc1 Bf4+ 59. Qd4 Bf6) 55... e5 56. Bg4 bxc5 57. Nxc5 Bxd1 58. Qxd1 Bf2 and White has problems with the knight.) 53. Nxc5 I suppose Caruana wanted to avoid the positions after the exchanges on c5. (53. Qe2 Bd4 54. Qd2 (54. Rf1 e5 55. Qd2 Qd6 But not 55... e4, because of 56. Bxe4! 56. Rf1 g4 A similar idea to the one we'll see in the game. 57. Bxe4 (57. hxg4 h3; 57. Bxg4 e4) 57... gxh3 58. gxh3 Black should easily win this position. For example, the winning plan can be to grab the weak h3 pawn after Be8-Bd7 or Rg8-Rg3.) 54... Bd8 55. Qe2 Bf6 56. Bb7 Bc3 57. Rf1 e5 58. Nf2 (58. c5 Bf6; 58. Bd5 Bxd5 59. cxd5 Bh5+) 58... Bd4 59. Be4 Bf6 60. Bxg6 Bxf2+ 61. Qd3 Bxg2 62. Bf5 Bg3+ 63. Qe4 Bxb3 With two pawns less, the opposite colored bishops won't help.) 53... bxc5 54. Rf2 Bb8 (54... e5 55. Bf2 Rd5 is coming.; 54... Bd8 55. Be4 Bxe4 56. Qxe4 Bf1 57. Bf2 Bd4+ 58. Qe3 e5 59. Bf2 Bf4 60. Bf2) 55. Bd1 Bd8 56. Bc2 From a logical point of view, without bishops, White should have more chances. 56... Bxc2

57. Rxc2 Qf6 (57... Bd4 58. Rf1 e5 59. Rf1 Qe6 60. Bf8) 58. Rf2+ Qe5 59. Rf1 Bb8 60. Bb1 Bb7 61. Bb2 Bf7 62. Bd2 Bf1 63. Bd8 Bb1 and Black got some winning chances]

52... Bc5+ 53. Qd3 [53. Nxc5 53... bxc5 This position has to be lost because White is simply "a pawn down"; 53. Qe2 53... Bf4 54. Nxc5 (54. Nxc5 54... bxc5 55. Rf1 Bd4 56. Bc3 e5 57. Bg4 Qf6 58. Bf3+ Bf4) 54... e5 Now White can't move the rook because after Kf6, he'll lose the knight. (54... Qf6 55. Ne4+ =) 55. Bd5 Bd3+ 56. Qxd3 Bxf1]

53... Bd8+! Black's idea now is to force White to exchange on c5. Then, it will be easier to improve his position. [53... Bf4 This move should be enough as well. 54. Rf1 Bf5 55. Bf2 (55. Bh1 55... Qf7 56. Bf1 Qg7 Black doesn't need to hurry with the final hit on h3. First, he can place his pieces on optimal squares. 57. Bh1 e5 58. Bf1 Bd4 59. Bh1 Qh6 60. Bf1 Bxh3) 55... Bxh3 56. Nxc5 Bf5+ 57. Be4 (57. Ne4 57... h3; 57. Qd2 57... Bd4+ 58. Qe1 Bd6 59. Ne4 Bf4) 57... Qf6 58. Bxf5 exf5 59. Ne6 (59. Nf3 59... h3) 59... Bg4 Bb3]

54. Qc2? Caruana could still fight after:

[54. Qe2 54... Bd4 55. Nxc5 bxc5 But as we said before, this position is just lost.]

54...g4!! A fantastic tactical idea overlooked by Caruana in his long calculation! White's setup is crushed now! [54...♖d4 55.♗e1 ♘b4 56.♗e2 This position is what Caruana expected. His setup now is very solid and it's not easy for Black to improve because the knight on e4 won't allow the Black king to go to b4 or g3. 56...e5 57.♙c1 ♙e6 with the idea of taking the king to g3, but now comes 58.♘g4+ ♘f5 59.♘f3 =; 54...♘b4 55.♗d1]

55.hxg4 h3 56.♗d1 [56.gxh3 56...♗f8 57.♙d3 ♗f4 and White is losing material.]

56...♗f8 57.♙d3 h2 58.♗h1

58...♘g1 Without the rook, White can't fight anymore.

59.♙e2 ♘xe4 60.♘xe4 ♙f6 61.♘f3 ♗d8 0-1

(18) Ivanchuk, Vassily(2757)-Radjabov, Teimour(2793)

London ENG(9.3), 2013.03.25

[CE Team]

After move 40 and a little time trouble, we see the following endgame. It is clear that White is pushing, but is it enough to win the game?

41.♘c5 h5 A very logical move. As the defender, it is always good to exchange an extra pawn.

42.♗b1 I am not sure about this move. Black is now able to exchange the knight. [42.♙f3 Not allowing the Black knight to go to e4 looks very logical to me. The White king could go to d3 over e2.]

42...♘e4! I think the right decision. Black's position will be very passive, but very solid.

43.♙xe4 ♗xe4 44.♙f3 ♗ee7 Black is going to hold everything together on the 7th rank.

45.e4 White is centralizing as much as possible. The a5 move is not running away.

45...♗cd7 46.♙e3 ♗d5 47.f3 ♗d6 Black cannot do much more than waiting.

48.♖b6 I am not sure whether this move was right. The White rook must remain passive on d2. [White could have tried to keep both rooks active. 48.a5!? 48...♖d5 (It does not work now 48...♖ed7 49.♖b4 followed by Rb2.) 49.♖c5 ♖xc5 50.dxc5 ♖e5 51.♔d4 ♖e7 Black might hold this, but White is clearly better...]

48...♖ed7 49.♖d2

49...hxg4? What a mistake! Black plays very logically, exchanging a pawn, but White is now going to get the h-file, and this is deadly. [49...h4 would lead to a very passive position, which is very difficult to break.]

50.hxg4 ♔f7 51.a5 White made the maximum he could. Now it is time to try to find a winning plan.

51...♔e7 52.♖b1 ♔f7 53.♖h1 Over to the h-file! It is definitely an idea. [53.♖b4? would be a good move with the idea

of playing Rdb2, but Black always counts on 53...c5! with, probably, just a draw.]

53...♔g7

54.♖h5 What can be White's idea now? To play e5 or to play Rdh2 at a good moment.

54...♖d8 Black was probably afraid of playing Kg6 because of [54...♔g6 To make sure that the pawn on g5 is protected against White's e5 push. 55.♖h8! The White rook is entering the position. 55...♔g7 56.♖b8 and White has clearly obtained a lot! An exchange of rooks would be bad for Black because the d5 move would be possible.]

55.♖d1 White is taking away the rook from the 2nd rank, in order to be able to play Rdh1 and have the escape Kf2-Kg3 against Black's Rxd4, without allowing him to play Rd2+ and Rxh2, exchanging the rooks. [55.e5! would have been strong as well, but we will see a similar continuation just the next move.]

55...♖8d7 This move is losing, but it is hard to give Black a good advice here... [It does not help much to play 55...♔g6 56.♖dh1 ♖xd4 57.♖h7 and mate next move.]

56.e5! The final blow...

56...♖d5 57.♖dh1 ♔f7 [Loses on the spot 57...♖xd4 58.e6! and Black is losing a rook. 58...♖d3+ 59.♔f2 ♖d2+ 60.♔g3+—]

58.♖h7+ We are now in the technical part of the game.

58...♔e6 59.♖xd7 ♔xd7 60.♖h7+ ♔e6 61.♖h6! There is no reason for White to get seduced by the b7 pawn... The f6 pawn is much sweeter.

61...c5 is probably the best chance for Black, but it is simply too small...

62.♖xf6+ ♔e7

63.♖b6! The last exact move. From now on, things are very easy...

63...♖xd4 [63...cxd4+ 64.♔e4 and the game is over.]

64.♖xb7+ ♔e6 65.♖g7 capturing the g5 pawn away and, with it, winning the game.

65...♖a4 66.♖xg5 ♖xa5 67.f4 The 3 pawns are starting their march.

67...♖a3+ 68.♔d2 ♖a2+ 69.♔c3 ♖f2 trying to create "hole" in the pawns, but it is too late for anything.

70.♖g6+ ♔d5 71.♖d6+ ♔e4

72.♖f6 White can even choose which pawn to push, e- or g-.

72...a5 The e-pawn is closer to the promotion square on the 8th rank :).

73.e6 ♔d5 74.f5 ♖e2 75.♖f8 ♔d6 76.f6 A really great endgame technique by White! **1-0**

Editorial Preface

First of all, we hope you all had a great New Year's celebration and want to wish you one more time only the best for 2014!

The World Youth Championship in Al Ain came to an end. As usual India, China and Russia got the most medals.

A lot of Christmas/New Year opens also came to an end.

15 In Zurich Wojtaszek won very convincingly with 6/7, the second place went to Kovalenko and the 3rd to one of your commentators, Balogh Csaba, with an excellent 5.5/7.

18 During the traditional Groningen Open, which was won by Andriasian, the organizers managed to create a 4 classical games match between two chess legends, Anatoly Karpov and Jan Timman. The match ended 2.5-1.5 in favor of Karpov.

26 The next week of chess is looking a bit empty, but from the 11th of January we can follow the top players of the World participating in the Tata Steel Chess tournament with Aronian, Nakamura, Karjakin and many more super stars.

27

We wish you a lot of chess fun with the usual issue of CEWN.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

**(1) Wojtaszek, Radoslaw(2711)
- Klauser, Markus(2386) [E15]**
37th Zurich Christmas 2013(2.1),
2013.12.27

GM Arkadij Naiditsch
2718

Wojtaszek has been in great shape lately. Zurich was not different as he managed to win the event in a very convincing way. We will now see one of his nice victories in the early stage of the tournament. Black tries to be creative very early on and as usual it goes very wrong!

1.d4 Wojtaszek has been Anand's second for the last 3-4 years and we can very often see how well he is doing in the opening, coming up with new interesting ideas.

1...♘f6 2.c4 e6 3.♘f3 b6 4.g3 Another game in the Queen's Indian.

4...♙a6 5.♚b3!? Not the main, but a very interesting move for White.

5...d5?! It is hard to imagine this being the best option for Black. [5...♘c6 6.♘bd2 ♘a5 7.♚c3 c5 would take us back to

the main line.]

6.cxd5 ♚xd5 [6...exd5 7.♙g2 followed by Nc3 0-0 and a quick Ne5. Now we can see how useful the queen on b3 can be, putting immediate pressure on the d5 pawn.]

7.♚c2!? An interesting move. It was of course also an option to go for an endgame, but with 7.Qc2!? Wojtaszek wants more than just a better endgame. Now Nc3 is coming with tempo and after Bg2 and short castle White will also be threatening the very dangerous Ne5.

7...♙b4+ A logical move as Black has to be fast with castling.

8.♘c3 0-0 The most simple, but not the best. [Black had the option of playing 8...c5! The position is now immediately becoming very sharp. 9.♙g2! is probably also White's only option to fight for an advantage. 9...cxd4 10.O-O dxc3 Once again White needs to find a strong reply:

11.bxc3! Although the position is super complex, White is probably better.]

9.♙g2 ♚b5? This is already a serious mistake. The black queen is taking a bad position on b5. [Black should have looked for active play with 9...♘c6! 10.O-O ♚c4 and although White is probably better, the position is still unclear.]

10. ♖e5! The diagonal is finally open and White is making quick use of it.

10... ♘d5 There is no other way to protect the rook on a8.

11. 0-0! This is probably what Black blundered...

11... ♙xc3 12. bxc3 ♘c6 [12... ♖xe2 was not much better as after 13. ♖xe2 ♙xe2 White has the cool 14. ♖e1! ♙a6 15. c4 winning a full piece and of course getting a winning position.]

13. c4 [13. a4 would end the game too.]

13... ♘xd4 Black already doesn't have a choice.

14. ♖d2 Both black knights are under attack and with the pin from the g2 bishop it is obvious that Black is going to lose some material.

14... ♖c5

15. ♙b2! The last precise move and now the game is basically over as Black is losing a piece. [15. cxd5?! was less precise as after 15... ♘xe2+ 16. ♖h1 ♖ad8 Black is still fighting although White's position is close to winning after 17. ♙b2]

15... ♘xe2+ And the piece is gone...

16. ♖xe2 ♖ad8 17. ♖ac1 Black only has 2 pawns for a full piece, plus White's monster bishop on b2 gives him excellent attacking chances. The game is over.

17... f6 18. ♘d3 A nice and short victory by the Polish Nr1 and we can see how tricky it can get for Black if he is facing unknown openings and not playing precisely enough. **1-0**

(2) Wojtaszek, Radoslaw(2711) - Popov, Ivan(2640) [D11]

Zürich Open,
2013.12.30

GM Csaba Balogh
2646

Radoslaw Wojtaszek convincingly won the Zürich Open with 6 points out of 7 games. We will have a look at his nice victory from the last round.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 The very solid Slav defence is on the board.

4.e3 ♘g4 White has several setups here, but Wojtaszek goes for one of the main one.

5.♖b3 ♖b6 6.♗c3 e6

7.♗h4 White aims to get the bishop pair by catching the g4 bishop with h3-g4. Black has no good way to prevent this plan, but the position remains closed and the two bishops will not have such a big importance for the moment.

7...♗h5 8.h3 ♖xb3 The trade of the queens is always a big question in the Slav. Black should usually not be afraid of Qxb6 because it improves his pawn structure, while Qxb3

is always double edged as one has to know if the doubled pawns or the opening of the a-file has bigger value. [In the 5th round of the same tournament Wojtaszek scored another nice victory in this line. His opponent then played 8...♗bd7 9.g4 ♗g6 10.♗xg6 hxg6 11.♗g2 g5 12.♗d2 Wojtaszek-Kovalenko, Zürich 2013.]

9.axb3 ♗a6 The knight is going to occupy an excellent position on b4. White cannot win with cxd5 and Bxa6 because of the intermediate move Nb4 and Black is threatening Nc2 check.

10.g4 ♗b4

11.♔e2! Without the queens on the board White should not worry about having the king in the middle of the board in such a closed position.

11...g5?! Popov played this move without thinking, clearly showing that he was still in his preparation. The machine gives a very nice evaluation for Black, but if we continue analyzing we come to the conclusion that White's chances are preferable.

12.gxh5! If the knight retreats the bishop survives. However White loses a pawn now...

12...gxh4 Black wins the h5 pawn but the computer wrongly evaluates its importance, as the doubled h-pawns can hardly

be called a material advantage. On the other hand the two bishops slowly start to work.

13. ♖g2 ♜xh5 **14.** ♖f3 ♜f6

15. ♖d2 White does not need to hurry, he simply finishes the development and organizes his play on the queenside. He is going to double his rooks on the a-file and it soon becomes clear that the nice b4 knight might get completely misplaced...

15... ♜d7 **16.** ♖a5 ♜b6 Black provokes the movement of the c4-pawn. In general it is a good idea, but it costs too much time and also the b4 knight loses its support. [Black should definitely have played 16...b6 followed by a5!, stabilizing the b4 knight.]

17. c5 ♜c8 **18.** ♖ha1 ♜a6 Black would have wished to lock the queenside with Nc7 and a6, but White finds a great idea to break the defence!

[Other moves, for instance 18... ♖e7 would have been met by 19. ♖5a4 ♜a6 20. b4 ♜c7 21. e4 and Bf4 next, with more than enough compensation for the doubled h-pawns.]

19. ♖xa6! A very deep exchange sacrifice. It soon becomes clear that White can create very strong pressure against the black pawns.

19...bxa6 20. ♖xa6 ♜d7 **21.** b4! White would like to break through with b5, after which the passed c-pawn becomes very strong. Black's pieces are passively placed and he doesn't have enough time to consolidate...

21...♖b8 In the next three moves White sacrifices some more pawns in order to open the center in front of the black king. The rook and the three minor pieces are going to be able to create decisive threats.

22. b5! White does not count the material, he only focuses on the attack.

22...cxb5 23.♘h5!? [The direct 23.e4 was also quite promising if White managed to foresee the following line: 23...b4 24.♗xd5!! exd5 25.♘f4 ♖a8 26.exd5± An amazing position. Despite the extra rook, Black has problems to hold the central pawns supported by the two bishops. d6 is coming next.]

23...♙e7 [If Black tries to fight against the e4 break with 23...f5

24.e4!! anyway would have been a beautiful move. 24...dxe4 (24...fxe4 25.♘g4+- The loss of the e6 pawn followed by Nxd5 would have meant the end of the game.) 25.♘f4 ♖a8 26.♘f7+- Black collapses.]

24.e4! Wojtaszek continues his correct strategy to open the center.

24...b4 [24...dxe4 is once again nicely refuted by 25.♘g5+ f6 26.♗d5+! exd5 27.♘xf6+ ♙d7 28.♘xh8+-]

25.♘g5+! ♙e8 [25...f6 again loses as in the 24...dxe4 line: 26.♗d5+! exd5 27.♘xf6+ ♙d7 28.♘xh8+-]

26.♗a4 ♘e7 [26...dxe4 would have been met by 27.♖xe6+ ♘e7 28.♘f4 With similar stories as in the game. 28...♖b7 29.♖c6! ♙d8

30.♘g4! traps the knight! Black's pieces are completely without coordination!]

27.♘f4 ♖b5 [27...♖a8 is not better either. White wins after 28.exd5 exd5 29.♘f3! and this time the rook is going to be trapped.]

28.♖xe6 [28.♖c6! immediately was even stronger. 28...♙d8 (28...♙d7 29.♖c7+ ♙d8 30.♘xf7+-) 29.♘xf7+- White takes on e6 next and the game is over.]

28...dxe4 29.♖c6! ♙d7 [29...♙d8 30.♘g4+- is over on the spot.]

30.♖c7+ ♙e6 Black has managed to save his c8 knight, but now his king gets into a mate net. Wojtaszek brings a new piece to the attack.

31.♙e3! ♖d8 [31...f5 loses to 32.♘e2 ♖a5 33.♘c4+ ♙f6 34.♘e5+-]

32. ♖xe4 f5+ 33. ♖d3 ♖a5

34.b3 A spectacular final position. Black decided to put an end to his suffering in such an awkward position where he cannot move with any of his pieces. White on the other hand wants to improve his position with Kc4 and d5. Black cannot try to create counterplay with Bf6 because Bf7 mates immediately. A dream position for White and a nightmare for Black. A brilliant game! **1-0**

(3) Jobava, Baadur(2705)
- **Oleksienko, Mikhailo(2622) [B00]**

Al-Ain Classic Open A 2013(6.1),
2013.12.24

GM Csaba Balogh
2646

A really great and entertaining game with a beautiful mate at the end.

1.d4 d5 2. ♘c3 Baadur Jobava is known for his original and resourceful style. He often chooses tricky openings.

2... ♘c6 A rare response against a rare line. Black's usual answer is 2... Nf6.

3.e4! The most challenging move for sure. White tries to make use of the placement of the c6 knight and the fact that Black cannot hold the tension in the center with c6. Actually there are more than thousand games for this position in the database, but it mainly arose from the move order 1.e4 Nc6 2. d4 d5 3.Nc3.

3... dxe4 [3... e6 would have transposed to an inferior line in the French defence.]

4.d5 ♖e5 5.♔d4! White aims for a very quick development connected with castling queenside.

5...♘g6 6.♙e3 Jobava does not want to waste any time on recapturing the pawn and rather finish the development as soon as possible. [6.♔xe4 is the other main line and a good alternative to the text move. Most of the games continue with 6...♘f6 7.♔a4+ ♕d7 8.♙b5 a6 9.♙xd7+ ♔xd7 10.♔xd7+ ♘xd7 11.♘f3 With a slightly better endgame for White.]

6...e5! A strong reaction by Black. After some careless moves he could have got stuck in with his pieces...

7.dxe6 ♙xe6

8.♘ge2 This is the novelty of the game. I doubt that it was a prepared one but it is a rather logical one. Black needs to trade the queens now or in the next move as White is threatening to play 0-0-0 and Qa4 and then the knight takes back with tempo as it attacks the e6 bishop. 8.Nxe4 and 8.Qxe4 mainly happened before.

8...♘f6 9.0-0-0 ♔xd4 10.♘xd4 ♙g4 Black saves his bishop with tempo. [After the passive 10...♙d7 White takes the initiative with 11.♘db5 winning back the sacrificed pawn.]

11.♙b5+ White continues his strategy to punish Black for his king who is stuck in the center.

11...c6

12.♘xc6! I can very well imagine that Jobava made this move without thinking. Such intuitive sacrifices run in his blood.

12...a6! A necessary intermediate move. [On the direct 12...♙xd1 White has 13.♘xa7+ ♔e7 14.♔xd1 and Black has problems with his king.]

13.♙a4! White has to maintain the pin but now the discovered checks with the knight could be met by b5. That is why Black had to include the a6 move...

13...♙xd1 14.♔xd1 ♙e7! Another calm and good reaction. Black tries to ensure the safety of his king. [14...b5

15.♙xb5!! axb5 16.♘xb5 And Black cannot deal with the Nc7 threat. Even 16...♔c8 runs into 17.♘c7+! ♔xc7 18.♔d8#]

15. ♖xe7+! Otherwise Black already plays b5 and castles kingside. On the other hand White is still an exchange down and he trades another attacking piece...

15... ♔xe7 16. ♕c5+ ♔e6 The king is looking for a shelter on the kingside, but in front of his own pawns.

17. ♖e2 Bringing a new attacker. [17. ♖d6+ 17... ♔f5 It is not clear how White should continue here.]

17... ♖hd8 Oleksienko uses finding the best defensive resources. He activates his rook and is not afraid of the direct checks.

18. ♖d4+! White must avoid the trade of the rooks. With the 3 minor pieces he would hardly be able to create mate nets and soon the material disadvantage would count.

18... ♔e5 19. ♕b6! Threatening to take the rook followed by Nc6, winning another exchange, and also Bc7 mate! The next move is forced again. **19... ♖dc8**

20. ♖e2! Using the fact that the rook has been sent away from the d-file, White refreshes his ideas of when he played 17.Ne2. He wants to pursue the king with Bd4.

20... ♖f8! According to the computer Black found the best defense again. The idea is to drive the knight to e6 in order to control the checks and Black also frees the g6 square for his king.

21. ♕d4+ ♔f5 22. ♖g3+ ♔g6 It looks like Black has solved all his problems and settled his king into safety. However such a creative player as Jobava never runs out of ideas...

23. f4! exf3? Black probably missed the next move, otherwise he would have opened the position in front of his king. [23... h5! should have been played, finally solving the problems around the king. White only has compensation for the exchange... 24. f5+ ♔h6! (24... ♔h7 25. ♕xf6 gxf6 26. ♖xh5 White wins the f6 pawn as well. He has the upper hand...)]

24. c3!! Suddenly the a4 bishop which was already out of the game joins to the attack with extreme power. Black cannot hide his king anymore with h5-Kh7, because the light squared bishop controls everything. From a practical point of view the game is hopeless for Black, but of course the machine still continues defending tenaciously...

24... fxg2 [24... ♖e6! 25. ♕c2+ ♔g5 26. ♕e3+ ♔h4 27. ♖f5+

26...♔g4 [26...♖h4 was not better either. 27.♙d4+ ♘g4
28.♘f5+ ♔h3

27. ♖d4+! ♔h3 And here comes the final blow! [27... ♖f3
28. ♗g1!+- and Bd1 mates next.]

11

(4) Karpov, Anatoly(2619) - Timman, Jan H(2600) [E15]

Karpov-Timman Match 2013(4),
2013.12.29

GM Arkadij Naiditsch
2718

Alongside the Open tournament in Groningen, the organizers decided to hold a match between two chess legends, Karpov and Timman, in 4 classical games. During the past years Timman was still quite an active chess player while Karpov just played some rapid events from time to time. We are in the last game of the match and the first 3 games ended in a draw, but each game was fought until the end.

1.d4 ♘f6 **2.c4** e6 **3.♘f3** b6 The Queen's Indian was already one of Karpov's favorite openings over 30 years ago, when he was World Champion.

4.g3 is still the main line nowadays.

4...♗a6 **5.b3** [During the last years we more often saw 5.♖c2]

5...b5 A rather rare move. [5...d5 would lead us back to the main lines.]

6.cxb5 ♗xb5 **7.♗g2** ♗b4+ Personally I don't like this move too much as it seems like Black will be a bit worse after [7...d5 followed by Nbf7 and a quick c5 should be the way to go on for Black.]

8.♗d2 a5 a5 is an useful move in many ways.

9.a3 [Another option was maybe to play 9.♘c3 9...♗xc3 Black has to give up the bishop pair. 10.♗xc3 And now the very important 10...a4! not letting White play a4 himself, fixing the Black pawn on a5. I would still choose to play White here, but the position seems to be close to equal.]

9...♗xd2+

10.♖xd2! Of course 10.Nbd2?! would not be the best. The knight's place is on c3!

10...♗c6 Quite a risky decision by Timman as Black could get problems on the c-file. [10...d5 still looks like the best option.]

11.O-O ♖c8 A very typical maneuver. Black brings his queen to a nice position on b7 to gain more control over the e4 square.

12.♖c2 looks a bit too slow. [The more dynamic 12.♘c3 12...♖b7 13.♗fe1! with the idea of playing e4 next would put Black in quite some trouble.]

12...♖b7 **13.♘bd2** Now we can see that White has twisted some ideas. 10.Qxd2 followed by Qc2 and Nbd2 just doesn't make much sense.

13...O-O **14.♗fc1** Black still needs to be careful to equalize here as White's pressure on the c-file is quite unpleasant.

14...♗a7 A very logical move. Overprotecting c7 is never wrong.

15.♗a2 This move was not really needed and it was easier to play 15.Rab1 right away.

15...♗d5 **16.♗b2** d6 Black finally solves his last problem. The knight on b8 has to get out and then the position should be

pretty even.

17. ♖e1 White already doesn't have anything better, but now after the exchange of the light squared bishops, the c6 square is getting weak.

17... ♟xg2 18. ♖xg2 ♜bd7 All black pieces are out.

19. ♔c6 Karpov tries to get quick play on the c-file. A very logical decision and probably the only practical chance.

19... ♜b8? A serious mistake. It was time for more active measures. [19...e5! Black should have tried to create some play, not giving White enough time to stabilize himself on the c-file. 20. ♜bc2 (White doesn't get anything either after 20. ♔xb7 20... ♜xb7 21. ♜bc2 c5!) 20... ♔b8 The position should be close to equal.]

20. ♜bc2 Now Black has huge problems protecting the c7 pawn.

20...h6? looks like g to me. Of course there was still no reason to give up the hopes on the c7 pawn. [20... ♔xc6 21. ♜xc6 ♟e8 would just lead to a worse endgame, but nothing spectacularly bad for Black.]

21. ♔xc7 White is a full pawn up now.

21... ♔a6 22. ♔c4 ♔xc4 It is already difficult to give any advice to Black...

23. ♜xc4! A very interesting moment. White could take on c4 with 3 pieces, but Karpov probably chooses the best one. To control the c-file is more important than having connected pawns.

23... ♟b6 24. ♜c6 ♟e8 [24...d5 was probably a bit more stubborn, but after 25.f3 followed by Kf2-e4 and Ke3 it is also hard to imagine that Black has any chances to survive this game.]

25.e4 Of course White takes control over the center.

25... ♔f8 26. ♟e3 ♔e7 White is a clear pawn up with no counterplay for Black. But White still needs to choose a winning plan.

27.d5!? An interesting way to convert the advantage. [Personally I would play 27. ♟f1 without much thinking. 27... ♔d7 28. ♟e2]

27... ♔d7 Black has all the pieces in the defence.

28.dxe6+ fxe6 29.e5 Now we can the idea of 27.d5!?. White immediately tries to crush Black in the center.

29...d5 A very solid move. There is no hurry. [29...dxe5 is not much better as after 30.♘f3 Black's position is lost.]

30.♖6c5 [Karpov was probably just too lazy to calculate this line: 30.♘f3 30...♘c4 What else... 31.bxc4 ♜xc6 32.cxd5+ ♚d7 33.♘d4 White is also winning here.]

30...♚d8?! After this move there is no more hope. [30...♖c8 After the exchange of one rook Black could have continued to defend a very bad position.]

31.f4 White defends from Nd7.

31...♘d7 32.♖c6 Now White has only the very last step to do, to bring the knight to d4.

32...♘c7 33.a4 Black is completely paralyzed.

33...♖b6 34.♖xb6 ♘xb6 35.♖c6 What a domination!

35...♘d7 36.♘f3 White makes his last step to a full point, the knight is taking place on d4.

36...♘b8 37.♘d4 ♚d7 I guess it was time for Timman to resign the game, but maybe he was just waiting until the first time control is over.

38.♖b6 It is really a great pleasure to be White here ...

38...♘ba6

39.f5! Creating a passed pawn on the e-file.

39...♘c5 40.fxe6+ ♘5xe6 41.♖d6+ A fighting game, but it is a pity that Timman made it ia bit too easy for Karpov. Giving up the pawn on c7 was really unnecessary. Well, even legends are getting older! :) **1-0**

Endgame section

(15) Balogh, Csaba(2648)
- Turner, Matthew(2509)
Zürich Open,
2013.12.27

GM Csaba Balogh
2646

This healthy extra pawn in the rook endgame should be sufficient for the win, but it still requires some technique. The main problem is that the white king cannot pass the 5th rank in order to collect the g6 pawn, while if the rook moves Black checks the b4 pawn with Rd4 and he might get counterplay with his b5 passed pawn.

45. ♖e8+ [45. ♖e6 is not good because after 45... ♖d4+ 46. ♔g5 ♖xb4 47. ♖xg6 ♖c4 Black holds.]

45... ♔c7 [If the king moved to the d-file I was intending to play 45... ♔d7 46. ♖e5 ♖d4+ 47. ♖e4 ♖d5 48. ♔e3! I'm threatening to trade the rooks with Rd4 and after for instance 48... ♔c7 49. ♖e6 Black has no time to find counterplay... 49... g5 50. ♖b6+--]

46. ♖e7+! To execute the winning method it is very important to cut the black king along the 7th rank.

46... ♔c8 White only has one winning plan, but it can be executed in different move orders. [46... ♔c6 would have been met by 47. ♖e6+ ♔c7 48. ♖d6! Forcing the trade of rooks and the arising pawn endgame is easily winning for White. 48... ♖xd6 49. cxd6+ ♔xd6 50. ♔g5+--]

47. ♖g7 Forcing Black to let the king cross the 5th line.

47... ♖d4+ 48. ♔e5! ♖xb4 We have reached the critical position. [48... ♖xg4 loses the same way as in the game: 49. c6+--]

49. c6? After this mistake Black could have survived by miracle... The plan would have been the following: White wants to promote the c-pawn with the help of the back rank

mates and Black cannot avoid it by giving vertical checks because of his own b5 pawn, which gives shelter to the king on b6... [49.♔d5! was the most precise move, with the same idea that happened in the game. 49...♖xg4 50.♕c6 Threatening mate. 50...♔d8 51.♕b7+- And the c-pawn promotes.; 49.♖xg6 was also winning as the following line demonstrates: 49...♖b1 50.♕d6 ♖d1+ 51.♕c6 b4 And now

52.♖g8+! ♖d8 53.♖g7! ♖d4 (53...b3 54.♖c7+ ♔b8 55.♖b7+- wins the pawn.) 54.g5 b3 55.♖c7+ ♔d8 56.♖b7 ♖g4 57.♖b8+ ♔e7 58.♖xb3 White has reached an easy theoretical win. 58...♖xg5 59.♖d3+- wins with the bridge building method.; Another tempting move was 49.♕d6? but it also spoils the win after 49...♖d4+ 50.♕c6 b4 In comparison to the 49.Rxg6 line, White is behind a tempo 51.♖xg6 b3 52.♖g8+ ♖d8 53.♖g7 ♖d2! and Black saves the game by playing 54.♖b7 b2 55.g5 ♖g2=]

49...♖xg4? After this natural move Black loses. [49...♖b2!! was the only move. The rook must stay on the 2nd rank... We will get the point later. 50.♕d6 ♖d2+ 51.♕c5 b4 52.♕b6! Everything goes according to White's plan, but suddenly after (52.♕xb4 52...♖d4+ 53.♕c5 ♖xg4 is a draw.) 52...b3 53.♖a7 ♖a2!! is the key and Black prevents the mate.; 49...♖b1? doesn't work as Black does not have Ra2 in the end. 50.♕d6 ♖d1+ 51.♕c5 b4 52.♕b6 b3

53.♖a7! ♔d8 54.c7+ ♔d7 55.♕b7 ♖c1 56.♕b8+-]

50.♕d6 ♖d4+

51.♕c5 Without the b5 pawn, it would have been a dead draw, but now Black does not have a check on the b-file after Kb6.

51...♖d3 [51...♖d8 52.♕b6 b4 53.♖a7+-; 51...♖c4+ 52.♕b6

(Obviously White should not be greedy with 52.♔xb5?? 52...♖c2=) 52...♔d8 53.♔b7 b4 54.c7++–]

52.♔b6 b4 In comparison to the 49...Rb2 line, the b-pawn did not reach the 3rd rank, so White can trade the rooks and promote a queen.

53.♖g8+ [Black resigned in view of 53.♖g8+ 53...♖d8 54.♖xd8+ ♔xd8 55.♔b7 b3 56.c7++– As we have seen we must focus until the last moment in rook endgames, because sometimes such completely won endgames could be spoiled by obvious moves and also the defensive side always has his potentials.] **1-0**

**(16) Kovalenko, Igor(2643)
- Sethuraman, S.P.(2553)**

37th Zurich Christmas 2013(6.6),
2013.12.29

GM Arkadij Naiditsch
2718

White's position of course looks like it's close to winning, as a passed a-pawn and another passed pawn on the d-file should be enough to win the game. The white king on f5 is also very active, but Black still has some counterchances, as the h-pawn can become very fast.

49.♔f5 It is clear that Black's only chance is to try and create some counterplay with the h-pawn and at the same time try to stop the a-pawn by putting the rook behind it.

49...h5 50.♖a7+ Putting the black king on the 8th rank cannot be wrong.

50...♔e8 The black king will try to stop the d-pawn.

51.a6 With the simple threat of playing Rb7-a7 next.

51...♖a4 So far things were quite forced, but what's next?!

52.d6! The most simple and strong. White is preparing to take with the rook on g7 and Black cannot stop White from doing that.

52...h4 Any other moves just don't make sense.

53.♖xg7 h3 [Now we can see the idea of 52.d6! 53...♖xa6 The white king is in time to take a winning position on e6. 54.♔e6! ♔f8 55.♖h7 With an easily winning rook endgame.] Now after

54.♖h7 h2 55.♔e6! Precise play until the end. [It was still not too late for White to make a mistake by playing 55.♖xh2??

55...♔d7! and the position is a draw.]

55...♖e4+ White wanted to mate in 1 with Rh8.

56.♔d5 ♖e1 [Now after 56...♖a4 57.♖xh2 is already winning as Black doesn't have Kd7 anymore because the pawn on d6 is protected by the king on d5. 57...♖xa6 58.♔e6 White is

winning.]

57.a7 The most simple...

57...♖d1+ Black is chasing away the white king from the center, but he cannot save the game.

58.♔e5 ♖e1+ 59.♔d4 ♖d1+

60.♔e3 ♖e1+ 61.♔f2 Black doesn't have any checks anymore.

61...♖a1 62.♖xh2 Of course after 62...Rxa7 63.Rh8 Kd7 64. Rh7 Kxd6 and 65.Rxa7 White is just a rook up. Nice rook endgame technique by the young Russian player. **1-0**

Clash of the Titans

- Botvinnik, Mikhail [D78]

World Championship 23th(11),
1960.04.07

GM Kamil Miton
2591

1.♘f3 ♘f6 2.g3 g6 3.♗g2 ♗g7 4.O-O O-O 5.c4 c6 6.b3 [6.d4 6...d5 (6...d6 7.♘c3 leads to a position from the KID.) 7.cxd5 (7.b3 7...♘e4 8.♗b2 transposes to the game.; 7.♖b3 With the idea to hold the center.) 7...cxd5 White is looking for a small plus here but in practice most of the games finish in a draw.]

6...♘e4 7.d4 d5 8.♗b2

8...♗e6 Black is going to force the exchange on d5.

[8...dxc4 9.♖c2!+= (9.bxc4 9...♖b6 10.♖b3 c5 With Nc6 next and Black gets good counterplay over the d4 square.);

8...♗f5 is the most promising plan for Black. 9.♘bd2 (9.e3 9...♘d7 10.♘c3 ♘xc3 11.♗xc3 ♗e4 Black's position is very solid and Radjabov once showed the plan with dxc4 and c5, with the idea to get play against the hanging c4-d4 pawns.) 9...♘d7 10.♘h4!? ♘xd2 11.♖xd2 ♗e6 12.e4 dxe4 (12...dxc4 13.d5!) 13.♗xe4 ♗h3 14.♖fe1 And White got a small advantage thanks to his better structure in the game Nakamura-Leko.]

9.♘bd2 ♘xd2 10.♖xd2! [10.♘xd2 The knight on d2 is very passive and Black immediately equalizes after the typical. 10...c5=]

10...♘a6 [10...dxc4

11.♘g5! ♗d5 (11...cxb3 12.♘xe6 fxe6 13.axb3 With good compensation and Black is not able to get rid of the weak pawn after 13...e5 because of 14.♖b4±) 12.e4 h6 13.exd5 hxc4 14.bxc4±; 10...a5!? This other typical moves with the idea to push a4 and create some weaknesses also deserves attention.]

11.♖ac1 ♖d6 12.♘e5 ♖fd8 13.♖fd1 Both sides develop their pieces to optimal squares. White has an advantage thanks to his better center and the bad knight on a6.

13...Rac8 [13...Qxe5!? 14.dxe5 Qb4 (14...Qc7 15.cxd5 Qxd5 16.e6!?↑ Activating the bishop.) 15.Qc3 Qa3 16.c5 White is better because the queen on a3 is not safe and one of the ideas could be Qh6-Rd4-Rh4.]

14.Qa5↑ White activates the queen.

14...dxc4 [14...Qb4

15.Qxc6! bxc6 16.Qxa6 dxc4 17.Qa3 Qb6 18.Qxb6 axb6 19.bxc4 Qxd4 20.Qxd4 Qxd4 21.Qxe7± Black can get some counterplay against the weak a2-c4 pawns but in general White is a pawn up and has the advantage.; 14...Qxe5 15.dxe5 Qb4 is probably Black's best option because without the queens the position will be safer for him. 16.Qxb4 Qxb4 17.a3 Qa6 18.c5 With Bd4 next. The idea is to improve the position on both sides with a4-b4 and f4-h3-g4, with a long term advantage for White.]

15.Qxc4+= Qc7 [15...Qb4 16.Qa3 (16.Qg5+=) 16...Qxa5 17.Qxa5 Qc7 18.e3 With a clear advantage in the endgame.]

16.Qe1! Because White has more space it is good to keep the queens on the board.

16...Qb8 17.e4 Qxc4 [17...b5 18.Qe3 c5 is an interesting idea to get counterplay in the center but after 19.e5 cxd4 20.Qxc8 Qxc8 21.Qxd4+= White keeps an advantage because of the weak black structure on the queenside.]

18.Qxc4 [18.bxc4

18...c5! (18...e5 19.d5 Qc7 20.h4 With a strong pawn on d5 and two bishops. The idea to play over the dark squares might not be enough for Black, especially since White always has the unpleasant idea Bh3 and Kg2-h5 etc...) 19.e5 cxd4 20.Qxd4 Qc5]

18...♘c7 [18...e5 19.♙h3±]

19.♙h3 e6

20.♙c1! A good idea. The bishop comes into play from the other side and in this case White will get the possibility for some d5 breaks.

20...♖a8 21.♙g5 Two bishops and a better center give White a clear advantage.

21...♖e8 [21...♖d7 22.d5?! doesn't work yet. (22.♖e3+=) 22...cxd5 23.exd5 ♖xd5 (23...♘xd5 24.♖xc8+ ♖xc8 25.♙xe6!±)]

24.♙xe6 fxe6 (24...♖xd1 25.♙xf7+! A nice tactical idea. 25...♙xf7 26.♖xd1 ♙g8 27.♖d7+--) 25.♖xc7 ♖xd1 26.♖xc8+ ♖xc8 27.♖xd1 The pawn on e6 has no meaning so the position is equal.]

22.♖d2

22...f5!? Black doesn't want to stay passive without a plan anymore so the idea of this move is to get the d5 square for the knight, but on the other hand Black gets a weak e6 pawn. [22...♘b5]

23.♙h6 Not obligatory, but Tal immediately wants to create an attack against the king! That's why he wants to exchange the bishops, especially since the black queen is very far away on a8.

23...♙xh6 24.♖xh6 ♖e7 25.♖e1 After f5, the e-file has become weak.

25...♖f8 26.♖c5?! [26.exf5 26...gxf5 27.♖e5+=]

26...♖d8 27.♖e5

27...♖ef7?! Black misses his chance to equalize. [27...♖xd4]

28.exf5 gxf5 29.♙xf5 ♖ef7 Black has counterplay on the f2 square. 30.♖1e4 ♕d1+ 31.♗e1 ♕d4 32.♖5e4 ♕c5 Xf2 33.♙xe6 ♞xe6 34.♖xe6 ♖xf2+ 35.♙h1 ♖f3+ With perpetual check. (35...♖xa2?? 36.♖g4+ ♙h8 37.♖xf7+-) 36.♙g1=; 27...f4 28.♖d1 fxg3 29.hxg3 ♖ef7 30.f4 (30.♖d2 30...♖xf2!) 30...♖d7 And Black gets counterplay.]

28.♖d2 [28.d5 28...fxe4 29.dxe6 ♖xf2 30.e7 ♕d4! A nice trick.] **28...♖d6**

29.♙f1! The bishop is going to get activated from the other side. [29.exf5 29...exf5 30.♙f1 ♙h8 (30...f4 31.♙c4 ♞d5 32.g4+= With a clear advantage because the rooks on the e-file are better than the rooks on the f-file.; 30...b5 Not allowing Bc4 but creating additional weaknesses on the c-file.) 31.♙c4 ♖g7 32.a4 Preventing b5. White is much better thanks to his better pieces and the weak black king.]

29...♖d7 30.exf5 ♖xf5 31.♖5e4

31...♖f6?! Too passive! Black should be putting pressure on the d4 pawn because it is the only way to get counterplay. [31...♖d5! 32.♖1e3 Not allowing Rxd4 but after 32...c5 Black should be fine. 33.dxc5 ♖xd2 34.cxd6 ♖7xd6 And the isolated pawn on e6 will not be enough for White to create some problems in this endgame.]

32.h4↑ As Black has not put pressure on the d4 pawn White is going to play against the king.

32...♙g7 [32...c5]

33.h5 gxh5 34.♖h4 [34.♖g5+ 34...♖g6 35.♖xh5→]

34...♙g8 35.♙d3 ♖g7 [35...♖df7 36.♖e2 ♙f8 Not an easy move to find, with the idea of Rxf2 and keeping the possibility of Qxd4 (avoiding Bxh7) after Rxh5.]

36.♖e5! A strong move, now this rook will take on h5. [36.♖xh5 36...♞d5]

36...♖ff7 [36...♞d5 37.♖exh5↑]

37.♖h6 ♖e7 38.♖exh5 ♞d5 39.♖d2 ♞f6 40.♖h6 ♖d6 It is clear that White has an advantage but Black might be able to hold things together on the kingside, so let's check how Tal is going to improve his position.

41.♖f4 ♖f8 42.♖e3 ♞d5 43.♖xf7 ♖xf7 This was the idea. White exchanges one pair of rooks to avoid counterplay and

now activates the queen to get pressure on the other side.

44. ♖e5 ♜c7 45. ♖c5 And now Black is not able to control both sides!

45... ♖f3 Black is hoping for some Rxc3 tricks. [45...a6 46. ♖d6±]

46. ♕xh7+! +— Now White is winning by force.

46... ♖xh7 47. ♖g5+ ♜h8 [47... ♖g7 48. ♖d8+ ♖f8 49. ♖h8+—]

48. ♖d8+ ♜g7 49. ♖xh7+ ♜xh7 50. ♖xc7+ ♜g6 51. ♖xb7 White is two pawns up in the queen endgame.

51... ♖e4 52. ♖a6 [52. ♖xa7 52... ♖e1+ 53. ♜g2 ♖e4+ 54. ♜f1 ♖b1+ 55. ♜e2 ♖c2+ 56. ♜e3 ♖c3+ 57. ♜f4 is winning too.]

52... ♖e1+ 53. ♜g2 ♖e4+ 54. ♜f1 ♖b1+ 55. ♜e2 ♖c2+ 56. ♜f3 ♖f5+ 57. ♜e3 ♖g5+ 58. ♜e2 ♖h5+ 59. ♜d2 Of course White easily escapes from perpetual checks.

59... ♜f6 60. ♖xc6 ♖a5+ 61. ♖c3 ♖xa2+ 62. ♜e3 ♜f7 63. d5! After the pawn exchange it will be much easier to win.

63... exd5 64. ♖c7+ ♜f6 65. ♖c6+ ♜e7 66. ♖xd5 ♖a1 67. ♖e4+ ♜f7 68. ♜f4 ♖c1+ 69. ♜g4 ♖a1 70. ♖d5+ ♜f8 71. ♜f5 ♖b1+ 72. ♜f6 1-0

Editorial Preface

The Tata Steel tournament is already starting tomorrow, with Aronian, Nakamura, Caruana and many more in the A group. The B group is headed by Wojtaszek and Jobava.

We can be sure that there are many great and spectacular games to come and we will comment a few of them for you in the next issue.

As for other events, there is nothing "big" going on, but a few strong opens have come to an end:

The Basel Open was also won by Wojtaszek with the amazing score of 6.5/7.

At the 89th Hastings Chess Congress a big group of 7 players tied for first place with 6.5/9, but Mchedlishvili had the best tie-break.

The Rilton Cup was won by Hammer (Magnus Carlsen's second) with 7/9.

In the match of 8 classical games between Salem and Khismatulin the score is 3.5-0.5 in favor of the Russian.

That's all for this week and we will be back next Friday evening with the best moment from Wijk aan Zee!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Volkov, Sergey1(2623)**

Rilton Cup 2013-14(7.3),
2014.01.03

GM Csaba Balogh
Best rating: 2672

White scores a brilliant tactical victory...

1.d4 ♘f6 **2.c4** e6 **3.♘c3** ♙b4 **4.f3** Volkov uses his pet line, the Nimzowitch with 4.f3, which is a very effective weapon if someone wants to achieve a sharp and fighting position right after the opening.

4...d5 5.a3 ♙xc3+ **6.bxc3** O-O [The main line is clearly 6...c5 but of course the text move is also playable.]

7.cxd5 exd5 **8.e3**

8...♙h5 A direct attempt to complicate the matters. Black is threatening with Qh4 check, because g3 could be met by Nxg3 and the h1 rook falls. [I successfully employed the main line 8...c5 against Volkov back in 2005.]

9.♘e2 The standard placement of this knight, but in general

White would have preferred first to develop his bishop to d3. Now it is a little bit stuck there, which is the point of Black's previous knight move...

9...♖e8

10.g4! The standard move in this opening. A very special structure. White gains space on the kingside and he is not afraid of running with the king because he has full control over the center.

10...♚h4+ 11.♔d2 ♘f6 **12.♚e1!** Obviously White would be very happy to trade queens, as in the arising endgame he would have a clear edge with his great pawn structure and the bishop pair. Black needs to keep the queens on the board and should try to open the position in front of the d2 king.

12...♚h6 13.♘f4 Volkov improves on one of his own games with this novelty. Three years ago he played 13.Kd1.

13...c5! The most direct way to open the position.

14.♙d3 b6?! Black would like to trade the strong bishop with Ba6, but this plan is a bit too slow... [It was better to play 14...cxd4 15.cxd4 ♘c6 Threatening Nxd4. 16.♚g3 ♘d7! Driving the knight to b6, leaving from the g5 threat and giving free way for the queen. This would have been another very sharp game with mutual chances.]

15.h4! White makes use of the misplacement of the black queen!

15...♖fd7

16.♕g6!! What an astonishing move!! White cuts the queen's route to d6 and suddenly it is facing serious difficulties to avoid getting trapped.

16...hxg6 17.g5 ♖h7

18.h5! The queen is still facing the trapping problems and at the same time White launches a very strong attack!

18...♔f8! The only move. Freeing a square for the queen and trying to run away from the upcoming threats along the h-file. [Black loses after 18...gxh5 19.♖xh5 ♕f5 because of the following decisive attack: 20.♖h4 ♕f8 21.g6!+- Attacking the queen and threatening Rh8 mate.]

19.hxg6 ♕g8 20.♖g3! A very calm attacking move! White improves his most dangerous attacking piece. Giving a fatal check on d6 is on his mind.

20...♗b7 [Black cannot successfully defend against the attack with 20...f6 21.♖h7! ♖c6 22.♖h5 ♖e7 and here the strongest is 23.♔c2! followed by Qd6 next. (On the direct 23.♖d6 Black could still have some hope after 23...♖a5) 23...♖a5 24.gxf6 ♖xf6 25.♖f4+- Black collapses.]

21.♖xd5! White wins after this little combination. Volkov opens the diagonal for his queen to go to d6!

21...♖e5 Black tries to complicate the matters with this spectacular diagonal closing idea...Unfortunately for him Volkov was in top shape that day... [21...♕xd5 22.♖d6+ ♖e7 23.♖xd5+- traps the rook on a8!]

22.gxf7! ♖xf7 This is the only move, all other recaptures would have lost on the spot. [22...♔xf7 23.♖f4+-; 22...♖xf7 23.♖h8+-]

23.♖c7 White wins an exchange. He is already doing fine materially and after his central pawns start to march, Black is going to collapse...

23...g6 The only move again, otherwise White would have sent away the knight with g6 and when it moves Qd6 finishes the game.

24.d5! Perfect play. White obviously does not need to hurry with taking one of the rooks. He intends to place his pawns on light squares with e4 and when the c1 bishop joins the attack the game will be over. With such bad pieces, Black can hardly fight against this...

24...d7 25.e4! Following the plan.

25...de5 26.c2! Volkov continues his extremely powerful moves. The bishop is ready to go f4.

26...ac8 27.e6+ White prefers to keep his beast knight rather than giving it up for a passive rook... [27.dxe8!? 27...xe8 28.f4 followed by doubling the rooks on the h-file was also winning.]

27...e7 28.f4 c4 The blockader could not be held anymore on e5.

29.h4 White prepares for the invasion on h7. The poor queen on g8 is still paralyzed...

29...ed8 Resourceful defence. Black hopes for counterplay with Qe8-a4!

30.a4!? Prophylaxis against the Qa4 idea.

[The machine would have finished the game in brutal style with 30.h3! 30...e8

31.xc5! xc5 32.e6+ f8 33.f6! Threatening Rh8. **33...a4+ 34.c1 e8**

And here comes the final blow: **35.h8+! xh8 36.h8+ d7 37.h3+!** The king is forced back to the danger zone... **37...e8 38.e6+ f8 39.f6+ e8 40.xg6+ f8 41.f6+ e8 42.e6+ f8 43.g6+-** With mate to follow soon. Obviously a human being cannot play like this...

30...e8 [30...xd5 does not help because of the simple **31.xd8 xd8 32.exd5+-** White is material up and he still continues attacking.]

31.f7 [31.h7+- was also winning.]

31...e3+ [31...d7 32.f4! means the end of the game. Qf6 next is decisive.]

32.c1 xd5 The last desperate attempt, but it does not help.

33.exd5 ♖xd5 34.♗f4 It is already White who is an exchange up and the king on e7 is much weaker than the one on c1.

34...♔d7 [34...♖xc7 drops the queen after 35.♗xd5+ ♖xd5 36.♖e4+--]

35.♗xd5 ♗xd5 Black is just about to get compensation with his queen, but two strong defensive moves neutralize all the threats.

36.♖e4! Parrying the Qe3 check.

36...♔h8 37.♗e5! White is now out of danger and the game is basically over. Black plays on for a few more moves, but it does not affect the final outcome.

37...♗xe5 38.♖xe5 ♗xc3 39.♔d2 [39.♔c2+- was also good enough and the a1 rook joins the game.]

39...♖e8 40.♖xe8 [40.♖ae1 40...♖xe5 41.♖xe5 would have given zero chances. 41...♗xa4 42.♔g4+--]

40...♔xe8 [40...♔d4+ 41.♔c2 ♗d5 was the last chance, which would have forced White to find some only moves to win the game. Although they are not difficult at all...

42.♔e5! ♗b4+ 43.♔b3! ♔d3+ 44.♔c3!+- Black has no more useful checks and the game is over!

41.♖e1 ♔h8 42.♔g4+ ♔d8 43.♔f4 ♔c8 44.♔f6 ♔h4 45.♔c6+ Black resigned. White succeeded to finish the game in style after the brilliant 16.Bg6!! move! **1-0**

(2) Kacheishvili, Giorgi(2578) - Roiz, Michael(2614) [E56]

23rd North American Open 2013(8.5),
2013.12.29

GM Csaba Balogh
Best rating: 2672

White gives a very nice positional lesson, which reminds me on the classical Karpov games.

1.d4 ♘f6 **2.c4** e6 **3.♗c3** ♙b4 **4.e3** White chooses the Rubinstein variation of the Nimzowitch defence.

4...O-O **5.♙d3** d5 **6.♗f3** c5 **7.O-O** Both players are going for the main line.

7...♗c6 [Recently the variation starting with 7...cxd4 8.exd4 dxc4 9.♙xc4 b6 is considered to be extremely safe for Black, but of course the text move is another huge main line.]

8.cxd5!? This is the modern way to handle this opening. White creates an isolated pawn and starts to organize his play against it. [8.a3 is the most common move.]

8...exd5 **9.dxc5** ♙xc5 **10.h3!** This is the key move of the new setup. Before White prepares to develop his bishop to the long diagonal with b3-Bb2 he prevents Black's very important

resource to pin the knight with Bg4! It is interesting that Roiz was one of the first players who employed this move as White in the modern era, but this time he is on the other side. [10.b3 10...♙g4 is fine for Black.]

10...♞e7 [It is important that Black cannot get rid of the isolated pawn and equalize with 10...d4 because of 11.♗a4! and Black is in trouble. 11...♙e7? loses a pawn after 12.exd4 ♗xd4? 13.♗xd4 ♞xd4 14.♙xh7+!+-]

11.b3! The bishop is going to be excellently placed on b2.

11...♞d8 **12.♗e2!?** White would like to stop d4. The knight was about to go to e2 anyway. It does not only create an excellent blockade against the isolani, but it is also ready to attack with Nf4. [12.♙b2 happened mainly in the previous games. The point is 12...d4 does not equalize completely because of 13.exd4 ♗xd4 14.♗a4! ♗xf3+ 15.♞xf3 ♙d4 Black seems to be fine, but White can make use of the undeveloped queenside pieces... 16.♙xd4 ♞xd4 17.♞ad1 Threatening with Bxh7. 17...♞d8 18.♙c4+= and Black has problems developing the c8 bishop because of the b7 pawn.]

12...♗e5

13.♗f4! Black has given up the control over the d4 square with one of his pieces, so White can also use one of his blockader knights for another task. [After the natural 13.♗xe5 13...♞xe5 14.♞b1 Black succeeds to transfer his queen to the

kingside with 14...♘d6 15.♗f4 ♔g5 and obtains a very active and dynamic position as a compensation for the isolated pawn.]

13...♘d6 [13...♗xd3 Grabbing the bishop pair does not solve the problems. 14.♔xd3+= White has very easy play with Bb2, Rac1 and Rfd1. Sometimes even Ng5 becomes a very strong threat and Black is going to face long term difficulties with the d5 pawn.]

14.♘b2 Black decides to neutralize the strong b2 bishop by trading it, but this leads to the exchanges of some minor pieces. In general the side with the isolated pawn should aim for active piece play, while the one who fights against the isolated should aim for the exchanges and in the endgame the pawn is going to be more vulnerable.

14...♗xf3+ 15.♔xf3 ♘e5

16.♔ab1! A typical Karpov move. The bishops are going to be traded and White wants to execute it in favorable circumstances. He immediately prepares to double his rooks on the d-file to attack the target.

16...♘xb2 17.♔xb2 ♔e5 [17...d4 is still not successful. White has the very strong 18.♔e2! dxe3 19.♔xe3 Despite the fact that Black no longer has weak pawns he is suffering because of his lack of development. 19...♔c7 20.♘c4 (20.♔fe1± is also good.)]

18.♔d2 ♘e6 [18...d4? now runs into 19.♘c4± and Black loses the pawn because of the pin.]

19.♔fd1+= White has achieved what he wanted. He has a small but long term advantage. Black is lacking active counterplay while White can start to think about how to increase the pressure on the d5 pawn.

19...♔ac8

20.♗e2!? A strong positional move in connection with the idea played in the next move. [It seems like both players missed the following tactical shot: 20.♘c4! seems to win the d5 pawn. White is attacking it with all of his pieces. He is ready to take it next and the counterplay with 20...♗e4 does not help because of 21.♔d4 ♗c3 22.♔1d3 ♗xa2 23.♗xd5± Black is in trouble because of the Ne7 threat.]

20...♔d7 21.♔f4! Another excellent decision! As we have

already mentioned, all exchanges favor White. Only the trade of rooks, especially both rooks, could seriously increase Black's defensive chances, everything else just makes his task much harder.

21...♔xf4

22.exf4!? A typical move in the given pawn structure. Our game demonstrates well the strategy behind this recapture. The d5 pawn remains weak and White wants to gain an advantage with his kingside pawn majority. Black had no time to organize the right pawn structure with h5 and g6 because of f5, trapping the bishop. [22.♘xf4+= followed by g4, f3, Kf2 was also very unpleasant.]

22...♖dc7 23.f5! ♘d7 24.g4! The majority starts to advance. First it is just gaining space and in the moment when it hurts most, it could advance more. The black rooks are completely useless on the c-file, as they have no invading squares.

24...h6

25.f3! Another strong positional move. White takes control of the e4 square and prepares to activate his king, which is of course a key factor in the endgames. Later on this move also supports the h4-g5 plan.

25...♖f8 26.♖f2 a6 Black tries to ease his position by trading the bishops with Bb5. Later Black could at least hope for some counterplay with Rc2. White prevents even this small chance.

27.♘b1! White rightly keeps both of his minor pieces.

27...♘b5 28.♘f4! ♖c1 Black wants to sacrifice his d5 pawn and tries to get some counterplay. [28...♘c6 would have been met by 29.h4!± and g5 is coming next. Black is in trouble.]

29.h4!? White decides to not be greedy and prefers to improve his position instead of taking a pawn. He believes that this opportunity will not run away... [29.♘xd5 29...♖xd1 30.♖xd1 ♘xd5 31.♖xd5 also doesn't give Black enough compensation... 31...♖c1 32.♘e4±]

29...♖xd1 30.♖xd1 ♘c6 Passive, but what to do?! It is already very difficult to suggest something clever.

31.♖e3 White improves his king to the maximum and drives it to d4! After trading one of the rooks, he does not need to worry about getting under some kind of attack anymore.

31...♖d8 32.♖d4 Despite the material equality, it is extremely

hard to suggest a saving plan for Black.

32...♖e8 [32...♘d7 to control the c5 and e5 squares would also have been met by 33.♙e1± g5 is coming next. Black is completely squeezed.]

33.♙e1 ♘c7

34.a4! Preventing the last chance to create some counterplay with Nb5 followed by d4 and Nc3. All black pieces are doomed.

34...♙e8 The arising endgame is hopeless for Black, but I believe his position was objectively lost anyway.

35.♙xe8+ ♗xe8 36.♗c5! Heading to the opponent's camp.

36...♗e7 [36...d4 loses to 37.♙e4 ♙xe4 38.fxe4+- and the d4 pawn is lost.]

37.♘e2! The knight is redirected to d4 to attack the defender of the b7 pawn, which is going to be gathered by Kb6!

37...♙d7 38.♘d4 a5 An ugly move but there was nothing else to do anyway. Black was also in zugzwang. [Basically the only legal move 38...♘e8 would have been refuted by 39.♙d3 ♗c7 40.♙xa6+-]

39.♗b6 ♗d6 40.f6! The last great move of the game and Black decided to end his suffering. [Black resigned in view of 40.f6 40...g6 Here basically all moves are winning. White probably wanted to play (40...gxf6 41.♘f5+ ♗d7 42.♘xh6+- and White simple promotes his h-pawn.) 41.f4+- and g5 next. Black is totally hopeless. A fantastic positional achievement, where it is not easy to point out where exactly Black has gone wrong.] **1-0**

**(3) Salem, A.R. Saleh(2564)

Match(1), 2014.01.07

GM Arkadij Naiditsch
Best rating: 2737

The Caro-Kann with 3.e5 is quite a tricky opening, especially the very aggressive line chosen by Salem. White is quickly a pawn up but Black gets a clear positional advantage. In a slightly worse position White panicked and went for the attack, which clearly went wrong. The game ends with a pretty mate, but to the white king.

1.e4 c6 2.d4 d5 3.e5 The most critical line.

3...♟f5 4.♞c3 The beginning of a very sharp line. [4.♞f3 4...e6 5.♟e2 would lead us to a much more calm position. This is the currently most played line.]

4...e6 5.g4 White's idea in this line is to develop fast play on the kingside while keeping the center together- not an easy task.

5...♟g6

6.♞ge2 If it was White to move, he would play h4 followed by Nf4.

6...c5 This is of se all still theory but as we can see Black is immediately starting his play against White's center.

7.♟e3 ♞c6 [7...♞e7 is the other main move.]

8.dxc5 White wants to play Nd4 followed by Bb5 next.

8...h5! I like this move a lot, even if the position is very complicated.

9.♞d4 I think Black already has nice play here. [9.♞f4!? would lead to a more dynamic position. 9...d4 10.♞xg6 fxg6 11.♞d3 ♟f7 12.O-O-O Black is a piece up but White is going to have a strong attack. The position is very sharp and unclear.]

9...hxcg4! White's pawn structure is going to be bad for the rest of the game now.

10.♟b5 ♞e7 11.♞xg4 ♟c7 We have reached an interesting position. White is a clear pawn up but it seems like Black is just better! The bishop on g6 is a monster.

12.f4 [12.O-O-O 12...O-O-O would not change much either.]

12...O-O-O

13.♟xc6 [After 13.O-O-O 13...♞xd4 14.♟xd4 ♞f5! followed by Bxc5 White already has a very bad position.]

13...♞xc6 14.♞g3 [Tactical tricks don't seem to work for White: 14.♞xe6 14...fxe6 15.♞xg6 ♟h6! 16.♞d3 d4 17.♞b5

dxe3 Black is much better.]

14...♖xd4 Black is winning the pawn back.

15.♗xd4 ♜xc5 16.O-O-O At first sight White's position doesn't look that bad but things are not that simple. Black is very fast on the c-file and White just cannot solve his problems with the c2 pawn, which is under the attack all the time.

16...♗xd4 17.♞xd4

17...♔b8! This is the key move. Black starts his plan which is an active play on the c-file.

18.h4 It is hard to blame White for a move like 18.h4, but it is not helping at all. [18.♔b1 followed by Rc1 and Ka1-Rd2, with the hope of playing Ne2-Nd4 in the future, would have been a tougher defence.]

18...♞c5 Provoking the white rook from h1 to d1.

19.♞hd1 ♜h5 Black is quickly switching to the kingside as the h4 pawn is almost impossible to hold.

20.b4 White rushes into a last attack, but Black just wanted to play Rdh8 followed by Qe7 if needed and the pawn h4 would be just lost.

20...♞b6! A very strong move, not giving White any hopes for counter chances. [20...♞e7 would have been less precise as after 21.♗b5! the knight is getting to d6.]

21.a4 ♜c8! Once again Khismatullin chooses the right path. Now the white knight is very shaky on c3 and the pawn h4 is not playing an important role anymore.

22.♞1d2 ♞c6 White's position is falling apart on both sides of the board.

23.♔b2 a6 A careful move, not giving White any chances to play Nb5. [But 23...♞xh4! 24.♗b5 ♞h1 would also have been more than enough to win the game. 25.♗d6? is never possible because of 25...♞xa4 followed by Qa1 mate.]

24.♞h2 ♜hh8! What a great game by Black. After provoking weaknesses the black rook returns to the c-file.

25.♞e3 White's moves do not play a big role anymore, as all he can do is sit and watch. Material is equal on the board but even the computers give an advantage of over -2 for Black. What a domination!

25...♞c7 26.♞dd2 ♜hc8 All black pieces are perfectly placed.

27. ♖h3

27... ♕d7! Another good move by Black. Rc4 will almost end the game soon.

28. ♕b6 ♖c6 29. ♕g1 ♖c4 The b4 pawn is falling and the game with it.

30. ♖d4 There is no other way to save the pawn.

30... ♖xd4 31. ♕xd4 ♖c4 32. ♕b6 d4 33. ♖a2 ♖xc2+ 34. ♖a3 And as usual Khismatullin finishes the game with a "smile".

34... ♖xa2+ leads to a forced mate.

35. ♖xa2 ♕xa4+ 36. ♖b2 ♕c2+ 37. ♖a3 ♕c1+ 38. ♖b3 ♕c2+ 39. ♖a2 ♕b1+ What a fantastic game by Black! Khismatullin got a big advantage with great positional play, then didn't hurry to convert it immediately, rather waiting for the best moment. We can all learn from such games! :) 0-1

(4) Khismatullin, Denis(2674)
- Salem, A.R. Saleh(2564) [D85]

Match(4), 2014.01.10

GM Arkadij Naiditsch
Best rating: 2737

White sacrificed a pawn for good play in the opening, but Black kept on defending well until some moment after which White kept on rolling over Black's defences. We will see a great fighting game.

1. d4 ♘f6 2. c4 g6 3. ♘c3 d5 The Gruenfeld, the number one opening on the top.

4. cxd5 ♘xd5 5. ♕d2 A rather rare move, but a very interesting line for White.

5... ♘b6 One of the main moves. [another main line is 5... ♕g7 6. e4 ♘xc3 7. ♕xc3 c5]

6. e4!? An interesting pawn sacrifice. [6. e3 is the very main line here.]

6... ♕xd4 Black has to take the pawn as letting White get a nice center would lead to a slightly worse position.

7. ♕c2 A development move and White is threatening to play Nb5 next.

7...c6 A logical move but maybe not the best. 7... Qd8 should also be considered as an option.

8.♘f3 We can see that White has a big development advantage for the pawn.

8...♔g7 The black queen is taking the place of Black's bishop and it is hard to imagine this being a wise decision. 8...Qd8 was probably still the right move.

9.a4! A very strong move. White is kicking away the black knight from b6 to secure an excellent development place for the bishop on c4.

9...e5 Black has no choice.

10.a5 ♘6d7 11.♙c4 White's pieces are very well placed.

11...h6?! This move is too slow at a moment where every tempo is very important for Black. [11...♙e7 followed by 0-0 was required. But White of course still has great play.]

12.0-0 ♙e7 13.♖fd1! Another very good move. White does not hurry with quick actions but squeezes Black into a more passive position.

13...0-0 14.♙e3 White doesn't threaten anything concrete, but it is already hard for Black to find a useful move! The pieces on the queenside are practically out of the game and there is no clear way of developing them.

14...♔h7

15.♘e2 White has a logical maneuver in mind. To bring the knight to g3 and play h4-h5, breaking Black's pawn structure. [Maybe 15.♘a4 was another interesting option. It is hard to find a move for Black here.]

15...♖e8?! Too passive again. [A better try for Black was 15...♘c5! It is time to give some material back. 16.♙xf7 ♘ba6 The black pieces are finally out and Black wants to play Bg4 next as well. White's position should be better, but the game would just have started.]

16.♔b3 White prevents Black's Nf8 maneuver, but maybe there was no need to do this. [16.♘g3 16...♘f8 17.h4 followed by h5 also looks very good for White.]

16...♘c5 Black gives back the pawn, which is the right decision.

17.♙xc5 ♙xc5 18.♙xf7 ♖f8 Now the pawns are equal, but White's development advantage remains and a slightly better pawn structure. White is better, but not much better.

19.♙e6 Of course White does not allow Black to play Bg4.

19...♘a6 20.♖ac1 To develop a piece is never wrong.

20...♔e7 Forcing White to take on c8, so the black rook from a8 is finally in the game too. **21.♙xc8 ♖axc8**

22.♘g3 ♔g7 23.♖c3 [It is hard to understand why White did

not play first 23.h4 23...h5 and only now 24.♖c3]

23...♖c7? This is a serious mistake. To let White cover the d-file is deadly. [It is important for Black to exchange one pair of rooks: 23...♖cd8! 24.♖cd3 ♖xd3 25.♙xd3 ♖f7 White is better, but Black is fighting.]

24.♖cd3 The d-file now belongs to White.

24...♙b4 This kind of greediness will of course be punished...

25.h4! White does not care about the a-pawn and starts his mating attack!

25...♙xa5 26.♙c4?! Not the best move. [White could have ended the game with 26.♖d6! threatening to play h5. 26...♖f6 27.♖xf6 ♙xf6 28.h5 And Black's position is just falling apart.]

26...♙b4 After this move nothing can save Black anymore. [The only chance was to play 26...♙f7 27.♘xe5 ♙xc4 28.♘xc4 ♙b4

29.h5 but White still has a big advantage.]

27.h5 White is winning control over the f5 square which means game over for Black.

27...b5 28.♙a2 ♘b8 [28...♘c5 29.♖d6+-]

29.hxg6 Black is completely lost.

29...♙xg6 30.♘f5 ♙e8 Now White has a wide range of

choices of how to finish the game. Khismatullin goes for a pretty one:

31.♖d6+! A little beauty.

31...♙xd6 32.♖xd6+ ♖f6 Once again White is looking for the most spectacular finish:

33.♘xe5+! ♙g5 [33...♙xe5 also leads to mate after 34.♙g8+ ♙h5 35.g4#]

34.♘f3+ I think it was time to give up the game, but both players were probably in a bit of time trouble.

34...♙g6 35.♘3h4+ ♙g5 36.♙a3 The white queen is going to g3.

36...♙f8 37.f4+ ♙xf4 38.♙g3+ A very nice win by Khismatullin, with which he made the first half of the match very clear: 3.5-0.5 in favor of the Russian. **1-0**

Endgame section

(15) Maciej, Bartłomiej(2583)
- Margvelashvili, Giorgi(2555)

Bay Area International 2014(5.1),
2014.01.05

GM Arkadij Naiditsch
Best rating: 2737

34...Kf7 At first sight it looks like Black has good chances to make a draw in this endgame but his problems are much bigger than it seems.

35.Ke1! A very important move. Of course the position would just be a draw if the black king could cross the e-file, but now Black is facing troubles stopping White's c-pawn.

35...a5 Black has no better option. White's threat of playing c6 next was very strong.

36.c6 Kb6 Trying to activate the king by luring the white rook away from the e-file. [36...Kb8 didn't help as after 37.Kc4 a4 38.Kc5 a3 39.c7 White is faster.]

37.Rc1 Kb8 Another only move.

38.Kc4 A good move.

38...Ke7 The black king is almost there, but...

39.c7 White is just faster.

39...Rf8 [39...Rc8 40.Kb5 Kd7 41.Kb6 followed by Kb7 and Rd1. White is winning.]

40.Kb5 Kd7 Black managed to activate his king but he lost the a-pawn.

41.Kxa5 Kc8 42.Kb6 And this position is of course easily winning for White.

42...Re8 43.Rc6! The last precise move.

43...Re2 [43...f5 44.Rf6 followed by Kc6-Kd6 with an easily winning position.]

44.Rxf6 Two extra pawns are more than enough to win the game.

44...Kb2+ 45.Kc6

45...Rc2+ 46.Kd6 Rd2+ 47.Kg7 The white king is going for the black pawns.

47...Kxc7 48.h4 Fixing the black pawn structure cannot be wrong.

48...Re2+ 49.Kf8 Kd7 50.Kg7 And the last two pawns are falling. We saw an easily winning endgame, but it was quite useful from a practical point of view. **1-0**

(16) Czebe, Attila(2451)
- **Schroeder, Christian(2364)**

Nancy Open, 2013.12.28

GM Arkadij Naiditsch
Best rating: 2737

My friend GM Czebe Attila showed me the following interesting endgame. He told me that his feeling was that the position should be drawn, but he failed to calculate an important detail. At the beginning it is very difficult to foresee all the lines, but later on it becomes a very good example to improve our calculating skills. White needs to get rid of the g2 pawn, the question is if he should go for the pawn endgame after Kxg2 Bc6 or Ne5 Bc6 Nxc6 bxc6 and Kxg2. In the first one, Black seemingly has a healthy extra pawn, while in the latter one it is damaged. However the solution is surprising...

1.Kxe5? [1.Kxg2! was the right move. Black's only hope is the pawn endgame, otherwise White brings his king to d2 and moves with the knight. Even the a1 corner is wrong to the bishop's color. 1...Bc6 2.Kf2 Bxf3 3.Kxf3 Kg6 4.Kf4 Kf6]

We have reached the critical position. 5.♔d4!! White keeps the distant opposition and holds the draw. (My friend has correctly calculated that the line after 5.♔d5 5...♔f5! is going to win for Black in all the lines. 6.♔c5 (6.c4 6...♔f4 The king is heading towards the pawns... 7.♔d4 ♔f3 8.♔d3 c5—+ wins easily.) 6...♔e4 7.♔b5 ♔d3 8.♔xa5 ♔c2—+ wins.) 5...♔f5 Black should again try to go in the direction of the white pawns. (The attempt to save his own pawns fails to 5...♔e6 6.♔c5 ♔d7 7.♔b5 b6

8.c4! with the idea to push c5 and destroy the pawn chain. 8...♔d6 (8...♔c8 makes no sense. 9.c5 ♔b7 10.cxb6 cxb6 11.b4 axb4 12.♔xb4=) 9.b3 Black is in zugzwang, he is forced to allow c5 and the game is immediately drawn. 9...♔e5 10.c5 bxc5 11.♔xc5=) 6.♔d5! We have reached the same position as in the 5. Kd5 line, but this time it is Black to move. As the following variations show, he is in zugzwang! 6...♔f4 (6...♔f6 7.♔c5

♔e5 8.♔b5= draws again. ; 6...a4 7.♔c5 simply collects the pawn.)

7.♔e6! This is why it should be Black to move! White has a quick path to the c7 pawn. 7...♔e4 8.♔d7 c5 (8...♔d3 9.♔xc7 ♔c2 10.♔xb7 ♔xb2 11.c4 a4 12.c5 a3 13.c6 a2 14.c7 a1=♔ 15.c8=♔=) 9.♔c7 ♔d3 (9...b5?? even loses after 10.♔b6 White grabs the pawns faster.)

10.♔b6! It is very important to capture the right pawns. Only calculation helps in such positions. (10.♔xb7? 10...♔c2 11.♔b6 ♔xb2 12.♔xc5 a4 wins for Black!) 10...♔c2 (10...c4 11.♔xa5 ♔c2 12.♔b4=; 10...a4 11.♔xc5 ♔c2 12.♔b4 ♔xb2 13.♔xa4 ♔xc3 14.♔b5=) 11.♔xc5 ♔xb2 12.♔b5 ♔xc3 13.♔xa5 ♔c4 14.♔b6= Just in time!]

1...♔c6 2.♔xc6 bxc6 3.♔xg2 In comparison to the 1.Kxg2 line, Black has a damaged pawn structure but the activity of

the black king turns out to be more relevant.

3...♖g6 4.♖f3 ♖f5 Black holds the opposition this time!

5.♖e3 ♖e5 6.♖d3 [6.c4 loses to 6...a4 7.♖d3 c5 8.♖e3 c6 White is in zugzwang, he is forced to let the black king get to his pawns. 9.♖d3 ♖f4—+ Squeezing out the king and winning the endgame.]

6...♖d5 White had to evaluate this position before he played 1.Ne5. At first sight it is not obvious, but a slightly deeper look allows us to come to the conclusion that the situation is hopeless...

7.b3 [7.c4+ 7...♖c5 8.♖c3 a4—+ and White again loses because of the zugzwang.; 7.♖c2 7...♖c4 8.b3+ Otherwise Black plays Kb3. 8...♖b5 transposes to the game.]

7...♖c5 8.♖c2 ♖b5! [White resigned in view of 8...♖b5 9.♖d3 (9.♖b2 9...c5 (9...a4 also wins.) 10.♖a3 c4—+) 9...c5 10.♖c2 c4—+ Black gets rid of his doubled pawns and creates a passed a-pawn, which decides the fight...] **0-1**

Clash of the Titans

**(17) Alekhine, Alexander

Amsterdam m2(7), 1926

GM Kamil Miton
Best rating: 2655

1.d4 d5 2.c4 e6 3.♘f3 c5 4.cxd5 exd5 5.g3 ♘c6 6.♘c3 In this case White has some additional options to play without the knight on c3, for example [6.♗g2 6...♘f6 7.O-O ♗e7 8.dxc5 ♗xc5 And here White can play 9.a3 (9.♖c2 with the idea Rd1-Bg5-Nc3 to put pressure on the d5 pawn.)]

6...♘f6 7.♗g2 ♗e7 8.O-O O-O We have the main position of the Tarrasch Defence. Now White has the choice between different plans:

9.dxc5 [9.♗g5 is the most popular move.]

9...♗xc5

10.♘a4 An interesting move which was already known so many years ago. Nowadays it is suggested by grandmaster

Boris Avrukh and used by top players. The idea is to create a blockade on the d4 and c5 squares. [10.♘g5]

10...♘e7 11.♘e3 ♘e4 A logical move. Black activates his pieces.

12.♖c1 ♚a5 This is an active square for the queen but on the other hand White might be able to play a3-b4 with tempo. [I also found one of my games in this position: 12...♗e8 13.♘d4 ♘xd4 14.♘xd4 ♘e6 15.♘c3! ♘xc3 16.♖xc3 White has a stable long term advantage because of the weak d5 pawn. 16...♚a5 17.a3 ♖ac8 18.e3+= b5? Black is looking for some counterplay or to reduce the material but this move loses immediately, which I didn't see... 19.♚a1 (19.♖xc8 19...♖xc8

And now 20.♘xd5! +- ♘xd5 21.♚g4) 19...♘f8 20.♖fc1 ♖xc3 21.♘xc3 ♚a4 22.♘d4+= 1/2-1/2 Miton,K-Barbero Senidic,A/Linares ESP 2013 (37)]

13.♘d4 ♘xd4 [13...♘d7!? And now White is not in time with the a3-b4 idea because the knight on a4 will be hanging. 14.♘xe4 doesn't seem very logical but there is a concrete idea: 14...dxe4 15.♘b3 ♚xa4 (15...♚c7 16.♚d5 White keeps the initiative thanks to his more active pieces.) 16.♚xd7 ♚xa2 17.♚xb7 ♖fb8 18.♚xc6 ♚xb3 19.♚xe4 ♘f6 20.♖c2+= And White is a pawn up.]

14.♘xd4 ♘e6

15.f3 The idea of this move is to chase the knight from its central place and make use of the c5 square. The problem of this move is that it also weakens White's position on the kingside. [15.a3+= gives White a stable plus.]

15...♘f6 The d5 pawn is protected enough so more interesting was [15...♘d6 with the idea to get counterplay on the d4-e3 squares. 16.♘c5 ♘f5⇝]

16.♘c5! White plays according to the plan and doesn't care about the a2 pawn as activity is much more important. [16.a3 Once White has played f3 this move makes less sense. 16...♖ac8⇝]

16... ♖xa2 [16... ♗xc5 17. ♖xc5 (17. ♗xc5 17... ♖fc8 18. ♗d4 ♖xc1 19. ♖xc1 ♖xa2 20. ♖f4 ♖a4 White still has some compensation but nothing more.) 17... ♖xa2 18. ♖a1 ♖xa1 19. ♖xa1 a6 20. ♖c7 With good play for White.]

17. ♗xe6 In this kind of structure this exchange doesn't usually bring White anything special because Black gets rid of his bad bishop and supports the d5 isolated pawn but in this concrete case White gets pressure on the e6 pawn.

17... fxe6 18. ♗h3 ♖a6 19. ♖d3 Of course black cannot exchange the queens because of Bxe6!

19... ♖d6 20. ♖e3 ♖f7

21. ♗c5! White is playing very accurately, because after [21. ♗xa7 21... ♗d7! Black will get good play on the dark squares after Bf6.]

21... ♖d7 22. ♗xa7 ♖fc8 23. ♗d4 White won the pawn back and now thanks to the bishop pair and some pressure on e6 he keep a small initiative.

23... ♖a6 23... Ne8 was also interesting, with the idea of exchanging bishops after Bf6.

24. f4 ♖xc1 25. ♖xc1 ♖c6 A logical move. Black wants to reduce the material to avoid the pressure against his king.

26. ♖f1! ♖c4 [26... g6 27. g4↑ With the same idea of opening the position after f5.]

27. b3 ♖c2 28. f5 e5 The only move. By giving up this pawn Black limited White's pieces.

29. ♖d3 ♖c6 30. ♗xe5

30... ♗e4 [30... ♖c1 31. ♗xf6 ♖xf1+ 32. ♖xf1 ♗xf6 33. ♗g2 ♖c1+ 34. ♖f2 ♖c5+ 35. e3 b6 (35... d4) 36. ♗xd5+ ♖f8 The bishop endgame is drawish in this structure but with the queens on the board Black will not be able to create a blockade because of his weak king. 37. ♗c4]

31. ♖d1 White had the idea to give back a pawn in order to activate the pieces again. [31. f6!? A typical and very practical idea. 31... gxf6 32. ♗d7 ♖c5+ 33. ♖g2 ♖g7 34. ♗d4 ♖c7 35. ♗b5 The bishop comes to d3 to protect the e2 pawn. White will play Qf3-Bd3 next and get a strong initiative because of the weak black king.]

31... ♖c1 32. ♖g2? An inaccuracy. White should have played [32. ♖xc1 32... ♖xc1+ 33. ♖g2 ♖c6 (33... ♗d2 34. ♖xd5+ ♖f8 35. ♖f2+- The white king is safe now.) 34. ♗g4±]

32...♖xd1 33.♔xd1

33...d4! ♜ 34.♔g1 [34.♔f1 34...♜xg3+=+]

34...♔d5 35.♙f4 [35.♙xd4? 35...♜c3 36.♔d3 ♔xd4+!-+]

35...d3? Both players were probably in time trouble at this moment. [35...♜c3 36.♔d3 (36.♔c2 36...♙c5!) 36...♔xb3 37.♙f1 ♔b5 38.♔xb5 ♜xb5 39.e3 ♜d6 This should be a draw.]

36.♔xd3 ♙c5+ [36...♔xd3 37.exd3 ♜c5 With practical chances for a draw.]

37.♔g2 [37.♔f1 37...♜xg3+ 38.♔e1 ♙b4+ 39.♔d1 ♔h1+ 40.♔c2 ♔c6+ 41.♔b1 ♜e4 42.♙g4 The white king has escaped and White keeps the advantage.]

37...♔c6

38.♙g4?? A huge blunder after which White just loses a piece.

[38.♔f3 White is two pawns up but it is not easy to convert his advantage because he needs to improve the bishop h3. Objectively the position should be close to a win however.]

38...♜f2+ 39.♔f3 [39.♙f3 39...♜xd3 40.♙xc6 ♜xf4+--+]

39...♜xg4 40.e4 ♜f6 41.e5 ♔xf3+?! The rule which says that when you have a material advantage you should reduce material doesn't always work. In this case it was better for Black not to exchange queens to keep the possibility of pressuring the white king. [41...♜e4 42.e6+ ♔e7 43.g4 ♙d6+]

42.♔xf3 ♜d5 43.♙d2 Now the white king gets a very active place on e4.

43...♔e7 [43...♙b4 44.♙c1 ♜e7 45.♔e4 ♜c6 With the idea of attacking the b3 pawn with Na5 at some moment.]

44.♔e4 ♜c7 45.g4 ♔d7 46.h4 White has two pawns for the piece and an active king, which gives him good chances to make a draw.

46...♙f8 47.h5 ♔c6

48.e6?! I don't like this move. Why give Black the possibility to block the white pawns?! [48.g5=]

48...♖e8 49.g5

49...h6! Now it will be harder for White to advance the pawns.

50.♔e5 [50.f6 50...gxf6 (50...hxf6 51.♔f5 (51.e7 51...♖xf6+—) 51...♖xf6 (51...gxf6 52.♔g6†) 52.♕xg5 ♖xh5 (52...♖d5 53.♔g6 ♔d6 54.♔f7 ♕e7 55.♕c1 b5 56.♕d2 It might not be easy to improve Black's position because the king on f7 is very active.) 53.e7 ♕xe7 54.♕xe7 White should easily hold the draw here.) 51.gxh6 ♖d6+ 52.♔d3 ♔d5 53.e7 ♕xe7 54.h7 ♖f7 55.♕h6 ♔e5 56.♕g7 ♔f4 57.h8=♔ ♖xh8 58.♕xh8 ♔g5 59.♔e4 ♕b4 With f5 next, then Black will win the h5 pawn and in my opinion also the bishop endgame.]

50...♕e7 51.gxh6 ♕f6+ 52.♔e4 ♖d6+ 53.♔f3 gxh6 54.♔g4 [54.♕xh6 54...♖xf5 55.♕g5 ♖d4+ (55...♕xg5 56.♔g4) 56.♔g4 ♕h8 57.e7 And Black should win the game. 57...♔d7 58.h6 ♖c6 And Black should win the game.]

54...♕g7 55.f6 Otherwise Black will play Ne8-Nf6-Kd5 (which is why I didn't like 48.e6) and easily win the white pawns.

55...♕xf6 56.♕xh6 ♔d5 57.♕g5 ♔xe6 58.♕xf6 ♔xf6 59.♔f4

59...b5?? [59...♖f5 60.♔e4 ♔e6 61.♔d3 ♔d5 62.♔c3 ♔c5 Black will eventually win the b-pawn and the game.]

60.h6?? White missed a draw after [60.♔e3 60...♖f5+ (60...♔e5 61.♔d3 ♔d5 62.h6 ♖f7 63.h7 Now the pawn is too far advanced and Black is not able to improve his position.) 61.♔d3 ♔e5 62.♔c3 ♔d5 63.♔b4 ♔c6 64.♔a5 ♔c5

65.♔a6! In this case the white king is very active as he is putting pressure on the b5 pawn, which means the position is drawish!]

60...b4! —+ Now Black can transfer the knight to a2 in time and easily win the game.

61.h7 ♖g7 62.♙e5 ♘b5 63.♙d5 ♘c3+ 64.♙c4 ♘a2 65.♙c5 ♙xh7 66.♙c4 ♙g6 67.♙c5 ♙f5 68.♙d5 ♙f4 69.♙d4 ♙f3 70.♙d3 ♙f2 71.♙d2 ♘c3 0-1

Editorial Preface

The tournament of the week is clearly Wijk aan Zee.

This Year the A group has been cut down to 12 players. The B group still consists of 14 players.

After 5 rounds Aronian is leading with 4/5, followed by So and Giri, both with 3.5/5.

In the B group it seems to be going to be a fight of who scores the most between Jobava and Saric. To everyone's surprise, Wojtaszek seems to be in a bad shape or maybe just a bit too tired after his fantastic successes in Switzerland, where he gained over 20 ELO points.

In the current issue we bring you the most striking moments from Wijk aan Zee! Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Caruana, Fabiano(2782)
- Gelfand, Boris(2777) [B90]

Wijk aan Zee NED(1.4),
2014.01.11

GM Csaba Balogh
Best rating: 2672

One wrong plan in the complex middle game led to a nice defeat of Boris Gelfand.

1.e4 c5 2.♘f3 d6 So this time Gelfand goes for the Najdorf and avoids his recent pet line, the Sveshnikov defence, which starts with 2...Nc6.

3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.f3 Usually White players prefer to start with 6.Be3 to have more options against the 6...e5 and 6...e6 setups, but Gelfand is known to like the 6...Ng4 continuation, so Caruana starts with 6.f3.

6...e5 7.♘b3 ♙e6 8.♙e3

8...h5 This is the latest development of this line. Black has several other setups as well, but then White plays g4 and later on castles queenside after Qd2.

9.♘d5 [Caruana played 9.♙d2 twice last year, but the text move is also a main line. They often actually transpose to each other.]

9...♙xd5 10.exd5 ♙f5 11.♙d3 ♙xd3 12.♙xd3 ♘d7 13.O-O-O is considered to be slightly better for White according to current theory.]

10.exd5 ♘bd7 11.♙d2 Now or in the next move White has to develop his queen to d2 because after g6 Black creates the strategic threat of trading the dark squared bishops with Bh6.

11...g6 12.♙e2 ♙g7 13.O-O O-O

14.♙ac1!? This is the novelty, prepared at home by Caruana. We must admit that it is a really deep one. White's main idea in this line is to create a passed pawn on the queenside with Na5 followed by c4-b4-c5. As we will see, Black is in time to create counterplay if White immediately plays like this... [14.♘a5 14...♙b8 15.c4 is met by 15...e4! Black needs to act quickly otherwise the b4-c5 plan swaps him away. 16.f4 ♘g4! 17.♙xg4 hxg4 Black wants to play f5. 18.f5 It seemed to be very nice for White, but suddenly Black found a fantastic plan to create counterplay:

18...Qh4! 19. Bg5 Qh8! The queen started to work extremely well on the long diagonal. 20. Rab1 Be5 Black was fine in the game Leko-Wojtaszek, Istanbul 2012; 14.c4 is not advisable because of 14...a5 and Black consolidates on the dark squares after b6 and Nc5.]

14...b6! An excellent reply by Gelfand! He prevents the entire Na5 idea. [As long as White has not played c4 14...a5 is not advisable because of 15.a4 and White settles his bishop on b5 next move!]

15.h3!? This move contains two deep ideas again. We have already seen one of them in the 14.Na5 line, where Black played Ng4... The other one becomes clear after the next move. [15.c4 could already be met by 15...a5]

15...Re8

16.g4!? A brave and ambitious decision which worked well in

the game, however a deeper look shows us that Caruana has taken a big risk. White has taken ground on the kingside and tried to restrict the movement of the black pieces.

16...hxg4 17.hxg4

17...Nh7? After this positional mistake White's entire strategy starts to work perfectly. The move itself is principled as Gelfand wanted to take control over the dark squares by trading the bishops with Bf6-g5. [17...e4? was also bad in view of 18.f4 The passed pawn on e4 is perfectly blockaded and the g4-f4-d5 pawns are controlling all the squares of the knights. Black is completely paralyzed here.; However 17...b5! seems to be very strong. The idea is to attack the d5 pawn with Nb6! The tactical justification of this move is 18.Na5 (18.g5? is completely different to the game as Black has 18...Nh5!) 18...Nxd5! works for Black. 19.Nc6 (19.Qxd5 19...Qxa5) 19...Qc7 20.Qxd5 Nf6! is the point! Black wins back the piece and obtains a winning advantage with an extra pawn.]

18.g5! Preventing the Bf6-g5 idea. The h7 knight is standing poorly now and it cannot be improved. White slowly intends to drive his rooks to the h-file. Gelfand obviously expected this move, but he prepared the following response...

18...f5 19.gxf6 Bxf6 This was Gelfand's idea and White cannot avoid the trade of the bishops with Bg5. However, as

Caruana pointed out, the damage of the black pawn structure becomes critical after some subtle moves!

20...f2! White immediately launches an attack against the g6 pawn.

20...g5 Consequently played, otherwise Black must forget about his strategy after Rg2.

21.Rg2 fxe3+ **22.Qxe3** Ndf8

23.f3! It soon becomes clear that despite missing the dark squared bishop, all the remaining white pieces become extremely well placed and White obtains very strong attacking chances.

23...Ra7! A spectacular move! Black brings his rook into the game along the 7th rank.

24.Rf1 [24.Qh6 directly was also good.; White should not hurry with grabbing the pawn, because it opens the g-file in front of his own king: 24.fxg6 24...fxg6 25.Rxg6+ Rg7 26.Rxg7+ Qxg7 Black gets counterplay after Qh4, Rg8.]

24...Rf7 Black wants to install his rook to f4 in order to cut the queen from the kingside. Caruana does not allow this chance. [24...Rg7 would also have been met by 25.Qh6; 24...Ree7 was probably the best try, followed by Rg7, but White has a nice advantage anyway after 25.f3]

25.Qh6! [White should not be greedy with grabbing useless pawns: 25.fxa6 Black gets very strong counterplay after 25...f6! followed by Nh5-f4.]

25...Qh8 [White plays the same as in the game after 25...Qf6 26.f3! and the knight occupies the e4 square!]

26.f3! Caruana brings the last inactive piece to the game. Black's pieces are totally uncoordinated. It becomes clear that the entire strategy started with Nh7 has been refuted!

26...Rf4 With the idea of playing Rh4.

27.Rg4 [Probably the most precise was 27.Rh2 to prevent Rh4 and to prepare the following plan. Let's say after 27...Re7

30.♘g5! Black resigned as the only way to avoid getting mated is to sacrifice the queen. A very instructive game which shows that sometimes one wrong plan in the middle game is enough to lose the game. **1-0**

28.♔f2! ♖g7 29.♖g1± White hides his king on e2 or if needed he goes to c1 and then his attack breaks through.]

27...b5 The hanging of the a6 pawn was too annoying for Gelfand. [27...♖xg4+ 28.fxg4± is very bad positionally. Black has just opened the f-file himself and White settles his knight on e4 next.]

28.♘e4! [White again should not be greedy with 28.♖xf4 28...exf4 29.♖xf4 Black gets very strong counterplay after 29...♖e5 attacking the d5 pawn and White would not want to put his bishop to e4 as this square belongs to the knight.]

28...♘d7? A blunder in time trouble and in a worse position. [Black should have activated his rook with 28...♖e7 although his position is still significantly worse after 29.♖xf4 exf4 30.♖xf4 ♖e5 31.♔f2! ♖xd5 32.♖h1± The material is balanced, but the white pieces are clearly dominating.]

29.♖xg6 ♖g8

(2) Aronian, Levon(2812) - Caruana, Fabiano(2782) [A34]

Wijk aan Zee NED(2.4),
2014.01.12

GM Csaba Balogh
Best rating: 2672

A very important game from the second round between two big favorites of the tournament. There were mutual inaccuracies, but all in all it was a nice win by Aronian.

1. ♘f3 ♘f6 2. c4 A clear sign that with this move order Aronian wants to avoid the Gruenfeld defence or at least that he wants to play an Anti-Gruenfeld line.

2...c5 3. ♘c3 d5 4. cxd5 ♘xd5 5. d4 ♘xc3 6. bxc3 g6 Indeed, Caruana was ready to employ the Gruenfeld today. If White plays 7.e4, they would have immediately transposed to the main lines, but here White has alternatives...

7. ♗f4!? ♗g7 8. e3 I like this kind of development a lot. First White has developed his bishop to a healthy square and he followed it by strengthening d4. The main idea of the Gruenfeld is to allow White to occupy the center and then launch active piece play against it. For instance when the pawn is on e4, Black plays Bg4, Nc6 and Qa5, pressing the d4 and c3 pawns, but now all these are not dangerous at all.

8...O-O 9. ♗d3 The novelty of the game. We were already in a somewhat unexplored territory, but White has played 9.Be2 several times. In case of the knight's development to c6 White has the annoying Be4 idea, pressing the long diagonal. Therefore Caruana prefers to put the knight to d7 in order to have Nf6 on Be4...

9...♘d7 10. O-O White is ready to put pressure on the b7 pawn with Rab1 and Be4. As usual Black needs to look for active counterplay.

10...♔a5 11. ♔c2 cxd4 12. cxd4 e5! A very logical central break by Caruana in order to simplify and equalize the position. Unfortunately for him White is able to keep an edge.

13. ♗g3! White needs to keep some pieces in order to fight for an advantage. Taking everything on e5 would have allowed Black to achieve what he wanted.

13...exd4 14. ♘xd4 The situation in the center is slightly clarified, but White is better developed. Black needs to solve the problem of the c8 bishop, but that turns out to be harder than expected.

14...♘b6! [14...♘c5? drops material after 15. ♗d6!+-; 14...♘e5 15. ♗e4! and Black has serious difficulties with the b7 pawn.; The most illustrative line is 14...♘f6 15. ♔ab1! Black

is facing the same problem, he cannot deal with the b7 pawn. 15...b6 is nicely refuted by 16.♘d6 ♖e8 (16...♗d8 17.♘c6+- is over.)

17.♘b5! ♘d7 18.♘b4!+- trapping the queen!]

15.♙c7! White needs to keep the pressure on the b7 pawn, otherwise Black plays Bd7 and he quickly equalizes.

Caruana finds a clever idea to deal with the b7 pawn. I believe he takes a smart decision. [15.♘e4 was not working here because of the direct tactical idea of 15...f5! 16.♘f3 f4! using the strength of the g7 bishop.]

15...♘xd4! 16.exd4 ♘f5 17.♘xf5 ♙xf5 18.♙xb7 Caruana has sacrificed his weakness, but simplified the position. He got rid of the bishop pair and without the light squares bishop he is going to create an excellent blockade on d5. White

does not have enough pieces to make use of the weak dark squares around the black king. White obviously has a healthy extra pawn, but to convert this advantage requires extremely precise technique in the long term, while on the other hand Black has very easy moves. In my opinion it is much better and easier to play this position than the one with the c8 bishop and the b7 pawn.

18...♖fd8 Black doubles his rooks on d-file.

19.♖fd1 ♖d7 20.♙a6 ♙e4 [20...♖ad8 was possible, but Black is not threatening to take on d4 anyway. To keep the a7 pawn is more important.]

21.♘e5

21...♖f8! Black needs to put his pawn on f6 in order to neutralize the dark holes around the king. He is going to create a blockade on the 7th rank with Kg7 and Rff7. This also protects the a7 pawn and then Black will be ready to take on d4.

22.h3 Opening the back rank is a very useful idea.

22...f6 23.♘g3 ♖ff7 It is very cult to assess if Black's drawing chances or White's winning ones are better. Black is threatening to take on d4, so White is forced to make a small weakening.

24.f3 ♖f5 25.♞ac1 White also activates all of his pieces, but the converting part is just about to come.

25...♗g7 26.♗h2 Both sides are leaving from the potential checks. Such moves are played without thinking on the highest level.

26...♞fe7 27.♞c5! White must try to somehow advance his d-pawn, but it requires serious efforts.

27...♘d5! [27...♞d5 was much worse because of 28.a4! kicking out the blockader of the d5 square. Taking twice on c5 loses to Bd6.]

28.♞a5 Increasing the pressure on the d5 square. The entire fight is around that now.

28...♞e6 A small inaccuracy which helps White to activate his e1 rook more easily, but of course it is understandable that Black wanted to leave the pin on the 5th rank. [It was probably better to try 28...♞e2 White is forced to trade rooks because of the Qxf3 threat. 29.♞e1! ♞xe1 30.♞xe1 ♗f7 followed by Qe6, holding the blockading position.]

29.♞e1 ♞f7

30.♞e4! A great place for the rook. Black must forget about taking it (unless there is something concrete) because then he loses the d5 square and otherwise the e4 rook is pretty

annoying. Caruana tries to get counterplay.

30...♘e3!? Creating the hidden threat of Nf1!

31.♘f2?! [31.♞e1! would have been strong and White manages to mobilize his d-pawn. 31...♘f5 (31...♘d5 loses to 32.♞xd5!+—) 32.d5! and White made serious progress.]

31...♘f5 32.♞d2?! A tactical oversight, which Black fails to exploit. [On 32.d5 Caruana had in mind to create a different blockade after 32...♞xe4! 33.fxe4 ♘d6 and Qe7 next, pressing the e4 pawn.]

32...♞e6 [Missing the tactical opportunity of playing 32...♞xe4! 33.fxe4 ♞e7!!= With a double attack on c5 and e4! All of Black's problems would have been immediately solved.]

33.♞xe6 ♞xe6 34.d5 White succeeded to advance his d-pawn. This is obviously an achievement, but to he still needs to work very hard to make it real.

34...♞d6+ 35.♗g1 ♞b7 [35...♘e7 would have been met by 36.♞a5! White is always ready to trade the d-pawn for the one on a7.]

36.♞e1 Aronian decides to control the back rank with the queen. [Maybe it was more useful to advance the a-pawn as far as possible, as it is going to have a key factor in the game

later on. White does not really need to worry about the checks since he always has Rc1. 36.a4±]

36...♘e7! Black can finally overpress the d-pawn so White is forced to counterattack the a7 pawn. The next moves are more or less forced...

37.♖a5! ♘xd5

38.♞d1! Improving the circumstances before collecting the a7 pawn.

38...♖d7 39.♖xa7 ♖xa7 40.♘xa7 We are at the last move before the time control and Caruana fails to go for the best practical chance.

40...g5? Positionally a good move, but from now on Aronian plays perfectly and this turns out to be the decisive mistake. [Black could have transposed to a queen endgame with

40...♞a3! 41.♞xd5 ♞xa7+ 42.♙h1 g5

Black has excellent drawing chances. White still needs a lot of time and effort to advance the a-pawn and Black will be always be able to create perpetual check threats. I believe Caruana would have saved the game here.]

41.a4! Advancing the passed pawn to a protected square.

41...♞a6 42.♘d4 ♞c4

43.♞a1! Preparing to support the pawn. Black's only chance is to create something against the king with the queen and the knight, but with precise play White always has his resources to parry all the ideas.

43...♞c2 44.a5 ♘f4 45.♘f2 White basically does not even need his queen, the bishop and king protect everything together.

45...♖e2+ 46.♔h2 ♜f4 47.♚f1! Protecting the bishop, so now the pawn is ready to be advanced until a7.

47...♜d3 48.♙d4 [48.♙g3! 48...♚c4 49.♚e2 was even stronger. Black is hopeless.]

48...♚d2! Caruana fights very tenaciously, but it does not help this time. [48...♚c4 49.♚a1+- was over.]

49.♙g1! Leaving from the Qf4 threat and keeping the control over all the squares.

49...♚f4+ 50.♔h1 ♚c4 51.♚a1 ♚c2 A last brilliant trick, but it does not help. [The passive 51...♚a6 is hopeless after 52.♙e3 Threatening Bxg5. 52...h6 53.♚b1+- followed by Qb6 and White wins automatically.]

52.♙e3! A necessary intermediate move before pushing the pawn! White attacks the g5 pawn! Black had to lose this

important tempo, but now the pawn runs. [52.a6 could have been met by the hidden 52...♚e2!! and White has no good way to prevent Nf4! One must focus until the last moment!]

52...h6 [52...♚e2 53.♙xg5+-]

53.a6 ♚e2

54.♚g1! Aronian uses his queen very effectively on the 1st rank. [It was still not too late to go wrong with 54.a7?? 54...♜e1!!+- and Black wins!]

54...♚a2 55.a7 The rest is easy, Black is forced to passivity.

55...♜b4 56.♚d1 ♜d5 57.♚d2 ♚a1+ 58.♙g1 A tough game and an important victory for Aronian! **1-0**

(3) Karjakin, Sergey(2759) - Rapport, Richard(2691) [C18]

76th Tata Steel Masters(4.2),
2014.01.15

GM Arkadij Naiditsch
Best rating: 2737

1.e4 An interesting game was played in the 4th round between these 2 young chess stars, a game with a quite big amount of mistakes but a great fighting spirit. In the end the stronger player managed to show who is the boss! :)

1...e6 Lately 1...e6 is one of Rapport's favorite openings.

2.d4 d5 3.♘c3 As usual Karjakin goes for the very main line.

3...♙b4 4.e5 c5 5.a3 ♙xc3+ 6.bxc3 ♖c7 7.♖g4

7...f6 A rare move. [We would be in the main and very sharp line after 7...♘e7 8.♖xg7 ♖g8 9.♖xh7 cxd4 10.♘e2]

8.♘f3! After thinking for a while Karjakin makes the strongest move.

8...c4 Black closes the c-file immediately, which makes sense in order not to give the white bishops space for play, but on the other hand Black will face big problems on the dark squares. [Of course Black is just lost after 8...cxd4? 9.cxd4 ♙c3+ 10.♔d1 ♙xa1 11.♖xg7+—]

9.h4?! The right idea, but this move is premature. Of course it is great for White to bring the pawn to h4, but first Karjakin should have been more solid in the center. [A simple move like 9.♙e2 followed by 0-0 and a4-Ba3 should give White very good play.]

9...♞c6 Black immediately attacks the center.

10.♖g3 fxe5! A strong move. There is no time to waste as if White manages to consolidate Black's position could become very bad.

11.♞xe5 [After 11.dxe5 11...♞h6 seems to be very strong. Another very typical idea. Black is threatening to play Nf5 next, forcing White to give up the black squared bishop. 12.♙xh6 gxxh6 followed by Bd7, 0-0-0 and Rhg8-Rdf8, with fantastic position for Black.]

11...♞f6 12.♙f4?! Not a great decision by White. [12.♞xc6 was still better and after 12...♖xg3 13.fxg3 bxc6 14.♙f4 White might keep a small advantage.]

12...♖a5? What a mistake by Black... [Of course Black should have taken the bishop: 12...♞h5 13.♞xc6 White's only chance. 13...♖xc6! Safe and strong. (13...♞xg3 is too risky as after 14.♙xc7 ♞xh1 15.♞e5 0-0 16.♞f3 the knight will be stuck on h1 forever.) 14.♖g5 ♞xf4 15.♖xf4 ♖f8 With a very unclear position.]

15...O-O 16.f3 It seems like White has fixed everything and wants to play Be5 next, after which White's advantage should be very clear, but Black had something in mind... [16...♗e5 would have been more careful.]

19. ♖e2 We are in a very complicated position. White is a

26.a4 ♔b7 27.a5

27...a6 White made huge progress during the last moves. There is no more nasty queen on a4 attacking the c2 pawn and a pawn up is a pawn up.

28. ♖g4 White is probably planning to play Qd1-Qb1 and Rb2.

28... ♖a7? It is clearly not an option to give up the b-file. [28...c5 was maybe still the best move and after 29.dxc5 ♖b5 Black is looking for some counterplay while White's rook is passively placed on a2.]

29. ♖b2 White's position is perfect.

29... ♕f5 30. ♖g3 The only thing left to do is to double the rooks on the b-file.

30... ♖e7 Black tries to reactivate the queen by putting it to a3.

31. ♖b6 [31. ♕d6 probably led to an easier win. 31... ♖xe1+ 32. ♖xe1 ♖xe1 33. ♕xe1 And I think this endgame should be totally winning for White.]

31... ♖c8 32. ♖eb1 ♖a3

33. ♖b7? A huge inaccuracy. [33. ♖1b2! would almost win the game. 33... ♖a4? 34. ♖6b4 ♖xa5 35. ♖b7 And the pressure on the g7 pawn is deadly.]

33... ♖a4! Black takes his last chance, although the position is probably lost anyway.

34. ♖1b2 Now things are pretty forced.

34... ♖xb7 35. ♖xb7 ♖xc2+ 36. ♕e1 ♖c1+ 37. ♕f2 ♖d2+ And now White found the winning

38. ♕f1! [38. ♕g1 38... ♖d1+ 39. ♕h2 ♖xh5+ would lead to a draw]

38... ♖d3+ After this move there are no more chances for Black, but other moves were losing too... [After 38... ♕d3+ 39. ♕g1 ♖d1+ 40. ♕h2 ♖xh5+ 41. ♖h3 ♖xh3+ 42. ♕xh3 g6 43. ♖a7 I don't see any hopes for Black to save this endgame.; 38... ♖d1+ 39. ♖e1 ♖xh5 40. ♕g1 leads to a winning position for White.]

39. ♖xd3 cxd3 40. g4 ♕e4

41. f5 White controls everything and the g7 pawn is falling.

41... c5 42. ♖xg7+ ♕f8 43. f6 The game is over.

43... ♖c6 44. ♕e1! Black is hopeless against g5 next. I guess Karjakin was very happy to have won this fight in the end! **1-0**

(4) Wojtaszek, Radoslaw(2711) - Jobava, Baadur(2710) [A52]

Tata Steel Challengers(5.6),
2014.01.16

GM Arkadij Naiditsch
Best rating: 2737

When you play Jobava you can never know which opening to expect. This time the very talented Georgian GM chooses the Budapest Gambit! It was clearly not Wojtaszek's day, but Black still showed great crushing play, so enjoy!

1.d4 ♖f6 **2.c4** e5 What a surprise!

3.dxe5 ♘g4 **4.♙f4** The most ambitious move. [4.♘f3 4...♙c5 5.e3 ♘c6 6.♙e2 O-O seems to lead to a fighting position.]

4...g5 That's the way the gambit is played!

5.♙g3 ♘c6 Although Black's pawn structure is bad, the good development sort of compensates for it.

6.♘f3 ♙g7

7.h4 One of the main lines. White tries to make a quick use of the position of the g5 pawn.

7...♘gxe5 **8.♘xe5** ♘xe5 **9.♘c3** **g4** **10.e3** **d6** The position has sort of stabilized. Black has a monster bishop on g7 and if

White fails to be fast enough with action, Black's position is going to be fine.

11.♙e2 White is planning to castle kingside, a solid decision.

11...♙e6 **12.♖c1** [It was too early to try and get the knight to f4 as after 12.♘d5 12...c6 13.♘f4 Black is in time for 13...♙a5+! and White's pawn on c4 is hanging.]

12...O-O **13.b3?!** This is already clearly too passive. [Here White could already have gone for 13.♘d5! 13...c6 14.♘f4 With a slightly better position for White.]

13...c6! A good move! The white knight on c3 is not standing great anymore.

14.h5?! This is already a move into the wrong direction. [White should have gone for a more solid plan: 14.O-O 14...f5 15.♙d2 ♙e7 16.♖fd1 ♖ad8 With an unclear position.]

14...f5 **15.h6** White is trying to create some play on the kingside but the black king is going to take a safe position on h8 while his white colleague is badly placed on e1.

15...♙f6 **16.♙d2** ♙e7 Jobava is bringing all his pieces into the game.

17.f4?! Not the right choice again. By opening the g-file White is only helping Black. [It would still have been the best choice to admit the mistake and castle kingside. The only problem

now is that the pawn on h6 is very badly placed, so Black is already better. 17.O-O]

17...gxf3 18.gxf3 ♖h8! Strong and logical. The black rook will have great play on the g-file.

19.f4 It is already hard to advice something sensible to White, but a move like f4 cannot be good.

19...♖ad8! Jobava seems to be in great shape! White cannot take the piece on e5.

20.♖c2 [After 20.fxe5 20...dxe5 21.♖c2 Black has the winning 21...f4! 22.♗f2 fxe3 23.♗xe3 ♗h4+—+]]

20...♘g4 Another good move by Black. White's position is falling apart like a card house.

21.♗xg4 ♗g8 22.♘e2 [22.♗f3 would also lead to a bad position. 22...♖xg3 23.♖f2 ♗g6 And Black would go for a similar idea as in the game by pushing d5.]

22...♖xg4 23.♗f2 White's position just looks horrible and Jobava has no mercy!

23...d5! What a crush!

24.♖cd1 Black wanted to play d4 or use the d-file.

24...♖e8 An extra threat on the e3 pawn can't be wrong.

25.c5 ♗f7 Black's pieces are coming from all sides.

26.♖c1

26...♖e4 Total domination...

27.♘d4? This blunder does not matter anymore. Of course Black is winning now after 27...Rxg3 28.Kxg3 Rg8. What a fantastic game by Jobava! **0-1**

Endgame section

(15) Van Wely, Loek(2672)
- Karjakin, Sergey(2759)

Wijk aan Zee NED(1.2),
2014.01.11

GM Csaba Balogh
Best rating: 2672

In the following endgame, despite the material equality, White has to fight very hard to save the game. First of all the connected passed pawns are much more useful than the doubled g-pawns. The black rook is excellently placed to support his own pawns and to cut the white king along the 4th rank. The last fact is that whenever White pushes g6, Black catches the pawn with Kg5, g7, Kg6 and then the rook has no good square to leave in order to promote the pawn. Van Wely finds a very clever idea to maintain his drawing chances.

49. ♖g6! White waits until Black runs out of useful moves. Black will soon have to either advance his pawns, which might become targets, or to leave the excellent position on b4 with his rook. [At the moment 49.g6 was simply bad in view of 49... ♗g5 50.g7 ♗g6 and White cannot leave with his rook to attack something.]

49...a4 50. ♖g7! Van Wely is right in realizing that he must have his rook on g8 when the black pawns are on b5 and a4.

50...b5 [50... ♖xg4?? obviously does not work because of 51. ♖h7+ ♗xg5 52. ♖g7+-; The pawns cannot be advanced separately because they get lost: 50...a3? 51. ♖a7 ♖b3+ 52. ♗f4 and White is threatening with mate on h7.]

51. ♖g8! Here we are! Black is in zugzwang.

51...a3! Karjakin tries his best chance. [51... ♖b1 allows the white king to advance to the 4th rank. 52. ♗f4! Threatening with mate. 52... ♖f1+ 53. ♗e5 And the draw is unavoidable. In any case White advances his g5 pawn and trades it against one of the queenside pawns... 53... ♗xg4 54.g6 ♗g5 55.g7 ♗g6 56. ♖b8 ♗xg7 57. ♖xb5=; As soon as the rook leaves the protection of the b-pawn, White forces the draw by playing 51... ♖c4 52.g6 ♗g5 53.g7 ♗g6 54. ♖b8 ♗xg7 55. ♖xb5=]

52.g6? This is where White goes wrong... [White could have held the draw after 52. ♖a8! 52... ♖a4! (52... ♖b3+ makes no sense now because of 53. ♗f4 and as usual, White is threatening with mate.) 53. ♖xa4 bxa4 54.g6 a2 55.g7 a1= ♖ 56.g8= ♖ Black can still try playing on, but White must hold.]

52...♔g5 53.g7

53...♖b3+! This is the problem. White does not have Kf4 with the mate threat anymore and Black succeeded in protecting both of his pawns. He is ready to catch the g-pawn with his king.

54.♔e4 ♔g6 55.♖a8 It is the best chance to give up the pawn and try to activate the king to support the other pawn.

55...♔xg7 56.♔f5 White is threatening with the unpleasant Ra7 check, which would force the king to the back rank. Black needs to act precisely.

56...♖f3+! 57.♔e4 [57.♔g5 is bad as Black has time to consolidate with 57...b4 58.♖a7+ ♖f7—+]

57...♖c3! Karjakin improved the position of his rook. We will see the point in the next move.

58.♔f5 ♖c5+! 59.♔f4? A blunder at the end, but the game was lost anyway. [59.♔e6 59...b4—+ is hopeless.; White could have tried 59.♔e4! 59...b4! (Now after 59...♖c4+? 60.♔d3 The white king is in time to catch the a-pawn in case of Ra4... 60...♖xg4 61.♔c3! b4+ 62.♔b3 With an excellent blocking position.) 60.♔d3 ♖c3+ 61.♔d2 ♔f6 62.♖a5

62...♔g6! And White is in zugzwang. 63.♖a4 (63.♔d1 loses to 63...b3! 64.♖xa3 b2 65.♖a6+ ♔g5 66.♖b6 ♖c1+—+) 63...♖f3 Black creates the threat of a2 as it cannot be taken because of Rf2. 64.♔c1 (64.♔c2 64...b3+—+; 64.♖xb4 is refuted by the following well-known motif: 64...a2! 65.♖a4 ♖f1! 66.♖xa2 ♖f2+—+) 64...♖b3 65.♖a5

65...♖b2!—+ White is zugzwang again. He is forced to allow the black king to g5 and then his position automatically collapses.]

59...♖c4+ 60.♔f5 ♖a4 White resigned. Another difficult rook endgame. **0-1**

**(16) Dominguez Perez, Leinier(2754)
- Caruana, Fabiano(2782)**

76th Tata Steel Masters(4.3),
2014.01.15

GM Arkadij Naiditsch
Best rating: 2737

63...♙d8 Have you ever seen a position with triple doubled pawns?! I can't remember any! It is clear that White is much better, but the win is still far away. Dominguez shows us how it is done with great technique!

64.b6! A great move! By giving up a pawn White is getting his king to b5.

64...cxb6+ 65.♔b5 White's main idea is to put Black into zugzwang and one is not enough to win the game, two zugzwangs are needed!

65...♙f6 66.b4 And here is the first one! Black can't defend both the h4 and d4 pawns.

66...♙e7 67.♙xd4 The d4 pawn is gone...

67...♙d8 68.♙c3 [68.♙f2 would immediately lead to the next zugzwang, but there is no need to hurry for White.]

68...♙e7 69.♙g7 ♙d8

70.♙d4 And here comes the next zugzwang...

70...♙e7 [70...♙c7 71.♙f6 White is just winning here.]

71.♙xb6 ♙f6 72.♙f2 White has won two pawns, but it is still not an easy win!

72...♙c3 [And this is what would happen if Black kept on waiting: 72...♙e7 73.♙d4 ♙d8 74.♙g7 ♙e7 75.♙h6 followed by Bg5, collecting the h4 pawn.]

73.♙xh4 White is 3 pawns up, but it is still not that easy to finish the game. The next stage is to bring the white king from b5 to the kingside.

73...♙d2 74.♙f2 ♙xf4 75.♔a4 ♔a6 76.b5+ Fixing the black king on the b7 square.

76...♔b7 77.♔b3 ♔c7 78.♔c2 And the white king starts to walk...

78...♔b7 79.♙d4 ♙g3 80.♙e3 ♙e5 81.♔b3 ♔c7 82.♔a4 ♔b7 83.♔b4 ♙g3 84.♔c4 ♙e5 85.♔b3 ♙g3 86.♔c2 ♙e5 87.♔d2 Once again Dominguez does not hurry with the winning plan, which is very normal. Anyway all Black can do is stand and wait.

87...♟g3 88.♞e2 ♟h4 89.♞f1 ♟g3 90.♞g2 ♟h4 So the king is on g2, but what next?!

91.♟f2 ♟f6 92.♟e3 ♟h4 93.♟f2 ♟f6 White repeats the moves twice again before playing the right winning plan.

94.h4! Dominguez is going for the break through.

94...♞c7 95.♞h3 ♞b7 Black can only keep on waiting.

96.h5! The right move!

96...gxh5 97.♟h4 ♟d4 98.♟e7 Black cannot defend the h4 square and the d6 pawn at the same time.

98...♟e5 99.♟d8 ♞c8 100.♟g5 ♞b7 Before playing Kh4 White has put his bishop on the very nice position on g5 to make the f4 move easier.

101.♞h4 And the white king starts his movement...

101...♞b6 102.♟e3+ ♞xb5 103.f4 Now both the h5 and f5 pawns are going to fall...

103...♟b2 104.♞xh5 ♞b4 105.♞g5 ♞c3 106.♞xf5 ♞xd3 107.♟g1 ♟c1

108.♟h2 followed by Ke6 and f5. A really perfectly played endgame by Dominguez, who showed great technical skills!
1-0

Editorial Preface

This year the Tata Steel Chess Masters is a one man show. Aronian is showing an amazing preparation followed by almost perfect play. Two rounds before the end of the tournament he has practically secured the 1st place. For the second position there is a fight between Karjakin, Giri and Dominguez.

In the Challengers (B group) we see a fight for the first place between Jobava and Saric, Jobava being more lucky and Saric just showing great fighting chess.

In the current issue we are of course focusing on the games from Wijk aan Zee. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Rapport, Richard(2691)**
 - **Dominguez Perez, Leinier(2754)**
 [A34]

76th Tata Steel Masters(5.6),
 2014.01.17

Rapport does not want to challenge his opponents in the theory and tries to play creatively right from the opening, but it often backfires...

1.c4 c5 2.♘c3 g6

3.g4?! Such a weird move should obviously never come to a strong GM's mind. Dominguez was also so shocked that for the following couple of natural moves he spent almost an hour. White is going to have longterm difficulties in the future with his damaged pawn structure. The point could only be to put the pawn to g5 and to restrict the movement of the g8 knight a bit.

3...♙g7 4.♙g2 ♘c6 [If Black wanted to avoid the game's continuation, he could have started with 4...d6 5.g5 e6 followed by Ne7 and only then Nbc6.]

GM Csaba Balogh
 Best rating: 2672

5.d3 d6 6.g5 e6 7.h4 After g4-g5 has been played, White is forced to play some extraordinary moves. White tries to attack with h4-h5, which Dominguez rightly decides to stop.

7...h5 Black is ready to finish the development with Nge7, b6, Bb7 and then to overtake the initiative with d5-d4. Rapport knew that in case of a normal development Black could easily execute this plan, therefore he takes another seemingly dubious, but this time in my opinion clever decision.

8.♙xc6+!? White gives up his nice bishop and of course the bishop pair in order to damage the pawn structure.

8...bxc6 9.f4 A necessary follow-up of the previous move! After Black had no need to worry about the d5 square, he was ready to take full control over the center with e5 followed by developing the bishop. White also had to fight for the center.

9...e5! A highly principled move! First of all Black has the

bishop pair and he opens the position to let them work with full efficiency. The second part is rather prophylactic and it will be explained in the 9...Ne7 line. [In case of careless development White's strategy could have worked perfectly: 9...♘e7?! 10.♗f3 Black suddenly has problems with his pawn structure and the c8 bishop. The bishop cannot be activated in his own camp, while opening the position with d5 would seriously weaken the c5 pawn. White would use the typical Nimzo Indian ideas with Qd2, b3, Ba3, Rc1 and Na4. And e5 doesn't work anymore either because after fxe5, Black is forced to recapture with the pawn, which again would seriously weaken the c5 pawn. While if Black waits with 10...O-O for example, then after 11.♔d2 ♖b8 12.b3 White plays Bb2 and Ne4 next, trading the strong bishop. Black ends up with bad pawn structure, a big hole on f6 and the poor bishop on c8.]

10.fxe5 ♗xe5 Compared to the previous line, where Black was suffering with the c8 bishop, he will develop it to g4 and it is going to be very actively placed on a square from where White cannot kick it out. White must try to act quickly.

11.♗f3

11...♗xc3+! Dominguez decided to deal with the d6 pawn with the same strategy as White did a few moves ago.

He gives up his long diagonal bishop, but White has no chance to occupy the a1-h8 diagonal with his bishop to explore the weakened dark squares because of his own c3 pawn. Black's remaining pieces are coming very fast to the game. [11...♗g7 was of course the most natural reaction, but here White wanted to play 12.♗f4 ♗e7 13.♗e4 with quick pressure on the d6 pawn and an unclear game.]

12.bxc3 ♗e7 13.♗f4 O-O In the following moves, White continues playing positionally against the d6 and c5 pawns, but he leaves his king in the center and underestimates the upcoming threats.

14.♗d2 White wants to occupy the e4 square with the knight, from where it is pressing the d6 pawn and is ready to jump to f6. Black had to parry this idea... [It was better to try 14.O-O followed by Qe1-g3. Black also has his resources with Bg4 and Nf5, but we have a game with mutual (maybe slightly better for Black) chances.]

14...d5! Positionally Black weakens his c5 pawn, but now it is more important to play actively and focus all the pieces against the king who is stuck in the center. By going away from f3 with the knight, White clearly shows that he is not intending to castle kingside.

15.♔a4 With the idea of Qa3, White also drives his queen away from his king, underestimating the things that will happen in the game.

15...♗g4! Black can easily focus all his pieces on the backward weakness on e2!

16. ♖h2 Rapport was hoping to solve the problems with this defensive move, but such artificial moves usually don't lead to any good results...

16... ♜e8! Black strengthens his position with each move!

17. ♖b1 [17. ♜a3 was obviously too slow. Black comes with 17... dxc4 18. ♗xc4 ♗f5 creating the threat of Qxd3 and on 19. ♖d1 ♜d5 with the idea of Nxh4 the e2 pawn falls. White is unable to protect his king.]

17... ♜d7 Black brings another piece against the e2 pawn. [

17... dxc4! was even stronger with direct problems: 18. ♜xc4 (18. ♗xc4 loses to 18... ♗d5 with a double attack on f4 and c3 and after 19. ♗d2 ♗xc3! 20. ♗xc3 ♜xd3—+ wins.) 18... ♗d5 With the threat of Nxf4 and Qxd3 and on 19. ♖f2 Black wins after 19... ♗b6! 20. ♜xc5 ♜xd3—+]

18. ♖f2 ♜e6 Black already has an overwhelming advantage, but Rapport also misses a nice tactical shot next move.

19. ♗b3 [Maybe some defensive move like 19. ♖b2 was more advisable, although after 19... ♗f5 20. ♗b3 ♗xh4 21. ♗xc5 ♜f5+ White cannot hope for anything good with such a king.]

19... ♗xe2!! All black pieces were activated to the maximum, so the position was screaming for a blow. Dominguez finds this excellent destructive sacrifice after 3 minutes of thinking!

20. ♖d2 [The sacrifice could not be accepted because after 20. ♖xe2 20... ♜g4! —+ there are too many threats in the air... 21. ♗e5 (21. cxd5 21... ♗xd5—+; 21. ♗e3 21... ♗f5—+) 21... ♜g1+ 22. ♖d2 ♜xb1—+]

20... ♜g4! Black continues pushing with the most active moves!

21. ♗xc5 ♜xh4! Not only grabbing a pawn, but White also has no good way to defend the f2 rook.

22. ♗e3 [22. ♖xe2 22... ♜xf4+ 23. ♖c2 ♗f5—+; 22. ♖xe2 22... ♗f5+ 23. ♖f1 ♜h1#]

22... ♗f5! Dominguez gives no time to White to consolidate.

23. ♖xf5 [White could have avoided getting mated by 23. cxd5 but the endgame would simply have been lost after 23... ♜xa4]

(23...♔g3 also wins.) 24.♘xa4 ♕xd3! 25.♖xd3 ♖xe3+ 26.♔d2 All moves are winning here, but the most precise is 26...♖e5 to leave from the Rxf5 threat. 27.dxc6 ♖d8+ 28.♖c2 ♘e3+ 29.♖b2 ♘d1+—+]

23...gxf5 24.g6 A desperate attempt to create some complications, but of course it does not help... [24.cxd5 24...♔xa4 25.♘xa4 cxd5—+ was also hopeless as Kxe2 f4 wins for Black.]

24...♖xe3! It was time for the final blow. Black eliminates the last defender and mates with his remaining three pieces!

25.♖xe3 ♖e8+ 26.♖d2 ♖f2 The game is over...

27.gxf7+ ♖xf7 28.♔xa7+ [On 28.♖c1 28...♖xc5—+ is the simplest...]

28...♖g8 29.♖b8 Allowing a pretty finish.

29...♕xd3+! 30.♖xd3 ♖e2+ And mate in the next move. A crushing victory, which might be useful for the talented Hungarian player to forget about such g4 moves in the opening... **0-1**

(2) Aronian, Levon(2812) - So, Wesley(2719) [A15]

Wijk aan Zee NED(6.3),
2014.01.18

GM Csaba Balogh
Best rating: 2672

The first part of the tournament is clearly dominated by Aronian, who started with 5/6. Let's enjoy one of his victories.

1.c4 ♘f6 2.♘f3 g6 3.♘c3 d5 The Anti-Gruenfeld is on the board. Aronian employs a forgotten line...

4.cxd5 ♘xd5 White has a wide range of choice here. Aronian goes for one which is rather used when White wants to make a draw but of course the story is different this time.

5.e4 ♘xc3 6.bxc3 [Most of the games continue with 6.dxc3 6...♙xd1+ 7.♙xd1 and after some precise moves we reach a completely balanced position. 7...f6 followed by e5.]

6...♙g7 Here comes the idea... When White has recaptured with the b-pawn he usually transposes to the main lines with 7.d4, but then there was no point to play the Anti-Gruenfeld.

7.♙e2!? White wants to finish his development before playing d4. With this he would like to give Black less options to attack the central pawns with c5. Black answers with the most natural reaction and anticipates the d4 idea.

7...c5 8.O-O ♘c6 Black has temporarily prevented the d4 move and we might think that with a backward d-pawn White cannot hope for an advantage. However Aronian's home preparation is just about to start.

9.♙a4 White does not give up playing d4. He wants to support it from all directions. With the queen from the side and he has left the d1 square for the rook.

9...♙d7 10.♙a3! Leaving the pin and trying to provoke a small weakening with b6. In that case, later on when the rook occupies the opened c-file (after Rd1, d4, cxd4 cxd4) Ba6 could be very annoying.

10...♙a5

11.♙d1! White waits until Black trades the queen to develop the bishop with tempo. There was still one game in the database and it was played by Aronian's countryman Vladimir Akopian. The Armenians definitely had huge analyses about this position.

11...O-O The novelty. [In the previous game Mamedyarov anticipated the d4 idea in the most direct way by playing 11...e5 A move that a Gruenfeld player hardly makes as it closes the bishop. Now White forgets about the d4 plan and starts to play on the weakened squares. 12.♙c4 (12.♙b3!? was also possible to preserve the queens.) 12...♙xa3 13.♙xa3 b6

14.♖ab1 Aronian had probably prepared something instead of this move. It looks like a waste of time now. 14...♞d8 15.d3 h6 16.h3 ♘a5 17.♙d5 ♙c6 18.♙xc6+ ♘xc6 19.♚f1 ♚e7 20.♚e2 ♞d7 21.c4 f5 22.♙b2 ♚e6 23.♙c3 ♞hd8 24.a4 ♘b4 And a draw was agreed in Akopian-Mamedyarov, Porto Carras 2011.]

12.♞b1 Before pushing d4 White makes a last improvement, forcing a small weakness and leaving the diagonal of the g7 bishop with the rook.

12...b6 13.d4 ♞xa3 14.♙xa3

14...♙g4! A standard Gruenfeld move! Black tries to remove the defender of the central pawns. [It would have been a positional mistake to open the c-file and the diagonal of the a3 bishop: 14...cxd4 15.cxd4 Black has to protect the e7 pawn against d5. 15...♞fe8 16.d5 ♘e5

17.♘d4! += With a nice edge for White. Rac1 is coming next.

The next line illustrates well the point behind forcing the b6 weakening: 17...♞ac8 18.♙a6! And Black cannot hold the c-file because of 18...♞c3 19.♙b4! ♞c7 The only square for the rook. 20.d6! exd6 21.♙xd6 ♞c3 The only square again and White wins a piece after 22.♘e2!+- and when the rook leaves White has Bxe5 and the d7 bishop falls!]

15.dxc5! The critical reaction. White opens the position and tries to make use of his better developed pieces. [Without having taken on d4 15.d5? makes no sense as the a3 bishop remains very passive. 15...♘a5 or Ne5 and Black is more than fine.]

15...♙xc3 16.♙a6! Squeezing Black. Without the queens on the board White never needs to worry about Bxf3. In the endgame the doubled pawns are not bad at all.

16...♞ab8 17.♞dc1 So far Black was defending well but now he fails to solve the problems with a tactical trick.

17...♙xf3 [Now or in the next move Black should have taken 17...bxc5! indirectly protecting the c3 bishop. 18.♙xc5 (With the idea that after 18.♞xb8 18...♘xb8! counterattacks the a6 bishop.) 18...♙b2! 19.♞c2 ♙xf3 20.gxf3 ♙d4= Black achieves equality.]

18.gxf3 ♙d2 [18...bxc5! should still have been taken, with the same ideas as in the previous move.]

19.♖d1 ♘c3 It looks a bit suspicious to put the bishop onto the c-file and in front of the knight, but So believes in his calculation. [White is also slightly better after 19...♘f4 20.♙g2! White simply protects the f3 pawn in case of Ne5. Black is lacking any useful moves as after bxc5 Bxc5 the a7 pawn becomes extremely weak, while after 20...♖fd8 21.♖xd8+! Black cannot recapture, he either loses the b6 or the e7 pawn.]

20.♙g2! Just as in the 19...Bf4 line, Aronian protects the f3 pawn and enjoys the fact that Black is lacking useful moves. White could still improve his position with f4-e5. [The tactical justification of Bc3 was 20.cxb6 20...♖xb6! 21.♖xb6 axb6 22.♖c1 and here Black holds after 22...♖a8!= and both sides lose their pieces.]

20...bxc5 [20...♘f6 21.f4+=; The same story again, Black had no good take back after 20...♖fd8 21.♖xd8+±]

21.♘xc5 ♘b4 Black at least protects the e7 pawn against the threatening Bb5 or Bb7.

22.♘e3! White's advantage lays in the bishop pair, so he needs to preserve it! The bishop also keeps on exerting pressure on the a7 pawn. The black pieces have no stability, they cannot be supported by pawns and the a6 bishop is also very annoying as it limits the movements of the black rooks.

22...♘d6! Black wants to simplify the position and frees the b4 square for his knight to get counterplay against the a-pawn and also to kick out the a6 bishop.

23.♖bc1! Aronian keeps on preserving his remaining pieces to be able to maintain more pressure on his opponent.

23...♘b4 24.♘c4 Black only temporarily solved the problem of the a6 bishop and the knight because a3 is hanging in the air, after which the knight is forced to go back to its bad place on c6 again.

24...♖fc8! So defends tenaciously! [24...a5 could have been met by 25.f4!± and Black has no good way to deal with the e5 threat, after which the bishop has no square.]

25.f4! Aronian keeps the tension! [25.♘xa7!? was actually also possible. 25...♖a8 26.♘e3 ♘xa2 27.♘xa2 ♖xc1 28.♘xf7+! ♙xf7 29.♖xc1+= Black has good chances to hold this endgame because of the doubled f-pawns. Aronian preferred to keep all the pieces, especially since Black was low on time and in this endgame he could easily have reached the time control.]

25...♙f8! Black leaves from the threatening e5 Bc5 Bxc5 Rxc5 Bxf7 check!

Aronian does a brilliant calculating job here. I believe that at this point he had foreseen the following very difficult line and the position arising after move 32.

26.a3 [26.e5 was also possible. 26...♙c5 27.a3 ♙xe3 28.fxe3 ♜c6 29.♙a6 ♜d8 30.♜xd8+ ♜xd8 31.♜c7+= White is clearly better, but Black has chances to survive.]

26...♜c6 27.♙a6 ♙xa3! So again tries to solve the problem with calculation, but Aronian has counted one move further. [27...♜c7 28.♜d3 looks awful, Black is totally pinned.]

28.♜c4! [White has nothing after 28.♙xc8? 28...♙xc1 Black takes the same amount of pieces. 29.♜xc1 ♜xc8; 28.♜a1 could have been met by another intermediate move: 28...♙b2!]

28...♜d8 It is understandable that Black wishes to leave the deadly pin on the c-file. [28...♜c7 is very suspicious. White either plays 29.f5 (Or 29.♜d2 and Rdc2 next.)]

29.♜a1! Two pieces are hanging again, Black needs to continue with his intermediate moves

29...♙b2 [29...♜a5 would have been the only chance, although I don't wish to anyone to defend the following position as Black. 30.♜xa3 ♜xc4 31.♙xc4± With an extremely long torture.]

30.♜aa4!! This was the very deep point of Aronian and the c6 knight is trapped. Amazing! That is why both rooks had to move to the 4th rank to control the d4 and b4 squares. Black has only one move to save the knight.

30...♜d6 But now Black gets one more terribly placed piece.

31.e5! ♜e6

32.♜c2!! The last brutally strong subtle move! White frees the c4 square for his bishop and the rook is trapped. Black cannot avoid losing big material.

32...♜d8 [Another nice line is 32...♙d4 33.♙xd4 ♜xd4

34.♜c8+! ♜xc8 35.♙xc8 ♜c6 36.♙d7!+- Winning the knight and the game.]

33.♙xa7! Black's pieces suddenly got completely confused. Now the rook should protect the b2 bishop, but then Rc8 wins the knight. Black has pinned his last hopes to another intermediate move...

33...♜a8 34.♙b5 And as a final blow, the b2 bishop got trapped!

34...♙xe5 35.fxe5 ♖xe5 36.♙e3! A last intermediate move, after which White preserves a healthy extra piece. Black resigned. What fantastic piece play by Aronian! Even such an endgame could be full of hidden tactical resources. **1-0**

(3) Nakamura, Hikaru(2789) - Karjakin, Sergey(2759) [E37]

76th Tata Steel Masters(5.2),
2014.01.17

GM Arkadij Naiditsch
Best rating: 2737

We will see a short, but very intense game. In the opening Nakamura managed to surprise Karjakin but Sergey managed to find great moves and White would have been in big danger of losing the game had Black continued in the final position!

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.♚c2 The Nimzo with 4.Qc2 seems to be Nakamura's main weapon.

4...d5 [4...O-O 5.a3 ♙xc3+ 6.♚xc3 d5 7.♙g5 is the other very main line in which Nakamura managed to win a very nice game against Kramnik lately.]

5.a3 ♙xc3+ 6.♚xc3

6...♘e4 That's the difference to 4...O-O. Black is trying to act very quickly against White's center.

7.♚c2 c5 White has the advantage of the bishop pair, but Black is a bit better developed, which is why a move like 7...c5 is very logical. Of course it is just the beginning of the theory.

8.dxc5 ♘c6 Black continues the dynamic play.

9.cxd5 exd5 10.e3 O-O 11.♘f3 We are still in a long line of theory.

11...♙f5 12.♙d3 ♖a5+ So far both players were playing very quickly.

13.♔e2!? A risky but interesting move which has never been played before on the top level. [After the usual 13.♘d2 13...♘xd2 14.♙xd2 ♙xd3 15.♖xd3 ♖xc5 the position is almost equal. Black is in time to play the fast d4 next.; And after 13.b4 13...♘xb4 14.axb4 ♖xa1 15.O-O ♙f6 16.♙b2 ♖e7 the position is complicated as well, but it seems that Black is not worse here either.]

13...♖fe8! Logical and strong. Black has the d4 move in mind and of course the rook is just very well placed on e8. [It would have been a much worse idea to play 13...♘b4?! because now after 14.axb4 ♖xa1 15.♖b3! the black queen is almost caught on a1 and White clearly has more than compensation for being an exchange down for a pawn.]

14.♖d1 White is freeing the f1 square for the king.

14...♙g4! Another great move by Karjakin. [Of course it just didn't make any sense to play 14...d4? 15.♔f1 as White would be a healthy pawn up.]

15.b4 A very risky move. Of course Nakamura is as usual fighting for the advantage and 15.b4 is probably the only way

to do it, but Black is getting a very strong attack now. [A more calm way of playing would have been 15.♔f1 15...♘e5 Black has many other ways, but this is one of the logical lines 16.♙e2 ♘xf3 17.♙xf3 (Of course not 17.gxf3? 17...♙h3+ 18.♔g1 ♖e6 and Black is winning.) 17...♙xf3 18.gxf3 ♖a6+ A tricky check. 19.♖e2 ♖xe2+ 20.♔xe2 ♘xc5 And this endgame should be around equal.]

15...♖c7 [15...♘xb4? doesn't work as after 16.axb4 ♖xa1 17.♙b2 ♖a2 18.♖a1 White is trapping the black queen.]

16.h3 White doesn't have anything better. [16.♔f1 was almost losing as after 16...♘e5! 17.♙e2 ♘xf3 18.♙xf3 Black is in time for the mating attack. 18...♖xh2 19.♙xg4 ♖h1+ 20.♔e2 ♖xg2 With a winning position for Black.]

16...♙xf3+ 17.gxf3

17...♘g5 Black is threatening to play Nd4 next. As we can see, the position is very dynamic. White is a pawn up and if he was in time to develop the pieces the game could simply be over.

18.♙b2 White is almost fully developed.

18...d4! Another very good move by Black. The white king is under heavy attack. [18...♖f4 didn't work because of the pretty 19.♙e4!]

19.h4 A very cool move considering white's king is just in the

center. But maybe White just didn't have anything better. [19.♖g1 would lead to a bad position for White. 19...♔h2 20.♖xg5 ♖xe3+ 21.♔d1 ♖xf3 Although the position is complicated, it should be in Black's favor.]

19...♖xe3+ Too easy to miss for a top class player... [19...♔h2 didn't work now as after 20.hxg5 ♖xe3+ 21.♔d2 ♖xf3 White has an escaping square: 22.♔c1 ♖xf2 23.♔b3 With an almost winning position for White.]

20.fxe3 ♔h2+ 21.♔f1 The position seems to be a draw, but is it really?!

21...♔h1+ 22.♔f2

22...♔h2+ Karjakin seems to be happy with a draw, which is not a bad result with Black against the World Nr3, but Black could have gone for much more! [22...♔xh4+ 23.♔f1 ♔h1+ 24.♔f2 The position looks like a draw, but now comes 24...♔xf3+ 25.♔g1 and the amazing 25...♖e8!! and it seems like Black is the one pushing here, even though he is a rook down...]

23.♔f1 ♔h1+ 24.♔f2 ♔h2+ A great and very interesting game! 1/2-1/2

(4) Dominguez, Leinier(2754) - So, Wesley(2719) [C42]

76th Tata Steel Masters(8.2),
2014.01.21

GM Arkadij Naiditsch
Best rating: 2737

We will see a short and great attacking game with a great final tactical blow, even though So made it a bit too easy.

1.e4 e5 2.f3 f6 So plays a lot of different openings and lately he started to play the Berlin (like so many others), so it is a bit strange that he switched to the Russian in this game, especially as he has quite bad results in it.

3.fxe5 d6 4.f3 fxe4 5.c3 One of the most fancy lines. Karjakin was probably the one who tried to reach an advantage as White again and again.

5...xc3 6.dxc3 e7 7.e3 White's idea is simple, to castle queenside and attack on the kingside. On the other hand Black's position is very solid and he has a good pawn structure, so in case of exchanges the endgame should most probably in a draw. **7...O-O** [7...g4 is another very solid move for Black, followed by Nc6-Qd7 and O-O-O.]

8.Qd2 b6 This move has become more popular during the last games. [Other main moves are 8...d7 ; and 8...c6]

9.O-O-O b7

10.h4! Very typical but strong! White's idea is to play Bd3 next and then to combine different threats of playing Ng5 or Bg5, trying to create a weakness in the black pawn structure.

10...d7 The black knight is going to take a very nice position on f6, which cannot be wrong.

11.d3 f6 Now it is time for White to come up with a clear plan of what to do next?! Black just wants to play Re8 or Qd7, concluding his development.

12.d4!? A very original idea. White gives away his bishop to activate the queen. If Black just did nothing now White would play Qf4.

12...c5 It is also hard to say anything against 13...c5. Very logical play.

13.xf6 xf6 14.f4 d5 Closing the bishop is a risky decision. [14...e8 looked more solid and after 15.b1 White has some attacking ideas connected with h5 or Ng5 next, but of course Black's position is still very solid.]

15.h5 e8

16.g4?! White wants to play g5 next but this leaves the a8-h1 diagonal quite open... [A very interesting option was to play 16.f5 16...g6 17.f4 The queen simply comes back and Black would have big problems defending this position with an open h-file.]

16...g6? A horrible mistake by So. White would be happy to provoke this move in general, even if he had to lose a tempo. [To open the bishop is a must! 16...d4! 17.♖h3 (17.g5 17...♙xf3 18.gxf6 ♜xf6 Black is fine.) 17...dxc3! With a very complicated position.]

17.hxg6 hxg6 The position still doesn't look so simple, but Dominguez finds a winning combination:

18.g5! The beginning of a forced line.

18...♙g7 And here comes the key move:

19.♖h7!! It is clear that Black has blundered this move...

19...d4 It is better to open the bishop late than never... [19...♙xh7 would lead to an immediate mate as after 20.♜xf7 Black has no defence against Rh1.]

20.♙c4 ♜e7? Once again So misses his chances for a fight...

[The only chance to continue would have been to go into the following forced line: 20...♙xf3 21.♖xg7+ ♙xg7 22.♜xf7+ ♙h8 23.♜xg6! ♖e7! Black is still fighting. 24.♜f6+ ♖g7 25.♜xf3 ♜xg5+ 26.♙b1 And White's attack might be winning, but Black is still fighting.]

21.♜h4! A silent and deadly move, as after 21...Bxf3 22. Rxg7 Kxg7 23.Qh6 Kg8 24.Qxg6 Kf8 25.Qh6 Kg8 the very nice 26. g6! ends the game. **1-0**

Endgame section

(15) Aronian, Levon(2812)
- Karjakin, Sergey(2759)

76th Tata Steel Masters(9.4),
2014.01.23

GM Arkadij Naiditsch
Best rating: 2737

White's position should be winning. As we know, most of the rook endgames with an extra b-pawn are winning, especially when the rook is standing behind the pawn. Karjakin is trying an interesting way of making a draw, but very precise play by Aronian still makes the game come to a logical end.

47. ♔e2 The white king is going to c3.

47... ♔f5 [47... ♔e5 didn't save Black as after 48. ♔d3 ♔d5 49. ♔c3 ♔c5 50. ♖e2 White should be able to slowly win the endgame by advancing the b-pawn.]

48. ♔d3 g5 Black is trying to get to the h2 pawn.

49. ♔c3 ♖b7 Rb7 and not Rb8, in order to stop the white pawn on b6.

50. b4 And the white pawn starts to move.

50... ♔g4

51. b5! Exactly! The white pawn will stop the black rook from being active.

51... ♔h3 It seems like Black has a real chance to collect the h2 pawn, after which the position would of course be a simple draw, but White has a very strong reply:

52. gxh4!! This move leads to a clear win for White!

52... gxh4 [52... ♔xh4 didn't help either, as after 53. ♔d4 ♔h3 54. ♔e5 White is easily winning.]

53. f4! The most simple move. White gives up the f-pawn, but promotes the b-pawn. Black is not in time for any counterplay.

53... ♔g4 54. b6 f5 55. ♔d4 ♔xf4 And here comes the last precise move of the game:

56.♖b3! Great technique by Aronian, not even giving his opponent the slightest hope.

56...h3 57.♔d5 ♕g4 58.♕c6 The white b-pawn is a queen...

58...♖b8

59.♖g3+ Cutting the black king on the h-file.

59...♕h4 60.b7 f4 61.♖g7 A really nice win by White and a very useful endgame to know! **1-0**

(16) Karjakin, Sergey(2759)
- **Naiditsch, Arkadij(2718)**

Wijk aan Zee, 2014.01.18

[CE TEAM]

White has reached the following queen endgame with an extra pawn, however to convert it seems to be extremely difficult because of the doubled pawns on the f-file. Black's main hope is that the a-pawn is not advanced far enough at the moment and his queen is always threatening with different kind of perpetual checks. However Karjakin manages to deal with all this with very resourceful play.

61.a4! The pawn needs to be pushed as far as possible, but White had to foresee the following couple of moves.

61...♖a7 Black attacks the a-pawn and keeps an eye on the g1 square to disturb the king. [61...♖a3 would simply have been met by 62.♖c2±]

62.♖a2! White is supporting his pawn from behind and at the same time he is sometimes threatening with Qe6+ to win the f5 pawn.

62...♔g1+ 63.♔g2 White opens a new front to advance his king to h5! Black tries to avoid this idea.

63...♔e1+ [In case of 63...♔a7 White plays 64.♔h4+ ♔h7 65.♔a2! and again White is ready to push his pawn, while Black has only one check... 65...♔e7+ 66.♔h3±; 63...♔a1 64.♔h4+! ♔f6 (64...♔h7 65.♔h5 leads to a similar scenario.) 65.♔h5 ♔xa4 66.♔g6+ ♔e7 67.♔g7+ ♔e8 68.♔e5+ White collects both pawns and obtains very good winning chances.]

64.♔f2 ♔a1 Black would like to keep the option of giving checks on the back rank. [64...♔a5 does not change much: 65.♔d4 ♔e1+ 66.♔g2 ♔e2+ 67.♔f2 White covers the squares. 67...♔a6 68.♔a2±]

65.♔b6+ ♔h5 Black is hoping for stalemate ideas, but his king soon finds himself in a mate net.

[65...♔h7 drops the f5 pawn after 66.♔c7+ ♔g6 67.♔c6+ ♔h7 68.♔d7+ ♔g6 (68...♔g8 69.♔e6+ is the same.) 69.♔e6+ and Black loses the f5 pawn with check, because 69...♔g7 runs into 70.♔e5+--]

66.♔e3!! This brilliant resource gives White a winning position! White is threatening with mate in one on e8. [66.a5= is a draw on the spot as White cannot use his queen to avoid the perpetual because of the a5 pawn. 66...♔e1+= is a draw on the spot as White cannot use his queen to avoid the perpetual because of the a5 pawn.]

66...♔h8 [66...♔xa4 67.♔e6!+- is the point and Black cannot avoid getting mated!; 66...♔g6 67.♔e6++- wins.]

67.a5! White is finally able to advance his pawn and it is very hard for Black to block the pawn and to cover the mate threats at the same time.

67...♔g8+ 68.♔h3 There is no hope for a perpetual at the moment. **68...♔a8**

69.♔b3? The only mistake by Karjakin...

[The subtle 69.♖e2!!+- would have won the game. Black cannot take the pawn and it is going to advance to a6 on the next move.]

69...♖e8?! [After 69...♔g6! it is not obvious how White should proceed. There is a temporary problem with the f3 pawn. 70.♖e6+ ♔g7 71.♖e5+ ♔g6 72.♔g3 ♖a6 Black is still in the game, although White should win with a good technique. 73.♖a1 ♔h7 74.♖a2 ♔g6 Other moves were not better either. 75.♖g8+ ♔f6 76.♖d8+ ♔g7 77.♖b6 ♖f1 78.a6 White advances the pawn and Qe1 could be met by Qf2 and then a7!]

70.a6 The game is over now. The rest is easy.

70...♖e7 71.♖b1 [71.♖b7 was also good: 71...♖h4+ 72.♔g2 ♖xf4 73.♖f7+ ♔h4 74.♖f6+ ♔h5 75.a7 ♖d2+ 76.♔h3+-]

71...♔g6 [71...♖h4+ 72.♔g2 ♖xf4 is refuted by 73.a7 ♖g5+ 74.♔f1+-]

72.♖g1+ ♔h5 73.a7 The pawn is advancing slowly but surely.

73...♖a3 74.♔g3 ♖a5 [74...♖a6 75.♖e3 ♖g6+ 76.♔h3+-]

75.♖e3 White uses the same idea as when the pawn was still on a4.

75...♖d8 76.♖e5 Impressive technique by Karjakin! **1-0**

Clash of the Titans

(17) Capablanca, Jose Raul
- Marshall, Frank James[E11]

New York(3), 1927.02.22

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.♘f3 e6 3.c4 ♙b4+ 4.♙d2

4...♙xd2+ An interesting and solid line which is still played nowadays, but usually Black starts with [4...♞e7 with the idea that after 5.g3 ♙xd2+ 6.♞xd2 ♘e4 is followed by Qb4.]

5.♘bxd2 This is not the best square for the knight. The main move should of course be [5.♞xd2 5...d5 Now White has two plans: 6.g3 (6.e3 6...O-O 7.♘c3 ♞e7 With the idea of provoking White to take on d5, as otherwise Black will play dxc4 and push c5, equalizing the position in the center.) 6...O-O 7.♙g2 c6 8.O-O ♘bd7 With the thematic plan b6-Bb7-c5 and the last games showed that is really hard for White to get any advantage here.]

5...d5 6.g3 O-O 7.♙g2 ♘bd7 8.O-O With the knight on d2 the only plan for White which makes sense is to try and play e4.

8...♞e7?! This move is more logical in case Black wants to play dxc4 and e5 next but it usually works when the knight is on c3. [8...b6 followed by Bb7 should solve all of Black's problems.]

9.♞c2 Black suddenly has problems to finish his development because of the c7 pawn.

9...b6 [9...c6 10.e4 (10.♞fe1 10...b6 11.e4 ♙b7!? 12.e5 ♘e8 13.cxd5 cxd5 14.♘f1 White is slightly better because he has more space and some potential pressure on the kingside.) 10...dxe4 11.♘xe4 e5 12.♘xf6+ ♞xf6 13.♞ad1 exd4 14.♘xd4 a5 15.♞fe1 And Black still needs to find some accurate moves to equalize.]

10.cxd5! Now White gets the better structure because Black cannot recapture on d5 with the pawn.

10...♞xd5 [10...exd5? 11.♞xc7 ♞xe2 12.♞fe1±]

11.e4 ♞b4 12.♞c3 [12.♞xc7? 12...♙a6 13.♞fd1 ♞fc8 14.♞f4 ♙e2± And White is losing material because after Re1/c1 comes Nd3 and after Rfb1 Nc2.]

12...c5 [12...♙a6

looks logical but now comes the very strong 13.a3! ♙xf1 14.♙xf1 and White gets a big advantage.]

13.a3! A strong move since Black will always have problems finding a good square for the knight.

13...♞a6 [13...♞c6 14.d5]

14.dxc5 bxc5 [14...♞axc5 15.b4+= (XNc5); 14...♞xc5 15.♞fc1 (15.♞d3!?) 15...♞xc3 16.♞xc3 ♙b7 17.b4 ♞ac8 18.♞ac1 ♞xc3 19.♞xc3 And White keeps a small advantage thanks to his space advantage and the limited knight on a6.]

15.♞c4+= ♙b7 16.♞fe5 ♞xe5 17.♞xe5 ♞ad8 [17...♞b8 The idea is clearly to improve the knight by transferring him to d4. 18.♞d6 (Xc5) (18.♞d6 also gives White the initiative.) 18...♞d7 19.♞f4 ♙a6 20.♞fd1 ♞ab8 Thanks to his better structure and the unpleasant knight on d6 White has the advantage but at least the black pieces start to be active and are looking for counterplay.]

18.♞fd1 f6 Black is going to get rid of the very active queen but on the other hand the e6 pawn is weak now.

19.♞c3 ♞xd1+ 20.♞xd1 ♞d8 To reduce the material gives Black more chances to make a draw with this slightly worse position.

21.♞d3 A typical move which idea it is to fight for the d-file. [21.♞xd8+ 21...♞xd8 22.♞b3 ♞c7 (22...♞d7 23.♞a5 ♙a8 24.♙f1 (XNa6))

23.♞d6! ♞xd6 24.♞xb7 ♞b6 25.♞e7 White has a big advantage thanks to his better pieces.]

21...♞b8 22.♞xd8+ [22.♞d6 22...♙a6 23.♞d2 ♞xd6 (23...♞c7 24.e5†) 24.♞xc5 ♞d7 (24...♞xd2 25.♞xe7 ♞d1+ 26.♙f1 ♞xf1+ 27.♙g2+- (XKe8)) 25.♞xe7 ♞xe7 26.♞d8+ ♙f7 27.♞xb8 ♞c7± And Black has chances to save the draw thanks to his activity.]

22... ♖xd8 23. ♖b3 ♘a6

24. ♘h3? White is putting pressure on the e6 pawn, which seems logical, but better was [24.e5 With the idea to play Nd6. 24... ♘xc4 (24... ♖d7 25. ♖d6 ♖xe5 26. ♖xe6+ ♖h8 (26... ♖f8 27.f4+- (XKf8))

27. ♖xe5 fxe5 28. ♖f7+-) 25. ♖xc4 ♖e7 26.exf6 gxf6 27. ♖f4+= With the idea not to allow Nd7 because of Qc7. Black holds all weaknesses but his position is not easy to play.]

24... ♖c6? A huge mistake! It is hard to understand why Black gives the pawn for free...

The right move was [24... ♖f7! Simply protecting the pawn.

25. ♖a5 (25.e5 25... ♖d5↔ With counterplay after 26. ♖d6+ ♖e7 27. ♖xb8 ♖d1+ 28. ♖g2 ♖f1+-+; 25. ♖e3 25... ♖b6 26. ♖xe6+ ♖xe6 27. ♖xb8 ♖xe4 28. ♖xa7+ ♖b7 With a huge initiative over the light squares.) 25... ♖xa5 26. ♖xe6+ ♖f8 27. ♖d6+ ♖f7 With only perpetual check.]

25. ♖xe6+ ♖h8 26. ♖d5+- ♖d4 The knight finally comes to d4 but it costs Black too much.

27. ♖a4 ♖xc4 28. ♖xc4 ♖c8 29. ♖g2 ♖g4 30.e5! White avoided any kind of counterplay with his last two moves.

Editorial Preface

The Tata Steel Masters and Challengers have come to an end.

Aronian scored a fantastic 8/11 although he lost the last game to Van Wely with White, which was clearly a pity as 9/11 could have been one of the best results in the history of this super tournament. The 2nd and 3rd places were shared by Giri and Karjakin, both with 6.5/11.

In the Challengers group Saric fought his way to the top with a great 10/13. Jobava and Timman shared the second place, both with 8.5/11.

The Gibraltar Open has begun, with 10 players over 2700 ELO! On the very top we find Adams, Vachier Lagrave, Ivanchuk, Eljanov... Just 3 rounds have been played and most of the favorites had a good start.

The Moscow Chess Festival is also on the run. This is another very strong open tournament that is combined with an elite rapid event including Grischuk, Morozevich and many more Top Russian players.

And now let's come to what is definitely the main event of the week, the Zurich Chess Classics, which is the strongest chess tournament in the history of chess by average rating. With Carlsen and Aronian we have the World number 1 and 2 players! Only Kramnik, who seems to be in deep preparation for the upcoming candidates tournament in March, is missing from the very top players. After 2 rounds Carlsen, Nakamura and Aronian all have 1.5/2, while Anand started with a very disappointing 0/2.

That's all for now, so we wish you a lot of fun with the current issue!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Harikrishna, Pentala(2706)
- Nakamura, Hikaru(2789) [B51]76th Tata Steel Masters(8.6),
2014.01.21GM Csaba Balogh
Best rating: 2672

An impressive positional achievement, which was crowned with a nice tactical blow at the end.

1.e4 c5 2.♘f3 d6 3.♙b5+ Harikrishna did not want to test himself in a sharp line of Nakamura, he rather goes for the recently popular Bb5 check, where White is aiming for a positional game with a small advantage.

3...♞d7 The most dynamic answer by Black. 3...Bd7 leads to much simpler positions.

4.O-O a6

5.♙d3 I have commented the Svidler-Papaioannau game several CEWNs ago, which had seen the same continuation. This ugly-looking move is actually very logical, White wants to occupy the center with c3, Bc2 and d4.

5...♞gf6 6.c3 b5 7.♙c2 ♙b7 8.♞e1 We have reached the

critical position from the opening point of view, where it is still unclear how Black should play. The mentioned Svidler game continued with 8...e6. Nakamura's reaction is the most common move.

8...e5 [A third option is 8...c4 to fight against d4 with the en passant, but the black pawns become slightly weakened after all... 9.a4! e5 10.axb5 axb5 11.♞xa8 ♞xa8 12.♞a3! The most direct play against the b5 pawn. 12...♙e7 (Black cannot hold the pawn for long with 12...♙c6 13.d4 or 13. d3 might be more forcing. 13...cxd3 14.♙xd3 ♞b7 15.♞e2 and Black is in trouble.) 13.♞xb5 O-O Black decided to sacrifice his weakness for compensation. He has a target on e4 and the c1 bishop is locked, but White succeeded to consolidate. 14.♞e2 ♞c8 15.d4 cxd3 16.♙xd3 White was better in Karjakin-Cheparinov, Rhodes 2013]

9.d4 Suddenly we have reached a Ruy Lopez structure from the Sicilian defense. The plans for both sides will already be familiar for us. Black might be a tempo up, but with the c5-d6-e5 pawn structure the bishop on b7 is misplaced. White is going to close the center with d5 and then the bishop will be locked out from the actions and it will take Black some time to drive it back to d7.

9...♙e7 10.♞bd2 White employs the Spanish maneuver of transferring the knight to g3. Opening the center with taking

twice on d4 usually favors White, the knight might jump to f5.

10...O-O 11. ♖f1 ♜e8 Typical Spanish moves. Black gets ready to release the tension in the center and also strengthens his e5 pawn to free his pieces.

12. ♘g3 ♙f8

13.d5! Harikrishna chooses the right moment to close the position. [After another useful move like 13.h3 Black already opens the game with 13...cxd4 14.cxd4 exd4 15. ♘xd4 (15. ♜xd4 15...♜c8) 15...d5! This was not working before without the preparation of Re8 and Bf8 because of e5!]

13...g6 Black takes the f5 square under control. Otherwise White would have settled his knight on f5 and it is not easy to kick it out since g6 always runs into Nh6!

14.b3! The Ruy Lopez middlegames are extremely complex, one must study them very deeply to understand. The fight is usually going on on both sides. White sometimes tries to provoke weaknesses on the queenside with a4, Bd3, Qe2. If Black wants to keep the structure he must transfer his pieces to this side, but then a kingside attack with h3, Nh2 and f4 could be very effective. With his last move Harikrishna prevented Black's typical counterplay of c4, Nc5, a5, Ba6, b4 and Nd3 and he also prepares himself for the queenside play.

[14.a4 was bad in view of 14...c4 White loses control over the b3 square and he cannot put pressure on the b5 pawn, like it happened in the 8...c4 line. Black consolidates with Nc5 next move.]

14... ♘b6! The knight stands well on b6 against the upcoming ideas on the queenside.

15. ♜b1! A deep subtle move, which tries to make use of the misplacement of the b7 bishop with the x-ray. At the moment there are many pieces between them, but in the forthcoming moves both sides are intending to play such moves as c4 or a4, after which the opening of the b-file is already in the air. [15.a4!? is another known plan in such positions. Black has a couple of options here as well, but it is not easy to assess which one is the best. 15...bxa4 (15...c4 transposes to the game after 16.bxc4 ♘xc4 17. ♜b1; 15...♙c8 is a logical move to keep the tension and strengthen the b5 pawn with Bd7.) 16.bxa4 a5!? is also interesting with the idea of c4, Ba6 and driving the b6 knight back to c5, from where it could jump to d3 and b3.]

15...c4 Nakamura tries to sharpen the position, but White is better prepared for the direct actions. [It was probably more advisable to leave the x-ray with 15...♙c8 although White has an easier game after 16.h3! followed by Nh2 and f4.]

16.bxc4! ♖xc4

17.a4! The x-ray starts to work. It is suddenly not easy to deal with the b5 pawn. Nakamura decided to sacrifice it, but he does not get enough compensation. It is worth mentioning that if Black could play Bd7 now, he would be completely fine!

17...♔c7 [Nakamura was probably initially (before playing 15...c4) intending to play 17...♔a5 but White has the very strong 18.♘d2! ♔ec8 (18...♔xc3 drops a piece after 19.♘e2! ♔a5 The only square for the queen. 20.♘xc4 bxc4 21.♔xb7+—) 19.♘xc4 ♔xc4 20.♘d2! Bd3 is coming next and Black cannot avoid losing the b5 pawn. 20...♘c8 21.axb5 axb5 22.♘d3 ♔c5 23.c4!±; 17...♔d7 is also too passive. The d7 square should be occupied by the bishop. 18.♘d3 ♔ec8

19.♔e2 The c4 knight looks nice, but actually it is a clear target. Black cannot remove it because the b5 pawn is always

hanging and White is threatening to simply win a pawn with Rb4. 19...♔c7 20.♔b4 ♔ac8 White can further improve his position by bringing the e1 rook into the game. 21.♘g5! ♘e7 22.axb5 axb5 23.♔a1± Black is in trouble.]

18.axb5 axb5 19.♔xb5 ♘a3 Nakamura takes the bishop pair, but a pawn is still a pawn!

20.♔b3 ♘xc2 21.♔xc2 ♘d7 This is the idea. Black would like to create a solid blockade on the c-file with Nc5, Ba6 and Rec8, Rab8. If he could achieve all this he could still be fine, but of course White also has his ideas...

22.♘e3! After Nc5 the knight could be taken now as recapturing with the pawn is positionally not an option for Black. White would play c4 (to avoid c4-Bc5) and both bishops are bad. Black would have no compensation for the pawn.

22...♘a6 23.♔a3! Threatening to pin the bishop, which forces Black to simplify the position.

23...♘b5 24.♔ea1 ♔xa3 25.♔xa3 White is ready to invade the 7th rank. **25...♔b8** [25...♘c5 26.c4± is also bad.]

26.♔a7 [26.♘d2!? was also possible, but it is only good if White foresees the following brilliant idea. White wants to play c4, so Black should try to parry it: 26...♘b6 and here

27.c4!! ♘xc4 28.♘gf1!! After this shocking move, Black cannot

avoid losing a piece. The threat is Qc1!! and then Rc3! Black is simply unable to leave the pin on the c-file. It is important to play Qc1 first, because Rc3 could be met by the intermediate move Nxe3! (28. Rxc3 28... Nxe3) 28... Rxc8 is refuted by (28... Qxc8 already runs into 29. Rxc3! because the rook is hanging in the end: 29... Nxe3 30. Rxc8 Nxc2 31. Rxb8+-) 29. Rxc3 Nxe3 30. Rxc7 Nxc2 31. Rxc8+-]

26... ♖c8 Black did not want to leave the annoying rook on a7, but otherwise White could have played c4! [26... ♖b7 27. ♖xb7 ♖xb7 28. c4 ♗a6 29. ♗d2± White slowly but surely converts his advantage.]

27. h3 Opening the back rank, just in case. A good prophylactic move.

27... ♗b6

28. ♖c1! Another very subtle move! After Black has focused all his pieces on the queenside in order to fight against c4, the black king is a bit alone and Harikrishna exploits it with a very nice attack.

28... ♗c4 29. ♗h6 Suddenly all of White's pieces are ready for a final blow!

29... ♖c5 [29... ♖b7 also leads to a lost position, but at least Black is not getting mated. 30. ♖xb7 ♖xb7 31. ♗xf8 ♖xf8 32. ♖h6+ ♖g8 33. ♗g5 f6 34. ♗e6±]

30. ♗h5!! And suddenly the game is over! Black cannot avoid getting mated, which is actually not a big surprise. Only the f8 bishop is defending, while all white pieces are around the king...

30... ♗g7 [30... gxf5 leads to forced mate after 31. ♖g5+ ♖h8 32. ♖f6+ ♖g8 33. ♖xf7+ ♖h8 34. ♖xh7#; 30... ♖xa7 is refuted by 31. ♗f6+ ♖h8 32. ♗xf8 Qh6 is coming next and the diagonal closing combination does not help either: 32... ♗e3 (32... ♖xf8 33. ♖h6+-) 33. ♗xd6+- Black collapses.]

31. ♗xg7 ♖xa7 32. ♖h6 It is just too much to hold.

32... f5 [32... f6 does not change anything. 33. ♗xf6+ ♖f7 34. ♗g5+ ♖e7 35. ♗e6+- White will mate soon.]

33. ♗g5 1-0

**(2) Dominguez Perez, Leinier(2754)
- Aronian, Levon(2812) [C84]**

Wijk aan Zee NED(10.3),
2014.01.25

GM Csaba Balogh
Best rating: 2672

Aronian was in irresistible form in Wijk aan Zee. Let's examine his 6th win, with which he secured his tournament victory with a round to go...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 Earlier in this tournament he successfully employed the Berlin (3...Nf6), but this time he goes for his other pet line, the Marschall gambit.

4.♙a4 ♘f6 5.O-O ♙e7 6.d3 We can already consider that this as the new main line to 6.Re1. Dominguez scored a nice win over Caruana several rounds ago.

6...b5 7.♙b3 O-O 8.♘c3 d6

9.a3 This is the latest fashion. After Black has protected his e5 pawn, he was threatening to grab the strong b3 bishop with Na5, therefore White frees the a2 square. 9.a4 is the alternative for White.

9...♘a5 [The mentioned Caruana game continued with 9...♙e6 Dominguez prepared the interesting novelty of

10.♙e3!? and he managed to get an edge later on 10...♙d7 11.♘d5 ♙d8 12.♙g5 ♙xd5 13.exd5 ♘d4 14.♘xd4 exd4 15.a4 ♙f5 16.♙d2 ♖b8 17.axb5 axb5 18.h3 h5 19.♖a7 h4 (19...♘xd5? drops a piece after 20.g4! hxg4 21.hxg4 ♙e5 22.f4! ♙e6 23.♖e1+-) 20.♙f3 ♙xf3 21.gxf3 The endgame was slightly better for White due to the weaknesses of the d4, c7 and b5 pawns.]

10.♙a2 ♙e6 11.♙g5 Dominguez improves his own game against Karjakin, which he just lost a few weeks ago in rapid chess. Black plays the Na5 move in order to control the center with c5, therefore the novelty is very logical, White fights for the d5 square. [11.♙xe6 11...fxe6 It is always hard to know whether the doubled pawns will become weak in the future or if Black's strengthened center will start to work effectively. 12.b4 ♘c6 13.♙d2 d5! 14.♖e1 ♙d6 15.h3 ♘d7 16.♘e2 a5 17.♖b1 axb4 18.axb4 ♖fb8 19.♘g3 d4! Karjakin nicely overtook the initiative and won the game later on. The b4 pawn became a real target. 20.c3 dxc3 21.♙xc3 ♖a4 22.♙b3 ♙h8 23.♖ed1 White succeeded in saving his pawns, but Black obtained an excellent pawn structure after 23...♘d4! 24.♘xd4 exd4 25.♙d2 c5=+ Creating a strong passed b-pawn.]

11...c5 12.b4 This is the novelty. In combination with the next move it looks like a really decent one! [12.♙xf6 12...♙xf6 13.♘d5 g6 14.c3 happened in the previous games, which also looks playable.] **12...♘c6**

13. ♖d5! A concrete move, which seems to be tactically justified in all the lines.

13... ♗xd5 Usually giving up the bishop like this is considered to be an achievement for White, but as we will see, one inaccuracy might change the entire evaluation. [13... ♖xd5 leads to a clearly worse position after 14.exd5 ♗xg5 15.dxe6 fxe6 16.♗xe6+ ♔h8 17.♗d5 In case of opposite colored bishops, the principle says that the side who's bishop is more active is better. In this position the white bishop is clearly better. 17... ♖c8 18.bxc5 dxc5 19.♗xc6 (19.♗e4!+= might be even stronger in order not to change the positional advantage into material one. White continues with c3, Re1 and Ra2-e2 is necessary, winning the e5 pawn in better circumstances.) 19... ♖xc6 20.♖xe5+=]

14.exd5 ♖d4 15.bxc5! Forcing Black to give up his d4 knight, otherwise the e5 pawn falls. White also opens the position for his two bishops.

15... ♖xf3+ 16. ♖xf3 dxc5 We have reached the critical position, when Dominguez plays the most natural move, which gives away his advantage. According to Aronian it even passes the initiative to Black.

17. ♖fe1? White activates his rook with tempo, but the position required more concrete measures. [Aronian considered 17.a4 to be the critical move, which disturbs

Black's plan with Nd7. Although bxa4 and b4 both destroy the healthy pawn structure, they don't really come into consideration... 17... ♖d6 seems like the best, but then Black cannot get his nice piece arrangement, like it happened in the game. (17... ♖d7? does not work here because after 18.♗xe7 ♖xe7 19.axb5 axb5 20.d6! the a8 rook is facing problems due to the Bxf7 discovered check idea.) 18.♗b3; The machine suggests the extremely deep idea of 17.♖ae1! seems like the strongest move and the point is that after 17... ♖d7 18.♗xe7 ♖xe7

19.d6! the blocked a2 bishop suddenly becomes a really strong piece. 19... ♖xd6 20.♗xf7+ ♔h8 21.♖d5! White leaves the pin and obtains a clear advantage. We will soon realize the difference to the game...]

17... ♖d7! 18.♗d2 Keeping the pair of bishops is a good idea, but White has problems with the one on a2, which can hardly be activated due to his own d5 pawn. [In comparison to 17.Rae1, in the same line with 18.♗xe7 18... ♖xe7 the a2 bishop becomes really poor if Black plays Qd6. 19.d6 does not work because of 19... ♖xd6 20.♗xf7+ ♔h8 21.♖d5 ♖f6! and the f2 pawn falls! This is the reason why White needs to go to e1 with the a-rook.]

18... ♗d6! Black creates a strong blockade and is ready to launch a dangerous attack with f5! Suddenly it is not

easy to suggest a good plan for White, which is why Aronian considered Black's position more comfortable after 17.Rfe1 Nd7 and suggested instead 17. a4! Great understanding!

19.a4 White tries to open the queenside to get his bad bishop into the game.

19...f5 20.♟b3?! The most natural move is a mistake again. White would like to create tension on the queenside between the rooks and also wants to activate the bishop with axb5 cxb5 and c4! Finally the bishop could join to the game through a4! However the position was more concrete again... [20.♞h3 was more circumspect to anticipate Black's plan.]

20...e4! A breakthrough which suggested itself a lot. Black opens the bishop's diagonal and frees the e5 square for the knight.

21.dxe4 [21.♞h3 was still stronger, although Black is more than fine here as well.]

21...c4! The whole idea to improve the light squared bishop has collapsed.

22.♟a2 ♞h4! 23.e5! A clever simplification, which leaves White in an only slightly worse position. [23.g3 directly would have run into 23...♞e5! with real problems for White.; 23.h3 was losing after 23...fxe4 24.♞xe4 ♞xf3 25.♞xh4 ♞a3!—+ White cannot deal with the pin!]

23...♟xe5 24.g3 ♞g4! Another very deep move by Aronian! Two moves later it all becomes clear.

25.♞xg4 fxg4 26.c3 White wanted to take the d4 square under control and also to have a chance to bring back the a2 bishop through b1. [26.♞ab1 was also bad in view of 26...♟d4 27.♟e3 ♟xe3 28.♞xe3 ♞f6+ blocking the d-pawn and the a2 bishop is stuck.]

26...♟f6!! And now the idea behind Qg4 becomes clear. Black has created a hole on f3 for his knight! White has no good way to deal with it. Dominguez tries to control it with an e4 bishop, but it creates new problems...

27.♟b1 b4! White is not attacking the c4 pawn anymore, which is why Black uses the pin on the f6-a1 diagonal to create a b3 passed pawn.

28.♞e3 ♞ad8 Black prepares to win the d5 pawn with Nb6 and also protects his knight against Bf5.

29.♟f5 h5 30.♞d1 White has left the pin and threatens to play cxb4, therefore it is time to create the powerful protected passed pawn.

30...b3! 31.♗c1 Aronian eliminates the blockader of the b3 pawn.

31...♗g5! 32.♗e6+ ♔h8 33.♖e2 ♗xc1 34.♖xc1 Black has reached a winning endgame. His pawns are just very strong and the knight also dominates the bishop. It looks nice on e6, but it actually doesn't do anything. The rest is only the easy technical part of the game.

34...♘c5 35.a5 ♖fe8 36.♔f1 g6! Trapping the bishop. Black simply wants to bring his king to f6. White cannot create any counterplay as the b3 pawn restricts his abilities.

37.♖ce1 ♔g7 38.d6 A desperate attempt to complicate the matters, but it does not help.

38...♖xe6 39.♖xe6 ♘xe6 40.♖xe6

40...♖d7! b2 immediately would have been met by Re7-b7.

Now Black simply wants to play Kf7 or just push b2... The game is over.

41.♖e8 ♖xd6 42.♔e2 [There was no time for 42.♖c8 42...b2 43.♖b8 ♖d1+--+]]

42...♖d3 With this victory, Aronian has beat his personal best and improved his live rating to 2834! **0-1**

**(3) Rapport, Richard(2691)
- Nakamura, Hikaru(2789) [A04]**76th Tata Steel Masters(10),
2014.01.25GM Arkadij Naiditsch
Best rating: 2737

Rapport has been playing a lot of strange openings and it usually went very wrong. This game is not an exception. After the opening White is quickly getting into trouble, but Nakamura decided to go into even deeper complications, for which there was no need, which gave White some attacking chances and finally a missed opportunity by Rapport ended the game on the spot.

1. ♖f3 c5 2. b3 Well, what to say to such about move... It can't be the right way to fight for any opening advantage.

2...d6 It seems very logical to me to put d6-e5 against White's bishop on b2.

3.e3 White is preparing the d4 move.

3...e5 4. ♗b5+! A strong check. [4.d4 wouldn't lead to anything for White as after 4...e4 5. ♖fd2 d5 the position is at least equal.]

4...♗c6 Nakamura is going for the complications. [4...♗d7 was a more simple move. 5. ♗xd7+ ♗xd7 6. O-O ♗gf6 With an about equal position.]

5. ♗c3 White is preparing the d4 push which was not possible now because of Qa5.

5...♗f6 6.d4 We already have a very strange position on move 6. It is clear that White's pawn would be even better placed on b2 than on b3, but the position is very dynamic.

6...e4 A correct and typical move.

7.d5 White has nothing else left, it is not an option for White to let Black play d5.

7...a6! This little move makes it all work for Black! [Of course not 7...exf3?? 8.dxc6 and White is winning.]

8. ♗f1 The white bishop needs to return to his starting position. [8.dxc6? would lead to a very bad position as after 8...axb5 9. ♖d2 bxc6 Black has the bishop pair and a strong center.]

8...♗e7 9. ♖d2 ♗f5 Now it is all about whether Black is in time to keep the pawn on e4 alive. In case he manages to, Black just has much more space, which means a clearly better position.

10. ♗b2 The b3 move finally has some sense now. The bishop on b2 is somehow in the game.

10...b5! A good move. Black continues playing on "squeeze" mode. [10...♗exd5 didn't make much sense because of the following great tactical trick: 11. ♖dxe4! ♗xc3 12. ♖xc3 d5 13. ♗d3 White almost managed to equalize.]

11.h3 h5 Not letting White play g4.

12.a3 Black wanted to play b4 and win the d5 pawn.

12...Nc8? This logical move could have turned out to be a serious mistake. [It was more simple for Black to play 12...h4 followed by Rh6 and Rg6 with a pressure on g2. I think Black is clearly better here.]

13.a4? White is returning the favor.. . [13.f3! While the black knight is in a passive position on c8, it was time for White to take strong actions. 13...exf3 What else to play?! 14.Qxf3 And suddenly all white pieces are great. The next white move is 0-0-0 followed by e4-e5. Right out of nothing, Black's position is really looking bad!]

13...b4 14.Ne2 Nd5!? After this move we are entering crazy complications. [14...Qe7 was much more solid and I think Black is better here.; After the careless 14...h4? 15.g4! is a nice tactical move.]

15.Ng3 Nxe3 Black said "A" so he needs to say "B"... [After 15...Qg6 16.Ndx4 White is better.]

16.Qe2! I have a feeling that Nakamura underestimated this move. [16.fxe3 wouldn't lead to anything good for White as after 16...Qh4 17.Qf2 d5 Black already has 2 pawns and a strong attack. 18.Nf3 is an attempt to complicate the game. (18.Qe2 18...Qd6 19.Nf1 Ne7 20.Qe1 Qh6 And White just cannot move!) 18...exf3 19.Qxd5 Qd6 Black should be winning here.]

16...Nxc2+ 17.Qd1 Qg6! A strong move! [After 17...Nxa1 18.Nxf5 d5 19.Nxg7+ Qxg7 20.Qxg7 Qh7 21.Qxa1 we have reached a position which is really difficult to evaluate.]

18.Ndxe4! Rapport correctly takes his chances. [After 18.Qxc2 18...d5 Black's initiative should be crushing.]

18...Qe7?! In a very complex position Black doesn't choose the best move... [18...Ne7 was better and after 19.Qxc2 d5 20.Qe1! the position is very unclear.]

19.Qf3? A bad move. White is going for a "beating" when it was time to think objectively. [After the more concrete 19.Qxc2 19...d5 20.Qd3 dxe4 21.Qxe4 White is clearly better.]

19...Nxa1 The black material advantage is becoming huge.

20.Qc4 [20.Qxa1 was also leading to a bad position for White. 20...d5 21.Nf6+ gxf6 22.Qxf6 Qe4]

20...Nb6! Now Black has only moves, but these only moves

lead to a winning position.

21. ♖f6+ There was nothing else left, it is all or nothing now for White.

21...gxf6 22. ♗xf6 ♔c7 Nakamura stays cool. The black king will feel quite safe on d7.

23. ♖e1+ ♕d7 **24.** ♗xa1 It is too late to win back the material. Black is still a full rook up.

24...♔c6! A very good technical way to convert the advantage. By giving a full rook back Black is exchanging the queens and entering a totally winning endgame.

25. ♔xc6+ ♕xc6 **26.** ♗xh8 h4 Chasing the knight.

27. ♖f1 ♖xc4 **28.** bxc4 ♗d3 Black is a pawn up, he has a passed b-pawn, the bishop pair and many other plusses. The game is over.

29. ♖d2 d5 Two connected passed pawns are better than one! :)

30. cxd5+ ♕xd5 **31.** ♖e5+ I guess that White could have resigned the game now.

31...♕c6 32. ♖h5 ♗g6 We just saw a crazy game with a very rare opening and in an unclear position Nakamura proved to be the better played. **0-1**

(4) Caruana, Fabiano(2782) - Naiditsch, Arkadij(2718) [A05]

76th Tata Steel Masters(10),
2014.01.25

GM Arkadij Naiditsch
Best rating: 2737

At this moment I was having the worst tournament of my chess career. Why? This I asked myself as well, maybe I am just getting older!? :) Caruana was on the second place and it was clear to everybody that anything else than a full point would be a disappointment for the World Nr5. Well, sometimes life is funny. Last year I played Caruana 3 times, I had 3 winning positions and out of those I scored 0.5 points, while now, being in such horrible shape, I somehow managed to win quite a smooth game. How to explain it-no idea!

1.♘f3 Caruana's main move is 1.e4 but I was expecting any opening given the tournament situation.

1...♗f6 2.g3 d5 3.♕g2 So now I had to choose whether to play a Reti after 3...Bf5 or 3...Bg4 or 3...c6, to play the same as against Karjakin which would go into a Catalan after 3...e6 but somehow I thought these openings are too boring and decided to play something more funny.

3...g6 4.c4 The quick 4.c4 is quite a tricky move because of many move orders which are coming after it.

4...dxc4 A more or less rare continuation. [4...♗g7 5.cxd5 ♗xd5 6.O-O ♗b6 would lead to the main KID with g3.]

5.♗a3 A very logical move. The white knight will take a great position on c4.

5...♗g7 6.♗xc4 c5 I need to stop White from playing d4, a move after which Black would be a bit worse.

7.♗fe5?! Caruana made this move after thinking for quite a long time. Personally I don't like it, it is just too early. I think White's position should be a bit better after the simple O-O, d3, Bd2, Rc1.

7...O-O 8.d3 ♗d5 9.♖b3 e6 10.O-O ♖c7 Now we can see why Nfe5 was a bit too early. It is difficult for White to keep the knight on e5 and to go back would just mean a loss of a tempo.

11.f4 White doesn't have a choice.

11...♗d7 12.♕d2!? A little provocation.

12...b6 I just continue playing simple move. To develop the bishop on b7 can't be a bad idea. [To go for the pawn would have been a bad decision: 12...♗xe5? 13.♗xe5 ♗xe5 14.fxe5 ♖xe5 15.♖f2 followed by e4 and I would probably be crushed on the dark squares.]

13.♗f3 ♗b7 14.e4 White needs to do something. I had an easy plan, to play Rac8-Rfd8 next with a very comfortable position.

14...♗b4 14...Ne7 was also possible, but somehow I thought the position of the knight on b4 is a bit more active and of course White cannot play Bxb4.

15.♗c3 White needs to exchange the black squared bishops. If I was in time for Nc6-Nd4 my position could even already be better. [Of course talking the pawn would have been a big mistake as after 15.♗xb4 15...cxb4 16.♖xb4 ♗c5 the black

pieces are just great!]

15...b5 During the game I was not sure if this was the right decision. My c5 pawn is getting a bit weak now, but on the other hand my pieces are getting a bit more active. [15...♖ad8 would have been a solid move and I think the position is quite complicated.]

16.♟xg7 ♞xg7 17.♞c3+ f6 Black's position is looking a little strange with pawns on g6-f6-e6 but it is very solid.

18.♞cd2 [After 18.♞e3 18...♖ad8 Black is fine as well.]

18...♞d6 [Maybe 18...♞b6 would have been a better place for the queen, but it is hard to say.]

19.a3! The only move to keep the game in an unclear area. [During the game I thought that after 19.d4 19...♖ac8 my position should be at least equal.]

19...♞c6 [Once again it would have been a mistake to take the pawn as after 19...♞xd3 20.e5! my whole position is falling apart. 20...b4 21.axb4 cxb4 22.exd6 bxc3 23.bxc3 With a clearly better endgame for White.]

20.♞b3 ♖ac8 21.♖ac1 ♞e7 So far all the moves were pretty logical. The position is very complicated. It is a pity for me that I never have the e5 move because of Bh3! but it is also difficult for White to create any concrete threats.

22.e5? This looks like a serious mistake to me. Now my knight is gaining a great square on d5. [It would have been better for White to play 22.♟h3 with a very complicated position.]

22...♞b6 23.exf6+ ♖xf6 24.♞h1 In many lines I wanted to play c4 so Kh1 is almost forced.

24...♞d5 I now have a really great knight on d5!

25.♞d2 c4! Caruana was slowly getting into time trouble and I felt that c4 should be the right move. Anyhow it was too tempting for me not to transport my knight from d7 to d3, even if I destroy my own pawn structure.

26.dxc4 bxc4 27.♞bd4 ♞c5 28.♖c2! A strong defensive move. Now the rook will defend the b2 pawn and at the same time protect the bishop on g2.

28...♞d3 29.b3 ♞b2! A very nice way to defend the c4 pawn.

[I was calculating for a long time to play 29...♘5xf4 30.gxf4 ♘xf4 31.♖xc4 ♖xc4 32.bxc4 e5 and I could really not evaluate this position. It is hard to say if I have enough power to really mate the white king. The position is very unclear.]

30.♘e5 c3 31.♖f2

31...♖d8! A good move. It is clear that White's position is already very dangerous. I have a strong c3 pawn and the white king could also get in trouble if I could somehow get rid of the g2 bishop. My main enemy is the knight on d4 so it is time to get rid of him.

32.♖e1? After this move the game is already over. [My opponent had to find the amazing 32.♖g1!! a move which is very hard to play during a practical game. 32...♘xf4 33.gxf4 ♖xd4 34.♖xc3 It seems like Black has no direct win and the position remains very complicated.]

32...♘xf4 Now the game is over.

33.gxf4 ♖xd4 34.♖xc3 ♘d1! This is why the white queen should have been on g1.

35.♖c7+ ♔g8 A lot of white pieces are hanging now.

36.♖c2

36...♖dxf4! The most simple way of ending the game.

37.♖xb7 [37.♖xd1 37...♖f1+ 38.♖xf1 ♖xf1#]

37...♘f2+ 38.♔g1 ♘h3+ 39.♔h1 ♖f1+ I was very happy to win such a game, although it just improved my mood a little bit. I don't even want to imagine how Caruana felt after such a disaster in such an important 12th round. **0-1**

Endgame section

(15) Karjakin, Sergey(2759)
- Dominguez Perez, Leinier(2754)

Wijk aan Zee, 2014.01.26

GM Csaba Balogh
Best rating: 2672

Black has an extra pawn and another one is hanging, but the passed b-pawn seems to give White enough counterplay to save the game. Karjakin's holding technique is really instructive.

46...♖b2! In rook endgames both sides should try to place their own rooks behind the passed pawn. [On the direct 46...♖xh2!? White could get the ideal position for his rook: 47.♖b3! Black is in time to catch the pawn, but his rook becomes passive. 47...♖d2 48.b6 ♖d8 49.b7 ♖b8

50.♖b6! Cutting the black king from supporting his pawns with Kg6-f5 and that could have been followed by h5-g5-g4. Now the white king simply goes for the e5 pawn. Black's only chance is to advance the pawns as quickly as possible. 50...g5 51.♖e2 h5 52.♖d3 g4 53.♖e4! White holds the draw by only one tempo: 53...g3 54.♖xe5 g2 55.♖b1 The bad luck of Black is the wrong placement of his king. He cannot use the small tactic of Rxb7 because White recaptures with check. 55...♖g8 (55...♖g6 leads to a draw after 56.♖xf4 ♖xb7 57.♖g1 ♖b2 58.♖g3=) 56.♖xf4 h4

It seems like Black simply promotes his pawns, but... 57.♖g1!! h3 58.b8=♔! ♖xb8 59.♖g3= saves the game.]

47. ♖d5 ♜xh2 The white rook can no longer occupy its ideal position and the black one returns behind the b-pawn. Although it costs Black the e5 pawn to achieve this...

48. ♜xe5 ♜b2 White's chance lays in the b-pawn, therefore he must support it with his king.

49. ♖e1 ♜b3 [49...g5 50. ♖d1 ♖g6 51. ♖c1 ♜b4 52. ♖c2 and Kc3 Rb1 Kc2 next will be similar to the game.]

50. ♖e2 [White could have saved a tempo by playing 50. ♖d2! on the spot. 50...♜xf3 51. ♖c2 Similar to the game.]

50...g5

51. ♖d2! Karjakin gives up his f-pawn in order to send away the rook from the b-file and to be able to advance his pawn.

[The passive defense with 51. ♖f2 simply loses to 51...♖g6 52. ♜e6+ (52. ♖g2 52...♖h5—+ followed by Kh2, check on the 2nd rank and Kg3.) 52...♖h5 53. b6 ♜b2+ 54. ♖f1 ♖h4! 55. ♜xh6+ ♖g3—+ and Black wins!]

51...♜xf3 [Black could not keep his rook behind the pawn 51...♖g6 52. ♖c2 ♜b4 53. ♖c3 ♜b1 54. ♖c2=]

52. ♖c2! Taking control over the b-file. White is now ready to advance his pawn.

52...♜f2+ 53. ♖c3 ♜f1 54. ♖c2! Of course White had to prevent Rb1.

54...♜f2+ Gaining some time...

55. ♖c3 ♜f1 56. ♖c2 ♜a1 [56...f3 would have been met by 57. b6 f2 58. ♜f5 and Black is forced to give up the f2 pawn.]

57. b6 ♜a8 58. b7 ♜b8 59. ♜b5 We have reached a similar scenario to the 46... Rxh2 line. As we will see, Black cannot win the game without his rook, while catching the b-pawn with the king takes too much time and White succeeds to set up a successful defensive position.

59...♖g6 60. ♖d3 ♖f6 [60...♖h5 61. ♖e2 ♖g4 62. ♖f2 h5 63. ♖g2 h4

66...♔d6 67.♔xg5 ♖f7 68.♔g4 ♔e5 69.♔g3 ♔e4 70.♖xf2 ♖xf2 71.♔xf2 An instructive endgame, which ideas could be used in our practical endgames. **1/2-1/2**

64.♖b3! And the game is drawn as the following lines prove: **64...h3+ (64...f3+ 65.♔f2! h3 66.♖b4+=) 65.♔h2!** Black is in zugzwang **65...f3 (65...♔h4 66.♖xh3+=) 66.♖b4+ ♔f5 67.♔xh3=**; The pawns can easily be stopped if Black just pushes them without support. **60...g4 61.♔e4 f3 62.♔e3 h5 63.♔f2 h4** This is the final destination for the pawns as White now forces a draw with **64.♖b4 ♔f5 65.♖b5+ ♔f6 66.♖b4=]**

61.♔e4 ♔e6 62.♖b6+ ♔d7

63.♔f5! Just in time to attack the g5 pawn before taking on h6. The rest is easy.

63...f3 [63...♔c7 64.♖xh6 ♖xb7 (64...♖g8 65.♖h7+ ♔b8 66.♔g4=) 65.♔xg5=]

64.♖xh6 f2 65.♖h1 ♖xb7 66.♖f1 [66.♔xg5= was also good.]

(16) Aronian, Levon(2812)
- Anand, Viswanathan(2773)

Zurich Chess Challenge 2014(1),
2014.01.30

GM Arkadij Naiditsch
Best rating: 2737

66...♖f1 White is clearly winning, but how to win such a position? Putting pressure on f7 is not enough as the black rook will keep on walking on the f-file. White has 2 main ideas: 1) In case White could exchange the rooks, the game would immediately be over. 2) If White somehow manages to provoke Black into playing f6, the game would be over too.

67.♔e2 A good move. The black rook has only 1 square left on the f-file.

67...♖f5 68.♖c8! Another very good move. White wants to play Rc5 next so the black rook needs to leave the f-file.

68...♖e5 69.♔f3 ♖f5+ Black keeps on waiting, but White has a clear plan.

70.♔g2 ♖e5

71.♘g5! The white knight is taking a perfect position on g5 and the threat is to play Rc7 next.

71...♖e2+ 72.♔h3 The white king moves out of the check and the black rook is forced to take back its position on the f-file.

72...♖f2 And here comes the key move

73.♖c4! with the idea of playing Rf4 next! Black cannot prevent Rf4 and at the same time protect the f7 pawn twice. Aronian showed us a very simple and perfect winning plan in such an endgame. **1-0**

Clash of the Titans

Semmering Panhans(7),
1926.03.15

GM Kamil Miton
Best rating: 2655

1.♖f3 d5 2.b3 c5 Black has many other possibilities to develop and one of most popular is 2...♗g4

3.♗b2 ♖c6 4.e3

4...♗f6 [4...e6 5.g3 This plan was played by Kramnik recently. 5...♗f6 6.♗g2 ♗e7 7.O-O O-O 8.c4 With the idea to take on d5 and play d4 to use the strength of the bishops.]

5.♗b5 [5.g3 White can maybe still play over g3, but Black has additional Bg4 plans.]

5...♗d7 An important move which doesn't allow to weaken the structure. [5...♗g4 6.h3 ♗xf3 7.♗xc6+ bxc6 8.♖xf3 e6 9.d3 ♗e7 10.♗d2 O-O 11.O-O With Nd7 next t, but thanks to his better structure White keeps a long term small plus, especially since the c5 pawn can be weak after for example c4-Rc1 ideas.]

6.O-O e6 7.d3 [7.d4 7...♗e7 8.♗bd2 cxd4 (8...O-O=) 9.exd4 O-O 10.a3 In this case the bishop on b5 is badly placed and White's plan can be Bd3 back and then Re1-Ne5 etc.]

7...♗e7

8.♗bd2 [8.♗xc6 8...♗xc6 9.♗e5 Now Black is not able to escape with the bishop. 9...♖c7 10.♗d2 O-O 11.♗xc6 ♖xc6 With an equal position.]

8...O-O [8...b6!? is an interesting idea. 9.♗xc6 ♗xc6 10.♗e5 ♗b7 And now the bishop can stay on this diagonal.]

9.♗xc6 ♗xc6 10.♗e5

10...♗e8! Of course Black keeps the bishop pair and he will soon get rid of the e5 knight.

11.f4 ♗d7 [11...♖h8!? With the idea to save knight on the board and play Ng8-f6 and then maybe Bd6-Ne7.]

12. ♖xd7 ♜xd7 13.e4 f6 Black limited the bishop on b2 and activated the bishop on e8. [13...d4 was good too and now White probably needs to play 14.f5 otherwise Black would play f5 and put the bishop on the h1-a8 diagonal.]

14. ♜f3 ♗f7 White doesn't have any weaknesses but thanks to the bishop pair Black has a small advantage.

15.a4 b6 16. ♜ae1 a6 Black is preparing the logical plan to play b5-c4 and at some moment he wants to open the position or create some weaknesses.

17.f5 dxe4 [17...e5 18.exd5 ♗xd5 19. ♖e4 With the same structure as in the game. 19...b5 With the idea to push c4 and create a weak pawn on d3 or knight on e4. Black is just better.]

18. ♜xe4 [18.fxe6 18... ♜xe6 (18...exf3 19.exd7 fxg2 20. ♜f2 ♗d8 Followed by Ra7.) 19. ♜xe4 ♜d7 20. ♖c4 ♜ab8 21. ♖e3 And White should equalize thanks to the great f5 square for the knight. 21... ♜be8 (21... ♜fe8 is not accurate. 22. ♖f5 ♗f8

23. ♖h6+! ♜h8 (23...gxf6 24. ♜xf6+--) 24. ♗xf6 ♗d5 25. ♗e5! ♗xe4 (25... ♜xe5 26. ♜xf8+--) 26. ♖f7+ ♜g8 27. ♜xe4 And White has the initiative thanks to his active pieces.) 22. ♖f5 ♗g6=]

18...e5 19. ♜e3 White is going to put the pressure on the kingside, otherwise Black would play b5-c4 and get a huge advantage.

19...b5 [19...c4!? with the concrete idea to play Bc5 leads to an unclear position. 20. ♜g3 cxd3 21. ♜g4 ♗c5+ (21...g5?? 22.fxg6 ♜xg4 23.gxf7+--) 22. ♜h1 ♗d5 23.b4 (23. ♜xd3 23... ♜b7+) 23...h5 24. ♜xh5 ♗xb4 Black is better but in practice it is still not easy to win because of the weak king.]

20. ♜g3 ♜h8 21. ♖f3 White is bringing more pieces to the attack.

21...bxa4?

A huge mistake but White would already have gotten some counterplay, for example after [21... ♗d6 22. ♖h4 ♜fc8 23. ♖g6+ ♜g8 (23...hxf6? 24.fxf6 ♗e6 25. ♜h4+ ♜g8 26. ♜h7+ ♜f8

27. ♜xf6+!) 24. ♜h3 Threatening Rxh7. 24...h6 25. ♜g4 White has ideas of sacrificing on h6 and the position is very complicated.]

22. ♖xe5! A nice tactic.

22... ♖e8 [22...fxe5 23. ♖xe5 ♗f6 24. ♖xf6! gxf6 25. ♗xf6#]

23. ♖g4 ♖g8 24. ♖xf7+ White missed a chance to win the game faster: [24. ♖g6+ 24... ♗xg6 25. fxxg6 h6 26. ♖h3 axb3

Nimzowitsch probably didn't see the following fantastic idea: 27. ♖g5!! And Black is not able to prevent the sacrifice on h6.]

24... ♖xf7 25. ♖xa4 White is a pawn up and he has a better structure. The position is winning but White needs to play accurately.

25... ♖d5 26. ♖g4 ♗d8 A good move. Black is going to activate the bishop.

27. ♖g6! Forcing Black to put the pawn on h6 and then White will have some sacrifice ideas.

27... h6 28. ♖e1 ♖d7 29. ♖e6

29...c4! A good move. Black is trying to activate his pieces to get practical chances.

30. bxc4? White immediately makes a mistake. The most important was to prepare the sacrifice on h6 very quickly. [30. ♗c1 30... ♖d4+ (30...cxb3 31. ♗xh6 b2 32. ♖h3 b1=♖+ 33. ♗c1#) 31. ♗e3 ♖a1+ 32. ♖f2+- with Bxh6 next.]

30... ♖b8 Black gets a good chance after the c4 move. Not only is the rook coming into play over the b-file but the bishop also over the b6 square.

31. ♗c3 ♖b1+

32. ♖e1? Seems to be logical to exchange an active rook but objectively it was better to play [32. ♖f2 32... ♖c1 33. ♖e2 ♗b6+ 34. ♖f3 ♖f1+ 35. ♖g4 The king is going to be safe on h3. 35... ♗a5 This trick doesn't help. 36. ♗b2 (36. ♗xa5 36... ♖xf5! 37. ♖xf5 h5+ 38. ♖f4 g5+ 39. ♖e4 ♖e8+-) 36... ♖b7 37. ♗d4± And White should slowly be able to consolidate his position.]

32... ♗b6+? Looks logical but is not accurate. Black could play [32... ♖xe1+ 33. ♗xe1

33...Qe7! A very important move with multiple ideas. Now the queen protects the f6 square, can be activated over the e-file and can also help activate the rook. 34.♘c3 (34.♖f1 34...♗e8†; 34.♙f2 34...♙b6 35.♖f1 ♙xf2 36.♖xf2 ♗e8†) 34...♗e2 35.♗g4 ♗xc2 White lost the coordination and the position is unclear.]

33.♖f1 ♗xe1+ 34.♙xe1 ♗a4 [34...♗d4 35.c3 ♗g1+ 36.♖e2± Black has problems to improve the position because the e8 square is not available for the rook.; 34...♗e8 35.♗g4! is a very good prophylactic move as now after 35...Qe7 White has 36.Re4! 35...♗e5 36.♙c3 ♗xf5+ 37.♖e2 ♗f2+ 38.♖e1 ♗xc2 39.♙xf6! ♗e6+ 40.♗e4 ♗xf6 41.♗e8+--]

35.♗h3 ♗f8

36.♙c3! A very strong move based on a precise calculation.

36...♙d8 [36...♗xc2 37.♗xh6+ g6 37...♖g8 38.♗h7+ ♖f7

39.♗xf6+--) 38.♗xh6+ ♖g8 39.♗g6+ ♖h8 40.♙xf6+ ♗xf6 41.♗xf6+ ♖g8 42.♗g6+ ♖h8 43.♗xb6 And White will avoid the perpetual check.]

37.♙d2! White is finally ready for the decisive sacrifice:

37...♗xc2 38.♙xh6 ♗b1+ 39.♖e2 ♗c2+ 40.♖e3 ♙b6+ 41.♖e4 It is very important that the queen controls the e8 square.

41...♗e2+

42.♗e3! A very nice game by Nimzowitsch, after the opening he even had a worse position, but then he showed very good attacking skills. 1-0

Editorial Preface

A great week of chess has just passed.

In the World's strongest event ever, the Zurich Chess Masters (with Carlsen, Aronian, Nakamura, Caruana, Anand, Gelfand) played in blitz, rapid and normal chess ended with an overall victory of Carlsen, who showed another fantastic result of 4/5 in normal chess. His play in blitz and rapid was much less convincing. Second and third places were shared by Caruana and Aronian.

In the World strongest open tournament in Gibraltar 3 players tied for the first place with 8/10: Ivanchuk, who was leading throughout most of the event, last year's winner Vituigov and Cheparinov, who managed to win the last 3 games. Cheparinov was lucky not to play the first rapid match which Vituigov won against Ivanchuk. In the final the Bulgarian managed to beat Vituigov 1.5-0.5 and take home the price of 20.000 Pounds.

The Moscow Open Superfinal in rapid was won by Grischuk in the male section and Charochkina in the female.

In the open section there are many players in the lead after 6 rounds: Grachev, Bartel...

In the female section Kashlinskaya is leading with the perfect score of 6/6.

As usual we wish you a lot of fun with the current issue of your weekly newsletter!

GM Csaba Balogh
Best rating: 2672

Carlsen and Aronian were dominating the super-tournament in Zurich. Let's examine the encounter between the world Nr.1 and Nr.2.

1.c4 It is impossible to predict the first moves of the top players nowadays. Carlsen decided to go for the English opening today.

1...♘f6 2.♘c3 e5 3.♘f3 ♘c6 4.g3 d5 5.cxd5 ♘xd5 Following the main lines. Actually we have a Sicilian defense with reversed colors, where White has an extra g3 tempo. This prevents Black from playing the sharpest Dragon variations with opposite side castling, but Be7 and 0-0 leads also to a very complex game with chances for both sides.

6.♗g2 ♘b6 A necessary prophylactic move before finishing the development. [6...♗e7? immediately would drop a pawn

after the small tactics 7.♘xe5! ♘xc3 8.♗xc6+ bxc6 9.dxc3±]

7.0-0 ♗e7 White has a wide range of setups here, all of them with many subtleties. Carlsen plays the classical plan with a3-b4, known from the Dragon.

8.a3 0-0 9.d3 a5 now or at the previous move is considered to be less accurate as it gives an excellent post for the knight on b5!

9...♖e8!? Aronian follows the latest fashion. Black intends to overprotect his e5 pawn with Bf8 in order to play Nd4. This is also the main plan in the reversed color Sicilian line, but for some reason, here the most common move is Be6 followed by f6.

10.b4 ♗f8 11.♖b1 A rare move. I doubt that it was a prepared one as Carlsen thought for quite some time. White probably wants to strengthen his b-pawn, knowing that Black is going to play a5 next. [11.♗b2 with the idea of Rc1 and Ne4-c5 is the main line, but Black replies in the same way as he did in the game.]

11...a5! Before occupying the d4 square, Black makes the standard weakening on the queenside.

12.b5 ♖d4

13.e3 [13.♖d2 is a common reaction in such situations. White keeps all the pieces on the board and kicks out the annoying d4 knight with e3 next. 13...a4 14.e3 ♖e6 Nc5 next with an unclear game.; 13.♖xd4?! never really comes into consideration from a positional point of view because after 13...exd4 White ends up with a backward weakness on e2, which could be attacked with Bg4 and also the hole on c3 might tell later on, when Black puts his knight on d5.]

13...♖xf3+ 14.♗xf3 a4! Fixing the targets on a3 and b5. White would have gotten rid of them by playing a4 himself. Black also wishes to install a bishop on b3!

15.♖e2

15...♖a7! Black had to protect the b7 pawn to develop the c8 bishop. It would have been more natural to do it from b8,

because later on that rook should go d8, but in this case the a4 pawn would become more vulnerable. White could have immediately attacked it with Qc2.

16.♗b2 ♗e6 17.♖fc1! Both sides are activating their pieces. White would like to improve his position with Ne4-c5. The other plan to open the position with Rfd1 and d4 made no sense now because it would give up the c4 square and it also moves into the Bb3 tempo.

17...♖d7 [Aronian pointed out that it would have been a great achievement to transfer the knight to c5 17...♖d7?!

but it would have allowed a nice positional sacrifice: 18.b6! Making use of the misplacement of the a7 rook. 18...cxb6 19.♖b5 ♖a5 20.♗c3 ♖a8 21.♗xb7 ♖b8 22.♗c6+= White gets a clear edge.] **18.♖e4**

18...♗a2! Another standard plan. White has attacked the e5

pawn and intended to gain the bishop pair with Nc5, therefore Black transfers his bishop to d5, but first he sends the rook to a slightly worse square.

19. ♖a1 ♘d5 Black is not threatening to play Qxb5 because c7 is the more valuable pawn, but he wants to attack it once more with Ra5. Carlsen finds a clever way to disturb the well-placed black pieces.

20. ♘g4! ♔d8! An excellent response. Black keeps the tension without weakening his position. [20...f5 would have given Carlsen some targets. 21. ♘h3! Maintaining the pin and after 21...♔f7 22. ♘g5 ♔g6 23.e4! the position opens up and the two bishops start to work. White takes the initiative.]

21. ♘c3 Anticipating the Ra5 idea. Black must look for another plan.

21... ♘d7! Black grabs his chance to improve his knight. This maneuver was not working in the 17th move, but the circumstances have changed a bit, which allows Black to change the character of the game with b6 and Nc5!

22. ♘f3 b6 The a7 rook protects both weaknesses from now on. Black should not worry about the c7 pawn anymore. The drawback could be that White might be able to settle a knight or a bishop on c6, but this will probably never happen. On the other hand Black is ready to trade some pieces with Nc5!

[There was a pretty trap if Black plays 22...f5?

23. ♘d6! White gets the very strong light squared bishop as 23...♘xf3? leads to a forced mate after 24. ♔a2+!! ♔h8 25. ♘f7+ ♔g8 26. ♘h6+ ♔h8 27. ♔g8#]

23. ♘b4!? A double edged move. White creates a doubled pawn, which could be weak, but actually controls the c-file. Black also gets a passed pawn on a4, which might also become a weakness after the opening of the a-file. A few moves later things will become clearer...

23... ♘xb4 24. axb4 ♔e7 25. ♘c3 Carlsen has pinned his hopes to this move. He wants to gain some initiative along the c-file and the d5 square.

25... ♘xf3 26. ♔xf3

26... ♘f6! A calm move to neutralize the important d5 square.

[After the greedy 26...♖xb4?! 27.♖c6 is quite unpleasant. Nd5 is coming next and the c7 pawn will fall.]

27.♖xa4! A clever simplification into a drawish endgame. Carlsen correctly judged that if he continues playing for an advantage Black might overtake the initiative. [27.♖c6 27...♗ea8 could also only be better for Black. Black has easier play against the b-pawns and d3 than White against a4. 28.♖c4 ♖d7 Keeping an eye on the h3 square connected with Ng4 forces White to play 29.♗g2 a3 30.♗a2 ♗e8! 31.♗ca1 ♗d6 Maybe Black had something better here... 32.♖d5 ♖e8 We have reached a kind of mutual zugzwang. Neither side has an useful move. Perhaps Black could try something like Kf8, f6 and Qf7.; The passive 27.♗cb1?! does not really come into consideration. Black gets an easy game. 27...♗d8=+]]

27...♖xa4 28.♗xa4 ♖xb4 29.♗c3 ♖b2 30.♖d1! White is in time to consolidate his position and control all the weaknesses.

30...♗d8 31.♗g2 h6 Opening the back rank.

32.h3 White also gives some extra air to his king and also prevents ideas like Ng4 just in case. A kind of waiting game could have started, but the position is balanced. Aronian decided to force a draw by perpetual check.

32...♗xd3 33.♖xd3 ♖xc1 34.♖d8+ ♗h7 35.♖xc7 ♗e4

Seems to win a piece, but of course both players had foreseen the end of the game...

36.♖xe5! ♗xc3 37.♖f5+ ♗g8 38.♖c8+ ♗h7 39.♖f5+ ♗h8 40.♖c8+ ♗h7 A hard-fought positional battle with many subtleties and a deserved result. **1/2-1/2**

(2) Anand, Viswanathan(2773) - Nakamura, Hikaru(2789) [C65]

Zurich Chess Challenge 2014(2.2),
2014.01.31

GM Arkadij Naiditsch
Best rating: 2737

It seems like almost everyone is playing the Berlin nowadays. In Zurich it was one of the main openings of Carlsen, Aronian, Anand and Nakamura, 4 out of 6! However, after the opening Anand managed to reach a very comfortable advantage but after the logical but maybe premature 15.d4 move the game went into totally unclear areas where Nakamura just managed to hammer the Ex-World Champion away.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.d3 So we have an Anti-Berlin with 4.d3. If any of our readers know how to get any advantage in this opening, please don't hesitate to contact us immediately! :)

4...♙c5 5.♙xc6 Strangely White has almost stopped trying 5.c3 or 5.0-0.

5...dxc6 6.h3 One of the main moves. Actually I have never been sure if it is really necessary to avoid Bg4...

6...♙e6 Nakamura chooses quite an aggressive line, which

I would actually not advice to play. [6...0-0 followed by the usual Nd7-Re8-f6 looks very solid.]

7.♘c3 ♙d6 Black is going for the long castle.

8.0-0 0-0-0 So we have reached quite a tricky position. It is clear that White will try to create some play on the queenside and Black on the kingside. White's idea should also be to play Na4 somewhere to exchange the dark squared bishop.

9.a3!? Quite a tricky move by Anand. [9.♘a4 of course didn't work because of 9...♘xe4!]

9...♘h5?! is too direct. [A flexible move like 9...♙b8 could have been one of the options to go on. The king is better placed on b8 than on c8 anyway and White still doesn't have Na4.]

10.♘a4! It is very important for White to get rid of the black squared bishop.

10...♙b6 I am not sure why Nakamura decided to lose one more tempo. [It might have been better for Black to play 10...f6 11.♘xc5 ♙xc5 12.♙e3 ♙d6 and White is probably a bit better because of the nice pawn structure, but nothing too dramatic has happened.]

11.♘xb6+ axb6 12.a4! Another strong move by Anand. White is planing to play a5 and afterwards a6 to try and open the a-file.

12...f6 looks a bit slow, but Black probably didn't have anything better.

13.♙e3 [Why not immediately 13.a5]

13...♘f4 Now Black is threatening to play g5 next.

14.a5 b5 To open the a-file would of course be deadly for Black.

15.d4?! This move is quite a serious mistake as it gives Black a nice chance to complicate the game. [White should have played 15.a6! asking Black the big question whether to take on a6 or not. 15...b6 (15...bxa6 was not much better as after 16.♖xa6 g5 17.d4 the black king on c8 is in terrible shape and White is close to winning.) 16.d4± And we have a similar position as in the game, only a6 is included, which is very important because White has the very important a7 move in a lot of lines.]

15...♟xh3+! Nakamura is taking his chance! Black needs to take extreme measures! [After the slow 15...♟c4?! 16.♖e1 exd4 17.♟xd4 it is clear that White is much better.]

16.gxh3 ♟xh3 So what to do now?!

17.dxe5 What else to do?! [17.a6 doesn't bring anything here because of 17...bxa6!; And after 17.♖e1 Black has the very strong 17...♟g4! with the idea of playing f5 next, with a very unclear position. (17...♞e6 18.♟h2 exd4 19.♟d2 would lead to a clear advantage for White.) 18.c3]

17...♞e6 18.♟d2 Protecting the g4 square and the queen.

18...♟xf1 19.♞xf1 ♞xe5 The position has dramatically changed. Black has 2 pawns and a rook against a bishop and a knight. This time it is White who has to be in a hurry to create some direct play on the black king as otherwise Black will be more than fine.

20.c3 Protecting the b2 pawn and securing the Bd4 move, which is a logical decision. [20.a6 Once again White could have included 20...b6 but it would only lead to the position in the game.]

20...♞b8 21.a6 b6

22.♞g2! A nice move by Anand. The queen is perfectly placed on g2. White always has the f4-e5 idea in mind and Qxg7 could also be a possible threat in some lines as well as to play Nf3-Nd4 next, even sacrificing the e4 pawn.

22...♞d6?! A very direct move with the threat of playing f5 next followed by Rg6. [22...♞he8 with a very unclear position was probably a better option.]

23.♟f1? This is already a serious mistake. Such a passive move just can't be right. [Much better was 23.♟b3 What can be more natural than to put the knight on d4? 23...f5 24.exf5 ♞xf5 25.♟d4 ♞g6 26.♟f4 White should be better here.]

23...f5! Now Black is on a roll.

24.exf5 ♞xf5 25.♟g3 ♞d7! The black queen is taking an excellent position on d7. The idea of Black is simple, to play h5-h4 followed by Rg6 and mate.

26.♞e4 It is really hard to find a plan against h5-h4 for White.

26...♞a7! Very cool and strong play. Black is securing his

king's position before starting the final attack.

27.♔g2 Anand probably wanted to bring his rook to h1-it is hard to give a better advice.

27...h5 28.♚f5 A very strange move. White starts to panic. [Following the idea was of course the right choice: 28.♖h1 28...♜d5! Black is of course better, but White is fighting.]

28...♚e8 There will be no exchange of queens!

29.♚e4 ♚f7 The hide and seek game is over. White can't attack the black queen any longer.

30.♔h1 This move loses but the position was probably already lost anyway. [30.♚f5 30...♜f6 is winning for Black.]

30...h4 Chasing the knight from g3.

31.♘e2 ♜e8 All black pieces are joining the attack.

32.♚g4 Another problem of White is that even after the exchange of queens Black's position would still remain much better.

32...♜g6 33.♚h3 This move gives Nakamura the chance to finish the game with a beautiful tactic:

33...♚d5+ 34.♔h2

34...♜xe3! A nice final blow!

35.fxe3 ♚d2 White can't defend the e2 knight in a normal way.

36.♚f1 ♜f6 White resigned because of 37.Qg2 h3! All in all a fighting game, but White could surely have done much better.
0-1

(3) Spraggett, Kevin(2544) - Short, Nigel D(2683) [C72]

Gibraltar Masters 2014(4.14),
2014.01.31

GM Csaba Balogh
Best rating: 2672

We will now have a look at this battle between two well-respected players, which ended in a crushing victory by Spraggett.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 d6 The so-called improved Steinitz variation belongs to Nigel Short's main repertoire nowadays. Black attempts to build a very solid center.

5.O-O ♙d7

6.d4!? White chooses the most direct treating of the opening. He intends to make use of the delayed development of the black pieces. [6.c3 is the main and most common move, but I personally prefer the text move.]

6...b5?! A concrete, but very risky decision. Black sends the bishop to an excellent place on b3, from where it attacks the f7 pawn. [The critical move is 6...exd4 7.♘xd4 b5 8.♘xc6 ♙xc6 9.♙b3 ♘f6 which was also played by Short many times. The latest development of the theory considers 10.c4! to be very

strong. White consolidates the center with f3 and Nc3 and obtains a small, but stable advantage. Capturing the e-pawn is too dangerous with the king on e8: 10...♘xe4? 11.cxb5 axb5 12.♙d5! seems to be the best. 12...♙xd5 13.♙xd5 ♘f6 14.♙c6+ ♘d7 15.♙g5! With an extremely dangerous attack.]

7.♙b3 exd4 Another suspicious move by Short, which he already tried in a blitz game last year. [7...♘xd4 also looks dangerous for Black after 8.♘xd4 exd4

9.c3! Opening the position in front of the e8 king at the cost of a single pawn! (The point of the b5-exd4 moves was to trap the bishop with 9.♙xd4? 9...c5! and c4 next wins a piece. A famous opening trap, but of course White does not fall into it.) 9...dxc3 10.♙h5! An important provocation of the g6 weakening. 10...g6 (10...♙f6 11.♘xc3 followed by Nd5 looks terrible for Black.) 11.♙d5 ♙e6 12.♙c6+ ♙d7 13.♙xc3! Here is the reason of the g6 provocation. The rook is in trouble. 13...♘f6 14.e5! Black can hardly defend against such an attack.]

8.c3! White uses the same idea as in the 7...Nxd4 line. After cxd4 he would obtain a clear edge with the strong center and active pieces. [8.♘xd4? would once again have fallen into the opening trap of 8...♘xd4 9.♙xd4 c5 10.♙d5 c4-+]

8...dxc3 9.♘xc3 Black is a pawn up, but he needs three moves to ensure the safety of his king by castling.

9...♖a5 Black tries to send away the strong bishop from the f7 square. Developing moves would have lost instantly... [9...♖f6? loses to 10.♗g5! ♖e5 11.f4 ♖c4 12.♕xc4 bxc4 13.e5!; 9...♗e7 10.♔d5!+- Black has no way to defend the f7 pawn.]

10.e5! This is actually the novelty of the game and it seems like the refutation of the line! White does not waste any time on saving his bishop, he immediately opens the center in front of the king who is stuck in the center.

10...♖xb3 11.axb3! White must open all the fronts if he wants his attack to be successful. The a-file plays an important role in the game.

11...♗e7 Trying to finish the development, but the g8 knight will remain the main problem.

12.♖e1 Logical and strong, bringing a heavy piece to the attack!

12...♗f8 Painful, but Black had nothing better. He left the pin and the threat of exd6 cxd6 Qxd6. [Black has no time for 12...dxe5 13.♖xe5 ♖f6 14.♗g5! Black still cannot castle because of the d7 bishop. 14...♗e6

15.♔f3! White suddenly uses the c6 square. Black has no adequate defence... 15...O-O 16.♖c6 ♔e8 17.♖xe7+ ♔xe7 18.♖e4!+-; Black quickly loses after 12...♖h6 13.♗xh6 gxh6 14.exd6 cxd6 15.♔xd6+-]

13.♗f4! Spragett develops another piece with tempo!

13...♗e6 [13...dxe5 14.♖xe5 and Qf3 next looks too much for Black to deal with.]

14.♖d4! White improves all his pieces with tempo. This time he is looking at the c6 and e6 squares.

14...d5 It is a small achievement by Black to lock the position a bit but the danger is far from over...

15.♔f3! Once again White develops a piece with tempo!

15...h5 Black tries to get some air.

16.h3!? Simple chess. Spragett wanted to further strengthen his position by bringing his rook to d1, but first he had to parry the Bg4 idea. [16.♖xe6+ 16...fxe6 17.♗h6+! also looks quite promising. 17...♔e8 18.♗xg7 ♖h7 19.♗f6± Opening the e-file by taking on f6 looks almost like suicide...]

16...♔e8 Black wanted to finally put his knight to h6, but first he had to leave the pin.

17.♖ed1! An excellent attacking move! Putting the rook to d1 was of course obvious, but realizing the importance of keeping the rook on a1 deserves attention! Nc6 followed by Nxd5 is in the air.

17...♔d7 Black had nothing better.

18.♘dxb5! Equalizing the material, but of course the attack plays a more important role now. White is threatening to play Nxd5!

18...♖b8 Spragett finds a nice way to finish the game in style: [18...♖d8 19.♖xa6+-; 18...c6 19.♘d6+ ♙xd6 20.exd6 ♜f6 21.♙e5+- (21.♘a4+- was also good enough.)]

19.♘dxb5! axb5 [19...♖xb5 is refuted by 20.♘xe7 ♔xe7 21.♖a8+-]

20.♘xe7 ♔xe7 21.♖a8! Suddenly Black gets mated on the back rank. Not even the development of the g8 knight could

help since 0-0 is illegal because Black has already moved with his king before.

21...♖c8 22.♖b7! A perfect and spectacular game by Spragett! **1-0**

(4) Maze, S.(2536) - Navara, D.(2702) [B40]

Gibraltar Masters 2014(8.10),
2014.02.04

GM Arkadij Naiditsch
Best rating: 2737

We will see a nice fighting game with some mistakes, but that is normal. After a slightly unusual opening the game quickly turned into a complicated position. Black managed to reach a solid advantage and was even close to be "much" better, but a very nice queen sacrifice saved the game for Maze.

1.e4 c5 2.♘f3 e6 In an open tournament like Gibraltar the fighting spirit of the players is especially high. The first prize in this tournament is 20.000 Pounds! That's why often openings like the Paulsen are being played, instead of for example the rock solid Berlin.

3.d3 Maze decides to quickly leave the main lines. Actually this is often a wrong decision for the "weaker" player. In an unclear position it is easier for the "stronger" player to outplay his opponent than in a long line of theory, where the game starts much later.

3...♗c6 4.g3 ♗ge7 A rarely played setup. [More usual is 4...d5 5.♗g2 ♗f6 6.♗bd2 ♗e7 7.O-O O-O and we are back to a position with thousands of games being played.]

5.♗g2 g6 Black wants to get an even nicer version by putting the bishop on g7 and later playing d5.

6.h4!? A very interesting idea by White to try and gain a tempo by provoking the h6 move.

6...h6 [6...h5 would abandon the g5 square. 7.♗g5 ♗g7 8.c3 And White might be a bit better.]

7.O-O ♗g7 8.c3 To "kill" the g7 bishop is usually a good idea.

8...O-O 9.♖e1 White's idea is to play e5 next. [After 9.♗e3 9...b6 10.♔d2 we can see that the h6 pawn is under attack, giving White a development tempo. 10...♔h7 11.d4 ♗a6 It seems like Black also has good play here.; 9.d4 would lead to another unclear position: 9...cxd4 10.cxd4 d5 11.e5 Black quickly opens the f-line. 11...f6! With very unclear play.]

9...e5 is directed against White's e5 and d4 moves. [Another option was to play 9...d5 10.e5 b5 With an unclear game. Now White's plan would probably be Nbd2-Nf1-Nh2-Ng4 and Black would rush on the queenside.]

10.♗e3 b6 11.♔d2 And now we see why the h6 pawn is useful for White: he could play Qd2 with a tempo.

11...♔h7 12.d4 There is no time to waste! [After a slow move like 12.♗a3 12...d5! only Black could probably be better here.]

12...exd4! A good move. Black activates his bishop from g7.

13.cxd4 d5 That is the idea. White's center is starting to get shaky.

14.e5 [14.exd5 was not better as after 14...♘xd5 15.♘e5 ♕b7 White can be in trouble.]

14...♕g4 Black continues putting pressure on the d4 square.

15.♘a3! A good move. White wants to play Nc2 or Nb5 next to gain control over the d4 square.

15...♕xf3 And Black is going for the forced continuation. [Another idea could have been 15...♘f5 16.dxc5 Now Black has a lot of complicated options but the most simple one is 16...♘xe3 17.♖xe3 bxc5 18.♖xc5 ♖c8! Black's initiative should give him some plus here.]

16.♕xf3 ♘f5 17.dxc5 White's moves are forced.

17...♘xe5 [17...d4? is of course very bad because of 18.♕f4+—]

18.♕g2?! Maze shows too much respect for his stronger opponent. [White was just in time for 18.♖xd5 18...♖f6 and now the very difficult to find 19.♘c4! probably saves the game for White. The position should be close to equal.]

18...♘g4! Excellent play by Navara! The black knights are basically crushing White's position.

19.♘c2 There is no other way for White to go on.

19...♕xb2 Cool and strong.

20.♖ad1 ♖f6 Another move with tempo. Black's threat is Bc3

now.

21.♖e2 It is easy to see that White is in big trouble but the game is still not over and Black needs to continue playing accurately to keep the advantage.

21...♘gxe3 22.♘xe3 ♘xe3 23.♖xe3 ♕c3 [23...♖ae8 would lead to a similar position as in the game: 24.♖xe8 ♖xe8 25.♖xe8 ♕d4]

24.♖e2 ♖ae8? A very logical looking move, but probably the final mistake. After this the game is a draw. [Black would keep winning chances after 24...d4 25.♖d3 ♖ae8 and the game would be either a draw or a win for Black.]

25.♖xe8! An excellent decision by White. At first sight the position looks lost, but in fact it is very close to a draw.

25...♖xe8 26.♖xe8 ♕d4 This is what Navara was hoping for, but White had another strong move up his sleeve...

27.♖xd4! This is the only move that saves the game. [27.♖f1 would lose immediately after 27...bxc5 28.♕xd5 ♖d6! followed by Qg3.]

27...♖xd4 28.c6 If there was no white c-pawn the game would immediately be over, but there is this "beast" and Black objectively doesn't have anything better than a draw.

28...♖d1+ Navara plays the best move but it is already not

enough.

29. ♖h2 ♜c2 30. ♙xd5 Protecting the c6 pawn.

30... ♜xf2+ 31. ♙g2 White still wants to play c7.

31... ♜c5 32. ♖d8! A good plan and the most simple! Black has no defence against White's draw idea.

32... ♖g7 33. ♖d7 b5 The b-pawn is running...

34. c7 b4 35. ♙b7! White is forcing a draw.

35... ♜c2+

36. ♖h1 [36. ♖h3 36... ♜f5+ 37. ♖g2 would also lead to a draw after 37... ♜c2+]

36... ♜b1+ 37. ♖h2 ♜xa2+ 38. ♖h1 ♜b1+ 39. ♖h2 ♜c2+ 40. ♖h1 ♜c1+ 41. ♖h2 ♜c2+ And Black doesn't have anything better than to give a perpetual check. A lucky survival for White, but we learned a very useful queen sacrifice idea. **1/2-1/2**

Endgame section

(15) Galego, Luis(2465)
- Vitiugov, Nikita(2737)

Gibraltar Masters 2014(2.4),
2014.01.29

GM Arkadij Naiditsch
Best rating: 2737

At first sight the position looks like a draw although the advantage is clearly on Black's side. White has a clearly worse pawn structure, but there are not that many pawns left on the board and the white knight could also become quite unpleasant for Black by attacking the c5 pawn.

44...e5! A very strong move. If White was in time to play Ke4-Nf3 and just Ne5 next, the game would quickly end in a draw.

45.fxe5 [45.♖e4 would lead to a similar position as in the game: 45...exf4 46.♗e2 f3 47.♖xf3 ♔d6 48.♖e4 ♗b2 Black is bringing his bishop over a3-b4 and then to d2.]

45...♗xe5 46.♖e4 ♔d6 Quite accurately played. [46...♖e6 would make it easier for White to defend as after 47.♗e2 Black cannot move the bishop away from e5 because of Nf4+.]

47.♗e2

47...♗b2! Black is using all his chances! The black bishop is going to d2 over a3-b4, putting big pressure on the g5 pawn.

48.♖f4 White doesn't have anything better than to keep on waiting.

48...♗a3 49.♖e4 ♗b4 Now Black already wants to play Bd2 so White needs to do something urgently. The knight on e2 is useless now.

50.♗g1! A good move. White needs to protect the g5 pawn with a knight and keep his king on e4 to prevent the black king to cross the 6th rank as if he would get to e5 the game would be over.

50...♗c3! Another very tricky move by Black. [The direct 50...♗d2 51.♗f3 ♗c1 would lead to nothing because of 52.♗e5! White is using a tempo of attacking the f7 pawn to get his knight to d3. 52...♖e6 53.♗d3 With a very unclear position.]

51.♗f3? And this natural move maybe already costs White the game. [The best way to go on was 51.♗h3! 51...♗d2 52.♖d3 ♗c1 and from a human point of view the position looks really bad, but by tactical motives maybe White can survive. 53.♗f2! is White's only hope. (53.♖e4 53...♖e6 54.♗f4+ ♗xf4 55.♖xf4 ♖f6 and Black has a totally winning pawn endgame.) 53...♖e5

54. ♖e4 ♜a3 55. ♔e3 With some drawing chances even though Black also has good winning chances.]

51... ♜b2! White is in zugzwang and can't keep the king on e4 anymore.

52. ♔f4 [52. ♖e1 52... ♜c1 53. ♖f3 ♔e6 The white king needs to move away from e4 which gives Black an easy win by playing Kf5 and Bxg5.]

52... ♜c1+ 53. ♔g4 White has nothing else left than to put his king to g4.

53... ♜e3 54. ♔h4 ♔e6 55. ♔g4 a5! A good move. White is in zugzwang once again.

56. ♖e1 [56. ♔h4 didn't help either. 56... ♔f5]

56... ♔e5 The black king has passed the 6th rank, the game is over.

57. ♖c2

57... ♜c1! Black shows great technique until the end, not even allowing the white knight to move to a3.

58. ♖e1 ♔e4 59. ♖f3 ♜e3 There is no hurry...

60. ♖e1 ♜d2 61. ♖f3 ♜c3 All black pieces are perfectly placed.

62. ♖g1 ♔d3 And the black king is collecting all the white pawns on the queenside. Vituigov showed great technique and we can easily say that from the beginning the endgame was far away from being a draw! **0-1**

(16) Harikrishna, Pentala(2706)
- Edouard, Romain(2658)

Gibraltar Open, 2014.01.31

GM Csaba Balogh
Best rating: 2672

We are facing an important theoretical endgame and knowing it might help us save some of our games...

64...♖xh4! The a-pawn does not fit the promotion square of the bishop, but things are still far from obvious since the b7 pawn blocks the king's route to a8!

65.♖xh4 ♕d7 66.♖xh5

[Another try is 66.♗d4 66...♖c7 67.♖xh5 (If White tries to cut the way to b8-a8 with 67.♗e5+ 67...♖c6 the bishop is forced to retreat because of the b6 threat. 68.♗d4 (68.♖xh5 68...b6 69.a6 b5= holds easily.) 68...♖c7=) 67...♖b8 68.♖g6 ♖a8 69.♖f7 ♖b8 70.♖e7 ♖a8 71.♖d7 ♖b8 72.♗c5

Without the b7 pawn there would be nothing left to comment, but here White could hope for some kind of zugzwang, which forces the b-pawn to move and it allows axb6, converting it into a b-pawn.

However Black is saved by the help of the stalemate! 72...♖a8 73.♖c7 b6! 74.axb6= (74.♖xb6 is the only move to avoid stalemate, but then White cannot win the the a-pawn. 74...♖b8=)]

66...b6! A very important theoretical motif to remember!

67.axb6 [67.♗xb6 67...♖c8 68.a6 ♖b8= is an obvious draw.]

67...♖c6! This is the point! The bishop is stuck on a7 now.

68.♖g5 ♖b7 From now on Black only plays Ka8-b7 and White cannot win the game.

69.♔f5 ♚a8 70.♔e5 ♚b7 71.♔d5 ♚a8 The bishop has no chance to leave the a7 square while the king alone cannot support the b-pawn because of the stalemate.

72.♔c6 [72.♔c5 72...♔b7 73.♔b5 ♚a8 There is nothing left to do for White against the stalemate and unfortunately for him after giving up the bishop, Black takes the opposition with his king... 74.♚b8!? ♔xb8 75.♔a6 ♚a8! 76.b7+ ♔b8 77.♔b6=] **1/2-1/2**

(17) Theoretical endgame

GM Csaba Balogh
Best rating: 2672

We would like to show you another slightly strange theoretical endgame, where despite his huge material advantage White

is unable to convert it. It does not matter from where the knight protects the pawn (b5, c6 or c8) Black simply waits with Ka8-b7 and holds the draw.

1.♔d3 It is clear that White has no chance to win without the king...

1...♔a8 2.♔c4 ♚b7 3.♔c5 ♚a8 Here is the problem. In order to promote the pawn the king should replace the knight in the protection of the a7 pawn, but this always leads to stalemate... White cannot make progress.

4.♔b6 1/2-1/2

Clash of the Titans

1.d4 d5 2.c4 ♘f6?! 3.cxd5 ♘xd5 4.e4 ♘f6 5.♙d3 [5.♘c3+]=]

5...e5! Black is fighting for the center. [5...♙xd4?? 6.♙b5+]

6.dxe5 ♘g4 7.♘f3 [7.f4? weakens the g1-b8 diagonal. 7...♙c5 8.♘h3 ♙h4+; 7.♙b5+ 7...c6 8.♙xd8+ ♙xd8 9.♙e2 ♘xe5 10.♙e3 White keeps a small plus as there are still many pieces left on the board. The main idea should be to push f4, for example : h3-Nd2-h3-f4-Ngf3-Kf2 etc.]

7...♘c6 8.♙g5 [8.O-O 8...♘gx5 9.♘xe5 ♘xe5 10.♙e2 With the idea to play over f4.; 8.♙f4? 8...♘b4+]

8...♙e7 9.♙xe7 ♙xe7 10.♘c3 ♘cx5 11.♘xe5 ♙xe5 [11...♘xe5 12.♙e2 White can also try to keep the bishop. (12.f4 12...♘xd3+ 13.♙xd3 O-O 14.O-O f5 looks logical to win the

light squares and not let White play f5 to limit the c8 bishop. (14...♙e6 15.f5 ♙c5+ 16.♙f2 ♙c4 17.♙g3 f6 Black is also fine here.) 15.♙ae1 ♙f7=) 12...O-O 13.O-O Now White's only plan is to push the f- and e-pawns to create some pressure on the kingside. 13...♙e6 (13...c6 14.f4 ♙d8 15.♙e1 ♘d3

16.♙g3 is interesting. 16...♘xb2 17.f5 f6 (17...h6 18.e5 (18.f6 18...♙c5+ 19.♙h1 ♙g5) 18...♙g5 19.♙f3 White has a huge initiative.) 18.♙ab1 ♘d3 19.♙xd3 ♙c5+ 20.♙h1 ♙xc3 21.♙fd1 Black has problems with the king which is weak and with the development on the queenside as well, so the position is very dangerous for him.) 14.♙d4 (14.f4 14...♙ad8 15.♙e1 ♘d3 16.♙xd3 ♙xd3 17.f5 ♙c4 18.f6 gxf6 White doesn't have any attack here.) 14...♘c6 15.♙e3 ♙ad8 16.f4 (16.♙ad1) 16...♘d4 17.♙d3 c5 Black doesn't have any problems. 18.f5? ♙xf5]

12.h3 ♘f6

13.♙d2+= White is slowly preparing the f4-e5 plan.

13...♙d7 [13...♙e6 14.♚e3 O-O 15.f4 (15.O-O-O 15...♚a5 16.♙b1 b5! Black gets counterplay in time: 17.♙xb5 ♙xa2+∞) 15...♚a5 16.O-O ♜fe8 17.♞ad1 And White will try to push e5-f5 at the right moment.]

14.♚e3 ♙c6 [14...g5 Temporarily preventing f4 but this move weakens the position too much as now O-O-O is not possible because of the a7 pawn. 15.O-O-O+= With idea to play h4 or g3-f4.]

15.O-O-O O-O

16.f4↑ White starts to push the pawns and gets the initiative.

16...♚e6 The disadvantage of this move is that the queen will be attacked with tempo after f5. Black also had other squares for the queen. [16...♚a5 The idea behind putting the queen here is to get counterplay against the white king but now comes 17.e5 ♘d5 (17...♘d7) 18.♘xd5 ♙xd5 19.♙xh7+! ♙h8 20.♙c2 ♚xa2 21.♚d3+-; 16...♚e7 17.e5 ♞ad8 18.♞he1 ♞fe8 (18...♘d5 19.♘xd5 ♙xd5

20.♙xh7+! And here comes the same tactical motif again! Maybe that is why Black played 16...♚e6. 20...♙xh7 21.♞xd5 ♞xd5 22.♚e4+-) 19.♙c4 to take control of d5 square 19...♚b4 20.♙b3! White has a clear advantage as he has more space and is putting the pressure.]

17.e5 ♞fe8 18.♞he1 ♞ad8

19.f5! Alekhine plays simple but strong chess! He is following the main plan all the time and doesn't care about material as he could have won the pawn after [19.♚xa7 19...♘d5 20.♙c4 (20.♘xd5 20...♙xd5) 20...b6 21.♚a3+= Compared to the game, here Black has at least avoided the unpleasant attack after f5.]

19...♔e7

20. ♔g5! [20. ♔xa7? 20... ♞d5↔]

20...♘d5? The decisive mistake. Black could still fight after [20...♔f8 Not an easy move to find. 21.♔h4! (But not 21.exf6 21...♖xe1 22.♗xe1 ♜xd3⇒ and it is not easy to improve the attack because it is not so easy to activate the knight. 23.♗e7 h6 24.♔h4 ♜d6 25.fxg7 ♔xg7 26.♗xc7 ♔xg2↑) 21...♘d5 22.f6 g6 23.♙c4 (23.♘e4? 23...h6⇒) 23...♘xc3 24.♗xd8 ♜xd8

25. ♗xf7+! ♔xf7 26.e6 ♘xa2+ (26...♖d1+ 27.♕c2!+–) 27.♔b1
♖d1+ 28.♖xd1 ♗xe6

29.♔a1!± A nice prophylactical move! Now the idea with Nc3 and a perpetual check on b3-a3 doesn't work, so White is almost winning thanks to the weak black king.; 20...♞d7 21.f6 ♚f8 22.♙f5 h6 (22...g6 23.e6 crushing 23...fxe6 24.♙xe6+ ♔h8 25.f7+-) 23.♚h4 g5 24.♚h5 Black has no moves at all. 24...♖xe5 25.♖xe5 ♞xe5 26.♖xd8 ♚xd8 27.♚xh6 ♚f8 28.♚h7#] **21.f6 ♚f8 22.♙c4!** Now White is winning by force.

22...♘xc3 23.♖xd8 ♖xd8 24.fxg7 ♘xa2+

25.♔b1! A very important move which might have been missed by Marshall... Much worse was [25.♚xa2 25...♔c5+ 26.♔b1 ♖d7!↗(26...♗e8 27.♚xf7+ ♔xf7 28.e6+-)]

25...♔e8 26.e6+— With a crushing attack.

26...♙e4+ 27.♔a1 [27.♖xe4 27...♖d1+ 28.♔c2 ♜a4+ 29.b3+-]

27...f5 28.e7+ ♖d5 29.♔f6 ♔f7 30.e8=♚+ 1-0

Editorial Preface

After a very turbulent week of chess, this time things look much more calm.

In the German Bundesliga the team of Baden-Baden are on their way to what would already be an 8th consecutive title.

Another very nice open, the Bronstein Memorial, is taking place in Minsk and Jobava is the top seed.

That's all from the big events for this week, but we can already be very excited about the upcoming events in March: The Candidates tournament to determine who will challenge Magnus Carlsen, the European Individual Championship in Armenia, Capelle la Grande, Cannes open and the open tournament in Reykjavik.

As usual we wish you a lot of chess joy with the current issue!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Areshchenko, Alexander(2714)**
- **Rustemov, Alexander(2538)**

Schachbundesliga 2013/2014(8.2),
2014.02.09

GM Arkadij Naiditsch
Best rating: 2737

We will see a game where Black was too greedy and found himself under a heavy attack. What is nice about the current game is that White was not forcing a direct tactical win, but attacked "positionally" until Black's position practically fell apart.

1.e4 e6 2.d4 d5 3.e5 Areschenko decides to go for a complicated game. [After 3.Nd2 or 3.Nc3 Rustemov is always taking on e4. 3.♘c3 3...dxe4 4.♗xe4 ♕d7 And Rustemov probably played this position over 10.000 times. He has a lot of games in normal chess, but what he especially likes is to play it against computers. On his different ICC accounts he probably has over 100.000 games played against the machines!]

3...c5 4.c3 ♖b6 [It is more usual for Black to start with 4...Nc6 here, but Black has another idea: 4...♘c6]

5.♗f3 ♕d7 This is quite a rare move. Of course Black's idea is to exchange the bishop on b5, but it takes quite some time.

6.♕d3 White has a lot of different options here but 6.Bd3 seems to be the main one. Areschenko played in his previous game again L'ami here: [6.a3 6...♕b5 7.♕xb5+ ♖xb5 8.dxc5 ♕xc5 9.b4 ♕b6 10.a4 ♖d7 and Win won after an unclear game.]

6...cxd4 Black tries to first exchange the c-pawn before playing Bb5. [After the immediate 6...♕b5 7.♕xb5+ ♖xb5 White has the important 8.a4! ♖a6 9.♗a3 followed by Nb5 and 0-0, after which he should have a clear advantage.]

7.♗xd4! This is still theory, but a nice move anyway. The idea is simply not to let Black play Bb5.

7...♕c5 Black is choosing a very risky line and going for the d4 pawn.

8.O-O ♕xd4 9.cxd4 ♖xd4 This is still a theoretical position. White is a pawn down, but a clearly better development, the bishop pair and a chance to dominate on the dark squares are worth it!

10.♗c3 Nb5 is a threat now.

10...a6 This is also a standard move in this position, avoiding the main threat of Nb5.

11. ♖e1 ♘c6

12. ♘e2! A strong move which has been played lately in the game Grischuk-Morozevich from the World Cup tiebreak.

12... ♖xe5? This move is too risky and Black almost immediately ends up in a lost position. [12... ♖g4 13. h3 ♖h5 14. ♘f4 ♘b5 15. ♖b3 ♘e7 16. ♘xb5+ axb5 17. ♖xb5+ ♘bc6 18. ♖xb7 O-O 19. ♖b3 happened in the game Grischuk-Morozevich with a better position for White, but things are far from clear.]

13. ♘g3! Simple and ong. White is almost fully developed and starts his initiative by attacking the pawns on the kingside.

13... ♖c7 14. ♖g4! Weakening the dark squares even further.

14... g6 [14... ♖f8 was not any better. 15. ♘h5 Black cannot defend the g7 pawn in an appropriate way. 15... g6 16. ♖d4 e5 This attempt to win a piece leads to a deadly attack for White: 17. ♖xe5 gxh5 18. ♖b4+ ♖g7 19. ♖g5+ ♖f6 20. ♘f4 With an easily winning position.]

15. ♖d4 Winning a pawn back.

15... f6 Black already doesn't have anything better.

16. ♖xe6+ ♖f7

17. ♘f4! White develops the last piece with tempo.

17... ♖c8 18. ♖e3 [18. ♖d6 also looks very strong. 18... ♘d7 19. ♖e1 With a winning attack.]

18... a5 Pretty strange play by Black, who doesn't seem to be in a hurry to finish his development. [18... ♖d7 was needed. 19. ♖ae1 ♘b5 With the idea of playing Nc6 next. White's position is of course close to winning, but Black is fighting.]

19. ♖ae1 ♖d7 White has a lot of very nice moves here and it is clear that the position should even somehow be tactically winning, but Areschenko finds a very elegant way of not giving his opponent the slightest chance.

20. h4! A great move. White does not hurry to force things and enjoys his position by creating an extra weakness on the g6 square.

20... ♘a6 21. h5 The g6 pawn is under attack. It is difficult to say anything else about Black's position than it just being ugly!

21... ♘c7 And finally Areschenko decides that it is time to finish the game:

22. ♖xc7 ♜xc7 23. ♞g4 Black has no way to defend the g6 pawn. To play g5 is of course not a solution because of Nf5.

23... ♖f8 24. hxc6 hxc6 25. ♕xg6 The material is equal, but White's attack is deadly...

25... ♖d8 26. ♞d4 Areschenko continues keeping the black pieces very passively.

26... ♖h6 Other moves are not much better.

27. ♞c5+! This is the most direct way to put an end to Black's suffering...

27... ♞d6 [27... ♞g7 is of course losing: 28. ♖e7+ ♞xe7 29. ♖xe7+ ♞xe7 30. ♞xe7+ ♞xg6 31. ♞xd8]

28. ♖e8+ ♕xe8 29. ♖xe8+ And the game is over because of 29... Kg7 30. Nf5. A very easy win for White which clearly shows that being under-developed is very risky, even when you're a pawn up. **1-0**

**(2) Nielsen, Peter Heine(2649)
- Von Herman, Ulf(2391)**

Schachbundesliga 2013/2014(8.5),
2014.02.09

GM Arkadij Naiditsch
Best rating: 2737

And now something for the chess joy! We will see a game where Black was totally dominated and what is more, the white king and bishop are completely taking the black queen out of the game. It is one of the games with the biggest domination with equal material that I have ever seen!

1.c4 c5 2.♘f3 ♘f6 Nielsen is a professional coach, but still he is theoretically very strong in a practical game. Peter Heine has been working for Anand for many years and just before the WCC 2012 he was bought by Carlsen. Not the nicest thing to do from the ethical point of view, but does ethic exist on the very high level?!

3.♘c3 ♘c6 4.g3 d6 A bit too passive. Now White is already reaching some opening advantage. [4...d5 and; 4...g6 are the main moves here.]

5.d4 White is taking control of the center.

5...cxd4 6.♘xd4 ♙d7 7.♙g2

7...♚c8? This is already a serious mistake. The idea of Qc8 is logical and not unusual, but at this particular moment Black is not in time. [7...g6 8.O-O ♙g7 We would be back in another line which usually appears after a different move order here.]

8.♘d5! And Nielsen immediately punishes Black for his mistake. Black is not in time for Bh3 now and he cannot develop the pieces in a normal way.

8...♘xd5?! Another unlucky move by Black. [After 8...♘e5 9.♙g5 followed by Rc1 White would get a very strong attack.; It might have been a solution for Black to play 8...♘xd4 9.♚xd4 ♙c6 with a clearly worse position, but things are still not that terrible as in the game...]

9.cxd5 We can already see that Black is under pressure and it will not be an easy task for the f8 bishop to get into the game.

9...♘xd4 [9...♘e5 10.♙d2 followed by Rc1 gives White a big advantage.]

10.♚xd4 ♙h3 Black continues what he started, but now the exchange of the bishops doesn't bring him anything...

11.♙xh3 ♚xh3 12.♙e3 A very logical move. Nielsen is taking control of the c-file. Black's position is already very hard to play.

12...f6? A really horrible move to play! It doesn't matter

what you do, but to play a move like 12...f6? just cannot be a solution. Now the bishop on f8 is really dead and the e6 square is weak. Another very unpleasant thing for Black is that White has a clear plan, which is to enter Black's position over the c-file. However it is very unclear what Black's plan is... [12...♔d7 13.♖c1 e5 14.dxe6 fxe6 15.O-O gives White an almost winning advantage, but here Black would keep theoretical chances to escape in a draw.]

13.♖c1 The c-file is under control.

13...h5 [Black cannot even win the h-pawn because of 13...♔g2 14.♔d2 and the rook on h1 is protected.]

14.♔d2 The white king will feel very comfortable on d2.

14...♔f7 15.♖c7 It is time to take some pawns on the queenside...

15...♔g2 16.♖hc1 h4 Black still can't win the h2 pawn. [16...♔xh2 17.♔e4 followed by Rh1 traps the black queen.]

17.g4! Of course White doesn't let Black play hxg3 and open the h-file.

17...♔g8 18.f3 Totally excluding the black queen from the game...

18...♖h7 19.♔e4 What a domination!

19...g5 20.♔g1 A nice move, not giving Black any chance at all! [Of course White could also win after 20.♖xb7 20...♔xh2 21.♖xa7 ♖xa7 22.♔xa7 And if Black plays 22...♔g2 with the idea of playing h3-h2 next, then White always has 23.♖g1 followed by a4-a5, with totally winning position.]

20...b6 21.♔f5 White continues to squeeze Black...

21...♖f7 22.♔d3 Nielsen starts a nice plan by taking the black queen even more out of the game.

22...♔h8 23.♖7c2! A very nice idea.

23...♔g7 24.e4 The queen on g2 is under attack so it needs to choose between 2 "nice squares", h3 or h1.

24...♔h3

25.♔e3! The white king is going to f2, after which the black queen won't be able to move at all anymore...

25...♖e8 26.♔f2 The black queen is trapped. White now basically has a queen against a bishop...

26...♔g8 27.♖c7 a5 28.a4 Very well played. White does not hurry and there was no need for it indeed...

28...♖b8 29.♔e6 ♔f8 [29...f5 doesn't work since after 30.♖xe7 ♔d4+ 31.♔e1 White is totally winning.]

30.♖c8 Exchanging the last active black piece.

30...♖xc8 31.♖xc8 ♔g7 32.♖b8 White is simply going for the b6 pawn. Black is totally paralyzed, what a position!!!

32...f5 33.exf5 ♖f6

34. ♔e4 WOW! I would not like to be Von Herman here... The only black piece that is not placed on a dark square is the queen on h3! :) **1-0**

(3) Giri, Anish(2749) - Belezky, Alexander(2455)

German league(8.1),
2014.02.09

GM Csaba Balogh
Best rating: 2672

Anish Giri realized the big difference in strength in a very nice game.

1.d4 ♘f6 2.c4 e6 3. ♘c3 ♙b4 4. ♔c2 Black tries to avoid a theoretical battle in the 4.Qc2 Nimzowitsch by choosing a sideline...

4... ♘c6 5. ♘f3 d6

6. ♙d2 This is considered to be the best move according to theory. The entire idea of the 4.Qc2 Nimzo is to gain the pair of bishops with a3 without damaging the pawn structure. White even improves the circumstances now, he wants to recapture with the bishop to keep the control over the important e4 square.

6...O-O 7.a3 Obviously the bishop cannot be saved with Ba5 because b4 followed by c5 simply traps it.

7... ♙xc3 8. ♙xc3 ♔e7 Black fights for the center with e5.

9.e4 [9.e3 9...e5 10.d5 ♖b8 11.♘d2 followed by Bd3 is a more common continuation.]

9...e5 10.d5 Black has managed to close the center and the two bishops only a long term efficiency. However White also enjoys some space advantage.

10...♘b8

[10...♘d4!? could be the only difference as to why White usually plays 9.e3. However Giri has probably prepared the following answer. 11.♙xd4 is less convincing. (11.♘xd4! 11...exd4 12.♙xd4 ♘xe4 13.O-O-O! White needs to play the most direct moves to fight for an edge. Bd3, Rhe1 are coming quickly. (13.♙e2 13...♙f5 would be fine for Black.) 13...♘c5 trying to avoid Bd3, but... 14.b4! (14.♙e2 14...♙d7 would be fine for Black again.) 14...♘d7 15.♙d3+= White is better with the two active bishops.) 11...exd4 12.♙d3 Black equalizes with 12...♙f5! 13.O-O ♙xe4 14.♙fe1 ♙xd3 15.♙xd3 ♙d7 16.♙xd4 a6= followed by trading the rooks on the e-file.]

11.♙e2 ♘h5 Black aims for the standard counterplay with this particular pawn structure. He has Nf4 and f5 ideas in mind.

12.♘xe5! Actually White does not win a pawn with this small tactical trick, but he opens the position for his bishops.

12...♙f6 [Black could also get the g2 pawn back, but the opening of the g-file is not promising anything good for him... 12...♘f4 13.♘f3 ♘xg2+ 14.♙d2! The king is actually quite safe on d2. Black is unable to open the position and White can also execute an artificial castling with Rag1 and Kc1 whenever he feels some danger... 14...♘f4 15.♙hg1 Black is forced to create a big weakening around his king with f6 or g6. Neither of them can lead to anything good...]

13.♘f3 ♘xe4 14.O-O! Another small tactical trick with which White finishes the development. [Unfortunately he could not save his bishop with 14.♙d4 14...♙f5 developing with tempo and threatening to play Ng3. 15.♙d1 c5! 16.dxc6 ♘xc6 Black develops another piece with tempo. It is a sign that things are going into a bad direction, but a concrete line also justifies it: 17.♙e3 ♙fe8 and White must leave his king in the center. 18.O-O ♘xf2! wins a pawn.]

14...♘xc3 [14...♙f5? makes no sense now, as the king has already left the pin. 15.♙d3±]

15. ♖xc3! An important detail, so White can keep his healthy pawn formation. The bishop pair is gone, but White still has the space advantage, his pieces are better developed and he is going to gain another tempo with Re1. White has realistic chances for an advantage.

15... ♘d7 [15... ♖xe2? 16. ♖fe1+- traps the queen.]

16. ♘d4

16... ♘f6?! Black fails to find the right arrangement for his pieces. [The f6 square belongs to the queen from where it has influence on all directions of the board. 16... ♖f6! 17. ♖ae1 (Black never needs to worry about 17. ♘b5 17... ♖xc3 18. bxc3? The c7 pawn cannot be saved, but it is actually poisoned: 18... a6! 19. ♘xc7 ♖a7 and b6 next traps the knight.) 17... ♘b6 18. ♘d1 ♘d7 Followed by Rae8 and aiming for exchanges. Black has good chances to hold.]

17. ♖fe1 ♘d7? Another mistake, which might be called decisive. [17... ♖e8 was the right move and only after that Bd7 to connect the rooks. 18. ♘d3 ♖f8 19. ♖xe8 ♖xe8 20. ♖e1 ♖f8+= With Bd7 and Re8 next, but White should be better after provoking the b6 weakening with Qb3.]

18. ♘f3 ♖d8

19. ♘e6!! A very nice motif! White changes the character of the position in his favor. Black is forced to accept the sacrifice, but then he must immediately give back the material...

19... fxe6 20. dxe6 The bishop cannot be saved because of the e7 threat.

20... ♘xe6 21. ♖xe6 Here we can summarize the benefits of the 19. Ne6 move. It is easy to see the difference between the quality of the pieces. The bishop dominates the knight, while the white heavy pieces are standing actively and the black ones are doomed to passivity.

21... ♖b8 Black had no better way to protect the b7 pawn, because c6 would have fatally weakened the d6 pawn. Rd1 could have come immediately. **22. ♖ae1**

22... ♖f7 [An important detail is that Black could not ease his

position with the following simplification because of another tactical idea: 22...♖e8 23.♖xe8+ ♘xe8 24.♚a5! Simply attacking a7 and after 24...a6 25.♙xb7!+- with the idea of Qd5! White won a pawn.]

23.h4! Giri improves his position by advancing his h-pawn. White wants to push h5-h6 to decisively weaken his opponent's king and if Black plays h6 himself, the light squared bishop starts to work even more efficiently.

23...♙h8 24.h5 h6 This is still better than allowing h6.

25.♙d1! White immediately changes the diagonal of the bishop! The black king is in trouble and there is no piece to neutralize the bishop.

25...♘g8 Black tries to find counterplay by jumping out with his queen. [25...♚d7 26.♙c2 ♖e8 (26...♘h5? always loses to 27.♖xh6+) 27.♙f5+- Black cannot ease the pressure.; 25...d5 does not help either. White can keep all the advantages of his position by playing 26.c5 d4 27.♚d3 and Bc2 next. Black is paralyzed because the only active move 27...♚d5 is met by 28.♖1e5± and the queen must retreat...]

26.♙c2 ♚h4 27.g3 ♚g4 [27...♚h5? obviously doesn't work because of 28.♙g6+-]

28.♚d3 ♘f6 With the idea to control the h7 square along the 7th rank in case of Rxf6. However White improves his position

by using another tactical idea.

29.♖e8+! ♖f8 The only move, otherwise Black gets mated in a few moves.

30.♖8e7! The rook starts to penetrate on the 7th rank and the other rook is coming to e6 and is ready to be sacrificed on f6.

30...♖bc8 [30...♚xh5 loses to 31.♖1e6! ♖f7

32.♖e8+! ♖f8 (32...♖xe8 33.♖xe8+ ♘xe8 34.♚h7#)
33.♖xf6!+- And mate is coming soon.]

31.♖1e6 ♘g8 A last desperate attempt to run out from the danger zone.

32.♙g2!? A calm reaction. White wants to send away the queen with f3. Black has no move anyway since Qxh5 is met by Rxf6 Rxf6 Qh7 and the g7 pawn is not protected

anymore. [32.♖xf6? directly does not bring anything:
32...♖xf6 33.♔h7+ ♕f8; 32.♙d1 was also winning: 32...♔g5
33.f4 ♖c5+ 34.♔g2+- and Qg6 next mates soon.]

32...♖f7

33.♖xf6! Giri finds the most elegant way to collect the full point!

33...♖xf6 [33...gxf6 is refuted by 34.♔d5! ♖f8 35.♙g6+-]

34.f3! Sending away the well placed queen and we will get the idea soon...

34...♔g5 The only square to defend the g7 pawn. [34...♔xh5 35.♔h7+ ♕f8 36.♔xg7#]

35.♔h7+ ♕f8 36.♖d7! This is the point of f3! White has time for this silent move as Qf3 is not threatening anymore and also the queen does not cover the d7 square anymore. Black has no defence against Qh8 mate, while he only has one check on d2...

36...♕e8 37.♖xg7 ♖d2+ 38.♔h3 A great game! It was instructive to follow how Giri converted his advantage after 19.Ne6! **1-0**

(4) Ivanchuk, Vassily(2739) - Vachier-Lagrave, Maxime(2745)

Caleta ENG(10.1),
2014.02.06

GM Csaba Balogh
Best rating: 2672

We are in the last round of the Gibraltar Open. Ivanchuk was half a point ahead of the field, therefore he was not against making a draw. Despite having the black pieces, Vachier succeeded to create fire on the board.

1.♘f3 ♘f6 2.c4 Ivanchuk wants to play one of the Anti-Gruenfeld lines against Vachier's favorite opening.

2...c5 3.g3 g6 4.♗g2 ♗g7 5.O-O O-O The Symmetrical English is on the board, which usually leads to a calm game with a small edge for White due to his extra tempo.

6.d4 cxd4 7.♘xd4 ♘c6 [The strong alternative is 7...d5 which is considered to give full equality. However it had the serious drawback in the current tournament situation that if White wants he can force a draw with 8.cxd5 ♘xd5 9.♘b5 ♗e6 10.♘d4 ♗c8 11.♘b5 Black cannot avoid the repetition!]

8.♘c3

8...♔a5!? A new direction, which enjoys big popularity even on the highest level since last year, thanks to Grischuk's

efforts. Black creates the direct threat of Qc5 with a double attack. Therefore White has two main choices, 9.Nb3 and 9.Nc2, but in both cases Black switches the queen to h5 with the idea of quickly trading the strong g2 bishop with d6 and Bh3. [8...♘xd4 9.♔xd4 d6 and; 8...♘g4 were the two main lines before.]

9.♘b3 ♔h5 It is unclear at the moment how White should react here. White tried 10.c5, 10.e4 and 10.Nd5, but Black seems to get decent counterplay everywhere. Ivanchuk tries another plan!

10.h3!? White fights against the d6-Bh3 idea in the most direct way and also tries to point out the misplacement of the black queen...

10...d6 11.g4

11...♗xg4! Ivanchuk has provoked this tempting sacrifice. The game gets extremely sharp now... [11...♔h4 is too slow. It would have strongly been met by 12.♗f4! and Black has no time to make use of the h3-g4 weakening because of the misplacement of his queen. The consequent 12...h5? drops a piece after 13.♗g3! ♔g5 14.f4 ♔h6 15.g5+—]

12.hxg4 ♗xg4 13.♗f4! The only move. [13.♔e1 leads to a crushing attack after 13...♗xc3! 14.bxc3 ♔h2+ 15.♔f1 ♔h4! Black had taken the knight two moves ago to avoid Ne4.

16.♙e3 ♘xe3+ 17.fxe3 ♘e5± White has no good defence against the threatening Ng4 and f5-f4 ideas. Even materially Black is doing fine, but the attack is more important.]

13...♙e5! Eliminating the defender of the h2 square! Black also needs to attack precisely, otherwise White quickly pushes back the pieces with f3 for example and ends up with an extra piece.

14.♖d2 Trying to bring another piece to the protection of the h2 square, but with his next move Black manages to clarify things in his favor.

14...g5! White cannot keep the f4 square anymore so the only way to avoid getting mated is to free the f1 square for the king.

15.♙xe5 ♘cxe5 16.♖fc1! As we will see, it is very important to keep the d1 square free for the knight in order to be able to defend the f2 square!

[16.♖fd1 is met by 16...♘xc4 17.♖d4 ♖h2+! 18.♙f1 ♖h4! Here we can see that White cannot protect the f2 square with Nd1. The game is over now. Two spectacular finishes could be 19.♙g1 (19.♘e4 is refuted by 19...♘ce3+! 20.fxe3 f5!—+ Mate is coming soon.) 19...e5! 20.♖xc4 ♖xf2+ 21.♙h1 ♖h4+ 22.♙g1 ♖h2+ 23.♙f1 ♘e3+—+ wins the queen.]

16...f5!? Actually only this is the novelty of the game, but it is quite a scary one as Black intends to attack with f4, Nce5 and f3! The white pieces are all directed to the queenside and it is not easy to switch them back to defence quickly. [The previous game ended in more or less forced draw after 16...♘xc4 17.♖d3 ♘ce3! 18.fxe3 ♖h4! and the game ends with perpetual check in any case... 19.♘d5 (19.e4 19...♖f2+ 20.♙h1 ♖h4+= White is forced to repeat with Kg1, otherwise he loses his queen with Nf2.; 19.♘d1 also leads to a draw after 19...♖e1+ 20.♙f1 ♖g3+ 21.♙g2 ♖e1+=) 19...♖f2+ 20.♙h1 ♖h4+ 21.♙g1 ♖f2+ 22.♙h1 ♖h4+ A draw was agreed in Zhou Jianchao-Matlakov Kazan 2013. Both players were probably familiar with this game, but Vachier had prepared his dangerous improvement at home.]

17.♘d4 Trying to trade one of the attackers with Nf3. [

a) 17.f3? was not an option for White in view of 17...♖h2+ 18.♙f1 ♖g3! and Black wins in all lines: 19.fxg4 (19.♘d1 19...♘h2+ 20.♙g1 ♘hxf3+! 21.exf3 ♘xf3+—+) 19...fxg4+ 20.♙g1 ♖f2 21.♖d5+ e6 22.♖e4 ♘f3+!—+;

b) 17.♘d1!? was the alternative for White, not only protecting the f2 square, but also to bring a defender along the 3rd rank with Rc3-h3! Black also needs to be careful here. 17...♘g6! seems like the only move to drive the knight to f4 and avoid Rh3. (17...f4? 18.♖c3± White holds and soon runs

out of compensation.) 18.♖c3 (18.e3 looks really scary after 18...♙h2+ 19.♔f1 f4!) 18...♘f4 19.♗g3

19...♙h2!! After this extremely solid prophylactic move, Black is going to bring new attackers with Rf6-h6. White seems to be in deep trouble. (After 19...♗f6? 20.e3! ♙h2+ 21.♔f1 ♘xg2 White has 22.♙d5+! and the queen takes back on g2! This is the reason for the "mysterious" Kh8 move!) 20.e3? now loses to 20...♙h2+ 21.♔f1 ♘xg2 22.♗xg2 ♙h1+ 23.♗g1 ♘h2+! 24.♔e2 ♙xg1+-]

17...♙h2+ [On 17...f4?! White successfully defends with 18.♘f3 ♘xf3+ 19.exf3±]

18.♔f1

18...♘xf2!! A brilliant attack by Vachier Lagrave! Ivanchuk had to be really upset at this point to face such an attack after

only 18 moves, when he needs a draw. However he managed to stay calm and found a cold-blooded defence to save the game!

19.♔xf2! Obviously the most natural reaction, but White had two serious alternatives as well and it requires very deep evaluation to make the correct decision. [19.♙xg5+ 19...♔h8 20.♔xf2 proves to be worse after 20...♘g4+! It is important to first send the king to the back rank to avoid Rh1. (20...♗g8? 21.♗h1!+- suddenly wins for White.) 21.♔e1 ♙g1+ 22.♘f1 ♙f2+ 23.♔d2 ♙xd4+ 24.♔c2 ♘e3+ 25.♔b1 We reach this position basically by force after 19.Qxg5. Black has two pawns for the piece, but the white pieces are so poor and cramped on the queenside that only Black can be better. 25...♗f7 After protecting the e7 pawn Black activates his other rook through the g-file. ; 19.♘f3 19...♘xf3 20.exf3 looks good for White at first sight, but

20...♘e4! opens the f-file. 21.♘xe4 fxe4 22.♙d5+ ♔h8 23.♙xe4 ♗f4! Black simply brings his pieces with Rf6 and g4 and White has no adequate defence! 24.♙xb7 (24.♙xe7 24...♗af8+-) 24...♗af8 25.♗c3 g4±]

19...♘g4+ 20.♔f1 f4 This is the point behind the sacrifice on f2. Black creates the deadly threat of Ne3. White needs to find another only move, which had to be foreseen before taking on f2.

21. ♔d3!! Freeing the d2 square for the king. White is already two pieces up, so the king cannot be let to run away... [21. ♘d1? loses to 21... ♘e3+ 22. ♘xe3 fxe3—+; 21. ♘f3? also loses after 21... ♘e3+! 22. ♔xe3 (22. ♔e1 22... ♔g3#) 22... fxe3—+ and the queen cannot be taken...]

21... ♔h4! The king had to be kept in the mate net! [21... ♘e3+? 22. ♔e1 followed by Kd2 wins for White.]

22. ♘d1! Covering the f2 square and creating the threats of Qh3 and Nf3 forces Black to play

22... ♘e3+! 23. ♘xe3 fxe3+ 24. ♔g1 ♔f2+ 25. ♔h1 Black has nothing better than giving perpetual check.

25... ♔h4+ [25... ♔f4 also leads to a draw after 26. ♘f5 ♔h4+ 27. ♘xh4 ♔xh4+ 28. ♔g1 ♔f2+ 29. ♔h2 ♔f4+! 30. ♔h1 ♔h4+=; The tempting 25... ♔f6? does not work because of 26. ♘f5! ♔xf5 27. ♔f1 ♔h4+ 28. ♔g1+— And Black doesn't have a perpetual anymore...]

26. ♔g1 ♔f2+ 27. ♔h1 ♔h4+ An excellent game full of nice tactical motifs. **1/2-1/2**

GM Arkadij Naiditsch
Best rating: 2737

At first sight White's position looks winning, but Black has some escaping chances as he can either give checks by playing Re6-Re7-Re5 or play h3 in a good moment.

47...g4 48.♔b7 White is choosing the most direct way to finish the game. [Another winning idea could be 48.♖d3! It is important to have the rook on the 3rd rank to prevent the black king from getting to g3. 48...♕f5 And now 49.♖b3! with the idea of playing Rb8 next. 49...♖a8 50.♕b7 ♖xa7+ 51.♕xa7 ♕f4

52.♕b6 And as Black cannot create a passed pawn the white king has all the time in the world to come back.]

48...♖e7+ 49.♕b6 ♖e8 Black doesn't have anything better than to keep on waiting.

50.♖a5 This move is already forcing Black to take some actions as a8Q is a threat.

50...h3 51.gxh3 gxh3 52.♖h5! A nice finishing move, but an exact calculation was needed. [52.a8=♕? would be a big mistake as after 52...♖xa8 53.♖xa8 ♕g5 54.♕c5 ♕g4 55.♕d4 h2 56.♖h8 ♕g3 57.♕e3 ♕g2 Black would be just in time to make a draw.]

52...h2 An attempt to give a perpetual check.

53.♖xh2 ♖e6+ 54.♕c5 ♖e5+ 55.♕b4 The white king has to come back and at the same time make sure that the black rook doesn't enter the a-file, but it seems like Buhmann has calculated the variation well.

55...♖e4+ 56.♕b3 ♖e3+

57.♔b2 Black doesn't have any checks left.

57...♖e8 And here comes the important finishing move:

58.♖f2+! White is driving the black king one more file away from the a-pawn before playing Kb3 followed by Ra2 and the march of the king to the b7 square. **1-0**

German league,
2014.02.08

GM Csaba Balogh
Best rating: 2672

White is a pawn down, but the draw should be achievable because the e3 pawn excellently blocks the one on d5, the king is ideally placed in front of the pawns and the rook stands actively, ready to harass the black pawns.

91.e4! White finds the most direct way to simplify the position into a theoretical drawn endgame.

91...dxe4 92.♖xc4

92...♔e5 Things are not as easy as it might look at first sight.

White is not in time to set up the ideal defensive position by putting the king to e2 and playing Rc8 with the idea to give checks forever.

93.♔d2! The most important task is to occupy the right position with the king in front of the pawn.

93...♔f4 94.♖c8! White prepares to check the king from the 8th rank.

94...♖a2+ 95.♔e1 ♔f3! Creating the threat of Ra1 Kd2 e3 check and against Rf8, Black can hide his king on e3.

White had no time to set up the ideal defensive method (the one that arose in the 95...Ke3 line). The draw is still achievable but it requires to know the only defensive plan! [After 95...♔e3 we would have reached a well-known theoretical position. 96.♖c3+ ♔d4 97.♖h3 White waits with his rook on the 3rd rank, until Black advances his pawn. 97...e3 98.♖h8!= The king has no shelter against the checks anymore in front of the pawn, so the draw is obvious.]

96.♖e8!! The only move! [96.♖f8+ is refuted by 96...♔e3 97.♔f1 ♖a1+ 98.♔g2 ♔e2—+ and we reach the game's position after 99.Rd8...; 96.♖h8 simply loses to 96...♖a1+ 97.♔d2 e3+ 98.♔d3 ♖d1+ 99.♔c2 e2—+]

96...♔e3 [96...♖a1+ 97.♔d2 and Black does not have e3, which is why the rook needs to stay on e8.]

97.♔f1! An important defensive idea is that the king must stay on the shorter side of the board (from the pawn's point of view), while the rook must be ready to check from the longer side!

97...♖a1+ 98.♔g2 ♔d3

99.♔f2! Another only move, to stop e3! From now on White's task is easy and Black quickly admits that he has no winning chance. [It is instructive to examine why other moves are losing: 99.♖d8+? 99...♔e2 100.♖b8 e3

The point is that the longer side of the board is not long enough now and White quickly runs out of checks from the side. If he had his rook on a8 and the black one on b1, he could have held the draw with side checks...

101.♖b2+ (101.♖e8 loses easily to the bridge-building method: 101...♖a7 102.♖b8 ♖g7+ 103.♔h2 ♔e1 104.♖e8 e2 105.♖e6

g5! Here comes the bridge-building! **106.** e8 f2 **107.** f8+ e3 **108.** e8+ f3 **109.** f8+ e4 **110.** e8+ e5--+) **101...** d3 **102.** b3+ (**102.** f3 does not help because of **102...** f1+! **103.** g2 e2--+) **102...** d2 **103.** b2+ c3!--+) And here it becomes clear why the rook should be on the a-file. He has no more checks, Rb8 loses to e2, while Re2 is met by Kd3.]

99... a2+ **100.** e1 h2 [100...e3 **101.** d8+=]

101. f1 e3 **102.** a8 d2 [The last attempt could have been **102...** h1+ **103.** g2 d1 but White holds for instance with the same idea he used before: **104.** e8 d3 **105.** f2=]

103. e1 e2+ **104.** f1 f2+ Black cannot make progress and agreed a draw. Knowing such endgames might allow us to save difficult positions! **1/2-1/2**

1.e4 c5 2.♘f3 e6 3.d3 ♘c6 4.g3

4...g6 This is probably the most popular set-up against this line. Black can also play Nf6-Be7-d5 or d5-Bd6-Nge7.

5.♗g2 ♗g7 6.O-O ♘ge7 7.♖e1 d6 Black can also play more actively in the center:

[7...d5 but this move leads to a slightly different position.
8.e5 The idea of this move is to get the initiative on the dark squares, especially f6. (8.♖e2 White of course doesn't need to hurry with e5 but then Black can push e5 at some point or play 8...♖c7!? Black is waiting to castle to keep the g5 idea.)
8...♖c7 9.♖e2 (9.♗f4 9...h6 10.h4

10...g5! This is the main idea Black should know in this structure. 11.hxg5 hxg5 12.♗xg5 ♘xe5 Black wins the central pawn and gets a good position.) 9...h6 10.h4 b6 (10...b5 Black's long term plan is to open the position on the queenside, which is not an easy task in general.) 11.♗f4 (11.♘bd2 White's plan is usually Nf1-Nh2-Ng4-Bf4 and if he manages to do that than he gets a strategically almost winning position, but for example in this case Black can play the typical and strong 11...g5!) 11...g5 12.hxg5 ♘g6 13.c4 With unclear play.]

8.c3 O-O 9.d4 White gets an advantage in the center. [9.♘bd2

9...a5!? Not the only way to play but this move has an interesting idea if now White plays 10.d4 (10.♘f1 With the idea h4-Nh2, but then Black will play over e5!) 10...cxd4 11.cxd4 d5 12.e5 And now Black is going to put pressure on the d4 pawn. We now also see the point of the 9...a5 move: in many

variations White will have no time to play Nb3 (to protect d4) because of a4! 12...f6 (12...f5 13.f3 a4 14.f5 ♖b6 15.fxa4 ♔a7) 13.exf6 ♕xf6 14.f3 ♕f5↗]

9...cxd4 10.cxd4 d5 11.e5

11...♕d7 [11...f6 12.f3 (12.exf6 12...♕xf6 13.f3 ♕f5 14.fxe2 ♖b6↗ Xd4) 12...fxe5 13.dxe5 ♕d7 14.f4 h6 15.h4 Followed by Qd2. White controls the e5 square very well and he has a clear advantage thanks to his space advantage and the potentially weak black king.]

12.f3 ♖c8 White is better because he has more space and because of the limited bishop on g7. In general his plan is to create pressure on the kingside while Black should try to get counterplay on the queenside.

13.f4 [13.h4 13...h6 A prophylactic move as now after h5 Black will answer g5. (13...f6 14.h5↗) 14.f4 ♕a5 15.♖d3 ♕c4 16.b3 ♕a3 17.♖ac1 b5 18.♖d2 ♕h7 19.f3 With the thematic idea to transfer the knight to g4. 19...♖xc1 20.♖xc1 b4 21.f3 ♖b6 22.f4 ♖c8↗ And Black is in time with counterplay because after 23.Qd2 comes Rc2.]

13...♕a5 14.♖c1

14...b5 Black immediately tries to create some play on the queenside.

15.b3 Preventing Nc4 but on the other hand this move weakens the c-file.

15...b4 16.f3 ♕b5 This diagonal is empty, which means that the bishop doesn't create any threats but at least it is better placed than on d7.

17.♖d2 ♕ac6

18.g4 Preventing Nf5 and slowly advancing the pawns on the kingside.

18...a5 19.f3 [19.f4 19...♖b6 (19...♕xe2 It looks tempting to exchange the knight which can be an important attacking

piece, but the problem is that after b5-b4 Black weakened the light squares. 20. ♖xe2 ♜b6 21. ♕f1+= Xb5;Xa6) 20. ♘f4 h6 21. ♕f6 ♜c7 And it is not easy to improve the pressure for White. 22. ♜c5 ♜fc8 23. ♜ec1? ♘xd4! ♢]

19... ♜b6 20.h4

20... ♘b8! I like this move. Black is going to reduce the material over the c-file and put the knight on d7 to take control of the important f6 square. [20... ♜c7 21. ♕h6 ♜fc8 22. ♜f4! ♗xf7; 20... a4 21. h5 axb3 22. axb3 ♘a5 23. h6! ♘xb3 24. ♜xb4+-]

21. ♕h6 ♘d7 22. ♜g5 ♜xc1 [22... f6 23. exf6 ♕xf6 (23... ♘xf6 24. ♕xg7 ♜xg7 25. ♘h5+! ♘xh5 26. ♜xe7+ ♜f7 27. ♜g5 ♜xc1 28. ♜xc1 With a decisive initiative on the dark squares. 28... ♘f4 29. ♜e5+-) 24. ♜e3± All white pieces are ready for the final attack on the kingside. Black's position is very unpleasant.]

23. ♜xc1 ♕xh6 24. ♜xh6 ♜c8 25. ♜xc8+ ♘xc8 26.h5 White has some initiative and Black must be accurate to avoid tactical ideas. [26. ♘g5 26... ♘f8 27. ♘3e4 dxe4 28. ♘xe4 ♜d8 ♢ The only move as the queen has to protect the knight on f8.]

26... ♜d8? The decisive mistake! Black's idea to support the defence with the queen looks very logical but Black should do it in the right move order. [26... ♘f8! Protecting the h7 pawn. 27. ♘g5 Now compared to the game the pawn on d4 is hanging! (27. ♜g5 27... ♜c7 28. h6 ♜e7∞; 27. ♜f4 27... ♜d8 28. ♘g5 ♜e7∞) 27... ♜xd4 28. ♘xh7 ♘xh7 29. hxg6 ♘f8 (29... fxg6 30. ♜xg6+ ♜h8 31. ♜xe6 The knight and pawn are hanging and Nf5 is coming. White has big pressure.) 30. gxf7+ ♜xf7 31. ♜f6+ ♜e8 (31... ♜g8 32. ♜g5+ With perpetual check.) 32. ♘h5 ♜c5 Protecting the knight on f8. 33. g5 ♕d3 ♢]

27. ♘g5 ♘f8

28. ♕e4! A nice move! Thanks to this tactical trick all white pieces are joining the attack. [White could also play 28. ♘xh7 28... ♘xh7 29. hxg6 fxg6 30. ♜xg6+ ♜h8 31. ♜xe6 ♘e7 32. f4 ♜d7 33. ♜xd7 ♕xd7 34. f5! With the simple plan of putting the king on f4 and advancing the pawns.]

28...♔e7 [28...dxe4 29.♘3xe4 With mate to follow.; 28...♙e8 Protecting the g6 square doesn't help anymore: 29.hxg6 fxg6 30.♘h5 ♔e7 31.♘f6+ ♔h8 32.♙d3 And White is winning.]

29.♘xh7! The final blow! White is simply winning now.

29...♘xh7 30.hxg6 fxg6 31.♙xg6 ♘g5 [31...♔g7 32.♙xh7+ ♔xh7 33.♔xe6+-]

32.♘h5 ♘f3+ 33.♔g2 ♘h4+ 34.♔g3 ♘xg6 35.♘f6+ ♔f7 36.♔h7+ White mate to follow soon. **1-0**

Editorial Preface

With the current issue we are celebrating 2 years of Chess Evolution Weekly Newsletter. First of all we want to thank everyone who has been with us for all this time already and of course also all the others who joined us later on for the support and nice feedback that we have been getting over these last 2 years.

Lately we made some little modifications, but the structure of the Newsletter is still the same as it was in our 1st issue. We hope you enjoy our work and from our side we are ready to continue for many more years!

Now to the chess events:

Except for team competitions, only 2 big opens came to an end.

The Bronstein Memorial had 3 winners: Jobava, Fedorchuk and Oleksienko, all with 7/9. The Graz Open was won by Melkumyan with a fantastic 7.5/9.

We only have to be patient for two more weeks until the Candidates and the European Championship will start with thousands of nice games!

We wish you a lot of chess fun!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Ivanisevic, Ivan(2626)
- **Acs, Peter(2569) [D10]**

Hungarian league,
2014.02.15

GM Csaba Balogh
Best rating: 2672

Ivanisevic is a strong attacking player. He wins many nice games, especially with the white pieces, thanks to his sharp and dangerous openings.

1.d4 d5 2.c4 c6 3.♘c3 ♘f6 4.e3 a6 Acs chooses his favorite Slav opening with 4...a6.

5.♙d3 A rare move, which probably wants to avoid the recently popular line of 5. Nf3 Bf5. Black has several options here, the most common being b5, but the text move is also a very natural reaction.

5...e6

6.b3!? We are already in a more or less new position from a theoretical point of view. As White has already developed his light squared bishop, Black was ready to take on c4 to win the tempo, followed by the standard b5-c5 operation. From now on White intends to recapture with the b-pawn to

strengthen his center and also to develop the bishop to b2 later on. [6.♘f3 would transpose to a main line after 6...dxc4 7.♙xc4 b5 followed by c5.]

6...c5 This looks like a loss of a tempo, but it is actually one of the main ideas of this line. Black takes some ground by freeing his position. He intends to challenge the center with Nc6.

7.♘f3 ♘c6

8.O-O! Very deep preparation, involving a pawn sacrifice.

8...dxc4 [8...cxd4 9.exd4 ♙e7 was an option to avoid the complications, but then White might get a better position with 10.c5 Because of the a6 move Black has no good way to undermine the c5 pawn with b6 and it might also be unpleasant to deal with 10...O-O 11.♘a4! ♘d7 12.♙f4+; 8...♙e7 loses a tempo, so White clarifies the situation in the center: 9.dxc5! ♙xc5 10.cxd5 exd5 11.h3! Preventing Bg4, followed by Bb2 and Ne2-d4, with a typical fight against the isolated pawn, where White's chances are better.]

9.bxc4 cxd4 10.exd4 ♘xd4 There was no way back, Acs had to grab the material, otherwise Black has just given up the center.

11.♘xd4 ♙xd4 12.♙b2 This game was played next to me. Ivanisevic was still blitzing out his moves. Black is seriously behind in development and he needs to lose a further tempo

to move away with the queen. If he succeeds to play Be7 and O-O on the other hand, he will end up with an extra pawn.

12... ♖b6 Black brings back his queen into safety. [12... ♖d8!? would probably be met similarly to the game: 13. ♖f3 ♘e7 14. ♖ad1 White always brings his pieces with tempo. 14... ♖c7 15. ♘e4 ♘xe4 16. ♙xe4 O-O

This position arises after very natural play by both sides. It might be a critical one also from the opening point of view. Black is ready to consolidate with f5 or e5, pushing back the pieces and keeping an extra pawn. Therefore White must use the moment to gain something... 17. ♙xh7+! is the standard series of sacrifice, but it seems to only lead to a draw: 17... ♖xh7 18. ♖h5+ ♖g8 19. ♙xg7! Destroying the kingside, followed by bringing the rook along the 3rd rank. 19... ♖xg7 20. ♖g4+ ♖f6! (20... ♖h6 21. ♖d3 ♙g5! might also be playable, although it looks very suspicious after 22. f4) 21. ♖d3 ♙d6!

With the idea to run away with Ke7. 22. ♖h4+ ♖g6 23. ♖g4+! (The mate can be prevented after 23. f4 23... ♖c5+ 24. ♖h1 f6! 25. ♖g3+ ♖f7 26. ♖h7+ ♖e8—+ The king escapes and Black has two extra bishops.) ; 12... ♖h4!? is the computer's suggestion but for a human it looks suspicious because the queen might get stuck out of the game.]

13. ♖b1 And the queen needs to move again.. .

13... ♖c7

14. ♘e4! White trades a defender and opens the diagonal for the b2 bishop. It is not easy to finish the development because of the g7 pawn and the pressure on the f6 knight.

14... ♙e7 15. ♖f3 Overpressing the f6 knight, so Black is forced to open the long diagonal. [Another attacking option was 15. ♘xf6+ 15... ♙xf6 16. ♙xf6 gxf6 17. ♖h5 followed by Rfe1. The black king will stay in the center forever, although the final breakthrough is still far away. Black will try to shelter his king one e7.]

15... ♘xe4 16. ♙xe4 f6?! After a long thought, Black decided to keep the king in the center. [16... O-O! should have been played. We have the same position as in the 12... ♖d8 line, with only the rook standing on b1 and not on d1. Once again the critical continuation is 17. ♙xh7+ ♖xh7 18. ♖h5+ ♖g8 19. ♙xg7! This could be the only reason why Acs refused

to castle kingside, but it again seems to lead to a perpetual, just as in the 12... Qd8 line. 19...♔xg7 20.♚g4+ ♔f6 21.♖b3 ♕d6 22.♚h4+ ♔g6 23.♚g4+=[

17.♚h5+ Avoiding castling forever.

17...♔f8 White cannot lead a mating attack directly, he must continue with some prophylactic measures. Black has only one dream in this position, to finish the development of the queenside, for example with Bd7-c6. Therefore White puts pressure on the b7 pawn. [17...g6? is obviously a blunder because of 18.♕xg6+]

18.♚f3!? [Another strong move was 18.♖fd1!? 18...♖b8 (The idea is that after 18...♕d7 19.♕xf6! ♕xf6 20.♖xb7 wins.) 19.♕d4 Preventing Bd7 again, this time White could play Ba7. 19...b6 White has a very deep move here: 20.h3!? Not necessary of course, but the point is to still keep the bishop on c8. Black has no useful move with any other pieces and 20...♕d7 allows 21.♕xb6! ♖xb6 22.♖xb6 ♚xb6 23.♖xd7± With a big advantage and here we can see that h3 is a very useful move to have the back rank opened.]

18...♖b8 19.♕d4 White opens the rook's file and intends to confuse Black with Ba7 or Bb6.

19...f5 [Ivanisevic's point of bringing back the queen to f3 becomes clear after the most obvious 19...b6 Now White plays 20.♚e3! and Black has problems with the b6 pawn. To grab the c4 pawn is of course always too optimistic. With a king on f8 one should never grab pawns and open new files for the rooks. 20...♚xc4 loses to 21.♖fc1 ♚a4 22.♚f4!+- trapping the b8 rook.]

20.♖fd1 Activating the last unemployed piece. [It would also have made sense to transfer the bishop back to e3 first with 20.♕a7 20...♖a8 21.♕e3 ♖b8 22.♖fd1 Threatening Bf4. But of course the text move is more human.]

20...♕f6 The e4 bishop is suddenly hanging and Black is ready to trade some pieces to ease his defensive task. White needs to continue precisely.

21.♕b6! [21.♕a7? could be met by 21...fxe4]

21...♚e5 [21...fxe4 is refuted by 22.♚a3+! ♚e7 (22...♕e7 23.♕xc7 ♕xa3 24.♖d8+ ♔f7 25.♖xh8+-) 23.♕c5+-; 21...♚xc4 22.♚g3 ♖a8 White has many tempting options. A spectacular attacking move is 23.♕d8!+- trying to free the d8 square for the rook.]

22.♕c2 ♔f7 Black is one step closer to connecting his rooks, but developing the c8 bishop still looks like a hopeless task.

23.♖b3! White further improves his pieces.

23...h5 Black cannot move with his pieces, so he at least prevents the checks on h5. But of course it is already a bad sign if somebody has to make such moves.

24.♖e3 ♕b2 The only square for the queen.

25.♗b3! might look a bit strange, but the bishop is actually going to stand extremely well after c5, getting a new target on e6!

25...g5 Black tries a clever attempt to make some artificial safety for his king on g6, but in a bad position all moves are just bad.

26.c5 ♖g6 27.♗c7! Ivanisevic continues with his precise and energetic moves! [27.♗xe6? immediately would only help Black: 27...♗xe6 28.♖xe6 ♖he8 Suddenly Black connects his rooks and gets rid of his poor c8 bishop.]

27...g4 [27...♖a8 loses to 28.♗xe6! ♗xe6 29.♖xe6 And the difference of having the Bc7 move included is that 29...♖he8 30.♗e5! wins.]

28.♕f4 ♖a8 [28...♗g5 was Acs's intention when he pushed g4, but it has a beautiful refutation!

29.♕e5! ♖xe5 30.♗xe5 ♗xe3 31.fxe3+- Black loses a full rook.]

29.♗e5! Trading the only defender of the king. Black cannot save himself...

29...♗xe5 30.♖xe5 ♖f6 Allowing White to finish the game in style. [30...♖e8 31.♖de1+- The e6 pawn will fall and it also means the end of the game as Kf6 allows Qh6.]

31.♖xf5+! exf5 32.♖d6+ ♖e7 33.♕g5+ Black resigned in view of Rd8 mate. A great attacking game! **1-0**

(2) Shimanov, Aleksandr(2658) - Rasulov, Vugar(2534) [A45]

Minsk Open, 2014.02.17

GM Csaba Balogh
Best rating: 2672

White wins a very nice attacking game after Black's dubious opening choice.

1.d4 ♘f6 **2.♗g5** The Trompowsky variation. White likes using this weapon when he wants to get his opponent to less theoretical areas. Black reacts with an ambitious setup. 2...d5 is considered to be the most solid.

2...♘e4 3.♗f4 c5 4.f3 ♖a5+ 5.c3 ♘f6 6.♘d2 cxd4 7.♘b3
All these moves are well-known with thousands of games in the database. Here Black has a wide range of choices. Qd8 and Qb6 are the main moves. The text is the most ambitious and has also been tried in many games, but it seems rather suspicious to me...

7...♖f5?! Forcing White to give up his strong bishop in order to restore the material balance, but White gets too many free tempi by attacking the wandering queen.

8.♗xb8! Quite unusual moves for both sides, but what to do, this is an unusual opening.

8...♖xb8 9.♖xd4! Gaining an important tempo again by attacking the a7 pawn. Black has no b8 knight anymore to develop with Nc6 tempo and White is intending to castle queenside to launch his attack as quickly as possible.

9...b6 10.e4 The queen has no good square to leave, it must move into another tempo to finally get away from the danger zone.

10...♖f4 11.♘h3 ♖c7

12.e5! Pushing back all the black pieces to the 8th rank.

12...♘g8 Many great players - such as Ivanchuk and Svidler - have played like this as Black, but is it really worth the bishop pair to have such a passive position?! If White does not play accurately, things might quickly go in Black's favor.

13.♘f2! This looks like the most accurate move! [13.O-O-O is more common, but in this case Black is able to solve the problem of his g8 knight with 13...e6 followed by Ne7-c6.]

13...♘h6 Trying to activate the knight through f5, but after White's strong reaction the knight ends up at the edge of the board. [Now on 13...e6 White has 14.♘e4 preventing Ne7 because of the check on d6.; Maybe 13...f6 to undermine the annoying e5 pawn was an option, but I doubt that Black could objectively play like this.]

14.g4! White is going to castle queenside anyway, so such moves are easy to make. Of course with the knight on g1 we would have a different story...

14...♟b7 15.♞e4

15...f5 The only way to get back the h6 knight to the game through f7 and to try and finish the development. However it also has the drawback that the position is going to open and then the king on e8 who will be stuck in the center is becoming more vulnerable.

16.exf6! gxf6 17.O-O-O White's main attacking idea is Bb5 followed by Rhe1, quickly punishing the king. With the following couple of moves Black would like to trade queens to avoid getting mated...

17...♞f4+ 18.♞b1 d5 The endgame would be excellent for Black as he would have no more worries about his king and also the two bishops would soon start to work. However White is not forced to move his knight...

19.g5!! White creates the threat of Nxf6 and the pawn cannot be taken as the rook is hanging on h8. Therefore Black is forced to accept the sacrifice.

19...dxe4 20.♞d7+ Shimanov sends the opponent's king on a long run.

20...♞f7 21.♟c4+ Such checks, developing with tempo, should always be given.

21...♞g6 22.gxf6!? A new file opens on the king. [Actually 22.gxh6 was also perfectly fine. The g-file opens for the rook. Even materially White is holding the balance, but of course the situation of the black king plays a more important role.]

22...♟c8 [On 22...exf6 the best is 23.♞hg1+ ♞h5 24.♞g3+- intending to mate with Rh3 followed by Rg1.; 22...exf3 23.fxe7 should not last long for Black.]

23.♞hg1+ [23.♞e8+!? to force Black to take on f6 would have been even more precise. 23...♞xf6 24.♞c6+ e6 25.fxe4 and Rhf1 next was also just a simple win for White, but the text move is also good.]

23...♞h5 The only move! It seems to be completely winning, but White should continue finding the best attacking moves. [23...♞xf6 24.♞c6+ e6 25.fxe4+- is over.]

24.♞e8+! Haunting the king, but it continues his journey at the rim of the board.

24...♔h4 25.fxe7! Usually the simplest moves are the strongest ones... White will get a new queen soon.

25...♙f5 [25...♙g7 is met by 26.♖xh8 ♙xh8 27.e8=♖+–]

26.exf8=♖ What an amazing position with three queens and an h4 king on the board!

26...exf3+ 27.♔a1 ♖xf8 28.♖e7+ ♔h5 [On 28...♔h3 White has several wins. An easy one is 29.♖d2 and it is difficult to parry the Bf1 mate threat.]

29.♖d4! White continues attacking with tempo. The end should be close!

29...f2 30.♙e2+! ♙g4 31.♖f1 Blocking Black's last hope. White loses one attacking piece, but continues attacking with three, which should still be enough. [According to the machine 31.♙xg4+ 31...♙xg4 32.♖xh7+ ♖h6 33.♖d5+! ♔h4 34.♖xg4+! ♙xg4 35.♖xh6 f1=♖+ 36.♙c1+– was even stronger and Black has no defence, but Shimanov's choice is more human and looks much simpler.]

31...♖g5 White finds a pretty way to obtain a decisive material advantage: [31...♖be8 leads to a lost endgame after 32.♖xe8+ ♖xe8 33.♖xf4 ♖xe2 34.♖4xf2+–; On 31...♖f7 which would have been the best practical chance, the strongest and the most beautiful is 32.♖e6!! ♖f6 33.♖d7! ♖f7 34.♖b5+! ♖g5 (34...♖f5 loses to 35.♖xf4 ♖xb5 36.♙xb5+–) 35.♙xg4+

♙xg4 36.♖d5+– wins decisive material.]

32.♖xg4!! ♙xg4 [32...♖xe7 33.♖e4+ ♔g6 34.♖xe7+– White is a piece up.]

33.♖xh7+ ♖h6 34.♙xg4+ ♔g5 White is even materially ahead, but the f2 pawn could create some counterplay if he makes a mistake. The next move is extremely important in order to continue the hunt of the king!

35.h4+! ♖xh4 The only move, but now new unpleasant checks are coming...

36.♖g7+ ♔f4 37.♙d4!? Bishop moves were also strong, but White brings a new attacker to the game!

37...♖h8 A desperate attempt to trade queens, but of course the mate is coming soon. [37...♖xg4 is refuted by 38.♖xf2+ ♔g3 39.♖g2+ ♔xg2 40.♖xg4+– Everything is falling with check, so Black cannot make use of the weak back rank.]

38.♙e2+ ♔e4 39.♖g6+ ♔d5 40.♖e6+ [Black resigned in view of 40.♖e6+ 40...♔c5 41.b4+ ♔b5 42.♙d4+ ♔a6 (42...♔a4 43.♖b3#) 43.♙e2+ ♔b7 44.♖c6# An entertaining game!] **1-0**

(3) Akopian, Vladimir(2682) - Chatalbashev, Boris(2522) [B07]

Bronstein Mem Open A 2014(6.14),
2014.02.16

GM Arkadij Naiditsch
Best rating: 2737

We will see an interesting fighting game where White sacrificed an exchange and even went to b4 with his king, but somehow still won the game!

1.e4 d6 Chatalbashev is one of the few players who love to play the Pirc.

2.d4 f6 3.c3 g6 4.f3 This is one of the main lines. White does not hesitate and develops the queenside pieces quickly in order to be able to castle queenside.

4...f3 [4...c6 and; 4...a6 are the two other main lines here.]

5.f3 White's idea is simple, to play Bh6 at some point or to castle queenside, followed by an attack in the center.

5...c6 [White should not be afraid of moves like 5...g4 because of the simple 6.f3 h6 7.f3 h4 g5 8.f3 g3 and White is better.]

6.h3 I am not sure about this move. We would be back in the main lines after 6.Bh6.

6...O-O Now Black can comfortably castle kingside. Usually White's idea would be to play h4-h5, but it is clear that after 6.h3 it would at least be a loss of a tempo.

7.f3 e5 Black tries to immediately create some play in the center. [Personally I think a move like 7...b5 followed by Nbd7 and only later e5 also gives Black a playable position.]

8.O-O-O Now White already wants to play dxe5 next.

8...exd4 9.f3xd4 [After 9.f3xd4 9...b5! we end up in a very unclear position.]

9...f8 10.f3f4 A very logical move, protecting the e4 pawn and also putting extra pressure on the d6 pawn.

10...b5 Black finally plays b5. He wants to play b4 next.

11.e5!? White is entering deep complications. [Another interesting try could have been 11.f3c5 11...f3a5 12.f3xd6 and now Black has the nice 12...f3h5! (12...b4 was losing to 13.f3c7!) 13.f3g5 And White might be better, but things are pretty unclear.]

11...f3h5 The white queen has to take a passive place.

12.f3h2 dxe5 [Including 12...b4 would not bring anything for Black. 13.f3e4]

13.f3xe5 f3d7! A good move. At first sight White's position looks much better, but things are pretty unclear. Black can be very fast with Qa5 and b4 and the white queen on h2 is not a great piece.

14.f3xg7 f3xg7 15.f3d3 White is planning to play Ne4 after b4 and he develops a piece at the same time.

15...f3a5 Now b4 move is a threat.

16. ♖he1! There is no time to lose! [After the usual 16. ♔b1 16... ♘c5 the position should be around equal.]

16... ♖xe1 [After the tempting 16... b4 17. ♘e4! looks very strong. 17... ♗xa2 18. ♗d6! Another very strong move. The position is complicated, but White should be better.]

17. ♖xe1 ♘c5 Black almost finished his development.

18. ♗d6 There is no better try for White.

18... ♘xd3+ 19. cxd3 ♕e6! Black is done with his development, all pieces are in the game and he has a solid structure. Black can't be much worse here.

20. ♘e5? A very tricky move, but probably a mistake. [White should have tried to get control over the black squares by playing 20. a3! followed by d4 and Qc5. White's position might be a bit better.]

20... b4! Now things are getting pretty forced.

21. ♘xc6 The only move.

21... ♗g5+ 22. f4

22... ♗h4! This is probably the move that Akopian missed when he played 20. Ne5?. Both the rook on e1 and the knight on c3 are attacked, so White already has no choice but to give up the exchange.

23. ♖xe6 ♘xe6 24. ♘d5! A good practical move. White doesn't care about "gambling" anymore and is ready to run with his king, in the hope to get good play on the dark squares. As we know, the queen and knights can be very dangerous pieces in the attack.

24... ♗e1+ A logical move. The white king needs to run now.

25. ♔c2 ♗e2+ 26. ♔b3 ♗xd3+ 27. ♔xb4 So far everything was forced.

27... a5+! Another nice move by Black. The position is still very tense. Black needs to play very precisely because the white pieces could become very dangerous.

28. ♔a4 ♕g7? This is a serious mistake! Black hands the initiative over to White. [It was much easier to play 28... ♖c2+ 29. ♔a3 ♖c5+ and reach an endgame where Black is clearly better.]

29. ♖e5+ Now it is White's turn to attack!

29... ♕h6 30. ♘e3 Ng4 is a deadly threat.

30... f5?? Black panics... [After 30... ♖e4+! 31. ♖xe4 ♘c5+ 32. ♔b5 ♘xe4 we would still reach a very interesting endgame. It is hard to say who is better here...]

31. ♖xe6 Simple and strong! The game is over now...

31... ♖a6 32. g4 What a sad end of a fighting game for Black!
1-0

(4) Mista, Aleksander(2582) - Najer, Evgeny(2641) [B90]

TCh-CZE Extraliga 2013-14(7.1),
2014.02.15

GM Arkadij Naiditsch
Best rating: 2737

Najer is known as a very aggressive and fighting player. His results with White are great, but sometimes he is also just getting crushed, especially when he is Black. We will face a great attacking game by Mista, who evaluates the situation perfectly, sacrifices a rook for 2 pieces and simply mates the black king.

1.e4 c5 As for most fighting players, Najer's main opening is the Najdorf.

2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e3 So we are in the main line and now Black has to choose whether to play 6...e6 or 6...e5.

6...e6 When I was younger I had a discussion with one of my chess friends about whether the position after 6...e6 is still a Najdorf or a Sheveningen. I myself only played 6...e5 and always have been very stubborn in my opinion that in the Najdorf the pawn has to be placed on e5 and that the rest is Sheveningen! :)

7.g4!? One of the most aggressive lines. [7.f3 is the most played move here, with the idea of Qd2, g4 and 0-0-0 with many thousands of games being played here before.]

7...h6 is probably the most solid move, but it already gives White nice play. [7...e5 would lead to very forced lines. 8.♘f5 g6 (The other main line is 8...h5 9.g5 ♘xe4 10.♘xg7+ ♙xg7 11.♘xe4 d5 With an unclear position.) 9.g5 gxf5 10.exf5 d5 Things are far from clear here, even after many years of computer analyses.]

8.♙g2 A tricky move. Usually White plays 8.h3, defending against Black's e5 push.

8...g5?! A very typical and logical move with the idea of taking control over the dark squares, but now White sort of saved a tempo. [Black already had to go for 8...e5 9.♘f5 g6 Now White has quite a few moves and one of the main ones is 10.h4 gxf5 11.exf5 With a very complicated position.]

9.h4! This is exactly why g5 was a bit too early. White immediately launches very dangerous play.

9...♖g8 Nothing else to do, Black needs to protect the g5 pawn.

10.hxg5 hxg5 11.♙e2 White is getting ready to castle queenside.

11...♘bd7 12.0-0-0 ♙c7 It is hard to blame Black for such a move. [But 12...♘e5 first would probably have been a better option.]

13. ♖f3! An excellent move by Mista who tries to open the position as much as possible, using the fact that Black is still undeveloped.

13... ♗xg4 14. ♕xg5 ♖ge5 Black continues trying to keep the position on the dark squares. [Even if it looks very dangerous 14... ♖c5 might have been a better try. 15. ♕h4 b5 Black's position is looking very shaky, but maybe things are still more or less OK. 16. a3 ♕b7 17. ♖d4 White is better, but the position is complicated.]

15. ♖xe5!? Mista starts a very direct attack with a nice sacrifice, but there was actually no need for it. [The more simple 15. ♖h7 would keep a big advantage and of course Black can't play 15... ♖xf3? since after 16. ♖xf3 ♖xg5 17. ♖xf7+ ♕d8 18. ♕h3 White has a mating attack.]

15... ♖xg5 16. f4 This was White's idea. A sacrifice of 2 pieces for the rook and a try to overroll Black's defence lines.

16... ♖xg2 17. ♖xg2 dxe5

18. f5! Exactly! White is weakening Black's pawn structure even more. Now all the white pieces will join the attack.

18... exf5 This move is losing, but it hard to find a better one... White's attack is just too strong.

19. ♖d5 ♖c6 [There might be a tougher fight after 19... ♖d6 but after the simple 20. ♖g5 b5 21. ♖xf5 White's attack is still deadly.]

20. ♖h8 b5 Too late Mr. Najer, too late...

21. ♖g5 Threatening to mate on e7.

21... ♖d6

22. ♖xf8+! Mista is finishing the game with a nice final blow.

22... ♖xf8 [22... ♖xf8 23. ♖c7# would have been a prettier end of the game.]

23. ♖d8+ ♖g7 24. ♖g1+ Followed by mate in a couple of moves. We saw a really great attacking game by White and another good example on how dangerous and how quickly it can be over after the smallest inaccuracy in the Sicilian! **1-0**

2014.02.15

GM Arkadij Naiditsch
Best rating: 2737

55...♔e6 White is a pawn up while the black knight on h3 is out of the game and his only function is to protect the g5 pawn. The position should be winning for White but things are not that simple. In case Black manages to give up his knight for the g4 and d6 pawns, the position would just be a draw because the a8 square is of the wrong color.

56.♟g6 A good move. Black can't do anything better than to move his king.

56...♔d7 57.♟f5 Once again Black doesn't really have a choice.

57...♔e8 [57...♔c6 would lead to an easy win for White as after 58.♟e6 ♟f4+ 59.♟f6 ♟h3 60.♟e7 the d-pawn is unstoppable.]

58.♟b2! White is using the moment to transfer his bishop from its passive position on a3 to a much more central square on e5, from where it will defend the d6 pawn and at the same time play against the black knight on h3. [58.♟e6 is premature because of 58...♟f4+]

58...♔d7 59.♟e5 White's pieces have taken perfect places.

59...a3 is maybe Black's best chance, at least theoretically the a2 pawn could now theoretically be taken by the knight.

60.♟f6 White puts Black into the last zugzwang.

60...♟f2 Black needs to give up the g5 pawn. [60...♔e8 is not possible: 61.♟e6 ♟f4+ 62.♟xf4 gxf4 63.d7+ ♔d8 64.g5 f3 65.g6 f2 66.g7 f1=♔ 67.g8=♔+ And White is winning.]

61.♟xg5 ♔e6 62.♟h2 Of course White holds on to the d6 pawn and he prepares the march of the g-pawn.

62...♟e4+ 63.♟h5 [63.♟h6 would have led to a more simple win.]

63...♟c3 At least Black is getting the a2 pawn, but White is still in time to get a winning position.

64.g5 ♟xa2 65.g6 ♟b4 The black knight is joining the defence from the c6 square and stopping the d-pawn.

66.g7 ♟f7 67.d7 ♟c6 Both white pawns are stopped, but Black is practically paralyzed.

68.♙e5! The last exact move. The white bishop is the clearly winning the endgame as he is both protecting the g7 pawn and stopping Black's pawn from promoting.

68...♘d8 69.♙a1 a2 70.♚g4 The game is over. All White needs to do is to come back to b3 with the king and take the a2 pawn, then to go c7 with the king and protect the d-pawn. Black can only watch...

70...♘e6 71.♙f3 ♖g8 72.♙e3 ♖f7 73.♙d2 ♘d8 74.♙c2 ♘b7 The last trick...

75.♙c3 followed by Kb2. Very nice endgame technique by Khalifman! **1-0**

**(16) Grachev, Boris(2669)
- Tiviakov, Sergei(2639)**

Minsk Open, 2014.02.16

GM Csaba Balogh
Best rating: 2672

Pawn endgames are always very tricky and require very exact calculation. In the current position White has a big space advantage, but it looks almost impossible to break through as the black pawns are controlling all the invading squares of the king. However White makes a last attempt...

47.f5?? The only attempt to create an invading square for the king, but it is actually a blunder which could have cost to the game. In case of other moves Black would just have waited with the king with Kd7-e7 and held the draw. [If White includes 47.gxh6 47...gxh6 48.f5 he is not threatening to play f6 as the g-pawns are not on the board anymore, which is why Black can simply ignore everything and play 48...♙e8 49.♙f4 ♙d8= With an inevitable draw.]

47...exf5+? The most natural reaction, but it spoils the sudden chance. [47...hxg5! would have won for Black as the following lines demonstrate: 48.♙xg5 (48.f6+ 48...gxf6 49.h6 does not help. 49...f5+ is the simplest, creating a protected passed pawn. (49...♙f8 is also good. 50.exf6 ♙g8 51.♙h5

♔h7 52.♔xg5 e5 53.♔f5 ♔xh6 54.♔xe5 ♔g5 White loses the f-pawn. A last try could be 55.a3 with the idea to play b4, bxc5 and the king is going to take the c-pawn, thus also obtaining a passed pawn. However Black simply plays

55...a5!-+ (55...♔g6? 56.b4)) 50.♔xg5 ♔f8 51.♔h5 (51.♔f6 loses the pawn race by one tempo: 51...♔g8 52.h7+ ♔xh7 53.♔xf7 f4 54.♔xe6 f3-+) 51...♔g8 52.♔h4 ♔h7 53.♔g5 f4!-+ With an easy win. Black takes on h6, creates a new passed pawn with Kg6, f6 and easily converts the extra pawn.) 48...exf5 49.♔xf5

49...g6+!! This sacrifice is the whole point! Black uses the logic of the distant passed pawn. He deviates the king in order to win the e-pawn. 50.hxg6 fxg6+ 51.♔xg6 (51.♔e4 leads to the classical distant passed pawn situation. Black wins by sacrificing it: 51...♔e6 52.♔f4 g5+ 53.♔e4 g4 54.♔f4

g3 55.♔xg3 ♔xe5 followed by Kd4-c3 etc, collecting the pawns.) 51...♔e6 The king excellently stands on e6 as it also wins an important tempo by preventing the king's approach to the f-file... 52.♔g7 ♔xe5 53.♔f7 ♔d4 Black is much faster. 54.♔e6 ♔c3 55.♔d6 ♔b2 56.♔c6 ♔xa2 57.♔b7 ♔xb3 58.♔xa7 ♔xc4-+]

48.♔xf5 hxg5 49.♔xg5 ♔e6 50.♔f4 ♔d7 51.♔f5 ♔e7 [With the king on d7, Black cannot play 51...g6+? because White is not forced to take twice on g6, but plays 52.♔f6! gxh5 53.♔xf7 and wins.]

52.♔f4 [And a draw was agreed since both sides are just waiting. 52.♔f4 52...♔d7 53.♔e4 ♔e6 54.♔f4 ♔e7=] **1/2-1/2**

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♘f6 4.♘g5 In these days most of the players chose very aggressive continuations and many games were very complicated.

4...d5 5.exd5 ♘a5 The main move. An interesting variation to surprise the opponent can be [5...♘d4!? 6.c3 (6.d6? A bad move as White falls into the following trap: 6...♙xd6

7.♘xf7 (7.♙xf7+ 7...♙e7 8.♙b3 ♘xb3 9.axb3 h6 10.♘f3 e4 11.♘g1 ♙f7 With more than compensation.) 7...♙c6 8.♘h8 ♙xg2 9.♙f1 ♙e4+ 10.♙e2 ♘f3#) 6...b5 7.♙f1 ♘xd5 8.cxd4 ♙xg5 9.♙xb5+ ♙d8 Black is hoping to activate the pieces and get the initiative. 10.♙f3 ♙b7 11.O-O e4 (11...exd4 12.d3+=) 12.♙xe4 ♙d6 13.♙e1 (13.d3??

loses to 13...♙xh2+! 14.♙xh2 ♘f4! 15.♙xf4 (15.♙xb7 15...♙h4+ 16.♙g1 ♘e2#) 15...♙h5+ 16.♙g1 ♙xe4 17.dxe4 ♙xb5+); 5...♘xd5 6.d4!]

6.d3 [6.♙b5+ 6...c6 7.dxc6 bxc6 leads to a very complex line.]

6...h6 7.♘f3

7...e4! Not allowing White to coordinate his pieces.

8.♙e2 ♘xc4 9.dxc4 ♙c5 10.h3 White wants to control the important g4 square. [10.O-O 10...O-O 11.♘fd2 ♙g4 12.♙e1 ♙e8 13.♘b3 ♙d6 And Black has a very strong mating attack!]

10...O-O 11.♘h2

11...♗h7 A concrete plan. Black is getting ready to put pressure after f5-f4. [11...e3 12.♕xe3 ♕xe3 13.fxe3 ♖e4 14.O-O (14.♖g1 14...♗d6†) 14...♗g3 15.♗f2 ♗xf1 16.♗xf1 If black doesn't manage to destroy the position in the center White can get a huge initiative after Nc3-e4 etc.; 11...b5 12.O-O (12.cxb5 12...♗xd5 13.O-O ♗e7 Followed by Bb7-f5 and Black gets excellent play.) 12...bxc4 13.♗c3∞]

12.♗d2 [12.♗c3 12...f5 13.♕e3 ♕d6 From a practical point of view the white king should of course look for a safer place, but after 14.O-O-O! ♕d7 the position is still unclear.]

12...f5 [12...e3 13.fxe3 ♕xe3 14.♗xe3 ♖e8 15.♗e4 ♗h4+ 16.♖d1 (16.g3 16...♗xe4 17.♗xe4 ♖xe4+ 18.♖f2 ♖xc4 19.c3 ♕xh3-+) 16...♖xe4 17.♗f3! ♗e7 18.♗c3 ♗f6 The idea is to activate the pieces and destroy White's position by playing b5.] **13.♗b3 ♕d6**

14.O-O?! This move is like a "harakiri". White still had the possibility to do castle queenside... [14.♕d2 14...f4 (14...c5!? 15.dxc6 bxc6 16.O-O-O ♗e7∞) 15.O-O-O ♗g5∞]

14...♕xh2+ [14...♗g5 15.f4! The only move to stop the pawns from advancing. 15...exf3 16.♗xf3 ♗e4 17.♗d3 c5!? 18.dxc6 bxc6 19.♕e3 ♗e7 With the idea to play c5 in order to activate the light squared bishop and to limit the knight on b3. Black has compensation for the pawn.; 14...f4 15.♗xe4 ♗g5 16.♗d3 f3 (16...♕f5†) 17.♕xg5 ♕xh2+ 18.♖xh2 ♗xg5 19.♖g1 ♗e5+ (19...♗h4 20.♗d2 ♕g4 21.♗d4 h5 22.♖ae1 fxg2 23.♖xg2 ♗xh3+ 24.♖g1± Xg7) 20.g3 (20.♖h1 20...♗h5 Xh3) 20...♕xh3

21.♗d4! ♗h5 22.♗h4 And without the queens Black's position is worse.]

15.♖xh2 f4 16.♗xe4 ♗g5

17.♗d4??

The decisive mistake! Let's check other options:

[The queen defends the position over the 3rd rank and prevents any sacrifice of the knight on f3. 17. Qd3

17... Qe8! A strong move with the idea to connect the queen to the attack. (17... f3 18. Qxg5 Qxg5 19. Qg1 We already saw this position in the previous line. 19... Qf4 20. gxf3 Qh5 21. Qg3 Qh4 22. f4 Protecting h3 and soon White will get a strong attack. 22... Qxf4 23. Qe1 Qxf2+ 24. Qg1→) 18. Qd4 The knight is going to help. (18. f3 18... Qxh3 19. gxf3 Qh5 With at least a draw.) 18... Qh5 And now Black's idea is to sacrifice on h3. 19. c3 (19. Qd2 19... Qxh3 20. gxf3 Qae8 With the idea to play Re4-Rxd4 or Re3. 21. Qe6 Qf3+ 22. Qg2 Qh4+ 23. Qh1 Qf3=; 19. Qe1 19... Qxh3 20. gxf3 c5 21. dxc6 Qad8↑)

19... Qxh3 20. gxf3 Qae8 21. Qh1 Qe4 22. Qd2 Qh4 23. Qg2 (23. Qaf1 23... Qe3!) 23... f3+ 24. Qf1 Qxh3 25. Qe3 Qg4 26. Qxe4 Qg2+ 27. Qe1 Qxh1+ 28. Qd2 Qxa1 29. Qe6+ Qh7 30. Qxh3 Qxb2+ 31. Qc2 Qxa2∞; 17. Qg6 Objectively this move can be good for white but to play it during the game is almost impossible! 17... Qf5 18. Qh5 Qxc2 (18... Qd6 19. Qd4 f3+ 20. g3 Qxh3 21. Qe1± The black pieces lost coordination...) 19. Qd4 (19. Qd2 19... Qd3 20. Qf1 Qd6 21. f3 Qae8) 19... Qd3 20. Qd1 Qxc4 21. h4 Qe6 21... Qe4 22. Qe6 Qf6 23. Qxf8 Qxf8 24. f3+=]

17... Qf3+! Yes! A simple but nice tactical motif. Black is winning immediately...

18. gxf3 Qh4 19. Qh1 Qxh3 20. Qd2 [20. Qg1 20... Qg5+ 21. Qh2 Qg2#]

20... Qf6 0-1

Editorial Preface

This week there wasn't too much going on either...

In the German Bundesliga, the team of Baden-Baden continues its march and is 4 points ahead of the rest of the field with only 5 rounds to go.

The Chess Festival in Cannes is on the way with Li Chao leading the tournament.

Another big traditional Chess Festival in Capelle-la-Grande is about to start tomorrow.

In 3 days from now the European Individual Championship is also starting in Yerevan and here we can be sure that there are a lot of very interesting games to come!

For our French readers, we can recommend our new book "Les Professionnel" in French language, where most of the best French GMs (Bacrot, Vachier Lagrave, Edouard,...) are answering questions about life, chess and fun.

F.Libiszewski *Les professionnels*

Price: 9.99 €

As usual, we wish you a nice week and a lot of chess fun with us.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Bacrot, Etienne(2730)**
- **Gonda, Laszlo(2535)**

Schachbundesliga 2013/2014(10.2),
2014.02.23

GM Csaba Balogh
Best rating: 2672

Etienne Bacrot won a nice positional game with many deep ideas.

1.d4 d5 2.♘f3 ♘f6 3.c4 c6 4.♘c3 e6 5.♙g5 ♘bd7 The Cambridge Springs variation is becoming more and more popular nowadays. Mamedyarov has started to play it permanently and we might possibly see the development of this opening during the Candidates tournament next month.

6.e3 ♖a5

7.cxd5 7.Bxf6 and 7.Nd2 are the other two huge main lines with thousands of games for both. It is still unclear where White should search for the advantage.

7...♘xd5 8.♙d2 [Kramnik invented the interesting novelty of 8.♖c1 and in 2010 he scored a nice win against Shirov,

but since then Black has already found an adequate way to counter this move. 8...♘xc3 9.bxc3 ♙a3 10.♖c2 b6 followed by Ba6 with similar stories to what will happen in our game. Carlsen had beaten Gelfand with the black pieces in last year's Candidates tournament.]

8...♙b4 9.♖c1 h6 10.♙h4

10...♘xc3 A rare move, but it seems to be a completely sound option. The idea is clear, Black would like to get the same structure as in the 8.Rc1 line. The two most common continuations are [10...b6 with the idea of Ba6. 11.a3 ♙xc3 12.bxc3 c5 Here White has a choice between three moves: 13.c4 (13.♙d3 13...♙a6 14.c4 ♖xd2+ 15.♘xd2 cxd4 16.exd4 ♘f4 17.♙e4 ♖c8 18.♙g3 g5 has been played in several games, but Black seems to be fine here as well.; The most concrete is 13.e4 but Black seems to equalize after 13...♘5f6 14.♙d3 ♙b7 15.d5 c4!) 13...♖xd2+ 14.♘xd2 ♘e7 White should have some edge due to the pair of bishops, but as practice shows Black's chances are not bad at all.; 10...c5 is usually met by 11.a3 ♙xc3 12.bxc3 b6 transposes to the 10...b6 line.]

11.bxc3 ♙a3 12.♖b1 O-O Black could also have started with 12...b6, but White cannot prevent this plan anyway.

13.♙d3 b6 14.O-O

14...♙a6 After the trade of the bishops Black seems to be alright. White has the better center, but Black stands without any weaknesses and he is ready to create his counterplay after placing the rooks on e8 and c8 with c5 or sometimes e5.

15.♖fd1 It is unclear whether this rook should stand on d1 or on e1. Both have its plusses. With the rook on e1, White can sometimes launch an attack with e4-e5 and Re4-g4, while now White intends to counter the c5 idea with d5. [If White avoids the trade of the bishops with 15.c4 the trade of the queens eases Black's position. 15...♙xd2 16.♗xd2 does not change the character of the position. Black tries to execute the same ideas. 16...♖fe8= followed by Rac8 and e5 or c5.]

15...♖fe8 Since Black is familiar with the plans, he has a very easy task at this part of the game.

16.♙xa6 ♙xa6 17.♙c2 With the idea to advance in the center with c4! In this case the c5 move could always be met by d5. This is the first moment when Black has to solve a positional problem.

17...♙e7!? The most natural move to trade the bishops. It was clearly misplaced on a3 because the c5 break could not be executed properly as after d5 the bishop remains out of the game. [The alternative was 17...b5! A slightly committing move, but it also looks decent to create a blockade on the c4 square. Black can continue his plan with Rac8 and c5.

The game could follow up with 18.♙g3 ♖ac8 19.♙e2 Trying to delay the c5 break a bit, but Black can improve his position with 19...♗b6 20.e4 ♗a4 21.♖b3 ♙f8 and the c3 pawn is very weak. Black pushes c5 next.]

18.♙g3 White would like to keep all the advantages of his position. His bishop is superior to the one on e7 because it controls many important squares along the h2-b8 diagonal, but it gives time for Black to play c5 before he could prepare to that with c4. [The alternative was 18.♙xe7 18...♖xe7 19.c4 both c5 and e5 could now be met by d5. White might claim a slight edge, but of course the position remains completely playable for both sides. Still, I believe 17...b5 was better than this.]

18...c5! Very good timing! Otherwise White plays c4 and after c5 d5 he can take back with the pawn. Bacrot obviously expected this move, but he had a very deep idea in mind before he played Bg3.

19.d5! Otherwise after cxd4 and Rac8 Black is completely fine.

19...exd5 20.c4! This was the tactical point of White! If he manages to play cxd5, he achieves the same as if he had time to play c4. However Black also has his resources.

20...d4! Excellent counterplay.

21.exd4 ♘f6? But this is a big positional mistake, allowing White to create a protected passed pawn and obtain an advantage. [Obviously Gonda knew that the right positional move is 21...cxd4! but after 22.♗xd4 it looks a bit dangerous. There are some tactical ideas, the d7 knight is in the x-ray and Nb5 is threatening with the very unpleasant Nc7 triple fork. However Black has an ideal response: 22...♗c5 (The simple and more human 22...♖b7 23.♗b5 ♖ac8= also seems to be fine.) 23.♗b5

23...♖a4! Solving the problem tactically. If the tension goes down, Black will have excellent chances due to his better pawn structure. 24.♖xa4 ♗xa4 25.♗c7 ♗c3 is the point and Black is OK!]

22.d5+ = Now White has achieved what he wanted. The d5 pawn is going to be a long-term problem for Black.

22...♖e7 23.♗d6! Preventing the doubling of the rooks.

23...♖ee8 24.♗c7!? A positional trick move, which proves to be successful.

24...♖b7 The queen stands badly on b7 for two reasons. First of all it allows White to play Qa4-c6 and it also stands in the motif in the event of activating the knight with Nd2-e4 (heading to d6). [24...♖ac8 should have been played. White wanted to retreat with 25.♗f4 and on (25.d6? is a positional

mistake to lock the bishop out from the game. Black could simply go around it with 25...♖e6) 25...♖e7 26.♖e1 ♖ce8 27.♖xe7 ♖xe7 28.a4+= followed by opening the back rank with h3. White has a long-term advantage due to the d5 pawn.]

25.♗g3 ♗e5 [Black should have gone back to 25...♖a6+= but positionally it is already a difficult move, since we had the same position after 22.d5, but it was Black to move.]

26.♗d2! It is very important to keep the minor pieces on the board. In the rook endgame the advantage might easily disappear, but now the knight is going to e4, threatening on f6 and d6!

26...♖d7 27.♗e4 ♗g6 Black decided to allow the weakening of the kingside. [27...♗d8 was too ugly to consider it seriously. White is better anyway after let's say 28.a4 then h3, opening the back rank. White now has time for everything.]

28.♗xf6+ gxf6 Bacrot had foreseen that his opponent wants to get his bishop out from the game with f5-f4 and he prepared a very deep trap...

29.h4?! [It would have been much stronger to play 29.a4! 29...f5 30.f3 f4 31.♗f2± and a5 next move. White can trade a pair of rook with Re1 and later he transfers his bishop to c3. White has a big positional advantage.]

29...f5? Falling into the trap. [29...♖g4! could have suddenly

given Black good counterplay. He probably did not want to leave the blockade of the d-pawn, but 30.d6 ♖ad8 is not clear at all.]

30.h5 f4

31.♖b3!! This brilliant move was so shocking that Black, maybe slightly prematurely, resigned. [31.♖b3 The game could have continued with 31...fxg3 32.♖xg3 ♔g7 33.hxg6 f6 Black needs to keep the g-file closed. White is a pawn up and he has a winning position, but some further technique would still have been required. White could play 34.♔d2+- with the idea to trade rooks with Re1. All pawn endgames are winning due to the d5 protected passed pawn. We can be sure that Bacrot would have easily converted the advantage, but still the game could have lasted a bit longer.; On 31.♗h2 31...♘h4 32.♗xf4 ♔g4 33.♗g3 ♘f5 was in Black's mind with counterplay.; 31.hxg6 31...fxg3 32.fxg3 fxg6 33.♔xg6+ ♔g7 White has an extra pawn, but the win is far from obvious because the doubled g-pawns don't have full value.] **1-0**

**(2) Nisipeanu, Liviu-Dieter(2674)
- Kolbus, Dietmar(2302)**

Schachbundesliga 2013/2014(10.6),
2014.02.23

GM Csaba Balogh
Best rating: 2672

An amazing game where the experienced International Master who leads the black pieces employs a shocking plan in the middle game, allowing Nisipeanu to conclude the game in style.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 ♘c6 So far nothing extraordinary has happened. We are at the initial position of the Classical Sicilian variation, where instead of the main line 6. Bg5 (Rauzer variation), White chooses the very sharp Sozin variation...

6.♗c4 ♗d7!? A rather new direction. Black would like to play a Dragon-like game with g6-Bg7. [6...g6 immediately is considered to be a mistake because of the following tactical trick: 7.♘xc6! bxc6 8.e5! and 8...dxe5?? blunders the queen after 9.♗xf7+!+-; 6...e6 is the main move.]

7.♗b3 ♘a5 It is very logical to take the pair of bishops, but it costs too much time. Black should have first focused on developing his pieces. [7...g6 is the right move to follow the original plan. White's main choice is 8.f3 and here Black can

choose between two moves: 8...♗g7 (8...♘xd4!? is perhaps the strongest. 9.♖xd4 ♗g7 10.♗e3 O-O 11.♖d2 b5 With a typical Dragon-type position with mutual chances.) 9.♗e3 O-O 10.♖d2 transposes exactly to the Dragon!]

8.♗g5! Actively developing the pieces could be the only refutation of Black's opening handling.

8...♘b3?! [It was clearly better to not hurry with the capture, but to play 8...e6! and in this case White cannot make use of the opened a-file.]

9.axb3 Of course White takes towards the center and at the same time opens the file for his rook.

9...♘g8? This and the next move are something one should not even consider for a moment. I don't think it requires any explanation as to why this move is bad. [Black was probably afraid of the line 9...e6 10.♗xf6! and he has no good recapture in view of 10...♖xf6 (10...gxf6 11.♖h5± is more than dangerous. White castles queenside and launches a decisive attack with f4-f5.) 11.♘db5! attacking both the a7 and d6 pawns. This is the reason why Black should not have taken on b3... 11...♗xb5 12.♘xb5±; Maybe Black should have played some move like 9...a6 10.♗xf6 (10.f4 also looks good.) 10...gxf6 11.♖h5 White is better anyway, but still anything is better than retreating a developed piece to its initial position.]

10. ♖f5 Nisipeanu immediately tries to punish his opponent for his passive play. He creates the threat of Nxd6. Bxf5 exf5 would further squeeze Black's position. Afterwards it would be even more difficult to finish the development.

10...f6? Another terrible-looking move. Black cannot hold with such a damage on the pawn structure and it also makes it even harder to finish the development of the kingside pieces. [Again any other move should have been preferred. The most natural one is 10...♗c6 preventing the Nxd6 threat and preparing to send away the bishop with h6. 11.O-O (The move would also have set a small trap. If White attacks two pawns at once with 11. ♖d4 11...e5! saves Black!) 11...h6 12.♗f4 White is better of course, but the game goes on.]

11. ♗e3 ♖b8 A third passive move in a row, but at least this one has its logic. The a7 pawn had to be protected and Black would like to kick out the f5 knight with e6 but he protected the d6 pawn first. But of course it is easy to feel that it will end up badly for Black.

12.O-O e6 Temporarily pushing back the pieces, but Black still needs plenty of moves to develop the kingside.

13. ♖d4 ♖e7 Black can only use the e7 square for developing the pieces, but it means that he loses further tempi to evacuate this square for the other minor piece.

14.f4! There is no time to waste. White plans to open the central lines in front of the king.

14...a6 Another waste of tempo, but we can already consider the position to be objectively hopeless. [14...♖c6 would have been met by the same as the game: 15.f5! ♖xd4 16.♗h5+!+- forcing the king to move.]

15.f5! Working out the e6 and d5 squares for the knights! This f4-f5 is the standard idea of the Bc4 systems, but of course here the circumstances to fulfill this plan are excellent.

15...e5 16. ♗h5+! Taking away the right to castle. The end is near.

16...♗d8 [16...g6 17.fxg6 ♖xg6 is also over. White wins for instance after 18.♖d5 exd4 19.♖xf6+ ♗d8 20.♗xd4 There are too many threats in the air, even such ones as Qa5, but of course there is nothing against the simple Nxd7 and Bxh8 either.]

17. ♖e6+ ♗xe6 [17...♖c8 18.♗f7+- Black is totally paralyzed.]

18.fxe6 g6 [18...♗c7 loses in many different ways, one of them being 19.♖b5 ♗c6 20.♖xd6!+-; 18...♖c7 19.♗f7+- followed by Nd5 is also over.]

19. ♗h4 ♗g7 20. ♖xf6! The most direct finish of the game. With such superior piece, there is not much to calculate if the exchange is worth its value. Black collapses.

20...♙xf6 21.♖xf6 ♖e8

22.♙b6+ [Black resigned in view of 22.♙b6+ 22...♖c8 23.♖f7 And mate in few moves... Poor black pieces, but this is a good example that developing the pieces in the opening is very important, otherwise the punishment might be this painful if we face such a strong attacking player like Nisipeanu.] **1-0**

(3) **Bobras, Piotr(2518)**
- **Anand, Viswanathan(2775)**

Schachbundesliga 2013/2014(10.1),
2014.02.23

GM Arkadij Naiditsch
Best rating: 2737

It is never easy to beat a Grandmaster who wants to make a draw with White, even if you are an ex World Champion. Clearly, in case of a match of 4 games the outcome would be easy to guess, but at a one game at 10 in the morning anything might happen!

1.e4 c5 Judging from Anand's latest games, 1...e5 is his main move.

2.♘f3 e6 And of course the Paulsen is a choice for a fighting game. For so many years Anand was the biggest expert on the Najdorf, but the fear of 2...d6 3.Bb5 probably made the ex World Champion choose the Paulsen, where the game quickly gets out of theory.

3.d4 cxd4 4.♘xd4 a6 5.♙d3 [5.♘c3 is the other main move.]

5...♙c5 For people who don't play the Sicilian this move might look strange, but in fact it is very logical. Before developing the bishop on e7 or a7, Black is chasing the white knight from d4 which leads to a win of half a tempo. The knight is clearly better placed on d4 than on b3.

6.♘b3 ♙a7 A rather rare line. [6...♙e7 7.♖g4 g6 8.♖e2 would lead us to the main position of the line.]

7.♔e2 [A slightly more popular setup for White is 7.O-O 7...♘c6 8.c4 ♘f6 9.♘c3 d6 10.♔h1 with the idea of playing f4 next.]

7...d6 This move is needed anyway.

8.♙e3 ♘c6 Taking on e3 doesn't make much sense as the black rook is often taking a quite good position on a7 because of b5-Rd7-Bb7 ideas.

9.♙xa7 Once again White chooses the most solid plan. Nc3 followed by O-O-O would have led to a much more complicated position.

9...♖xa7 10.♔e3 White is not playing for an advantage, but just trying to be solid. A very good strategy against a much stronger opponent.

10...♘f6 11.O-O White is also quite tricky here and doesn't hurry with developing the knight from b1, keeping both options of playing Nc3 or N1d2 in mind.

11...O-O A solid move. [Maybe Black could have tried to bring the game onto sharper territory by playing 11...b5 12.a4 White needs to act against Black's pawn structure: 12...b4 And this position is a bit more unbalanced.]

12.c4 And again White is not trying to play for "anything".

12...e5?! This can't be the right way to go on... [Anand probably didn't want to play 12...d5 because of 13.exd5 exd5 14.cxd5 ♘xd5 15.♔g3 and the position is very close to a draw, but I still think he would have had better chances than in the game here.; another way to go on could be 12...♖e8 with the idea of playing next d5]

13.♘c3 Now White's position just looks more pleasant.

13...♙e6 Black has to reactivate the rook.

14.♖fd1 Bobras continues playing solid-safe moves, not even pretending to try and achieve an advantage. [14.♖ac1 followed by Nd5 next could have been an attempt to get the upper hand.]

14...♖a8 15.♙e2 White wants to double on the d-file.

15...♖c8 In a slightly worse position with no clear play, even such great players like Anand can't do much...

16.♖d2 And Bobras continues with his safe and logical moves.

16...♔c7 17.♖ad1 ♖fd8 Black of course managed to defend the d6 pawn, but he is still a bit worse.

18.♘d5 This move is basically fixing the draw for White and this is clearly what Bobras was trying to reach. [18.f3 would keep the game alive with a small edge for White because of the better pawn structure.]

18...♙xd5 This move is forced.

19.cxd5 ♘e7 The black knight doesn't have a better square...

20.♖c1 White is winning control back over the c-file.

20...♔d7 21.♖dc2 Bobras doesn't even leave Anand the smallest hope and by those exchanges on the c-file the game is slowly coming to a peaceful end...

21...♖xc2

22.♖xc2 ♖c8 23.♖xc8+ Many hobby players are often shouting: "How can somebody over 2750 make a quick draw against a 2520 GM", but in fact we all play with the same pieces and yes, lower rated GMs are weaker than the Top 10 players in some areas, but the difference is not that big and simple positions can be handled almost at the same level even by a player who is over 250 ELO points lower. **1/2-1/2**

(4) Mista, Aleksander(2584) - Balogh, Csaba(2654)

Schachbundesliga 2013/2014(9.2),
2014.02.22

GM Arkadij Naiditsch
Best rating: 2737

Mista is a very dangerous attacking player and in this game he also tried to simply outrun the defence lines of your weekly commentator. But as a true Hungarian player, Csaba is very solid and good in defence, which makes him very hard to beat. In the game we are going to watch White sacrificed, Csaba took, White tried to be creative, but again Csaba was careful and ended up being a full piece up.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 A solid opening for a solid player. Csaba has already been playing the Berlin for many years and he shows very good results in it.

4.d3 This is probably the most fashionable move lately, because Carlsen plays it too.

4...♙c5 5.c3 This is also one of the main lines. The idea is simply to avoid Nd4 next. [Probably the main move so far was 5.♙xc6 5...dxc6 and now White has a wide range of choices like 6.h3, 6.O-O, 6.Nc3, 6.Be3 and some more.; After 5.O-O 5...♘d4 6.♘xd4 ♙xd4 the position is close to equal according to the current theory.]

5...O-O 6.O-O ♖e8 The funny thing is that Csaba scored 2 wins with this position in the current Bundesliga, one with White over Rene Stern and the one we are watching now. A true expert of the Anti-Berlin! :)

7.♖e1 [Maybe 7.b4 7...♙b6 8.♙c4 d6 9.a4 a6 10.♚b3 ♙e6 11.♙xe6 fxe6 12.a5 ♙a7 13.♙e3 ♙xe3 14.fxe3 is the right way to fight for an advantage?! Balogh-Stern, Bundesliga 2014]

7...a6 The idea of the line with 6...Re8 is not to hurry with the d6 move, because in a good moment Black might save a tempo and play d7-d5 at once.

8.♙a4 [After a move like 8.♙xc6 8...dxc6 White's position can never be better because of the weak pawn on d3 and a move like d4 can usually only bring an advantage to Black.]

8...b5 9.♙b3 Another option is to play 9.Bc2, but usually White's bishop is better placed on b3.

9...♙b6 Once again Black does not hurry with the d6 move but maybe it was already time to play it and Mista finds the right plan to make use of this. [9...d6 is the main continuation and has already often been played often on the top level.]

10.a4! Mista chooses what is probably the best plan against Csaba's Berlin. The black b5 pawn is a little weakness now.

10...♙b7 11.♙g5 I think this move might be a bit premature. [An interesting option for White could have been 11.♘a3!? White doesn't attack b5 directly, but now a move like Bg5 could already be a threat. 11...d6 (After a waiting move

like 11...h6 12.♙d2 would put Black into quite an unpleasant situation as axb5 is now a threat and it is hard for Black to find a good way of defending the b5 pawn.; 11...d5 is probably not the best option either. 12.exd5 ♘a5 (12...♙xd5

13.♙g5! A very strong "zwischenzug"! 13...f6 14.♙d2 and White should be better.) 13.♙c2 ♚xd5 14.b4 ♘c6 And once again after the unpleasant 15.♙g5 White is better.) 12.♙g5 b4 Playing this move is not so nice, but what else to do?! 13.♘c4 bxc3 14.bxc3 ♙c5 I think White should be better here, maybe not much but a small and stable plus.]

11...h6 To include h6 is always a good idea.

12.♙h4 d6 Black does not hurry with the g5 move as it has time, but maybe right now the d6 move was not the best option either. [12...♘a5!? 13.♙c2 c5 would have been an interesting option for Black, to have Bc6 after Na3.]

13.♙d5? White clearly miscalculates his chances. [13.♘a3! would again have caused quite some problems to Black. 13...b4 (After 13...g5 14.♘xg5 (14.♙g3 leads to unclear play because of the misplaced bishop on g3.) 14...hxg5 15.♙xg5 ♙g7 it seems like Black doesn't have anything better than Kg7. 16.axb5 axb5 17.♚f3 ♚h8 18.♘xb5 ♚xa1

19. ♖xa1 White has 3 pawns for the piece and quite an unpleasant pin with the bishop on g5. I think White should be clearly better here.) 14. ♘c4 bxc3 15. bxc3 ♙a7 16. ♘e3 And once again White should be the one who dominates the game.]

13...g5! Csaba evaluates the complications totally correctly.

14. ♘xg5 There is no way back for White as after 14. Bg3 Nxd5 his position would be horrible.

14...♘xd5 15. exd5 [15. ♘f3 15...♘f6 and Black is just a piece up.]

15...hxg5

16. ♙g4?! This move is already losing a piece. [16. dxc6 was probably better and after 16...♙xc6 17. ♙g4 f6 Black is of course much better as he has the bishop pair and a great

pawn structure, but maybe White could defend a bit more tenaciously here.]

16...♙c8! Maybe this is the move that Mista missed. Black is forcing the white queen to take away the last square of the h4 bishop.

17. ♙g3 f6 Such a move is too easy to miss for Csaba. The white bishop on h4 is lost now.

18. dxc6 ♙f7 Black is just a piece up and the great bishop on b6 even gives Black some attacking chances on the kingside. The game is basically over.

19. ♙xg5 ♙g8 Csabas continues playing the most precise moves. After 19...fxg5 20. axb5 White would at least have some little compensation.

20. h4 White has no choice, as allowing Black to play Rxc5 is not an option.

20...fxg5 21. h5 ♙f6 Black is threatening with the very unpleasant Qf4 next.

22. d4 [After 22. axb5 22...♙f4! 23. ♙xf4+ gxf4 White can just resign.]

22...♙f4 23. ♙d3

23...♙f5 Csaba develops his last piece with tempo.

24. ♔d1 exd4 The game is totally over but White decides to check Black's conversion powers.

25. ♔b3+ ♚f6 The king is taking a very safe position on f6.

26. g3 ♔f3 **27.** ♖d2 ♔xh5 Cool and strong. Now Black is already threatening to mate by playing Rh8 next.

28. ♗e4+ ♚g6 **29.** ♗xd6 cxd6 Thank you for the piece.

30. ♔d5 ♖af8 This was a very interesting opening and White probably twice missed the Na3 idea after which Black would have to solve quite some difficult problems. **0-1**

Endgame section

(15) Anand, V.(2775)
- Ragger, M.(2668)

Schachbundesliga 2013/2014,
2014.02.22

GM Csaba Balogh
Best rating: 2672

White is materially ahead, but Black is about to build up a successful fortress. The former world champion tries his best chance.

49.h5! White is going to win the bishop with the help of the h-pawn. The pawn cannot be taken because of Qg4+.

49...Bxd5! Ragger is ready to give up his bishop and he eliminates the last pawn. There are many theoretical endgames where the weaker side is able to create a successful blockade with a rook and a pawn against the queen.

50.h6 Black cannot parry the h7 threat. A known defensive method with the f7 pawn is to keep the rook on the 6th rank, cutting the king away from getting access to the f7 pawn... Black uses this idea and drives his rook to g6.

50...Rg5+ 51.Kf3 Rg6! 52.h7+ Kxh7 53.Qxf8 We have reached a much better version to the theoretical drawn

endgame, where the black king stands on g7. Black does not even need his d-pawn in this case. We are going to examine this in the 55.Qxd6 line. However the queen stands excellently on f8, which forces Black to defend accurately to save the game.

53...Rf6+ 54.Kg4 The winning technique of such queen vs rook and pawn endgames is to drive the king behind the pawn so Anand starts his journey to e7. [54.Kg4 goes into the wrong direction. 54...d5 55.Kg5 Rf1 The white king should be on the other side of the f-file, here he cannot make progress.]

54...Rf1 55.Kd5! The d-pawn is going to be lost anyway, so for White it is more important to keep his queen on f8 to avoid Black to organize his defensive setup. [55.Qxd6 illustrates well the famous theoretical endgame: 55...Kg7 56.Kg5 Rf1+ 57.Kf5 Re6=]

It is very useful to remember this position. Here Black only

waits with Re6-g6 and White has no chance to break through this fortress.]

55...♖f5+ The d-pawn is lost anyway, there is no point to waste further efforts on defending it. Black must only focus on keeping his f7 pawn. [55...♖f6 56.♔c6 d5+ (Stubbornly defending both pawns with 56...♔g6? is a big mistake. This allows White to force the king in front of the pawns. This is usually a bad sign for the defensive side. 57.♕g8+ ♔f5 58.♔d5 ♔f4 59.♕g1 Black always ends up in different kinds of zugzwangs. 59...♔f5 60.♕g7+- Black loses the f7 pawn and the game!) 57.♔xd5 will lead to the same as in the game.]

56.♔xd6 [A tricky attempt could have been to keep the d-pawn on the board with the idea to avoid Black's stalemate ideas. 56.♔c6!? 56...♖f6 57.♔d7 Here the only move to hold the draw is

57...♖g6!! Black is ready to advance his d-pawn. The pawn on f7 cannot be taken now because of Rg7. Ke8 runs into Rg8 and after (57...d5? 58.♔e8+- and the king goes to f8, squeezes the king out from h7.) 58.♔e7 ♖g8!! traps the queen! This is the only way to save the game. 59.♕xf7+ ♖g7=]

56...♖f6+ 57.♔d7 Anand tries to put his opponent into zugzwang. [57.♔e7 would allow 57...♖e6+ 58.♔xf7 (58.♔d7 58...♖f6=)

58...♖f6+!! This important stalemate trick is a key resource in Black's successful defence.]

57...♖f5? The losing move. [57...♖g6! was the only move to save the game. The king has passed the 6th rank, therefore Black needs to use another defensive method. Ke7 is always met by the stalemate Re6 Kxf7 Rf6! The king can never go to the 8th rank because of Rg8. And if the queen moves Kg7 followed by Re6 leads to the theoretical draw that we have already discussed. The question is what happens if it was Black's turn. 58.♔c7 ♖g5 59.♔d6 ♖g6+ 60.♔d7 In this case Black waits with Rg5-g6!! (60.♔e5 will transpose to the 60.Kd7 line. 60...♖e6+ 61.♔f5 ♖f6+ 62.♔g5 ♖g6+ 63.♔h5 ♖f6=)

Kg7 and rook on the 6th rank is a common practical drawn endgame (the same idea works also with the pawn on any other squares on the 7th rank), but as we have seen the game is still drawn even if the white king has passed the 6th rank or if the queen stands on f8, although this requires very precise defence! **1-0**

60...♖g5! and White cannot make progress. 61.♔e7 ♜e5+ (Or 61...♖g8! is even simpler.) 62.♕f6 ♜e6+! 63.♕f5 (63.♕xf7 63...♜f6+!= is always the same!) 63...♜f6+! The stalemate works also with the pawn on f7! 64.♕g5 ♜g6+ 65.♕h5 ♜f6= Black holds!]

58.♜d6! The king now reaches the f8 square, the game is over.

58...♜g5 [58...♕g7 59.♕e8+- does not change anything.]

59.♜f4 [59.♕e7+- was also winning easily.]

59...♕g6 60.♕e7 ♜f5 [The movement of the pawn always means the end of the game. White soon wins after 60...f5 61.♕e6 ♜h5 62.♜b8+-]

61.♜g4+ ♜g5 62.♜e4+ ♜f5 Anand uses the standard winning method, putting Black into zugzwang each move. [62...♕g7 63.♜f4+- wins the pawn.]

63.♜d3 Any other moves are also winning. Anand slowly goes behind the pawn and Black will end up in a final zugzwang soon. [63.♜g2+ 63...♜g5 64.♜c6+- also wins the f-pawn since Kg7 Qf6 is over.]

63...♕g5 64.♜g3+ ♕h5 65.♕e8 ♕h6 66.♜g4 ♜f6 67.♕f8 Black resigned! An instructive endgame about the defensive and winning methods for both sides. What I can say from my own experience is that the position with the pawn on f7,

(16) **Seger, Ruediger(2374)**
- **Shirov, Alexei(2685)**

Schachbundesliga 2013/2014(10.5),
2014.02.23

GM Arkadij Naiditsch
Best rating: 2737

Shirov managed to slowly outplay his weaker opponent and got excellent winning chances. 2 knights are extremely strong pieces in the attack and White's pawn structure is far from perfect. If White could exchange a rook this would help the defence a lot, but this is only a dream. Shirov demonstrates very nice technique, leaving White no hopes for survival.

45. ♖c4 g5! An excellent move. Nf4 is always going to be a threat now.

46. ♖dc3 Other moves wouldn't save White either. Black's idea is simple and unstoppable: to bring the knight from c7 to f4. It could also happen over Ne8-Nf6 with the threat of Nf4 next.

46... ♞d5 The black knights are entering White's position.

47. ♖c2 At least White is winning control over the 2nd rank.

47... ♖xb3 48. ♖f2 White can't do anything but to keep on waiting.

48... ♞ef4 A good idea. Shirov already has a tactical finish in mind.

49. ♖d4

49... ♞e3! And this is the key. Black wants to play Nxe2.

50. g3 [After a waiting move like 50. ♖a4 Black has a forced win after 50... ♞exg2! 51. ♖xg2 ♖xh3+ 52. ♔g1 ♞xg2 53. ♔xg2 ♖h4 With an easily winning rook endgame.]

50... ♞d3 Now Black is already winning by force:

51. ♖f3 [After 51. ♖e2 51... ♞f1+! the game would be over as well: 52. ♔g2

52... ♞xg3 Too easy to miss... 53. ♔xg3 ♞f4+ 54. ♔f2 ♞xe2 55. ♔xe2 ♖xh3 And once again Black has reached an easily winning rook endgame.]

51...♖b2+ 52.♔g1

52...♖g2+ White resigned because of 53.Kh1 Nf2. It is better not to joke with a pair of knights in the attack! :) 0-1

Clash of the Titans

(17) Larsen, Bent
- Tal, Mihail [E99]

Candidates m 3rd place(5),
1969

GM Kamil Miton
Best rating: 2655

1.♘f3 ♘f6 2.c4 g6 3.♘c3 ♗g7 4.e4 d6 5.d4 O-O 6.♗e2 e5
7.O-O ♘c6 8.d5 ♘e7 We have the Classical variation of the
King's Indian Defence.

9.♘e1 This move leads to very complex lines. The idea is put
the knight on d3 to support the pressure on queen side. An
alternative for White is [9.b4]

9...♘d7 Of course Black is preparing the thematic plan with
f5 and putting pressure on the kingside.

10.♘d3 f5 11.♗d2 [11.f3 usually only leads to a change in
move order.]

11...♘f6 [11...f4? 12.♗g4 And usually after the exchange of the
light squared bishops the strength of Black's pressure should
be much weaker.; 11...fxe4 12.♘xe4 ♘f5 13.f3 With the idea

Nf2-Bd3, with good control over the important e4 square. 13...♗h6 seems to be logical to exchange the bad bishop but Black is not in time: 14.♗xh6 ♖xh6 15.♔d2 ♜f5 16.f4!↑With a strong initiative.]

12.f3 f4 13.c5 g5 14.♖c1 ♜g6 Very logical play, both sides improve their pieces according to the plans.

15.♜b5 [15.cxd6 15...cxd6

16.♜f2 h5 17.h3 White prevents the main break with g4. 17...♖f7↪With the typical idea Bf8 which protects the d6 pawn and then the rook can go to g7, from where it supports the g4 break and controls the c7 square.]

15...♖f7 16.cxd6 cxd6 17.♔c2 With the idea Nc7-Ne6.

17...g4 This is what we call "who first". Tal does not care about White's threats and concentrates only on attacking the white

king. He could have played [17...♜e8 with the idea to avoid Nc7 but those moves are not in Tal style. Now White probably has to build a thematic setup (Nf2-h3) and then try to create some initiative over the c-file.]

18.♜c7 gxf3 19.gxf3 [19.♗xf3 19...♖b8 20.♜e6 ♗xe6 21.dxe6 ♖e7 22.♜b4 ♖xe6

23.♗e1!↑With the idea not to allow Nh4 and transfer the bishop to the better f2 square. White has good compensation thanks to the bishop pair and the weak light squares.]

19...♗h3! Black doesn't lose any time once again! [19...♖b8?! 20.♗h1! ♗h3 21.♜e6 ♖b6 22.♖g1± white avoid attack and put knight on e6,]

20.♜xa8 [20.♜e6!? 20...♖b6+ 21.♗h1 (21.♖f2) 21...♗xf1 22.♗xf1 ♜f8 With an unclear position.]

20...Nxe4! 21.fxe4 [21.Kh1? 21...Ng3+! 22.hxg3 fxg3 23.Rg1 Kh4 With a crushing attack.]

21...Kg5+ 22.Kf2

22...Kg2?? This is already too much, objectively Black should have taken a draw after [22...Kh4+ 23.Kg1 Kg5=]

23.Ke1 Nh4

24.Be3?? White should have consolidated his position by playing [24.Nf2! Now if Black plays f3 then White can simply move the bishop over the f1-a6 diagonal and protect the rook on f1 and it looks like Black's attack is very artificial... 24...Nf3+ (24...f3 25.Be3+-; 24...Kxh2 25.Rh1+-) 25.Kd1 (25.Bxf3?? 25...Kxf1#) 25...Nd4 26.Rc3 f3 27.Be3 Ne2 28.Bxe2 fxe2+ 29.Kxe2 Kg4+ 30.Ke1+-]

24...Kxe4! [24...fxe3 25.Rxf7 Kxf7 26.Bh5+!+- And after the queens exchange White should easily win and this was probably the idea behind 24.Be3.; 24...f3 25.Rf2+-]

25.Be2

25...f3→ [25...Ng2+ 26.Kd2 f3 27.Bd1 Bh6+ 28.Kc3 Kxd5 Black also has a huge attack here as the white pieces are very badly coordinated.]

26.Bxh4 Kxh4+ [26...Bxf1? 27.Nf2!±]

27.Nf2 [27.Rf2 27...e4→ Too many white pieces are hanging...]

27...fxe2 28.Kxe2

28...e4! A strong move which doesn't require any special calculations. In blitz games top players play moves like this in a second. [28...♙xf1 might be good too but in this position the bishop is not worse than the rook. 29.♖xf1 ♜xh2 30.♖c8+ ♙f8 31.♜g4+ ♖h8 32.♜g2∞]

29.♖g1 Other moves also lead to complex positions: [29.♖c7 29...♙xf1 30.♖xf1 ♜f5 31.♖c8+ ♖f7 32.♖c7+ ♖g6↑XNa8;XKf1; 29.♖c4 29...♙xf1 30.♜xf1 (30.♖xf1 30...♖f8! A strong prophylactic move against the check on c8. 31.♘c7 ♜xh2 32.♙e1 ♜g1+ 33.♜f1 ♜xf1+ 34.♖xf1 e3⊕) 30...♜xh2 31.♖c8+ (31.♖xe4

doesn't work because of 31...♖xf2! 32.♜xf2 ♜h1+—) 31...♙f8 32.♖e8∞]

29...e3 Now comes a forced sequence:

30.♜xe3 ♖e7 31.♖xg7+ ♖xg7 32.♖c7 ♙d7 33.♖xd7 ♖xd7
After a few only moves we get this position where Black should of course be better (because of the bad knight on a8) but needs to play very accurately.

34.♜xa7? White immediately makes a decisive mistake. The idea to win the pawn to make way to escape with knight via b6 is bad because the white queen doesn't protect the king anymore. The correct move was [34.♜c3+ 34...♖g8 (34...♜f6 35.♘e4 ♜xc3+ 36.♘xc3 ♖f6 37.♘b5 a6 38.♘c3 Xb6 38...b5 39.♘b6 ♖b7 40.♘c8 ♖e5 41.♘d2 With drawing chances because White is close to get coordination.) 35.♜g3+ (35.♘c7 35...♖f7 36.♜c2 ♜xh2—+ XKe1) 35...♜xg3 36.hxg3 White wants come to the center with the king and wait for the right moment to escape with the knight. This interesting position is not easy to evaluate...]

34...♖e7+! —+ 35.♖d1 [35.♖f1 35...♜c4+ 36.♖g2 ♜xd5+ 37.♖f1 ♜e5 38.♖g2 ♖h8→XKg2]

35...♜c4 And Black is easily winning because the white pieces are badly placed.

36.♜b6 ♜f1+ 37.♖d2 ♖e2+ 38.♖c3 ♜c1+ 39.♖d4 ♜e3+ 40.♖c4 ♖c2+0-1

Editorial Preface

The European Championship is on its way and we see a lot of great and fighting games each day. One special jewel of the tournament, the game Shimanov-Jobava, is commented for you in this issue of the CEWN!

After 6 rounds Motylev is leading with the amazing score of 5.5/6, followed by Wojtaszek, Melkumyan and Laznicka-all with 5/6. But there are still 5 rounds to go and a lot can happen.

The Open in Capelle-la-Grande is also under way and we have a huge tie in the lead, with a few more rounds to go.

In the Reykjavik Open 6 rounds have been played and L'Ami, Van Kampen and Amin are leading with 5.5/6.

We want to apologize that this issue of the CEWN got a little bit delayed, but both your commentators are playing, Csaba in the European Championship and Arkadij in Reykjavik Open.

We hope you enjoy your weekly chess program with us! :)

Arkadij Naiditsch & Csaba Balogh

GM Arkadij Naiditsch
Best rating: 2737

We will see a nice fighting win of the young Polish GM against Khismatullin in the Najdorf, with a nice sacrifice for the initiative and later on a beautiful mating attack! Enjoy!

1.e4 Khismatullin's main move is 1.d4, but maybe he did not take the game too seriously, or maybe he wanted to play a very sharp Najdorf. However it is clear that something will go very wrong...

1...c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 a6 So another game on the Najdorf, Duda's main opening.

6.h3 Not the main move, but quite a tricky one. I liked to play this move as well. The idea is to play g4 and then f4 immediately, sort of saving a tempo on playing the usual f3-g4 where often later f4 is a good move.

6...e5 Duda is a real Najdorf player, as after 6...e6 7.g4 we would be back in the Sheveningen.

7.♗b3 [Another often played line is 7.♗de2 7...h5]

7...♙e6 8.f4 Khismatullin starts the complications.

8...♘bd7

9.g4 Very logical but risky. [Probably not the best is to play 9.f5 which is quite tempting for White, because it wins the light squared bishop. 9...♙xb3 10.axb3 ♖c8! Blacks wants to play Rxc3 and Nxe4, with big compensation. 11.♙f3 d5! With a very complicated position.]

9...b5 Giving Black the possibility of playing Bc4 as well as the b4 push at any moment.

10.♙g2 White wants to castle kingside and bring his king out of the center.

10...♗b6 Another very typical move in the Najdorf. Black prepares against the g5 move to have Nfd7 and he also gains more control over the d5 square.

11.g5 [After 11.O-O 11...♙e7 the position would remain very unclear.]

11...♗fd7 12.f5 White is trying to control the center, but such a move is always very tricky. The white king will now remain in the center and play can be very fast with a d5 push or b4, after which White's position could fall apart like a card house.

12...♙c4 13.♗a5 A logical move. It is very important for White to win the light squared bishop.

13...♖c8

14.♔d2?! Creative play, but such a move just cannot be good!
[14.♘xc4 14...♖xc4 15.a3 With a very unclear position.]

14...b4! A good choice. Black not only pushed the white knight to d1, but he also escaped with his bishop from the exchange.

15.♘d1 ♕b5 And now the knight on a5 is clearly misplaced.

16.a3 White at least tries to exchange the b-pawn to be able to play the knight back to c3.

16...d5! This is the way to play Najdorf, there is no time to waste. Duda is starting to crush White's position.

17.exd5 [After 17.axb4 17...dxe4 18.♕xe4 Black has the very strong 18...♘c4! With very good play.]

17...♘c4 is the most natural move. [A tricky move like 17...♘xd5 might not work because of 18.♘b7! ♖c7 19.♖xd5 (19.♕xd5 19...♕c6 is good for Black.) 19...♖xc2 20.♖d2 ♖xf5 21.♘e3 and White is better here.]

18.♘xc4 ♖xc4 The white king's position on e1 is starting to be a bit shaky.

19.a4! This time Khismatullin is doing is right thing as White should try to block the position as much as possible.

19...♖d4 20.♖f2 ♕c4 We can see a typical fighting position of the Najdorf. It is very difficult to say who is better here, but from a practical point of view it is more easy to play with Black. The idea is just more simple, to develop all pieces and attack with all you have!

21.♕e3 White is going to be an exchange up, but it doesn't matter much.

21...♕c5 Almost all black pieces are now in the game.

22.♕xd4

22...exd4! Black needs an open line! [22...♕xd4? would be a bad idea because after 23.♖d2 White is more or less solid.]

23.♖f4 [After 23.♖h4 23...O-O White has 24.♕e4 with the idea of playing f6, but Black is in time with 24...b3! 25.cxb3 ♖a5+ and it is clear that Black's initiative is more than just enough.]

23...O-O 24.♘f2 White continues to try and keep the position together, but Duda is wasting no time for nothing.

24...b3! An excellent move, opening the white king even more.

25.c3?! The game is probably almost over after this move. [The best practical chance to fight was 25.O-O-O 25...bxc2 26.♖d3! White is giving back the exchange to gain control of

the white squares. Black is better, but White is fighting.]

25...♖e8+ What a beautiful position! All black pieces are in the game.

26.♘e4 dxc3 And I guess that by now it is clear that the game will not last for much longer...

27.0-0-0 It is just too late to move the king away from the center... [Not much better was 27.bxc3 27...b2 28.♖b1 ♘b6 and Black is simple overrunning White's defences.]

27...♖b8 A cute move, but it was not really needed. [The simple 27...♖a5 would end the game almost immediately.]

28.d6 [28.♖xb8 28...♘e3+ 29.♙b1 c2+ And Black is winning.]

28...♖b4 Black is going for the white king.

29.♘xc5 ♖e2 [29...cxb2+ 30.♙xb2 ♖e2+ 31.♙b1 b2 followed by Ba2 and b1Q would also lead to mate soon.]

30.♖he1 cxb2+ 31.♙b1 And now Duda finishes the game in style:

31...♘d3+ 32.♘xd3 ♖a3 Black has almost no pieces left, but Qa1 cannot be avoided! What a beautiful crush by the young Polish prodigy. **0-1**

(2) Shimanov, Aleksandr(2649) - Jobava, Baadur(2716) [D16]

15th ch-EUR Indiv 2014(4.5),
2014.03.06

GM Arkadij Naiditsch
Best rating: 2737

We will now face one of the most crazy games I have ever seen. Jobava is famous for being a very creative player and Shimanov is also very good in tactics. The crazy play started on move 12 and went on over 20 moves, which is a very rare fact, because most of the games are decided relatively quickly in the tactical phase. Enjoy this parade of tactics and creativity!!!

1.d4 ♘f6 2.♘f3 d5 This time Jobava decides for something very solid, which we don't see too often in his games. His usual repertoire is more connected to Benoni or KID structures.

3.c4 c6 4.♘c3 dxc4 5.a4 So we are in one of the main lines of the Slav.

5...♙g4 Not the main move, but not a rare one either.

6.♘e5 ♙h5 7.f3 White's idea is simple: take the bishop h5 out of the game by putting up a pawn-wall with f3-e4. [Lately White is more often trying 7.g3 7...e6 8.♙g2 ♙b4 9.O-O with maybe a little advantage for White and a much more calm position than in the game.]

7...♘fd7 This is still theory and in 2009 Shimanov played this position with the white pieces.

8.♘xc4

8...e5 Now we can see the idea behind 7...Nfd7: to get fast play in the center. In case White would now be in time to play e4 and then Be2-0-0 Black's position would already be quite bad because of the horrible bishop on h5.

9.e4 [Of course not 9.dxe5?? 9...♙h4+ and the knight on c4 is lost. 10.g3 ♙xc4]

9...♙h4+ An important check to weaken the white pawn structure.

10.g3 ♙f6 And now the d4 and f3 pawns are under attack. As we can see, the position is already getting quite forced.

11.dxe5 ♙xf3!? This move is some sort of novelty on the high level. [In Shimanov's previous game 11...♘xe5 was played. 12.♘xe5 ♙xe5 13.g4 ♙g6 14.f4 The black bishop is trapped. 14...♙f6 15.f5 ♙h4+ 16.♙d2 Black has some compensation, but White should have a clear advantage here.]

12.♘d6+ The only move, but a very strong one.

12...♙e7! And this is probably a novelty prepared by Jobava. What a shocking idea to put the king in front of all the pieces, but things are much more complicated than it seems. [After 12...♙xd6 Black would lose on the spot after 13.♙xd6 ♙xh1 and even a full rook up is not helping Black to survive here.]

The position is lost by force. 14. ♖g5 f6 15. exf6 gxf6

16. ♖xf6 ♖xf6 17. ♖e6+ ♖f8 18. ♖xf6+ ♖g8 19. ♖d8+ ♖g7 20. ♖g5+ ♖g6 21. ♖e5+ White is totally winning.]

13. ♖b3!? A very tricky move by Shimanov. [The more solid continuation 13. ♖g5+ 13... f6 14. exf6+ gxf6 15. ♖f4 ♖xd1+ 16. ♖xd1 ♖e5 would at most lead to a slightly better endgame for White.]

13... ♖xe5 [Black would be doing bad after 13... ♖c5 14. ♖c4 ♖xh1 15. ♖xc5 and White's attack is clearly crushing.; But maybe it was time to take the rook: 13... ♖xh1!? 14. ♖xb7 And here comes a very strange, but strong computer move: 14... ♖e6! With very unclear play. Of course White at least has a draw by playing 15. Qb3 Ke7 16. Qb7.]

14. ♖xb7+ ♖f6! No fear! [14... ♖xd6 would also lead to a complicated, but worse position. 15. ♖g1 Threatening to play Be2 next. 15... ♖e6 There are many other moves for Black, but this seems to be the strongest. 16. ♖e2 ♖d3+ 17. ♖d2 ♖f2 18. ♖f1 ♖d4 19. ♖b3+ ♖e7 20. ♖xd3 and only White can be better here.]

15. ♖g1! The best and only move. Black already wanted to play Qxh1.

15... ♖xd6 Black is playing the best. The queen on f3 cannot be saved anymore, so it is time to get as much compensation

for the queen as possible.

16. ♖e2

16... ♖bd7! Strong play! Black is bringing all his pieces into the attack.

17. ♖xf3 ♖c5 Jobava continues playing for the initiative. [Another way to go on was 17... ♖xf3+ 18. ♖f2 ♖fe5 Black has 2 pieces for the queen and quite some attack. 19. ♖b3 Objectively White should be better, but I think Black has quite some practical chances to be back in the game.]

18. ♖d5+ The only move for White!

18... cxd5 Black has to take the knight and let back the white queen into the game. In case of 18... Kg6 19. Nf4 the game would be over.

19. ♖xd5 ♖xf3+ Black has 3 pieces for the queen, which is already a lot, but the bishops on d6 and h5 are hanging and the king on f6 is also badly placed. The position remains very unbalanced and probably favourable to White.

20. ♖f1 [20. ♖f2? is a mistake as after 20... ♖e5! White cannot take on c5 because of Bd4 check.]

20... ♖e5 Once again Jobava plays the most practical move in the position, trying to get the maximum compensation for the queen.

21. ♖xc5 This move is also forced.

21... ♖ac8 22. ♖f2 A logical move, but now Black is getting very strong play. [22. ♖e3 was probably stronger and after 22... ♖hd8 all the black pieces are in the attack, but it is just not enough. 23.g4! ♜xh2+ 24. ♖e1 And White should win the game because of the huge material advantage.]

22... ♜d4 The game continues being very tricky.

23. ♜e3 ♜xe3 24. ♖xe3

24... ♜xh2+ White is always missing one move to be winning. As long as the white king is under attack the game remains very unclear.

25. ♖g2 [25. ♖e1 doesn't lead anywhere after 25... ♜f3+]

25... ♖c2+ 26. ♖h3 The white king escaped to the h-file, but here White is also in a mating net, what a crazy position!

26... ♜g4+ Jobava continues finding the best practical chances.

27. ♖h4 h5 Finally a move without check, but the white king is caught. Black wants to play Nf3 next with a mate.

28. ♖g5+ The only move. [After 28. ♖gf1+ 28... ♖g6 29. ♖g5+ ♖h7 only Black can be playing for a win.]

28... ♖e6 29. ♖d5+ ♖e7 Not a mistake, but the black king is going into the wrong direction. [29... ♖f6 would probably lead to a draw. 30. ♖gf1+ (After 30. ♖d6+ 30... ♜e6 Black is already better.) 30... ♖g6 31. ♖xf7+ And here Jobava probably missed the very strong

31... ♖h6! and White doesn't have anything better than to force a draw after 32. ♖f6+ gxf6 33. ♖xf6+]

30. ♖b7+ ♖f8? This move already gives White what is probably an advantage, but of course during a practical game and with not much time left on the clock it is hard to blame Jobava for such a logical reply. [Black could still save the game after 30... ♖f6 31. ♖gf1+ ♖g6 32. ♖xf7+ ♖h6 and we are back to the line above.]

31. ♖g5 The white king finally escapes its trap on h4.

31... f6+ 32. ♖f4 ♖e2! Once again Jobava is trying to mate, this time by playing g5.

33. ♖b4+ The only move. The position is still very forced.

33... ♖g8 34. ♖c4+ ♖h7

35. ♖xe2! This is the only way for White to go on.

35... ♗xe2 36. ♖g2 With a double attack on the knight h2 and bishop on e2. After amazing complications we reached an endgame which should be minimally better for White.

36... ♗g5+ Another logical move.

37. ♖e3 ♗g4+ To keep the bishop doesn't make sense as the knight is now going to take a very strong position on e5.

38. ♖xe2 ♖b8 Another logical move.

39. ♖d3! A good move! White is quickly bringing the white king closer to the queenside pawns.

39... a5 And this move probably costs Black the game... [39... ♖b4! would put White in quite some trouble. 40. ♖c3 Giving up the e4 pawn is probably the best option. 40... ♖xe4 41. b4 White should of course be better, but the game is far from over as the black pawns and a very strong knight on e5 would give Black counter chances.]

40. ♖c3 ♗g6 41. b3 The time trouble is now over. White is an exchange up and should be winning, even if it is not that easy.

41... ♖c8+ 42. ♖b2 White continues to stabilize his position.

42... ♖e8 43. ♖e1 Everything is finally protected and next White wants to activate the rook from g2.

43... ♗e5 44. ♖d1! Shimanov continues playing a perfect game. White gives up the e4 pawn but goes for the much more important a5 instead.

44... ♗f3 45. ♖d5 ♖xe4 46. ♖xa5

46... h4? And Jobava misses his final chance... [46... ♖g4! with the idea of playing h4 next would have led to a much tougher fight. 47. ♖c2 White needs to give up the g3 pawn. 47... ♖xg3 48. ♖d5! Cutting the f3 knight. White's position should be winning now, but things are still quite tricky from a practical point of view.]

47. gxf4 ♗xf4 48. ♖c2 Now White is just must faster and the game finally comes to an end.

48... g4 49. ♖a8 ♗f5 50. a5 g3 51. ♖g8 Preventing the g-pawn from advancing further.

51... ♖e5 52. b4 g2 53. a6 We just saw a really amazing game where both players played almost perfectly in a very very complicated position. Just a few mistakes by Black gave White a chance for a full point. But what an impressive performance by Shimanov, who managed to play an almost perfect game in a crazy position! **1-0**

**(3) Khismatullin, Denis(2714)
- Golod, Vitali(2573) [A29]**

European Championship,
2014.03.04

GM Csaba Balogh
Best rating: 2672

A new player arrived in the 2700+ club. Dennis Khismatullin from Russia is a great fighter, who pushes all the games until the end.

1.c4 e5 2.♘c3 ♘f6 3.g3 The main move is 3.Nf3 Nc6 and only then 4.g3. With this setup, White would like to keep the option of developing the knight to e2 in some lines. On the other hand, it gives extra options for Black too, he can think about occupying the center with c6-d5.

3...♙b4 4.♙g2 O-O 5.♘f3 ♖e8 [I personally like 5...♘c6 for Black, but the text move is more common.]

6.O-O

6...e4 Golod as a classical player follows the old main line. Recently this move went a bit out of fashion. White seems to get some advantage after undermining the e4 pawn with d3.

7.♘d4 ♘c6 8.♘c2! An important theoretical move! 8. Nxc6 dxc6 would change the structure in Black's favor. He would quickly develop his bishop to f5 and the e4 pawn becomes

very strong, as it locks the g2 bishop and fixes the white central pawns on the 2nd rank.

8...♙xc3 This is the only way for Black to keep his e4 pawn, but it costs him the bishop pair. [8...♙f8 is met by 9.d3 exd3 10.exd3 and d4 next with a small but stable advantage for White.]

9.dxc3 h6 Black tries to limit the movement of the c1 bishop. [The other theoretical option is 9...d6 10.♙g5 h6 11.♙xf6 ♖xf6 12.♘e3 ♙f5 13.f4! is given to be in White's favor.]

10.♘e3! The knight is heading to d5 and then Black will face the unpleasant choice of either leaving it there or improving the white pawn structure by allowing cxd5.

10...d6 There are still over hundred games in the database. Many classical games. The main 11.Qc2 was played by Karpov and Korchnoi and the text move was already tried by Portisch or Huebner.

11.b3 [After 11.♘d5 Black has 11...♙f5 while after 11.b3 or 11.Qc2, Black does not have an useful developing move with the bishop, therefore White first improves his position.]

11...♘e7 White now achieves the desired improvement on the pawn structure. [11...a5 ; Or 11...♙d7 was better.]

12. ♖d5 ♗f5

13. ♖c2! Creating the threat of taking on f6 and then on e4. Black is forced to trade the knights to save the pawn.

13... ♗xd5 14. cxd5 Suddenly the c1 bishop has a bright future on the long diagonal. White intends to play c4, followed by Bb2 and Qc3. Black is going to miss his dark squared bishop.

14... e3! Black realized the forthcoming dangers and he decided to change the pawn formation. [14... ♖e7 15. c4 ♗d7 16. ♗b2 and Qc3 also looks excellent for White.]

15. ♗e4!? A direct attempt to provoke favorable exchanges. [15. f4 was also good, followed by executing the Bb2 c4 plan.]

15... ♖g5 [15... exf2+ would strategically improve Black's position, but he is unable to save the king against the direct threats: 16. ♖xf2 ♗e7 (16... g6 weakens the kingside too much. 17. ♗d3! Threatening with e4 and the h6 pawn falls. 17... h5 18. e4 ♗g7 19. ♖d2 followed by Qh6, with a very strong attack.)

17. ♗h7+! is the point of 15. Be4! 17... ♖f8 White wins after the following spectacular combination: (17... ♗h8 18. ♖xf7±) 18. ♗xh6!! gxf6 19. ♖af1 f5 20. ♗xf5! ♗xf5 21. ♖xf5+ ♗xf5 22. ♖xf5+ ♗g7 23. ♖f7+ ♗h8 24. ♖f6+- Black needs to sacrifice his queen to avoid getting mated, but then he ends up with a huge material disadvantage.]

16. ♖d3 Trying to overpress the e3 pawn, but Black correctly holds the tension.

16... ♗d7 Being greedy and accepting the pawn sacrifice would be big mistake.

17. f4! Khismatullin correctly evaluates that White has effective resources against the h5-h4 attacking plan. [17. fxe3? has a nice refutation: 17... ♗xg3! 18. hxg3 ♖xg3+ 19. ♗g2 (19. ♗h1 19... ♖e5+- wins.) 19... ♗h3! 20. ♖f2 ♗xg2 21. ♖xg2 ♖e1+ 22. ♗h2 ♖e5+- mates soon.; 17. ♗xe3? 17... ♗xe3 18. fxe3 White has won a pawn, but the doubled backward pawns can hardly give him any advantage. Black's game suddenly becomes much easier... 18... ♖e5 and Rae8 next.]

17... ♖g4 18. ♗f3 ♖h3 19. ♗g2 ♖g4 20. ♗f3 ♖h3 21. c4! After repeating twice to get closer to the time control, White goes for the right plan and occupies the long diagonal.

21... h5 [An important detail is that after 21... ♗xg3? 22. ♗g2!! this intermediate move is very important and White takes the knight on the next move. 22... ♖g4 23. hxg3 ♖xg3 White parries the Bh3 threat with 24. ♖f3! ♖e1+ 25. ♗f1+- and Bb2 wins the game.]

22. ♗b2 h4? Consequent play by Black, but it turns out to be a mistake. [Locking the diagonal with 22... f6 should have been played with mutual chances, although I prefer White. He should aim for opening the position with Rc1 and c5.]

23. g4 ♗g3 This was Black's idea, but it runs into a beautiful

refutation.

24.f5!! Protecting the g4 pawn. White has trapped the queen on h3 at the cost of an exchange. [Of course not 24.hxg3?? 24...hxg3—+ and Qh2.]

24...♞e4 Black tries to save his queen with Ng5. [24...♞xf1 25.♞xf1 with the threat of Qd4, looking at the g7 pawn, and at the same time protecting the g4 pawn in order to catch the queen with Bg2. 25...c5 Preventing Qd4, but... (25...f6 is met by 26.♞d4 And now the only move to save the queen from Bg2 is 26...♞xf5 27.gxf5 ♞xf5 28.♞xh4± White has a winning advantage. The bishop pair becomes very strong.) 26.dxc6! ♞xc6 27.♞d4 ♞e5 Black has successfully prevented Bg2, but White traps the queen in another way: 28.♞xc6 bxc6 29.♞f4! (29.♞f3 is premature in view of 29...♞xf3! 30.exf3 e2)]

25.♞d4! ♞f6 [25...f6 drops a piece as after 26.♞xe4 ♞xg4+ 27.♞g2 Black does not have h3...]

26.g5 Black gets mated on the diagonal. He cannot create any counterplay...

26...c5 27.♞f4 The game is over. [27.dxc6+- was also good.]

27...♞e5 [27...♞h7 28.♞g4+-]

28.♞g2 ♞g4 29.gxf6 1-0

**(4) Ganguly, Surya Shekhar(2623)
- Carmaciu, Lucian-Catalin(2423)
[B41]**

Cappelle-la-Grande Open 2014(3.3),
2014.03.03

GM Csaba Balogh
Best rating: 2672

A brilliant attacking game by the Indian GM...

1.e4 c5 2.♘f3 e6 3.d4 cxd4 4.♘xd4 a6

5.♗e2!? A tricky move against the Sicilian Kan variation, which I also liked employing in the past. In this line, Black usually would like to develop his pieces with b5, Bb7 (which is why he played a6), but now White delays the development of his b1 knight, which gives him a very unpleasant extra option.

5...b5 [For Black it is more advisable to try 5...♘f6 6.♘c3 ♘c6 transposing to the Sheveningen variation, but usually the Kan players are not familiar with this line.]

6.a4! The standard undermining procedure to create some weaknesses on the queenside. When the knight is on c3, b4 comes with tempo, but here...

6...b4 7.♘d2! is the whole point of the White's setup! He drives his knight to the excellent outpost on c4.

7...♗b7 8.O-O ♖c7 The standard development of the black pieces. White needs to take care of his e4 pawn first before putting his knight to c4.

9.♖e1 Ganguly already prepares for the following break... In many Sicilian lines White attacks with f4-f5, but here Black is well prepared for this with a quick Nf6 and Bc5. White initiates his play in the center.

9...♘f6 [9...d6 followed by Nf6 would have been more circumspect at first sight, but here again White plays aggressively with 10.♘c4! ♘f6 (10...♗xe4 White wins after the nice tactical strike

11.♘xe6! fxe6 12.♗h5+ ♗g6 13.♗xg6+ hxxg6 14.♖d5+- with a crushing attack!) 11.e5! dxe5 12.♘xe5 The knight cannot be taken because of Bb5, winning the queen, and otherwise the bishop comes to f4 next move with a very promising position.]

10.e5! ♘d5 Black uses the standard plans, but here the difference of having the knight on c4 starts to tell. [10...♖xe5 would have been met by 11.♗xa6! ♖d5 12.♗xb7 ♖xb7 13.a5± and the a- passed pawn is very strong. Nc4 is coming next.]

11. ♖c4 ♗b6 [On 11... ♗e7

12. ♗f5!! is extremely strong. 12...exf5 13. ♗d6+ ♗xd6 (13... ♖f8 14. ♗xb7 ♖xb7 15. ♗f3+- wins back the pieces with a huge advantage.) 14.exd6+- White wins as the bishop goes away with discovered check and takes either the b7 bishop or the d5 knight.]

12. ♗d6+!! White already foresees the entire combination! Very deep calculation by Ganguly! Black has no choice, he must accept the sacrifice.

12... ♗xd6 13.exd6 ♖xd6

14. ♗xe6!! There is no way back. White needs to sacrifice to justify his previous move. But where is the mate after trading the queens?!

14... ♖xd1 [14... ♖xe6? 15. ♗g4+-]

15. ♗xg7+! ♖f8 16. ♖xd1 ♗xg7

17. ♖d6!! This was the idea! Ganguly has calculated all the following lines before his 12.Nd6 move. Very impressive! White is a piece down, but the b6 knight is hanging and Bh6 is threatening to squeeze the king followed by a hidden mating attack...

17...f6 [17... ♖e8 leads to a materially lost endgame after 18. ♖xb6 ♖xe2 19. ♗h6+! An important intermediate check to cover the back rank. 19... ♖g8 20. ♖xb7 ♖xc2 21. ♖xb4+-; 17... ♗c6 18. ♗h6+ ♖g8 White has many tempting options here, but the strongest is the subtle 19. ♖ad1! followed by

R1d3-d3. There is no adequate defence against it, because the b6 knight is always hanging if Black tries to drive his other knight to g6. (On the direct 19.♖d3 Black could defend with 19...♘e5) 19...♖e8 20.♖1d3 ♘e5 21.♖g3+ ♘g6 22.♖xb6 ♖xe2 23.♔f1!+- wins.; 17...♘d5 18.♙h6+ ♔g8 19.♙f3+- wins.; 17...♘c8 is refuted by 18.♙h6+ ♔g8 19.♖d4 ♘e7 20.♖e1! Bringing a new attacker to e8! 20...♘bc6 21.♖xd7 ♙c8 22.♖c7+- Bc4 next. Black is totally paralyzed.]

18.♖xb6 White ended up with an extra pawn and a superior position.

18...♖e8 19.♙e3 ♙e4 20.♖xb4 ♙xc2 Besides the material advantage, the bishop pair starts to work and the danger around the black king is not over yet... Everything is basically winning, but Ganguly finishes the game in style!

21.♖c1 ♙f5 22.♖f4! ♙e6 [22...♙g6 23.♖c7+- is also hopeless.]

23.♙d4 ♖f8 24.♖c3! Black resigned as he has no defence against Rg3! What a game! **1-0**

Endgame section

(15) Fedoseev, Vladimir(2641)
- Wojtaszek, Radoslaw(2713)

15th ch-EUR Indiv 2014(6.3),
2014.03.08

GM Arkadij Naiditsch
Best rating: 2737

Black was totally winning before, but he gave White chances to reach this knight endgame. Is the position winning or a draw?!

66...e2 67.♖h2+ The only move to fight for survival. [67.♔d2 is immediately losing to 67...♜f2 68.♘e1 ♘e4+]

67...♜f2 [67...♜e1 would lead to about the same position as in the game, just saving us some moves.]

68.♘g4+ ♜f1 I guess Wojtaszek was repeating moves to gain some time because of the 30 seconds increment per move.

69.♘e3+ ♜f2 70.♘g4+ ♜e1 So the king is finally on e1 and it is now time for Black to get a better place for the knight.

71.♘e3 White is driving the knight to c2.

71...♘e6 Wojtaszek also finds the right idea. The black knight has to go to g2.

72.♜c3 ♘f4 73.♘c2+ ♜f2 74.♜d4 ♜f1 75.♜e4 ♘g2 76.♜d4 So the first step of Black's winning idea is done, the knight is on g2 and can chase the white knight from c2 at any moment by playing Ne1.

76...♘e1 [Black cannot achieve playing Ne1 with "comfort": 76...♜f2 77.♜e4 ♘e1?? 78.♘d4 followed by Nxe2 with a draw.]

77.♘e3+ ♜g1 Now Nf3 followed by e1Q is a threat.

78.♜e4 Fedoseev is fighting the best he can!

78...♘f3 This move is also winning.

79.♘c2 ♜f2 The black king finally got to f2, but how to win the game is still a question.

80.♜d5 The only move. [80.♜f4 80...♘d4 wins for Black.]

80...♘d2 Black wants to play Nb1-Na3 or Nb3-Na1. There is no defence for White.

81.♘b4 A last trick...

81...♔f1

82.♘c2 [82.♘d3 82...♘b3 followed by Nc1 next is winning.]

82...♘b3 And the game is over. White cannot do anything against Na1 next.

83.♘e3+ ♕f2 84.♘c2 ♘a1 85.♘b4 The last chance.

85...♕e3 But Wojtaszek of course avoids White's little trap. The rule of such an endgame is that positions are usually all winning when the black pawn comes to the second rank. Even if the position might be a draw, it is very hard to defend in practice! 0-1

(16) Simonian, Tigran(2425)
- Navara, David(2700)

European Championship,
2014.03.03

GM Csaba Balogh
Best rating: 2672

It seems like the game should end in a draw soon, but Navara finds a very clever idea to test his opponent's resistance a bit longer. The symbolic advantage of the isolated pawn is insufficient for the win, as Black doesn't have enough pieces left to make use of it.

26...♖d8+! At first sight this is just a harmless check, but White has to decide in which direction to go.

27.♕c2?! An inaccuracy. White does not feel the danger. [27.♕e2 would have been more circumspect to have full control over the kingside. 27...♘xf3+ (27...♘a6 28.♖c1 If White does not blunder the Bd5 Rxd5 trick, the game should end in draw.) 28.♖xf3 ♖d6 29.♖f1 and White does not need to worry about Rf6, because after Rd1 he controls all the squares on the f-file.]

27...♙xf3 28.♖xf3

28...♖d6! This was Navara's point with the check on d8. He is threatening to transpose into a winning pawn endgame after Rf6 and it is difficult to avoid the trades as otherwise Black penetrates on the f-file with his rook. The game is still drawn, but White already needs to be very careful.

29.b4! White tries to create counterplay! In general in rook endgames both sides should aim for activity. [29.g5 to prevent Rf6 is a mistake. Black gets excellent winning chances after 29...f6! 30.h4 is met by (30.gxf6+ 30...♖xf6 31.♖g3 (31.♖xf6 is hopeless as 31...♙xf6 32.♙d3

32...♙e5—+ leads to the classical pawn endgame where Black easily wins with his distant passed pawn on the kingside. g5-h5-g4 is coming next, trading the g-pawn for the e3 and the black king will be closer to collect all the queenside pawns.)

31...♖f2+ 32.♙c3 ♙f6 33.b4 ♙f5+ With such a passive rook on g3, White can hardly hold. Black starts to create his passed pawn with g5-h5.) 30...h6! Black tries to improve his pawn structure. 31.gxf6+ (31.gxf6+ 31...♖xf6 leads to the same stories as in the 30.gxf6 lines.) 31...♙xh6 Kh5 is coming next and Black should win.; White cannot avoid the trade with 29.♖f2? 29...♖f6 30.♖d2 ♖f3 Black takes too many pawns.]

29...♖f6 30.♖f4! Another great defensive move! White is ready to trade rooks, but only with the improvement of his pawn structure. [30.♖xf6 30...♙xf6 wins for Black. 31.♙d3 (31.♙b3 leads to the same as in the game. Black wins after 31...♙e5 32.bxc5 bxc5 33.♙a4 f5! And even with a tempo less, (in the game the black pawn was on g5) Black wins. 34.gxf5 g5!—+ followed by h5-g4. Black is faster.) 31...♙e5 32.b5 Black is able to create a distant passed pawn again and easily wins the game.

32...g5 33.♙d2 ♙e4 34.♙e2 f5! 35.gxf5 ♙xf5 36.♙f3 h5—+ is over.]

30...g5! [After 30...♖xf4 31.exf4 Black cannot activate his king.]

31.♖xf6?? This is a terrible blunder. White probably overlooked his opponent's breaking through idea. [31.♖e4! White should have kept the rooks on the board. 31...♖f3 White's counterplay now comes in time with (31...cxb4 is a

mistake, because White creates a c-passed pawn much more easily. 32.*axb4* ♖f3 33.c5) 32.bxc5 bxc5 33.♗e5! Here we could have seen the fruits of the excellent defensive moves b4 (to create a target on c5) and Rf4 (to provoke another target on g5). 33...♙g6 34.♙d3 ♖xh3 35.♗xc5 Black cannot mobilize his kingside because of the strong blockader on g4, while going for capturing it takes too much time. 35...♗g3 White has several ways to hold the draw. For instance 36.♗b5 ♖xg4 37.c5 ♖g1 38.♙d2 and the c-pawn is running too fast. Black is forced to make a draw by repetition. 38...♗g2+ 39.♙d3 ♖g1=]

31...♙xf6 32.bxc5 bxc5 33.♙b3 [33.♙d3 33...♙e5—+ wins as it was shown in the 30.Rxf6 line.]

33...♙e5

34.♙a4 Perhaps White only calculated the pawn race if Black goes for the e3 pawn and in the same time White captures the c5, but actually Black does not need to be greedy and he is able to create a passed pawn.

34...f5! 35.gxf5 h5 0-1

Clash of the Titans

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1 b5 7.♙b3 d6 8.c3 O-O 9.h3 ♘b8 The very popular and solid Breyer System.

10.d4 ♘bd7 11.♘bd2 ♙b7 12.♙c2 ♖e8 13.♘f1 ♙f8 14.♘g3 g6 Both sides follow the typical plans.

15.a4 A thematic move. White going to take space on the queenside. [15.b3 15...♙g7 (15...d5 Sometimes this idea equalizes the position in the center. 16.♙g5 h6 17.♙h4 g5 18.♘xg5 hxg5 19.♙xg5 exd4 20.e5 ♖xe5 21.♖xe5 ♘xe5 22.cxd4→ With initiative.) 16.d5 White is ready for this move now because after 16...c6 White has 17.c4 and he will keep a long-term advantage as he has more space and there are bad bishops on b7 and g7.; 15.♙g5]

15...c5 [15...exd4 16.cxd4 c5 17.d5 c4 18.♙e3+=; 15...c6 looks very solid. Black's plan is Bg7-Nf8-Qc7-Ne6.]

16.d5 c4 17.♙g5 White is provoking Black to weaken his position.

17...h6 [17...♙e7 is more solid as Black keeps the h7 pawn to avoid tactical threats in the future.]

18.♙e3

18...♖b8? This move played by a strong player is hard to explain. Black does not want to fight for the a-file and simply loses time as well. [18...♘c5 19.♖d2 (19.♙xc5 19...dxc5 Black should be fine here.) 19...h5 20.♘g5 With the same idea like in the game: White is preparing to put pressure with the f4 move. (20.♙g5 20...♙e7∞) 20...♘fd7 21.♙h1 with Rf1-f4 next.]

19.♖d2 h5

20.♘g5 Tal is playing in his style, he is going to pressure the

black king after f4. White also had the alternative of playing on the queenside. [20.axb5 20...axb5 21.♖a7 ♜c7 22.♞ea1 ♜a8 And here Black has chances to exchange both rooks, which would help him to equalize.; 20.♞eb1 20...♜c7 21.axb5 axb5 22.b3+= And it is not clear if Black can manage to improve his pieces in time after the typical Nc5-Bc8-Bd7 plan.]

20...♞h7 looks logical to exchange the active knight.

21.♞xh7 ♜xh7 22.♞f1 ♞g8 23.♞h1 ♞g7 24.axb5 axb5

25.f4↑ White is going to put pressure on the kingside but on the other hand the black pieces will get activity over the e5 square and a1-h8 diagonal.

25...exf4 26.♞xf4 ♜e7

[26...♞e5 27.♞g5 ♜c7 (27...f6 28.♞h6 White has some options to improve his position: put pressure on the f-file, create some tactical idea on h5 or transfer the knight to d4. Black should fight for the a-file and improve his bishop by playing Bc8-Bd7.)

28.♞d1! And now we see the disadvantage of the pawn on h5! With the pawn on h7 the black position would be fine. 28...♞a8 29.♞xa8 ♞xa8 30.♞xh5 gxh5 31.♞xh5± With a decisive attack.; 26...♞e5 27.♞f3 With Raf1 next and after the bishops exchange the dark squares around the king will be weak.]

27.♞g5 ♜e5 The queen is not the best piece to use the e5 square... [27...f6]

28.♞f4 ♜e7 29.♞g5 ♜e5

30.♞f3! Soon all white pieces will be ready for the final action.

30...♞a8 Black should be looking for counterplay but it is already too late. [30...b4 31.♞af1 b3 32.♞b1 (32.♞xf7 32...♞xg3 33.♞f4 ♜h4 34.♞g5= With only a draw;]

32.♙d1 leads to inhuman tactical play: 32...♘c5 33.♖xf7 ♜xg3 34.♖xg7+ ♚xg7 35.♜d4+ ♜e5 36.♙f4 ♘xe4 37.♙g1 ♙xd5 (37...♜d3 38.♙xe5+ ♙h6 39.♙f4+ g5 40.♜xd3 cxd3 41.♙xd6+=) 38.♙xg3 ♘xg3 39.♖e1 ♜e8∞) 32...f6 33.♙f4 ♜e7

34.e5! A nice move which gives the white pieces great activity. 34...dxe5 35.♙xg6 exf4 36.♘f5 ♜e2 37.♜xf4 ♙xd5 38.♖g3→And Black should not survive here.]

31.♖af1 ♜f8[31...f6 32.♙f4 ♜e7 33.e5→With the same idea as in the previous comment.]

32.♘xh5! White starts the final action! [32.♘f5 32...gxh5 33.♖xf5 transposes to the game.]

32...gxh5 33.♖f5 ♜e8

34.e5! Activating the c2 bishop.

34...dxe5 35.♙h6 Exchanging the defender.

35...♖a6 36.♙xg7 ♙xg7

37.d6! Cutting the black rook. [37.♖xh5 is also winning. 37...♖h8 38.♜g5+ ♜g6 39.♙xg6 fxg6 40.♖xh8 ♙xh8 41.d6+- With Qe7 next.]

37...f6

38.♖g5+! +— Tal certainly saw this idea many moves ahead!

38...♔f7 [38...fxg5 39.♖xg5+ ♔h8 40.♖h6+ ♔g8 41.♖h7#; 38...♔h8 39.♖g3 Followed by mate on h6.]

39.♘g6+ ♔e6 40.♘f5+ ♔f7 41.♖d1 ♖h8 42.♘g6+ ♔e6 43.♘xe8 ♖xe8 44.♖xh5 ♖d8 45.♖g7 ♔xd6 46.♖f7 1-0

Editorial Preface

And the European Individual Champion is Alexander Motylev!!! The Russian played a really amazing tournament, scoring 9/11 points and landing a clear point ahead of the 2nd place. He is probably on his way to Khanty Mansisk right now to help Karjakin, whose second he has already been for many years.

The 2nd place was shared by 8 players with a score of 8/11. The best one on tiebreak happened to be Anton Guijarro David, a relatively unknown young player from Spain with a rating of 2559 and Vladimir Fedoseev, a young player from Russia with a rating of 2641, came 3rd.

Some other excellent news is that Csaba qualified for the World Cup, finishing with 7.5/11!

The Candidates Tournament in Khanty Mansisk has begun with a big surprise in the first round, as Anand very easily beat Aronian with the white pieces. Who would have expected this after Aronian recently played his best chess in years, while Anand played "modestly" to say the least during the last few years.

Kramnik also seems to be in good shape as he won a great game against Karjakin (you will find this game annotated in this issue). Peter Svidler continues playing very good chess and is on 1.5/2.

With every round the tournament is going to become more and more exciting, so for your next issue you can be sure to find great games by the world's best chess players!

Once again we also want to apologize that this issue came with a delay of a few days, but your commentators were very busy playing themselves.

We promise to be on time with the next issue! :)

4 best games of the past week

**(1) Motylev, Alexander(2656)
- Riazantsev, Alexander(2689) [B11]**

15th ch-EUR Indiv 2014(6.1),
2014.03.08

GM Csaba Balogh
Best rating: 2672

We will now examine the first board encounter of the 6th round. These two players were leading the field with 4.5 points out of 5 games. After this fine victory Alexander Motylev, Karjakin's second, took the sole lead of the tournament.

1.e4 c6 2.♘c3 d5 3.♘f3 Recently this setup became a very popular weapon against the Caro-Kann defence.

3...♗g4 4.h3 ♗xf3 5.♔xf3 Giving up the bishop pair is the main line, but it cannot guarantee full equality for Black. Black has some alternatives, but those also lead to slightly unpleasant positions.

5...e6 Black tries to keep the position closed to make the two bishops less effective.

6.d3 [6.d4!? is a very serious alternative for White, played by many top players nowadays.]

6...♘f6 At the moment it is not obvious how Black should develop his minor pieces. The text move is the main, but Black has Nd7, followed by Bd6 or Bc5 and Ne7 as well.

7.♘d2 This is the point of the d3 setup. White would like to play 0-0-0 and g4-g5, while in the 6.d4 line, he is rather opting for a calm game with Bd3 and 0-0. White can fight for an advantage in both lines.

7...♙d6?! I don't like this move, especially in view of what is coming next. [7...♙b4 directly was possible. 8.a3 ♘a5 9.e5 d4!? (9...♞fd7 10.♞g3 looks good for White.) 10.exf6 dxc3 11.bxc3 ♞xf6 12.♞xf6 gxf6 With a slightly better endgame for White.]

8.g4 ♙b4 This is the novelty, hardly a prepared one. It is a bit dubious to play Bb4 in two moves. Black could have played useful developing moves instead.

9.a3 ♙a5 The following two moves for White are standard reactions in this variation.

10.g5! [Black's idea behind losing a tempo is clear. Now after 10.e5 10...d4 11.exf6 dxc3 12.bxc3 ♞xf6 13.♞xf6 gxf6 the pawn on g4 is a weakening. It would be much better placed on g3 to avoid having holes in the structure. Black can also find his counterplay with h5 later. But the game's continuation is just much stronger.]

10...♞fd7

11.d4! After sending away the knight from attacking the e4 square, White occupies the most important central squares and also prevents Black from locking the position with d4. Now he has a very easy game with 0-0-0 and h4-h5-g6. White can hardly hope for more in this opening. It is a bit strange that such a well prepared player and Caro-Kann expert like Riazantsev ended up in such a bad position after only 11 moves.

11...0-0 12.0-0-0 Black also has problems with the placement of his knights. He is lacking space to find adequate squares for them. Therefore Black tries to explode the center, but the white pieces are much better prepared for the opening of the position.

12...e5 13.dxe5 d4 [Black would quickly collapse in the center after 13...♞xe5 14.♞g3 ♞e8 15.exd5 cxd5 16.♙g2! d4 17.♙xb7 dxc3 18.♙xc3+--]

14.♞e2 ♙xd2+ 15.♞xd2 ♞xg5 16.♞xd4! [At first sight it would have been tempting to include 16.♞g1 with tempo, but Black also has an intermediate move: 16...♞xe5!]

16...♞xe5 [16...♞xe5 looked much more logical, but the problem is that the knight does not have an outpost on e5. 17.♞f5! ♞xf5 18.♞xf5± And Black cannot finish the

development, because Nbd7 runs into f4. Otherwise White has an easy plan, Be2, Rhd1 and penetrate on the d-file. Sometimes Nd6 is very unpleasant. Black has serious problems due to his b8 knight.]

17. ♖f5 ♘f6 This was Riazan tsev's plan, on f6 the knight is more stable and now he could finish the development with Nbd7 and Rad8. Therefore White has to play energetically to achieve something before Black accomplishes his plan.

18. ♔g2 [18. ♘c4! looked even stronger in view of the following lines: 18... ♘bd7 (18... ♔xe4 loses to 19. ♘h6+! gxh6 20. ♖g1+ ♔h8 21. ♔xf6#; 18... ♘xe4 19. ♖e2+-) 19. ♖g1 g6 20. ♘h6+ ♔g7 21. ♘xf7! wins material. 21... ♖xf7 22. ♘xf7 ♔xf7 23. ♖xd7+-]

18...g6

19. ♔g5! The most aggressive move. White creates many attacking ideas by pinning the black queen and Qh6 can also sometimes be decisive.

19...♖e8 [19... ♘bd7 was probably better, although after 20.f3 White's advantage is undisputable.; 19... ♔xe4 has a nice refutation: 20. ♘h6+ ♔g7 21. ♘g2 The queen needs to cover the f5 square otherwise Nf5 mates. 21... ♔e6 And now

22. ♖d6! this decisive deflection wins the game! 22... ♔xd6 23. ♘f5+-]

20.f3 ♔h8 Leaving from the annoying check on h6, but it does not solve the problems.

21. ♖g1! [There was a small trick, that White had to avoid 21. ♘h6 or 21.Nd6 21... ♔xg5 22. ♘xf7+ ♔g7 23. ♘xg5 h6 and the knight is trapped.]

21...♘g8 A desperate move, but Black was lost anyway. [21... ♘bd7 22. ♘c4 Black will soon collapse here too.]

22. ♘d6! ♔xg5 23. ♖xg5 [Now even 23. ♘xf7+!? was winning 23... ♔g7 24. ♘xg5 h6 The difference to 21.Nh6 is 25. ♖d8!! ♖xd8 26. ♘e6+ ♔f6 27. ♘xd8+-]

23...♖e7 [23... ♖f8 24. ♘xb7+- White is not only a pawn up, but the b8 knight is still hopeless.]

24.♖e5!! The decisive blow! Black cannot avoid losing material.

24...♖c7 [The f7 pawn could not be saved with 24...♔g7 because of 25.♖xe7 ♜xe7 26.♞e8+ ♚f8 27.♞c7+-; 24...f6 25.♖xe7 ♜xe7 26.♞xb7+- followed by Rd8 is also decisive.]

25.♖e8 Black is totally paralyzed. White wants to play Bc4.

25...b5 26.♞f5! [Black resigned in view of the Rxe8 and Rd8 mate threats: 26.♞f5 26...gxf5 27.♖g2+- An excellent game by Motylev!] **1-0**

(2) Jakovenko, Dmitry(2723) - Shimanov, Aleksandr(2649) [D45]

Yerevan ARM(5.4),
2014.03.07

GM Csaba Balogh
Best rating: 2672

1.d4 d5 2.c4 c6 3.♞f3 ♞f6 Jakovenko also plays the Slav defence with the black pieces. He is a big expert of this opening.

4.e3 a6 A day later, Jakovenko was facing the same opening but with the other color and he went for the line with 4...Bg4.

5.♞c3 e6 White can choose between at least 10 valuable continuations, but the most common setup was played in the game.

6.b3 With the idea to develop the bishop to d3 and to avoid losing a tempo on recapturing on c4, but taking back with the pawn. Also the c1 bishop would like to get fianchettoed, but Black has a clever move to fight against it.

6...♞b4! This forces White to put his bishop on d2 to neutralize the pin. Later the bishop goes back to d6 and the one on d2 will be slightly misplaced.

7.♞d2 O-O 8.♞d3 ♞bd7 9.O-O ♖e7 We are still just at the beginning of the theory... Here again White has a wide range

of choices.

10. ♖c2 After a few more natural developing moves, such as Rad1 and Rfe1, sometimes even h3, White would like to open the position with e4. With his last move, White has created the positional threat of Ne5! followed by f4. Black should meet this threat with Nxe5 dxe5 Nd7 and f6 undermining next, but now the h7 pawn is hanging.

10...e5 Black himself opens the center, but this leads to a game with an isolated pawn on d5. He is hoping for active piece play to compensate his weakness. [The other option for Black to parry the Ne5 threat is 10...h6 Shimanov has already played it a few years ago, but now he deviates...]

11.dxe5 ♜xe5 12. ♜xe5 ♚xe5 13.cxd5 cxd5

14. ♜e2! White follows the principle which says that the best blockader of an isolated pawn is the knight and he also drives a piece to the kingside to defend against the attacking ideas like Bd6 or Ng4.

14...♙d6! Black needs to keep his pieces to create counterplay for his isolated pawn. [14...♙xd2 15. ♚xd2 leads to a long-term suffering for Black. It is not much fun to defend such positions against a Russian player who plays in Karpovian style.]

15. ♜g3 ♚g5 With the idea of Qh4 and Ng4!

16.f4! [If White plays the most natural 16.♙c3 16...♜g4! is very strong because 17.♙xh7+ leads to Black's advantage after 17...♚h8 18.♙f5 ♜xh2! 19.♙xc8 (19.♚xh2 19...♙xf5+) 19...♜xf1+]]

16...♚h4 17.♚f3! We are still following some games. White would like to counter the Ng4 threat with the simple Nf1 and suddenly he is threatening with Rh3!

17...♚e8 [17...♙g4 is met by 18.♜f5! ♙xf5 19.♙xf5 The black queen is misplaced on h4. Rh3 is coming next. If it was on e7, he could play g6 followed by Ne4 with a comfortable game, but now he cannot achieve this.; 17...g6!? was played in the Cheparinov-Jakovenko blitz game in 2013, where Black eventually later won. Jakovenko has definitely studied this position deeply and he has his ideas how to play it for both sides. Shimanov tried to deviate from his well-prepared opponent.]

18.♙e1 [18.♜f5 18...♙xf5 19.♙xf5 ♜e4! is the point of Rfe8! 20.♚h3? does not work because of 20...♚f2+]]

18...♚h6

19.♙c3! This is the novelty! The 19th move! This shows well the situation chess nowadays... I am quite sure that Jakovenko had analyses over pages about this position and in the game we will see it's fruits. Black needs to react precisely

because White is threatening with Nf5 Bxf5 Bxf5 and g6 does not work as the f6 knight is hanging, otherwise the queen gets trapped after Rh3! [19.♖f5 happened in the previous games. 19...♙xf5 20.♙xf5 g6! 21.♖h3 ♖f8 Black succeeded to save his queen and he settled his knight on e4 and solved the opening problems.]

19...♖g4 [19...♙g4? is met by 20.♖f5! ♙xf5 21.♙xf5 Black has problems to deal with Rh3.; 19...♙c5! seems like the critical move! I wonder what Jakovenko's analysis could be because it seems to lead to a draw after 20.♙e5 (20.♖e1 20...d4! is just fine for Black! 21.♙b2 ♙b4)

20...♙xe3+! 21.♖xe3 ♖g4 22.♙xh7+! is given as the only move by the machine (22.♖f1 is met by 22...♖xe3 23.♖xe3 ♖xe5! Nice tactics!) 22...♖xh7 (22...♙h8 has a nice refutation: 23.♙xg7+! ♙xg7 24.♖h5+! ♖xh5 25.♖h3+- trapping the queen!) 23.♖xh7+ ♙xh7 24.♖ee1 ♖xe5 25.fxe5 ♙e6 And Black should easily hold this endgame! Jakovenko probably knew all this and hoped that his opponent would lose the thread somewhere, which could of course very easily happen without a preparation.]

20.♖f1 ♙c5 Black must still try to create counterplay, but now White has

21.♖e1! [21.♖h3 is strongly met by 21...♖xe3! 22.♖xe3 (22.♖xh6 22...♖e2+ 23.♙h1 ♖f2+ 24.♙g1 ♖xd3+ 25.♙h1 ♖xc2+-) 22...♙xe3+ 23.♙h1 (23.♙f1 23...♖xh2+-+ and Bxh3 next.) 23...♖f2+ 24.♖xf2 ♙xf2 25.♖xh6 gxh6=+]

21...♖b6 [In comparison to the 19...Bc5 line 21...d4 22.♙b2 ♙b4 is met by 23.♖h3! and the knight on g4 blocks the c8 bishop!]

22.b4!? A clever practical decision as this leads to a better endgame after a forced line. [The computer gives 22.♙xh7+! as an even stronger move. 22...♙f8 (22...♙h8 23.♖h3 ♖h6 24.♖g3 d4 25.♙b2± With a big advantage, but of course to the human mind this is just very unclear.) 23.♖b2! d4 24.exd4 ♖xe1 25.dxc5 ♖xc5+ 26.♙h1 And both the e1 and g7 pawns are hanging. White is winning, but of course it is very difficult to play like this over the board.]

22...♙xe3+ [22...♙xb4? is elegantly refuted by 23.♖a4! with a double attack!]

23.♖xe3 ♖xe3 24.♖f2! All black pieces are pinned, but the game goes on after the following only move:

24...d4! 25.♙xd4 ♖xd4 26.♖fxe3

26...♖xe3 [26...♖e6!! was the extremely difficult only move. 27.f5 (27.♙xh7+ is not enough here: 27...♚xh7 28.♖h3+ ♔g8 29.♙xd4 ♖xe1+ 30.♚f2 ♙xh3 31.♚xe1 ♙xg2= Followed by Bc6 and Re8 with a perfect fortress for Black. He has no weakness. Despite his material advantage, White has no winning chance here.) 27...♖xe3 28.♖xe3 ♙d8 29.f6 (29.♙h4 makes no sense now because the h7 pawn is not hanging. 29...♙b6) 29...g6 30.♙c4+= White continues pressing, but Black also has his resources. 30...♙f5 31.♖e7 ♙d1+; 26...♖f8 loses to 27.♙xh7+! ♚xh7 28.♖h3+ ♙xh3 29.♙xd4+-]

27.♖xe3 ♙d7 An ugly move, but Black had no other option to cover the back rank and to leave the pin between the two queens. [27...♙d8 would have been met by 28.♙h4!!+- This was Jakovenko's point, which he had foreseen before playing 22.b4. White wins!]

28.♙h4! Weakening the kingside in order to launch a decisive attack before Black succeeds to finish the development. [28.♙e2 could have been met by 28...♙d4 and Bd7 saves the back rank.]

28...h6 [28...g6 29.f5+- is over for Black.]

29.f5! There is no time to waste! f6 is coming next.

29...b5 [29...f6 30.♙c4+ ♚f8 (30...♚h7 31.♙h5! is decisive! Qg6 and Re8 is coming next. 31...♙xf5 32.♙d3!+- is an important detail!) 31.♙e4+- also looks quite hopeless.]

30.f6 ♙b7 Here comes the moment where White needs to finish the game. Jakovenko finds the most direct way to do it:

31.♙g3 g6 [31...g5 32.h4! ♙d5 And here the most precise is 33.♚h2!+- leaving from the d1 check and Black cannot prevent the Be4 threat after which the g5 falls and Black gets mated.]

32.♙xg6! ♚h8 A last trick to get counterplay on the g-file, but after White's cold-blooded reaction Black gets mated. [32...fxg6 leads to a hopeless endgame: 33.♙xg6+ ♚h8 34.♙xh6+ ♙h7 35.♙xh7+ ♚xh7 36.♖e7+ ♚g6 37.♖xb7+-]

33.♘d3! ♖g8 34.♗h4! ♜xg2+ 35.♕f1 There was only one check and Black cannot defend against Qxh6! An excellent game! **1-0**

**(3) Kramnik, Vladimir(2787)
- Karjakin, Sergey(2766) [D20]**

FIDE Candidates 2014(2.4),
2014.03.14

GM Arkadij Naiditsch
Best rating: 2737

Could it be the last chance that Kramnik to take on the World Championship title?! For over 20 years Vladimir has been one of the best players in the world, he has won everything possible, and we all remember that he was the only person beating Kasparov in a WCC Match! Before the Candidates, Kramnik even rejected to play in the Zurich super tournament to be in a perfect shape. And he is, as with another novelty Kramnik puts big problems to Karjakin, who didn't find any way to save the game

1.d4 d5 Karjakin said in his interview that he was preparing for a month with 4 trainers and here he opens with the Queen's Gambit, an opening he rarely played before.

2.c4 dxc4 And we have the Queen's Gambit accepted.

3.e4 Kramnik chooses the most aggressive line.

3...♘f6 [Another main line is 3...e5 4.♘f3 exd4 5.♘xc4]

4.e5 ♘d5 5.♘xc4 So far there is of course nothing new. From the structure we can see that White has a slight space advantage, but Black is dominating on the white squares.

5...♘b6 6.♘d3 is one of the most popular lines at the moment.

6...♘c6 Black is aiming for a blockade on the d5 square.

7. ♖e3 ♜b4 8. ♖e4 f5 This move is nothing new either. In 2012 Karjakin already played a blitz game against Ding Liren, who continued with the main move 9.exf6.

9. a3!? N A very interesting and probably strong novelty. [The main line goes 9.exf6 9...exf6 10. ♜c3 f5 11. ♖b1 ♜d4d5 with a complicated position.]

9...fxe4 Black accepts the challenge, but his position is getting very dangerous. [Another very logical reply is 9...♜4d5 and now White has quite some moves, but probably an idea could be to play 10. ♖xd5 It looks a bit strange to give up such a nice bishop, but Black is very slow with development. 10...♜xd5 11. ♜e2 followed by Nbc3. It is hard to say if White is really better here, but we can be sure that Kramnik's analyses are very deep, so I guess Karjakin would have had a tough time playing against an human+engine mutant! :)]

10. axb4 What a strange position, which is very hard for evaluation. Black's pawn structure is very bad, but on the other hand he has control over the light squares and the bishop pair... The position is very dynamic.

10...e6 A very logical move. [After 10...♖f5 11. ♜e2 e6 12. b5 followed by Nbc3 and short castle, I think that White's position somehow looks nice.]

11. ♜c3 White doesn't even try to save the pawn and plays for the initiative, and we can be sure that this was nothing new to Kramnik...

11...♖xb4 12. ♖h5+! A very strong and important move. Before attacking the e4 pawn, White tries to weaken Black's pawn structure as much as possible on the dark squares. [To play 12. ♖g4 with a double attack on e4 and g7 12...O-O 13. ♜e2 would have been another option, but I think that White doesn't have anything special after the simple 13...♖d7]

12...g6 13. ♖g4 Now Black is not in time anymore to castle kingside.

13...♖xc3+ A very human move, but it seems like after this logical move Black is just doing badly. [After 13...O-O 14. ♜e2 ♖d7 15. O-O White keeps the very important option of playing Bg5-Bf6 next.; The best try might have been 13...♜c4 14. ♜e2 ♜xe3 15. fxe3 O-O but after 16. ♜g3 White's position also looks clearly better.]

14. bxc3 ♖d5 Karjakin continues his strategy to play on the light squares and Black's a-pawn could also be very dangerous, but the only problem is that Black is not in time!

15. ♜e2 ♖d7 16. O-O White castles before deciding whether to play Nf4 or Ng3.

16...♖c4 Black cannot protect the e4 pawn. [After the logical 16...a5 17.♘g3! is very strong. 17...♙c6

18.♗xe4! And the game is over... 18...♖xe4 19.♖xe6+ ♔f8 20.♙h6# What a beautiful mate!]

17.♗g3 ♙c6 Black's hope is to exchange the bishop against the white knight, but that is just a dream...

18.♖a5! A very nice move! White continues his rush and Rc5 next looks pretty deadly.

18...O-O-O! A very good practical decision. [After 18...O-O 19.h4 White's attack should be deadly.]

19.♖c5 Kramnik is going for the e6 pawn. [Playing 19.♖xa7 19...♙b8 20.♖a3 was probably quite tempting, but somehow Blacks is still holding on the light squares, although White should be much better.]

19...♖b3 20.c4 ♔b8 Karjakin continues defending very well. [20...♖he8 was losing on the spot: 21.d5 ♙d7 22.d6! ♙c6 23.♗xe4 With a totally winning position for White.]

21.♖xe6 ♖de8 Black needs to go for the c4 pawn, as in case White was in time to play d5 the game would be instantly over.

22.♖h3 ♗xc4 The position remains quite sharp.

23.♖xc6! This move had of course been planned for a couple of moves already, but it is still a very nice one. By sacrificing an exchange White is totally destroying Black's pawn structure and the white knight is getting a perfect position on c5. But of course all this required very precise calculation.

23...bxc6 [23...♗xe3 doesn't seem to work: 24.♗xe4 ♖a4 (24...♖d5 25.♖c5 ♖xe4 26.fxe3 And White's central pawns should give him an advantage.) 25.♖xc7! What a beautiful move! 25...♔xc7 (25...♗xf1 didn't work as after 26.♖xb7+ ♔a8 27.♗c5 ♖a1 White has the amazing

28.♖b8+!! ♔xb8 29.♖b3+ with mate to follow soon.) 26.♖xe3 White's central pawns and the great knight basically give him a winning position.]

24.♗xe4 ♗b6 Black tries to consolidate.

25. ♖c5 Finally the big tactical battle is over and White's position is clearly better.

25... ♔d5 26. ♖c1 A logical move. [But 26. ♖a1 might have been even stronger, with the idea of playing Bg5-Qa3 next.]

26... ♔a8 Karjakin was already in some time trouble and it is very hard to give any advice to Black here. All White needs to do is to get the queen out from h3 to a3 to end the game, which is why maybe a move like 26...h5 would have made sense, although Black's position remains very bad.

27. ♖a6 A good decision. White is giving up the great position on c5 to collect the c6 pawn.

27... ♔b7 28. ♖b4 ♔f7 Not giving White the chance to play Qf3 next.

29. ♔g4 [29. ♔g5 with the idea of playing Qa3 next also looks deadly.]

29... ♖d5 30. ♖xc6 The game is almost over...

30... ♖e6 31. ♖a5+ The white attack continues and all Black can do is watch...

31... ♔a8 32. ♔e4 ♖b6 Karjakin continues trying to hold things together.

33. ♔g4! Very well played by Kramnik again. White not only

wants to play Rc5 next, but he also protects from Qf5 in many lines.

33...h5 It is difficult to advise anything better... [33... ♖d8 34. ♖c6 and the game should not last for much longer...]

34. ♖c5 The knight on d5 cannot be protected without losing material.

34... ♖d8 35. ♖c6 What a domination of the white pieces!

35... ♖xc6 36. ♖xc6 hxg4 The only thing which stops Black from resigning is the very strong position of the knight on d5, who already got there on move 5!

37. ♖f6 ♔h7 38. ♔g5! Another very tricky move, especially in time troubles. Too many black pieces are hanging and White's e-pawn could also become very dangerous.

38... ♔g8 This blunder in a lost position doesn't really matter anymore...

39. ♖xg6 What a fantastic game by Kramnik. Great preparation followed by great play... Karjakin fought well, but his bad position and Kramnik's amazing left him in a hopeless situation. **1-0**

**(4) Svidler, Peter(2758)
- Andreikin, Dmitry(2709) [B32]**FIDE Candidates 2014(2.3),
2014.03.14GM Arkadij Naiditsch
Best rating: 2737

Lately Peter Svidler showed great chess and his wild car was not really a surprise... He seems to be in better shape than ever and he proves this with a great victory over Andreikin, a player who you clearly want to beat in this event.

1.e4 c5 This move was probably a little surprise for Svidler, as Andreikin usually likes to play the Berlin, which is solid like a rock.

2.f3 c6 3.d4 [Lately the most played move is probably 3.f5]

3...cxd4 4.fxd4 e5 The Kalashnikov! A very rare opening on the highest level, but quite a tricky one. About a year ago, we published a book on the Kalashnikov and from time to time I have also been going through the lines of this aggressive opening for Black.

5.f5 d6 Now White has quite a big range of possibilities...

6.c4 The main move and the safest line. [6.f1c3 6...a6 7.f3a3 would lead to much more sharp lines, for example after: 7...b5 8.f5d5 f5ge7 With a very sharp position.]

6...f5e7 Black is developing the bishop on e7 before playing Nf6, with the simple idea of playing Bg5 soon and to exchange the "bad" bishop.

7.f1c3 a6 It is time to chase the knight from b5 as White wanted to play Nd5 next.

8.f3a3

8...f5e6 Of course this is all still theory and the move in the game is solid, but seems to lead to a slightly better position for White. [8...f5 is the only critical move in my opinion. It is not that easy for White to show a direct way to a clear advantage.]

9.f5e2 f5g5 Andreikin uses the moment to exchange the bishops.

10.f3c2 Svidler covers the d4 square "just in case". [10.f5xg5?! of course didn't work as after 10...f5xg5 11.f5xd6?? f5d8 Black is winning.]

10...f5xc1 11.f5xc1 f5g5 I don't like this move personally. The black queen seems to be misplaced on g5... [The more usual 11...f5f6 12.O-O O-O 13.f5d2 leads to a position with a small plus for White.]

12.O-O Now White already wants to take on d6.

12...f5d8 13.b4 Svidler probably wanted to be sure that Black plays Nf6 and not Nge7 with the idea of castling kingside and possibly f5 or Ng6-Nf4 in the future.

13...f5f6 [13...f5ge7 14.b5 and Black can't return to e7 because the square is already taken...]

14.f5d3 O-O 15.f5d1 It is easy to see that White is better and what is even worse is that it is very hard for Black to find a plan

to go on...

15...♖c8 Black is trying to bring the rook from f8 into the game, but this loses a tempo. [After 15...♘e7 16.♙e3 White would enter a clearly better endgame.]

16.♘d5 White could have waited a bit longer with this move, but to play Nd5 is of course one of White's main ideas.

16...b5 It seems to me like Andreikin blundered White's next move... [16...♙xd5 was more solid. 17.exd5 (17.cxd5 would of course be a mistake as after 17...♘xb4! the queen on g5 is suddenly very useful. 18.♘xb4 ♖xc1--+) 17...♘e7 18.♘e3 And White's position should be clearly better because of the c5 idea, but I think Black can still fight after 18...Rfd8.]

17.♙g3! An extremely strong move by Svidler! At first sight it is not easy to see that White is going to be much better in the resulting endgame... [The simple 17.♘xf6+ 17...♙xf6 18.cxb5 axb5 would give Black good chances to escape.]

17...♙xg3 Black doesn't have a choice. [After 17...♙h6 18.♘xf6+ White reaches a huge advantage with very easy moves: 18...♙xf6 19.cxb5 axb5 20.♙xb5 ♙xa2 21.♙a6! with the idea of playing b5 next, with good winning chances.]

18.♘xf6+ gxf6 19.hxg3 Now Black needs to decide how to take on c4.

19...bxc4?! Black is probably getting into real big trouble now... [19...♙xc4 was a more solid option. 20.♙xc4 bxc4 21.♖xd6 White needs to win the pawn back. 21...♖fd8! The only move to stay in the game. 22.♖xd8+ ♖xd8 23.♘e3 ♘xb4 24.a3 ♘c6 25.♖xc4 ♘d4 Once again we can easily see that because of the pawn structure White's position is clearly better, but Black could have tried to defend for a long time.]

20.f4! A very strong move! Peter does not hurry with taking the black pawns as they will fall automatically. The threat of playing f5 next is deadly! [After 20.♖xd6 20...♖fd8 Black would be almost fine.]

20...f5 There was no other way to prevent f5...

21.exf5 ♙xf5

22.♘e3 And the knight is joining the game with tempo!

22...♙d3 [After 22...♙e6 23.♖xd6 (23.f5 is premature because of 23...♘d4!) 23...♖fd8 Black probably doesn't have anything better than 24.♖xd8+ ♖xd8 25.f5 and White's advantage should be enough to win the game.]

23.♙xd3 cxd3 At first sight the position doesn't seem to be so obvious, but Svidler continues playing great moves...

24.♘f5! A very important and deadly move. The white knight on f5 is perfectly placed and the next threat is to play Rxc6

Rxc6 and Ne7. The black king is already in deep trouble because of the many mating ideas on the back rank in case of exchanges.

24...e4 Andreikin ends his game with a scream! [24...♔h8 would lead to a slow death as after 25.♘xd6 ♖c7 26.♚xd3 Black is totally hopeless.]

25.♘xd6 The most precise move. [White would have needed a better technique after 25.♚xc6 To win a piece is always tempting but after 25...♚xc6 26.♘e7+ ♔g7 27.♘xc6 ♖c8! strangely Black has some counterplay. 28.♘d4 ♖c4 29.♘f5+ ♔g6 30.♘e3 With a winning position for White, but the fight would still continue for some time...]

25...e3 [Playing 25...♚c7 26.♘xe4 is same as resigning.]

26.♘xc8 d2 Andreikin is lookint for some practical chances, but it is already too late...

27.♚xc6 e2 Wow, Black gets a second pawn on the 2nd rank! :)

28.♚cc1! This is the last exact move. White reaches an easily winning rook endgame.

28...exd1=♚+ 29.♚xd1 ♚xc8 30.♚xd2 ♚c3 31.♚d5! This is a very nice finishing move. Black cannot take on g3 because of Rg5 and Ra3 is not possible either because of Ra5. An

excellent game by Svidler! **1-0**

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the European Championship and a draw is no good for both player as the winner would qualify for the World Cup. It is clear that White is pushing but the position is of course a draw.

61...a3 62.g6 What else to do, the g-pawn must advance.

62...h6? A big mistake. [62...hxg6 63.hxg6+ e8 would lead to a theoretical draw, even without the a3 pawn, but Pashikian probably didn't want to suffer for the other 50 moves holding the draw, and he might even still have had some hopes to win the game in case of a blunder by his opponent.]

63.f7+! A good choice, White grabs his chance.

63...e8 64.d5 Suddenly Black's position is looking very dangerous. White wants to play Nf6 followed by g7.

64...a2 This is another mistake, after which the game is already lost. [

64...e5! is of course not an easy move to find in time trouble. 65.hf6+ d8 And White already doesn't have anything better than forcing a draw after 66.f7+ c8 67.f5 fxd5 68.hxd5 a2 69.g7 a1= 70.g8=+]

65.hf6+ d8 66.g7? And White misses his chance! [

66.f7+! should have been played first 66...c8 and only now 67.g7 f8 There is no other way to stop the white pawn. 68.f1 And White would have won the game.]

66...e7! An excellent resource!

67.f8+ [The game would still have been a draw after 67.fxe7 67...xe7 68.g8= a1= 69.e8+ d6!]

67...♔c7 68.♖a8 ♜e2+! Not giving White any chances as the a2 pawn is saved.

69.♞f3 White is still hoping for Nd5+.

69...♞b7! And another good move by Black crushes all the white hopes. The game is now a draw.

70.♖a3 ♜e6 Black is collecting the g7 pawn.

71.♘e4 ♜g6 72.♖xa2 ♜xg7 73.♜g2 ♜xg2 74.♞xg2 What an exciting endgame "out of nothing" and I don't even want to imagine how Riazantsev must have felt after drawing this game after missing a win in 1 move! **1/2-1/2**

**(16) Melkumyan, Hrant(2613)
- Fressinet, Laurent(2709)**

European Championship,
2014.03.07

GM Csaba Balogh
Best rating: 2672

White is a pawn up but as we know, in rook endgames the weaker side might always hope for salvation.

52.h5+ ♞g5 53.♜f5+ ♞xg4 54.♖xb5 White obtained a passed b-pawn. He is threatening to move his king to c2 (to avoid Rb3) followed by Rc5 and advancing the pawn. The h-pawn cannot be taken as the king cannot catch the b-pawn, therefore the black king is forced to go to the b-pawn.

54...♞f4 55.♞d2 ♞e4 56.♞c2 ♞d4

57.♜c5! It is very to parry the Kc4 threat and suddenly Black

finds himself in zugzwang. If the rook moves on the h-file, the white king successfully crosses the 3rd rank and supports the b-pawn, while if the rook keeps the 3rd rank, then the h5 pawn will not be under attack anymore and White can go for the h6 pawn. The consequences of the king moves we see in the game.

57...♔e4 [It was more challenging to try 57...♖g3!? keeping the white king cut along the 3rd rank even if that costs another pawn. 58.♖c6! ♖h3 59.♖xh6 ♔c4

The only winning move is 60.♖h8! ♖h2+! Black can keep his tenacious defence by forcing the king to the back rank. (Black fails to reach the 7th rank after 60...♔xb4 61.h6 ♔b5 62.h7 If Black could play Kb7, the game would be a theoretical drawn. Black would only wait with his rook and when the white king goes to g6, he starts to give checks and at the end he goes back to the h-file. 62...♔b6 63.♖b8+--) 61.♔d1! Again the only move to win! (61.♔c1 leads to an instructive draw after 61...♔xb4 62.h6

62...♔c3! Getting the king closer with the help of the mate threat. 63.♔d1 ♔d3 64.♔e1 ♔e3 65.♔f1 ♔f3 66.♔g1 And now

66...♖g2+! 67.♔h1 ♖g6 68.h7 ♖f6! This is the key! Black prevents the check on the f-file and the rook cannot leave from h8 because of Rh6 check. 69.♔g1 Threatening to move the rook, but after the last strong move 69...♖f7!= the game is drawn, because Black collects the h-pawn with Kf4-f5-g6!) 61...♔d3! Again the only chance, but now the b-pawn survives. The win remains very difficult though... 62.♔e1 ♔e3 63.♔f1 ♔f3

64. **Rf8+**! The only winning move! The king faces an unpleasant decision, to which pawn's direction he should go... 64... **Ke4** (After 64... **g4** 65. **Ke1!** White comes back to support his b-pawn. 65... **Rxh5** (65... **Rb2** 66. **h6+-**) 66. **Ke2** **Rh3** 67. **Ke2+-** And the black king is cut too far from the pawn. White wins easily after by simply pushing the pawn.) 65. **Rf8+**! Another very important check and now Black must either leave the f3 square or he is getting too far from the h-pawn. 65... **Ke3** (65... **Ke5** loses after 66. **Rh8!** **Ke6** (66... **Ke4** 67. **h6** **Kxb4** 68. **h7+-**) 67. **Ke1+-** and the king will be free to go up on the g-file, because if the rook continues cutting along the 2nd rank h6-h7 wins. 67... **Rd2** 68. **h6** **Ke7** 69. **h7** **Rd7** 70. **Rb8+-**) 66. **Ke1!** **Rxh5** (66... **Rb2** 67. **h6+-**) 67. **Ke2+-** followed by Kc3-c4 and advancing the pawn. The black king is too far cut along the e-file, he has no more chance to survive. This would have been the only way to win for White if Black had played 57... **Rg3**. Yes, rook endgames are really tough indeed!]

58. **Rc4+**! Driving the king onto the 5th rank to stay in the motif.

58... **Ke5** 59. **Rc3!** Great technique! The rook helps the king to cross the 3rd rank. The pawn cannot be taken on h5 because of Rc5!

59... **Rh1** 60. **Ke3** The win is more or less automatic, because the black king is cut along the c-file, White promotes his b-pawn.

60... **Ke4** 61. **Rc4+** **Ke5** 62. **Rc5+** Protecting the h5 pawn, followed by further activating the king...

62... **Ke4**

63. **Ke4!** The plan is simple, Kb5-b6 and pushing the pawn.

63... **Rh4** 64. **Ke5** **Rh1** 65. **Ke6** White is ready to advance the pawn.

65... **Rf1** 66. **b5** The game is over. Black tries a last trick...

66... **Rf6+** 67. **Rc6** **Rf5** 68. **Rxh6** **Ke4** 69. **Ke6!** [Black resigned as the b-pawn cannot be taken: 69. **Ke6** 69... **Rxb5** 70. **Rc6+**! **Ke4** 71. **Rb6+-** And the h-pawn promotes.] **1-0**

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 **2.♗f3** g6 **3.♕f4** ♕g7 **4.♘bd2** [4.e3 With idea to create the following setup: c3-Nbd2-h3-Be2-0-0-a4.]

4...c5 Black has many different plans in this position. I suppose the idea of this move is to prevent White from playing over e4 and of course fight for the center.

5.c3 cxd4 6.cxd4 d5 We have a symmetrical pawn structure which we can also see in the Slav Exchange Variation. Usually when Black has a limited bishop on g7 White keeps a stable advantage but in this case the knight is badly placed on d2 (it should be on c3) and the position is equal. [6...d6 7.h3 With the idea of saving the bishop after Nh5. 7...O-O 8.e3 b6 9.♕e2 ♕b7 10.O-O ♘bd7 With equal play.]

7.♕xb8 A concrete move. White is going to win a pawn. [7.e3 7...O-O=]

7...♖xb8 8.♔a4+ ♕d7 9.♔xa7

9...♘e4! White has lost some time in order to win the pawn, so Black is immediately going to take advantage of his better development.

10.e3 [10.♘xe4 10...dxe4 11.♘d2 (11.♘e5 11...♕xe5 12.dxe5 O-O 13.e3 ♖c8! Now White will not be in time to finish his development.... 14.♕e2 ♖c2 15.♕d1 ♖xb2 16.O-O ♕b5 17.♖e1 ♔d2→)]

11...e3! A typical idea. Black gives a second pawn to prevent White from finishing his development too easily. 12.fxe3 O-O 13.♘f3 (13.g3 13...♕c6=) 13...♕c6 14.♖f2 ♖a8 15.♔c5 ♖a5→ Followed by e5.]

10...♘xd2 11.♘xd2 White had an interesting alternative: [11.♔xd2 The king stays in the center but Black is not able

to open the position and activate the pieces after e5 now. 11...O-O 12.♔d3 White wants to escape with the king after Rhc1-Ke1. (12.♔e2) 12...♙g4 13.♘e5 ♙h5 looks strange but Black is preparing f6-e5. 14.g4 ♙xe5 15.gxh5 ♙d6 16.♚a4 (16.hxg6 16...fxg6 17.f4 ♚a8 18.♚xb7 ♙xf4! 19.exf4 ♚d6 With a strong initiative.) 16...e5↗]

11...e5! Black needs to play actively otherwise White will play Be2-O-O and keep his pawn up for nothing.

12.♘b3 [12.dxe5 12...♙xe5 13.♚a3 (13.♔e2 13...O-O 14.O-O ♚c7 Attacking both h2 and b2 and Ra8 is also a threat.; 13.♚c5 13...♙xb2 14.♚b1

14...♚c8! A strong tactical idea! (14...♙g7 15.♙b5 And here White takes the initiative. Black will not have the pair of bishops and he has problems with the d5 and b7 pawns.) 15.♚xd5 O-O And White will probably not manage

to finish his development without losing some material. 16.♚xb2? ♚c1+ 17.♔e2 ♙g4+--+) 13...♚a8 14.♚b4 (14.♚b3 14...♚a5↑) 14...♚a5 Even in the endgame Black keeps the initiative. 15.♚xa5 ♚xa5 16.♘b3 ♚a4 17.O-O-O (17.♘c5 17...♙xb2 18.♘xa4 ♙xa1 19.♘c5 ♙c3+ 20.♔d1 ♙c6=+ With the idea Ke7-Ra8 and then the a2 pawn can be weak.) 17...♚xa2 18.♚xd5 ♙f6 19.♘d4 ♔e7↗]

12...O-O 13.♚c5 [13.♔e2 13...exd4 14.♘xd4 ♚c7! White will now lose control over the d4 square because of the Ra8 threat. 15.♚a3 ♙xd4 16.exd4 ♚fe8↑]

13...♚c8 14.♚b4 [14.♚xd5 14...exd4

15.♙b5! To finish the development is the most important thing. (15.♘xd4 15...♚b6 16.♚xd7 ♚b4+--+) 15...♙xb5 16.♚xb5 dxe3 17.O-O ♙xb2 18.♚ab1 exf2+ 19.♚xf2 And White has some drawing chances because of the reduced material.]

14...♚e8 15.♔e2 exd4 [15...♚c2 16.♔d3 ♚xb2 17.O-O (17.♚c3 17...exd4 18.♚xb2 dxe3 19.♚c2 ♙xa1 20.♘xa1 exf2+ 21.♔xf2 ♚f6+--+) 17...exd4 18.exd4 ♚g5=+]

16. ♖xd4

16... ♖h4! The only move which doesn't allow the white king to get to safety.

17. ♖xb7 [17. ♖d1 17... ♖xe3 18. g3 ♖xe2+ 19. ♖xe2 ♖e4+—; 17.g3 17... ♖e4 18. ♖f3 ♖xd4—]

17... ♖xd4 18. ♖xd7 ♖xb2 19. ♖d1 ♖c3+ 20. ♖f1

20... ♖d4! Black opens the position in front of the white king.

21. exd4? This is the decisive mistake, but it was impossible to calculate all the variations... White should have played [21. ♖g4 21... ♖xg4!? Black could also have kept the queens. 22. ♖xg4 dxe3 23. fxe3 ♖b8! And White still has problems with his king and his rook on h1.]

21... ♖e4 [21... h5 22. ♖h3=]

22. ♖g4 [22. ♖b5 22... ♖xd4 23. ♖f3 ♖e6 24. g3 What else to do? 24... ♖c2 (24... ♖xf2 25. ♖g2 ♖c2 26. ♖hf1 Hoping to escape with the king, but now Black plays 26... ♖a7+ 27. ♖h1 ♖b8 with the idea to put pressure over the second rank (with Rbb2 or Qh3). 28. ♖a4 ♖xa2+ 25. ♖xe8+ ♖xe8 26. ♖xd4 The position looks like it might be drawish now, but after

26... ♖c3! White loses coordination and is not able to play Kg2 in time. 27. ♖d5 (27. ♖g2 27... ♖xf3!) 27... ♖c1+ 28. ♖g2 ♖xh1 29. ♖xh1 ♖e5 30. ♖d1 ♖e2 31. ♖b3 ♖xf2+]

22... ♖c2 23. g3 Now everything depends on whether White will manage to play Kg2 and consolidate his position or not. [23. ♖b5

23... ♖e1! 24. ♖f3 (24. ♖xe1 24... ♖xe1+ 25. ♖xe1 ♖b1+ 26. ♖d2 ♖c2+ And Black is winning material.) 24... ♖c3 25. ♖d3 ♖b8! 26. ♖e2 (26. a4 26... ♖xb5! 27. ♖xc3 ♖xc3 28. axb5 ♖c1+ 29. ♖e2

♖d2+ 30.♔f1 ♖e1#) 26...♗xb5 27.♗xc3 ♖xe2+ 28.♔xe2 ♕xc3 29.♔d3 ♕a5 White has some practical chances thanks to his active king and the two passed pawns, but objectively Black should win the game.]

23...♖xa2? Black missed a win here: [23...♕d2! 24.♔g2 (24.♕f3 24...h5 25.♖d7 ♕e3! 26.fxe3 ♗xe3 27.♖d5 ♗cc3—+) 24...h5! 25.♖f3 ♗c3—+]

24.♕b5?? What a blunder! White could have saved the game after [24.♕f3 24...♕d2 25.♔g2 ♕e3 26.♗hf1 ♗c2 27.♔h1 ♗xf2 28.♗xf2 ♖xf2 29.♕c6 (29.♕g2 29...♕xd4 30.♖f3) 29...♗d8 30.♖f3 White will lose the d4 pawn but thanks to the opposite colored bishops and reduced material it should not be too hard to make a draw.]

24...♖d5—+ 25.♕xe8 ♖xh1+ 26.♔e2 ♗xe8+ 27.♔d3 ♕e1 0-1

Editorial Preface

Things are starting to get very exciting in the Candidates tournament.

After 6 rounds, Anand is leading with 4/6. Who would have guessed before the tournament that Anand might be the Candidate for the World Championship Crown again. With his wins over Aronian and Mamedyarov, Anand also has an excellent tiebreak.

In second place we find Aronian with 3.5/6. Aronian's play has been very shaky, from good to bad, but he is clearly a bit angry about the missed winning opportunities in the game against Andreikin. Kramnik, Topalov and Mamedyarov are on 50% and it is clear that all of these guys will push very hard during the next rounds to get a chance to qualify. We can expect huge fighting games.

Karjakin is only on 2.5/6. He must be very disappointed with the first 6 rounds, but his slightly boring play in the openings makes it easy for his opponents to avoid dangerous positions. Andreikin is on 2/6 and it could have been less...

There are still 8 rounds to go until the qualification for what will probably be the most expensive WCC Match in the history of chess against Magnus Carlsen.

We can be sure that the outcome is going to be very exciting and maybe good nerves will decide the winner.

In the current issue we bring you the best moment from the first 6 rounds of the Candidates tournament. Enjoy!

It is extremely difficult to win a game on the highest level and doing it with the black pieces, especially in such a convincing way, is just exceptional.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 Mamedyarov was also suffering against the Slav defence in the first round. Against Topalov he tried a sideline with 4.Nbd2 in that game.

4.♚c2 dxc4 5.♚xc4 ♙g4 5...Bf5 is the main line, but the text move is also considered to be fine.

6.♘bd2 A safe setup. White prevents the weakening of his pawn structure and intends to develop his bishop to g2. [6.♘c3 leads to much more wild positions after 6...♘bd7 7.e4 ♙xf3 8.gxf3 e5]

6...♘bd7 7.g3 e6 8.♙g2 ♙e7

9.♘e5 White trades a pair of knights, using the fact that Black

cannot take on e5 due to the loss of the g4 bishop. On the other hand it is not obvious why it is an achievement for White to get rid of some pieces. [9.O-O 9...O-O 10.♚b3 is the other option for White. 10...♚b6 11.♘c4 ♚a6! is the precise reaction, followed by Nb6 and given as equal by theory.]

9...♙h5! Saving the bishop and now Black already wants to take on e5.

10.♘xd7 ♘xd7 11.O-O O-O 12.♘b3 White's chance to get some advantage lays in the queenside play or in the opening of the center and the diagonal of the g2 bishop with e4-d5. At the moment White has created the positional threat of Bd2-Na5 and b4 with a very unpleasant pressure on the b7-c6 pawns. Black needs to prevent it.

12...a5! Intending to push back the knight with a4, or if White plays a4 himself then Black can use the b4 hole with his minor pieces. We are still following some theoretical games.

13.a4 ♙b4 Anand immediately occupies the b4 outpost with his bishop and frees the ideal e7 square for his queen to explode the center with e5.

14.e4 [14.f4 with the idea to prevent e5 could have been met by 14...♚e7 15.e4 f6! followed by Bf7 and e5! This is a standard maneuver in the Slav.]

14...e5 This most natural move is the novelty of the game. Black challenges the central pawns.

15.♙e3 [The white pieces are not developed well enough to create a passed pawn with 15.d5? 15...cxd5 16.exd5 ♚c8 The black pieces are just too active and he overtakes the initiative.]

15...exd4 16.♙xd4 [White could not try to improve his misplaced b3 knight with 16.♘xd4 because of 16...♘e5! and wherever the queen goes 17.♚c2 ♘g4=+ Black grabs the

bishop pair and claims the advantage.]

16...Kf8! The black bishops are standing well, they are controlling the d1 and e1 squares, the ideal places of the white rooks. Black's next task is to control the situation in the center. White's only dangerous idea in the position is to advance the center with f4-e5-f5. With his last move Anand makes an excellent preparation to place his pawn on f6.

17.e5 [17.f4 17...f6 is also perfect for Black, White cannot make progress.]

17...Re8! Anand already knows that he is going to undermine the e5 pawn with f6, but first he creates a huge weakening!

18.f4 There was no other way to defend the pawn as the e1 square is controlled by the bishop.

18...f6! 19.exf6 [White could not create a passed pawn with 19.e6? 19...Bb6 as he is first forced to give up his strong bishop and then 20.Bxb6 Bxb6+ 21.Kh1 Bxe3! wins an exchange thanks to the double threat of taking on e6 and Be2.]

19...Bxf6 If the pawn was on f2 White would have no problem, but now his king becomes vulnerable. Black is threatening to play Be2.

20.Bf3 A difficult decision, as this further weakens the king's position. The g2 bishop has played an important defensive role. But at least, White can finally use the d-file with his rook. Other moves were even worse... [White cannot close the e-file with 20.Be5 20...Bg4! and Ne3 and Nxe5 are threatening.; 20.Rf2 20...Re7+ is also better for Black. Rad8 is coming next, White still cannot oppose his rooks on the opened files because of the strong black bishops.]

20...Bxf3 21.Rxf3 Re4! Black must play energetically to not give time for White to consolidate.

22.Re3 A logical approach to trade the active rook. [The arising endgame after 22.Bxf6 22...Rxc4 23.Bxd8 Rxd8+ is clearly better for Black. The bishop is in general stronger than the knight when there are pawns on both sides. The a4 and b2 pawns are real weaknesses. Black can attack them for instance by playing b6 and Be7-f6, followed by Rc2 or Rb4. The black rooks are also more active.]

22...Rxe3 23.Bxe3

23...♔e8! An excellent positional move with attacking purposes. At first sight Qe7 looked more natural, but after Bb6 it is not so easy to activate the a8 rook because of the a5 pawn.

24.♘b6 Otherwise Black is able to occupy the d-file with his rook. [24.♘d4 24...♖d8 25.♘xf6 ♔e3+ 26.♔g2 gxf6+ White has serious problems because of his poor b3 knight.]

24...♔h5! This is the reason Anand played Qe8. Black is looking at the h2 pawn and sometimes threatening with the very unpleasant Ng4. The queen also covers the a5 pawn, therefore Black is ready to occupy the e-file with his rook. It is really hard to parry the Re8-e2 plan, White is in deep trouble despite the material equality.

25.♘d4 [White cannot defend with 25.♖f1 25...♔e8 26.♖f2 as Black wins after 26...♖e1+ 27.♖f1 (27.♔g2 27...♘g4++) 27...♘g4! 28.♔c2 ♘e3! 29.♘xe3 ♔e2!++]

25...♔e8 26.♖f1 [After 26.♘e5 the strongest is 26...♘d7++ (26...♘g4 27.♔e2 is less clear.)]

26...♘g4! The attack is rolling.

27.♔c2 White would like to push back the pieces with Qg2 and h3. Black is clearly better in any case, but Anand feels the moment and finds the most direct way to break through! [27.h4 loses to 27...♘e3 28.♘xe3 ♖xe3++ and Black cannot hold his g3 pawn.]

27...c5!! The bishop is overloaded on d4. It has no good square to leave, while accepting the sacrifice would enter a deadly pin.

28.♘xc5 [28.♘c3 28...♘e3++; 28.♘e5 28...c4!++ is the most precise and Bc5 wins next.; 28.♘xc5 28...♘xc5+ 29.♘xc5 ♘e3++]

28...♖c8 [28...♘xc5 29.♘xc5 ♖c8++ and b6 next was also winning the piece.]

29.♖d1 [29.♖c1 29...b6++]

29...♘xc5 30.♘xc5 h6!? The easiest. Black opens the back rank to be able to take on c5. It is important that Qxc5 is hanging with check, otherwise White could have the standard trick of Qxc5 Rd8 Rxd8 Qxc5.

31.♔h1 [Mamedyarov resigned in view of 31.♔h1 31...♘f2+ (Of course not 31...♔xc5?? as it is not check anymore and suddenly White wins after 32.♖d8+!) 32.♔xf2 ♔xd1+ 33.♔g2 ♔d5++] **0-1**

(2) Topalov, Veselin(2785) - Kramnik, Vladimir(2787) [D37]

FIDE Candidates 2014(6.1),
2014.03.19

GM Csaba Balogh
Best rating: 2672

Since their World Championship match in 2006, Topalov and Kramnik did not really play each other. We probably all remember their famous scandal with the toilet case and it seems like they still did not make peace with each other because neither before nor after this game was there a handshake...

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♙e7 The Queen's gambit declined. A very solid opening. Kramnik's idea was clear, he tries to play a safe setup and knows that Topalov will try to crush him at any cost due to their old affair and he will try to fight back if he gets a chance.

5.♙f4 5.Bg5 is the other main line.

5...O-O 6.e3 ♘bd7 White has a wide range of choices here. Topalov chooses the most common move and grabs space on the queenside. With his last move, Black has prepared to play c5 himself.

7.c5 ♘h5 [7...c6 and; 7...♘e4 are also playable alternatives for Black, but Kramnik has already played the text move in several occasions.]

8.♙e5!? This move was seen only in a few games before. During the press conference Topalov called it a dubious move, which can be very dangerous in one game, because the arising lines are very sharp and if Black is not well prepared he might get into danger as it also happened in the game. [8.♙d3 happened in almost all the games before.]

8...c6 9.♙d3 g6 [9...♘xe5 could be met by 10.♘xe5 ♘f6 11.f4+= with a potential attack with g4-g5. Black should look for a more active reaction.]

10.h4!? was played by Topalov without thinking. A deep preparation, since we already had a new position. White would like to save his strong bishop with Bh2, while if Black takes Nxex5, then the h4 move perfectly fits to an attack with g4-h5.

10...f5?! Topalov called this another mistake. Black would like to lock the kingside to stay safer against the potential attacks, but he weakens the dark squares too much. [10...b6! would have been more principled to undermine the queenside. 11.b4 a5! Compared to the game, this works properly now as the bishop on e5 is hanging in some lines. 12.a3 White has to keep his pawn structure, but this allows the standard trade of the light squared bishops, which seems to solve Black's problems. (Now 12.b5 is just bad in view of 12...bxc5 13.bxc6 ♘xe5! 14.♘xe5 cxd4 15.exd4 ♙b4+ and Black is better.) 12...♙a6!]

11.♗h2! White manages to save his bishop and the holes on the dark squares combined with the space advantage on the queenside start to tell.

11...b6?! Without being able to play a5 on b4, this move just weakens his own c6 pawn. [11...f4 Playing like in the game, just without the b6-b4 pair of moves, was an improved version for Black.; 11...♗xh4 was also better than the game, although in any case White's position is preferable. He probably simply plays 12.b4 with the idea of b5 and Qa4 with sufficient compensation for the pawn.]

12.b4 f4 [The problem was that 12...a5 is met by 13.b5 ♗b7 14.cxb6 ♖xb6 15.O-O+= followed by Rb1. White is better prepared for the opening of the queenside, especially because of the strong bishop on h2. This is the reason why Kramnik wanted to shut it out from the game with his f4 move.]

13.O-O! Simple and strong! Topalov has already claimed a big advantage at this point.

13...a5 Kramnik tries to be consequent and principled, but White is better prepared for the opening of the queenside. [13...♗xh4 was a better chance, or at least Black has an extra pawn. 14.b5 ♗b7 (14...cxb5 15.c6± is always bad for Black.) 15.♖a4! White seems to be able to overpress the c6 square, but maybe Black might hope for some chances after the very ugly computer move 15...♘b8! (15...cxb5 16.♗xb5+-; 15...♖c8 16.♖xa7+-; 15...♖c8 16.♗xh4+-)]

14.b5! As we had already seen in some lines, this is always the critical breakthrough in this line. It always seems to work properly in this game.

14...bxc5 [14...♗b7 could simply have been met by 15.bxc6 ♗xc6 16.cxb6 ♘xb6 (16...♖xb6 17.♖e2± Black has serious problems with the e6 pawn. White is ready to take on f4.) 17.♗e5± ♗e8 18.♖g4!± White is dominating!]

15.bxc6 ♘b8 16.♗b5 White manages to save his c6 pawn, which completely destroys the coordination between the black pieces. Kramnik tries to eliminate it at any cost, but he does not succeed. White can also support it by playing Ne5.

16...♗a6 [16...c4 is also bad in view of 17.exf4 (17.♖d2 is also fine.) 17...♗xf4 18.♗e2! trading the knights with the idea to open the h2-b8 diagonal.]

17.a4! White obviously keeps his bishop on b5, or at least he is only ready to trade it if he gets connected passed pawns on b5-c6. Black should not go for it.

17...♖c8 Black finally gets rid of the c6 pawn, but his position tactically collapses.

18.dxc5 ♖xc6

19.♗xd5! The punishment for Black for his weird opening moves. He loses both of his central pawns. It is rare to see Kramnik losing after only 19 moves... I am sure that his bad relationship with Topalov was also affecting this result. [Topalov pointed out that White can claim a positional advantage after 19.♖c1 but of course the move of the game is much better.]

19...exd5 20.♖xd5+ ♔h8 21.♖xc6! [But not 21.♗xc6 because of 21...♗f6! and the bishop cannot be protected.]

21...♖xc6 22.♗xc6 ♖ac8 [22...♗xf1 23.♗xa8 also leads to a healthy material advantage for White. 23...♗a6 (23...♖xa8 24.♗xf1 ♗xc5 25.♗xf4 ♗xf4 26.exf4+- the two extra pawns should easily win.) 24.♗d5 ♗xc5 25.♖c1± should also be a technical win for White.]

23.♗b5! ♗xb5 24.axb5 ♗xc5 White can choose between several tempting simplifications.

25.♖xa5! Topalov makes the correct decision to remain with only one extra pawn, but with all his pieces in active positions. [The lines after 25.exf4 25...♗xf4 26.♗xf4 (26.♖xa5 26...♗h3+! 27.gxh3 ♖xf3) 26...♖xf4 27.♖xa5 ♖b4 were offering much better practical chances for survival.]

25...fxe3 26.fxe3 ♗xe3+ 27.♔h1 ♖c2? The last inaccuracy, but the position was objectively lost. [27...♗f6 28.♖b1 ♗d5 would have offered some small hopes for Black.]

28.♖b1! White is ready to advance his b-pawn and Black cannot get his rook to the b-file because the bishop on h2 is doing a great job in the entire game.

28...♖fc8 [28...♗b6 29.♖a6+- and Black cannot keep the blockade.; Black cannot get any counterplay with 28...♗f4 as White simply advances his pawn: 29.b6+-]

29.♖aa1! A last precise move before advancing the b-pawn.

White had to control his back rank.

29...♙b6 30.♙e5+! Giving some air for the king on h2 with a tempo!

30...♖g8 31.♖a6! Black cannot hold his bishop and he is forced to give free way for the b-pawn.

31...♙e3 32.b6 ♖c1+ 33.♖xc1 ♖xc1+ 34.♖h2 ♖b1 White can choose between several easy wins. Topalov goes for the most direct one.

35.g4! ♙f4+ [35...♗f4 drops a piece after 36.♗g5 threatening with mate on a8! 36...♖f8 37.b7! ♖xb7 38.♖f6+ ♖e7 (38...♖g8 39.♙xf4+-) 39.♖f7+-]

36.♖g2 ♙xe5 37.♗xe5 ♗f4+ 38.♖f3 ♗e6 [There was a pretty win after 38...♗d5 39.♖a8+ ♖g7 40.♖a7+! ♖f6 41.♗d7+! ♖e6 42.b7+- and White promotes his pawn!]

39.b7! ♖b3+ 40.♖f2 ♖b2+ 41.♖e3 [Black resigned in view of 41.♖e3 41...♖b3+ 42.♖d2 he is getting out of checks and after 42...♗f8 43.♖a7!+- followed by Nc6 promotes the pawn. After Kramnik's inaccuracies in the opening, Topalov just won a perfect game.] **1-0**

(3) Mamedyarov, Shakhriyar(2757) - Svidler, Peter(2758) [A81]

FIDE Candidates 2014(6.3),
2014.03.19

GM Arkadij Naiditsch
Best rating: 2737

After a horrible start of 0.5/3, Mamedyarov made his come back into the tournament with his 2 White wins over Andreikin and Svidler. In the current game, I guess both players were quickly out of theory and the game got pretty messy, but in the complications Svidler made a horrible blunder with 24...h6, after which the game was practically lost.

1.d4 f5 Wow, what a surprise. It is hard to say why Svidler chose to play the Dutch and especially the Leningrad variation, which he might want to call "St.Petersburg" because of his home town! :)

2.g3 There are a lot of move orders which lead to the position in the game. Clearly the system with developing the bishop on g2 is the most popular one.

2...f6 3.f3 g2 g6 As a Gruenfeld player, Svidler of course develops his bishop to g7.

4.f3 g7 5.O-O O-O 6.c4 d6 7.c3 So we are in the very main position of the Leningrad system.

7...e8 The most critical line.

8.b4 A very rare move which has almost never been played on the top level and it seems to just give Black great play. [After the main move 8.e1 8...f7 9.e4 fxe4 White has 2 options: 10.fxe4 (10.fg5 is another interesting option.) 10...c6 And we are in a sharp position. 11.c3!? This interesting move was played by Sargissian not so long ago and White might be doing better here.]

8...e5! There is of course no need to wait with the e5 move as it is the main idea of the line.

9.dxe5 dxe5 10.a3 Now we can see Mamedyarov's plan: his idea is to quickly put big pressure on the queenside, letting Black get quite some play in the center.

10...e4 Another very logical and good move. The white bishop on g2 is dead now.

11.d4 f7 Solid play, but it seems not to be the best Black could have done. [To me 11...f7! looks very strong. 12.b3 (After 12.b5 12...d8 the white queen is in a very unpleasant pin.) 12...c6! Black should not care about the pawn structure, the development of the bishop on e6 is much more important. 13.xc6 bxc6 followed by Be6. I personally like Black's position more here although things are of course still complicated.]

12.b3 c6 Of course Black needs to get rid of the white knight from d4.

13.xc6 xc6 [13...bxc6 was probably not the best already as after 14.a4! the white knight is going to take a great place on c5 and the f3 move at some point might finally free the white bishop on g2.]

14.b5 ♖e8

15.f3! A very important move as White needs to free his bishop on g2. If Black was on time to develop with Be6-Rd8-Rd7 White's position might get pretty bad.

15...♗e6 A logical move, but once again just second best. [The immediate 15...a6! looks very strong. Now after 16.bxa6 Black can simply take back with the rook and get an excellent position. 16.♖ad1 axb5 17.♘xb5 ♗e6 Black's position still looks to be at least equal.]

16.♖ad1 a6 Svidler finally plays a6, but now things are getting very messy.

17.bxa6! A good move. The position is getting very forced now.

17...♖xa6 18.fxe4 White is going for the e-pawn.

18...fxe4 19.♘xe4 ♘xe4 20.♗xe4 ♖xf1+ 21.♖xf1

21...b5! This was of course Svidler's idea before playing 16...a6. If Black was in time to play Bxc4 followed by Re6, his position would of course be a dream, but it is White's move...

22.♖e3 Maybe not the best, but practically a very unpleasant move. [After 22.♗c5 22...♗xc4 23.♗d5+ ♗xd5 24.♖xd5+ ♖e6 Black's position looks to be without any risk and because of the better pawn structure Svidler would clearly check Mamedyarov's defensive technique.]

22...bxc4? Svidler misses his chance. [22...♖d7! was very strong, but it is of course a hard move to play in a practical game. On the other hand it is also a big pity to miss such opportunities. 23.♗d5 (After 23.♗c5 23...♗xc4 Black's position already looks clearly better.) 23...bxc4! Could it be that Svidler missed this move?! 24.♖d1 ♖h8 After this cool and very strong move, with the idea of playing Bg8 next, Black's position is clearly better.]

23.♗c5! A strong move. There is no direct threat, but White has a few unpleasant ideas, like playing Bd4 next, making the black king weaker etc...

23...♖c8?! Another unlucky decision... Svidler clearly lost his touch for the position. [Black had to hurry with bringing his rook to the 8th rank: 23...c6! 24.♖d1 ♖a8 The position is probably still around equal here.]

24.h4?! Mamedyarov also misses his first chance. [The very strong 24.♖d1! with the idea of playing Qg5 next would have put huge problems to Black. The 8th rank is unprotected and the black rook on a6 is practically out of the game.]

24...h6? What a shocking move by Svidler... It is very hard to say what exactly he missed... [After 24...♖xa2 25.h5 ♖a1 White's position might be better, but Black's chances to survive are good.]

25.♟xg6 Mamedyarov says thank you...

25...♟d5 [25...♟h3 of course also loses: 26.♟f7+ ♔h8 27.♖f2]

26.h5 [26.♟f5 also looks very strong.]

26...♚d7 After this move the game is probably over. [There was still a chance left to fight after 26...♖a8 with the hope of playing Qh3 next, or at least finally gain control over the 8th rank, but of course Black's position is very bad.]

27.♟d4! A very strong move. Without the bishop on g7 the only defender of the king will be gone...

27...♖e6 It is hard to suggest anything better. The position is just lost.

28.♟f7+ White starts a winning combination.

28...♚xf7 29.♖xf7 ♖xe3 30.♖xg7+ ♔f8 Mamedyarov now finds a very nice move to end the game on the spot:

31.♖g5! A nice finishing move of a fighting game with some mistakes on both sides. Now after 31...hxg5 32.Bxe3 White's passed h- and a-pawns guarantee an easy win. It is clear that Svidler must have been very disappointed with his own play if he just resigned on the spot. The mystery mistake 24...h6? still keeps a big question mark... **1-0**

(4) Mamedyarov, Shakhriyar(2757) - Andreikin, Dmitry(2709) [D45]

FIDE Candidates 2014(4.1),
2014.03.17

GM Arkadij Naiditsch
Best rating: 2737

Mamedyarov managed to reach some advantage with his tricky opening and later on he created dangerous threats around the black king with a nice pawn sacrifice. It seemed like the game would be over quickly, but in the time trouble things started to get messy and Black had a chance to save the game, but Andreikin chose the wrong path which led to a lost position on the spot.

1.d4 It is never easy to prepare against Mamedyarov as he plays both 1.d4 and 1.e4.

1...d5 2.c4 c6 Another Slav, which is probably the second most popular opening at the moment, after the Gruenfeld.

3.♘c3 ♘f6 4.e3 White chooses a positional line to avoid a theoretical battle.

4...a6 The Slav with a6 currently stands quite well. Black's idea is simple: to be solid in the center and play b5 in a good moment.

5.♘f3 e6 At first sight a move like e6 doesn't look that good, but of course it is all still theory and well-known. The black bishop on c8 is just closed for some time and Black usually develops his pieces by playing c5 or b5.

6.a3!? A very rare line, but personally I like this move. The idea is that White is prepared for c5, after which for example dxc5 Bxc5 and b4 is coming with a tempo and after Black's b5 White could react with c5 and again the a3 move is quite useful

because of the upcoming b4 move.

6...♘bd7

7.♔c2 [White would lose some sort of "half tempo" after 7.♘d3 7...dxc4! 8.♘xc4 b5 9.♘d3 ♘b7 and Black is perfectly fine.]

7...♔c7?! This move looks somewhat artificial and there was no reason for it. [7...♘e7 looks more normal.]

8.e4! Exactly. White is taking over the center, which guarantees a small but pleasant advantage.

8...dxe4 9.♘xe4 c5 This is also very typical play by Black. We are getting into some sort of "French exchange" structures.

10.♘xf6+ ♘xf6 11.dxc5 Another very logical move.

11...a5! Black is taking control over the important b4 move which is clearly a must. [11...♘xc5 12.b4 With a clear advantage for White.]

12.g3 is an interesting move, but White could also have continued with the simple [12.♘d3 What can be more natural than to castle quickly?! 12...♘xc5 13.O-O b6 14.♘g5 ♘b7 15.♘xf6 gxf6 16.♘e4 With a small plus for White.]

12...♘xc5 13.♘g2 O-O 14.O-O Both sides are now fully developed.

14...e5! A nice move. At first sight it seems to be quite dangerous because Black is losing control over the white squares and the bishop on g2 is becoming very strong, but as he has the initiative on his side, Black is perfectly fine.

15.♘g5 Developing a piece with a tempo is never a bad idea.

15...♖a6 A strange-looking move... [A more simple and in my opinion probably better option would have been 15...♗e6 Andreikin might have been afraid of 16.♗xf6 gxf6 17.♘h4 but in fact White's play on the kingside is not in time. 17...♖fd8! and Black's position is fine.]

16.♖ae1 White has spotted a weakness, the e5 pawn, and of course White needs to act quickly, as in case Black was in time to develop, White's position would be at most equal.

16...♖e8 17.♙c3!? Creating the double threat of attacking the e5 pawn and preparing to play b4 next.

17...h6 This also seems to be the best for Black. The pawn on e5 was very hard to defend.

18.♗xf6 gxf6 19.b4 The position remains complicated and pretty forced. Theoretically Black could be doing well here if White was slow with his play on the kingside.

19...♗f8 20.♘h4 White has no choice and starts his play as fast as possible.

20...axb4 21.axb4 ♗e6 Black is going for the direct play, but it seems like Andreikin clearly underestimated what is going to happen... [21...♖d8 would have been a more careful decision. Black just wants to play Rad6 and Rd4 next, dominating the center.]

22.c5 What else...

22...b6 This was clearly Black's plan, but now White is getting a very strong pawn on c6.

23.c6! ♖a4 24.♖b1 ♖d8 Andreikin is going for the b4 pawn, but leaving his kingside a bit alone...

25.♙f3 You don't ask Mamedyarov twice about an attack, he just loves it!

25...♖d4 26.♘f5 Nobody cares about the b4 pawn anymore. [26.♙xf6?! is a mistake as after 26...♗g7 27.♙f3 e4 the c6 pawn is lost.]

26...♖dxb4 27.♖xb4 ♖xb4 28.♙h5 Now Nxh6 is already a threat. Black's main problem is that it is very hard to get rid of the c6 pawn.

28...♙h7

29.♖d1 White wants to play Rd7.

29...♙c8 30.♘e3 What a nice domination on the white squares. A very typical position where things seem to be

more or less fine for Black, but in fact the position is on the verge of being lost.

30...f5 Andreikin tries to escape with an active play, which is hard to blame, but now all his pawns are becoming targets. [30...♖d4 was probably a better defensive move and now White would have a pleasant choice of playing 31.Rxd4 with a better position or maybe 31.Rb1, keeping the rooks on the board.]

31.♗d5! A great move. The black bishop on e6 is keeping things together, so Mamedyarov exchanges the best piece and as we know, the queen and knight are very dangerous pieces in the attack.

31...f4 Black has no choice... White just wanted to play Bxe6 and Rd7.

32.♘c2 ♖a4 33.♙xe5 Material is now equal...

33...♗g7 34.♗e4+?! Mamedyarov is going for another pawn, but the game is becoming very forced. [It is hard to say why White did not play 34.♙d6 as I think he is close to winning here.]

34...♙g8 35.♙xf4 f5! Black's only chance is to do something quickly.

36.c7 ♖xe4 Both players were already in time trouble.

37.♖d8+

37...♙f7?? And Andreikin blunders... [After 37...♙h7 38.♙d6 ♙a6 39.♙c6 White is probably still better, but the game is quite unclear.]

38.♙d6 ♙a6 39.♖d7+! This is why the black king's position on f7 is much worse.

39...♙g6 40.♙c6 And the game is over. Black cannot stop the c-pawn from promoting.

40...♙c8 41.♖d8

41...♖c4 42.♙xc4 We saw quite an interesting game, with a nice pawn sacrifice for the initiative. In the end Mamedyarov was a bit lucky, but all in all this is a totally deserved victory!
1-0

Endgame section

(15) Aronian, Levon(2830)
- Andreikin, Dmitry(2709)

FIDE Candidates 2014(6.4),
2014.03.19

GM Arkadij Naiditsch
Best rating: 2737

In the 6th round of the Candidates, Aronian missed an important win against Andreikin to join Anand in the lead. After a more or less one sided game, Aronian could have finished the game even earlier, but this not so simple endgame appeared.

38. ♗xe6? What a shocking mistake by World Nr2 player! The aprising rook endgame is almost a draw. [The simple 38. ♗c6 followed by Bb5, h4, and trying to bring the white rook to a7 would have given White much better winning chances. Black's position would be extremely hard to hold.]

38...fxe6 We know that the endgame 3vs3 pawns on the kingside with an extra a-pawn is a draw and the slightly damaged black pawn structure doesn't change that evaluation.

39. ♖f4+ ♔e7 40.h4 The white rook is standing perfectly on f4, but Black can always chase it away with e5.

40...h5! The last important move in the game for Black. Of course White wanted to play h5 next and after gxh5 try to play Kh3-Kh4 at a good moment.

41. ♖e4 ♔f7 42. ♔f1 White's only idea can be to bring his king to the a-pawn.

42...♖a2 Of course Black doesn't let White play Ke2.

43. ♔e1 ♔f6 Black keeps on waiting until the white king is a bit more far away from the f-pawn.

44. ♔d1 ♔e7 Now Rxf2 is already a threat.

45.f4 It is hard to suggest anything better for White. [After 45. ♖f4 45...e5 the game should be a draw.]

45...♖a3 It is time to collect some pawns.

46.♔c2 ♖xg3 47.♚d4 [47.♔b2 would also lead to a draw as after 47...♔d7 the black king is in time to hold the a-pawn. 48.a5 ♔c7 49.♚xe6 ♖g4 And both the h4 and f4 pawns will fall, leading to an instant draw.]

47...♚e3 The most simple.

48.♔b2 e5 It is clearly a big pity for Aronian not to win an endgame with very good winning chances and such a mistake could maybe cost him the final victory?! **1/2-1/2**

(16) Svidler, Peter(2758)
- **Kramnik, Vladimir(2787)**

FIDE Candidates,
2014.03.15

GM Csaba Balogh
Best rating: 2672

This is not a typical endgame which we usually comment, but an amazing position where in a seemingly hopeless situation Kramnik finds a miraculous defence and saves the game.

41.♚c6?! is objectively a mistake, but who could blame Svidler for missing the following continuation. White seems to be easily winning, his d-pawn supported by all his pieces seems to be decisive. [White should have been greedy and grab the pawn: 41.♚xb4! 41...♚a6 42.♚d5 ♖xd6 (Keeping the material balance with 42...♚xd6 is risky due to the pin on the d-file. 43.♚c4 ♚b7 44.♚d3+-) 43.♚xe5± White has an healthy extra pawn and very good chances to win the game.]

41...e4!! The first shocker by Kramnik. Black weakens the pawn structure in order to be able to create counterplay against the white king. [41...♚d8 42.d7+-; An important detail is that after 41...♚e2 42.♚e3! is winning: 42...♚xd6 43.♚xd6! ♚xe3 44.♚xf8+! ♔xf8 45.♚xe3+-]

42.fxe4 There was nothing better than accepting the sacrifice, but now the g4 pawn becomes a target. [42. ♖xe4 42... ♖xd6= equalizes.; 42. ♖xd7 42... exd3 43. ♖c8 d2 Black's d-pawn is faster.]

42... ♖e2!

43. ♖f3! Svidler had to give up his strong d-pawn, but suddenly the black king becomes vulnerable after the opening of the f-file. [43. ♖xd7 43... ♖xd3 44. e5 ♖e4+=]

43... ♖xd6 44. ♖e8 f6 45.e5! Svidler had probably foreseen this position long ago and thought that he is going to win soon. However the real cold shower is just about to come. [45. ♖g6+ 45... ♖g7 Black holds.]

45...f5!! What a brilliant idea, combined with the next move! [The point was that 45... ♖xe5 is refuted by 46. ♖xe5 fxe5

47. ♖xf8+! ♖xf8 48. ♖c5 ♖e7 and White has a decisive tempo until the black king leaves the pin... 49. ♖xb4! ♖e6 50. ♖xd6 ♖xd6 51. ♖f3 ♖d5 52. ♖e3+- With an easily won pawn endgame with the distant passer. White gives up his b-pawn and collects the e5 and runs faster towards the kingside pawns.; 45... ♖a6 46. ♖c8+- leaving the pin also wins for White.; 45... ♖e4 46. ♖g6+! is another important nuance. 46... ♖xg6 47. hxg6 fxe5 48. ♖xf8+! ♖xf8 49. ♖c5+- and the g-pawn promotes.]

46.gxf5 [46. ♖xf5? 46... ♖xg4+]

46... ♖f6!! Just amazing! Another only move by Black and suddenly he is safe. The white king is too exposed to be able to make progress. [46... ♖e4 was also tempting , as in comparison to the 45... Qe4 line, White cannot trade queens, but here White wins after 47. e6 ♖g4+ 48. ♖h2 ♖xf3 49. ♖f7+ White collects all the material with checks! 49... ♖h8 50. ♖xf8+ ♖h7 51. ♖f7+ ♖h8 52. ♖f6+ ♖g8 53. ♖g6+ ♖h8 54. ♖xh6+ ♖g8 55. ♖xg5+ ♖h7 And here the winning move is 56. ♖h4! ♖e2+ 57. ♖g2 ♖xh5 58. ♖e4+- and Black has no adequate defence against the march of the pawns. He runs out of checks after Rd2 Kg3.]

47. ♖g3 Trying to free the bishop by leaving the pin, but Black has another only move! The white queen had no good square to leave the pin on the e-file. [47. ♖c8 47... ♖xe5; 47. ♖b8 is met by 47... ♖xf5! 48. ♖xf5 ♖g4+; 47. e6 47... ♖e4 And Black holds in all the lines.]

47...♔e4! A last exact move and Black has nothing to worry about anymore. Qh4 Kg2 Qe4 is threatening. White has no useful move. Somehow all his pieces are immobilized and they are lacking any harmony.

48.♘c5 [48.♔b8 48...♖xf5]

48...♔e1+ 49.♘f2 ♔e4 50.♘c5 ♔e1+ 51.♘f2 What a defence by Kramnik! **1/2-1/2**

Editorial Preface

In the Candidates 12 out of 14 games have been played.

Anand clearly is up to a one man show. The Ex World Championship is playing solid and good chess, while all the other participants seem to be under big pressure and blunder surprisingly much. Could it be that Anand's expectations before the Candidates were not too high, or maybe he changed something radical in the way he is playing, but anyhow it seems like we are going to see a rematch between Anand and Carlsen.

Aronian is the only one who can still theoretically stop Anand from winning the Candidates, but for this Anand needs to lose the last both games and the chance that it is going to happen is very very small.

A big surprise is the bad shape of Kramnik, who just seems to blunder in almost every second game. I haven't seen Kramnik play games like against Karjakin or Svidler in a long time. Mamedyarov is playing great fighting chess throughout the tournament. Risking a lot, winning-losing, continuing pushing, it is a great pleasure to watch his games, but with a result of 6/12 he hasn't been lucky enough to be a contender for the qualification.

The play of Karjakin is rather solid, no big risks, no big gains and in my opinion 6/12 is a nice result for the young Russian. Clearly Svidler will be disappointed with the score of 5.5/12, but he also just made too many "bad" moves. Great play was often just followed by a disaster.

For Topalov the tournament also turned out to be more of disappointment on 5.5/12. Good games were followed by bad ones, but what is nice is that Veselin never lost his fighting spirit and all the games are well fought until the bitter end. Andreikin is on 5.5/12 as well and doesn't seem to hurry on

winning or trying to win any of the games.

Can we expect an exciting finish? I would say rather not, as Anand just has too much experience to let somebody steal his 1st place, but in chess you never know and surprises do happen!

In the current issue, we are of course focusing all our attention on the Candidates!
Enjoy!

Arkadij Naiditsch & Csaba Balogh

FIDE Candidates 2014(7.4),
2014.03.21

GM Arkadij Naiditsch
Best rating: 2737

After a long theoretical battle, Kramnik managed to achieve a very nice position and it was even looking like White's win should not be far away, but by blundering a nice tactic by Black the game got very chaotic. Before move 40, Mamedyarov already looked like he was the one who was winning and indeed he had a big chance to close the game. Suddenly, the game turned one more time after Black's blunders and finally Kramnik was the one with a full point in the tournament cross table. A really exciting and fighting game.

1.d4 Kramnik continues starting his games with 1.d4, usually he likes to vary it sometimes with 1.c4.

1...♘f6 2.c4 e6 3.♘f3 White continues repeating his main repertoire. Kramnik usually avoids playing the Nimzo with White, as he is actually one of the biggest experts with Black.

3...d5 4.♘c3 ♙b4 [4...dxc4 already happened in the Anand-Kramnik game in round 3 with a short draw, but we can be sure that Kramnik had some novelty in mind.]

5.cxd5 [5.♔a4+ 5...♘c6 is the other main line.]

5...exd5 6.♙g5

6...b7 A relatively rare move order by Mamedyarov. [A more popular line is 6...h6 7. h4 c5 8.e3 c4 with very sharp and unclear play.]

7. c2 White is going for a slightly unusual move order. [It could be that Kramnik wanted to avoid 7.e3 7...h6 8. h4 g5 9. g3 e4]

7...c5 8.e3 a5 9. d3 And we are back in a very popular line of the Ragozin that has been played on a high level for many years.

9...c4 10. f5 O-O 11.O-O e8 12. d2 This is also all is theory. White's move 12.Nd2 is very logical, because very soon we will see that his main idea is to play f3-e4.

12...g6 13. xd7 xd7

14.h4!? A very interesting move in my opinion and also quite

a rare one. On the top level it was just played once in the game Cheparinov-Mamedyarov in 2007, where White quite easily won. The idea of the h4 move is simply to play h5 in a good moment, which could be quite unpleasant for Black. Keeping the idea of f3-e4 and later attacking the black king in mind, a move like h4 makes perfect sense. [In a rapid game against Svidler, Kramnik tried 14.e4 14...xc3 15. xc3 xc3 16.bxc3 dxe4 17. xc4 b6 but the position is just close to equal.]

14...b5?! Mamedyarov improves on his game, but to me this move just doesn't look like the right one. In the game Cheparinov-Mamedyarov happened: [14...b6 15.f3 f8 16.e4 g7 17. e3 with some advantage for White.]

15.a4! A typical and very strong move. First of all White is forcing Black to give up his dark squared bishop.

15...xc3 There is no other way to defend from axb5.

16.bxc3 b4 Another forced move.

17.cxb4 xb4 And here comes White's maneuver which basically crushes all Black's hopes of being fine:

18.b1! The key move and of course Kramnik saw it before playing 15.a4!. The white knight is going to take a fantastic position on c3, from where the pawn on d5 is going to be under attack and the f3-e4 idea is getting quite realistic.

18...♔d6 Mamedyarov decides to put his queen on c6. [Maybe 18...♔a5 would have been a better choice, but in any case White's advantage is clear.]

19.♘c3 ♕c6 20.♖fb1 White can always gain control over the b-file by playing Bf4 which makes things even harder for Black. Now the threat is to play Rb5.

20...♙a6 21.♔d1! Another great move by White. The white queen is going to take a perfect position on f3, attacking the d5 pawn and helping developing an attack on the kingside.

21...f6 Probably the only way to defend the d5 pawn in a nice way.

22.♙f4 [Maybe 22.♙h6 would have saved White a tempo?!]

22...♖ad8 Black tries to stay solid in a very passive and bad position.

23.♔f3 ♘f8 24.♙h6 White is not giving Black a chance to play Ne6 next. Black's pieces are almost totally paralyzed.

24...♗f7 25.♖b2 White continues to put his pieces to perfect positions. The b-file is now under eternal control.

25...♘e6 26.♖ab1 ♘g7 Black finally brought his knight into the game, but it does not improve his position a lot.

27.g4! Kramnik is correctly playing for domination. There is not reason to give Black an opportunity of playing Nf5.

27...♔g8 Black is doing bad, but solid. It is still not that clear how to break the black fortress.

28.♔f4 Kramnik continues what he started, improving the pieces to the maximum. Maybe White's idea could be to prepare f3-e4 now...

28...♔f7 Black probably doesn't have any better option than just keep on waiting. [A move like 28...♔d6 29.♔xd6 ♖xd6

would just lead to a very bad endgame.]

29.e4!? Finally Whites had enough of "slow play" and the action starts.

29...♘e6 [White calculated the forced line after 29...dxe4 30.d5 ♕d6 31.♖b7+! This move is not too difficult to find, but it still needs to be evaluated correctly. 31...♙xb7 32.♖xb7+ ♖e7 33.♔xd6 ♖xd6 34.♖xe7+ ♔xe7 35.♙xg7 And White's position is probably just winning. 2 pieces and a passed d-pawn is too much...]

30.exd5? White blunders after having played a great game. [30.♔e3 would have caused huge problems to Black. 30...♘c5 (After the more passive 30...♘c7 31.f3 White's position is just fantastic.) 31.exd5 ♕d7 (31...♖xe3 32.dxc6 ♖xc3 33.dxc5 White should be close to winning here.) 32.♔f3 White is a pawn up and the black king is more exposed than the white one, so White's advantage should be quite serious here.]

30...♘xf4 31.dxc6 At first sight this endgame just looks winning for White, but Black has a great trick:

31...g5!! It is quite obvious that Kramnik overlooked this reaction. Suddenly White cannot save the bishop on h6.

32.hxg5 What to do for White?! [It is not an option to play 32.h5 32...♖xd4 as with a dead bishop on h6 Black's position should be close to winning.; After 32.c7 32...♖xd4 33.hxg5 fxg5

34. ♖b8 ♗e6 it is also very hard to say whether White can save the game or not...]

32...fxg5

33.c7 Now Black has two very pleasant options: [33. ♗xg5?? of course just loses to 33... ♗h3+]

33...♖d6 [As already mentioned in the line above, the position after 33...♖xd4 34. ♖b8 ♗e6 is much better for Black.]

34. ♗xg5 It's better to get a pawn than nothing at all.

34...♗h3+ 35. ♖g2 ♗xg5 36.d5 White's position looks lost, but still 2 pawns and some active play can sometimes lead to complications, especially in zeitnot.

36...♗c8! A strong move. The black bishop is finally not staring at the c4 pawn anymore, but instead attacking the g4 pawn and stopping the c7 pawn.

37. ♖b8 White keeps on trying his chances. [37. ♗b5 loses on the spot after 37...♖xd5 38. ♗xa7 ♖d7!]

37...♖f6 It seems like Black has everything under control and just wants to play Rd4 next.

38. ♖a8! Kramnik finds the only resource to keep the game going. The idea is to play Rbb8 next.

38...♖f4 39.f3! Once again the only move to stay in the game.

[39. ♖bb8 is losing as after 39...♖xg4+ 40. ♖f1 ♗f3 a mate on g1 is coming.]

39...♖xf3? After having done everything right, Mamedyarov suddenly miscalculates, but the winning line was of course very hard to find... [39... ♗xf3 was the winning move. 40. ♖g3 I guess Mamedyarov stopped to calculate the variation here, but it was too early... 40...♖xg4+! 41. ♖xf3 And now Black has the amazing 41...♖g6!! What a fantastic move, which is of course very hard to find during the game. Black's position is totally winning because of the tactical threats and White cannot avoid losing some of his material.]

40.d6? And Kramnik also misses his chance to escape. [40. ♖bb8! White should have had no fear. 40...♖xc3 41. ♖xc8 Of course White's position looks very dangerous, but in fact Black doesn't have anything better than giving a perpetual check after 41...♖c2+ 42. ♖g3 ♖c3+ 43. ♖g2]

40...♗xg4 The time trouble is over and Black is back on the winner's road, although the position remains very sharp.

41. ♖xe8 Both players took some time to relax after the crazy zeitnot and the game continues on a high level.

41...♔xe8 42.♖b8+ ♔f7

43.♖d8! White finds the only practical chance. The idea of playing d7 next is a huge threat and although the white king is lonely and unprotected Black needs to play very accurately.

43...♕h3+ Of course Black has no time to lose.

44.♔h2 [44.♔g1 44...♖f1+ 45.♔h2 ♖f2+ would lead to the position in the game.]

44...♖xc3! The right move. [After the premature 44...♖f2+ 45.♔g3 ♖g2+ 46.♔f4! the white king would escape.]

45.d7 As we can see, things are looking very forced.

45...♖c2+ 46.♔g3 ♖g2+! Now the white king can't escape anymore.

47.♔h4 [47.♔f4 47...♕e6+! Black is just in time to cover everything. 48.♔f3 ♕xc7 49.♖f8+ ♔xf8 50.d8=♖+ ♕e8 Two pieces and two extra pawns should be enough to win the game easily.]

47...♕e6!! What a fantastic move! White is in time to queen, but not in time to save the game!

48.♖f8+ The only move. [48.c8=♖ would lead to mate in 2... 48...♕f3+ 49.♔h5 ♖h2# What a beautiful position!]

48...♔xf8? This move is so hard to understand! After playing some fantastic moves, Mamedyarov suddenly makes a huge error when the win was so close. [48...♔g6! was leading to a winning position. 49.♖g8+ (49.♖f6+ 49...♔xf6 50.d8=♖+ ♔f7 And as the white queen has no more checks Black will just mate the white king.) 49...♔h6! Now we are in a very forced line. 50.♖xg5 ♖h2+ 51.♔g3 ♕xd7 52.♖d5 ♖h3+ 53.♔g2 ♕c8 54.♖d8 At first sight the position might look like a draw, but once again Black's position is winning thanks to a beautiful resource:

54...c3! 55.♖xc8 c2 And Black is queening first...

49.c8=♔+! Exactly! [49.d8=♔+ 49...♔f7 was winning for Black.]

49...♔g7?! Mamedyarov panics... [The trick now is that after 49...♔f7 White promotes to a knight! 50.d8=♘+! Could it be that Mamedyarov blundered this?! 50...♔f6 But the position should still be close to a draw. 51.♘xe6 ♘xe6 52.♔xc4 ♔g7 With very good chances to save the game.]

50.♔b7! After this move, the game is over.

50...♘f3+ Nothing saves Black anymore. d8Q check is a threat and the rook on g2 is hanging.

51.♔xf3 ♔h2+ It is clear that Mamedyarov must have been very frustrated to see his position is now lost when the win was so close.

52.♔g5 h6+ 53.♔f4 ♔h4+ 54.♔e5 What an amazing game! All in all, it is clear that White should be very happy achieving a full point, although the first 30 moves of the game were clearly dominated by Kramnik, while the next 20 went to Mamedyarov. It is then only with the huge blunder 48...Kxf8 that Black made a present to his opponent. **1-0**

(2) Topalov, Veselin(2785) - Svidler, Peter(2758) [B49]

FIDE Candidates 2014(12.1),
2014.03.27

GM Arkadij Naiditsch
Best rating: 2737

We will see a great positional win by White, who manages to outplay his opponent in a very equal looking position. From the opening point of view, this game could also be very interesting.

1.e4 c5 2.♘f3 e6 Svidler as plays his favourite Paulsen. There are not many players from the top level who still believe in this opening.

3.d4 cxd4 4.♘xd4 ♘c6 [The Paulsen with 4...a6 is also a very fighting opening: 4...a6]

5.♘c3 ♔c7 6.♘e3 a6 So we are in the very main lines.

7.♘e2!? Not the most popular, but a very tricky move. [7.♔d2 would lead us to some sharp lines, for example like in the Karjakin-Svidler game that was played just a week ago during the Candidates.]

7...b5 The most critical move. [After 7...♘f6 the game could turn into the main Sheveningen line: 8.O-O ♘e7 9.f4 d6 10.a4]

8.♘xc6 dxc6 A very rare move and personally I think a very risky strategic decision. [8...♔xc6 would be the normal move, which was played in many games even on the top level. 9.♘f3 ♘b7 10.e5 ♔c7 11.♘xb7 ♔xb7 12.♔d3 With very unclear play.]

9.a4! Very strong play. White has no time to lose. If Black was in time to develop his pieces, White's position would not be better because of the great pawn structure a6-b5-c6.

9...b4 [It would be a bad idea for Black to try and keep his pawn structure: 9...b7?! 10.axb5 axb5 11.♖xa8+ ♕xa8 12.O-O followed by Qa1 and strong play on the a-file. Black is just not in time with his development.]

10.♘b1 The white knight is going to take a perfect position on c4.

10...♗f6 11.♘d2 c5 Black is trying to develop his bishop to b7, which is not a great position, but what else to do?! It is already clearly too late for switching the plan and playing e5-Be6.

12.f3! White defends the e4 pawn and puts a wall against the b7 bishop.

12...♕b7 13.♘c4 ♘d7 This move also just looks too slow... [It would probably have been a better choice to play 13...♕e7 14.O-O O-O 15.♖e1 with a similar idea as in the game to play c3 and White should be also be clearly better here.]

14.♖c1 Of course White could have castled first, but Topalov probably wanted to be sure that the Nb6 move never works. Now of course White always has the Bf4 idea.

14...♕e7 15.O-O O-O

16.♕f4!? A very nice positional move. Before opening the c-file with c3, White is weakening Black's position even more. [After 16.c3 16...bxc3 17.♖xc3 ♖fb8 White should still be better, but maybe Black would get some play on the b-file and Bf6 could also be strong at some moment.]

16...e5 Black doesn't have anything better than playing e5. In case of moves like 16...Qc8 of course the d6 square would get very weak.

17.♕g3 Now White has the double idea of playing Ne3-Bc4 and try to explore the d5 square, or to try and open the position by playing c3. At first sight the position could seem to be close to equal, but in fact White has a big advantage!

17...h6?! Strangely Svidler doesn't seem to hurry. His move is preparing Bg5, but now White is going to crush in the center. [17...a5!? with the idea of playing next Ba6 looks like a better option to me. Black really needs to act against White's c3 move.]

18.c3! Topalov continues to play in a great style. White is preparing his play on the c- and d-files.

18...a5 19.♖c2 White has no reason to hurry and first places his pieces to perfect positions.

19...♟a6 20.♞fd1 ♞fd8 21.b3 A move a move like b3 could be useful in the future.

21...♟g5 22.♟f2 Avoiding some of Black's tricks connected with playing Be3 at some good moment.

22...♞f8 Svidler tries to bring his knight to e6 and afterwards to threaten playing bxc3 and Nd4.

23.cxb4 Of course White doesn't wait for Black to play Ne6 next.

23...cxb4?! After this move, the game is maybe almost lost. [Black's position would be much more hard to break after 23...axb4 24.h4 ♟e7 25.♞e3 ♞e6 26.♟xa6 ♞xa6 27.♞c4 Of course White's position is much better, but Black is still fighting, especially with the upcoming Nd4 move.]

24.♟b6! White launches some concrete play to not give Black a chance to play Ne6.

24...♞xd1+ 25.♞xd1 ♞b8 [After 25...♞e7 26.♞d5 Black is already losing some material.]

26.♟f2 ♞c7 [And again Black is not in time to get the knight into the game: 26...♞e6 27.♞b6 ♞a7 28.♞d7 And White is an exchange up.]

27.♞d5 Once again 2 pawns are hanging, on a5 and e5.

27...♞c8 28.h4 Topalov decides not to give Svidler any

chances. [28.♞c5 also looks very strong. 28...♞d8 (28...♞xc5 This queen sacrifice doesn't work as after 29.♟xc5 ♞xc5 30.♞d1 White's advantage should be close to winning.) 29.♞xe5 ♞e6 30.♞d5 White is a clear pawn up.]

28...♟e7 29.♞d2 Now the pawn on a5 is already hanging.

29...♞d8?! And this last inaccuracy already leads to a lost position. [White would still have had to show some technique after 29...♟xc4 30.♟xc4 ♞d8 and Black is fighting in a very bad position.]

30.♟b6 The pawn on a5 is simply gone.

30...♞xd5 31.♞xd5 ♞b8 32.♞xa5 There are no more hopes for Black.

32...♟xc4 33.♟xc4 ♞d6 34.♟f2 The most simple, White prepares to play Qb6 followed by a5-a6-a7.

34...♞d1+ 35.♞h2 The position is just too hopeless. We just saw a really great positional game where White basically didn't have to calculate any variations and got a decisive advantage. A very nice game to learn from! **1-0**

(3) Andreikin, Dmitry(2709) - Topalov, Veselin(2785) [D30]

FIDE Candidates 2014(7.2),
2014.03.21

GM Csaba Balogh
Best rating: 2672

Andreikin scored his first win in a highly unusual game.

1. ♖f3 d5 2. d4 ♖f6 3. c4 e6 4. ♗g5 h6 5. ♗xf6 ♖xf6 6. ♖bd2

Andreikin employed this sideline successfully against Kramnik last year. That game continued with 6...g6 and was analyzed in detail in our newsletter. Topalov was well prepared and came up with an effective plan.

6... ♗e7 Black wants to finish the development as fast as possible with 0-0 followed by challenging the central pawns with c5. Usually Black is worried about getting his queen misplaced on f6, but here White cannot do anything with it.

7. ♖c2 This is the novelty. Hardly an improvement, but Black was also fine in the previous games.

7...O-O 8.e3 [White obviously should not go for poisoned pawn with 8.cxd5 8...exd5 9. ♖xc7? ♖c6 followed by Bf5 and Nb4, with more than enough compensation. White needs too many moves to castle.]

8...c5! With his Qc2 move, White wanted to prevent or at least make it harder to execute the c5 idea, but Topalov is not afraid of a pawn sacrifice for the initiative.

9.dxc5 [If White starts with 9.cxd5 9...exd5 10.dxc5 Black can either transpose to the game with Nd7 or he has an extra possibility of playing 10...♗f5]

9... ♖d7! Black would like to recapture the pawn. White should try to keep it somehow, otherwise Black simply ends up in a slightly better position thanks to the two bishops.

10.cxd5 exd5 [10... ♖xc5!? was an alternative to sacrifice a pawn. White still needs a few moves to secure his king's position, but this gives Black enough time to find counterplay. 11.dxe6 ♗xe6 12. ♗c4 (12. ♖d4 12... ♖ac8 looks very dangerous.) 12... ♗f5 White already has to be very careful to avoid getting into trouble. 13.e4! (13. ♖c3 13... ♖a4 14. ♖xf6 ♗xf6=+ wins back the pawn with a better endgame.) 13... ♖xe4! 14. ♖xe4 ♖g6 15. ♖fd2 ♗b4 Black wins back the piece, but White is just in time to solve the problems. 16.O-O ♗xd2 17. ♖xd2 ♗xe4 18.f3 with equality.]

11. ♖b3 Trying to hold the pawn as long as possible.

11...a5 12.a4 Knowing the consequences, this is a slightly risky decision.

[12. ♗e2 was safer, although it gives Black a very easy game. 12...a4 13. ♖bd4 ♖xc5 14.O-O ♗d7 Black has an isolated pawn, but the two bishops and the active pieces give him the initiative. Rfc8 is coming next with a tempo.]

12...b6! Black wants to open the files as long as the king stands on e1! The bishop is coming to b4 with a really unpleasant check!

13.c6! The only chance to keep the position closed.

13...♗b4+

14.♔d1! Of course such moves are not advisable in general. However in the current position this is the best chance. White is going to place his knight on d4 and his bishop on b5. The structure is static, therefore it is very difficult to open the center on the d1 king. [14.♖bd2 would have strongly been met by 14...♗c5 15.♗b5 ♕f5 Black at least wins back the b2 pawn as Qc1 loses to Nb3.]

14...♗c5 [14...♗b8!? was a good alternative, but for such a strong dynamic player as Topalov, such backward moves are not coming into his consideration. White cannot hold the c6

pawn for long... 15.♗bd4 ♕c5 16.♗b5 ♕g4! Threatening to play Bxd4, therefore the only move is 17.h3 ♕xf3+ 18.♗xf3 ♗xc6 Black restored the material balance and is ready to open the center with d4! Black has an edge here.]

15.♗bd4 ♗e4? An active move, but Topalov misses Andreikin's subtle plan and he soon ends up without compensation. [The key of Black's counterplay would have been to destroy the stability of the d4 knight. The most effective way to do this was 15...♗g4! 16.♗b5 ♗e6! 17.♔c1 ♕c5! Black focuses all his pieces on the two white knights. White cannot hold them for long, which means the salvation of Black's problems.]

16.♗b5 g5? Topalov was sure that the only way to connect the rooks and give shelter to his king was Ke2, Rhd1 and Kf1, therefore he prevented this idea with the g4 plan and the f2 falls. However, Andreikin had a different idea in mind, where he could hide his king and the g5 move soon becomes a self-destructing operation... [16...♗g4 was more natural, although there is no full compensation after 17.♔e2!± (17.♔c1 is less clear now because of 17...♗h5! and Bg6 next.)]

17.h3 h5

18.♔c1! An unique idea by Andreikin! The point is already clear: he simply wants to play Kb1-a2 and Rad1, executing an

artificial long castle. The d4, b5 and c6 pieces are so stable that Black has no chances to create any counterplay.

18...♙c5 [The tactical justification of White's plan was that 18...g4 19.hxg4 hxg4 is met by 20.♙b1! White can simply ignore the hanging piece, because after gxf3 gxf3 he gets an enormous attack on the kingside. 20...gxf3 21.gxf3 ♘g5 22.♙a2! The a1 rook joins the attack. An illustrative line to finish the game is 22...♖e8 23.♖ag1 ♙f8

24.♖xg5! White had other wins too, but this is the most pretty one. 24...♖xg5 25.♖h8+ ♙e7 26.♖xe8+ ♙xe8 27.c7+! ♙f8 28.♖c6! winning the a8 rook and the game as 28...♖a7 loses to 29.♖e8+ ♙g7 30.♖xc8+- the c-pawn promotes soon.]

19.♙b1 Only one move is left to connect the rooks.

19...♖e8 [19...g4 is met by the same as before: 20.hxg4 hxg4 21.♙a2+-; 19...♙xd4 20.exd4 (The endgame after 20.♙xd4 20...♖xf2 21.♖xf2 ♙xf2 22.♖c1± is also very promising. White advances his c-pawn next. He can activate his a1 rook along the 3rd rank.) 20...♙f5 21.♙d3+- followed by Ne5 with an healthy extra pawn and a better position for White.]

20.♙a2 ♖a7 Black has basically lost the battle. He is a pawn down and left without any counterplay. White brings both of his rooks to the game.

21.♖ad1 ♙f8 Black has no useful move... Perhaps Topalov

wanted to get his king away from the kingside in order to sometimes threaten to play g4, but White parried this idea forever with his next move.

22.♖hf1 Protecting the f2 pawn in order to free the f3 knight.

22...♙g7 [22...g4 already doesn't make any sense as the f2 pawn is not hanging. 23.hxg4 hxg4 24.♙g1+- followed by Ne2-f4.]

23.♙a1!? White does not need to hurry. Andreikin hides his king to the safest square on the board. He already prepares for the forthcoming plan of winning the d5 pawn and he leaves from the Be6 pin just in case.

23...♙f8

24.♙e2! All white pieces are improved to the maximum, it is time to deliver the final blow!

24...♖d8 25.h4! Working out the f4 square for the knight.

25...g4 26.♙f4! This double threat on h5 and d5 finishes the game.

26...♙g8 27.♙xd5 [Black resigned in view of 27.♙xd5 27...♖f5 28.♖xe4 (28.♙xb6+- is equally good.; 28.♙d4 28...♖xd5 29.♙b3+- also wins on the spot.) 28...♖xe4 29.♙f6+ ♙g7 30.♙xe4 ♖xd1+ 31.♖xd1 gxf3 32.gxf3 ♙e7 33.♙d6+- With a decisive material advantage. The

cold-blooded king maneuver brought White the full point. It was working extremely well in this game, but we don't recommend to try this in your own games, only in some exceptional cases.] **1-0**

(4) Mamedyarov, Shakhriyar(2757) - Aronian, Levon(2830) [E20]

Khanty-Mansiysk RUS(9.3),
2014.03.23

GM Csaba Balogh
Best rating: 2672

At this moment of the tournament Aronian was sharing the lead with Anand, but he had to press in each game to win the tournament regardless the color he played. Mamedyarov was ready for the complications and an amazing game was played...

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.f3 The Nimzowitsch with 4.f3 is a guarantee for a sharp struggle! It did not take Aronian as a surprise and he blitzed out the following rare, but very interesting moves...

4...O-O 4...d5 or 4...c5 are considered to be the main lines nowadays.

5.e4 d5 6.e5 ♘fd7 7.cxd5 [A nice opening trap occurs after 7.a3?! 7...♙xc3+ 8.bxc3 dxc4 9.♙xc4? Otherwise Nb6 saves the pawn, but now a pretty tactical idea wins material using the misplacement of the f3 pawn.]

9...♘xe5! 10.dxe5 ♙h4+ and the bishop is lost.]

7...exd5 8.a3 [A principled move is 8.f4 with the idea to get the ideal development of the pieces after Nf3 and Bd3, but Black quickly uses his lead in the development and opens the center with 8...c5!]

8...xc3+ 9.bxc3 f6! Black has to undermine the center, otherwise he ends up in a bad position with a huge space disadvantage.

10.exf6 A sad necessity. [There is no time for holding the structure with 10.f4? because of the tactical strike 10...fxe5 11.dxe5 Nxe5! 12.fxe5 Qh4+ and White collapses as after 13.Qd2 Qf4+-+ the f1 bishop falls.]

10...Qe8+!? This is basically the novelty of the game. The position remains unclear, but objectively I believe Black is fine! I am quite sure that this line is going to be tested more frequently from now on. The move intends to disturb the development of the white pieces. [10...Qxf6 was mainly played before, but now White could finish the development with 11.Qd3 and Ne2 next.]

11.Qe2 In case of Be2 or Ne2, Black simply recaptures with Nxf6 and White faces difficulties with finishing the development. Now the queen gets misplaced, it prevents the Bd3, Ne2 plan, but at least he wins some material.

[11.Qf2 runs into 11...Nxf6 with the threats of the unpleasant checks on e4 and g4.]

11...Qf7! White would have been happy to play the endgame with the bishop pair, but of course Aronian had different ideas in mind.

12.fxg7 Qe8 13.Qe3

13...Nc6! Aronian was still blitzing the moves. Quite an unpleasant feeling, but Mamedyarov has managed to come up with the best reaction. Many players would have quickly collapsed with such a pin on the e-file and the threat of Na5-c4!

14.Qd2! Evacuating the first piece from the pin. It seemingly moves into the Nc4 motif, but White had a clever exchange sacrifice in mind... [The idea to close the e-file with 14.f4 with the idea of Nf3-e5 fails to 14...Nf6! 15.Nf3 Qg4! and White does not succeed to get his knight to e5, which means he ends up in trouble.; 14.Qf2 would also have been met by 14...Nf6! again with the threats of Ng4 and Ne4.]

14...Na5! Nb3 is threatening and the other knight is ready to go to b6 and from there to c4.

15. ♖b1! ♜b6

16. ♖b4! There was no other way for White to continue the game. Mamedyarov wants to sacrifice the exchange and afterwards he will finally be able to finish the development. He will have a small material disadvantage, but he might hope for adequate compensation against the exposed black king.

16... ♜ac4 17. ♕xc4 dxc4 This seems like the first inaccuracy by Black. Aronian wants to settle his knight on d5, so White is forced to continue his exchange sacrificing policy. [17... ♜xc4! seems to be stronger. 18. ♖xc4 dxc4 19. ♖f2 ♕f5 20. ♜e2 ♕d3 21. ♜f4 ♖e7! 22. ♖e1 ♖ae8 23. ♜xd3 cxd3 24. ♖xd3 This line was more or less forced from White's point of view and materially he is already doing fine. However the pin on the e-file seems to give Black an edge as White is lacking any dynamic play. 24... ♖b3! followed by b5-a5-b4 seems to be very strong. It is difficult to suggest an idea for White and otherwise Black is just better.]

18. ♖b5! The desperado rook continues its journey and White is now ready to sacrifice it on d5! A mutual inaccuracy is coming in the next pair of moves...

18... ♕f5 [18... ♜d5 was more forcing. 19. ♖xd5 ♖xd5 20. ♜e2 ♕f5 21. ♖f2 and we transpose to the game.]

19. ♖f2 [19. ♖e5!? White could have finally solved the

problems on the e-file without giving material for it. Ne2 is coming next and White is suddenly doing fine.]

19... ♜d5 20. ♖xd5 ♖xd5 21. ♜e2 We have reached the next critical position. In comparison to the 17... Nxc4 line, the queen on d5 stands in the Nf4 tempo. Objectively Black should still be fine, but from a practical point of view it is already easier to play the position with White. His plans are suggesting themselves, while Black must always choose between several options and it is very difficult to give a preference to one of them.

21... a5 It is a very logical plan to create counterplay on the queenside with b5-b4, but after all it turns out to be a mistake. [Now on 21... ♖e7 22. ♕g5 is unpleasant, because Re6 runs into Nf4, while to take the g7 pawn is not an advisable idea, because that plays an important defensive role from Black's point of view. That could be met by Bf6!; I believe the best was 21... ♖ad8! 22. h4 ♖d7 trying to double the rooks like this. The position is very unclear and all results are possible.]

22. h4! White would like to defend his g7 pawn with h5-h6. Capturing it always allows plans like Bf4-e5 followed by Qg5, with a very dangerous attack.

22... b5 [22... ♖a6 was another idea of a5, but White could continue his initial plan with 23. h5 because Rae6 runs into Nf4!]

23.h5 b4 The consequent continuation of a wrong plan! Black sacrifices a pawn, but he can finally activate his rook along the a-file.

24.cxb4 axb4 25.axb4 ♖b5 Aronian was annoyed by the Ra3 Nc3 idea and he prepares to take the b4 pawn in this case. However from this moment on, Mamedyarov sizes his initiative with each move! [25...♖a3 runs into 26.♘c3! and somehow the only logical place for the queen was on d6, but then Nb5 works. After other moves, like 26...♕f7 27.h6 White is doing very well.; 25...♙d3! would have been the only chance, now on Nc3 Qd6 is possible and the b4 is under attack. 26.♘f4 ♕d6 27.h6 ♖a3 With mutual chances, but I already prefer White, as if he could give a check that would be decisive.]

26.♖e1 A good prophylactic move against Ra3.

26...♙d3 [The initial idea of the previous Qb5 to play 26...♖a3 is refuted tactically by 27.♘c3 ♕xb4

28.♙h6! Using the power of the g7 pawn, White is threatening with deadly checks on the back rank. 28...♖b8 (28...♖xe1 29.♕xe1 ♙d7 30.♘d5! ♕xe1+ 31.♙xe1+- Ne7 or Nf6 wins.) 29.♕e3!+- is over. Black cannot parry the Qe8 threat!]

27.♘f4 ♖a3

28.d5! Very well played! One check could be decisive, but for this White needs to open the e-file. He is ready to play Bd4 or Bc5.

28...♙b1!? Nice resource by Black, but it does not help. He creates the threat of Ra2 and also prepares to push c3 as the d3 is not hanging anymore. The bishop should not be taken because of Rae3. [28...♖e8 could lead to something similar as in the game. 29.♙g3! Preventing Ra2. 29...♖a2 30.♕c3+- Black is in trouble.]

29.♙g3! As simple as that! White leaves from the Ra2 threat and he refreshes his ideas with Bd4 or Bc5.

29...c3 30.♕c1! A double attack. The bishop and the rook can only be saved with Rb3, but this lures away a defender from the 8th rank. Black can no longer think about Raa8...

30...♖b3 31.♙c5 ♖xe1 [31...c2 is met by 32.h6+- with the idea of Nh5-f6!]

32.♕xe1 ♕d7 White can choose between different wins here, but Mamedyarov continues with the most human moves.

33.h6 ♖f7 34.♘h5! [The machine suggests the even stronger 34.♖e5! with the idea of Nh5-f6. 34...♙f5 35.♘h5!! ♖xh5 36.♖e7! ♖g6+ 37.♙f2 ♖b2+ 38.♙e3 ♖xh6+ 39.f4 and mate is inevitable, but of course only a computer would play like this. 39...♖xg7 40.♖e8+-]

34...♙g6 Allowing a beautiful combination to finish the game, but it was over anyway. [34...♖xh5 35.♖e6+ ♖f7 36.♖c8+-; 34...♖g6+ 35.♙h4+- Black runs out of checks.]

35.♖e8+!! ♖xe8 36.♘f6+ ♙f7 37.♘xe8 White is ready to jump back to f6 with his knight.

37...♖a3 The only way to stop White from queening, but this leads to a hopeless bishop endgame... [37...c2 leads to a forced mate after 38.♘f6! c1=♖ 39.g8=♖+ ♙xf6 40.♖e6+ ♙g5 41.♖g4+ ♙f6 42.♙d4+ ♙f7 (42...♙e7 43.♖e6+ ♙d8 44.♙f6#) 43.♖e6+ ♙f8 44.♙g7#]

38.♘f6 ♖a8 39.g8=♖+ ♖xg8 40.♘g8 ♙xg8 41.♙f4 White is two pawns up. The technical part of realizing the advantage is quite easy. White can create passed pawns on both sides, which is the key of the opposite colored bishop endgames....

41...♙d3 42.♙e5 ♙f7 43.♙e3 ♙f1 44.g4 [Black resigned in view of 44.g4 44...♙e2 45.d6! cxd6+ 46.♙xd6 ♙xf3 47.g5 ♙e2 48.♙c5 and White simply promotes the b-pawn with the help

of the king. The black king cannot go to that direction because it always allows the breakthrough of g6 hxg6 h7! The bishop stands very well on e3, because it protects the g5-h6 pawns and neutralizes the c3 pawn. A great game and a fantastic win for Mamedyarov. But from the opening point of view Black could have gotten an edge if he had played 17...Nxc4.] **1-0**

(15) Topalov, Veselin(2785)
- Karjakin, Sergey(2766)

FIDE Candidates 2014(11.2),
2014.03.26

GM Arkadij Naiditsch
Best rating: 2737

After a long game Black had to defend a slightly worse endgame and it finally seems like he is almost done with a defence. But accurate play is still needed.

38...♟xb6! A great decision by Karjakin. Black is giving up the exchange but clearly getting enough compensation. [Of course a move like 38...♞f5 should be enough to make a draw, but still Black would need to be a little bit careful after 39.♞xa5 ♟xb6 40.♞xa6 ♟xe3 41.♞xb7 ♞xb7 42.♞xe3 as White keeps some minimal chances for a win.]

39.♞ab2 White has no choice but to take the exchange.

39...♟xe3 40.♞xb7 ♞xb7 41.♞xb7 ♟c5 This is not an easy position to evaluate. It seems like White could be doing a bit better, but in fact the position is just a draw. The black bishop

on c5 is a monster pieces and Black has enough time to bring his a5 pawn to a3. Another option is to play h4 in a good moment and maybe even to be lucky to get the king to f4 after that.

42.♞b8 White needs to bring the rook to the 8th rank, from where it is possible to give checks or to play Ra8-Rxa6.

42...a4

43.♞d1! White is keeps control. [A careless move like 43.♞a8? 43...a3 44.♞xa6 would already lead to a winning position for Black! 44...h4 45.g4 h3 46.♞f1 ♞f6 And White cannot stop Black from playing e4 next. 47.♞a8 e4! followed by Ke5-Kf4 with an easy win]

43...h4 44.♞g8+ ♞f6 45.g4 Now the white rook is going to protect the h-file, the king will take care of the a-pawn and position is just a draw.

45...♟f2 46.♞h8 ♞g7 [An attempt to break through now leads to unclear play: 46...e4 47.fxe4 ♞e5 Now White has the important 48.♞f8! followed by Rf5 check and I think only Black is risking something here.]

47.♞h5 ♞g6 48.♞c2 And we can already see that both sides cannot do much here...

48...♙d4 49.♚b1 a3 50.♚a2 ♙b2

51.♙b3 The position is just a draw.

51...♙c1 52.♚a2 ♙b2 53.♙b3 a5 54.♚a2 a4 55.♙b1 ♙d4
56.♙a2 ♙b2 57.♙b1 ♙d4 An interesting endgame and we just saw how easy it could be to lose a drawn position by being a bit too careless... 1/2-1/2

FIDE Candidates 2014,
2014.03.22

GM Csaba Balogh
Best rating: 2672

Black has an extra pawn, but the doubled g-pawns can hardly be called a decisive factor and also the opposite colored bishops are increasing the chances of the defensive side. However Karjakin finds a brilliant way to convert his advantage.

64...♖xd4!! Black eliminates the bishop and the doubled g-pawns turn out to be fatal. [It is interesting to study the consequences of the bishop endgame: 64...♖xg7 65.♙xg7 g4 (It is important that Black cannot try to cut the white king's way towards the g-pawn with 65...♙e3 because of 66.♙h6!) 66.♙d2 g3 67.c5 White puts his pawns on dark squares to avoid getting attacked by the bishop. 67...♙f3 (67...g2 68.♙d4 ♙g3 69.♙g1 makes no difference.)

68.♔e1! Only this way White can hold. (68.♙d4 instructively loses to 68...♙g2! 69.♔e1 ♙h1!—+ and the pawn promotes.) 68...g2 (Now on 68...♙g2 69.♙e5! this is the key and the king can neither go to h1 nor to f2. 69...♙d3 70.b4 ♙h3 71.a3 g2 72.♙f2=) 69.♙d4 And it looks like White has created a successful blockading position! The only attempt could be to go for the queenside pawns with the king. 69...♔e4 70.♙g1 ♙d3 71.♙f2 ♔c3 72.♙h2 ♙b1 (On 72...♔b2 the easiest draw is 73.b4 ♙xa2

74.♙f4! ♔b3 75.♙d2= followed by Be1 and waiting with Kg1-f2. Black cannot create a passed pawn on the queenside, which would be obligatory for the win.) 73.♙e5+ ♔c2 Here the situation is more tricky, but White can achieve a study-like draw by playing 74.a4! ♙xb3

75.a5! This is of course logical, followed by putting the bishop to b6 and then passing with the king, but it is far from over, because Black can create a zugzwang. 75...♙e4 76.♙c7 ♙b4 77.♙b6 g5 78.♙g1 g4 79.♙f2 g3+ 80.♙g1 ♙c6 Here it is! White is forced to give up one of his pawns. 81.♙c7 ♙xc5 82.♙b6+ ♔c4 White is forced to move again with the bishop, which allows Black to create his passed pawn. 83.♙d8 b5! 84.axb6 ♙b7 It seems to be over, but actually the game is drawn because Black cannot promote his a-pawn because White sacrifices his bishop and a stalemate arises. 85.♙e7 a5 86.♙d6 a4 87.♙e7 ♙b3 88.♙d6= and a3 is met by Bxa3. Black can only avoid stalemate by giving up his g2 pawn, but then the g3 also falls and there will be no winning material left on the board.]

65.♙xd4 b6!! Another very cool move! Karjakin does not hurry with pushing his passed pawns, but he spends a tempo on protecting the important b-pawn. [65...g4 is met by 66.♙xb7 g3 67.♙e7 g2 68.♙e1 ♙f3 69.b4 White gets his counterplay! 69...♙f2 70.♙c1 g1=♔ 71.♙xg1 ♙xg1 72.b5 axb5 73.cxb5 and the game is drawn by force. 73...g5 74.b6 ♙c8 75.♙e5 and Black loses the g-pawn in any case. 75...g4 (75...♙f2 76.b7! ♙xb7 77.♙f5=) 76.♙f4= followed by b7.]

66.♙c3 Svidler tries to get his king behind the g-pawn, but another brilliant move is coming by Karjakin... [White has no time to go for the b-pawn: 66.♙b7 66...g4 67.♙xb6 g3—+ and

Re6-e1 does not work now.; 66.♖e7 66...g4 67.♖e1 ♔f3 68.b4 g3—+ The pawn inevitably promotes and White is unable to create any counterplay.]

66...♔e3!! After cutting the king, Black only needs to push his pawn. Svidler tries his only chance... A very nice example where the bishop simply dominates the rook.

67.♖b7 g4 68.♖xb6 g3 69.♖d6 Hoping for the same salvation as in the 65...g4 line, but things are different now because the white king stands further from the g-pawn.

69...g2 70.♖d1 g5 [70...♔f2 will lead to the same.]

71.b4 ♔f2 72.a4 White tries a kind of pawn race, but he is slower... [72.b5 also fails in view of 72...axb5 73.cxb5 g1=♖ 74.♖xg1 ♔xg1 75.♔d4 g4 76.♔e5 ♕c8 77.♔f4 ♔f2—+ White is missing one tempo, he should play b7 now...]

72...g1=♖ 73.♖xg1 ♔xg1 74.b5 axb5 75.axb5 g4 76.c5 g3 77.c6 [77.b6 is worse because after 77...♕e4 White cannot advance his pawns.]

77...g2 78.b6

78...♔f2! The only winning move! The point becomes clear 3 moves later.

79.b7 g1=♖ 80.b8=♖ ♖c1+ 81.♔d4 Otherwise White loses his queen right away.

81...♖e3+! The winning check! That is why the king must stay on f2!

82.♔c4 [82.♔d5 also drops the queen after 82...♕e6+ 83.♔d6 ♖f4+ 84.♔xe6 ♖xb8—+]

85.♔d7 If the pawn gets to c7, the game would be a theoretical draw, but Black can avoid it by playing 85...♖b5! (After let's say 85...♔e3?? 86.c7 ♖b5+ 87.♔d8 ♖d5+ 88.♔c8 the king is heading to the corner. 88...♔d4 89.♔b8 ♖d6 90.♔a8!= And White is saved by the famous stalemate idea! The same

stalemate idea also works with an a7, c7, f7 and h7 pawn, but with the b7, d7, e7 and g7 pawn Black is winning.) 86.♔d6 ♕e3 and now c7 does not work anymore because of 87.c7 ♖e8--+]]

82...♗e6+ White resigned as Qb3 is coming next! Brilliant endgame technique by Karjakin! **0-1**

Clash of the Titans

(17) Petrosian, Tigran V

Best rating: 2655

1.c4 e6 2.d4 d5 3.♘c3 ♗e7 4.♗f4 ♘f6 5.e3 O-O 6.♖c1 c5 7.dxc5 ♘c6 8.♘f3 ♗xc5 9.a3 We can find this position even on the highest level nowadays.

9...d4 [9...dxc4 10.♗xc4 ♖xd1+ 11.♖xd1 b6 12.♖e2 ♗b7 13.♖hd1 gives White some edge in the endgame thanks to his better development, especially as the white king is closer to the center.; 9...a6 10.cxd5 exd5 11.♗d3 ♗a7 12.O-O d4 A typical plan to get rid of the isolated pawn but after 13.exd4 ♘xd4 14.♘xd4 ♖xd4 15.♗e3 ♖h4 16.♗xa7 ♖xa7 17.♖a4 ♖xa4 18.♘xa4 White keeps the initiative in the endgame anyway. Black needs to play accurately to consolidate his pieces.]

10.exd4 ♘xd4

11.♘e5 [11.b4 11...♘xf3+ 12.♖xf3 ♗d4 Black wants to push e5-e4 to get counterplay. 13.♘b5 e5 14.♗g5 ♖e8 15.♗xf6 e4 16.♗xd8 exf3+ 17.♖d2 ♖xd8 18.♘xd4 ♖xd4+ 19.♖c3 fxg2 20.♗xg2 ♖g4 21.♖hd1 And thanks to his more active pieces White is clearly better here, as in the Gelfand-Grischuk game.]

11...b6 is a normal way to develop, but Black could also try [11...a5 The idea is to prevent b4 but Black is losing too much time. 12.♗d3+; 11...♘c6 12.♘xc6 bxc6 The structure should not be a problem because Black is much better developed. 13.♗d3 (13.♖xd8 13...♖xd8 14.♗e2 ♗d4∞ With c5 or e5 next.) 13...♗xf2+ 14.♖xf2 ♖d4+ 15.♖f3 e5 16.♗e3 e4+ 17.♘xe4 ♗g4+ 18.♖f2 ♘xe4+ 19.♗xe4 ♖xe4 With equal play.]

12.♗d3 ♗b7 13.O-O

13...h6?! I don't like this move at all. The pin after Bg5 seems

to be dangerous and in my opinion Black is just losing time and weakening the king, as White will have possibilities to sacrifice on h6. [13...♖c6 14.b4 (14.♖xc6 14...♗xc6 15.♕g5 h6 16.♗h4 ♔d4⇒) 14...♗e7 (14...♗d4

15.♖f3! A strong move. White is simply hunting the black bishop. 15...e5 (15...♗xc3 16.♔xc3 ♔c8 With a solid but slightly worse position for Black.) 16.♖xd4 exf4 17.♖xc6 ♗xc6 18.♔e1 And White keeps a stable advantage thanks to his better structure.) 15.♔e2 ♔d4 16.♖xc6 ♗xc6 17.♕g5 ♗d6 With the idea to exchange queens after Qe5. (17...h6 18.♔fd1!) 18.♗xf6 ♔xf6 19.♗e4 ♔ac8 20.♗xc6 ♔xc6 21.♖e4 ♔e7 And Black equalizes.]

14.♔e1 ♖c6

15.♔c2! White is going to activate the rook over the d2 square. [15.b4? is a blunder because of 15...♗xf2+ 16.♔xf2 ♔d4+

17.♔g3 g5—+; 15.♖xc6 15...♗xc6 16.♔e2 a5 17.♔cd1 ♔e7=]

15...♔c8? The idea is to play Nxe5 and Qc6 to pressure the g2 square, but this move is a mistake. [15...♔d4 16.g3 (16.♗g3 16...♖xe5 17.♗xe5 ♔g4! The idea of exchanging the queens by playing Qd4-Qg4 is thematic.) 16...♖xe5 (16...♔ad8 17.♖b5 Trapping the queen.) 17.♗xe5 ♔g4 18.♗xf6! ♔xd1 19.♔xd1 gxf6 20.♗e4 Eliminating the pair of bishops, otherwise Black will play f5 and get a better endgame. 20...♗xe4 21.♖xe4 ♗e7 22.♔d7 ♔fe8

23.g4! Preventing f5.; 15...♔e8 The idea is the same as in the game but this move is more accurate and we will soon see why. 16.♖g4 ♖xg4 17.♔xg4 f5 18.♔g3 ♔f6! and compared to the game the queen is better placed on e8 and now the threat is Rg6, attacking the g2 square.]

16. d4! Easy but strong. White simply eliminates the knight from f6 which helps defend the black king and after that White will get a strong attack.

16... dxe7 17. dxf6+ [17. dxf6+! 17... gxh6 18. dxf6 d8 19. e3 And Black is not able to defend his position.]

17... dxf6 18. dxe4 [18. dxb5 18... d4 19. dxd4 dxd4=]

18... dxe7

19. g5 Slowly all white pieces start to attack the king and Black's position is already very bad.

19... d8? The decisive mistake. Maybe Black could still have fought after [19... d4 with the idea to bring at least one piece to defend the kingside. 20. dxf6 My intuition tells me that after this move Black should not survive, which is probably true but Black will have some defensive resources. 20... gxh6

(20... f5

21. dxf6! dxf6 22. e3 c7 With the idea to sacrifice the queen on g3. (22... fxe4 23. g3+ f6 24. g5+ f7 25. g6#) 23. d5 dxf6 24. g5+ f7 25. h5+ g7 Ke7 was not possible because of Qh4+. 26. g3+ dxf6 27. hxg3 dxc2 28. g5+ f7 29. xc2 With a material advantage for White.) 21. c3 (21. e3 21... f5 22. d3

Editorial Preface

The Candidates tournament is over. Anand is the new challenger for the World Championship Match against Magnus Carlsen!!! Who would have guessed before the tournament that Anand would have his comeback... With very good and solid play Anand managed to win 3 games and make 11 draws, which was more than enough for the first place. Congratulations!

2nd place went to Karjakin, who started very badly with 2.5/7 and finished with an amazing 5/7 in the second leg of the event, beating Aronian in the last game with Black.

A very big surprise was the -1 score of Aronian, who was clearly one of the favorites to win the event, and it seems like he will have to wait at least 2 more years before getting a chance to grab the World crown.

I guess Kramnik cannot be too happy with 50% either, he made too many easy blunders which are very untypical for him and made his play look very unstable.

All in all, it was probably one of the most fighting events we ever saw, where everybody was beating everybody (except for Anand). It has been really great fun to watch!

The Polish Championship has ended with a victory of Wojtaszek, but just on a tiebreak, over Gajewski, as they both scored 7/9. 3rd place went to the young Polish talent Duda who lost the last 2 games and finished on 6/9.

The Latvian Railway rapid tournament was won very convincingly by Ivanchuk.

The Chebanenko Memorial in Moldova, another rapid tournament, was won by Bologan.

That's all for this week and we wish you a lot of fun watching the finals of the German Bundesliga in Eppingen, with all the 16 teams playing in the same place!

Arkadij Naiditsch & Csaba Balogh

**(1) Duda, Jan-Krzysztof(2563)
- Wojtaszek, Radoslaw(2713) [B96]**

Polish Championship(8),
2014.04.01

GM Arkadij Naiditsch
Best rating: 2737

We will see the crucial game of round 8 for the 1st place in the Polish Championship. At that moment the young Polish GM Duda was leading with an amazing 6/7, followed by Gajewski on 5.5/7 and Wojtaszek on 5/7. A win was almost a must for the Polish Nr1, who has been the second of Anand for many years. What is hard to say is if Radoslaw even made one move by himself in the current game!? We will witness an amazing preparation in an extremely sharp line of the Najdorf.

1.e4 Duda is just 16 years old and seems to be great in tactical positions. He is playing the Najdorf himself with Black, so from the beginning it was clear that the game was going to be an extremely fought one.

1...c5 The Najdorf is also the main opening of Wojtaszek. Maybe it is because he is working with Anand or just because he worked by himself a lot, but Radoslaw became a theoretical beast, especially in his main repertoire.

2.♘f3 d6 3.d4 Sometimes when you are young, you want too much and too quickly... [Looking at the tournament situation and realizing that the opening knowledge of your opponent is probably bigger than yours, a positional line like 3.♙b5+ was probably a better practical choice.]

3...cxd4 4.♗xd4 ♗f6 5.♗c3 a6 So we are in the main position of the Najdorf.

6.♘g5 This is probably the most concrete and sharp answer for White. [During the Candidates, we saw a lot of games on 6.h3 but of course this can't be the critical line to put the Black into trouble. A nice game to watch here is Anand-Mamedyarov, where Black equalized quickly.]

6...e6 7.f4 h6 Not that long ago Black started to include 7...h6 before playing Qb6. [For many years 7...♖b6 was one of the main moves in the position but it seems like at the current moment the position after 8.♖d2 ♖xb2 9.♖b1 ♖a3 10.e5 is evaluated as dangerous for Black.]

8.♘h4 ♖b6

9.♖d2 Not the only option for White. [9.♖d3 and; 9.a3 are the other main choices, especially since 9.a3 makes sense now, to try and make use out of Black's h6-Bh4 inclusion other than by playing Bf2.]

9...♖xb2 The beginning of a very sharp and forced line.

10.♖b1 ♖a3 11.e5 [Another main line was 11.f5 but it seems that it leads to a draw after: 11...♘e7 12.fxe6 fxe6 13.♘c4 ♘xe4 14.♘xe4 ♘xh4+ 15.g3 ♘g5 16.♘g5 hxg5 17.♘xe6 ♘xe6 18.♘xe6 ♖xg3+ 19.hxg3 ♖xh1+ 20.♖e2 ♖h2+ 21.♖e3 ♖xd2 22.♖xd2 ♖a7 with an equal position in Vallejo-Morozevich 2011.]

11...dxe5 12.fxe5 Now Black has 2 choices:

12...g5! is clearly the most critical continuation. [12...♘d5 is the other main choice, but now another very forced line leads to a dangerous position for Black: 13.♘xd5 exd5 14.e6 ♘xe6 15.♘xe6 fxe6 16.♘d3 ♘e7 17.♘g6+ ♖d8 18.♘xe7+ ♖xe7 19.O-O ♘d7 20.♖f7 ♖c5+ 21.♖h1 ♖f8 22.♖xg7 ♖f6 23.♘d3 and I think Black is risking clearly more than he can gain here, like in Naiditsch-Yilmaz 2013.]

13.exf6 gxh4 14.♘e2 Of course this is all still theory and Wojtaszek has even played a game here. The position is very forced and hard to evaluate. A lot of crazy computer lines, a lot to remember. Basically White is either going to mate or he is going to be in trouble because he is a pawn down, has no bishop pair and a bad pawn structure.

14...♖a5! A very strong move and of course still a theoretical one. The black queen is going to take a great position on g5 and is now preventing White from playing Bh5.

15.O-O ♘d7 16.♖h1 We are still following the game of Nisipeanu-Wojtaszek from 2011. But a lot of new games have also been played in this position.

16...♖g5 We are slowly reaching the main position.

17.♖f4 e5 Black is forced to accept the challenge as White wanted to play Ne4 with a winning position.

18. ♖d5 White is sacrificing a piece to try and crush Black's position.

18...exd4 19. ♖xd4 ♔d8! This is still theory and the only move for Black. We finally reached the main position for analysis. as I analysed the current situation a lot myself, because it is critical for the evaluation of the line with 7...h6. But even with a good computer it is very hard to make a clear suggestion of what to do next or to be sure about the correctness of the analyses as the position is very complex.

20. ♗g4N This move seems to be a novelty, but clearly it was not a surprise to Wojtaszek. The white queen has no good squares now. [Nisipeanu continued with 20. ♖d1 and Black replied with the very strong 20...h3! 21.g3 ♗d6 and after a tactical battle Black won the game.; 20. ♗e7!? seems to lead to a forced draw. 20...♖e5 21. ♖d2 ♗xe7 22.fxe7+ ♖xe7 23. ♗g4 What a crazy position, but computers are very strong here: 23...f5! Strangely this is the best move for Black here. 24. ♖xf5 ♖e8 25. ♖d5 b6! 26.h3 ♔c7 27. ♖xh6 ♖b8 28. ♖f4+ ♔b7 29. ♖d4 ♔c7 30. ♖f4+ With a draw like in Guseinov-Areschenko 2013.]

20...♗c5! 21. ♖d2 [at 21. ♖c4 21...b5 Black would win an important tempo for development here.; 21. ♖d1 looks bad because White will never have Rd1 to put pressure on the d7 knight.]

21...♗d6!! Such a move is just impossible to find over the board. It is clear that Wojtaszek knew it and yes, chess is sometimes a game of work!

22. ♖a5+ This human move is definitely losing. [After 22. ♖d4 22...♖xd2 23. ♖xd2 ♗c5 Black should be close to winning.; 22. ♖d1! seems to me to be the only move which should be considered. 22...♖b8 (Of course not 22...♗xf4 23. ♗xf4 and White's pressure on d7 is deadly.)]

22...b6 I guess Duda was still very happy here, not seeing what was coming just 2 moves from now...

23. ♖xb6 White's attack seems to be crushing.

23...♗c7! The only move. [23...♗xb6?? 24. ♖xb6+ ♔e8 25. ♖xd6 with an easy mate to follow.]

24. ♗xd7 Black's position seems to be lost, but in fact it is winning because of the amazing next move:

24...♖e5!! This is the key move which Black clearly had to know before playing 21...Bd6. It looks strange, but White can just resign now! Black wants to play Qa1 and defended his bishop on c7. There is no way for White to defend all his pieces. [After 24...♗xd7? White would win the game on the spot by playing 25. ♖b8+! ♖xb8 26. ♖xc7+ ♔e8 27. ♖xb8+ ♗c8 28. ♖xc8#]

25.♔g1 This move is losing, but it seems like there was already no escape for White. [After 25.h3 25...♙xd7 Black is just a piece up for no compensation.]

25...♖b8 A nice move. [25...♙xd7 would lead to a slightly more tricky position, as after 26.♔c5 White would keep some practical chances 26...♖e8 although Black's position should be winning of course.]

26.♖b4 White can't defend the b6 rook. [Of course White is also lost after 26.♖xb8 26...♙xa5 27.♖xc8+ ♔xd7 28.♖xh8 ♖xd5 with an easily winning position for Black.]

26...♙xb6+ Black is just a full rook up.

27.♘xb6 ♖e3+ We could see one more time how much chess has changed. On the top level, analyses are deep and players have to remember a lot not to get in deep trouble in the early stages of the game. **0-1**

**(2) Gajewski, Grzegorz(2631)
- Tomczak, Jacek(2544) [A28]**Polish Championship(9),
2014.04.02GM Arkadij Naiditsch
Best rating: 2737

We will see a nice game from the shared winner of the Polish Championship, who only became second on the bucholz tiebreak being 0.5 points behind Wojtaszek, as both had 7/9 points. After an unclear opening White played a very interesting exchange sacrifice to get the game into a strategically unclear situation. Being under pressure, Black finally made a miscalculation and lost.

1.c4 Many people think that by playing 1.c4 players are trying to avoid main lines of theory, but of course this is not true. The best example for this are Kramnik or Aronian, who played 1.c4 for many years very successfully, with deep analyses.

1...d6 2.c3 The trick of White by choosing this move order, is to avoid the Queen's Gambit.

2...e5 [If Black tried to reach it anyway by playing 2...e6 3.e4 d5 4.e5 d4 5.exf6 dxc3 6.bxc3 ♖xf6 7.d3 it is not so easy to equalize for Black.]

3.d3 d6 4.e3 White chooses to play the Paulsen reserved with a tempo up. Of course this can't lead to an opening advantage, but to unclear play. [The main continuation is 4.g3]

4...d5 This is clearly the most critical, why not to take a center in case you can...

5.cxd5 dxd5

6.f5 With this move, White is sort of forcing Black to take on c3, because otherwise it is hard to defend the e5 pawn in a nice way.

6...dxc3 7.bxc3 f6 This is also very logical play. Another option could be 7...Bd7 but there is no big reason to avoid White's d4 move.

8.d4 This move is also almost forced if White plays for anything as Black just wanted to castle, with a very comfortable position.

8...e4 Of course, what else?!

9.d2 g5! An important move! By attacking the bishop on b5 and the g2 pawn Black is winning a very important tempo for development.

10.f1 [Of course a move like 10.fxc6+? 10...bxc6 would lead to a great position for Black because of the weak white squares.]

10...g6 Another good choice. Black should not hurry with playing f5 as it would make the bishop on c8 look stupid.

11.g3 White has no other way to develop his pieces.

11...O-O 12.g2 e8 The rook on e8 is nicely placed, so this move is needed anyway. [12...f5 13.O-O and probably Black

has to put the rook on e8 anyway: 13...♖fe8]

13.0-0 ♘g4?! Why force the white queen to c2 before playing Bf5?! Maybe Black was a bit afraid of White's f3 push, but it is very hard to imagine that it would work for White. The pawn on e3 would be a clear weakness.

14. ♖c2 ♘f5 [14...♘e2 15.♘xe4 and White is just a pawn up.; And of course as usual a move 14...f5?! would be a clear mistake because 15.f3! is very strong. The bishop on g4 is out of play and the pawn on f5 is a huge weakness. 15...exf3 16.♗xf3 followed by Nh4 with a big advantage for White.]

15. ♖b1! White is starting a very original and strong plan! [More conservative would be 15.a4 followed by Ba3]

15...♖ab8 16. ♖b5 This was the key idea of Gajewski. White wants to give an exchange on f5 to collect the key pawn on e4.

16...a6 Black has nothing better...

17. ♖xf5 Of course when You say A you say B!

17...♖xf5 18. ♘xe4 We have quite a difficult position for evaluation. White is a bit of material down, but the bishop pair and the strong pawns in the center give White very good play. In fact Black is in big positional danger and needs to act quickly against the rolling pawns of White. All in all,

White's position is clearly easier to play and he is probably even better.

18...♖h5 19. ♘g2 Gajewski is preparing the e4 move.

19...♗a5 Black is preparing the c5 push, but it will be not enough for equal play.

20. e4 c5 [Maybe Black would have better chances by playing 20...b5 but of course White should be doing better as well after 21.e5 ♘f8 22.♘f3 with similar ideas as in the game.]

21. e5 ♘f8

22. ♘f3! A very nice move. White is winning an extra tempo.

22...♖g6 [22...♖h3 23.♗e4 and White is winning an extra tempo because of the Ng5 threat.]

23. ♘e4 ♖h5 Black needs to keep on waiting.

24. ♗f3 Now that the bishop is greatly placed on e4, White has time to consolidate the pieces.

24...cxd4 25. cxd4 ♗c6 26. ♖g2 A solid prophylactical move. [Maybe 26.♘f4 with the direct idea of playing d5 next could be strong too.]

26...f6 Black panics in a bad position. [Objectively we have to say that it is very hard to find the right moves here for Black, for example after logical 26...♖bd8 27.♘e3 ♗e7 with the idea

of bringing the knight to d5 White is just winning by playing 28.h3! and Black can't avoid big material losses because of the g4 threat.]

27.h3! Excellent play! g4 is a deadly threat.

27...f5 Black is trying the last trick...

28.♕d5+! After this move Black's position is just lost. [Of course not 28.♕xf5?? 28...♖xf3+ 29.♔xf3 ♜xd4+ 30.♔g2 ♜xc2 and Black is winning.]

28...♔h8 29.♞g5 White is threatening to play Qxf5 and Nf7, the game is over.

29...♞xd4 30.♖c4 Just too many black pieces are hanging, there is no escape.

30...♞c6 31.♞f7+ ♔g8

32.♞xc6 And of course after 32... Qxf7 33.Bd5 White would win a queen. A very nice positional win by Gajewski with the great idea of Rb1-Rb5 and Rxf5, which can be very useful in many different structures. **1-0**

(3) Anand, Viswanathan(2770) - Andreikin, Dmitry(2709) [B18]

FIDE Candidates 2014(12.4),
2014.03.27

GM Csaba Balogh
Best rating: 2672

A very nice game was played by Anand, where he spoiled the win only in the last moment. We must add, that draw was a perfectly fine result for him in view of the tournament standing and possibly if he had to win, he would have won this game too.

1.e4 It is quite impossible to predict Andreikin's opening choice. He plays something new in almost all his games, this time he goes for the Caro-Kann defence.

1...c6 2.d4 d5 3.♘c3 dxe4 4.♗xe4 ♘f5 5.♗g3 ♘g6 6.h4 h6 7.♗f3 e6 This is quite a sideline compared to 7...Nd7, however in the Anand-Carlsen WCC match last year Carlsen played this system in the first round and reached an easy draw. Andreikin decided to repeat it and check what Anand had planned as an improvement.

8.♗e5 ♘h7 9.♘d3 ♘xd3 [The pawn on d4 is poisoned: 9...♙xd4?

10.♗xf7! wins decisive material for White. 10...♙xf7 (10...♘xd3

11.♗xh8+—) 11.♘g6+! ♘xg6 12.♙xd4+—]

10.♙xd3 ♗d7 11.f4 ♘b4+ 12.c3 ♘e7 13.♘d2 ♗gf6 14.O-O-O O-O Nothing new has happened until this moment. We have basically reached the initial position of the 7...e6 line.

15.♙f3 This is the improvement, but not a novelty yet. White intends to push f5, but first he had to leave the pin on the d-file in order to be able to recapture with dxe5. [In the match, Anand played 15.♗e4 but it leads to a more or less forced draw after the mass of exchanges: 15...♗xe4 16.♙xe4 ♗xe5 17.fxe5 ♙d5 18.♙xd5 cxd5 and a draw was agreed soon in Anand-Carlsen, Chennai 2013.]

15...♙c7 Black not only develops his queen, but also keeps an eye on the e5 knight to parry the f5 threat! He is ready to execute the typical Caro-Kann break with c5! The next move of Anand is aimed against this plan.

16.c4! A strong prophylactic move. Black has a much harder task to play on the queenside now.

16...a5 With the idea of trading the bishops with Bb4, White reacts with the usual prophylactic move... [16...b5 does not work as the c6 pawn is hanging, but even if Black prepares for this with let's say Rac8, this move could always be met by 17.c5 locking the queenside. It is true that Black gets the d5 square for his knight, but the attack on the kingside becomes a more

relevant factor. White will remove his knight from g3 and then launch an attack with g4-g5!; The other break with 16...c5 is also wrong as White has the very strong reply of

17.d5! This is a standard break, with which all the Caro-Kann players are familiar... 17...exd5 (17...Nxe5 18.fxe5 Qxe5 19.g4! traps the queen!) 18.Nf5! Rfe8 19.Qg3+- with a crushing attack.]

17.♖b1 With the idea to free the c1 square for the bishop in case of Bb4.

17...♜ad8 18.♙c1 a4 This is the novelty. [18...♜fe8 happened before. 19.♞e2 c5 (The standard reaction of Black when the knight leaves the g3 square is 19...h5!? which must be the critical move, but Anand had definitely prepared something here...) 20.g4! with a very strong attack in the Topalov-Dreev, New Delhi 2000 game.; 18...c5 is still met by the usual 19.d5! with exactly the same ideas as in the 16...c5 line.]

19.♞he1 White strengthens his e5 knight, therefore he is ready to push f5! Black must quickly look for counterplay. [19.♞e2 must again be met by 19...h5!]

19...a3 Accepting the pawn sacrifice should never come into consideration. First of all, those doubled pawns could hardly be counted as a healthy extra pawn and it would also expose the king too much.

20.b3 ♙b4 Black confuses the harmony between the pieces and prepares the following central break.

21.♞e3 c5 [21...♜fe8!? could have been a last useful preparation.]

22.d5! Always this move, otherwise Black quickly overtakes the initiative with cxd4 and Nc5.

22...exd5 23.cxd5 [23.♞f5!? was a serious alternative. 23...dxc4 (23...d4 keeps the pawn with tempo, however after 24.♞e2 the white pieces are so dominating that the attack with Qg3 or with the simple g4-g5 will break through. Against such an attack the only defensive idea could be to open the center with dxc4!) 24.♞g3 ♞h5

25. ♖xd7! Eliminating a defender! (On the direct 25. ♖g4 Black has 25... ♖df6!) 25... ♖xd7! The only move! Both queens are hanging! (25... ♖xd7 26. ♖g4+— wins. Black cannot avoid losing huge material and White continues attacking.) 26. ♖xh6+! (26. ♖g4 26... ♖d1! is Black's subtle defensive resource!) 26... ♖h7 27. ♖xd7 ♖xg3 28. ♖xf8+ ♖xf8 29. ♖xg3 ♖xh6 30. bxc4 ♖e8 and the complications are over and the arising position should be drawn.]

23... ♖b6 24. ♖ed3 [Just as in the previous move 24. ♖f5!? was very interesting and it seems to lead to draw again after 24... ♖bxd5 25. ♖g3 ♖h5! (25... g6 is dubious in view of 26. ♖xg6! fxc6 27. ♖xg6+ ♖h8

28. ♖e7! Black is forced to sacrifice his queen to avoid the mate on g7! 28... ♖xe7 29. ♖xe7 ♖xe7 30. ♖xh6+ ♖h7 31. ♖xd8 ♖xd8 Black has some material advantage, but the pawn storm on the kingside is going to swap him away... 32. g4+—) 26. ♖xh6+

♖h7 27. ♖g5 gxh6 28. ♖f5+! Driving the king to the wrong square. 28... ♖h8 29. ♖xh5 ♖xe3 and White has nothing more than a perpetual check: 30. ♖xh6+ ♖g8 31. ♖g5+ =]

24... ♖c8? The decisive mistake. Black was too annoyed by the Nf5 ideas and wanted to prevent it in the most direct way, but this is just too slow. [According to the machines 24... ♖bxd5 should have been played. 25. ♖xd5 ♖xd5 26. ♖xd5 ♖xd5 27. ♖xd5 ♖d8 It is very unhuman to give material like this. In my opinion White is just clearly better with such a knight on e5 and the g3 one is going to be activated as well, but the machine stubbornly defends Black... 28. ♖c4; 24... ♖c8 was logical to put a blockader on d6, but it could have been met by 25. ♖g4! ♖xg4 26. ♖xg4 with extremely good attacking chances after Nh5 and f5. The bishop also joins the attack on h6 and the rook could also be switched to g3.; 24... c4 had a direct problem as after 25. bxc4 ♖xc4 26. ♖xc4 ♖xc4 27. ♖d4! the queen has no good square to go to. The bishop on b4 has lost its fortress and it gets into trouble after 27... ♖c5 28. ♖b3!]

25. d6! The d-pawn is just too strong.

25... ♖fe8 [Black cannot create counterplay with 25... c4 because of 26. bxc4 ♖xc4 27. ♖d4! Nxe5 fxe5 wins a piece due to the double attack. 27... b5 28. ♖c6!+— White wins a piece as the knight is threatening to jump to three directions, e7, b4

and d8.]

26. ♖h5! The attack rolls after this move! White often has the option of swinging his rook over to g3.

26... ♖e6 White can choose between many winning lines. [26... ♖f5 27. g4+- is also over.; 26... ♖xh5 27. ♖xh5 ♖e6 loses to 28. d7! ♖e7 29. ♖d6+- trapping the queen.]

27. ♖xf6+ [The most direct would have been 27. d7 27... ♖c7 Now the strongest is (27... ♖bxd7 28. ♖xf6+- wins a piece.; 27... ♖fxd7 is refuted by 28. ♖g4! g6 29. ♖xf7 (29. f5 29... ♖xe5 30. fxg6+- is also mating.) 29... ♖xf7 30. f5+- Black gets mated soon.) 28. f5! ♖xe5 29. ♖xf6+ gxf6 (29... ♖h8 30. ♖h5+- followed by Bxh6 is over.) 30. ♖xh6+- and mate is coming soon.]

27... ♖xf6 28. d7 [28. ♖g4!? was also winning in view of the following lines: 28... ♖e6 (28... ♖f5 29. ♖xh6+ gxf6 30. ♖g4+ ♖h7 31. d7+- wins the rook on f5.) 29. f5 ♖e1 30. ♖xh6+! gxf6 31. ♖g4+ ♖h7 32. ♖h5+- and mate is inevitable.]

28... ♖c7

29. ♖g4! White is threatening to play Rg3. The d7 pawn completely paralyzes Black's potential defenses. Andreikin tries the best practical chance to complicate the matters a bit...

29... c4 30. ♖g3 g6 [30... ♖f8 is refuted by a pretty deviation of the f8 bishop: 31. ♖xa3!+-]

31. h5! cxb3 32. ♖xb3 Both sides are heavily attacking the opponent's king, but White is clearly ahead. Although Andreikin continues his resourceful play and causes further tasks to solve.

32... ♖a4 33. hxc6 fxc6 [33... ♖c3+ loses to 34. ♖xc3 ♖xc3 35. gxf7+ ♖h7 36. ♖g8+! ♖xg8 37. fxg8=♖+ ♖xg8 38. d8=♖+-]

34. ♖xb4! Anand is rightly not afraid of the c3 check!

34... ♖c3+ 35. ♖c2

White with the extra piece, but here things are not that clear. We must admit that the resourceful defence of Andreikin in the hopeless position has brought its fruits!] **1/2-1/2**

35...b5! Again the best practical chance. Most of the players would already have collapsed, but Andreikin tries until his last breath. [35...♖xd1+ or Nxa2 are met by 36.♔c4!+- and the queen takes back on d1 with decisive material advantage and also the d7 pawn is still on the board.]

36.♖b3! ♘a4! Threatening Qc3! [36...♖xd1 37.♔xd1+- is over.]

37.♔f3? In the time pressure Anand makes a mistake. [It would have been much easier to play 37.♕d2 37...♖c5+ 38.♖xa3+- followed by Kb2 and there is nothing left to try for Black.]

37...♖c5+! 38.♖c2 ♘a4+! 39.♖b3 ♖c5+ 40.♖c2 ♘a4+ Finally the players have passed the time control and they received an extra hour. Anand was thinking for some time and decided to repeat the moves and agree a draw as he saw that all the other games were finished and a draw was a good result from his point of view.

41.♖b3 [41.♔c4! White was actually winning after 41...bxc4 42.♕xa3 with the threat of Be7. 42...♔b6 43.♔d5+ ♖h7 44.♔xc4+- Black cannot create any serious threats because of the pawn on d7, but on the other hand it is understandable that Anand did not want to risk this when a draw would take him a huge step closer to the final victory.; 41.♖d2 41...♔d6+ 42.♖d3 ♔f7! followed by Rfxd7 should also be winning for

**(4) Andreikin, Dmitry(2709)
- Aronian, Levon(2830) [A45]**FIDE Candidates 2014(13.1),
2014.03.29GM Csaba Balogh
Best rating: 2672

Before the penultimate round Aronian was standing on +1, while Anand was leading with +3, therefore Aronian decided to make a final attempt to catch Anand and played a dubious opening line.

1.d4 ♘f6 2.♗g5 As usual Andreikin chose to play a sideline (the Trompowsky variation) instead of challenging the preparation of his extremely well-prepared opponents.

2...g6 Normally Aronian plays 2...d5 or 2...e6, but this time he went for something different to let his opponent think right from the beginning..

3.♗xf6 exf6 4.c4 [If White plays some standard moves, like 4.e3 Black achieves his ideal setup after 4...d5 5.g3 c6 6.♗g2 f5 followed by Nd7-f6, with a very comfortable position.]

4...♗b4+ Somehow I do n't believe that after playing g6, the bishop should be developed on the f8-a3 diagonal. [4...f5 It was much more consequent to play like Svidler two years ago: 5.♘c3 ♗g7 6.g3 O-O 7.e3 d6 8.♗g2 ♘d7 9.♘ge2 ♘f6 10.O-O although I believe White's position is slightly preferable. Vitiugov-Svidler, St.Petersburg 2012]

5.♘d2 Only 5 moves were played and we have already reached a new position. Black has already made some doubtful decisions, but the next one is the real mistake...

5...c5? This is very strange. Black clearly wants to confuse his opponent, but he just destroys his own pawn structure. After the next move he is even forced to give up the bishop pair, the only trump of his position.

6.a3! ♗xd2+ 6...Ba5 could have simply been met by 7.dxc5 as White is ready to protect his pawn with b4.

7.♙xd2 cxd4 8.♘f3! White wants to recapture the d4 pawn with his knight in order to avoid giving some tempo after Qxd4 Nc6.

8...♘c6 [Black could have tried to get rid of his isolated d-pawn with 8...d5 but White has probably planned to play 9.c5!+= followed by Nxd4, keeping all the advantage of his position. After Qe7 the pawn can be defended by the rook from c1.]

9.♘xd4 ♘xd4 10.♙xd4 ♙a5+ 11.b4

11...♖e5 Black tries to improve his pawn structure, but White is not forced to take on e5.

12.O-O-O?! This allows Black to create his counterplay. [12.♖d1! was more circumspect after all, but it was very difficult to foresee all the consequences. 12...b6 (Now on 12...a5 13.b5 is much stronger, because Black cannot finish his development so easily. Now on 13...d6 14.♖xd6 can be taken. 14...♖c3+ 15.♖d2±) 13.e3 (13.h4!?+= is also very interesting with the idea of activating the h1 rook via the 3rd rank!) 13...♖xd4 Black was forced to trade queens if he wants to develop his bishop, otherwise the d7 pawn was hanging. 14.♖xd4 ♙b7 15.f3+= followed by Be2, Kf2 and Rhd1, with a clearly better endgame due to the better pawn structure.]

12...a5! 13.b5 Naturally White wants to avoid the opening of the a-file.

13...d6! A strong dynamic move! Black quickly wants to put pressure on the c4 pawn with Be6 and Rc8.

14.♖xe5+ Andreikin comes up with a very deep positional idea. He probably had already foreseen his 20th move! [14.e3 could have been played, but White can hardly hope for an advantage after 14...♙e6 15.♖b2 ♖e7 16.♙e2 ♖hc8 followed by Rc5 and Rac8. 17.f4 ♖xd4+ 18.♖xd4 ♖c5 19.♖hd1 ♖d8 followed by f5 with a balanced game. The a5-b5 pair of moves are a huge achievement for Black. Black's pawn structure is not worse anymore.]

14...dxe5 15.g3 Of course it would be excellent to develop the bishop to g2, pressing the b7 pawn, but the question is what happens if Black quickly attacks the c4 pawn...

15...♙e6 16.♙g2 ♙xc4 [16...♖c8 17.♙xb7 ♖xc4+ 18.♖b2+= should be a pleasant endgame for White with the passed pawn on b5!]

17.♙xb7 ♖b8 18.♙c6+ ♖f8 Ke7 would have been more logical to connect the rooks, but it would have moved into the Rd7 tempo!

19.a4 ♙b3 Both players had foreseen this position very long ago. Aronian was probably very happy as he double attacks the rook and the a4 pawn after which the b5 pawn might also fall, but Andreikin has calculated much deeper and came up with a shocking exchange sacrifice. [The e2 pawn has no relevance here as White plays 19...♙xe2 20.♖d7 ♖g7 21.♖a7± and obtains powerful connect passed pawns.]

20.♖b2!! ♙xa4?! Black is lost after this move because the bishop gets a bit loose on a4, but his position was very difficult anyway. [The critical move was 20...♙xd1 21.♖xd1 and the point of White is that the black rooks are uncoordinated, while White is ready to pick up the a5 pawn. All the endgames are extremely dangerous for Black as the king might go to c5 and advance the b-pawn. The bishop is simply dominating the rooks. Black has no chance to create his passed pawn on the queenside because of the doubled pawns. Despite not even having a pawn for the exchange, only White can have the advantage and it is understandable that Aronian did not go for this line. But the materialistic computers are of course still showing some defensive ideas for Black. 21...♖e7 could be met by (21...♖g7 22.♖c3! (22.♖d7 22...♖hd8 gives

a free tempo to Black as Ra7 could have been met by Rd2.) 22...♖hd8 23.♗xd8 ♖xd8 24.♔c4 and the endgame wins for White as the following line shows: 24...♔f8 25.b6 ♔e7 26.♔c5 f5 27.b7 ♖b8 28.♔d5 ♔d7 29.♔b6 f6 30.♔xa5+-) 22.♗d7+ ♔e6 23.♗a7 wins the pawn, but Black might hope for some counterplay along the d-file. 23...♖hd8 24.♔c3 ♖d1 25.♗xa5 ♖bd8 26.♗a7 For a human eye this is just hopeless, but the computer continues defending Black...]

21.♗d5! The bishop is trapped on a4, but Black has some tactical ideas to save it.

21...♔e7 [21...♔g7 is also bad because of 22.♔a3! (22.♗a1 22...♖hc8!) 22...♔c2 23.♗d2! leaving from the Bf4 threat and after 23...♔f5 White simply plays 24.♔a4+- and Kxa5. The b-pawn and the strong c6 bishop will decide the outcome of the game.]

22.♔a3! [Aronian's trick was 22.♗a1 22...♖hc8! and Black saves his bishop due to the threat of Rxc6.]

22...♔c2 23.♗d7+ ♔f8 White can choose between many different wins here. Both players were already in severe time pressure and Andreikin gives practical chances for Black to survive...

24.e4 Andreikin keeps trying to trap the bishop. He closed his way back to f5 and threatens to catch it with Rc1. [One

promising win was 24.♗d2 24...♔f5 25.♔a4+- with basically an extra pawn and easy win for White, as Black's doubled f-pawns are completely useless.; The machine recommends 24.♔d5 24...♖xb5 25.♗c1+- a direct tactical blow, which forces Black to sacrifice an exchange on d5 and enter a lost endgame.]

24...a4 [24...f5 loses to 25.f3! fxe4 26.♗c1! ♔d3 27.♔a4! White has time for all the moves. After protecting the b5 pawn he recaptures the e4 and wins the game. 27...♔g7 28.fxe4+-]

25.♗c1 [25.♔d5! would have won much more easily. 25...♔g7 (25...♖xb5 26.♗xf7+ ♔e8 27.♗c7+-) 26.♗xf7+ ♔h6 27.♗b7+- The b-pawn is supported by all the white pieces, while the a4 is rather just a weakness which pins the bishop to its defence.]

25...♔b3 26.♔d5 ♔xd5 27.♗xd5 This endgame is still highly unpleasant for Black, but as we know, the defensive side might always hope for salvation in rook endgames.

27...♔g7 Black needs to bring his h-rook to the game.

28.♗c7 [28.♔xa4 would allow some counterplay with 28...♗a8+ 29.♔b4 ♗a2]

28...♗b6! An excellent idea. Black frees the a8 square for his other rook to get activated through the a-file. [Defending passively with 28...♗a8 does not lead to any good: 29.b6

♖hb8 30.b7 ♖a7 31.♗dd7+—]

29.♖c6 [29.♔xa4 29...♖a8+ 30.♔b4 ♖a2 31.♔c5 ♖b8 is very similar to the game, Black gets counterplay.]

29...♖b7! Black needs both of his rooks to retain his chances. One of the rooks should try to block the b-pawn, while the other one must go to create counterplay by attacking the white pawns. [29...♗xc6 is hopeless. 30.bxc6 ♖c8 31.♖c5 ♔f8 32.♔xa4 ♔e7 33.♔b5 wins easily. 33...♔d6 34.♗d5+—]

30.♔xa4 ♖a8+ The rook is ready to invade, Black is back in the game.

31.♖a6 Of course White would still like to trade rooks, but Black is not forced to help him...

31...♖c8 32.b6 Both players were in huge time trouble and the game became very sharp again. The tournament was played without increments after the moves and Aronian was the one who made the last mistake.

32...♖c2 33.♔b5

33...♗xf2? Black is lost after this move. [It was still essential to leave from the Kc6 tempo before capturing the f2 pawn. It is already unclear whether White is any better or if he already spoilt all his advantage. 33...♖b8! The a6 rook cannot move because of Rb2. 34.♗d3 is logical to support the pawn from

behind and avoid getting checks on b2. 34...♗xf2 35.♖b3 ♗xh2 36.♖a7 ♖e2 37.b7 ♖xe4 38.♔b6 White will queen his pawn, but Black already has 4 pawns and some chances to save the game. But if White succeeds to attack the f7 pawn with both of his rooks, he might have realistic chances to win the game.]

34.♔c6! ♖e7 When Aronian took on f2, he probably missed the next great move! [34...♖b8 is now met by 35.♔c7 ♖e8 36.b7+— when the white rooks are excellently placed to meet both checks with Rc6 or Rd7.]

35.♖aa5!! A very subtle move with the idea to cover the king from the checks along the 2nd rank. [35.b7 35...♖c2+ and the b7 pawn falls.]

35...♖e6+ [35...♗xh2 36.b7+— the pawn promotes and Black could not eliminate all the pawns to obtain some chances for survival.]

36.♗d6 ♖e7 37.♗dd5 Andreikin repeats twice to get closer to the time control.

37...♖e6+ 38.♔c7! The checks along the 2nd rank are completely neutralized by the rooks on the 5th rank, while the white king easily hides himself from the checks of the other rook.

38...♖e7+ 39.♔c8 ♖e8+ 40.♔d7 No more checks and the

b-pawn is going to be advanced. The rest is very easy.

40...♔f8 [40...♖b8 41.♔c7+-]

41.b7 ♖e7+ [41...♖b2 42.♖ab5+-; 41...♖xh2 42.♖a8+-]

42.♔c6 ♖e6+ 43.♔c7 ♖e7+ 44.♔b6 [Black resigned in view of 44.♔b6 44...♖e6+ 45.♔a7 ♖e7 46.♔a8 and the pawn promotes.] **1-0**

Endgame section

(15) Karjakin, Siergiej(2766)
- Anand, Viswanathan(2770)

FIDE Candidates 2014,
2014.03.29

GM Csaba Balogh
Best rating: 2672

The only one game where Anand was in danger of losing was the one against Karjakin in the penultimate round. It was extremely important for him to hold as otherwise the tournament would have remained open until the last moment, while with a draw he was already declared to be the champion with a round to go... White has an obvious material advantage, but the win is rather doubtful, because the pawns are on the same side and any kind of progressing plan leads to exchanges of some further material, which of course brings the defensive side closer to the draw.

44...♖b3+ 45.♙c3

45...g5! An excellent defensive move! Black prevents the f4 idea and initiates some exchanges. The move could have the drawback that it weakens the e5 pawn, but Anand correctly evaluated that White is unable to arrange his pieces to attack it and also in some occasions he is ready to create counterplay by advancing his h- passed pawn. [In case of waiting with 45...♖a3 Anand was rightly afraid of 46.f4! exf4+ 47.gxf4 followed by e5 fxe5 fxe5, creating a passed pawn, which could be advanced after Nf4.]

46.hxg5 fxc5 47.♙f2 [47.♙d2 could have been met by 47...h4! (Other moves were wrong: 47...♖b5? 48.♘c1! and Nd3 next!; 47...♙e6? 48.f4! A tactical trick! The pawn cannot be taken because of the Nd4 check, so Black loses his e5 pawn.) 48.gxh4 gxh4 and the h-pawn saves the game.]

47...♖b5! The only move! [Obviously 47...♙e6? was more natural, but it would have run again into the tactical trick of 48.f4! gxf4 49.gxf4 exf4 50.♘d4+]]

48.g4 A committing decision! White tries to fix another weakness on g5. There will already be two pawns fixed on the dark squares, which could be attacked by both minor pieces. However Black also gets a protected passed pawn. [48.♘c1 now could have been met by 48...♖c5 49.♙d2 ♖c2 50.♙e3 h4 again with excellent drawing chances.]

48...h4! This passed pawn plays a key role in the successful defense. [The endgame after 48...h4 49.f4 49...h4 is lost for Black 49...Kf6 in view of the simple plan of

50.♖g1! ♜b3 51.♙d2!+- and Nf3 next, winning the g5 pawn.]

49.♖g1 With the idea of Nh3 and Bd2. [49.♖c1 would once again have been met by 49...♜c5!]

49...♜c5! 50.♙d2 ♜c2 51.♙e2 ♜a2 52.♖h3 ♙g6! This is a very important defensive position. White cannot grab the g5 pawn because the arising pawn endgame is drawn...

53.♙d3 [53.♖xg5 53...♜xd2+ 54.♙xd2 ♙xg5 55.♙e3

55...♙h6!! This is the only move and the point becomes clear soon. (55...h3? simply loses to 56.♙f2 ♙f4 57.♙g1!+- and on Kxf3 the g-pawn promotes, otherwise Kh2 wins.; 55...♙g6? also loses after 56.f4! h3 57.f5+! this is the point! White manages to save the pawn with check and Kf3 wins next move!) 56.♙f2 (56.f4 56...h3 is a draw now as exf4 is coming next.) 56...♙g5 57.♙g2 ♙g6 58.♙h2 ♙h6! Or Kf6 are equally good, the point is when White plays Kh3 Black must be ready to respond with Kg5! 59.♙h3 ♙g5= White cannot make progress.]

53...♜b2 54.♙e3 [The pawn cannot be taken on g5. In case of Nxg5 we transpose to the previous line, while after 54.♙xg5 Black has 54...♜h2! winning a piece.]

54...♜b3+ 55.♙e2 ♜b2 After finding all these defensive plans, Anand has a very easy task to hold. Karjakin keeps on trying for a while, but he cannot achieve anything.

56.♙d1 ♜b3 57.♙e2 ♜b2 58.♙d3 ♜a2 59.♖f2 ♜a3+ 60.♙c3 ♜a2 61.♙e3 ♜a3 62.♙d2 ♜a2+ 63.♙e1 ♙f6 64.♙f1 [64.♖d3 is met by 64...h3! 65.♙xe5+ ♙e6 and h2 next wins the piece. As we can see, the h-pawn gives Black adequate counterplay in any of the White attempts.]

64...♖a3 65.♘d1 ♔e6 66.♔g2 ♜b3 67.♙a5 ♜a3 68.♙b6
 ♜a2+ 69.♘f2 ♔f6 70.♔h3 ♜a3 71.♔g2 ♜a2 72.♙d8+ ♔g6
 73.♙e7 ♜b2 74.♙c5 ♜c2 75.♙d6 ♔f6 76.♔f1 ♜c1+ 77.♔g2
 ♜c2 78.♙b4 ♜b2 79.♙a5 ♜a2 80.♙d8+ ♔g6 81.♙e7
 ♜b2 82.♙c5 ♔f6 83.♔g1 ♜b1+ 84.♔h2 ♜b3 85.♔g2 ♜b2
 86.♙a3 ♜a2 87.♙b4 ♜b2 88.♙e1

88...h3+!? Continuing waiting with rook moves was also good enough for the draw, but Anand decided to force the draw in a tactical way.

89.♔f1 [89.♔xh3 89...♜e2 90.♘d3 ♜e3 wins a piece.; 89.♔g3 89...h2! 90.♔g2 (90.♔xh2 90...♜e2) 90...h1=♚+ 91.♔xh1 ♜e2 92.♘d3 ♜e3 White loses one of his minor pieces in any case.]

89...h2 90.♘h1 ♜b1 91.♔e2 The draw was agreed as White has no next move. He can either wait with Kf2-e2 or with Ng3-h1. In both cases Black just plays Ra1-b1. **1/2-1/2**

(16)

GM Arkadij Naiditsch
Best rating: 2737

This is one of the famous rook endgames from the category "good to know".

1...♖h2! The only move to save the game! [It would be easy to go wrong with 1...♖b2? 2.♔d1! Now by moving towards the rook first and afterwards away from the rook, White is in time to win an important tempo! 2...♔d3 3.♔c1 ♔c3 (3...♖b6 4.a7 with an easy win for White.) 4.a7 White put his both pawns on the 7th rank, which means game over for Black. 4...♖h2 5.♔d1 ♔d3 6.♔e1 ♔e3 7.♔f1 ♔f3 8.♔g1 followed by queening one of the pawns.]

2.♔f1 [Now White is already not in time to go to other side anymore: 2.♔d1 2...♔d3 3.♔c1 ♔c3 4.♔b1 ♖h1+ 5.♔a2 ♖h2+ 6.♔a3 ♖h6 7.♔a4 ♖xa6+ 8.♔b5 ♖a1 With a draw.]

2...♔f3 3.♔g1 ♖g2+! Once again Black is holding with only moves.

4.♔h1 ♖g8! After vertical checks Black continues with

horizontal ones.

5.a7 White has "almost" won but this time Black is in time:

5...♖h8+ 6.♔g1 ♖g8+ 7.♔f1 ♖h8 8.♔e1 As we can see the position is very forced.

8...♔e3 9.♔d1 ♔d3 10.♔c1 ♔c3 11.♔b1 It seems like the white king has escaped, but...

11...♖h1+ 12.♔a2 ♖h2+ 13.♔a3 ♖h1! The only move to save the game again!

14.♔a4 ♔c4 15.♔a5 ♔c5 And White doesn't have anything better than to return to 16.Ka4, with a draw. **1/2-1/2**

1.e4 g6 2.d4 ♘g7 3.c3 d6 4.f4 This setup looks a bit strange. Usually White doesn't lose any time for c3 when he plays the plan with f4.

4...♗f6 5.e5 Now is move number 5 and White is still moving only pawns! This must be too much...

5...♗d5 [5...dxe5 6.fxe5 ♗d5 7.♗f3 c5 A typical move. The idea is to create a strong knight on d5 and weaken the d4 pawn. 8.♙c4 (8.c4 8...♗b4 9.d5 ♙f5 10.♗a3 ♗d7 with good counterplay against the white central pawns.) 8...cxd4 9.cxd4 O-O Black has a good position.]

6.♗f3 O-O

7.♙c4 c6 In my opinion Black could play more actively: [7...♗b6 8.♙b3 c5 9.dxc5 dxc5 10.♙e2 ♙f5 Xd3]

8.a4 A thematic move in Pirc. White prevents b5. [8.O-O]

8...♗a6 9.O-O ♗ac7 10.♙e1 A normal move. White is preparing the transfer of the queen to the kingside.

10...f6 Black wants to destroy the strong central pawn structure and activate his g7 bishop at the same time. [10...♙g4 11.♙h4 (11.♙g3 11...♙xf3 12.♙xf3 dxe5 13.fxe5 f6 14.exf6 exf6 followed by f5, with a solid position.) 11...♙xf3 12.♙xf3 e6 13.♙f2 dxe5 14.dxe5 (14.fxe5 14...c5) 14...f6 Black can play this move because of the bad development of the white pieces.]

11.♙h4 ♙e6 12.♗a3 White develops his pieces and prevents some Nxf4 tricks.

12...♙d7 13.♙d2

13...b5 Black is looking for the initiative on the queenside. [13...dxe5 14.fxe5 fxe5 15.♗xe5 ♙xe5 16.dxe5 At the moment it is not easy for White to take advantage of the missing bishop on g7 but of course in the future the black king will be potentially weak and thanks to the bishop pair White has a stable advantage.; 13...♙g4 14.♙ae1 with a better position for White.]

14.♙d3 ♗b6 [14...bxa4 15.c4 ♗b6 16.♙ae1 ♙ab8 17.♙c3 White keeps the initiative thanks to his space advantage.; 14...a6 15.♙ae1+ c5 doesn't work because of

16. axb5 axb5 17. exd6 exd6

18. ♖xb5! ♖xb5 19. ♕xb5 ♖xb5 20. ♖xe6 and White is a pawn up.]

15. axb5 cxb5 16. ♖ae1 White improves his pieces and it is not easy to stop them before the decisive attack starts.

16... a6 [16... ♖c4 17. ♖xc4 ♕xc4 (17... bxc4 18. ♕c2 f5 19. ♖g5 h6 20. ♖xe6 ♖xe6 21. g4 White will crush his opponent on the light squares.) 18. ♕xc4+ bxc4 19. e6!? (19. f5?! is premature here: 19... ♖xf5 20. exd6 exd6 21. ♖e7 ♖d5 22. ♖xg7+ ♖xg7 23. ♕h6+ ♖h8 24. ♕xf8 ♖xf8 25. ♖g5 ♖xf1+!-+) 19... ♖b5 (19... ♖xe6 is not possible because of the following tactical idea: 20. ♖h3 f5

21. ♖xe6! ♖xe6 22. ♖g5+-) 20. ♕c1 ♖d5 21. g4 White has to be on time! 21... ♖xe6 22. f5 gxf5 23. gxf5 ♖c7 (23... ♖xf5?! 24. ♖e5)

24. ♖xe7 ♖f7 25. ♖xf7 ♖xf7 26. ♕f4 d5 27. ♖h1 and White keeps the initiative.]

17. exd6 exd6

18. ♖xe6! A nice tactical idea based on a strategic understanding.

18... ♖xe6 [18... ♖xe6 19. f5 ♖fc8 (19... g5 20. fxe6+-) 20. fxe6 It is better to keep the pressure than to take the piece! 20... hxe6 21. ♕xg6 ♖f8 22. ♕b1 With an unpleasant position for Black.]

19. f5! g5? The decisive mistake. Black could still have fought on after [19... ♖e8 20. fxe6 hxe6 21. ♖g3 f5 22. ♖e1 ♖f7 23. ♖xd6 (23. ♖g5 23... ♖d7 24. ♖h4 ♕f6 and the h7 square is protected!) 23... ♖bd5

24. c4! Now Black needs to move away his active knight or activate the white knight from a3... 24... ♖ad8 25. ♖g3 bxc4

26. ♖xc4 White has the Ne5 threat and a very strong initiative.;
19...gxf5? 20. ♔h3±]

20. ♖xg5! +— Now White is winning very quickly as the black king is very weak and as in many previous examples we can note that most of the black pieces are very far from supporting the kingside...

20...fxg5 21. ♕xg5 ♔d7 [21...♔f7 22.f6 h5 23.fxg7 ♔xg7 24.♕f5 With a decisive attack.]

22.f6 ♕h8 23.♕f5 [23.♖f3 also wins.]

23...♖e6 24. ♔g4 ♖f7 25. ♔h5+ ♖g8 26. ♔g4 ♖f7 27. ♕xh7
Of course no draw! :-) White is temporarily a rook down, but Black just cannot hold this position with his weak king...

27...♖e8 28.f7+ ♖xf7 29.♕g6 ♖d8 30. ♔h5 ♔e6 [30...♕g7 31.♕xd8 ♖xd8 32.♖xf7+—]

31. ♔xh8+ ♖d7 32. ♕xf7 1-0

Editorial Preface

Another great week of chess has passed and a new one is right in front of us!

The team of OSG Baden-Baden has won the German Bundesliga for the 9th consecutive time, with a perfect score of 15 winning matches.

The second place went to the team of EV Mühlheim Nord and SV 1930 Hockenheim took third.

At the moment a lot of very interesting events have just begun:

- 1) The Russian Team Championship for men and women, with Grischuk, Karjakin and many more.
- 2) A very strong open in Dubai and we keep our fingers crossed for Csaba, who is playing there.
- 3) The Women Grand Prix in Khanty-Mansisk.

As usual, we try to bring you the best games from the recent events. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Akopian, Vladimir(2674)
- Tabada, Jobannie C(2210) [B90]

16th Dubai Open 2014(3.14),
2014.04.09

GM Arkadij Naiditsch
Best rating: 2737

Maybe some do not remember, but Akopian was a Top 10 player for some time. Lately he is doing more coaching than actively playing, but his result for the Armenian national team championship are still great. In the current game the opponent of course has 450 ELO points less, but we are all playing with the same pieces and to win a game is never easy. Akopian is showing us his great attacking skills and we can consider this game to be a good example of "what not to do" with Black.

1.e4 c5 2.♘f3 d6 It is never easy to play the Sicilian against a much stronger opponent, especially since problems in the theoretical lines could lead to big troubles in the early stage already.

3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e3 So we are in the most classical line. Black has 3 major choices now: 6...Ng4, 6...e5 or 6...e6.

6...e6 So Tabada is choosing the Sheveningen system.

7.f3 This is also the most classical and main move. [7.g4 7...e5 8.♘f5 g6 leads crazy and sharp positions.]

7...b5 8.♚d2 [8.g4 immediately is another popular line and the idea is to avoid the Nbd7-Nb6 line.]

8...♘bd7 9.g4 ♘b6

10.a4!? I personally think that this is one of the most interesting lines for White.

10...♘c4 [Of course after 10...bxa4? 11.♘xa4 ♘xa4 12.♚xa4 White's position is just better because of the weak pawn on a6 and White still has the option of castling kingside.]

11.♙xc4 bxc4 12.a5 [Another interesting option is 12.g5 12...♘d7 13.f4 ♙b7 14.f5 ♘c5 15.♚g2 with very sharp play, like in Areshchenko-Shirov 2012.]

12...♙b7 This is of course all still theory. Even in this position we can find some games of Kasparov from the year 2000.

13.♘a4 The main move. The position is very sharp. White is trying to gain control on the dark squares and have some action in the center, while Black is trying to be solid and crush White's center by playing d5.

13...d5 is also the main move and very logical. Why waste any time for nothing, it is time to be active in the center.

14.g5 ♘d7 15.O-O-O White is bringing all his pieces into the attack.

15...Rc8? just looks too slow. [The most critical is probably 15...dxe4! Now White has a big range of moves: 16.f4 is maybe not the best. (16.Rhf1!? This very interesting move was played by Van Oosterom in a correspondence game.) 16...Rb8 17.Qc3 Qe7 18.f5 exf5 19.Rxd7 Qxd7 20.Qe5+ Qe7 21.Qxb8+ Qc8 22.Qe5 f6 23.gxf6 gxf6 24.Qd4 Qc6 happened in the game Leko-Shirov from 2012 where Black won.]

16.Qc3! Strong and logical. White stops Black from playing dxe4.

16...Qc7 [After 16...dxe4 17.fxe6! Black's position is falling apart. 17...fxe6 18.f6! With a deadly attack.]

17.exd5 There is no reason anymore to give a pawn on e4. [17.f6! 17...fxb6 18.axb6 Qxb6 19.f5 also looks promising for White.]

17...Qxd5 18.Rhe1 A nice move. White brings his last piece to a perfect position on e1 and prepares for a lot of tactical blows.

18...Qb7 Black's main problem is not only that the king is on e8, but as also the bishop on f8 and the g7 pawn, which makes it is really hard to find a way to castle. [For example if Black tried to castle by playing 18...Qe7? the game would be practically over after 19.f5! as there is no way to avoid the loss of material.]

19.f5! Another nice move by Akopian. Black's position is already looking very shaky.

19...Qxb6 20.axb6 Rg8 This move just can't be good, but what else to play?! [At first sight a development move like 20...Qe7 looks good, but White has an amazing blow! 21.f5! exf5 22.Qxg7 Rf8 and here comes White's main idea:

23.g6!! The black king is getting attacked from all sides. 23...hxg6 24.f6 with the idea of Qxf8 next. Black's position is lost. 24...Qd7 25.Qxe7+ Qxe7 26.Qe5+ Qe6 27.Qd6+ Qf6 28.Qxf8 with an easily winning position for White.]

21.f5 Akopian doesn't give Tabada any break. All white pieces are ready for the final action against the black king.

21...Qc6 [21...exf5 is also losing. 22.Rxd5! Qxd5 23.f4+ Qd7 24.Rd1 and White's position is just winning.]

22. ♖f4 White maybe has no direct threat, but the black pieces just can't move any longer. The position is just hopeless.

22... ♖d8 23. ♖c7 ♖d7 Of course a lot of moves should lead to a winning position here, but Akopian chooses the easiest one, which is clearly a good practical decision. "You should not calculate more than needed".

24. ♘e3! The strongest black pieces, the bishop on d5, is getting kicked out from his position. I guess by now even Tabada lost his last hopes to survive the game.

24... ♖xf3 [24... ♖e7 would be a bit more stubborn, but after 25. ♘xd5 ♖xd5 26. ♖xd5 ♖xd5 27. f4 White's position is just winning.]

25. ♖xd7 ♖xd7 26. ♘xc4 Threatening Ne5.

26... ♖c8 27. ♖g3 Threatening both Nd6 and b7 and Black cannot defend from both of them.

27... ♖d5

28. b7+! A very nice attacking game with good tactical motives! This is something we can really enjoy! :) **1-0**

**(2) Motylev, Alexander(2685)
- Najer, Evgeniy(2655) [C84]**21st TCh-RUS 2014(2.5),
2014.04.08GM Arkadij Naiditsch
Best rating: 2737

We will see a really crazy game, where at first it seems like Black's sacrifice just can't be correct, but then move by move his attack seems to get stronger and stronger and it ends up with the white king getting mated-a very rare thing for the Spanish game.

1.e4 e5 2.♖f3 ♘c6 3.♗b5 Alexander Motylev just had probably the best 2 months of his life chesswise. He became European Individual Champion with an amazing score of 9/11 and he was the second of Karjakin in the Candidates, where Karjakin took unshared second place.

3...a6 4.♗a4 ♘f6 5.O-O ♗e7 6.d3 It is hard to call this move a sideline. Not so long ago 6.d3 was very popular and White was having quite good results in it. But in the last couple of years Black seems to be doing fine and games of Aronian, Anand etc showed that White probably doesn't have too much to hope for. One of the ideas of playing 6.d3 is to save a tempo on the Re1 move but on the other hand, White is not able to get the c3-d4 lines anymore.

6...b5 [6...d6 is also possible.]

7.♗b3 O-O [7...d6 is maybe a bit more precise as now Black is already threatening to play Na5 next and exchange the b3 bishop.]

8.♘c3 Using the fact that the e5 pawn is unprotected in case of Na5.

8...d6 Na5 is a threat now.

9.a3 ♖a5 is the main move. [After 9...♗e6 10.♗e3 ♖d7 11.♘d5 ♗d8 12.♗g5 White is maybe a bit better. Dominguez-Caruana Wijk aan Zee 2014]

10.♗a2 c5 Najer is switching from the very main lines. [10...♗e6 seems to be the most critical. 11.♗g5 c5 With quite an unclear game, like for example in Dominguez-Aronian from Wijk aan Zee 2014: 12.b4 ♘c6 13.♘d5 ♗xd5 14.exd5 ♘d4 15.bxc5 ♘xf3+ 16.♖xf3 dxc5 17.♗fe1 ♘d7 With very unclear play where Aronian could quite easily have outplayed his opponent.]

11.b4!? An interesting try to play for the advantage. [11.♘d5 11...♗xd5 12.♗xd5 ♗b7 13.b4 ♗xd5 14.exd5 ♘b7 15.c3 ♖c7 16.♗e1 f5 and Black's position seems to be fine. Anand-Adams, Grenke Chess Classics 2013]

11...♘c6 12.♘d5 A very typical move. Now Black has many options.

12...♘d4! The right reaction! Black should not wait for White to play c3 next or maybe Nxe7 and Bg5 with a very comfortable position.

13.bxc5 [After 13.c3 13...♗xf3+ 14.♖xf3 the position should be just close to equal.]

13...♖xd5 [After the immediate 13...♗g4 White has a nice sacrifice: 14.♖xd4! Who cares about a queen?! :) 14...♗xd1

15.♗c6 ♖xd5 Black already needs to give back the queen, as after a queen move White would take the e7 bishop and then the d1 one, leaving him with 3 pieces vs queen which is clearly in his favor. 16.♖xd8 ♖axd8 17.♗xd5 ♗xc2 18.c6 ♗xd3 19.♖e1 White is a pawn down, but he has a monster pawn on c6 and is probably doing slightly better in this endgame.]

14.♗xd5 It is hard to blame Motylev for such a move, as White's position just looks better after it. [14.♖xd4! would lead to a slightly better endgame. 14...♖c3 15.♗c6 ♖xd1 (White has a nice trick after 15...♖e8 16.♖xe7+ ♖xe7 and 17.cxd6! winning a pawn! 17...♖xd6 18.♖e1 ♖xa2 19.♖xa2 White is just a pawn up.) 16.♖xd8 ♗xd8 17.♖xd1 dxc5 18.♗e3 And this endgame also looks slightly better for White.]

14...♗g4! This move is already almost forced, but it is a very nice positional exchange sacrifice anyway.

15.♗xa8 ♖xa8 White is an exchange and a pawn up, but things around the white king could get very dangerous...

16.cxd6 ♗xd6 17.♗b2 This move is also very logical, White is developing a piece and forcing Black to take on f3.

17...♖xf3+ 18.gxf3 ♗h5 And here we are probably in the first critical position.

19.d4 Motylev continues playing very human and logical moves. [If White tried to protect the f3 pawn with a rook by playing 19.♖e1 19...♖d8 Black is keeping the idea of f5 in mind and also Qh4-Qh3. 20.♖e3 ♗c5 With a very dangerous attack on the white king.; Maybe White could have tried 19.♖d2! Black has a lot of different moves now, but for example after 19...♖c8 20.♖g5 ♗xf3 21.♖f5! White would force Black to enter an endgame and I think White's position should be better.]

19...♖c8 White can't allow Black to play Qh3.

20.♗g2 [In case of 20.dxe5 20...♖h3 Black just wants to mate by playing Bf3 next. 21.♖d2 ♖e8! A very strong killer move. It seems like White is hopeless against Re6-Rg6.]

20...f5! Najer is just playing a perfect game! Black has no time to lose and brings his rook into the attack.

21.dxe5 White doesn't have anything better.

21...fxe4 22.♖d5+

22...♖f7! Najer plays for a win and calculates things perfectly. [22...♔h8 would probably lead to a draw. 23.♙xe4 It seems like White can't avoid losing some material... 23...♗xf3+ 24.♙xf3 ♜xf3 25.♔xf3 ♜f5+ 26.♔g2 ♜g4+ 27.♔h1 Black has at least a perpetual check here, but he could play for more with 27...Bc5.]

23.e6 This is the difference to Kh8, White attacks the f7 rook with tempo.

23...♗xf3+ 24.♔g1 ♜e7 Another cool and strong move by Najer. Black is already a full rook down but the position seems to be winning!

25.♙xd6 ♜xe6 26.♙d5 h6 Black is planning to play Kh7-Rg6. [26...♔h8 was probably leading to an immediate win. 27.♜fd1 (27.♗e5 was also losing. 27...♜g6+ 28.♗g3 h6 with the deadly idea of playing Qh3 next.) 27...♜g6+ 28.♔f1 ♜h3+ 29.♔e1 ♜g1+

30.♔d2 e3+! Black is winning the queen and getting a totally winning position.]

27.♜fd1 By having sort of extra tempo, the white king is in time to escape a forced mate.

27...♔h7 28.♔f1 ♜g6

29.♔e1? A blunder in a bad position. [The only chance to go on was to play 29.♙d4! finally getting rid of the nasty e3 threat. 29...♙xc2 30.♜d2 ♜c8 Of course Black's attack looks deadly, but White could have continued the fight with 31.♜dd1 with a very bad position, but some practical chances to escape.]

29...♙xc2 The double threat of Qe2 and Rg1 with mate is leaving White no other choice but to resign. A really fantastic attacking game by Najer and also a very important one for the evaluation of this line. **0-1**

**(3) Wagner, Dennis(2481)
- Shirov, Alexei(2685) [D45]**

Bundesliga 2013-14(13.5),
2014.04.04

GM Csaba Balogh
Best rating: 2672

A very sharp game, typically in the style of Shirov. The game also looks very important from a theoretical point of view.

1.d4 d5 2.c4 c6 3.♘c3 ♘f6 4.e3 e6 5.♘f3 ♘bd7 The starting position of the Meran, where White can choose between two very serious lines, 6.Bd3 and 6.Qc2.

6.♔c2 ♙d6 7.♙d3 O-O 8.O-O dxc4 9.♙xc4 b5

10.♙e2 The players are following the latest fashion. 10.Bd3 is an equally huge and complex main line.

10...♙b7 Black slowly prepares the freeing central break with e5 or sometimes with b4 followed by c5 also works.

11.e4 [11.♖d1 is the most common move, when Black usually plays 11...♔c7 leaving the pin on the d-file and refreshing his e5 idea.]

11...e5 This reply is always obligatory to the e4 move. Black cannot allow White to push e5.

12.dxe5 ♘xe5 13.♘d4!? This forgotten move was found by

the French GM Fressinet. There is a very deep positional idea behind it. The move is very logical of course, White would like to install his knight to f5, which could guarantee him a clear edge, but it moves into a tactical trick...

13...♘eg4 14.g3 ♙c5! This is Shirov's improvement and the start of the wild complications! [13.Nd4 was considered to be dubious because of 14...♙xg3 winning a pawn, but Fressinet has discovered the following plan: 15.hxg3 ♔xd4

16.♔d1! White forces the trade of the queens and enters an endgame with a pawn down. However, there are plenty of plusses for White. First of all, he has the pair of bishops. The knights do not have any stability on g4 and f6, they could easily be squeezed back with f3, Ne5, f4 and e5 next. Black got rid of his strong bishop and ended up with the passive one on b7. These facts told Fressinet that White should have pleasant compensation for the pawn. 16...♔xd1 17.♖xd1 ♖fe8 (17...♖fd8 happened in another game, which continued with 18.f3 ♖xd1+ 19.♘xd1 ♘e5 20.♙e3 ♖d8 21.♘f2 a6 22.♖c1 and f4 is coming next. It is very unpleasant to play with Black without having any active plan and just to watch how his opponent improves his position with each move. Anand's second Wojtaszek won a game like this.) 18.f3 ♘e5 19.♙e3 a6 20.♖d6 ♖ad8 21.♖ad1 ♖xd6 22.♖xd6 h5 23.b4 White is squeezing again! 23...♖e6 24.♖d1 Obviously White keeps the rooks as he controls the

only opened file. 24...♖e8 25.♔f2 ♘g6 26.♙d4 Black could already not handle the pressure and decided to enter a bad endgame after 26...h4 27.gxh4 ♘xh4 28.♙xf6 gxf6 29.♖d7 ♙a8 30.♖a7 White won back the pawn and kept his positional advantages. Fressinet-Ragger, Bundesliga 2013.]

15. ♘f5 ♖e8 Black activates his pieces with each move.

16. ♙f4! White would like to jump to d6 with his knight at some point. If Black was forced to give up his c5 bishop, he would end up in similar troubles as in the 14...Bxg3 line.

16... ♖b6! Only the most direct moves are possible now, but of course Shirov has a special feeling for such things. After one inaccuracy Black could quickly collapse. [16... ♘xf2 is materially fine for Black, but positionally terrible... 17. ♖xf2 b4 18. ♘d1 ♘xe4 19. ♙f3! ♘xf2 20. ♘xf2± Black has two pawns and a rook against the two minor pieces, but those are so well placed that only White can be better.]

17. ♔g2! A dynamic move by White. He could have defended his f2 weakness passively with Nd1 or give up the bishop with Bg4, but such moves cannot give him any advantage.

17... ♘xf2 Black goes for the challenge. Allowing White to push him back with f3 at some point would have led to the victory of White's opening strategy.

18. e5 ♘d7! Threatening to take the e5 pawn is a key factor

in Black's play. [18... ♘d5 drops a piece after 19. ♘xd5 cxd5 20. b4! Black does not have enough compensation. 20... d4+ 21. ♔xf2±]

19. b4 Winning the piece again, but this time Black gets three pawns and attacking potential as counterplay.

19... ♙xb4 20. ♖xf2 ♘xe5 Black would like to create real threats on the long diagonal by opening it with c5 and in case of Kg1 Qc6.

21. ♘xg7! Trying to finish the game with a decisive blow, but Black also has his resources! [After 21. ♖af1 the best seems to be 21... ♙f8 as before playing c5 it is useful to bring a defender to parry the sacrifices around the g7 square forever. 22. h3 c5+ 23. ♔h2 c4 and Nd3 is coming next. The game is completely unclear, but I believe it is more easy to play with Black.]

21... c5+! [21... ♔xg7 is refuted by 22. ♙xe5+ ♖xe5 23. ♖xf7+! ♔xf7 24. ♖xh7+ and now the king has no good square. Ke8 drops the e5 rook after Qh8, while after 24... ♔e6 White has 25. ♙g4+! this is a huge difference to the game. 25... ♔d6 26. ♖d1+ ♔c5 27. ♘e4++— leads to mate in few moves.]

22. ♔h3! Temporarily this is the safest square for the king on the board. [22. ♔g1? or 22. Kf1 run into 22... ♖c6! and Black is mating first.]

22... ♙c8+! An important intermezzo to provoke the g4

move! [22...♔xg7 again loses to 23.♙xe5+ ♖xe5 24.♖xf7+! ♔xf7 25.♚xh7+ ♔e8 (25...♔e6 26.♙g4+-) 26.♙xb5+ ♙c6 27.♚h8+-]

23.g4 ♔xg7! The right moment to accept the sacrifice! [23...♗xg4 leads to a funny position: 24.♙xg4 ♙xg4+ 25.♔xg4 ♔xg7 Despite the g4 king White is just winning. Black does not have enough material to create serious threats. 26.♖af1+-]

24.♙xe5+ [24.♗d5 Bringing a new attacker looks tempting, but Black has the important defensive move 24...♚g6]

24...♖xe5

25.♖xf7+! A necessary sacrifice, otherwise Black consolidates and wins. However without the Bg4 check, White does not have more than perpetual check.

25...♔xf7 26.♚xh7+ ♔e6 27.♚g6+ ♔e7 [Black also cannot hope for more than a draw, because 27...♔d7 leads to mate after 28.♚f7+- and either Rd1 or Bf3 wins next move.]

28.♚g7+ ♔e6 29.♚h6+ [29.♖f1? looks tempting again, but Black takes too much material: 29...♙xc3! A cold-blooded defence, but there is no real danger at the moment. 30.♖f6+ (30.♚f7+ 30...♔d6 31.♖f6+ ♙e6+-) 30...♔d5 31.♙f3+ ♔c4 32.♖f4+ (32.♖xb6 32...♖h5+ 33.♔g2 ♙xg7+-)]

32...♔d3! 33.♚h7+ ♔d2 White ran out of checks and the extra material brings home the full point for Black.]

29...♔e7 30.♚h7+ ♔e6 31.♚g6+ ♔e7 32.♚g7+ ♔e6 33.♚g6+ This looks like it was a perfect game! :) 1/2-1/2

**(4) Salem, A.R. Saleh(2558)
- Ivanisevic, Ivan(2633) [B29]**

Karpos Open 2014(7.7),
2014.04.03

GM Csaba Balogh
Best rating: 2672

A brilliant game was played by the young GM from the Arabian Emirates. Ivanisevic is a very creative player and he often wins games like the following one, but this time he is on the suffering side.

1.e4 c5 2.♘f3 ♘f6 Salem is a 1.d4 player, therefore Black tries to surprise his opponent with a tricky sideline.

3.♘c3 [3.e5 3...♘d5 4.♘c3 is probably White's best reaction.]

3...d5 The consequent continuation. Black could have transposed to a classical Sicilian with 3...Nc6, but the text move follows the idea of leading the opponent to an unexplored territory.

4.e5 d4 4...Ne4 and 4... Nfd7 are also alternatives.

5.♘a4! This is already a novelty and a very strong one. It is quite rare to see one between two GMs right on move 5. In general, this move is against the principles because the knight should not be placed at the rim of the board, but there is a very concrete idea behind it! [5.exf6 happened mainly in

the previous games, although Black usually obtained a nicely playable position after 5...dxc3 6.fxg7 cxd2+ 7.♗xd2 ♗xg7]

5...♗fd7 The c5 pawn had to be protected, but this allows the standard sacrifice which completely confuses the development of the black pieces.

6.e6! fxe6 With his sacrifice, White has created a doubled pawn which hardly can be called a real material advantage. White might put big pressure on the e6 pawn with Bc4, Ng5, Qe2 and 0-0 followed by Re1 and Black faces difficulties in completing his development. With his next move, White aims to improve the situation of his misplaced a4 knight.

7.b4! White undermines the d4 pawn and also frees the way for the knight to b2-d3, from where it might either jump to e5 or f4.

7...cxb4 8.♗xd4 An amazing position, which cannot be evaluated on a positional basis. Black has an extra pawn and the a4 knight is still out of the game, but in my opinion White's attacking potential gives him more than enough compensation for the deficits. From a practical point of view, White definitely has the easier game.

8...♗f6 9.♗b5+ ♗d7 A concrete attempt to make use of the misplacement of the a4 knight. [9...♔f7 was more natural at first sight, but White obtains excellent compensation here

as well after 10. Nf3 Qa5 11. Qe2 with a nice edge and Black cannot win the a4 knight with 11...a6 in view of 12. Ng5+ Kg8 13. Bc4 wins. 13... Qxg5 14. Qxe6+ Kxe6 15. $\text{Bxe6\#}$ Not bad... :)

]

10. Ng5+ ! Small tactical trick, using the fact the the bishop is pinned. White has restored the material balance.

10... Qa5 This was Black's point but White has a very strong reply to maintain his strong pressure:

11. c4 ! Great! White protects his a4 knight and also keeps his bishop on b5 to avoid the unpleasant check on e5. [The harmless 11. Bxd7+ 11... Nbx7 12. Nb2 would have allowed Black to trade the queens after 12... Qe5+ and without the queens on board, there is no more danger anymore for Black.]

11... Qf7 [11... bxc3 is simply met by 12. Nxc3 ! Bxb5 13. Nxb5+ — and the knight cannot be taken in view of Nc7! ; 11... Bxb5 12. cxb5+]

12. Ng5+ Kg8 Black tries to put his king into safety, but on g8 it is hardly any better than it was in the center.

13. Bc5 Finally the knight arrives to the game and it immediately turns out to be an extremely strong piece. [13. Qe2+ also looked very strong.]

13... Bg4

14. Be8!! The first brilliant move of the firework!

14... g6 There was no other move to avoid mate. The following sacrifice is even missed by the computers. They only find it in big depth or after making the next 3 moves. [14... Bxd1 15. $\text{Bf7\#}$; 14... Nxe8 15. Qxg4+ — is also hopeless for Black.]

15. ♖xg4!! ♜xg4 16. ♕f7+ ♔g7 17. ♜ce6+ ♔f6 [17... ♖h6 is met by the calm 18.d4!+- and Black gets mated after the discovered check of Ne4 next move!]

18.f4!! The key move behind the queen sacrifice! Bb2 is coming next and the haunt of the king is starting. White only has one bishop for the queen, but Black cannot prevent the fatal threats. [18. ♕b2+ right away was a mistake in view of 18... ♖e5+! 19. ♕xe5+ ♜xe5 and Black is fine.]

18...h6 [18... ♜c6 does not make big difference. 19. ♕b2+ ♔f5 and White wins for instance after 20.h3+-]

19. ♕b2+ ♔f5 Here White goes for the most trivial and most human win...

20. ♜d4+ [The machine suggests 20. ♜f3!? 20... ♖h7 21. ♜h4+ ♔e4 22. ♕xg6+!+- mate.]

20... ♔f6 [20... ♖xf4 leads to forced mate in many different ways. One of them is 21. ♜e2+ ♔xg5 22.h4+ ♔f5 (22... ♖h5 23. ♜f4#)

23.O-O ♔e4 24. ♕xg6+ ♖f5 25. ♕xf5#]

21. ♜b3+ White is satisfied with winning the queen and ending up with an extra piece.

21...e5 22. ♜xa5 ♜c6 [22...hxc5 23. ♕d5+- is totally over.]

23. ♜xc6 bxc6 24. ♕e6 hxc5 25. ♕xg4 The game is over. White has an extra bishop and still continues attacking.

25...gxf4 26. ♕f3 ♕c5 27. ♕xc6 ♖ad8 28. ♕d5 ♔f5 29.d3
What a game!!! **1-0**

Bundesliga,
2014.04.05

GM Csaba Balogh
Best rating: 2672

Black has just played Nh5-f4, unpinning his rook. White has the opportunity to simplify the position to a pawn endgame, which should be easily winning at first sight due to the extra pawn, but...

59. ♖xh3 ♜xh3+ **60.** ♔g2 The knight is trapped, so Black is forced to accept his faith...

60... ♔xf7 **61.** ♔xh3 ♔e6 **62.** ♔g3 In general pawn endgames are only about calculation. We have the same story here too. Black has three moves, but he must foresee accurately the forthcoming mutual zugzwang positions and he must choose the one which favours him.

62... ♔e5! [Going for the c4 pawn is too slow, as Black loses the pawn race after 62... ♔d6 63. ♔f4 ♔c5 64.e4 ♔xc4 65.e5 ♔d5 66. ♔f5+-; 62... ♔f5 63. ♔f3 ♔e5 is met by 64.e4! and here Black gets into zugzwang. 64...c5 (64... ♔d4 65. ♔f4+- White is faster again.) 65. ♔e3+- This is the mutual zugzwang position, where if it White's turn the game is drawn, while if Black is to move he loses.]

63. ♔f2 [63. ♔f3 63...c5 transposes to the game after the 68th move.]

63... ♔e4 **64.** ♔e2 Before advancing the e-pawn, White tries some triangulation, but it does not change anything this time.

64...c5! 65. ♔d2 ♔e5 **66.** ♔e1 [66. ♔d3 66... ♔f5 67.e4+ ♔f4= Another mutual zugzwang position. White is forced to give up his e-pawn, while if it was Black's move he was lost.]

66... ♔e4 **67.** ♔e2

67...♔f5! Precise calculation was needed again, although it was already easy as we are familiar with the ideas. [67...♔e5? would have lost after 68.♔f3 ♔f5 69.e4+ ♔e5 70.♔e3+—]

68.♔f3 ♔e5 69.e4!? White had tried everything, there was no other way to make progress, so he tries his last chance.

69...♔d4 70.♔f4 White wins pawn race here again, but the pawn reaches the c2 square, which is a theoretical drawn position.

70...♔xc4 71.e5 ♔b3! It is very important that the black king should head towards the corner to reach the famous stalemate idea.

72.e6 c4 73.e7 c3 74.e8=♔ c2 White cannot win as he cannot squeeze the king out from the b1-a1.

75.♔e1 ♔b2 76.♔b4+ ♔a1 77.♔c3+ ♔b1 78.♔b3+ ♔a1! This is the key! Black is always threatening to promote his pawn, either with the support of the king from b1 or after the check the pawn capture leads to stalemate! The game is drawn!

79.♔xc2 1/2-1/2

**(16) Debashis, Das(2504)
- Balogh, Csaba(2656)**

16th Dubai Open 2014(3.5),
2014.04.09

GM Arkadij Naiditsch
Best rating: 2737

After being in a very dangerous position in the middle game, Csaba managed to survive the troubles and things are looking very promising at the current moment. White just has 2 pawns for the piece and all black pieces are nicely placed, but still the position is not that easily winning as it maybe looks like. White always has the strong drawing idea to sacrifice the g- and h-pawns and try to exchange both black pawns, after which of course the endgame rook+knight vs rook would be a simple draw.

47.g3 White can't do anything better than to keep on waiting and at the same time putting Black in front of a difficult decision, to exchange the rooks or not...

47...♖d4+? A very human decision, but it seems to be the wrong one! [Much stronger would have been 47...b5! Usually Black should avoid the exchange of pawns, but this time it is the right choice. 48.axb5 axb5 49.♖e4 And here comes another very strong move: 49...♖d3! practically putting White

in a position of zugzwang. Black's position should be winning here...; 47...♖d3 was also a possibility.; Or even 47...♔e5 which looks quite aggressive, but White can't really do much, Black just wants to play Rd8-Rg8 next. In all cases Black clearly has very good winning chances.]

48.♖xd4 ♜xd4 Maybe Csaba thought that his position is winning, but Debashis finds the right way to hold a draw:

49.♔f4! White's only chance is to hurry with his king to the queenside and at the same time prepare h5-g4-g5.

49...♜c6 [49...♜e2+ was not winning either. 50.♔e3 ♜c3 51.a5 White keeps all his queenside pawns alive... 51...♔e5 (51...♜d5+ 52.♔d4 ♜xb4 53.♔c5 ♜c6 54.♔b6 This position is just a draw.) 52.♔d3 and Black can't win the kingside pawns and save time to avoid the exchange of the queenside pawns, so the position is a draw.]

50.b5 Of course White should exchange a pawn before pushing the h- and g-pawns.

50...axb5 51.axb5 ♜a7 White can't protect the b-pawn, but there is no need for that.

52.g4! Once again Debashis finds the best chance to save the game.

52...♜xb5 53.h5 Before moving to the queenside with his king, White tries to push the pawns as far as possible.

53...♜d6 54.g5+ ♔e6

55.g6 ♔f6 Now the pawn is already on the 6th rank, so White can be quite relaxed and start his journey to the queenside.

56.♔e3 ♔e5 Black is almost never in time to take the h-pawn, so Csaba is trying to stop the white pawns with his knight and play some sort of winning pawn endgame. [56...♜f5+ 57.♔e4 ♜g3+ 58.♔d5 ♜xh5 59.♔c5 followed by Kb6 and draw.]

57.g7 Another correct calculation by Debashis, the position is now going to be a forced draw.

57...♜f5+ 58.♔d3 ♜h6 Black stops the white pawns with his knight, but he can't win the game... [Of course not 58...♜xg7?? 59.h6 ♜e6 60.h7 ♜f4+ 61.♔c4 ♜g6 62.♔c5 followed by Kb6-Kxb7 with a draw.]

59.♔c4 ♔d6 60.♔b5

60...♔c7 Black managed to stop the white pawns and at the same time hold on to the b-pawn, so it all seems to be good, but...White is now able to combine promoting ideas with attacking the b-pawn, so the position remains a draw.

61.♔c5 b6+ 62.♔d5 ♔d7 63.♔e5! The threat of playing Kf6 is just deadly and Black has nothing better than to repeat moves...

63...♔e7 [63...♔c6 64.♔f6 b5 65.♔g6 and White could already be the one who is winning.]

64.♔d5 ♔d7 65.♔e5 ♔e7

66.♔d5 A slightly unlucky draw for your weekly commentator but the decision of trying to simplify the position is just not always the correct one. If he had kept the rooks on the board, we could be almost sure that Csaba would have won the game at some point. **1/2-1/2**

Editorial Preface

The very strong Dubai Open was won by Romain Edourd with a fantastic score of 8/9. The 2nd place was share by Iturrizaga and Kuzubov, both with 7/9.

The Russian Team Championship was dominated by the team of "Malachite", while 2nd place went to "SHSM" and "St.Petersburg Chess Federation" came third.

The championship included players like Karjakin, Svidler, Grischuk, Morozevich, Leko, Dominguez and many more top grandmasters.

The best performance of the event was scored by Grischuk with 6/7, which took him to the 3rd place in the live ranking list with an ELO of over 2790!

In the Women's FIDE Grand Prix Hou Yifan is dominating with 6/7.

During Easter a lot of opens will be going on and one of them is the Neckar Open (with almost 800 participants), where one of your commentators, Arkadij Naiditsch, is participating.

We wish you all a happy Easter and great family times.

Arkadij Naiditsch & Csaba Balogh

Best rating: 2737

We are in the last round of Dubai Open. Korobov is on 6/7 and Edouard is leading with a fantastic score of 7/8. For Korobov the deal is easy, win or nothing, which doesn't make the game easier to play for Edouard, who can be sure that his opponent will try everything to win.

1.d4 d5 2.♟f4 Gata Kamsky likes to play this sort of opening, going for a long term game and at the same time taking out his opponents from the long theoretical lines. The bad thing about 2.Bf4 is of course that White is not hoping for any opening advantage.

2...♞f6 3.♞f3 g6 A very safe opening. [Another option is to play here instantly 3...c5 followed by Nc6 and e6.]

4.e3 ♟g7 5.h3 White is usually playing h3 to avoid the Nh5 move as it is important not to exchange the bishop on f4.

5...O-O 6.♞bd2 c5 7.c3 [Of course White can't play 7.dxc5?! 7...♞fd7! Black is winning back the pawn on c5 and getting very comfortable play.]

7...b6 A solid choice. [After the inaccurate 7...♞c6?! 8.dxc5! White is already in time to keep the pawn on c5. 8...♞d7 9.♞b3; The most simple way to equalize seems to be 7...♞b6 8.♞b3 c4 9.♞xb6 axb6 and this endgame should not be worse for Black.]

8.a4 Black has to decide whether to play Ba6 or not now.

8...♞c6 I am not sure about this choice to keep the bishop on c8, as it is becoming quite a passive piece now. [8...♟a6 looked more simple and after 9.♟xa6 ♞xa6 10.O-O ♞c7 I cannot imagine White having anything serious to put pressure on Black's position.]

9.♟e2 Now Black has to solve the problem with his bishop on c8.

9...♞d7 Black is going for the e5 push. [9...♟f5 10.O-O ♞e4 was another possible way to continue.]

10.♞b3!? White is now getting what he wanted: an unclear game.

10...e5 A very human reaction. Black is going for a position with a pawn down but good compensation for it. [A more risky move would have been 10...♟b7 11.♞xd5 The position is getting very sharp. 11...cxd4 (The immediate 11...♞xd4 12.♞xb7 ♞c2+ 13.♟d1 ♞xa1 14.♟b5 leads to a position where White will catch the black knight by playing Ke2 next with a much better position.) 12.exd4 ♞xd4 Now this move makes more sense as the e-file is open. 13.♞xb7 ♞c2+ 14.♟d1 ♞xa1 It is very hard to say who is better here.]

11.♞xd5 [Of course after 11.dxe5 11...♞dxe5 Black would reach his dream position.]

11...exf4 12.♔xc6 fxe3! A strong move. [After 12...♖b8 13.e4 White's pawn up would dominate over the compensation of Black.]

13.fxe3 Not an easy decision. [13.♔xa8 also looks quite tempting. 13...exd2+ 14.♘xd2 At first sight Black doesn't have any compensation, but in fact the position is much more complicated. 14...cxd4! 15.cxd4 (After the more passive 15.O-O 15...♘c5 Black has very strong compensation.) 15...♖e8 (15...♔e7 16.♔e4 White is in time to protect everything and castle.)

16.♘c4! is the only move which might give White some advantage, but during the game it is not an easy thing to find 16.Nc4! because it looks pretty dangerous to continue playing without castling.]

13...♖b8 Black is hoping for fast play in the center and the pressure on the e3 pawn of White and the bishop pair could also give him enough play for the pawn.

14.O-O The most logical move. Korobov also had in mind to put pressure on the f7 pawn if possible by playing Bc4.

14...♘f6 15.♖ae1 ♔e7 [Trying to win the pawn back by playing 15...♘h6 would lead to nothing after 16.♘c4! White is going to be very strong on the f-file. 16...♘d7 17.♔d6 ♘xa4 followed by Ne5 and a strong attack. 18.♔g3]

16.♘d3 ♘b7 17.♔b5 White managed to be solid in the center, but the white queen is a bit out of the game on b5.

17...♘h5

18.♔b3! A good move. White is avoiding f5 move and at the same time bringing his queen back.

18...♔h8 19.d5 I am not sure about this move. [Another possibility was 19.e4 19...cxd4 20.cxd4 ♖bd8 21.e5 and I think White should be better here.]

19...♘g3 20.♖f2 f5! Black stops the e3 pawn from moving and controls the dark squares. It is hard to say if White is better here...

21.e4 fxe4 [After 21...♔d6 22.c4 fxe4 23.♘xe4 ♘xe4 24.♘xe4 ♖be8 25.♖fe2 ♘c8 I think Black should be able to hold this position because of the very strong g7 bishop.]

22.♘xe4 ♘xe4 23.♖xe4 Of course White is taking the e-file under control.

23...♔f7 24.♘c4! A good move. Now the pawn is still on c3, which kills the g7 bishop.

24...♖bd8 Black needs to go for the d5 pawn, the position is pretty forced.

25.♖fe2 A very human move, but maybe not the best. [Maybe White should have tried to hold on to the d5 pawn by

playing 25.♖d2 25...♗c8 26.♚d1 and I think White would have realistic chances to be better here.]

25...♗xd5 26.♗xd5 ♖xd5 Black's main enemy on d5 is gone so Romain could take some kind of a breath.

27.♖e7 White is going for the a7 pawn as there is no other hope of being better.

27...♚f5 28.♖xa7 The white rook on a7 is out of the game, but on the other hand White wants to play Re7. Black needs to act immediately.

28...♚d3? Black misses a great chance to equalize. [28...♖d3! with the double idea of playing Rxf3 and Bd4 would probably soon lead to a handshake. 29.♚e6 ♖xf3 30.gxf3 ♚xf3 White cannot avoid perpetual check.]

29.♚c2 The white queen is back in the game. [29.♖ee7 would not lead to anything good for White after 29...♖xf3! and the white king is facing all the black pieces totally alone.]

29...c4!? A good practical decision. [29...♖xf3 30.♚xd3]

30.♖ae7?! A slightly strange move. [30.♚xd3 looks much simpler. 30...cxd3 31.♖ee7! With the idea of taking on g7 and playing Rad7. 31...♗f6 (31...♖xf3 loses to 32.gxf3 d2 33.♖e8+ ♗f8 34.♖xf8#) 32.♖ed7 and I think White's chances to win the game would be pretty good.]

30...♖xf3! Once again Black is doing all he can to mess up the position.

31.gxf3 ♚xf3 The white king is under the attack, but being an exchange up should be enough for White to find some defensive motif. The bad thing is that Korobov was already in quite some time trouble.

32.♚e4?? What a shocking blunder! [White had to find 32.♖d2! and Black has no good retreat with his rook. 32...♖g5+ 33.♖g2 White is in time to hold things together and has very good chances to win the game.]

32...♖g5+ And suddenly the game is just over. What a dramatic finish, after 33.Kh2 Qg3 34.Kh1 Qg1 mate. This is another game where we could clearly see that White was pushing all game long, finally reaching a position with very good winning chances and then blundered mate in 2. It is never easy to play under pressure in the last round! **0-1**

**(2) Grishchenko, Sergey1(2436)
- Jobava, Baadur(2706) [A52]**

21st TCh-RUS 2014(7.1),
2014.04.13

GM Arkadij Naiditsch
Best rating: 2737

Lately Jobava played a lot of exciting games and we commented on a few of them in the past weeks. It seems like Grischchenko sort of caught Jobava in the preparation and missed good opportunities to get an advantage, but the position still remained very sharp and somehow from the game we could say that Jobava was avoiding a draw which ended up badly for him.

1.d4 ♘f6 2.c4 e5 Not so long ago Jobava won a nice game against Wojtaszek in Wijk aan Zee with this "risky" opening.

3.dxe5 ♘g4 4.♙f4 is clearly the main line. [After the more solid 4.♘f3 4...♙c5 5.e3 ♘c6 6.♘c3 O-O 7.♙e2 ♘gxe5 Black's position seems to be fine to me, for example watch the game Gelfand-Rapport.]

4...g5 5.♙g3 ♙g7 6.♘f3 ♘c6 7.h4! is still theory, but it is clear that Grischchenko is going for the reputation of the line.

7...♘gxe5 8.hxg5 ♘xc4 What a crazy position already on move 8. Clearly Black is doing very badly positionally, but the white pawn on b2 is hanging and probably will get lost so White needs to be fast with his actions.

9.♘c3 A good move. White is going for a crush of Black's position.

9...♘xb2 Jobava accepts the challenge, but I think it just looks very dangerous. [Maybe Black could have played 9...d6 10.e3 ♙e6 White's position looks better but things are still very unbalanced.]

10.♙b3 [Another very interesting option for White seems to be 10.♙c2!? 10...♘a4 Black doesn't have anything better. 11.♘b5 d6 And now plays the very nice 12.O-O-O! with a very dangerous attack.]

10...♘a4 11.♘d5 [Right now the same idea with the long castle is not as strong as before. 11.♘b5 11...d6 12.O-O-O ♘c5 The white queen on b3 is under attack and the position is very unclear.]

11...d6

12.g6!? Wow! What a move by White! [Of course White could

have played 12.♖d1 with the idea of playing Nf4-Nh5 but I think with playing 10.Qb3 White already had the 12.g6!? move in mind]

12...♟e6! seems to be the only move for Black. [After the greedy 12...♟xa1 White has the winning idea of playing 13.♟h4! Black cannot hold on to his queen... 13...hxg6 14.♟xd8 ♖xh1 15.♟g5 and White's position looks winning.]

13.♟h4 Maybe not the best move for White. [13.gxf7+!? looks quite interesting. 13...♞f8 is one of the lines, but of course Black also has many other options... 14.♟h4 ♞c8 15.♞xa4! The beginning of a very nice plan... 15...♟xa1 16.♞f4! Another great move, first it is even hard to see what can be White's idea... 16...♟xd5

17.♟f6!! What a fantastic move! 17...♟xf6 18.♞xf6 Black can't save his rook on h8 so White should be better here.]

13...♞d7?! Not a mistake, but probably not the best move either. [Black should have played 13...♟xd5! 14.♞xd5 ♟c3+! An important moment. White needs to decide whether to put his King to d1 or to play Nd2. 15.♞d2 (15.♞d1 15...hxg6! A difficult move to find, but Black seems to be doing perfectly fine afterwards. 16.♞e4+ ♟e5 17.♞xa4 ♟xa1 18.♟xd8 ♖xh1 The position of course remains very crazy, but I think only White can be risking here.) 15...♞d7 16.gxf7+ ♞xf7 17.♞e4+ ♞d7

Black's chances also look better to me here, but of course in such a position any result is possible.]

14.♟f6! A great tactical trick!

14...fxg6 [After 14...♟xd5? 15.♞e3+ White is just winning.]

15.♞xc7+ was the idea behind 14.Bf6!.

15...♞xc7 16.♞xe6+ ♞f8 Let us take a fresh look at the position. Both kings' positions are open and things look very confusing. Black is a pawn up but it does not matter much here. It is White to play and it is clear that every tempo is very important. The game remains very unclear.

17.♖d1 White brings his rook to the center and also defends from Qa5 check with Rd2.

17...♞b4 Jobava continues going for the most unclear lines. [After the more solid 17...♞c5 18.♞xd6+ ♞xd6 19.♖d6 ♟xf6 20.♖xf6+ ♞e7 21.♖f4 this resulting endgame looks pretty equal to me.]

18.♖h4 White brings his rook into the defence over the 4th rank and at the same time threatens the black king with Rf4 ideas.

18...♞c2+ 19.♞d2 ♖e8 A very human move, but Black misses a fantastic move... [19...♞d4!! Chess can be beautiful sometimes! 20.♟xd4 The only move to avoid Qc3

mate. 20...♙xd4 21.e3 And of course once again Black was threatening to play Qc3. 21...♘c5 The position remains crazy but I think that Black's chances should be preferable.]

20.♙xg7+ ♖xg7 21.♚b3 Suddenly the knight on c2 has no escape squares.

21...♚a5+! The best move. Black can't save the c2 knight anyway, so Jobava is trying his chances in the attack.

22.♙xc2 ♜c8+ 23.♙b1 ♘c3+ It is still hard to say who is better, but I feel it somehow should be White. The rook on h4 is standing very strongly, defending the white king and at the same time it can be dangerous to the black one.

24.♙b2 ♘xd1+ 25.♚xd1 ♚b6+ Black is going for the f2 pawn.

26.♙a1?! White should not have resigned on the f2 pawn that easily [26.♚b3!? 26...♚c5 27.♙a1 With the idea of playing Qb2 check. The position remains very unclear.]

26...♚xf2 Now Black already has 2 pawns for the rook vs knight+bishop and the pawns g2-e2-a2 can also be weak in the endgame. Black finally took over the game.

27.♜b4 ♜c7 This move probably gives White a chance to escape. [27...♚e3! looks stronger. 28.♜xb7+ ♙h6 The black king feels very comfortable on h6 while his white colleague is going to be under a heavy attack. Black is clearly better here.]

28.♚xd6! Grischenko is taking his chances.

28...♜hc8 [28...♚xf1+ just leads to a perpetual: 29.♜b1 ♜c1 30.♚e7+ ♙g8 31.♚e8+ ♙g7 32.♚e7+]]

29.♚e5+ White starts to check the black king.

29...♙g8 30.♚e6+ ♙h8 31.♚e5+

31...♜g7 What a winning will by Jobava! But right here it looks a bit stupid as White's position is just much better and Black can at most hope for an escape... [Of course after 31...♙g8 32.♚e6+ the game would end in a draw.]

32.♜b1 The white queen is controlling the whole board from e5 and the black rooks are uncoordinated, which means that White has enough time to finally finish his development.

32...h6 33.♘d4?! It seems like both players had some time trouble. [After the simple 33.e3 33...♜c2 34.♚e6 Black would face huge troubles.]

33...♙h7 34.g3 The white bishop is finally coming out from f1.

34...♜e8! A strong move. Black is back.

35. ♖e6

35... ♖f7 Once again Jobava is avoiding the draw! [Black could have forced a draw with the simple 35... ♖xe6 36. ♗xe6 ♕d4+ 37. ♖b2 ♕d1+]]

36. ♗h3 Now all white pieces are in the game and Black's position is very dangerous.

36... ♗g8 37. ♖d1 [37. ♖f1 doesn't work as after 37... ♗xf1+ 38. ♗xf1 ♖xf1+ 39. ♗b2 Black has the killing 39... ♗f7! winning back the knight on e6.]

37... h5? And finally a blunder by Jobava decides the outcome of this crazy game... [After 37... ♗f6 38. ♗xf6 ♖xf6 39. ♖f4 White's position is maybe a little better, but a draw should still be the logical outcome.]

38. ♖f1! Now the g5 square is not protected by the pawn on

h6.

38... ♗xf1+ 39. ♗xf1 ♖xf1+ 40. ♗b2 And as Black doesn't have Kf7, White is just winning.

40... ♖f7 41. ♗d5 Black can't avoid Ng5 next. What an unpleasant end for Jobava after a crazy game and twice avoiding a forced draw. But anyhow, it was a great and very exciting game to watch and learn from! :) **1-0**

**(3) Demuth, Adrien(2482)
- Balogh, Csaba(2656) [E12]**16th Dubai Open 2014(7.11),
2014.04.13GM Csaba Balogh
Best rating: 2672

I did not play my best chess at all in Dubai open, but managed to win an interesting game.

1.♘f3 ♘f6 2.c4 e6 3.d4 b6 The Queen's Indian defence was my old repertoire. I employ it quite rarely nowadays, rather as a surprise weapon.

4.a3 ♗b7 5.♘c3

5...g6 A rare continuation with the aim to get out the opponent from his book. The main line is clearly 5...d5.

6.d5 White chooses the most ambitious reply and tries to take control over the center until Black spends his time on fianchettoing his bishops. 6.g3 or 6.Qc2 lead to more calm games.

6...♗g7 7.e4 O-O 8.♗e2 It is time to finish the development. White has a huge space advantage, therefore the only way to continue the fight is to undermine the d5 pawn.

8...exd5 9.exd5 c6! Trying to activate the queenside pieces. If White wants to fight for an advantage, he must try to keep

his d5 pawn to restrict the movement of the black pieces.

10.O-O cxd5 11.cxd5 ♘a6 12.♗c4?! This was a bit strange to me. White would like to strengthen his d5 pawn against the Nc7 ideas, but he should have done it after Nc7 is played. Actually the knight was rather intending to jump to c5 and now the bishop has moved into a tempo. [12.♗g5 was played in the previous games, although I don't see any problem for Black after 12...h6 13.♗h4 ♖e8]

12...♖c8 13.♗a2

13...♘c5 Suddenly White misses his bishop from the f1-a6 diagonal and Black is already having serious threats there with Ba6 and on Re1 Nd3!

14.♖e1 ♖e8! was an important move to control the e5 square. [14...♗a6 was obviously the first idea, but suddenly after the very strong 15.♘e5! White controls the d3 square and obtains a very unpleasant knight on e5. Black cannot kick it out with d6 in view of Nc6-e7, while in the next move White pushes d6 and puts very strong pressure on the f7 pawn.]

15.♗e3 White would like to neutralize the strong g7 bishop with Bd4. [15.♖xe8+ must be recaptured with 15...♘xe8! (15...♖xe8 runs into the direct 16.♘b5! with the double threats on d6 and a7!) 16.♗g5 ♖c7 17.♖c1 ♖b8 Ba6 is coming next, I like Black's position.]

15...♟a6 Consequently following the plan. [15...d6 was a safer continuation followed by Ba6.]

16.♟d4? Natural, but the complications favor Black. [The critical move was 16.d6 as after the black bishop has left the h1-a8 diagonal, it is more easy to play this move. White opens the diagonal for his own bishop on a2 and creates the deadly threat of Ng5! Therefore Black should play 16...h6! (16...♟d3 is tempting but bad. 17.♟g5! ♜f8 (17...♟xe1? 18.♟xf7+- traps the queen.) 18.♞a4! Probably White did not see this exchange sacrifice, which gives him more than enough compensation. 18...♟xe1 19.♞xe1 ♟d3

20.♟d4! White does not even have a pawn for the exchange, but he is totally dominating with his excellent pieces. Re7 is the threat. 20...h6? loses to 21.♟xf7! ♜xf7 22.♞e7+-)]

16...♟d3 [16...♞xe1+ was wrong because after 17.♟xe1 White controls the d3 square.]

17.♞xe8+ ♟xe8! It was necessary to trade the bishops, as the one on d4 was giving full control over the position. Without that the b2 pawn and the c3 knight are more vulnerable. [17...♞xe8 18.♞a4 would have been fine for White!]

18.♟xg7 [18.♞a4 is met by 18...♟xb2 19.♞xa6 ♟xd4 20.♟xd4 ♜xc3 21.♞xa7 ♟d3 Despite the material equality, Black has an overwhelming advantage. The queen is out of the game,

the a2 bishop has no future and Black has direct threats like Qh4. The machine already considers it to be a winning advantage.]

18...♟xg7! It was a bit unpleasant to move into the Qd4 check, but to control the f6 square plays a more important role. Now it is not easy to deal with the b2 pawn for White. [18...♟xg7 19.♟e4 and White gets counterplay on the f6 square. Nxb2 runs into Qd4!]

19.♞a4 The critical move, but Black can go for the pawn as he is just in time to control everything. [19.♞d2 19...♞f6 is also highly unpleasant. Black is threatening to play Nxb2 again, which can hardly be prevented. A passive move like 20.♟d1 ♟d6+ leads to a huge positional advantage for Black. White is running out of useful moves.; On 19.♞b1 Black wins the pawn. 19...♟xb2! 20.♞xb2 ♜xc3 21.♞d4+ ♞f6! protects the rook.]

19...♟xb2! 20.♞xa6 ♜xc3 At first sight White could have something against the b2 knight or the c3 rook, but nothing works properly for him.

21.♞xa7 White restores the material balance, but this is kind of admitting the huge disadvantage. The position is similar to the 18.Qa4 line, the queen on a7 is out of the game and the bishop on a2 is dead. It is enough for Black to create a decisive advantage. [21.♞b5 21...♟d3 and White cannot trap the pieces.; The important line, which I had to foresee before

grabbing the b2 pawn was 21. ♖e2 21... ♘d3 22. ♖d1

22... ♘c1! (Other moves are not great. For instance 22... ♘f4 23. ♖e5+ ♖f6 24. ♖xe8) 23. ♖e5+ Otherwise Black takes on a2, protects his rook and has a clear extra pawn. 23... f6! 24. ♖xc3 ♘e2+—+ wins.]

21... ♘d6 Activating the knight. The black pieces are dominating.

22.h4 White opens the back rank in order to have some ideas like Rb1.

22... ♘d3 Going for a new target on f2! Black threatens with Ne4! [Unfortunately I missed a pretty finish with 22... ♖xf3!! 23. gxf3 ♘b5 24. ♖a6 ♘d4—+ The knights are just killing. Qxh4 is coming next. White is unable to organize an adequate defence. A possible finish could be 25. ♖b1 ♖xh4 26. ♖xb2 ♖g5+! 27. ♔h2 (27. ♔f1 27... ♖c1+ 28. ♔g2 ♖xb2—+ with extra material and the a2 bishop is trapped.) 27... ♘xf3+ 28. ♔h3 ♖g1 White cannot avoid getting mated in a few moves. 29. ♖e2 ♖h2+ 30. ♔g4 ♘e5+ 31. ♔g5 f6#]

23. ♖f1 White tries to strengthen his f2 pawn, but now the punishment comes from another direction:

[The last chance would have been to counterattack the b6 pawn with 23. ♖b1 although Black is totally winning after 23... ♘e4! 24. ♖xb6 ♖xb6 25. ♖xb6 ♘dxf2 Threatening to mate in two with Rc1-h1 and after 26. ♖b1 ♖xa3—+ Black has an extra pawn and a better position.]

23... ♘c1! The decisive blow, it is over now.

24. ♖a6 Some desperate attempt, but of course such a move cannot help. [The point is that after 24. ♖b1 24... ♘e2+! 25. ♔h1 ♖xf3! 26. gxf3 ♖xh4+ mates: 27. ♔g2 ♘f4+ 28. ♔g1 ♖g5+ 29. ♔h2 ♖g2#]

24... ♘xa2 25. ♖e2 ♘c1! This knight does a great job in this game. The point becomes clear in the 26. Qb2 line. [25... ♖xa3? 26. ♖b2+]

26. ♖d2 The rest is easy, now all moves are winning for Black. [After 26. ♖b2 Black preserves his extra piece with 26... ♖f6! 27. ♖xc1 ♖xf3!—+]

26... ♖c7 [26... ♘e4!? 27. ♖d4+ ♘f6—+ was also a simple piece up as the rook cannot be taken in view of Ne2.]

27.h5 I already could not focus here because I expected resignation and gave some minor practical chance... Of course all moves are just winning.

27...♖c4 28.h6+ ♔f8 29.♞e1 ♜d3 30.♞g5 The last try, but White is basically not threatening anything. Black can go for further material...

30...♜xe1 31.♜e5 Attacking the queen and threatening with Qd8 Ne8 Nd7, but Black can simply prevent both. [It was important that after 31.♞d8+ 31...♜e8 32.♜e5 Black has 32...♜f3+! 33.gxf3 ♞c1+ 34.♔g2 (34.♔h2 34...♞f4+ 35.♔g2 ♞xe5--+) 34...♞f1+ 35.♔g3 ♞g1+ 36.♔f4 ♞h2+--]

31...♞c7 [Now the difference to the 31. Qd8 line is that after 31...♜f3+ 32.gxf3 ♞c1+ 33.♔h2 Black has no check on f4...]

32.♞f6 There is no threat at all. After both checks on g7 or h8 the king will be safe on e7.

32...♞c1 [Only after some completely senseless move like 32...♜c2?? White could suddenly turn the game in his favor with 33.♜xg6+! hxg6 34.h7+--]

33.♔h2 ♔e8 Leaving from that Nxg6 idea.

34.♞h8+ ♔e7 35.♞xh7 ♞c2 and White finally resigned. **0-1**

(4) Nepomniachtchi, Ian(2732) - Svidler, Peter(2756) [C45]

21st TCh-RUS 2014(7.1),
2014.04.13

GM Csaba Balogh
Best rating: 2672

A fascinating game was played in the last round of the Russian league.

1.e4 e5 2.♜f3 ♜c6 3.d4 The Scotch opening. Nepomniachtchi uses this weapon occasionally as an alternative to the Spanish.

3...exd4 4.♜xd4 ♜f6 4...Bc5 is the other huge main line.

5.♜xc6 bxc6 6.e5 ♞e7 7.♞e2 ♜d5 8.c4 ♜b6 [8...♞a6 is the other option for Black, also with very interesting lines.]

9.♜c3

9...♞a6!? This is already a sideline. 9...Qe6 is the most frequently seen continuation.

10.♞e4 [10.b3 is met by a quick attack against the e5 pawn with 10...O-O-O 11.♞b2 ♞e8 12.f4 f6 White was not in time to castle, therefore exf6 is not possible. 13.O-O-O fxe5 14.fxe5 ♞xe5 15.♞xe5 ♞xe5 Black has won a pawn, although the strong b2 bishop and the passive a6 and b6 minor pieces give White enough compensation. In the Karjakin-Kramnik

Dortmund 2012 game, Black soon preferred to give back his material advantage with d5 and the game simplified to a draw.]

10...g6 [Now on 10...O-O-O? White could play 11.c5! as the queen is not pinned. 11...♙xf1 12.cxb6 ♙a6 13.bxa7 ♔b7 14.♙e3 White is better.]

11.♙f4 [Black has the nice trick that after 11.c5 11...♙xf1 12.cxb6 he can play 12...f5! with the idea that either the e5 or the g2 pawn will fall!]

11...♔b4! This is the novelty of the game! It looks like a strong one and it leads to a draw more or less by force.

12.e6! Forcing the matters. Extreme complications are about to arise. [12.O-O-O 12...♖b8 looks dangerous from White's point of view.]

12...♔xb2! Svidler rightly accepts the challenge. Black wins material, but a long king run is about to start. [12...fxe6 leads to a worse endgame after 13.♙e5 ♖g8 14.c5! Many pieces are hanging. The only way to not lose big material is 14...♔xe4+ 15.♙xe4 ♙xf1 but White gets a pleasant edge after 16.♙f6+ ♔f7 17.♖xf1 ♙c4 18.♙xd7 ♖d8 19.O-O-O+= White is clearly dominating.]

13.exd7+ ♔xd7 14.♔d4+! The only move! White leaves from the Re8 threat and protects his knight with check. [14.♖d1+?

14...♙d6 wins as the rook is coming to e8!]

14...♙d5!! Another only move and what an amazing one. Svidler had either foreseen the forthcoming line or he just had a flawless intuition?! Or is he still following his preparation?! [14...♙d6 is more human, but it leads to a worse position after 15.♖b1 ♖he8+ 16.♙e3 ♔a3 17.c5! and White wins material. Black does not have enough resources to create counterplay against the e1 king. 17...♙xf1 18.♙xf1±]

15.cxd5! There is no way back for White neither...

15...♔xa1+ 16.♙d2 ♙xf1! [There was no perpetual check with 16...♔b2+ 17.♙d1 ♔a1+ 18.♙c2+- as there are no checks left.]

17.dxc6+ ♔xc6! Other moves lead to quick mate.

18.♔d5+ ♔b6 It looks extremely scary, but there is no win for White! The f1 bishop fortunately controls the Qb5 mate, while Be3 is simply met by c5. Nepomniacchi continues haunting the king.

19.♙a4+! ♔a6 20.♔c6+ ♔a5 21.♙xc7+ ♔b4 Fantastic! What a king! Svidler had to see this position long ago and he was right that there is no more than a perpetual check for White.

22. ♖e4+ [22. ♖b7+!? is a tricky alternative, Black needs to find 22... ♖c4! 23. ♘b2+ (23. ♖b3+ 23... ♖d4 24.f4!? and here the only move to avoid the Be5 mate is 24... ♗e8! and the game ends with perpetual check after 25. ♗xf1 ♖xf1 26. ♖b2+ ♖c4 (26... ♖d5? trying to hide the king once again loses to 27. ♖b7+! ♖c4 (27... ♖e6 28. ♖c6+ ♖f5 29. ♖d5+ ♖f6 30. ♗e5+ ♖f5 31. ♖xf7+ ♖g4 32. ♖d7+ ♖h5 33. ♖h3#) 28. ♖a6+ +- wins the f1 queen.) 27. ♖b3+=) 23... ♖d4

Here White needs to find the only way to save the game: 24.f4! ♗e8 25. ♖xa7+ ♗c5 26. ♖a4+ ♖d5 27. ♖d7+ ♖e4 28. ♖c6+ ♖d4 29. ♖d7+= with a perpetual again.]

22... ♖a3! Only forward! [22... ♖b5? leads to mate after 23. ♖d5+! and ♖b3 mates next move or after 23... ♗c5 24. ♖xc5+ ♖xa4 25. ♖a5#]

23. ♖f3+! Trying to give the same mate on b3, but Black of

course continues the journey with his king and eliminates the a2 pawn!

23... ♖xa2! 24. ♘c3+

24... ♖a3! And of course another only move! The knight has no good discovery check. Other king moves were losing: [24... ♖b2 loses to the brilliant 25. ♖b7+ ♖a3

26. ♖c2!!+- what a shocking move again! After this subtle king move, there is no good way to prevent the mate on b3.; 24... ♖b3? is refuted by 25. ♖d5+ ♖a3 26. ♖a5+ ♖b2 27. ♖xa1+ ♖xa1 28. ♖c2! (28. ♗xf1+ 28... ♖b2 29. ♗b1+ ♖a3 30. ♖c2+- is equally good with a mate on b3 next!)]

25. ♘a2+! A brilliant last trick! White tries a desperado knight in order to be able to win the queen, but Black is not forced to accept the sacrifice! [25. ♘d5+ 25... ♖a2 26. ♘c3+ ♖a3=]

25...♔a4!! [25...♔xa2? loses after 26.♚d5+ ♔a3 27.♚a5+ ♔b3 (27...♔b2 28.♙e5+-) 28.♚xa1 ♙b4+ 29.♔e3 ♖he8+ 30.♙e5+-]

26.♚c6+ ♔a3 27.♚f3+ ♔a4 There are no more ideas left for White to try.

28.♚c6+ ♔a3 29.♚f3+ And a draw was agreed. It would be interesting to know until which moment the players were following their preparations. I would not be surprised if both of them had known all of this. In any case, an amusing and perfect game! **1/2-1/2**

Endgame section

(15) Vitiugov, Nikita(2747)
- Tomashevsky, Evgeny(2697)
21st TCh-RUS 2014(4.2),
2014.04.10

GM Arkadij Naiditsch
Best rating: 2737

White was a bit better all game long and tried to put as much pressure as possible. It is easy to see that Black cannot save the c3 pawn, as White's next moves are Kd3 and Rxc3. On the other hand Black's drawing chances are quite good as there is not much material left on the board, but very precise play is needed and this is exactly what Tomashevsky will show.

43. ♕g2 e5! A very important move. Black needs to exchange one more pawn and save time to secure the dark squares. If White was in time to take the c3 pawn and not let Black play e5, White would probably have very good chances to win the game.

44. ♖d3 exd4 White has to decide how to take on d4.

45. exd4 [After 45. ♖xd4 Black just needs to play a waiting move. 45... ♘d7 46. ♖xc3 ♖xc3 47. ♖xc3

47... ♔e5! Stopping White from playing f4. White's only idea now could be to go to e8 with his king, but it just takes too long and Black will quickly start to attack the f2 pawn with his knight. The position should be close to a draw.]

45... ♖a3 Black is just waiting for White to take on c3.

46. ♖xc3 And of course White doesn't have anything better than to take.

46... ♖xc3+ 47. ♖xc3 ♘g8! A nice blocking move. All black pieces will be placed on the black squares, making it impossible for White to proceed.

48. ♖d3 ♘e7 49. ♕e4

49... f6 What can be the plan for White now? To go to b7 with the king just doesn't make any sense because Black could keep on waiting with Kd7-Kd6, so Vitiugov is trying the only

idea.

50. ♖e3 ♜c8 **51.** ♖f3 ♜e7 **52.** ♖e2 ♔e6 **53.** ♖e3 ♔d6 After moving around a bit, White tries his only chance:

54.f4 but Black keeps playing very accurately.

54...gxf4+ 55.♖xf4 White wants to play h4 with some chances.

55...g5+! 56.♖f3 ♔c7 White just cannot improve his position.

57.♙d3 ♜c8 Of course Black could have kept on waiting, but Tomashevsky decides to even improve the fortress a bit.

58.♙f5 ♜d6 59.♙e6 ♔d8 White simply has no plan of improvement. A nice positional lessons of how to steer this kind of endgame into a draw. **1/2-1/2**

(16) Analysis

2014.04.13

GM Csaba Balogh
Best rating: 2672

The following position could have arisen from a blitz game. This endgame contains many instructive theoretical positions.

1...g5! The only move to save the game! We will see the point in the pawn endgame. [The most natural 1...♖f3? loses after 2.♙xe4! ♖xe4 3.♖xf2 g5 (3...♖f5 is refuted by 4.♖e3! (But not 4.♖f3? as it transposes to the drawn position analyzed below. 4...g5) 4...♖e5 (4...g5 5.♖d4!+- With an easy win!) 5.♖f3 ♖f5

6.h4! and White wins because after 6...g5 he has the very

important intermediate check with 7.g4+! ♔f6 8.h5+- ♔e5 9.♕e3 ♕d5 Black cannot cut the king's path like he does in the main line as he is not in the square of the h-pawn anymore. 10.h6+-) 4.♕e2 ♕f5 (4...♕e5 5.♕e3 ♕d5 6.♕f3 ♕e5 7.♕g4 ♕f6 8.♕h5 ♕f5 9.g4+ ♕f4 10.♕g6+-) 5.♕d3! This is the key and White wins the opposition and manages to squeeze the opponent's king. 5...♕e5 6.♕e3 ♕f5 7.♕d4+-]

2.♖xe4+ [The alternative is 2.h4 2...gxh4 3.gxh4 ♔f3 4.♖f8+ ♕g3 5.♕e2! White is able to save his h-pawn, but it is still not enough to win the game. Preventing Bd3 and the h4 pawn cannot be taken because of Rf4. 5...♕c2 6.h5 ♕g4 7.h6 ♕g5 8.♖h8 ♕g6 9.♕xf2 ♕b1 The following position is a theoretical draw. Black only waits with his bishop and White cannot make progress. Whenever he pushes h7, Kg7 grabs the pawn.

10.♕e3 ♕c2 11.♕d4 ♕b1 12.♕e5 ♕c2 13.♖c8 This is the only way to change the character of the position, but as we will see even with a rook on the 6th rank there is no win for White. (13.h7 13...♕g7=) 13...♕b1 14.♖c6+ ♕h7 15.♕f4 ♕d3 16.♕g5 ♕e4 17.♖c7+ ♕h8=

White cannot make progress here. Black continues waiting with the bishop on the b1-h7 diagonal and the game is drawn. Sooner or later White probably tries his last trick with 18.h7 ♕xh7 19.♕h6 ♕g8!= with a famous draw as Rc8 is stalemate.]

2...♕xe4 3.♕xf2

3...♕f5! As we have already seen, if White could play Kd3 his position would be winning as he would win the fight for the opposition. Now things are different because Black has the important g4 resource.

4.♕e3 [On 4.♕f3 4...g4+! is the only move, but good enough to save the game on the spot. 5.hxg4+ ♕g5=]

4...g4! At first sight this is a blunder as it helps White to create a protected passed pawn, but... [4...♕e5!? 5.♕d3 ♕d5= also holds. There is no way to make progress. 6.g4 ♕e5 7.♕e3 ♕d5=]

5.h4 ♖e5 6.♖d3 ♖d5 7.♖c3

7...♗e5! Black keeps the opposition on the diagonal! He could not go to c5 as the h-pawn would have promoted, but he is still able to cut the white king. He just stands within the e4-e8 and d4-d8 squares, where he is able to catch the h-pawn and puts his king according the rules of the opposition. [7...♗e4? going for the g3 pawn is too slow. 8.♖c4 ♗f3 9.h5 ♗xg3 10.h6 ♖f2 11.h7 g3 12.h8=♔ g2 and against the g-pawn, White wins. He forces the black king in front of the pawn and then he approaches with his king 13.♔f6+ ♖e1 14.♔g5 ♖f2 15.♔f4+ ♖e1 16.♔g3+ ♖f1 17.♔f3+ ♖g1 18.♖d3+--]

8.♖c4 ♖e4 9.♖c5 ♖e5 10.♖c6 ♖e6 11.♖c7 ♖e7 12.♖c8 ♖e8 13.♖b7 ♖d7! Keeping the opposition.

14.♖a6 A tricky attempt to lure the king away from the

h-pawn, but it does not help...

14...♗e6! Now Black uses the method of the distant opposition!

15.♖b5 ♖d5 16.♖a4 ♖e4 17.♖a3 A last try, as the black king cannot go to the 3rd rank.

17...♗e5!= And the game is drawn as Kb3 is met by Kd5 or Ka4 Ke4. 1/2

Clash of the Titans

(17) Szabo, Laszlo
- Bronstein, David I [A53]

Candidates Tournament(5),
1953.09.06

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.c4 d6 3.♘f3 ♘bd7 4.g3 e5 5.♗g2 c6 Black keeps the additional possibility of developing the bishop to e7. The plan with g6-Bg7 transposes to the main lines.

6.dxe5 [6.♘c3 6...e4 (6...♗e7 7.O-O O-O 8.e4 One of the secrets behind this set-up is to activate the bishop over d8 in case White will close the center with d5.) 7.♘g5 d5 8.cxd5 cxd5 With complex strategic play. White's plan is to put pressure on the d5 pawn after for example Qb3-Nh3-Bg5-Nf4 and Black should support the d5 pawn, which is why one of the ideas is to play Bb4 to exchange the knight on c3.]

6...dxe5 7.O-O ♗c5 8.♘c3 O-O 9.♖c2 ♖e7

10.♘h4 A thematic plan.

10...♖e8 [10...g6 11.♗g5 with the unpleasant threat Ne4.]

11.♘a4 White is hunting the black bishop.

11...e4 [11...♗b4 12.a3 ♗a5 13.b4 Black saved the bishop but lost many tempi. 13...♗c7 14.♘f5 ♖f8 15.b5 White's position is clearly better thanks to his more active pieces.]

12.♘f5 ♖e5 13.♗h3 Preparing Bf4.

13...♗f8 14.♗d2 [14.♗f4 14...♖a5 15.♘d6?! ♗xd6 16.♗xd6 ♖h5 17.♗g2 ♘e5 Black overtakes the initiative here.]

14...♖c7 15.♗g2 g6 [15...♘e5 16.♘e3 ♗e6

17.♖fd1 (17.♗xe4? The e4 pawn is weak but to take it right now is premature: 17...♘xe4 18.♖xe4 ♘xc4! 19.♘xc4 ♗h3 20.♖c2 ♗xf1 21.♖xf1 b5 is the last important move in this variation.) 17...♖ad8 18.♖ab1 With the idea b4-b5. White has a stable plus.]

16.♘e3 [16.♘h6+ 16...♖g7∞The knight is very riskily placed on h6.]

16...♔e5 [16...♘c5 Black would be happy to exchange a few pieces, but let's check if this move works tactically: 17.♙c3 It seems like the e4 pawn is lost but now comes 17...♘g4! 18.♘xc5 ♙xc5 19.♘g4 ♙xc4 20.♙xe4 ♔e7 Black wins back the e2 pawn and gets an equal position. 21.♙f3 ♙h3 is bad because of 22.♚fe1 ♙xf2+!]

17.f4 A strange move. White wants to improve his position but this is the wrong way. First of all this move weakens the king and secondly Black simply gets rid of his weak e4 pawn. [17.♙c3 17...♔e7 18.♚fd1+= Black has probably played too many queen moves here.]

17...♔h5 [17...exf3 18.exf3 ♘c5+= gives Black good play.]

18.h3!? is an interesting and concrete idea. White sacrifices the pawn to activate his pieces and get the initiative.

18...♔xe2 19.♚ad1 ♔d3 20.♔c1 ♔d6 21.g4 ♔c7 Black won a pawn but this process took a long time, during which White improved his pieces and he now wants to create pressure by advancing his kingside pawns. [21...b5]

22.♙c3 ♙g7 [22...b5 is a concrete move which reduces material and solves Black's practical problems. 23.♙xf6 (23.cxb5 23...cxb5 24.♙xf6 ♔xc1 25.♚xc1 ♘xf6 26.♘c5) 23...bxa4 24.♙c3 ♘c5+= Xd3]

23.g5

23...b5? This mistake leads to an unpleasant position. Black should have played [23...♘h5 but after 24.♙xg7 ♘xg7 25.♘g4 ♙h8 26.♚fe1 White has good compensation thanks to his initiative on the dark squares.]

24.gxf6 ♙f8 25.cxb5 cxb5 26.♘d5 ♔c6 27.f5 ♙b7 [27...bxa4 28.fxg6 hxg6 29.♘e7+ ♙xe7 30.fxe7 ♔c5+ 31.♙h2 ♔xe7 32.♔h6 ♘e5 33.♚d5+-]

28.fxg6 hxg6

29.♘e7+ After this move the black king will be very weak.

29...♙xe7 30.fxe7 b4 [30...bxa4 31.♔h6+-]

31.♙xb4 ♔xa4 32.♙c3 ♚xe7 33.♔h6 [33.♔g5 was probably more accurate. 33...♚e6 (33...♚ae8 34.♚xd7 and Qf6 next.)

34. ♖h6 ♗e5

and now compared to the game White has the strong 35. ♖d6! with tempo. 35... ♖ae8 36. ♗xe5 ♖xe5 37. ♖xg6+ fxg6 38. ♖xg6+ ♖h8 39. ♖f7+-]

33... ♗e5

34. ♖g5? An inaccuracy. White should have played [34. ♗xe5! but of course before exchanging his strong bishop White has to be sure that all variations lead to a win, which is why this kind of moves are not easy. 34... ♖xe5 35. ♖d6 ♖a5!

This strong move has multiple ideas! Black protects the rook on e5, prepares Rg5 (with the idea to support the g6 square) and threatens Qc5. (35... ♖e8 Supporting f7 and g6, but is not enough as White can still play 36. ♖xf7! ♖xf7 (36... ♗xf7 37. ♖h7+ ♖f8 38. ♖f6+) 37. ♖xg6+ ♖xg6 38. ♖xg6+- And White will win the rook in two moves.) 36. b4! An amazing move! After this pawn sacrifice the black pieces lose coordination... (36. ♖ff6 36... ♖g5+) 36... ♖xb4 37. ♖ff6! It looks like Black cannot avoid a decisive blow on g6 now.]

34... ♖e8? The decisive mistake. Black could have saved the game after [34... ♖ae8 35. ♖d8 ♖e6! (35... ♖xd8 36. ♖xe7+- and three pieces are hanging.) 36. ♖xe8+ (36. ♖f6 36... ♖xd8 37. ♖xe6 ♖d1+ 38. ♖h2 fxe6 39. ♗xe5 ♖d7 40. ♖xg6+ ♖f8 White probably doesn't have more than a perpetual here.) 36... ♖xe8 37. ♖f5 ♗f3+ 38. ♗xf3 exf3 39. ♖h4 f2+! It is not clear which king is weaker now... 40. ♖xf2 ♖e1+ 41. ♗xe1 ♖xe1+ 42. ♖h2 ♖h1+ 43. ♖g3 ♖g1+ 44. ♖f4 ♖c1+ 45. ♖e5 ♖e3+ It will be hard for the white king to escape from the checks.]

35. ♖f4! This move was impossible when the black queen was on a4.

35...♖c8 Black is trying to eliminate the extremely strong bishop at all costs, but unfortunately for him it is already too late!

36.♖h4 ♗xc3

37.♗h6? [37.♗f6 would have led to mate very quickly, but both players were probably in time trouble.]

37...f6? It seems unreal, but Black could have been back in the fight after [37...f5 38.bxc3 ♖f7 and the black king might have chances to escape! In this case the white pieces on the h-file will stand badly and Black will get counterplay. 39.♖d6 ♗e6 40.♗h7+ ♖f6↖]

38.bxc3 ♗g7 39.♖d8! A simple tactical shot!

39...♗xd8 40.♗h8+ ♖f7 41.♗xd8 g5 42.♖h6 1-0

Editorial Preface

In the Women Grand Prix Hou Yifan easily came first with the impressive score of 8.5/11. Olga Girya somewhat surprisingly came second with 7/11 and 3rd place went to Alexandra Kosteniuk with 6.5/11.

The Neckar-Open was won by Laznicka with the fantastic score of 8/9 points!

Now let's come to what is clearly the main event of the week, the "Gashimov Memorial".

In the A group we saw quite a few surprises and clearly the biggest one is the double "00" of Magnus Carlsen in rounds 4 and 5 against Caruana and Radjabov. Magnus had a great start with his wins against Mamedyarov and Nakamura, but maybe somehow lost a bit of his concentration in the next games.

Anyhow, after the 5th round only one player has a "+" score and this is Radjabov with 3/5. We can expect a very exciting second half of the event.

In the B group Etienne Bacrot is making his way with 4/5. Eljanov is in second position with 3.5/5. We can also follow a lot of fighting and exciting games here.

In the Asian Continental Yu Yangyi is leading with 6.5/8 and there is only one more round to go.

We hope you all enjoy this week's games!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Wojtaszek, Radoslaw(2716)
- Safarli, Eltaj(2656) [D70]

Vugar Gashimov Mem B 2014(4.4),
2014.04.23

GM Arkadij Naiditsch
Best rating: 2737

Another great game by Wojtaszek, who seems to continue being in great shape! After a theoretical battle, White managed to gain some positional plus and converted it into a deadly attack on the black king with some tactical motives.

1.d4 Before the first move it was clear that this game was going to be very interesting, at least from the opening point of view. Safarli showed great theoretical knowledge lately, playing the Gruenfeld and Wojtaszek, well, we do not need to say much about someone who has been Anand's second for more than 4 years.

1...d6 2.c4 g6 3.f3 is one of the most interesting lines to try against the Gruenfeld and of course you must be ready to play the KID in case Black doesn't play an early d5.

3...d5 So we are in the Gruenfeld. [3...g7 4.e4 d6 5.d3 O-O and this is already the KID.]

4.cxd5 dxd5 5.e4 b6 6.d3 g7 7.e3 The idea of this line is simple. White is trying to keep his strong center alive and Black is attacking it with all he has.

7...O-O 8.Qd2 c6 9.O-O-O

9...Qd6 Of course we are still following theory.

10.b5 Not the only option for White. [Another very interesting attempt is 10.h4 10...Td8 11.b5 Qd7 12.h5 a6 13.d3 and now Black needs to be very accurate. 13...xd4! (The game Nakamura-Caruana 2013 continued with 13...d4? 14.hxg6 hxg6 15.xd4 Qxd4 16.Qe1 and White is already totally winning!) 14.hxg6 fxg6 15.d5 was played in the game Piorun-Svidler 2013, with a very unclear position.]

10...Qd7 11.f4 is nothing new and actually quite logical. White wants to consolidate the center further and develop his pieces by playing the very natural Nf3 next.

11...Td8!? An interesting novelty! [In the previous games we saw 11...Qe6 12.d3 d4 13.Qe2 dxe3 14.Qxe3 b4 15.b1 Td8 16.f3 with very sharp play, like for example in Wang Hao-Svidler 2013.]

12.f3 Wojtaszek is getting the game back into the "main lines". [12.d5!? could be another interesting try.]

12...Qe6 13.d3 d4 Now we are back to the main line, just over the different move order: 11...Rd8 and not 11...Qe6 immediately.

14.Qe2 [After 14.xc4 14...Qxc4 Black would get nice play, especially because of the upcoming Bg4 threat.]

14...♖xe3 15.♔xe3 Black achieved a lot. He exchanged the black colored bishop, but gave up the center in return. The position is very dynamic.

15...♞b4 16.♞b1 c6 A solid move against White's d5 push and at the same time preparing to go back with the knight to d5.

17.♕e2 A logical move, but somehow if we look at the position it is very tempting to try something more dynamic. [At first sight it is hard to see why not to try 17.♞g5 17...♔d6 18.♕c4 with a nice attack on the f7 pawn. 18...e6 And after the simple 19.a3 I think White's position looks better.]

17...♞d5 What can be more logical than this move?!

18.♞xd5 cxd5 19.e5 We are in quite a tricky position. If Black was in time with developing his bishop from c8, playing Rac8 with some action on the c-file, White can just be worse because the black bishop on g7 is not going to be passive forever and can join the game by playing e6-Bf8. On the other hand, White is going to start direct play on the black king and the position remains very tense.

19...♕d7 [Probably White is doing better after 19...♔b6 Black wants to develop his bishop to f5. 20.h4 ♕f5+ 21.♕d3 and I think White should be the one who is pushing here.]

20.h4 White is not losing any time!

20...h5 [If Black didn't pay any attention to White's attack and for example played 20...♔ac8 21.h5 ♔c7 22.hxg6 hxg6 23.g4 followed by f5, with a very dangerous attack.]

21.g4! A great move! White does not care about a sacrifice of a pawn to open Black's king position.

21...hxg4 22.♞g5 All white pieces are suddenly in the attack.

22...♔b6 23.h5 f6 Safarli is trying to save himself with tactics. [After 23...gxh5 White had the strong 24.♕d3! ♔ac8 25.♔xh5 with a deadly attack on the h-file.]

24.e6! Another very strong move by Wojtaszek.

24...fxg5 [24...♕c8 didn't work because of 25.f5! and it seems like there is no more escape for Black, especially with such passive pieces placed on the 8th rank.]

25.exd7 gxh5 Black can't let White play hxg6.

26.f5 A good move. [26.♔xe7 would lead to a very interesting position because of 26...♕f6! 27.♔e3 ♔xd7 and things are pretty unclear.]

26...♔xd7 27.♔xh5 Black's position is looking very dangerous, but the bishop on g7 is still a very strong piece that is not only putting pressure on d4 but also defending the black king very well.

27...♔f8 [After 27...♙f6 White seems to be getting a winning advantage by force after a long line: 28.♖xg5+! ♙xg5 29.♗xg5+ ♔f8 30.♖h1 ♗xd4 31.♗h6+ ♗g7 32.♗h8+ ♗xh8 33.♖xh8+ ♔g7 34.♖xa8 with a probably winning endgame for White.]

28.♗xg5 White continues trying to open Black's position as much as possible. [28.♙xg4 doesn't lead anywhere as after 28...♗f6! Black has blocked the whole board! 29.♖xg5?? is of course losing to 29...♙h6]

28...♙xd4

29.♗d2! A great move! After taking the g5 pawn, White is looking for attacking chances on the open g- and h-files.

29...♙g7 [29...♙f6 didn't help either as after 30.♙xg4 ♖ad8 31.♗h2 White will mate on the h- or g-file in the next few moves.]

30.f6! Amazing play by White! Wojtaszek completely crushes Black's position by opening it to the maximum.

30...exf6 Black didn't have anything better. [30...♙xf6 31.♖f1 and mate will follow shortly.]

31.♙xg4 By now at last it is clear that White is crushing. If we look back into the game it is even hard to say where Black's mistake was...

31...♖d6 Nothing really helps anymore, White is attacking the black king from all sides.

32.♖dh1 Rh8 is coming next.

32...♔f7 33.♖h7 Now Qh6 is a deadly threat.

33...♖g8

34.♖e1! is the last precise move. White wants to mate by playing Bh5-Re8.

34...♖dd8 The position is lost and there are no more "good moves" for Black.

35.♙h5+ ♔f8 36.♗e2 With the double threat of playing Qe8 or Qe7. What a fantastic game by Wojtaszek and one of the best examples I have ever seen on the theme "attack with opposite colored bishops". Just great! **1-0**

**(2) Rapport, Richard(2698)
- Laznicka, Viktor(2673) [B13]**

18th Neckar Open 2014(8.1),
2014.04.21

GM Arkadij Naiditsch
Best rating: 2737

We are in the 8th round of the Neckar Open. Both players are leading the event with a great score of 6.5/7. One thing I have to add is that it is the biggest traditional open in Germany, with over 700 participants and a lot of Top GMs. It is also a very hard open to play in because of the daily double rounds, so sometimes you get a 10-hours chess playing day.

1.e4 Lately Rapport has played a lot of crazy openings, but his favourite seems to be 1.b3.

1...c6 2.d4 d5 3.exd5 cxd5 4.♘d3 This is more or less a random line for a long term play. White does not expect to get an opening advantage, but of course White's position is very safe.

4...♘c6 5.c3 White's idea here is to wait as long as possible with the development of the knight from g1, so not to give Black a chance of moving his bishop from c8.

5...♘f6 6.♙f4 is also a logical move. Stopping Black from playing e5 at some moment and still asking him how he wants to proceed with his development.

6...g6!? In my opinion this is one of the best choices. [For example after 6...e6?! 7.♘f3 White has a small advantage because of the bad bishop on c8.]

7.h3 Rapport is preparing the development of his knight to f3.

7...♙f5 At first sight this move looks a bit strange as now Black is getting a little damaged pawn structure, but on the other hand the pawn on f5 will open new perspectives for the black rook on the g-file and at some moment a move like Ne4 will be possible.

8.♙xf5 White has no choice but to take on f5, otherwise the position would just be perfect for Black.

8...gxf5 9.♙b3 I am not sure about this move at all as the white queen is not in a great position on b3. [9.♘f3 looks more logical. 9...♖g8 10.O-O e6 I still believe that Black is fine here, but the position is quite complex. Black is going to attack on the kingside with a future queenside castle and White will try to crush the black king on the queenside.]

9...♙d7 Black defended the b7 pawn and is preparing to castle queenside.

10.♘f3 [10.♘e2 looks safer for White. 10...♖g8 11.g3]

10...♖g8 11.g3 [Now it seems to be already quite dangerous to play 11.O-O because of 11...♟h5! 12.♙h2 ♙h6 with multiple ideas of playing or f4 or Bf4, with a big pressure on the white king.]

11...♟h5! A good move. Black is starting his play first.

12.♟e5 [In case of 12.♙d2 12...♞e6+ is an important check. 13.♞f1 O-O-O Black is clearly better.]

12...♟xe5 13.♙xe5

13...f6! Laznicka is playing a great game. Black's impulsive play is putting White under big pressure.

14.♞d1 is the only move to go on, as 14.Bf4 Nxf4 would just lead to a lost position for White.

14...♟g7 Safe and good. [Another option could have been 14...♖g5 15.f4 fxe5 Black is giving an exchange for the initiative. 16.fxe5 ♟xg3 17.♖g1 f4 With very unclear play, but to me Black's position looks very promising.]

15.♙f4 O-O-O Black is preparing to play e5 next.

16.♙e3?! And this is already quite a serious mistake. [White should have been much more careful about his development. 16.♟d2 16...e5 17.dxe5 ♞e8 (17...fxe5 didn't work as after 18.♙xe5 ♞e8 19.f4 White is OK.) 18.♞e2 ♙d6 With a probably

slightly better position for Black, but nothing too tragic has happened.]

16...e5 Now White's position is already very dangerous. Black is crushing in the center and White's king has no real place to escape.

17.dxe5?! Rapport seems not to care at all about Black's activity and his own minor developed pieces. [It was really time for 17.♟d2 but after Black's 17...♟e6! of course White's position is just bad.]

17...fxe5 18.♙xa7 Rapport is taking the pawn, and well, what else to do?! The position is already very bad and worse than to lose the game you can't really reach in chess.

18...♞c6! A very good move. Black is preparing the d4 push and at the same time securing the c-file.

19.♞b3 d4 20.O-O The white king tries to escape, but on g1 a lot of mating threats will also be in the air.

20...♟e6! Black is just playing a perfect game. Now Laznicka just wants to play Nf4 next to end White's suffering.

21.♟d2 [After 21.cxd4 21...♟f4 22.d5 ♞xd5 the game would not have lasted too long. Black's attack is deadly.]

21...♙c5!! What a great final blow! [21...♟f4? was premature as after 22.♞c4 the queens are going to be exchanged.]

22.cxd4 [The key point of the move 21...Bc5 is easy to see after 22.♖xc5]

22...♘f4! After blocking the c-file, Black is simply mating the white king. 23.f3 ♖xg3+ 24.♔h2 ♖xh3+ 25.♔g1 ♗g6+]

22...♘xd4 Nothing can save White anymore.

23.♗e3 Of course Black has a lot of winning moves here, but Laznicka is finishing the game in style:

23...♘e2+ Very nice! Of course after 24.Qxe2 Black will play Rxd2 and Qg2 mate. This game must have been quite a disappointment to Rapport, but it is another good example of how dangerous it can be to play without development. **0-1**

(3) Nakamura, Hikaru(2772) - Mamedyarov, Shakhriyar(2760) [B12]

Vugar Gashimov Mem 2014(3.1),
2014.04.22

GM Csaba Balogh
Best rating: 2672

Both players had a bad start after losing to Carlsen and drawing their other game. Nakamura and Mamedyarov were eager to come back in the tournament. A sharp fight was to be expected.

1.e4 c6 A little surprise from both sides. Nakamura more often starts with 1.d4, while Mamedyarov usually plays 1...c5 or 1...e5.

2.d4 d5 3.e5 ♟f5 4.♞f3 e6 5.♟e2 The current main line of the Advance Caro-Kann. Here Black has a wide choice, but he decides to go for the sharpest and most concrete line.

5...c5 The main move. White has a space advantage, therefore Black tries to take some ground on the queenside. He also would like to put his knight on c6, where it is clearly more active than on d7. This is the standard plan for Black, but sometimes he develops his pieces first. White is better developed and the opening of the game should favor him.

6.♟e3 ♞b6 Protecting the c5 pawn and counterattacking on b2. White should not waste time on covering the pawn, which would allow Black to perfectly complete his development. [6...cxd4 7.♞xd4 ♞e7 is the other huge alternative for Black.]

7.♞c3! A fast development is more important than the material. We are just at the beginning of the long theoretical lines.

7...♞c6 [Grabbing the pawn is considered to be risky because of 7...♞xb2 8.♞b1! ♞xb1+ (8...♞xc3+ 9.♟d2 ♞xc2 10.♞xb7+—wins.) 9.♞xb1 and Black cannot avoid the penetration of the rook on the 7th rank, which causes too big problems for him.]

8.dxc5!? However this is a sidepath. [Most of the games continue with 8.O-O 8...♞xb2 9.♞e1 cxd4 10.♟xd4 ♞xd4 11.♞xd4 ♟b4 12.♞b1 ♟xc3 13.♞xb2 ♟xe1 14.♞xe1 White is a pawn down again, but he has very strong compensation for it. Although sometimes it is only enough to gain back the material and the game heads toward a draw. 14...b6]

8...♟xc5 9.♟xc5 ♞xc5 10.♞b5! This is the point of dxc5. Black has a perfect pawn structure, but he has some concrete problems to solve around the c7 and d6 squares.

10...♔f8 Black had no time for the perfect arrangement of the pieces with Nge7 and 0-0. The strategy is clear for both sides for the later stage of the game. White should try to open the position somehow (mainly with c4 at some point), exploiting the fact that it will take the h8 rook a lot of time to join the game, while Black should aim for exchanges as the position without queens would favor him.

11.♘bd4 ♘ge7 12.0-0 ♙e4 13.♖e1! White protects his important e5 pawn against the threat of Bxf3 Nxf3 Ng6. In this case he simply moves his bishop away.

13...♚b4 This is the novelty. After all it looks like a dubious one. Black would like to create some weakening on the queenside to avoid setting up the healthy pawn formation with c3, stabilizing the d4 knight... [The previous games continued with 13...h6 with the idea to execute an artificial castling after Kg8-h7. Note that this would be much better than a quick g6-Kg7, because it would weaken all the dark squares around the king. White might go for Qd2-f4-f6 and later Ng5. 14.c3 White stabilizes his knight and prepares to trade the very strong bishop on e4 with Bd3.]

14.a3! Excellent intuition by Nakamura. He knows that moves like Rb1 or b3 are too slow and passive, he wants to obtain the healthy pawn formation with c3. He had to judge whether the

sacrificed pawn will be worth its value for an active rook on the 7th rank or not.

14...♚xb2 Maybe Qb6 is more safe, but then Qb4 loses its point.

15.♖b1 ♚xa3 16.♖xb7 A dynamic player like Nakamura does not hesitate long before sacrificing a pawn if he sees this position. The king on f8 becomes really vulnerable. White has very easy attacking plans like Ng5 or Qd2-f4, while Black's defensive tasks are much harder, because there are no concrete lines and he must choose between several different plans and it is impossible to evaluate which one will be the best. From a practical point of view White's perspectives are much more promising.

16...♙xf3 Black tries to get rid of some pieces to decrease the level of the danger. [Black cannot get rid of the strong rook with 16...♖b8? 17.♖xb8+ ♘xb8 18.♚b1! and suddenly the queen replaces the rook on b7 with even bigger power!; 16...h6 to prevent the Ng5 ideas, threatening the main weakness on f7 would probably have been met by 17.♚d2 The queen is heading to f4 and at the same time White wants to occupy the b-file with his other rook with the idea of a potential doubling on the 7th rank.]

17.♘xf3 h6 Black takes the g5 square under control.

18.♚d2! The usual plans, the queen is heading to f4 and the rook gets ready to be doubled on the b-file.

18...g5 Black prevents Qf4 and quickly intends to play Kg7 and Rfb8. White has no time to waste. [18...♘g6 was too slow. 19.♙d3 ♚g8 20.♙xg6 fxg6 Black is missing only one move to play Kh7, but it is enough for White to strengthen his pressure with 21.♖c7! Sending the knight away from c6 to free the d4 square for his own knight. 21...♚a6 (21...♘e7 22.♘d4

and the e6 falls.) 22. ♖c3 ♜c8 Black cannot hold the knight in view of the elegant 23. ♕d3! ♕xd3 24. ♜xc8+ White saves his rook with check and recaptures the queen. 24... ♙f7 (24... ♙h7 25. ♜xh8+) 25. ♜c7+!+-]

19.h4! The most natural attacking move! White not only destroys the pawn structure in front of the black king, but also fights for the f4 square to occupy it with the queen.

19...g4 20. ♖d4 ♕a5 The trade of the queens would solve the problems, but White is not forced to accept it. [20...g3 was an interesting defensive idea to weaken the king a bit. However it has its drawback that it also opens the f-file on his own king. 21.fxg3 ♕xg3 22. ♖xc6 ♖xc6 23. ♜f1 ♜h7 24. ♜f4! Suddenly Black is in deep trouble after this very subtle move. White simply prevented Qxe5 and wants to play Bh5. 24... ♜g7 (24... ♖xe5 drops a piece after 25. ♕b4+ ♙g7 (25... ♙g8 26. ♜b8+ ♜xb8 27. ♕xb8+ ♙g7 28. ♕xe5+-) 26. ♕d4! +- and the pin is deadly. 26... ♕e1+ 27. ♜f1 ♕xe2 28. ♜xf7+-)]

25. ♕h5! ♖xe5 The same happens after 25...Nd8. 26. ♜b3!+- trapping the queen!; 20... ♖xd4 21. ♕xd4 h5 is too passive. 22. ♕d3+- followed by Ra1 or Reb1 and Qf4 with total domination.; 20... ♖xe5 loses to 21. ♕f4 with the double threat of Qxe5 and Nxe6. 21... ♕d6 22. ♕xg4+-]

21.c3! Keeping the strongest attacking piece, the queen. White is still a pawn down, so he must focus on gaining some benefits from his attacking perspectives.

21... ♖xd4 22. ♕xd4 ♖f5

23. ♕d2! A difficult move to find! Instead of concrete attempts to break through, Nakamura temporarily goes to passivity. The g4 pawn is hanging and the other plan is Bd3, trying to kick out the knight from its outpost. [23. ♕xg4 drops too many pawns. 23... ♕xc3 24. ♜eb1 ♕xe5; 23. ♕f4 allows 23... ♕xc3 24. ♜c1 ♕d4! forcing the trade of queens!]

23...d4 Mamedyarov looks for counterplay in active play. In general this is the right idea, but this time it does not help... [23...g3 24.♟d3 ♚c5 25.♞f1!± also looks very promising; 23...h5 24.♟d3+- should lead to a quick defeat for Black.]

24.♟xg4 ♚xc3 25.♞e2! Obviously.

25...♞xh4 looks greedy, but there was already no adequate defence for Black. The main threat was Bxf5 exf5 and e6 with a mating attack. Black parried this idea. [The d-pawn does not bring salvation: 25...d3 26.♞e4 d2 27.♞d1 There is no defence for Black. 27...♞e8 28.♟xf5 exf5 29.♞xf5 ♚c4 30.♞xd2+-; 25...♞e8 has a nice refutation: 26.♟xf5 exf5

27.e6! ♞xe6 (27...fxe6 28.♞e5+-) 28.♞xf7+! mates soon.]

26.♟h5 ♞h7

27.♞e4! The most obvious move, but it actually required

subtle calculation. Nakamura has done a perfect job. White is winning in all lines.

27...♞c8 Leaving from the Rxf7 Rxf7 Qxa8 threat. [27...f5!? would have been a spectacular defence, but it also loses after 28.exf6! ♞xb7 29.♞xe6! White is a rook down, but the threat of Qe8 Rxe8 Rxe8 mate is too strong! (29.♞xb7 only leads to a draw because Black can prevent the mate on f7 with 29...♞xe1+ 30.♟h2 ♞e5+ 31.g3 ♞xf6 32.♞xa8+ ♟g7=) 29...♞c8 30.♞d6+ ♟g8 31.♞g3+ ♟h7 32.♞xh4+- and the black king is too exposed. He cannot hold for long.; 27...♞f5 is refuted by 28.♞xf7+! ♞xf7 29.♞xa8+ ♟g7 30.♞e4!+- and Rg4 mates.]

28.♞xh7 ♞xe1+ 29.♟h2 ♞xe5+ 30.g3 There are no more checks left for Black, which means the end of the game.

30...♞c7 [30...♞xh5 31.♞h8#]

31.♞b8+ ♟e7 32.♞xf7+ ♟d6 33.♞f8+ A perfect victory by Nakamura! 1-0

**(4) Bacrot, Etienne(2722)
- Guseinov, Gadir(2621) [E94]**Shamkir AZE(3.5),
2014.04.22GM Csaba Balogh
Best rating: 2672

Bacrot got a nice edge from the opening thanks to his excellent preparation. Then he managed to finish the game in style...

1.d4 ♘f6 2.c4 g6 3.♘c3 ♗g7 4.e4 d6 5.♘f3 O-O 6.♗e2 e5 7.O-O Many Azeri players employ the King's Indian defence as their main weapon. Bacrot himself is also a specialist of it with the black color. Here the main move is 7...Nc6, but Guseinov goes for his petline.

7...exd4 8.♗xd4 ♖e8 9.f3

9...♘c6 The two Azeri GMs Guseinov and Mamedov have plenty of games on this sideline. Black aims to play on the dark squares and wants to put pressure on the center with his minor pieces.

10.♗e3 ♘h5 This knight is heading to f4.

11.♘c2! This is the start of Bacrot's deep preparation. White leaves from all the kind of Nf4 motifs by removing his knight

from d4. If he manages to consolidate with Qd2 and Rad1, he could claim a small but stable edge due to his very strong center. [The most common move by far is 11.♗d2 but Black is considered to be more or less fine after 11...♘f4 12.♗fd1 ♘xd4 13.♗xd4 ♗xd4+ 14.♗xd4 ♘xe2+ 15.♘xe2 b6 16.♘c3 ♗b7 Black slowly prepares to undermine the e4 pawn with Qg5 and f5. At some point White jumps with his knight to d5, where it is going to be taken and the arising heavy piece endgame is considered to be very slightly better for White, but Black usually holds.]

11...♗e5 Black plays in the spirit of the opening. The main threat is Qh4 and if White prevents it with let's say Qe1, he continues playing on the dark squares with Nf4. [11...f5 is simply met by 12.♗d2 and Rad1 next. 12...fxe4 has the direct problem that the knight on h5 becomes misplaced. 13.fxe4 ♘f6 14.♗g5 With an unpleasant pin.]

12.♘d5! The idea is clear. White brings a piece to control the f4 square. He directly prevents Nf4 and against Qh4 he intends to play f4 himself! [12.f4? weakens the e4 pawn. 12...♗xc3 13.bxc3 ♘f6 wins the most important white pawn.]

12...♘e7 A logical attempt to get rid of the strong knight. [The other critical move is 12...♗xb2 but Mamedov lost a very nice and short game against Ding Liren, who blitzed out the

following ambitious moves: 13.g4! ♘g7 (13...♙xa1? 14.♚xa1 should not come into Black's mind as the danger on the long diagonal and the holes on f6, g7, and h6 are too much without the dark squared bishop.) 14.♖b1 Black has saved his knight, but it blocks the bishop's route back to his camp... 14...♙f6 15.f4! The most energetic move again. White goes for an instant crush. 15...♖xe4 16.g5 ♙e7 17.♙d3 ♖e6

18.♙c1! Black is two pawns up, but his pieces are totally doomed. White put his bishop on the long diagonal and soon won the game. Ding Liren-Mamedov, Istanbul 2012]

13.♙g5! This is the novelty, which seems to cause real problems for Black. It is very strange, that Guseinov, who plays this line as his main repertoire, did not know about it because it is the computer's main suggestion and it gives White a clear edge. Bacrot has basically just followed his analysis. [In the previous game White played the tempting 13.f4 but Black managed to get counterplay after 13...♘xd5 14.exd5 ♙xb2 15.♖b1 ♙g7 16.♙xh5 ♙f5! followed by recapturing the piece and Black is fine.]

13...f6 14.♙e3! After the f6 weakening has been provoked, White is threatening to trap the bishop with f4.

14...♘xd5 [14...♙xb2? 15.♖b1 ♙e5 16.f4+- wins a piece.]

15.♚xd5+ ♙e6 16.♚d2! Controlling the important f4 square

and threatening to play f4 again, winning the bishop.

16...f5 There was nothing better. Black had to open the way for his bishop, but this weakens his pawn structure in front of his king. [16...♙xb2? always loses to 17.♖ab1 ♙e5 18.f4+-; 16...g5 is simply met by 17.g3! with all the problems Black had before and now additionally White has the f5 square, where he can put his knight later on.]

17.f4! With the idea to create real damage in front of the king after taking on h5.

17...♙g7 [If Black had accepted the sacrifice, White had prepared a deep plan to strengthen his attack: 17...♙xb2 18.♖ab1 ♙g7 19.♙xh5 gxh5 20.♙d4! After the exchange of the defender, the king becomes really vulnerable. 20...b6 Trying to save the material advantage, but here comes the point: 21.♖b3! This is the reason why Guseinov was worried to take on b2 and of course it seems to be completely understandable. 21...h4 22.♙xg7 ♚xg7 23.exf5 ♙xf5 24.♘e3! Black faces real problems now. Be6 moves into the f5 tempo. Otherwise Nd5 is coming, followed by a highly unpleasant check on d4, while after 24...♙e4 (24...♚f6 25.♘d5) 25.♘g4! is strong and Qd4 next move!]

18.♙xh5 gxh5 19.♙d4! Just like in the 17... Bxb2 line, White trades the strong defender bishop to enable himself to lead

an effective attack.

19...♔d7 [19...♙xc4 loses to 20.♙xg7 ♙xf1 (20...♔xg7 21.♔d4+-) 21.♙c3!+- This subtle retreat creates the double threat of Rxf1 and Qd4!; 19...fxe4 20.♙xg7 ♔xg7 21.f5 is also extremely suspicious, as f6 is coming next. Perhaps this could have been a better practical chance, but objectively it is not going to be a lot of fun either.]

20.♖f3! A nice way to bring to rook into the attack.

20...fxe4 [20...h4 parries the direct threat of Rg3, but it does not solve the problems at all. Suddenly the h4 pawn becomes a target. 21.exf5 ♙xf5 22.♘e3 Black has problems with protecting the h4 pawn. The material is balanced at the moment, so the loss of the pawn means entering a technically lost position. 22...♙e4 (22...♖f8 23.♙xg7 ♔xg7 24.♔f2±) 23.♖h3! ♙xd4 24.♔xd4 ♔g7 Black at least manages to avoid getting mated, but after 25.♔xg7+ ♔xg7 26.♖xh4 and Kf2 next, White is just a healthy pawn up.]

21.♖g3 ♖e7

22.♘e3! An excellent position for the knight. Not only blockading the e-pawn, but it also supports the crushing plan of f5-f6!

22...♖f8 [Black can unpin his bishop with 22...h4 23.♖g5 h6

but after 24.♖h5!+- he is still completely lost. White can collect all the pawns anytime, but the f5-f6 threat is still hanging in the air with a quick mate.]

23.♖f1 All white pieces are excellently placed now! Black has a hopeless position.

23...h6 [23...h4 24.♖g5 h6 25.♖h5 h3 26.f5+- and the attack is breaking through.]

24.f5! All conditions are given to execute the final blow!

24...♙xf5 25.♙xg7 ♖xg7 26.♔f2! The point of the sacrifice. After this simple move, White wins the piece and also the game.

26...♖g5 [26...♖xg3 27.hxg3!+- (It was still not be too late to spoil the game. After 27.♔xg3+? 27...♔h7 28.♔f4 ♔g6! Black suddenly holds as he can unpin himself with Rf7.)]

27.♘xf5 Black plays some unnecessary moves and soon resigns...

27...♔h7 28.♖xg5 hxg5 29.h4 gxh4 30.♔f4 ♔e6 31.♔g5 What a nice game! It will be interesting to check how Guseinov and Mamedov try to improve on their opening. **1-0**

Endgame section

(15) Mamedyarov, Shakhriyar(2760)
- Caruana, Fabiano(2783)

Vugar Gashimov Mem 2014(5.3),
2014.04.24

GM Arkadij Naiditsch
Best rating: 2737

All game long White was putting pressure and he finally reached an opposite colored bishop+queen endgame with a pawn up and good winning chances. Anyhow, it is hard to find a way to break through Black's defence. Mamedyarov is showing us perfect technique based on very exact calculation.

61.e4!! A fantastic move. Of course White's main idea is to play e4-e5, but now the black queen is getting very active and White will be forced to give a full piece!

61...♖c3 Letting White play e5 was of course not an option.

62.♖xf7 ♜xd3+ 63.♔g4 was the key idea behind White's play. White is a piece down for 2 pawns, but the mating threat of playing Qf8 next and the future idea of playing e5 are seriously complicating Black's life.

63...♞e2+! Caruana finds his best defence chances.

64.♔f5 h5! Black at the same time defends from Qf8 mate and wants to play Qg4.

65.♞f8+ ♔h7 66.♞f7+ ♔h8

67.♞g6 White is pushing very hard, but is the position really winning?!

67...♞xc4? A mistake. [The only chance to fight was to play 67...♞f3! attacking the f4 pawn. 68.♞g5 Things are looking bad for Black, but another beautiful move seems to save the game. 68...♔h7! Not giving White the chance to play Kg6 and it is hard to see how White could improve his position here.]

68.♞xh5+ Now the game is almost over by force.

68...♔g7 69.♞g6+ A good move. The white king is going to take a great position on e6 and Qg6 is needed to protect the e4 pawn.

69...♔h8 70.♔e6 ♞f1 There is no more real hope for Black.

71.♞h6+ ♔g8 72.♞g6+ ♔h8 73.♞h5+ Probably in a bit of time pressure, White decides to first give a couple of checks before playing the final e5 push.

73...♔g7 74.♚g4+ ♔f8 75.♚h5 ♔g7

76.♚g5+ The white queen finally takes its best position.

76...♔f8 77.e5 ♚b1 Nothing can save Black anymore.

78.♚h6+ ♔g8 79.♚g5+ [The simple 79.exd6 also seems to give White a totally winning position.]

79...♔f8 80.f5 But of course f5 is very strong. White not only wants to play exd6 but f6 is also a deadly threat.

80...♙xe5 81.♚xe7+ ♔g8

82.♚xe5 Black's only hope now is to give a perpetual check, but there are clearly not enough checks for that.

82...♚b2+ 83.♔e6 ♚e2+ 84.♔f6 And the white king has escaped. A very important victory for Mamedyarov to come back into the tournament after his bad start. 1-0

(16) Wojtaszek, Radoslaw(2716)
- Eljanov, Pavel(2732)

Gashimov memorial,
2014.04.21

GM Csaba Balogh
Best rating: 2672

Black has an extra pawn, but as we know in rook endgames the defensive side might always hope for salvation. However, Eljanov realizes his material advantage with perfect technique!

42...b4! Black fixes the weakness on b3, so after it falls he obtains a very strong protected passed pawn on b4.

43.♖d6

43...♙f5!! An excellent move! Black gives back his material

advantage, but he activates his king. It is heading towards the b3 pawn. [43...♖c3 is a much worse version after White plays 44.♙cxc6! ♜xb3 45.♙a6! ♜xa6 46.♙xa6; The passive 43...♙a6 does not come into consideration because 44.♙c7= yields enough compensation.]

44.♙dxc6 ♜xc6 45.♙xc6 ♔e4! The idea is to win the b3 pawn with Rd7-d3. At the same time White will collect the a5 pawn, but Black's king will excellently support his own b- passed pawn.

46.♙c4+ White tries to prevent the Rd7-d3 idea by luring the king to the d-file. [46.g4 does not change much: 46...♙d7! 47.♙c5 ♜d5 48.♙c4+ ♔d3 49.♔g3 ♔d2 and Rd3 next. It will be similarly hopeless as in the game.; The problem is that after 46.♙c5 46...♔d4 White cannot hold his rook on c5. He must either give up the control over the c3 square or the attack of the a5 pawn.]

46...♔d3 47.f4

47...♙e7! The black king has prepared to support the b-pawn, therefore it is time to collect the b3 pawn with the rook.

48.♙c5 ♜e3 49.♔h3 [49.♙xa5 is equally hopeless if Black plays the right plan. 49...♔c3 50.♙a7 ♔xb3 51.♙xg7 ♔a2! This is the key! Black should not be greedy with taking on a4, because that pawn actually gives a perfect shelter for the

king against the checks along the a-file. Black only needs to advance his b-pawn and it automatically promotes. 52.a5 b3 53.a6 b2 54.a7 ♙a3--+]]

49...♔d4 50.♙xa5

50...♙e7!! Another very subtle and brilliant move by Eljanov, which deprives White from any kind of counterplay. Black inevitably collects the b3 pawn with Kc3 and the 7th rank is also protected. [50...♙xb3 51.♙a7 is less clear. For instance after 51...♙b1 52.♙xg7 b3 53.♔g4 b2 54.♙b7 ♔c3 55.♔f5= This is the right defensive strategy for White. He tries to eliminate all the pawns and sacrifice his rook for the b-pawn. Afterwards he starts to advance his own pawns saves the game.]

51.♙b5 [51.♔g4 51...♔c3 52.♔f5 ♔xb3--+ followed by Ka2 and pushing the pawn. White cannot create a passed pawn to get some counterplay.]

51...♔c3 52.a5 ♙a7 53.f5 [53.a6 53...♙xa6 54.♙b7 could be met by 54...g6 and f5 next. This is the reason why Wojtaszek decided to fix the g7 pawn with his 53th move.]

53...♔xb3 54.a6 ♙xa6 55.♙b7 White does everything he can to save the game. He plays with the right strategy and wins a pawn on the kingside in order to enable himself to create a passed pawn, but unfortunately for him Black is progressing too quickly.

55...♔a3 56.♖xg7 b3 57.♖b7 b2 58.g4 [58.♔g4 would be the principled idea to bring the king to g6 and pushing the g-pawn to avoid getting cut off, but Black has 58...♖a4+ 59.♔h5 ♖b4—+ and White cannot give up his rook for the b-pawn.]

58...♖a4! [The last strong move and White resigned in view of 58...♖a4 59.♖xb2 Black was threatening to play Rb4. 59...♔xb2 60.♔h4 ♔c3 61.♔h5 ♔d4—+ White is just too slow. What a flawless performance by Black!] **0-1**

Clash of the Titans

(17) Alekhine, Alexander
- Reshevsky, Samuel Herman[B05]

Kemer(8), 1937

GM Kamil Miton
 Best rating: 2655

1.e4 ♟f6 2.e5 ♟d5 3.d4 d6 4.♟f3 ♟g4 There are also two other options: [4...dxe5 5.♟xe5 c6; 4...g6]

5.c4 [5.♟e2 5...e6 6.O-O ♟e7 7.c4 ♟b6 8.exd6 cxd6 9.h3 ♟h5 10.♟c3 O-O 11.b3 White has a stable advantage as he has more space and the knight on b6 is very limited.]

5...♟b6 6.♟e2 dxe5 7.♟xe5 [7.c5 7...e4 8.♟g5 ♟xe2 9.♔xe2 ♟d5 10.♟xe4 e6 Thanks to useful square on d5 Black should not have any problems.]

7...♟xe2 8.♔xe2 ♔xd4

9.O-O Thanks to this pawn sacrifice White is going to have the better development. Also the position of the black queen is unsafe.

9...♘d7 Black immediately gets rid of the active knight on e5. Worse is [9...e6 10.♖d1 ♜h4 (10...♞c5 11.b4! ♞xb4 12.♞f3 f6 13.♞h5+ g6 14.♘g6+-) 11.♞f3 f6 12.g3 ♞h3 13.♞xb7 fxe5 14.♙e3 XRa8 14...♘d7 15.♙xb6 ♘xb6 16.c5 ♙xc5 17.♞c6+ ♔f7 18.♞xc5 Black's position is very bad because of his many weaknesses.]

10.♘xd7 ♘xd7 11.♘c3 c6 Black avoids the unpleasant Nb5 threat. [11...e6 12.♘b5 ♞b6 13.♙f4 ♖c8 14.♖fd1 ♙e7 15.b4! Black will not be able to escape with the king on the time. 15...a6 (15...♙xb4 16.♖ab1+-) 16.♞d3 ♘f6 17.♙e3 c5 (17...♞c6 18.♘a7+-) 18.bxc5 ♙xc5 19.♙xc5 ♖xc5 20.♘d6+ with Rb1 next and White is winning.]

12.♙e3 ♞e5 13.♖ad1 Black has no weaknesses but White's development is much better.

13...e6 14.♞f3 White is preparing many ideas like Nb5 ,Rxd7 or Bf4.

14...O-O-O This will only temporarily solve the problems with the king. [14...♞f6 15.♞g3 ♞e5 Trying to exchange the queens. 16.♙f4 ♞f5 17.♖fe1 With good compensation.; 14...♙e7 15.♘b5! Threatening Bf4. 15...cxb5 16.♖xd7 (16.♞xb7 16...♖d8) 16...♙xd7 17.♞xb7+ ♞c7 18.♖d1+ ♙d6 19.♖xd6+ ♙xd6 20.♙f4+ e5 21.♙xe5+ ♙xe5 22.♞xc7+± In this case the queen is much stronger than two rooks.]

15.♙xa7 [15.♞xf7 15...♙d6!± (15...♞f5? 16.♞xf5 exf5 17.♙xa7 b6 18.♘a4 and Black will be not able to catch the bishop.)]

15...♞a5 16.♙d4 ♞f5 17.♞g3 e5 18.♙e3

18...♙b4 looks natural but Black had other interesting ideas. [18...h5! The idea is to exchange queens and if White plays 19.f3 then after 19...h4 20.♞f2 h3 21.g3 ♙e7 the light squares around the white king are weaker and Black will keep more possibilities for future counterplay.]

19.♘a4 ♙a5 Otherwise after Nb6 Nxb6 Bxb6 White gets control of the d-line.

20.f4! White is going to connect other pieces to the game.

20...♙c7 [20...e4 21.♙d4 With the idea to transfer the queen to a3 to attack the black king.]

21.b3 To prevent the idea with Qc2. [21.fxe5 21...♞c2 (21...♞xe5 22.♙f4+-) 22.b3 ♘xe5 23.♖xd8+ ♖xd8 24.♞xg7 ♞e2 The white pieces completely lost coordination and Black will get a decisive initiative because of the many threats like Ng4 or Rd1.]

21...f6 Black wants to solve the problems with the f-file. [21...♞g6 was good for Black.]

22.fxe5 ♖e6

23.h3 Prophylaxis based on some deeper calculation. [23.♖xg7 could be risky in a practical game. 23...♖hg8 (23...♖dg8 24.♖xd7+ ♖xd7 25.♖xd7 ♔xd7 26.exf6 followed by Nc5, with a huge advantage.) 24.♖h6 ♖g4 (24...♖g6 25.♖xh7 ♖dg8 26.g3 and White simply stopped the pressure on the g-file.) 25.g3 ♖xe5 26.♖xd8+ ♕xd8 27.♖f4 and White managed to consolidate.]

23...♖hg8 24.♕d4 ♖xe5 [24...♕xe5 25.♕xe5 ♖xe5 26.♖f2 White keeps the queens as the black king is weaker, but the position is around equal.]

25.♖c3 ♖d7 Preventing Nb6.

26.c5 White wants to prevent Qd6 and advance his queenside pawns. [26.♖fe1 26...♖f5 (26...♖d6 27.♕e5 ♖xe5 28.♖xe5 ♖xe5 29.♖xd8+ ♖xd8 With a worse but solid position for Black.)]

26...♖ge8 27.b4 ♖b8 Black activates his rook on d8 but better was [27...♖xa2! 28.♖b6+ (28.♖a1 28...♖d5+ The white king is also not safe and Black has threats over the n2-b8 diagonal or Re2.) 28...♖xb6 29.cxb6 And now comes Black's counterplay: 29...♖e2 30.♖f3 ♖xd4!↑]

28.♖b6+ ♕xb6 29.cxb6 ♖xa2 Black wins the pawn, but not

in the right moment as White gets strong pressure now.

30.♖g3 The c7 square is very weak.

30...♖d7? [30...♖f7 is the only move to keep Black in the game, but after 31.b5 White's pressure is very unpleasant.; 30...♖a6 31.♖a1 ♖d5 32.♖xa6 ♖xd4+ 33.♖h1+—]

31.♕c5? White could have won immediately after [31.♕xf6! 31...gxf6 32.♖xd7 ♖xd7 33.♖c7+ ♖e6 34.♖e1++—]

31...♖f7 32.♖a1 [32.b5 32...cxb5 33.♕d6→Black should not survive here.]

32...♖g6

33.♖h2 Of course White keeps the unpleasant Qc7 mate threat.

33...♖e5 A logical move which prevents threats on the c7 square. [33...♟a6 34.b5 cxb5 35.♖fc1 ♖e2 Black is looking for counterplay. 36.♙f2+ (36.♙e3+ doesn't work because of 36...♖c2 37.♖xc2+ ♜xc2 38.♖c1 ♖d1+) 36...♖c2 37.♜g3 ♙d8 38.♜b3 ♖xc1+ 39.♖xc1 ♜f7 40.♜xb5 This position is very difficult to play for Black because of his very bad king and knight.]

34.♖a8?! [34.b5↑was possible because of a similar combination as in the game. White has the initiative. 34...♖xc5?? is a blunder because of 35.♖a8 ♖e5 36.♜xe5! fxe5 37.♖xb8+ ♟xb8 38.♖f8+]

34...♖d2?? The decisive mistake. After the correct [34...♜d3 the position could be totally unclear because Black's heavy pieces are very active.]

35.♖xb8+! A nice tactical finish.

35...♟xb8 36.♜xe5+1-0

Editorial Preface

A great week of chess has just ended.

In the Gashimov Memorial Carlsen proved once again who is the world number 1. After a great start we saw Magnus lose 2 games in a roll, which is a shocking rarity for the World Champion who seems to be so very stable, but after a swift recovery Carlsen scored 4/5 in the final games and became the clear winner with 6.5/10. On the second place with 5.5/10 points we find Caruana, who also played very good chess and only lost the battle for first place in the last round against Carlsen.

In the B tournament, which was also very strong, the first place went to Eljanov with 6/9. Motylev was clear second with 5.5/9 and Wang Hao and Bacrot shared 3-4th places.

The Women's World Championship in blitz and rapid chess (without Hou Yifan and Koneru) was another very interesting event.

In the rapid section it was a very tight race until the end. Finally the 1st place was shared between Lagno and Kosteniuk, both with 10.5/15, but thanks to her better tiebreak Lagno was the lucky winner!

3rd place surprisingly went to Olga Girya with 10/15, and she had a better tiebreak than Stefanova and Anna Muzychuk, who also scored 10/15.

In the blitz section Anna Muzychuk made her way to the top with an amazing score of 23/30 and two and half points more than the second placed Dzagnidze with 20.5/30. 3rd place went to Kosintseva Tatiana with 20/30.

This week we will try to focus our commentaries on these main events and we hope you will enjoy the great performances by the best chess players in the world!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Mamedyarov, Shakhriyar(2760) - Carlsen, Magnus(2881) [E34]

Vugar Gashimov Mem 2014(6.2),
2014.04.26

GM Csaba Balogh
Best rating: 2672

The players arrived in different moods to this game. Carlsen had just unexpectedly lost two games in a row, while after a bad start Mamedyarov won a nice game against Caruana...

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.♚c2 The Qc2 system of the Nimzowitsch is the pet line of Mamedyarov.

4...d5 5.♘f3 Trying to surprise Black by driving the game to a less explored territory at a very early stage of the game. The two big main lines are 5.cxd5 and 5.a3 and Mamedyarov has employed both of them before.

5...dxc4 Carlsen accepts the sacrifice and shows that he is ready for a sharp game. Black wins a pawn and he is able to protect it with b5, but White gets a very strong center and aims to create compensation with active play.

6.♙g5 [6.e4 is also met by 6...b5 7.a4 c6 saving the extra pawn.]

6...b5 7.a4 c6

8.g3 Logical development of the pieces. The black pawn chain on c4-b5-c6 is safe at the moment. It is clear that White cannot increase the pressure on the c4-b5 pawns, therefore he fianchettoes his bishop to attack the backward c6 pawn with some Ne5 ideas. [It is important to mention that 8.♘xf6 should be recaptured by 8...gxf6 with the idea to have 9.axb5 cxb5 10.♖e4 ♖d5! We can be familiar with this motif from many different openings.]

8...♗b7 9.♘g2 ♗bd7 With his last two prophylactic moves, Black has prevented Ne5 and neutralized the direct threats on the long diagonal, connected with the pin on g2-a8 after axb5 cxb5. These were more urgent than castling...

10.O-O ♖b6! After White has castled, he left the pin of the bishop and he was threatening to take on b5. Carlsen must keep his extra pawn at any cost, otherwise White gets a pleasant edge. [10...a6 is not as good in view of 11.♗e5 and the knight cannot be taken. Additionally White has opened the long diagonal, therefore he is threatening again with axb5 axb5Nxb5!]

11.e4?! White changes the plan and tries to compensate with his strong center, but I believe it is a wrong idea. [I liked 11.♗e5! much more, with the following ideas: 11...♗xe5 12.♘xf6! (12.dxe5 12...♗d5 is fine for Black with the extra pawn. He keeps his healthy structure on the kingside and he is ready

to play h6 followed by O-O.) 12...gxf6 (12...♗f3+!? is interesting to avoid change of the pawn structure. 13.♘xf3 gxf6 Black is a pawn up, but his king is exposed. It will never be safe even after castling. White might search for compensation with Ne4.) 13.dxe5 f5 (13...fxe5 is a bit risky. The king gets too exposed and White can effectively use the e4 square with his pieces. 14.♖e4 with a strong initiative. There is the double threat of Qxe5 and axb5 as well.) 14.♗fd1 followed by e4, trying to make use of the d6-f6 holes. The bishop on b7 is poor.]

11...a6! Knowing the next two moves, everything becomes clear. Black strengthens his b5 pawn with the c5 idea in mind. [11...O-O was still premature in view of 12.♘xf6! ♗xf6 13.e5 ♗d5 14.♗g5! and Black is forced make a huge weakening in front of his king: 14...g6 and the hole on f6 or ideas like Qe4-h4 might be very dangerous.]

12.♗fd1

12...h6! The last preparation before castling. Carlsen takes the g5 square under control to avoid the idea we had seen in the 11...O-O line.

13.♗e3 [13.♘xf6 It makes no sense to give the bishop now, because White cannot create any serious threat. 13...♗xf6 14.e5 ♗d5 15.♗e4 O-O followed by Be7 and c5 with a healthy

extra pawn. Ng5 never works.]

13...O-O Things have developed perfectly from Black's point of view. He managed to preserve his extra pawn. White cannot create any concrete threats, he might only hope for some positional compensation.

14.d5 c5 Creating a passed pawn with d6 would cost the important e4 pawn after Bxc3, while after 15.dxe6 Qxe6 White has no compensation at all. [14...♗c5 15.dxe6 fxe6 was also better for Black, but Carlsen wanted to open the diagonal of his b7 bishop.]

15.a5! A creative move. Mamedyarov tries to deflect the queen from the e6 square to at least create some weaknesses in Black's camp after exchanging the pawn formation dxe6 fxe6. It also has the drawback that there is no pressure anymore on the b5 pawn and also the a5 pawn becomes a weakness, but from a positional point of view Black was already winning, therefore Mamedyarov correctly tries his best chance to create some complications on the kingside...

15...♔d8 [15...♗xa5 would have been a mistake. 16.dxe6 The queen cannot recapture now, while after 16...fxe6 17.e5! ♖d5 18.♗xh6! suddenly White is fine due to the Qg6 idea.]

16.dxe6 fxe6 The bishop on b7 starts to work as well, but at least White has succeeded in weakening the kingside a bit.

17.♖h4 Protecting the e4 pawn and heading to g6. [There was a very nice an important line if had White tried 17.e5 17...♗xc3 18.bxc3 ♖d5 19.♗xh6

The same as in the 15...Bxa5 line, but probably both players had seen that Black wins after 19...♔xf3!! 20.♗xf3 (20.♔g6 20...♔f7 21.♗xg7 looks tempting because White takes on e6 and d5, but Black has the nice refutation 21...♖f4!! opening the g-file. 22.gxf4 ♔xg7 23.♔xe6+ ♖h8 24.♔h3+ ♔h7—+ wins.) 20...♖xe5 Black attacks the f3 bishop with tempo and also covers the g6 square, therefore the h6 bishop is also hanging. 21.♗xd5 (21.♔e4 21...♖xf3+ 22.♔xf3 gxf6—+; 21.♗g2 21...gxf6—+) 21...♗xd5+ Suddenly the white king gets into trouble on the light squares.]

17...♗xc3 18.bxc3 ♔e8! Simple and strong. Black controls the g6 square and prepares to bring his a8 rook into the game. He has also created the direct threat of playing g5! and the knight has only one place to retreat, but Nf3 drops the e4 pawn...

19.f4 ♔d8 20.h3 White was annoyed by the Ng4 move, when the bishop has no good square to leave.

20...Rf7! Very nice regrouping of the pieces. Black stands a bit passively, therefore he wants to initiate the trade of some pieces. The knight had no good square to leave from d7, but now it is ready to jump to f8, overtaking the queen's task to control the g6 square and the other rook is ready to occupy the d-file as well.

21.Rd6 [21.g4 was an active option, with the idea that if Black plays like in the game 21...e5! then the d6 square is still free and White might occupy it with the knight. However after 22.f5 Black gets a big advantage after

22...exf4! 23.fxd6 fxe3! 24.fxe8 Rxe8 Black is going to win the e4 pawn as well and he gets two knights and three pawns against the queen, but the quality of his pieces is more important. 25.Rd1 fxe4 26.fxe4 Rxe4 followed by Ne5-d3, with a probably winning advantage!]

21...e5! Fixing the weakness on e4! White is forced to lock the position, otherwise he even loses that pawn.

22.f5

22...f8! Excellent technique! Black transforms his material advantage into a huge positional edge!

23.fxc5 Rxd6 24.fxd6 Rd7 25.fxf8 Sad, but there was nothing better. White ends up with his poor bishop on g2, a very weak e4 pawn and the big hole on d3. [25.fxc5 25...Rd3+ also wins for Black.; 25.Rd1 25...Rd8+]]

25...Rxf8 26.Rd1 Otherwise Black would have played Rd3.

26...Rc5+ 27.Rh2 [27.Rh1 loses to 27...Re3! (27...fxe4? did not work here because of 28.fxe4 Rxd1+ 29.Rxd1 fxe4 30.Rd8+ Rh7 31.fg6+ and suddenly White wins.) 28.Rxd7 fxd7+ and the e4 pawn falls soon.]

27...fxe4! [Pretty little combo at the end. White resigned in view of 27...fxe4 28.fxe4 Rxd1 29.Rxd1 fxe4+ and the Qd8, Ng6 idea does not work because of Qf2 and Black mates first. Otherwise he is a pawn down and more material will be lost soon.] **0-1**

**(2) Eljanov, Pavel(2732)
- Guseinov, Gadir(2621) [E94]**

Vugar Gashimov Mem B 2014(8.3),
2014.04.28

GM Csaba Balogh
Best rating: 2672

Pavel Eljanov convincingly won the B tournament of the Gashimov memorial. He played very good positional chess, let's check one of his victories.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♙g7 4.e4 d6 5.♘f3 O-O 6.♙e2 e5 7.O-O In the last issue I commented the Bacrot-Guseinov game, where Black played his pet line 7... exd4, but got crushed in a nice game. I mentioned that it would be interesting to follow how Black will try to improve his game as it was his main repertoire. We did not need to wait for long, as Guseinov decided to give up his system and tried another sideline.

7...♘bd7 The main continuation is 7...Nc6.

8.♙e3 ♚e7 Another rare move. 8...c6, 8...Ng4 or 8...Re8 are more common.

9.♚c2 exd4 Black clearly wants to play an open game and a similar structure as in his previous line with 7...exd4, therefore he avoids the 9...c6 10.d5 line. However the queen is not so well placed on e7. In these structures, Black usually tries some c6, Nc5, Re8, a5-a4 and Qa5 maneuvers.

10.♘xd4 ♜e8 11.f3 a6 If Black wanted to play c6, he should have done it before with the queen on d8. He tries to play some original chess, but White always has the option to jump Nd5 and after Nxd5 and cxd5 the pawn formation change would be in his favour.

12.♚d2! With his last move, Black took the b5 square under control. He was intending to play c5, sending the knight to the dubious b3 square. Therefore White improves his queen's position, as it does not need to protect the e4 pawn anymore and frees the c2 square for his knight. c5 would be a huge mistake now, because after Nc2, Bg5 (or Bf4) and Ne3 the hole on d5 starts to tell.

12...♘b6 This is clearly a sign that things are going into a bad direction. The knight stands badly on b6, something like Ne5 was more natural, although White is better there as well. The only point I see is that Black has temporarily parried the Nd5 idea by taking it twice and the e3 is hanging. But White has many different ways to improve his position.

13.♘c2 Protecting the e3 bishop opens the possibility for the Nd5 move again. White does not need to hurry with anything concrete though, since Black is lacking any active plans due to his space disadvantage.

13...♙e6 14.b3 Covering everything. White intends to play Rae1 and then decide with which tempting plan to continue, Nd5, or Bd4, or Bh6 and Bh8 some f4-f5 attacking ideas. All are looking nice, but first Black needs to do something and White can react according to the situation..

14...♘fd7 15.♜ae1 f5 Obviously Black does not want to sit

and wait until he gets beaten, but White is perfectly prepared for the opening of the position.

16. ♖d4 It is very logical to trade the King's Indian bishop, especially now that position is about to open and the black king might get more vulnerable.

16...c5 This move again only helps White, because the d6 pawn becomes much weaker, while it is hard to find a benefit for Black. It is difficult to suggest something for Black, White was clearly better anyway. [Maybe something like 16...♞c5 17. ♖xg7 ♜xg7 18.exf5 ♖xf5 19.♞e3 also with a perfect position. The knight on b6 is completely out of the game and it is hard to imagine that it will be improved.; 16...fxe4 17.♞xe4 just brings the white knight to the game.]

17. ♖xg7 ♜xg7 18.exf5 ♖xf5

19. ♖d3! Simple and strong. White trades the good pieces of his opponent and leaves him with his bad knights. The d6 pawn becomes a real target.

19...♞h8 [Again, it is not easy to suggest something clever. Maybe 19...♖xd3 20.♜xd3 ♞e5 21.♜xd6 (White can also keep all his advantages with 21.♜d2±) 21...♞exc4 22.bxc4 ♜xc3 23.♜xb6 ♜xc2 24.♜xc5± with an extra pawn, but in the heavy piece endgames, the weaker side always has some chances.]

20. ♖e4 [20.♖xf5!? 20...gxf5 21.♞e2 the d6 pawn is hanging and Nf4 is coming next, also with a big, perhaps already decisive advantage.]

20...♞e5 [20...♖xe4 21.♞xe4+-; On 20...♜ab8 White should probably once again play 21.♖xf5 gxf5 22.♞e2 and like in the 20th move, the rook is not better at all on b8.]

21. ♖xf5 [White could have accepted the sacrifice with 21.♜xd6 but he was probably afraid of 21...♞exc4 22.bxc4 ♞xc4 and the c3 knight is hanging, but White wins after a small tactical trick: 23.♜xc5! (23.♜d3 23...♞b2 24.♜e3 ♞c4 Black would try to force a repetition here.) 23...♜xc3 24.♜e3!+- wins the c4 knight. Probably both players missed this move.]

21...gxf5 22.♞e3 Human chess. Black has more and more problems with his position and he is unable to create any active counterplay.

22...f4 [22...♜f6 23.f4 23.Ne2 is also strong. 23...♞c6 24.♞e2 This time the knight is heading to g3 to win the f5 pawn. 24...♜ad8 25.♞g3 ♞d4 26.♞c2! After getting rid of the last active piece, Black ends up in a positionally lost position with his f5, d6 weaknesses and the useless knight on b6.]

23. ♞f5! Eljanov calculates precisely and wins material.

23...♔g6 24.♘xd6! ♘xf3+!? A nice counterblow, but it does not help. [An important line was 24...♚ad8 25.♚xe5! ♚xe5 26.♘f7+! ♔xf7 27.♔xd8+-- and the b6 knight also falls.]

25.♚xf3 ♚xe1+ 26.♔xe1 ♔xd6 27.♘e2 ♚f8 [27...♚e8 28.♔c3+--]

28.♔c3+ ♔g8 29.♚xf4! White's efforts finally bring their fruits and one of the weaknesses falls. The knight is still out of the game on b6, therefore the rest should just be a matter of technique.

29...♔d1+ [29...♚xf4 30.♔g3+ ♔f7 31.♔xf4+ ♔xf4 32.♘xf4] The endgame is also lost, but perhaps it was still a better practical chance, because the queens on board only helped White to create additional ideas. Whereas here, Black might still hope for some simplification with Nd7 and b5.]

30.♔f2 ♚xf4+ 31.♘xf4 ♔b1 32.♔d2+— The black king is weak and the permanent problem on b6 is still existing.

32...♔f7 33.♔f3 ♔e7 34.♔e3+ ♔d6 35.♔e6+ ♔c7 36.♔e5+ ♔c6 37.♔e4+ The human way to convert the advantage into a full point. There is nothing to calculate after the queens are gone and the material advantage plus the better king and knight decide the game.

37...♔xe4+ 38.♔xe4 ♘d7 39.g4 b5 40.♘d3 With the idea to have Ne5 after Nb6.

40...♔d6 41.♔f5 Keeping the king away from the kingside pawns. If Black drives his king to f7-g7 to stop the pawns, White switches direction at some point and collects the queenside with his king and knight.

41...bxc4 42.bxc4 ♘b6 43.♘e5 ♘a4 44.h4 ♘c3 45.a3 ♘e2 46.♔f6 a5 47.g5 ♘c3 48.♘d3 and Kg7 next. Black resigned the hopeless fight. It looks like the exd4 systems in the King's

Indian are facing some problems now, so maybe Black should rather opt for the closed systems. **1-0**

(3) Muzychuk Anna (2561)
- Gunina Valentina (2507) [B15]

WWBC 2014(14.1),
2014.04.27

GM Arkadij Naiditsch
Best rating: 2737

We will see a nice attacking game from the tournament winner. We should not be too harsh about the opening or the future mistakes, as it is just a blitz game. But it is impressive to see with what great dedication Anna Muzychuk is mating her opponent's king.

1.e4 c6 2.d4 d5 3.♘c3 3.Nc3 is not as popular as 3.e5 nowadays, but on the other hand, for example Anand still likes to play it a lot.

3...e6?! Of course such a move cannot be a good one. Black is closing the bishop on c8, which should lead to a slightly better position for White.

4.♘f3 A good decision. [Maybe Black was hoping for 4.e5?! 4...c5! and in such structures the knight on c3 is clearly misplaced.]

4...♘f6 Gunina continues provoking the e5 push.

5.♗g5 [Personally I prefer 5.♗d3 with the simple idea of castling next. It is hard to say what could be Black's idea here... 5...♗b4 Maybe this?! 6.e5 ♘e4 But now White can just play 7.♗xe4! dxe4 8.♘g5 with a big advantage.]

5...♗e7 [Maybe from a practical point of view it would be interesting for Black to try 5...♖b6 with a double attack on e4 and b2. 6.♗d3 seems to be the right way to go on for White anyway. (After 6.e5 6...♖xb2! things are already very unclear.) 6...♖xb2 7.♗d2 And of course White should have enough compensation.]

6.♗xf6 [Here 6.♗d3 also looks very logical to me.]

6...♗xf6 7.♖d2 White is going for a quick 0-0-0, but Black has the bishop pair and a very solid center. The position is not that clear at all.

7...♘d7 8.O-O-O ♖a5?! Clearly not the best, as now Black is losing the option of playing b5 next. [8...b5! looks much stronger, with the simple idea of playing Nb6 or b4 next. 9.exd5

9...cxd5! White is winning the b5 pawn but Black is going to have excellent play for it on the queenside.]

9.♖b1! A strong move. White wants to play Nxd5 next.

9...b6 Gunina is too optimistic about her position. [Objectively the best option would probably be 9...dxe4 10.♘xe4 ♔xd2 11.♘xf6+ ♘xf6 12.♖xd2 with a slightly better endgame for White.]

10.♔f4! A very strong move. White is launching direct play on the black king's position and what is also very important is that the black queen on a5 is totally out of the game.

10...♙a6 It is hard to blame Gunina for such a logical move, especially in a blitz game, but probably after this move the game is almost over. [10...b5 was still the best move.]

11.♙xa6 The beginning of the end...

11...♔xa6 12.exd5 Things are pretty forced now.

12...cxd5

13.♘xd5! This is what White was playing for. Black was not in time to castle and is getting mated now!

13...exd5 14.♖he1+ ♔d8 It seems like the king's position on d8 is more or less solid, but here comes the second punch:

15.♘e5! Amazing play by Muzychuk, especially since she needed to have seen 15.Ne5 before playing 13.Nxd5, which is quite difficult in a blitz game.

15...♖f8 [After 15...♙xe5 16.dxe5 White should also be winning, as the threats of playing Rxd5 or Qxf5 and e6 are deadly.]

16.♘c6+ The only move, but White's position is just winning now!

16...♔c8 17.♔d6 It is great to see how well knight and queen are cooperating in the attack!

17...♔b7 Maybe Black was still hoping to be OK because of Qc7 next.

18.♖d3! Another very strong maneuver. White wants to play Rc3 next, and Black is hopeless against it!

18...♖d8 [After 18...♔c7 White has the simple 19.♔xd5 followed by Rc3. Black's position is completely hopeless...]

19.♖c3 Followed by Ne7.

19...♙xd4 It is nice to see Gunina has a good sense of humor, as she gives White the chance to end the game with Nxa7 or Ne7 mate.

20. ♖e7# A very beautiful picture and a great attacking game by the current Women's World Champion in blitz chess! **1-0**

**(4) Carlsen, Magnus(2881)
- Caruana, Fabiano(2783) [A49]**

Vugar Gashimov Mem 2014(10.2),
2014.04.30

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the Gashimov Memorial. Both Carlsen and Caruana had 5/8 at this moment, so this was the game for the first place. After a not very ambitious opening, White managed to complicate the game anyhow. First it looked like Magnus should be on the right road to the tournament win, but I think that in the middle game Caruana had good chances to be perfectly fine. After the mistake 20...f5? and the great 28.e3! and 29.Rd3! Magnus left no more chances for survival to his opponent though.

1.d4 Carlsen also plays 1. e4 but somehow I have the feeling that when he is trying to win a game he is more likely to pick 1.d4.

1... ♖f6 2. ♖f3 With this move order, White is maybe trying to avoid the main lines of the Gruenfeld, which is the main opening of Caruana.

2...g6 3.g3 ♗g7 4. ♗g2 c5 Black has a wide range of options here and the move order is very important.

5.c3 This move is of course not the main one and Carlsen was probably trying to avoid the main theory. [5.c4 5...cxd4 6. ♖xd4 would lead us to one of the very popular lines.]

5...d5 Maybe not the most exact way to continue for Black. [I am wondering why Caruana did not go for 5...cxd4 6.cxd4 d5 7.O-O O-O 8. ♖e5 e6 as this symmetrical line is considered very harmless for Black.]

6.dxc5! Why not take a pawn if you can! Now the game is getting very complicated. White is going to be a pawn up, but Black will dominate the center.

6...O-O 7.O-O Before the action, both players secure their kings' positions.

7...a5 Good and typical play. Of course White's main idea could be to play b4 to secure the c5 pawn and also to develop strong play on the queenside. Now White needs to look for a plan to hold the c5 pawn and to develop his bishop on c1 and knight on b1.

8.♙e3 White found a nice plan with Be3-Qc1. This is not only giving White the possibility of playing Bh6 at some moment, but also to bring the rook into the game with Rd1.

8...♘c6 After this move White will definitely not have any trouble to keep the c5 pawn alive. [An interesting try could have been 8...♘g4!? 9.♙d4 (After 9.♙d2 9...♘a6 Black is perfectly fine.) 9...e5 Now the game is getting forced. 10.h3 exd4 11.hxg4 dxc3 12.♘xc3 ♙xg4 White is a pawn up, but the bishop pair should give Black very good chances to hold. 13.♙xd5 ♙xd5 14.♘xd5 ♘a6 I think that maybe White is minimally better, but objectively the game should end in a draw.]

9.♘a3 Black's main idea could be to play e5 and in that case White is going to bring his knight over b5 to d6.

9...a4 Maybe Caruana was slightly worried about White's Qa4-Qh4 maneuver.

10.♙c1 Here we see the main idea of White's 8.Be3.

10...e5 11.♙d1 ♙e7 The position is still very complicated, but White's chances are probably already better.

12.♘b5 Of course the white knight is going to d6.

12...♙e6 Black tries to be solid.

13.♘g5! A strong move. With this tactical idea, White is gaining a tempo.

13...♙g4 14.♘d6 The point is that Black cannot take the pawn on e2.

14...h6 [14...♙xe2? doesn't work because of 15.♙xd5! ♘xd5 16.♙xd5 and White is winning because of the pressure on the f7 pawn.]

15.♘f3 ♙h7 The position is still very complicated. White slowly needs to try and get some play on the queenside as Black is just too solid in the center.

16.h3 It is hard to say if this move was really needed. Maybe it was more simple to play 16.Qd2-Qe1, securing things even more on the kingside.

16...♙e6

17.b4?! A very logical move, but I think it is too early as now Black is getting excellent chances to get back into the game. [17.♘e1 with the idea of playing Nc2 and maybe Nb4 could have stabilized White's advantage.]

17...axb3 Now the position is getting very dynamic.

18.axb3 ♖xa1 19.♚xa1 ♘e4! An excellent move! Black is making his dream idea to play the f5 move come true!

20.♘d2 White didn't have a better move. [Of course Black is just doing great after 20.♘xe4? 20...dxe4 21.♘d2 f5]

20...f5? Caruana is missing an excellent chance.

[After 20...♘xd6 21.cxd6 ♚d7 Black's position is looking solid, but maybe White could still be slightly better.; But after 20...d4! White could already be the one who's in trouble! 21.♘2xe4 dxe3 22.fxe3 White is 2 pawns up, but Black's play is very direct and dangerous. 22...f5 23.♘d2 ♚g5 24.♘f1 e4 and I think Black has full compensation for the lost material. The control over the dark squares, an attack on the kingside as well as the "dead" white bishop on g2 give Black excellent chances.]

21.♘2xe4 dxe4 White exchanged on e4 and managed to keep the monster knight on d6.

22.♚b1! I think this is a great move. White is not only preparing to push b4-b5 but also playing against the f4 move by putting extra pressure on e4.

22...f4 Black has nothing else left, Caruana needs to try his chances in the attack.

23.♙d2! Another good defensive move by White, the bishop is going to be a great protector on e1.

23...e3 24.♙e1 ♙f5?! After this move Black's chances to survive are becoming very small. [Maybe the best move was 24...exf2+ 25.♙xf2 fxg3 26.♙xg3 ♚g5 27.♙h2 and now the tricky 27...e4 trying to open the position as much as possible. Of course White is better here, but Black would still keep practical chances.]

25.♚c1 [I think that after 25.♘xf5 25...gxf5 (25...♖xf5 26.g4 gives White a huge edge.) 26.g4! White's position is looking close to winning.]

25...h5 Caruana wants to activate the bishop from g7 over the h6 square, but he is just not in time.

26.fxe3! A strong move. White has a very nice positional idea in mind...

26...fxg3 27.♗xg3 ♔g5 This is what Caruana was playing for, but White has an ace in his pocket...

28.e4! This is exactly the move that refutes Black's 25...h5.

28...♔xg3 29.♖d3! Another excellent move. White stops Black from getting any kind of play on the kingside.

29...♔h4 30.exf5 gxf5 After some exchanges, White is still a healthy pawn up.

31.e4 I guess this move ends all of Black's hopes. The bishop on g7 is dead now and the black king is maybe even weaker than the white one. All White needs to do is to play b4-b5 and create a passed pawn.

31...fxe4 31...f4 is not any better.

32.♗xe4+ ♔h8

33.♔e3 Good and solid.

33...♖f4 34.♗g2 Everything is protected and White can start thinking about the b4-b5 push.

34...♔e7 35.♔e2 The pawn on h5 is under attack.

35...♔h4 36.b4 And the white pawns start to roll. White's position is totally winning.

36...e4 A practical decision. In a lost position Caruana at least tries to activate his pieces to have some theoretical chances for some tricks.

37.♗xe4 ♗e5 38.♖d5 Once again everything is protected and the white pieces are controlling the board.

38...♗g8 This move already clearly shows that the game is over.

39.b5 ♖f5 40.c6 bxc6 41.bxc6 So move 40 has been reached and White is 2 pawns up, the black king could find himself under some serious attack soon and another big problem is the c6 pawn, which just seems to be unstoppable.

41...♔e7 42.♗d6 White is bringing his knight to b5 to end what he started, to queen the c-pawn.

42...♖g5

43.♘b5 And the c7 move already cannot be stopped.

43...♔e6 44.♖d8+ ♔h7 45.♔e4+ Another accurate move.

45...♖g6 46.c7 ♔a6 47.c8=♔ ♔a1+ 48.♔f2 ♔b2+ 49.♔e1
White is a full queen up and after 49...Qa1 White has the simple
50.Rd1. We saw a very interesting and fighting game with
a lot of different ideas. With this victory, Carlsen grabbed
another 1st place in one of the world's strongest tournaments.
Congratulations! **1-0**

- Eljanov, Pavel(2732)

Gashimov memorial B,
2014.04.24

GM Csaba Balogh
Best rating: 2672

Despite the limited material, Black is able to realize his advantage and Eljanov does it with perfect technique!

65...d5+! This is the only way! We will see that is is very important to drive the white king as far away as possible from the h-pawn. [65...d5 leads to a draw after 66.f4 f5 (66...d5+ can now be met by 67.dxd5 and Black cannot avoid losing his h-pawn.) 67.d5 f5 68.fxf5 holds.]

66.f5 d5 67.fxe5+ White should sacrifice his knight for the pawn, therefore he must try to work with his pieces in harmony. [67.fxe7 quickly loses to 67...f5 and Black inevitably advances his h-pawn, because 68.f5 runs into 68...f4+ 69.fxf4 fxf4--]

67...f4! It is very important the keep the white king away from the pawn. [67...f3 would have been a big mistake because of 68.f4 f5 69.f5 and Black cannot make progress.]

68.f5 [Another try is 68.f3 but Black wins after 68...f3 69.f4 f5! controlling all the important squares and the pawn is ready to be advanced. 70.f5 h4 71.f3 h3-- White finds himself in zugzwang! His king cannot move, while all the knight moves allow h2.]

68...f3! Again the only way to win! Black sends the centralized knight away from e5. [68...f2 makes no sense because after 69.f6 the h-pawn cannot be pushed in view of Ng6.]

69.f6 [69.f3+ 69...f3-- and the knight gets too far from the pawn. h4 is coming next.]

69...♔g5

70.♔f7 This is the best defensive attempt. When the pawn reaches the 3rd rank, it basically automatically promotes due to different kinds of zugzwang. White must try to keep his knight on g6, but with nice maneuvering Eljanov succeeded to make progress.

70...♖d4! 71.♔g7 ♖e6+ 72.♔f7 [The point is that 72.♔h7 is refuted by 72...♖f8+! 73.♖xf8 h4 74.♖e6+ ♔g4—+ and the pawn cannot be stopped.]

72...♖f4 The human way to deflect the knight from g6. [Actually 72...♖f8!? was winning here too. 73.♖e5 (73.♖xf8 73...h4 74.♖e6+ ♔g4—+ is over again.) 73...♔f4! 74.♖d3+ ♔g3!—+ and again the pawn promotes automatically.]

73.♖e5 ♔f5! The pawn could not be pushed at once.

74.♖f3 ♔g4 75.♖e5+ ♔g3! Very well played and Black is now finally ready to push his pawn.

76.♔f6 h4 77.♔g5 h3 78.♖g4 The difficult part of the job is already done. The rest is easy. All the plans are winning for Black....

78...♖e6+ [78...♖d3 79.♔f5 ♖f2 is also good with the same technique as the pawn has reached the 3rd rank. 80.♖e3 ♔f3 81.♖f1 ♔g2 82.♖e3+ ♔g1—+]

79.♔h5 ♖f4+ Eljanov was in time pressure, therefore he makes some extra time with the 30 secs bonus increment per move. This is the right technique in general.

80.♔g5 ♖g6 81.♖e3 [81.♔h5 81...♖e5—+; 81.♔f5 81...♖e5! —+ is elegant! 82.♖e3 ♔f2 83.♔f4 h2—+]

81...♔f2 82.♖g4+ ♔f3 Black decides to win by triangulation. Other moves were also good enough. The end is near.

83.♖h2+ [83.♔h5 83...♔g3 84.♔g5 ♖e5 85.♖e3 ♔f2 86.♔h4 h2—+]

83...♔g2 84.♖g4 ♖e5 85.♖e3+ ♔f2 White resigned. It is a bit surprising to me, but White could not improve his defence, he was lost after 65...d5! **0-1**

(16) Bacrot, Etienne(2722)
- Eljanov, Pavel(2732)

Vugar Gashimov Mem B 2014(7.3),
2014.04.27

GM Arkadij Naiditsch
Best rating: 2737

After a really passive and not too good game, Etienne has reached a very difficult endgame. Maybe at the first sight White's position is looking pretty "holdable" but in fact he is facing huge problems. As we know, a bishop is much stronger than a knight in a fight on both sides of the board. The black king is also placed very nicely on e5 and can reach both the queenside and the kingside pawns. Another idea for black could be to exchange his g-pawn against White's h-pawn to get a passed pawn on the h-file. All this makes it difficult for White to lead this endgame into a draw.

41...♔e5 42.♖c2 White is trying to cover the squares in the middle of the board to not let the black king pass the 4th rank.

42...♗c7 A tricky waiting move. [It is of course too early for 42...♔d5 43.♖e3+! as after 43...♔d4 White has 44.♖f5+!]

43.♗e3 White needs to keep the opposition.

43...♔d5 44.♔d3 And here comes another waiting move by

Black:

44...♗d8! Another very unpleasant waiting move by Eljanov who is checking what White will do next. White also needs to be very careful about Black's g4 push at some good moment, with the idea of hxg4 h4!

45.f3 A very human move, but now Black's idea of playing Ke5-Kf4 is becoming very real. [45.♖e3+ didn't help much. 45...♔e5 and Black's next move could be Kf4.; And after 45.♖d4 45...♗f6 46.♖c2 ♔e5 47.♗e3 ♗e7 White is getting in some sort of zugzwang. Depending on White's move, the black king could try to cross the 5th rank and the white knight on c2 is now totally fixed on protecting the b4 pawn.]

45...♗e7 [45...♔e5 is premature now since after 46.♖d4 Black can't play 46...♔f4?? because of 47.♖e6+ followed by Nxd8.]

46.♖e3+ White needs to do something as no more waiting moves are possible in this position.

46...♔e5 47.♖c4+ Bacrot tries to rescue the game with some forced play. [Black would probably have had to work much harder after 47.♔c4 47...♗d8 48.♖g2 and of course White's position is on the verge of being lost, but it is not that easy to see how Black should break through.]

47...♔f4 Now things are pretty forced.

48.♖xb6 ♕xf3 49.♘d5

49...♕d6 Pawns are equal, but we can see how much stronger the black bishop is than the white knight. Black has two major ideas here, to play g4 hxg4 and h4 or just to play Kg3-Kxh3. [49...g4! was leading to a much quicker win. 50.hxg4 h4 51.♖xe7 h3 White can't stop the h-pawn. I guess Eljanov saw this line, but decided that the move in the game would also lead to a winning position and why risk miscalculating something...]

50.♖f6 White is going for the h-pawn.

50...♕xb4 51.♖xh5 ♕g2 Things are still pretty forced. It is bad luck for White that the a1 square is black, otherwise he could give away the knight for the g5 pawn...

52.♕e4 ♕xh3 53.♕f5 White is only missing one tempo to play Nf6 next and create a fortress on the g4 square.

53...♕e7! The only winning move in the position! [After 53...g4?? 54.♖f4+ ♕g3 55.♘d5 ♕f3 the position seems to be winning, but it is a draw. 56.♖xb4 g3 57.♖d3! The white knight is just in time to stop the g-pawn from promoting. 57...g2 58.♖e1+]]

54.♕e6 White's position is lost as Black is threatening to

simply play g4-g3-g2.

54...♕d8 55.♕d7 ♕a5

56.♖f6 White is hoping for a trick...

56...♕e1 But there is no fooling Eljanov! [After 56...g4?? 57.♖xg4! ♕xg4 58.♕c6 ♕c3 59.a5! followed by Kb7 and Kxa6, the game is a draw.]

57.♕c8 The last chance. White wants to play a5 next.

57...a5! The game is over. What a great technique by Eljanov and a very important win for the tournament situation. **0-1**

Clash of the Titans

(17) Morphy, Paul
- Harrwitz, Daniel[C41]

Paris m1(6), 1858

GM Kamil Miton
Best rating: 2655

1.e4 e5 2.♘f3 d6 3.d4 exd4 4.♙xd4 White usually plays [4.♘xd4 4...♘f6 5.♘c3 ♗e7 and here White has different ways to develop his pieces, but thanks to his space advantage he should have a stable advantage.]

4...♘f6 [4...♘c6 5.♗b5 ♗d7 6.♗xc6 ♗xc6 7.♗g5 ♙d7 8.♘c3 followed by 0-0-0 and Rhe1. White has a strong initiative.]

5.e5 dxe5 Black could keep the queens on the board after [5...♙e7 6.♗e3 dxe5 7.♘xe5 but also in this case is not easy to solve the practical problems, for example after 7...♘bd7 8.♘xd7 ♗xd7 9.♘c3 ♙b4 10.♙e5+]

6.♙xd8+ ♙xd8 7.♘xe5 The white advantage is that the black king is stuck in the center.

7...♗e6?! Black could have solved the problems by playing

[7...♗b4+! 8.c3 ♙e8 A typical move! Black develops his pieces with tempo and gets counterplay. 9.cxb4 ♙xe5+ 10.♗e2 ♘c6 With Nxb4 or Nd4 threats. Now the white king is not better than the black one.]

8.♘c3 ♗d6 9.♘c4 ♗xc4 This exchange gives White a stable advantage. Black could have tried to save the bishop pair: [9...♗b4 10.♗d2 ♘bd7 11.O-O-O ♗c5 (11...c6 12.a3 ♗e7 13.♗f4) 12.♗e3 ♗xe3+ 13.♘xe3 It seems like after this exchange Black can finally improve his king by playing 13...c6 but after 14.♗c4 ♗xc4 15.♘xc4 ♙c7 16.♘d6 ♙hf8 17.♙he1 White managed to keep the initiative. It is hard to stop Re7 now.]

10.♗xc4+= ♙e8+ 11.♗e3

11...♙e7 Black is looking for a safe place for the king. Let's check what could have happen after the natural [11...♘g4 12.O-O-O ♘xe3 13.fxe3 f6 (13...♙xe3 14.♗xf7) 14.♘b5! White needs to play very actively, otherwise Black can even get a better position because of the structure. 14...♙e7 15.♗d3 (15.♘xd6 15...cxd6 and in this case the white bishop should not bring White any advantage, as the black knight is going to e5 and Black's position is very solid.) 15...h6 Now the light squares become weaker. (15...g6 16.h4! With the idea to activate the rook.) 16.♗g6! and after a rook move White can use a few ideas like Be4 or Nd4-Nf5.]

12.0-0-0 a6 Preventing Nb5, but Black's play is very slow.

13.♘g5 [13.♗d5+ 13...♗xd5 14.♘xd5 ♗c6 (14...c6 15.♘xf7) 15.♘xc6 bxc6 16.♖d4 With the idea to put pressure on the weak pawns over the 4th rank. This endgame is very unpleasant for Black.]

13...♗d7 14.♗e4 h6 [14...♘e5 15.f4 ♘xf4+ 16.♘xf4 ♗xe4 17.♖he1 f5 18.♘d5 White wins the pawn back and will keep a stable plus thanks to the two bishops.]

15.♘xf6+ [15.♗xd6 15...cxd6 16.♖he1+ ♔f8 17.♖xe8+ ♗xe8 18.♘f4 maybe gives White an even bigger advantage than in the game.]

15...♗xf6 16.♗xd6 cxd6 White has the advantage because of two reasons. First of all bishops usually cooperate with rooks better than knights and secondly the black structure is worse.

17.♖he1+ ♔f8 18.♖xe8+ ♗xe8 White exchanges one pair of rooks to avoid counterplay.

19.♘d5 ♖b8 20.♘f3 The bishop is better placed on this diagonal.

20...g6 21.c3 Preparing to improve the king.

21...♔e7 22.♖e1+ ♔f8 White won a tempo because after [22...♗d7 he had 23.♘d5! and Black is forced to move the

f-pawn, after which Black's position on the kingside will be very weak.]

23.♔c2 ♗c7 24.♔b3! The king is one of the most important pieces in the endgame.

24...♗e6?! The idea of this move is to close the e-file to allow the black king to come support the queenside, but the knight was very well placed on c7 to stop the white invasion! [For example 24...d5 25.a4 (25.♔b4 25...b6) 25...a5]

25.♔a4 b6 26.b4 h5 27.h4 ♔e7

28.♖e3! A good move. From the 3rd rank the white rook can protect the c3 pawn and pressure the f7 pawn at the same time.

28...♔d7 29.♘d5 ♖e8 30.♔b3 ♖g8 Black has to wait.

31.♖f3 ♔e7 32.a4 White is slowly going to create a second weakness.

32...a5?! I don't like this move because now the white king has an open way to come for the b6 pawn. Black was probably afraid of a5 with the idea of fixing the weak pawn on a6.

33.♘xe6 A concrete idea. White decides to give the bishop to come to b5 with the king. [33.♔c4 33...axb4 34.cxb4 ♖c8+! and Kb5 is not possible because of Nd4.]

33...♔xe6 Black could probably have saved the game after [33...fxe6 34.♔c4 ♖c8+ 35.♔b5 d5! This defensive idea was very difficult to find. 36.♔xb6 (36.bxa5 36...bxa5 37.♔xa5 ♔d6= And the black pieces are very active.) 36...axb4 37.cxb4

37...♖b8+ The frontal attack is one of the very important defensive methods in rook endgames. 38.♔a5 ♖a8+ 39.♔b5 ♖b8+ 40.♔c6 It looks like the a-pawn should decide the game, but after 40...♖xb4 41.♖a3 ♖c4+ 42.♔b5 ♔d6 43.a5 ♖c2 44.a6 ♖b2+ The white king is unexpectedly disturbing his own pawn. 45.♔a5 ♔c7 Black is on time!]

34.♔c4 g5 With hope for counterplay.

35.♔b5 axb4 36.cxb4 gxh4 37.♔xb6 ♖b8+ 38.♔a5 ♔d5?! This move is too slow! Black should have used the frontal attack all the time, just like in the previous comment. [38...♖a8+ 39.♔b5 ♖b8+ 40.♔c6 ♖xb4 41.a5 (41.♖e3+ 41...♔f5 42.♖a3 ♖b2 43.a5 ♖xf2 44.a6 ♖xg2 45.a7 ♖g8 46.a8=♖ ♖xa8 47.♖xa8 h3 Only Black can win the game here.) 41...♖a4

42.♔b5! ♖a2 43.a6± With the typical and very unpleasant idea Rf4-Ra4!]

39.♖d3++— Now White is easily winning.

39...♔c4 40.♖xd6 ♖xb4 [40...♖a8+ 41.♖a6+—]

41.♖d4+ ♔xd4 42.♔xb4 f5 43.f4 ♔e3 44.a5 ♔f2 45.a6 ♔xg2 46.a7 h3 47.a8=♖+ ♔g1 48.♖f3 Unfortunately for Black he still has the h5 pawn. After 48...h2 49. Qg3 Kh1 and 50.Qf2, mate will follow in the next move. **1-0**

Editorial Preface

A lot of tournament have begun, while some other have finished. Let us take a look at the main events:

Navara won the Czech National Championship with the great score of 8/9.

In the "4 Nations Chess League" the team of Guildford became the clear champion after winning all their matches.

The already traditional and very strong Open in Nakhchivan is on the way with a lot of GMs between 2600-2700.

From this week on we are able to follow two new great events:

The Capablanca Memorial in Cuba with Ivanchuk, Dominguez, Bruzon, Vallejo, Almasi and Wesley So and the US-Championship, without Nakamura but with Gata Kamsky!

We hope you will enjoy this week's games!

Arkadij Naiditsch & Csaba Balogh

A nice example on the theme how to launch an effective attack in case of same side castling.

1.♘f3 ♘f6 2.c4 g6 3.b4 Vachier-Lagrave is known for his extremely deep knowledge of the Gruenfeld defence. White would like to avoid the long theoretical lines and decides to handle the position in an original manner.

3...♗g7 4.♗b2 O-O 5.g3 White fianchettoes both of his bishops. He delays the decision whether to play in the center or on the queenside.

5...c6! Creating the positional threat of playing a5. The move has prevented the principled reply of b5, while in case of a3, Black might quickly attack the b4 pawn with Na6 and Qb6. Additionally the pawn is going to be well placed on c6 because it limits the power of the g2 bishop.

6.♘a3! I like this answer a lot. White prepares to strengthen his b4 pawn with Nc2 and the direct a5 could be met by b5!, followed by recapturing with the knight.

6...♖b6 Vachier is a tactical player and he looks for tactical motifs right in the opening. The d6-e5 plan from the game was also possible.

7.♘c2 d6 The c6-d6- e5 is the most logical way to occupy the center, because it locks both white bishops. [A principled follow-up of Qb6 could have been 7...♘e4!? The double attack on f2 and b2 forces White to take a committing decision. 8.c5 (8.d4 creates a nice outpost for the knight on d4, as it cannot be kicked out with d3 anymore. 8...d5) 8...♖d8 9.♗xg7 ♔xg7 and the c5 pawn allows Black the undermining ideas of b6 and d6. Black has solved the opening problems.]

8.♖b1! Protecting the b2 bishop. [On the natural 8.♗g2 Black had interesting options, like 8...♘e4 as c5 is not an option for White anymore and on 9.d4 a5 10.a3 ♗e6 with a quick attack on the queenside pawns, with the idea to create holes on the light squares. 11.c5 ♖b5 Black has the initiative.]

8...e5 9.♗g2 [If White was better developed, he could have achieved favourable exchanges on the pawn structure by playing 9.c5 9...dxc5 10.bxc5 ♖a5! (10...♖xc5 immediately does not work because of 11.♗a3!) 11.♗xe5 ♖xc5

White has traded his sidepawn for a central one, which would be excellent, but there are some concrete problems with which it is not easy to deal. Black is again threatening to play Ng4 or Bf5.]

9...e4 Vachier wants to grab the initiative, but he opens the a1-h8 diagonal. I am not sure if it was the best idea. [Simply developing with 9...♖e8 10.O-O a5 11.a3 ♘g4 was comfortable for Black.]

10.♘fd4 a5 11.a3 [Because of the fact that White could take back with the knight on b5, he should have played 11.b5! with the idea to open the queenside and after 11...c5 12.♘b3 a4 temporarily pushes back the pieces, but Black seriously weakens his d5 square 13.♘ba1! Ne3 and Nac2 are coming next, both knights are heading to d5. Sooner or later White will also undermine the e4 pawn with d3 and he achieves an edge.]

11...axb4 12.axb4 ♘bd7 Logical development of the pieces. The knight is heading to e5, which was the whole point of the e4 push.

13.O-O ♖e8 14.♙c3 [14.♖a1!? made sense. The b2 bishop does not need to be protected anymore, therefore White might fight for the opened file. If Black trades the rooks, the queen will be excellently placed on a1, strengthening the pressure on the long diagonal.]

14...♘e5 15.♘e3 This is the moment, when Black decides to launch an attack against the king.

15...h5 The position is closed and the center is locked, therefore such an action is completely justified. Black would like to annoy his opponent with h4. If White prevents it by playing h4 himself, he would give an excellent outpost on g4 for the black minor pieces.

16.♖a1 ♖xa1 17.♙xa1 h4 Consequently following the plan.

18.b5 [If White was afraid, he could have exchanged the queen with 18.♙a5 but at the moment it was not obvious what Black wants on the kingside, therefore White decided to make progress on the queenside, where he is better.]

18...hxg3 19.hxg3 ♘eg4 The plan is clear. Black would like to mate on h2 and he only needs two moves to drive his queen there with Qc5-h5.

20.♘dc2 The most logical move. White opens the long diagonal and prepares to take on g4 and put his other knight to e3. The Qc5 move seemingly loses a piece, however Vachier-Lagrave finds a brilliant idea to make it work. [20.♘b3! should have been played, preventing the Qc5 idea and opening the long diagonal.]

20...♔c5!! Black had to foresee the entire line which happened in the game. It required extremely good calculation.

21.♖xg4 ♜xg4 22.♙xg7 [22.♞e3 prevents the mate, but drops a pawn after 22...♙xc3 23.♔xc3 cxb5=+]]

22...♔h5 23.♖b1 White thought that there is only one check on h2 and he ends up with an extra piece. But Black had seen things much further.

23...♔h2+ 24.♙f1

24...♞e5!! With this calm retreat Black has prepared the decisive threat of Bh3 with the idea of Qh1 mate! There is no adequate defence against it.

25.g4!? A very nice defensive attempt along the 3rd rank, but Vachier finds another beautiful tactical blow! [25.♞e3 is

refuted by 25...♙h3 26.♙e1 ♔g1+ 27.♙f1 ♙xg7—+ and White cannot survive for long with such a pin on the back rank. Black simply wants to leave the pin with Kg8 followed by Ng4, deflecting the defender of the f1 bishop.]

25...♞f3!! What a move! The only way to win! White gets mated in any case. [25...♙xg4? is bad in view of 26.♙xe5! attacking the queen, so Bh3 does not work at once, while after 26...♖xe5 27.♖b3! and Rg3 protects everything!]

26.exf3 Otherwise White would have played Qg1.

26...exf3 27.♙xf3 ♙xg4! The point of Nf3! Mate is now inevitable and White resigned. [27...♙xg4 28.♙xg4 (28.♙g2 28...♙e2+ 29.♙e1 ♔g1+ 30.♙f1 ♙xf1#; 28.♔c3 28...♙h3+ 29.♙g2 ♙xg2#; 28.♞e3 28...♙xf3 29.♙e1 ♔g1#) 28...♔h1# It is amazing that from seemingly nowhere Black suddenly gave mate in a few moves.] **0-1**

**(2) Georgiev, Vladimir(2553)
- Caruana, Fabiano(2783) [A04]**

46th TCh-ITA 2014(7.1),
2014.05.04

GM Csaba Balogh
Best rating: 2672

Right after the Gashimov memorial finished, Caruana and Nakamura traveled to play in the Italian league. In the following game, we will see how easily Caruana outplays his lower rated GM opponent with the black pieces, by avoiding any theoretical discussions as he was afraid of some forced drawish line.

1.♘f3 d6 2.d4 g6 Playing the Pirc defence is usually a sign Black is trying to win. Black aims for an asymmetrical position.

3.e4 ♘g7 4.♘c4 Here the main line is a setup with Nf6, 0-0, Nbd7 and e5, but Caruana decides to develop his pieces in another way.

4...a6 5.O-O Usually the setups with Nf3 against the Pirc are considered to be very solid systems, but on the other hand not the most dangerous ones at all. White only plays for a small edge due to his space advantage.

5...e6 6.♖e1 ♞e7 7.c3 Strengthening the center, followed by transferring the b1 knight to g3 through d2-f1, like in the Spanish opening.

7...O-O 8.♘b3 A useful move to leave from the d5 positional threat to explode the strong center. From this point of view d5 is a mistake because White can play e5, locking the g7 bishop and creating serious holes on the dark squares of Black's camp.

8...♞d7 9.♞bd2 b5 I don't know how this setup is exactly called, but actually it is quite good if we play against weaker players. Black builds a flexible position with Bb7 and c5 and afterwards it is White's turn to find a plan and to decide how to arrange his pieces.

10.a4 White decides to open a front on the queenside. In my opinion it would have been better to continue the journey with the knight to g3 and keep the queenside untouched.

10...♘b7 11.♞e2 ♖b8! Black indirectly protects his b5 pawn as the trade of it to the one on e4 would clearly favour him and he keeps his main goal to undermine the center with c5.

12.axb5 axb5 13.h4 White is confused where to play. Two moves ago he initiated some actions on the queenside, while now he launches an attack on the kingside. [13.♞f1 13...c5 14.♞g3 was still preferable, with the idea to enable the development of the c1 bishop.]

13...c5! Black consequently follows his plan.

14.h5

14...♖c6! Forcing a serious decision. As White cannot protect his d4 pawn with Be3, he is forced to open the diagonal of the g7 bishop and give the nice e5 square for the knights.

15.hxg6 hxg6 It is not clear what White achieved with this h4-h5-hxg6 plan, he rather just wasted some important tempi.

16.d5 exd5 17.♗xd5 c4! Another strong positional move, creating an outpost on d3 for the knight, where it is going to be placed really annoyingly from White's point of view.

18.♞f1 Finally the knight goes to its place, but it is a bit too late.

18...♞ce5! The trade of the light squared bishops was clearly

a must for Black to avoid any kind of dangers around his king. And of course it was principled too to exchange the best piece of the opponent.

19.♗f4 White changes the pawn structure, but it only helps Black. [19.♗xb7 19...♖xb7 20.♗e3 with the idea of Bd4 and Ne3-d5, but it is too slow. Black gets a pleasant edge after 20...♞d3 21.♖ed1 ♖e8 22.♞g3 b4! suddenly all black pieces are excellently placed and they are ready to open the queenside to increase the advantage.; The best chance would have been 19.♖d1 trying to keep a piece on d5 and also leaving from the Nd3 tempo. 19...♞d3 20.♗g5 This tempo was not possible before, when the knight was on e5, because of the intermediate check on f3 and the bishop falls. 20...♖e8 21.♞e3 ♞7c5 and Black is better.]

19...♗xd5! [The trick was that 19...♞d3 is wrong in view of 20.♗xd6 ♞xe1 21.♖xe1 and White is suddenly fine.]

20.♗xe5 A sad necessity. [On 20.exd5 Black can already go for the exchange with 20...♞d3! 21.♗xd6 ♞xe1 22.♖xe1 because he saves his material advantage by playing 22...♖e8!⌘]

20...dxe5! Black needs to preserve his knight to reach the d3 square. It will close the d-file and the d5 pawn becomes separated.

21.exd5 ♞c5 22.♖ed1 [22.♞xe5 loses to 22...♖e8 23.f4 ♞d3! (But not 23...f6? because White can leave the pin with tempo by playing 24.♖f2!)]

22...e4 Black strengthens his outpost on d3 first. [22...♞d3 immediately could have been met by 23.♞e1]

23.♞d4 [White did not want to defend passively with 23.♞e1 23...♖d6 followed by Rfe8 or Ra8 and the knight jumps to d3. White is lacking any counterplay.]

23...♙xd4! Giving up the strong bishop is usually a difficult decision and there must be serious reasons to justify it, but now White is unable to create any threats against the king and he just ends up in a hopeless situation because of the fork on b3.

24.cxd4 [White has no compensation after 24.♖xd4 24...♘b3 25.♖ad1 ♘xd4 26.♖xd4 f5—+]]

24...♘d3 The game is basically over. The d-pawns are getting lost soon and the knight on d3 is dominating the entire board.

25.♘e3 [25.♙xe4 25...♘xb2—+ There will be nothing to stop the c- and b- connected passed pawns.]

25...♙f6! The first pawn falls.

26.b3 ♙xd4 27.bxc4 bxc4 28.♖a4 ♖b2 29.♖d2 [The game ends here. I don't know what happened, maybe White resigned without waiting for the following finish: 29.♖d2 29...♖fb8! 30.♖xc4 And Black now mates with 30...♖xd2! 31.♙xd2 ♖b1+ 32.♙h2 ♙e5+—+ and Qh5 or Rh1 next, mate in few moves. A very convincing victory by Caruana.] **0-1**

(3) Adams, Michael(2752) - Vachier Lagrave, Maxime(2758) [B90]

4NCL 2013-14(11.111),
2014.05.05

GM Arkadij Naiditsch
Best rating: 2737

We are in the decisive match in the English league, between the 2 big favourites, the teams of Wood Green and Guildford, who tried to get their best possible line-up. Adams, who has been playing very well the whole last year and reached an ELO of over 2750, is facing Vachier Lagrave, a young French superstar who seems to win ELO in every event he is playing at the moment and is already the World Nr11! We can be sure to see him soon in the Top 10. Adams tried to keep the game cool, but things quickly became very complicated and Maxime was able to take more correct decisions and reached a better endgame. Afterwards he showed great technical skills and didn't give Adams any chances to escape. This is really an almost perfect game by Black.

1.e4 c5 Maxime is one of few top players who still did not switch to the Berlin, as his Najdorf seems to bring him a lot of points at the moment.

2.♘f3 d6 3.d4 [Actually Adams also likes to play the more calm 3.♙b5+ but it seems like because of the importance of the match the Englishman decided to go for the very main lines.]

3...cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e3 So we are in the main position of the Najdorf, where Black has 3 major choices: 6...e6 or 6... e5 or the move of the game, 6...Ng4.

6...♘g4 I think 6...Ng4 is one of the most dangerous moves

for White and especially lately Black had excellent results in this variation. The game is very quickly becoming unstable and this is exactly what the almost 20 years younger French superstar wants against his much older opponent.

7. ♖g5 h6 8. ♗h4 g5 9. ♗g3 ♖g7 And we are in the main position. White has a lot of options here.

10. ♖d2 One of the main moves. [10. h3 ; 10. ♗e2 are the other 2 main lines with long theoretical analyses.]

10... ♖c6 11. ♖b3 In case we take a general look at the position, we can maybe make up a few global things: White is clearly going to play against Black's h6-g5 by pushing h4 and trying to open the position to be able to get some play against the black king which is on e8. On the other hand, Black has an excellent bishop on g7 and the idea of b5-b4 or Be6-Rc8 is a guarantee for strong play on the queenside. The position is very dynamic.

11... b5 12. h4 Adams improves on his own game. [Against Gelfand Adams continued with 12. f3 12... ♖ge5 13. ♗f2 but after the strong 13... ♖a5! Black might already be the one with better chances.]

12... b4 12... h4g4 t also be possible, but it seems to lead to more or less the same.

13. ♖a4 most safe [13. ♖d5 could also lead to a very interesting position. 13... ♗xb2 14. ♖b1 and White is getting quite strong play for the pawn.]

13... gxf4 Black can't let White take on g5.

14. ♗xf4 A difficult decision as 14. Rxh4 was of course also possible.

14... ♗d7 Black is playing against the white knight on a4 who can now easily be caught.

15. f3 White is giving away the initiative. [15. O-O-O was more principled. 15... ♖ce5 Black has to go into the tactics. 16. ♖xb4 ♖b8! A strong and important move. (After the tempting 16... ♖g6 White has a very nice tactical blow: 17. ♖xd6! the position is complex, but it seems like things are pretty good for White.) 17. ♖a3 and only now 17... ♖g6 with a very unclear position.]

15... ♖ce5! Black is not wasting any time! Now White's pawn structure is going to be heavily damaged.

16. fxg4 ♗xa4 17. O-O-O Of course White's only chance now is the attack on the black king.

17... ♗d7 A logical move, preparing a5-a4 and wanting to take on g4.

18. ♗e2 This move can't be wrong either. White completes

his development and maybe wants to play Nd4-Ng4 or maybe even g5.

18...♘g4 A greedy and maybe somewhat risky move. [18...♚c7 was maybe another option for Black. 19.♚xb4 a5 Black has excellent play.]

19.♚xb4?! This is already a mistake. [In my opinion after a move like 19.♙b1 against Black's h5, followed by Rhf1 and Nd4. White could have gotten quite strong play in the center for the pawn.]

19...a5! Now it is Black who is going to attack and also has a better pawn structure and a monster bishop on g7.

20.♚b7 Where else to go?! [After 20.♚d2 20...♚b6 Black's play on the queenside is just crushing. We should also not forget that Black can still castle kingside to improve the strenght of the attack.]

20...♖b8 [It was easy to go wrong with 20...a4? and after 21.♘c5! with an already winning position for White.]

21.♚a7 ♖a8 22.♚b7 After repeating the moves once, Black finds the right approach to continue the game.

22...♚b8! A very strong move! Of course Black's attack is half as strong without the queens, but the pressure on the b2 pawn is still very unpleasant.

23.♚xb8+ ♖xb8 24.c3 There is no other way to defend against the upcoming a4 move.

24...a4 25.♘d4 ♘e3 Maybe Black could even not hurry with Ne3 and play 25...Rg8 first.

26.♖dg1 ♖g8 We can take a fresh look on the position. Material is equal, but both pawn structures are very strange. Black's big advantage is the open b-file where the rook on b8 is just perfectly placed and the bishop on g7 can also become a very dangerous piece in case Black could do something on the a1-h8 diagonal. The white pieces are a bit passively placed and all this gives Black a clear advantage.

27.♙f2 Adams wants to get rid of the annoying knight on e3.

27...♘g4 28.♙e1 [After 28.♙xg4 28...♙xg4 Black's bishop pair would give him a big advantage.]

28...♙e5! A very good move! Black not only activates the rook on g8, but first brings his bishop to e5 and only after that he wants to play Nf6 and start the play against the e4 and g2 pawns.

29.♙b1 ♘f6 Now we can see how important Be5 was.

30.♙f3 White tries to keep things together.

30...h5 Another good positional move. All black pieces are almost perfectly placed.

31.♙h4 This is probably not the best move, but it is very hard to give clear advice to White what to do instead.

31...♘g4 The black knight is going to c4.

32.a3 [After 32.♙e1 32...♘e3 the threat of playing Nc4 next is very dangerous.]

32...♖e3 33.♙e2 Adams keeps on trying to be as solid as possible.

33...♗xd4! A fantastic move! Black is giving away his great dark squared bishop, but he gains full control over the light squares. Maxime is showing great understanding of the game.

34.cxd4 ♕b5 This is the key move. White cannot avoid the exchange of the bishops.

35.♖h3 A logical decision. Adams tries to get a bad, but opposite coloured endgame in which there is always a chance to escape to a draw. [After 35.♙xb5+? 35...♖xb5 White cannot defend against Rxf2 or Nc4.]

35...♙xe2 36.♖xe3 This endgame might look quite harmless at first, but I think White's position is very bad. The pawn on a4 is blocking both white pawns and the e4-d4 pawns are clearly potential targets for the black pieces.

36...♙a6 37.e5 Maybe not the best move either. [I think White would have better chances to escape after 37.♙e1 White needs to bring the bishop into the game. 37...♖g4 38.♖c1 and of course Black's position is much better, but I think White is keeping some chances to make a draw.]

37...♖g4! A very nice move. Black is forcing White to play g3 and killing his own bishop, which is totally out of play on h4.

38.g3 d5 39.♖d1

39...♔d7! Another very good move. Of course Black is avoiding playing a move like e6. The black king will be perfectly placed on e6 now.

40.♖d2 ♕c4 White is totally paralyzed!

41.b4 What else to do?! Black has an easy plan, to play Ke6, Rbg8-Re4-Rgg4.

41...axb3 42.♖b2 ♔e6 White still doesn't have anything against Black's deadly plan. His position is just hopeless.

43.♖f3 ♖bg8 44.♖ff2 White keeps on waiting.

44...♖e4 But with 2 of the black rooks entering the position, there is simply no hope. Black's attack is also getting stronger because of the opposite coloured bishops and the terrible position of the white bishop on h4.

45.♖d1 ♖gg4 46.♖c3 ♖e3+ Black continues the invasion.

47.♖b2 ♖ge4 48.♖dd2 Adams is trying to save the game by covering the second rank.

48...♖e1 But now Black is going to do his dirty work on the 1st rank.

49.♖h2 ♖g1 50.♖hf2 ♖ee1 The threat is to play Ra1-Ra2.

51.♔c3 ♖a1 52.♕b4

52...♖a2 What a game... I hardly remember Adams losing so painfully and especially with the white pieces. A real masterpiece game by VachierLagrave! **0-1**

(4) Navara, David(2706) - Oral, Tomas(2515) [E60]

ch-CZE 2014(5.1),
2014.04.30

GM Arkadij Naiditsch
Best rating: 2737

David Navara is by far the best Czech player of the last 10 years. David was already very talented in the young years, showing great results at the World Junior and his ELO rating has been above 2700 for a couple of years already. In the current Czech national Championship, Navara once again showed his class by winning it with a great score of 8/9. Here is one of his attacking wins.

1.d4 ♘f6 2.c4 g6 3.f3 We've already commented on 3.f4 in a couple of previous issues and this move is usually made against players who are playing the Gruenfeld as Black.

3...e6 is by far not the main move, but lately even on top level a few games have been played in this tricky line by Black. [3...d5 4.cxd5 ♘xd5 5.e4 ♘b6 6.♘c3 ♙g7 7.♙e3 O-O 8.♙d2 is the beginning of the very sharp and main line here.]

4.e4 White is practically forced to play 4.e4. If Black was in time to play d5 next, the f3 move would simply not make any sense.

4...d5 5.cxd5 An interesting and quite new approach. [In previous games White usually liked to continue with 5.♘c3 5...dxe4 6.fxe4 and not so long ago Vachier Lagrave found the following very nice idea: 6...c5! (After 6...e5 7.d5 ♙c5 8.♘f3 White's position looks better to me.) 7.d5 ♙g7 8.♘f3 exd5 9.exd5 O-O 10.♙e2 ♖e8 11.O-O ♙f5 With very unclear play.]

5...exd5 6.e5

6...♞h5 Of course the black knight is going to h5 with the idea of playing Qh4 next. Now it is all about timing, Black is going to attack the white center with c5-Nc6 and White will try to keep it safe and use his space advantage.

7.♞e2 c5 Black hurries with the attack on the most important d4 pawn, but maybe another idea could have been even more effective. [7...f6!? looks like an interesting option as well to destroy White's center.]

8.♞bc3 ♞c6 [8...cxd4? doesn't work because after 9.♞xd4 ♞h4+ Black is winning the exchange but losing the game. 10.g3! ♞xg3 11.hxg3 ♞xh1 12.♞xd5 With the killing threats of playing Nc7 or Nf6. White is totally winning.]

9.♞e3 ♞e6 This move looks a bit too slow. [I think Black should have tried the more direct 9...cxd4!? 10.♞xd4 ♞xe5 Of course things are looking dangerous, but it is not easy to see a direct win for White. 11.♞b3 White has a lot of other possibilities, but this is just the most natural one. 11...♞g7 12.♞b5+ ♞d7 13.O-O O-O 14.♞xd5 With some edge for White, but Black's position looks pretty solid.]

10.♞d2 Quite logical, but why not take the pawn on c5 ?! Not a bad move, Black is preparing to castle queenside, but I think Black had a better one. [10.dxc5!? looks pretty logical to me.

10...♞g7 Blacks tries to play for development. 11.f4 O-O 12.g3 White's position is looking pretty solid. 12...f6! Black's on ly chance, but I still think the advantage should be on White's side here.]

10...♞a5 [10...♞g7! looks very logical and strong. 11.dxc5 (After 11.g4 11...h5 Black is gaining control over the f5 square.)

11...♞f5 and I can't imagine that White can have any advantage here as the black pieces are perfectly placed and the upcoming d4 idea or just Qa5-0-0-0 seems to give Black great play for the pawn.]

11.g4 [11.O-O-O 11...♞g7 12.g4 could have led to the same position as in the game.]

11...♞g7 12.♞g5 An interesting approach. White is trying to keep the black king in the center by not him allowing to castle queenside. [12.O-O-O 12...h5 13.dxc5 hxg4 14.fxg4 would also lead to a very complicated position.]

12...h5! Of course Black is not losing any time.

13.♞f6! A strong reply from Navara. The position is becoming very sharp.

13...hxg4 14.fxg4 ♞xg4 A very tempting move, but a very exact calculation is needed for it. The game is now entering an endgame where both kings are under pressure. [A more

solid choice could have been 14...♖h7 15.♗g2 cxd4 16.♘xd4 ♘xd4 17.♙xd4 ♖c8 with very unclear play.]

15.♘xd5 ♙xd2+ 16.♙xd2

16...♗f3? This is already a blunder. [Black should have been more careful with 16...♖c8! A silent but very important move. Not only is the black king feeling himself uncomfortable on e8, his colleague on d2 is also quite badly placed. 17.♗g2 White also has other moves, but it is tempting to develop the pieces first. 17...♗xe2 18.♙xe2 ♘xd4+ 19.♙d3 Black is a pawn up, but White should have good compensation for it. The position is really hard to evaluate.]

17.♘c7+ Soon we will see what Oral missed...

17...♙d7 18.♘xa8 ♗xh1 And now comes the moves that Black obviously missed when he played 16...Bf3:

19.h4! A fantastic move! White is not only defending the pawn on h2, but also threatening to play Bh3 next, winning the bishop on h1.

19...♗e4 [Not much better is 19...♗d5 because of 20.♘c3]

20.♗h3+ The white knight is out of game on a8, but the black king is too badly placed, which allows White to very quickly gain a decisive initiative.

20...♗f5 Not a nice move to play, but there was nothing else left.

21.♗xf5+ gxf5 22.d5! An excellent move. Navara continues putting his opponent under pressure.

22...♘e7 23.♘f4 All white pieces are greatly placed, but the knight on a8 is still almost caught, which makes things more difficult.

23...♘g8?! Black panicks too early... [The only way to go on was 23...♖h7! Black's position looks on the verge, but it is very hard to find something concrete to break through and in case of 24.d6 ♘c6 25.♘c7 Black is in time for 25...♗e6! and maybe White is still better, but nothing too special has happened.]

24.♗g5 White just wants to play Re1 and e6 next.

24...♗e7 Black is fighting. The bishop on g5 has to be exchanged of course.

25.♖g1! A good move, now the g7 knight is White's target.

25...♘h5? Black cannot handle the pressure... [The only way for Black to continue the fight was 25...♖h7! Black needs to keep the knight on g7 to control the e6 move. 26.d6 ♗xg5 27.♖xg5 White's position looks much better, but Black has a little trick. 27...f6! is the only chance, as the e5-d6 pawns are just too powerful and need to be destroyed. 28.♖g6 fxe5

29. ♖d3 ♜e6 And now White already needs to find the very strong 30. ♖c7! to be on top in this position.]

26.e6+! Too easy to miss.

26...fxe6 Navara is accurate again.

27. ♜g6! Black can't avoid the loss of material now, at 27...Rh7 is following 28.Bxe7 and in case of Nxe7 Nf8 and Nxh7. Once again we could see an interesting game by Navara, who is usually playing very creatively and is excellent at calculation!

GM Arkadij Naiditsch
Best rating: 2737

White is a queen up, but of course Black has excellent chances to build a fortress. But the thing is, which plan to chose?!. Should Black put the pawn on g6 and rook on e6 or maybe g6 and try to get the rook to f5 if possible?! Or maybe just play Re8-Re6 immediately without caring about the h5 pawn? Shanava is showing us the most simple way to make a draw:

39. ♖xg2 f5! An excellent move! Black enters a well-known drawn position. A much harder task would be to defend the position after g6 and Re8-Re6 because White would put his king on g6 and try to enter the position over Kh6 and of course to put g6 and Rf5 is just not very realistic, as it would be easy for White to prevent this plan.

40. ♖c6 ♖f6! Black does not care about the h- and f-pawns.

41. ♖e8+ ♔h7 42. ♖xh5+ ♖h6 43. ♖xf5+ ♔h8 White can't do anything to improve his position. Black will just keep on moving by playing Rf6-Rh6 or Kg8-Kh7.

44. ♔g3 ♖f6 45. ♖h5+ ♖h6 46. ♖f7 ♖f6 47. ♖e8+ ♔h7 48. ♔g4 ♖h6 49. ♖e4+ ♔h8 50. ♔g5

50... ♖f6 And as we see, White just has no idea of how to improve his position. **1/2-1/2**

(16) Black to move

GM Csaba Balogh
Best rating: 2672

I have studied some endgames and I came across the following very instructive and useful example. In pawn endgames, pure calculation helps the most and here is one advise how we could easen our task in cases when the side who has the last reserve tempo wins. The player who is to move should always consider moving a pawn which has already moved! First we check how it goes if it was Black to move and in the next example we see if it was White's turn.

1...a5! Only this move wins!

2.h4 White also tries to follow the principle... [2.a4 loses to 2...h6 as we have a symmetrical position and Black moves the last... 3.b3 b6 4.h4 h5—+; 2.b3 We only need to calculate a bit and then we quickly come to the conclusion that Black wins after

2...b5! 3.a3 (3.h4 3...b4 4.h5 h6—+) 3...a4 Black decides how far to push his h-pawn according to how White reacts on the queenside... 4.bxa4 (4.b4 4...h6 5.h4 h5—+) 4...bxa4 5.h4 h5—+]

2...a4! 3.h5 h6 4.b4 axb3 5.axb3 b6! 6.b4 b5—+ and Black won the fight for the tempo.

(17) White to move

GM Csaba Balogh
Best rating: 2672

If it is White's turn, he wins after

1.h4! a5 2.h5! a4 Both sides are principled again. [2...h6 3.a4 b6 4.b3+- is easier.; 2...b5 3.h6 b4 4.b3+-; 2...b6 3.a4 h6 4.b3+-]

3.h6! b6 [3...a3 is nice, but it does not help in view of 4.bxa3 b5 5.a4! bxa4 6.a3+- giving back the tempo!; 3...b5 4.a3+-]

4.b4! and Black ends up in zugzwang in the next move.

4...axb3 [4...b5 5.a3+-]

5.axb3 b5 6.b4! White won the fight for the tempo! Here Black can prolong the resignation a bit by going for the h-pawn, but he still loses...

6...♖e6 [6...♖f6 7.♖xf4 ♖g6 8.♖e5! ♖xh6 9.♖f6 ♖h5 10.e5+-]

7.♖xf4 ♖f6 8.e5+ ♖g6

9.♖e4! The last required accuracy! [But not 9.e6? because of 9...♖f6 10.e7 ♖xe7 11.♖e5 ♖f7 12.♖d5 ♖g6 13.♖c5 ♖xh6 14.♖xb5 ♖g5= and both pawns promote at the same time.]

9...♖xh6 10.♖d5 ♖g7 11.♖d6 h5 12.e6 h4 13.e7+- White is a tempo faster. If we end up in a similar situation in our game, we should still try to calculate as far as possible, but these two examples showed in which direction we should look for the solution. Otherwise calculating all possibilities for both sides right from the first move would take all our time...

Clash of the Titans

(18) Fischer, Robert James
- Olafsson, Fridrik[B92]

Reykjavik(4),
1960.10.09

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e2
The Boleslavsky Variation is not an aggressive system against the Najdorf.

6...e5 [6...e6 leads to the Scheveningen.; 6...g6 leads to a Dragon with the bishop already on e2.]

7.♘b3 [7.♘f3]

7...♙e7

8.♙g5 The idea of this move is to look for play on the light squares. The alternative is to develop the bishop to e3.

8...♘bd7 [8...♙e6 9.♙xf6 ♙xf6 10.♚d3 O-O (10...♘c6 11.O-O-O ♘d4 (11...♚b6 deserves attention.) 12.♘xd4 exd4 13.♘d5 ♙xd5 14.exd5 White is slightly better.) 11.O-O-O ♙e7 12.♘d5 ♙xd5 13.♚xd5 ♚c7 14.♙b1 ♘d7 With good play for Black because the white pieces are not able to take control of the light squares and especially of d5.]

9.a4 A typical move. White takes space on the queenside.

9...O-O 10.O-O h6 11.♙h4 b6 [11...♚c7 With the idea to prevent Bc4 but then White has 12.♘d2 followed by Bc4-Qe2.]

12.♙c4 ♙b7 13.♚e2 ♚c7 [13...♘xe4 This trick sometimes works but not now: 14.♘xe4 ♙xh4 15.♘d6 ♙c6 16.♘xf7+-]

14.♚fd1 ♚fc8

15.♘d2 A thematic plan. The knight on b3 was completely out of the game so White is improving him, but it was more accurate to exchange bishops first. [15.♙xf6 15...♘xf6 16.♘d2 The idea is to take control of the d5 square and it is not easy for Black to find some counterplay. 16...♚c5 (16...♘xe4 doesn't work because of 17.♘d5!; 16...♙c6 17.♘f1 ♚b7 but now the c2 pawn c2 is not under pressure and White can simply play 18.♘d5+=) 17.♙b3

17...d5! Otherwise after Nf1 White would get a stable advantage. 18.exd5 ♖xd5 19.♙xd5 ♙xd5 20.♚xe5 ♙e6 21.♚xc5 ♚xc5 Black has compensation thanks to the bishop pair.]

15...g5! A good move which is not dangerous for Black. Now the white bishop is limited and the idea to play over the light squares will not be useful.

16.♙g3 ♜f8 17.f3 White wants to improve the bishop but this move weakens his position a bit.

17...♜e6 18.♙f2 ♚g7 [18...♜f4 19.♚f1 d5 gives Black good play.]

19.♚h1 ♜f4 20.♚e3 With the idea to put pressure on the b6 pawn but now still comes

20...d5! 21.exd5 ♙c5 22.♚e1 ♙xf2 [22...♙b4 was possible

too.]

23.♚xf2 ♜6xd5 24.♜ce4 [24.♜xd5 24...♜xd5 (24...♙xd5 25.♙xd5 ♜xd5 26.♜f1 With the idea to use the weak f5 and h5 squares.) 25.♙b3 With the idea to play Nc4 next. The black king is a little weak, but objectively the position should be equal.]

24...f5 A good move, Black is putting pressure on the kingside. [24...♜b4 25.♙b3 ♜xc2 26.♚ac1 ♜d3 27.♚g3 ♜xc1 28.♚xc1 ♚d8 29.♙xc2 ♚d4 30.h4 With unclear play.]

25.♜g3 ♚f8 26.♙b3 ♚ae8↑ 27.♜df1

27...h5 An interesting idea. Black sacrifices the h-pawn to get some extra tempi and additional pressure over the h-file. [27...g4 28.♙xd5 ♜xd5 29.fxg4 ♜f4 30.♜e3 fxg4↑; 27...♜e7 With the idea Ng6-Nh4 or Ng6-h5-h4.]

28.♜xh5+ ♚g6 29.♜xf4+ [29.♜hg3 29...♜f6 30.♜e3 e4↑ With huge pressure.]

29...♜xf4 30.♜g3 g4 With unpleasant threats over the diagonal. Black could win the game almost by force but calculating all variations was almost impossible. Let's check: [30...e4 The idea is the same as in the game, Black is going to open the position for the final attack. 31.fxe4 fxe4 Black was probably afraid of 32.♚e3

which looks like it stops the e3 move, but... 32...Nc2!
33. Qxg2 Rf3 34. Qd4 With the idea to exchange queens on d6.
(34. Qe1 34...e3 35. Qd5 Rf2+ 36. Qg1 Qh7! A nice and decisive
queen maneuver. 37. Nf1 Qxd5 38. Rxd5 Qh3—+)

34...Rf3+! black is on time 35. hxc3 e3+ 36. Qd5 (36. Qh2
36...Qh7+ 37. Qg1 Qh1#) 36...Qxd5+ 37. Qxd5 Qxc2+ 38. Qf3
(38. Rxd2 38...Qxd2+ 39. Qxd2 exd2 40. Rxd1 Rxd8 41. Qf3 Qf5—+)
38...Qf2+ 39. Qg4 Qe2+ 40. Qf3 Re4+—+]

31. Ne2 White wants to get rid of the strong f4 knight. [31. Rg1
Supporting the g2 pawn, but after 31...Rh8 Black has the
unpleasant Rxh2 threat.; 31. Rxd2!?]

31...Nc2!? [31...Rh8—gives Black a strong attack.]

32. Qxg2 gxf3+ 33. Qf1

33...e4?? After a very well played game Olafsson makes a
decisive mistake. It is clear that he didn't want take the knight
immediately to stop White from getting the rooks into attack
over the g1 square, but we will see that it was not dangerous.
[33...fxe2+ 34. Qxe2

34...f4! A strong move. Black takes control over the important
e3 and g3 squares. 35. Rg1+ (35. Qh4 35...f3+ 36. Qf2 Qc5+
37. Qf1) 35...Qh5 And White is not able to connect the queen
to the final mating attack. The position is very unclear now.]

34. Qh4! +— White overtakes the initiative now.

34...f4 Preventing Nf4, but it is too late.

35. Qg4+ Qh6 36. Rxd7 White is winning by force now.

36...fxe2+ 37. Qe1 Qc5 38. Qg7+ Qh5 39. Qh7+ Qg5
40. Rg7+ Qf6 41. Rg6+ Qe5 42. Qg7+ 1-0

Editorial Preface

Another great week of chess has just passed.

In the men's US Championship we will probably see a fight for the first place between Akobian and Kamsky, but there are still a lot of rounds to go and things will definitely become more exciting.

In the women's section, as every year, there is a tough fight for the first place between Irina Krush and Anna Zatonskyh and here too everything will be very interesting until the end of the event.

In the traditional Poikovsky tournament in Siberia we have a big surprise and this is the great play of Ivan Saric, who started the event with 4/5 and is shared leader with Morozovich. Just half a point behind we find Jakovenko with 3.5/5.

In the Capablanca Memorial in Cuba, Wesley So and Dominguez will probably decide the tournament win between them. A slight disappointment is the current score of Ivanchuk, who is only on 2/6.

As usual we wish you all a lot of chess fun with this issue of your weekly newsletter.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Ivanchuk, Vassily(2753)**
- **Almasi, Zoltan(2693) [C45]**

49th Capablanca Elite 2014(3.3),
2014.05.10

GM Arkadij Naiditsch
Best rating: 2737

Ivanchuk is clearly one of the most interesting players of the past 20 years and he still continues surprising us with amazingly great play but also sometimes with things like "losing on time around move 30 " or by just blundering some material. In the current game, Ivanchuk is sacrificing a piece for the attack, but Almasi finds the best defensive ways and this finally leaves him with a clear material advantage.

1.e4 To guess the first move of Ivanchuk is just imposibile, so many players don't really prepare for him and just repeat their main repertoire.

1...e5 2.♘f3 ♘c6 Almasi has been playing the Berlin for many years already.

3.d4 So no Berlin and we are entering the Scottish opening instead.

3...exd4 4.♘xd4 ♘f6 This seems to be the main line at the moment. [4...♙c5 was the very main move for many years, but somehow now White is achieving quite a good result in 5.Nb3 or 5.Nxc6, so Black switched to 4...Nf6 more and more.]

5.♘xc6 [We currently see quite a lot of games in the following line: 5.♘c3 5...♙b4 6.♘xc6 bxc6 7.♙d3 d5 8.exd5 cxd5 9.O-O O-O but I think all this leads to an equal position and it can't be considered as a real try to get any advantage in the opening.]

5...bxc6 6.e5 ♖e7 7.♖e2 ♘d5 8.c4 So we are in the main line and so far things were pretty forced. Now Black has two main options: 8... Ba6 and 8...Nb6.

8...♘b6

9.b3 A relatively rare move. [Usually White was playing 9.♘c3 9...♖e6 10.♖e4 but it seems that Black found a direct way to equalize after 10...♙b4 11.♙d2 ♙a6 12.b3 ♙xc3 13.♙xc3 d5 14.♖f3 dxc4 15.♙e2 O-O 16.O-O ♖ad8 17.♖ac1 c5 happened in the game Caruana-Bacrot in 2013 and I think that if White is better here, it is very minimal and practically the position should be close to a draw.]

9...♖e6 Almasi has already played this move in 2010 against Tregubov. [A more popular answer for Black is 9...a5 with the idea of playing a4 quickly, then exchange of the rooks on the a-file and only after that play d5.]

10.♙b2 A new move. Almasi-Tregubov had continued with [10.g3 10...d5 11.exd6 ♙xd6 12.♙b2 O-O with a nice position for Black because of the much better development.]

10...♙b4+ Slightly dangerous play by Almasi, who is not trying the usual d5 or a5-a4 ideas, but is more concerned about fast play against the e5 pawn.

11.♘d2 O-O 12.O-O-O As we can see, the position is already

very sharp and dangerous for Black. The bishop on c8 might remain a "dead" piece. [12.a3!? might have been an interesting option.]

12...♖e7 Black might want to play Ba3 next or maybe he was just avoiding a3.

13.♘e4 At first sight Black's position is not looking nice, White is well developed and just maybe wants to play Qc2-Bd3 next or maybe Qh5 or Qg4 with attacking ideas.

13...♖e8! A really fantastic move by Almasi. He is not only defending against the Nf6 threat, but also wants to play d5 or d6 next, depending on White's move. White's problem now is that the knight on e4 is hanging and it is very difficult to do something against it.

14.♘f6+!? Not a very correct sacrifice, but a very interesting one anyway. [After a slow move like 14.♖c2 14...d5! 15.♘g3 a5 Black's play on the queenside gives him a clear advantage.]

14...gxf6 15.♖g4+ ♔h8 16.exf6 ♖f8 The last 2 moves were forced, now White needs to try and continue the attack.

17.♖h4 White wants to continue with Bd3, but in any case Black would have played d5 after almost any of White's moves.

17...d5! A good move. In any case the black bishop from c8

has to come into the game.

18.♘d3 ♖g8 [Of course 18...h6? would have been a big mistake because of 19.♖b1! with the idea of playing Bc1 next, attacking the h6 pawn.]

19.c5 Ivanchuk continues being inventive. White needs to gain back the control over the e1 square to play Rhe1 and bring another rook into the attack, so who really cares about another pawn when you are a full piece down.

19...♘xc5 20.♖he1

20...♘g4! I like this move a lot. Before playing the natural Bd7, Black is provoking the f3 move, just to be sure that in the future White is not going to have the idea of Rd3-Rh3 somewhere if possible.

21.f3 ♘d7 22.♖e7 The only chance for White to survive is to keep on creating some threats.

22...♘e3+! Almasi continues playing a great game. By playing 22...Be3 with the idea of c5 and d4, Almasi is closing the monster bishop on b2.

23.♖b1 c5 The bishop on b2 is almost closed.

24.♖h5 White is attacking the f7 pawn which forces Black to take on e7.

24...♖xe7 [Of course not 24...d4?? 25.♖xf7]

25.fxe7+ ♜d4 Blacks keeps on being accurate. [25...d4? was a mistake because of 26.♖e1! and White wants to play Rxe3 next. The position would now be really unclear.]

26.♜xd4+ cxd4 27.♚e5+ Black is a full piece up and White's only chance left is the e7 pawn.

27...♚g7 28.♚xc7 White has 2 pawns for the piece at the moment, which is not much, but at least something. The bigger problem is that being a piece up and having a passed pawn in the center, Black's chances to develop a strong attack on the white king are very good.

28...♚f6 29.♖e1 ♖e8 The e7 pawn is blocked and the black king is safe, so it is time to switch to the final act of the game, the attack on the white king.

30.♚xa7 is clearly a move of desperation, but there is already nothing White can do. Black played a very good game, defending his position like Tigran Petrosian in his best games! :)

30...♜f5! Another strong move. Black is exchanging the last white defender.

31.♜xf5 ♚xf5+ 32.♚b2 ♚g5! Qd2 is a deadly threat now.

33.♚b1 ♚g6+ The white king has no good squares to go to,

after a move like 34.Ka1 Black has 34...Qc2.

34.♚b2 ♚xg2+ And the game is over. After 35.Kb1 d3 followed by Qc2 is just not worth playing. We just saw an interesting game and a great defence by Almasi, which brought him a deserved full point. **0-1**

(2) Kamsky, Gata(2713) - Erenburg, Sergey(2633) [D00]

ch-USA 2014(4.3),
2014.05.11

GM Arkadij Naiditsch
Best rating: 2737

As in many of his latest games, Kamsky is not really trying to reach any advantage out of the opening and is just playing "something" in the hope to outplay his opponent in the later stages of the game. The current game is a good example of it. Black had no problems at all after the opening and reached a pretty equal position, but an inaccuracy first got Erenburg into a bad position and later on with strong play Kamsky pretty much overrode his opponent's defence lines.

1.d4 d5 2.♘g5 What to say about such a move.. It is just a random move like many others.

2...h6 To include h6 can't be bad for Black.

3.♘h4 c6 A solid way to go on. Another choice could be to just play 3...Nf6 and after 4.Bxf6 exf6 I believe Black should be OK as well.

4.♘f3 ♖b6! A strong move right now. It is quite difficult for White to defend the pawn in a nice way and Black is going for Bf5-e6 after which it is clear that 2...h6 was a very useful move and also that White has no advantage.

5.b3 To play a move like 5.Qc1 is also not very pleasant.

5...♘f5 6.e3 e6 7.♘d3 We can see similar ideas in the Slav, where White is trying to reach a small plus by exchanging the white squared bishops and pushing e4 at some point.

7...♘xd3 8.♖xd3

8...♘e7! An excellent move! The black knight is going to f5 and taking the h4 bishop, which is very important. By now it is clear that the position is just equal.

9.c4 White cannot escape the exchanges so he is at least trying to get the control over the center.

9...♘f5 Of course Black is finishing what he started.

10.♘g3 ♘d7 There is no hurry with taking on g3.

11.♘bd2 ♘xg3 It is hard to say why Erenburg just took on g3, I think a move like 11...Be7 was looking at least as logical as the move in the game. Black should not fear White's e4 push, because after dxe4 Nxe4 White's pawn on d4 is becoming a clear target for the black pieces.

12.hxg3 g6?! This is already a very strange decision. [The position is still looking equal after the simple 12...♘e7]

13.e4?! This move by White also looks absolutely unnecessary. [The more silent 13.g4 with the idea of asking why Black actually played 12...g6. In case of 13... Bg7 White would start his play on the queenside by playing for example a3-b4 with some small plus.]

13...dxe4 14.♘xe4

14...O-O-O! Erenburg is making the right evaluation of his position. On one hand it looks a bit dangerous to castle queenside when White can castle kingside and start the attack on the black king, but on the other hand the d4 pawn which Black can target immediately is making this possible. Black is in time to create strong and quick play in the center.

15.O-O White is ready to start the rush on the black king, with for example a move like b4 next.

15...e5! Exactly! Black is not wasting any time and is playing for the control of the dark squares, where his bishop could become a very strong piece.

16.c5 Black just wants to play f5 next.

16...♔c7 17.♔c3 [17.dxe5 also doesn't lead to anything as after 17...♘xe5 18.♔c3 ♘xf3+ 19.gxf3 Black has the very cool 19...♖h7! followed by f5 next and I think only Black could be better here.]

17...f5? This is a serious mistake after which White is clearly taking over. [Of course Black should have taken on d4: 17...exd4! 18.♔xd4 (18.♘xd4 18...♔e5! with a double attack on the e4 and c5 pawns. 19.♖fe1 ♘xc5 Black is a healthy pawn up.)

18...♖h7 and once again the wonderful Rh7 move leads to a slightly better position for Black.]

18.♘d6+! Such a move is impossible to miss.

18...♔xd6 19.cxd6 ♔xd6 20.dxe5 So after a exchanges White got a strong e5 pawn and some chances for an attack on the queenside, while Black now needs to be very careful in order to still be ok.

20...♔e7?! Black continues losing important time. [Probably the best chance to go on was to play 20...♔c5 21.♔b2 of course White needs to keep the queens on the board, as the endgame would just be perfect for Black. 21...♖he8 and Black can continue defending successfully.]

21.b4 White is starting his play.

21...♔b8 White of course wanted to play b5.

22.a4 An interesting strategic move from Kamsky who doesn't seem to care about the open d-file, but tries to open the black king's position as much as possible.

22...♖he8 23.♖fe1 This is an important moment for Black. Where to put the knight, to e6 or to d5?!

23...♘f8 [After 23...♘b6 24.b5 ♘d5 White has a nice move with a double attack: 25.♔c1! targetting the pawn h6. White should be better here.]

24.b5 White continues his plan. [Another option could have been to play 24.♘d2!? followed by Nc4-Nd6, with an advantage for White.]

24...c5 25.b6 A logical move, but maybe now Black is getting some chances. [25.a5 was a safer move. 25...♘e6 26.b6 With a better position for White.]

25...a6?! After this move Black's position is becoming very bad. [25...axb6 was the only chance to go on. Black just can't keep the b6 pawn alive, which is terrible news for the black king. 26.♘d2! And again the idea of Nd2-Nc4 is crushing Black's plans. 26...♖d4 27.♘c4 ♘d7 28.♖ab1 With a very dangerous position for Black, but still not a lost one.]

26.♖ad1 After the job with demolishing Black's pawn structure and getting the pawn to b6 is done, White is taking control over the d-file.

26...♘e6 27.a5 This move is clearly not a mistake, but it was not really needed. [White could have proceeded with exactly the same idea as in the game. 27.♖d6! and Black still cannot take the rook because of 27...♖xd6? 28.exd6 ♕xd6 29.♕f6 ♕xb6 30.♕f7 ♕c6 31.♘e5 ♕xa4 32.♘d7+ and White is winning the rook on e8.]

27...g5 After this move it is all over. [Black's last chance to fight was 27...♖xd1 28.♖xd1 ♖d8 29.♖xd8+ ♕xd8 30.♕c4 and of course White's position is much better, but Black could have tried to go on with 30...Qd7, with the idea of Kc8-Kd8-Ke7 and holding a bad position.]

28.♖d6! A very strong move! Now of course Black cannot take the rook on d6 and White can simply increase the pressure on the d-file.

28...h5 Black is totally in panic and makes some random moves, but the position seems to already be lost. [After 28...♖xd6 29.exd6 ♕xd6 30.♕f6 Black's position is also looking hopeless. We can see how important the white pawn on b6 is.]

29.♖ed1 The d-file is under White's control.

29...f4 30.♕c4 With the simple threat of playing Qxe6 next.

30...♖c8 Black is avoiding it, but here comes the other "evil":

31.gxf4 was not really needed, but why not. Black can't do anything anyway.

31...gxf4

32.♖1d5 A nice move. White has a lot of threats and Black is almost in zugzwang!

32...♙f7 33.♖xc5+ ♔b8 34.♖c7 Another fighting win by Kamsky where Erenburg had a good chance to at least not be worse. It is hard to recommend Kamsky's way of playing, but usually in the end the player with the highest rating wins... **1-0**

**(3) Onischuk, Alexander(2668)
- Shankland, Samuel L(2634) [D19]**

Saint Louis USA(4.4),
2014.05.11

GM Csaba Balogh
Best rating: 2672

Onischuk scored a nice clear-cut win in the US Championship.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 dxc4 Black goes for the popular Slav defence.

5.a4 ♕f5 6.e3 The calm continuation. [The other huge main line is 6.♘e5 and it usually leads to very sharp positions.]

6...e6 7.♕xc4 ♕b4 8.0-0 0-0 We have reached another crossroads. Onischuk plays the most frequent and probably the most challenging move, but 9.Nh4 is another serious alternative for White.

9.♙e2 With the idea to occupy the center with e4, after which White can develop his c1 bishop. Black also has plenty of setups here, but Shankland goes for the line, which everybody employs recently...

9...♘bd7 10.e4 ♕g6 11.♕d3

11...♕h5 The most forcing continuation. By pinning the knight, Black has prepared the freeing break with e5,

therefore White has to play it himself, but it gives the d5 square for the knight. The move is popular since the Kramnik-Topalov World Championship match in 2006, where Kramnik successfully employed this line with Black in more games.

12.e5 ♖d5 **13.♗xd5** [13.♗e4 is a typical move in such positions, but here Black can play 13...♙e7 followed by c5, undermining the center.]

13...cxd5 14.♙e3 White has left the pin and intends to play Ng5. Black has a wide range of choices here:

14...♙e7 The most direct defence against Ng5, but it gives up the pair of bishops. [I recently played 14...♖e8!? which has the idea of 15.♗g5 ♙g6 16.♙xg6 fxg6! (After 16...hxxg6 Black has to deal with the g5 knight. 17.♙f4 f6 seriously weakens the pawn structure, the pawn on g6 becomes a target. 17...♙e7 18.♙e3 with the ideas of Qh4 Nf8 f4 and Rf3-h3.) 17.♙h3 ♗f8 and Black has protected both of his pawns and he can kick out the annoying knight with h5.]

15.♗g5 ♙xg5 16.♙xg5

16...♙xg5 This is an inaccuracy. Shankland probably mixed up the move order. [It is considered to be better to start with

16...♙g6 and only after 17.♙e2 (17.♙b5 makes no sense now as Black simply plays 17...a6) 17...♙xg5 (Or 17...♗b8 immediately) 18.♙xg5 ♗b8 driving the knight to a more active place on c6 from where it attacks the d4 pawn and controls the important b4 square to avoid any kind of progressing plans like b4-b5.]

17.♙xg5 ♙g6 18.♙b5! White saves his bishop with tempo and the knight has no good square to leave from d7.

18...h6!? A tricky move... [Black has no time for 18...♗b8 19.♖fc1 a6 with the idea to establish the knight on c6 and all is fine, but White wins after 20.♙e7! axb5 21.♙xf8 ♙xf8 22.♖c8+ ♙e7 23.♖ac1+- and the pin is fatal. R1c7 wins next.; 18...♗b6 19.a5 and Nc4 runs into b3, while Nc8 Rfc1 is not really an option for Black.]

19.♙xd7! Only this simplest continuation gives an advantage. [19.♙xh6 19...♗xe5 20.♙xg7 wins a pawn, but after 20...♗f3+! 21.gxf3 ♙xg7 White cannot be better with such poor pawns.; 19.♙e7 seemed to win, but after 19...♖fc8! (19...♖fe8 20.♙h4!+- really wins the piece.) 20.♙xd7 ♖c7 Black wins back the piece and survives.]

19...hxxg5 20.♖fc1! Simple and strong. Onischuk uses the fact that Black cannot oppose his rook on the c-file and he invades the 7th rank.

20...♙d3 Trying to drop the bishop into defence. [Other moves like 20...a5 also lead to a bad position after 21.♖c7 ♖fb8 22.♖a3!± Because of rook-lifting motif it was important to occupy the c-file with the f-rook.]

21.♖c7

21...a5!? Another clever attempt by Black to consolidate. The idea is if White grabs the pawn, Rfb8 and Black gets adequate compensation against the b2 pawn. Otherwise he intends to put his bishop to a6 and he prevented the b4-b5 idea. However Onischuk finds a subtle refutation... [21...♗a6 22.b4 was problematic for Black.; 21...♖ab8 22.♖a3 is also bad.]

22.♖a3! ♗a6 23.♖g3! Attacking and actually winning the second weakness. f6 never works as the e6 pawn falls, therefore White wins a pawn. Of course Black had expected this when he entered this defensive setup and he planned to play

23...♖ab8 [In case of 23...♖fb8 24.♖xg5 b5 White wins again after 25.♗xe6! fxe6 26.♖xg7+ ♔h8 27.♖h7+ ♔g8 28.♖cg7+ ♔f8 and here 29.h4! with the idea of h5-h6 and Rh8 mate. Black has to play 29...bxa4 with the idea of Bd3 and here

30.♖g3!! White wins after this extremely deep move! He simply prevented the Bd3 threat and wants to continue his idea to push h5-h6. The b8 rook cannot leave the 8th rank because the a8 rook falls after Rh8! 30...♖c8 31.h5 ♖c1+ 32.♔h2 ♖ac8 33.h6!+- and Black cannot avoid getting mated in a few moves. The direct threat is Rh8 and Rg7 mate, but White also threatens with Rgg7 and Rh8 is inevitable.]

24.♖xg5 b5 It seems like Black opens the b-file and gets his compensation for his missing pawn because the b2 is very weak and the g5 rook seems to be completely misplaced. However, the truth is that the rook on g5 is placed excellently due to the tactical motif

25.axb5 ♗xb5

26.♗xe6!! It is instructive that even in endgames we should focus on finding tactical ideas.

26...♗c4 The only chance for Black to create some counterplay with his a-pawn, but it is too slow. [26...fxe6 leads to forced mate: 27.♖xg7+ ♔h8 28.♖h7+ ♔g8 29.♖cg7#]

27.h4! Opening the back rank and launching a quick attack with h5-h6.

27...♖xb2 28.♗d7 Preventing a4 and threatening with e6! [28.h5 28...♖b6 and the bishop needs to move, but then h6

is not a threat anymore. Still of course 29.♕d7 should be winning with the extra pawn.]

28...♖e2 [28...♖b6 does not change anything. 29.e6 threatening to play e7 and after 29...fxe6 30.♕xe6+ ♖xe6 31.♖gxg7+ ♔h8 32.♖h7+ ♔g8 33.♖cg7#]

29.e6 [29.♖a7 29...♖b8 30.♕f5+- was also good enough.]

29...a4 [29...fxe6 was still mate after 30.♕xe6+!+-]

30.♖e5! The most precise! White creates the threat of e7, therefore the following moves are forced... [30.♕xa4 30...♖xe6 Black has a practical chance by reaching 3 vs 2.]

30...♖xe5 31.dxe5 fxe6 32.♕xe6+ ♔h7 33.♖a7 ♔g6 [On 33...♖e8 White defends his important e5 pawn with tempo: 34.♕f5+ ♔h6 35.f4+-; The best chance was 33...♕b3 White has some different wins here. The computer gives the most convincing one as 34.♖a6! (After the direct 34.♕d7 Black could hope with 34...♖f7 35.e6 ♖e7) 34...d4 35.♕d7! wins the a-pawn and he is in time to stop the d-pawn... 35...d3 36.♕xa4 ♕xa4 37.♖xa4 ♖d8 (37...d2 38.♖d4+-) 38.♖a1 The d-pawn falls soon. 38...♔g6 39.f3 ♔f5 40.♔f2 ♔xe5 41.♔e3+- and the 3 against 1 endgame arises inevitably, which of course wins easily.]

34.g4! Threatening to take on a4, because after Re8 White

will have Bf5 check. [But not 34.♖xa4? because of 34...♖e8 and Black gets practical chances again.]

34...♔h6 [34...♕b3 loses to 35.♕f5+ ♔h6 36.♖a6+- suddenly mates.]

35.♕f7 Black resigned. Mixing up the moves in the opening has cost Black a lot... **1-0**

**(4) Fressinet, Laurent(2711)
- Blomquist, Erik(2492) [D11]**

Malmo, 2014.05.15

GM Csaba Balogh
Best rating: 2672

The big difference between the two players was telling in this game, but it was still a spectacular win by Fressinet.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6

4.g3!? From time to time we meet this surprise weapon against the Slav defence on the highest level. White would like to play a Catalan structure, but of course having played c6 instead of e6 gives Black many extra options. First of all, he can develop his c8 bishop to f5 or g4 followed by e6, with a very solid structure. He can play g6, which transposes to the g3 Gruenfeld, where the c6-d5 setup is considered to be the most solid and Black can also take on c4 with the idea to protect the extra pawn with b5.

4...dxc4 5.♙g2 ♙f5 There were many games on this move, but strong players play differently. [5...b5!? 6.♘e5 ♙b7 7.O-O e6 was played by Shirov recently.; To me the most logical development seems to be 5...♘bd7!? 6.♙c2 ♘b6 7.♘bd2 g6 8.O-O ♙g7 9.♘xc4 ♙f5 10.♙c3 ♘xc4 11.♙xc4 O-O which

happened in the Grischuk-Aronian 2013 game and in both cases we reach a playable position for both sides.]

6.O-O After developing the bishop to f5, the plan of b5 makes no sense, because the c6 pawn cannot be supported with Bb7 anymore. White could play Ne5 or a4 with excellent prospects on the h1-a8 diagonal.

6...♘bd7 7.♘a3! White wins the pawn back, but it matters a lot under which circumstances. The way Black plays, White just gets a huge advantage...

7...♙a5? This plan of driving the queen to a6 exists and is known from different lines, but in this particular situation it is pointless, as it gives White a tempo and the queen just gets misplaced... [7...♘b6 should definitely have been played. White wins back the c4 pawn anyway and he has some space advantage, but in such situations the trade of the pieces helps to the side who is lacking space. 8.♘e5 e6 9.♘axc4 ♘xc4 10.♘xc4 White is slightly better, but of course this is just the beginning of the game. Black might try to exchange the strong bishop on g2 as well with Be4...; 7...b5 was bad in view of 8.♘e5! winning back the c6 pawn and then the b5 pawn also becomes vulnerable. 8...♘xe5 9.dxe5 Nd5 moves into the e4 fork, while 9...♘e4 10.♙c2! ♙d5 11.♙f4 followed by Rd1 is also bad for Black.]

8.♘xc4 ♙a6 9.b3 g6? Another unnatural move, which takes the important g6 square away from the f5 bishop. Black soon faces real problems because of it. [On 9...e6 Black was probably afraid of 10.♙f4 with the threat of Nd6. White grabs the bishop pair and also prevents Black from castling, but he could still play 10...♘b6! 11.♘fe5! (The tempting 11.♘d6+ is wrong because of 11...♙xd6 12.♙xd6 ♘e4! with the double threat on d6 and Nc3. 13.♙b4 ♘d5! again with tempo and Nc3 is also threatening.)]

10.♟b2 [10.♞g5!? was a strong alternative, directly showing the misplacement of the f5 bishop by threatening with e4. 10...h6 11.e4! hxg5 (11...♟g4 is even worse. 12.f3 hxg5 13.fxg4± and the g5 is going to fall and e5-e6 is also in the air.) 12.exf5 gxf5 13.♟xg5± The change of the pawn formation clearly favors White. The king on e8 becomes vulnerable and the opening of the position strengthens the two bishops.]

10...♟g7 [If Black tries to avoid the things that happened in the game with 10...♟e4 White gets an advantage anyway with 11.♞cd2 ♟d5 12.♞e1!+= and the threat of e4 forces Black to give up his bishop on d5.]

11.♞fd2! Simple and strong! White would like to occupy the center with e4.

11...0-0 [11...♞b6 could have been met by 12.e4 ♟e6

13.♞e3!+= I like this move a lot positionally. White has space advantage, while the black pieces in front of their pawns have no coordination and target, therefore White keeps all his pieces on board.]

12.e4 ♟g4 13.♞c2 ♞e8 I am not sure about the point of this move, but White has already achieved a pleasant edge. [Even after some more logical move like 13...♞b6 White is better

after 14.♞e3 ♟e2 15.♞fe1 ♟d3 16.♞c3 The bishop is nice on d3, but actually it does not do anything and Black only has problems with defending it.]

14.♞fe1! Improving the pieces.

14...♞c8 [Probably the original idea of Ne8 was 14...♞d6 but White wins material after 15.h3 ♟e6 16.d5! cxd5 (16...♟xb2 17.♞xb2 cxd5 18.exd5 ♟f5 19.g4 ♟d3 20.♞xe7+-) 17.♟xg7 ♞xg7 18.exd5 ♟f5 19.♞c3+- and g4 or or Rxe7 wins next move.]

15.♟f1 Another strong positional move, which forces Black to make a decisive weakening on the queenside in order to save the queen from the pin. [However White had a nice direct win 15.♞e3! 15...♟e6 (15...♟e2

16.♞d5!!+- is the point and White wins material!) 16.d5! Using the pin on the c-file, White traps the bishop. 16...♟xb2 17.dxe6! ♟xa1 18.exd7 ♞d8 19.dxe8=♞ A nice career for the d-pawn, he took 3 minor pieces in a row... 19...♞fxe8 20.♞xa1+-]

15...b5 16.♞e3 ♟e6

17.a4! Very well played. White is going to take on b5, luring the c-pawn away and it will lead to even bigger domination in the center.

17...♖b7 18.axb5 cxb5 19.♖b1 White is ready to advance his central pawns. The advantage is growing with each move.

19...♘b8 [If Black tries to go to the other direction with his bishop 19...f6 20.d5 ♕f7 21.b4! White will play Nb3 next, with a decisive positional advantage. Black is just totally doomed.]

20.d5 ♕d7

21.e5 What a very nice position from White's point of view. The entire black army is paralyzed, one of his pieces is worse than the other. [White could also have played 21.♕xg7 21...♘xg7 22.b4!+- again with the idea of Nb3-c5. White is just winning.]

21...e6 22.♕d4! As we will see, Fressinet wants to occupy the c5 square with his knight, but not with the b4 Nb3 plan as I suggested in the previous moves, but he supports it with the bishop and also wins a tempo by attacking the a7 pawn. [22.d6 22...f6 gives some small hope for Black, but of course his position is objectively still bad. For instance 23.exf6 ♘xf6 24.b4± and Nb3 again next move.]

22...a6 23.dxe6 fxe6 [23...♕xe6 24.♘e4± is equally bad for Black.]

24.♘e4 ♕c6 [On 24...♘c6 25.♘c5 wins the a6 pawn with tempo. 25...♖c7 26.♘xa6 ♖d8 27.♖b2!+- White was able to save his important e5 pawn.]

25.♕g2 [25.♕h3! was actual ly even stronger and it is not easy to protect the e6 pawn. Black is in trouble in all the lines. 25...♕xe4 loses to (25...♖e7 26.♕c5+-; 25...♖d7 26.♘g5 ♖xd4 27.♕xe6+ ♖h8 28.♕xc8+-; 25...♖f7 26.f4!+- Threatening Ng5.) 26.♕xe6+ ♖h8 27.♕xc8!+- Counterattacking the queen and White has a decisive material advantage.]

25...♖d8 [25...♕xe4 26.♕xe4 ♖c7 27.♘g4± also looks terrible for Black from a positional point of view.]

26.♕c5 ♕xe5 A desperate attempt to confuse the opponent, but Fressinet calculates well and finds the winning continuation. [26...♖f7 loses to 27.♘g5 ♕xg2 28.♘g2+- and the e6 pawn or the exchange falls.; 26...♖f5 could have been the best practical chance to complicate the matters a bit, although after 27.f4!+- (27.♘xf5 27...exf5 is unclear.)]

27. ♖xf8 ♜xa1

28. ♘c5! The most convincing way to victory. White wins in all the concrete lines:

28... ♔f7 29. ♘g4! Not the only way to win, but the most pretty one. Some knight tango at the end of the game.

29... ♔xf8 [29... ♔xf8 30. ♘xe6+ ♔g8 31. ♘h6+--]

30. ♘xe6 [Black resigned in view of 30. ♘xe6 30... ♔a3 (30... ♔d6 31. ♘h6+ ♔h8 32. ♔xa1+--)] 31. ♘h6+ ♔h8 Black made some wrong decisions in the opening stage of the game and his position just fell apart. 32. ♘xd8+--] **1-0**

Endgame section

(15) Saric, Ivan(2666)
- Eljanov, Pavel(2732)

15th Karpov GM 2014(4.1),
2014.05.14

GM Arkadij Naiditsch
Best rating: 2737

White's position is clearly better but the win is still far away. Ivan Saric shows us great technique by giving Eljanov no chances for escape.

41.h5! A strong move. White needs to create a passed h-pawn, with the idea of sacrificing it at some point and to then be in time to play Kf4-Ke5 with very good chances to win the game.

41...gxh5 42.gxh5 ♖h6 Eljanov decides to stop the h-pawn with his king and to try and be active with his rook and knight. [In case of 42...♖f6 43.♖f4 (Black would be happy to see White playing 43.h6? 43...♗g3! followed by Nf5, winning the h-pawn.) 43...♗c3 At least Black is trying to win the a-pawn. 44.h6 ♗xa4 45.♖g4 followed by Kh5 and Rf1 next. White's position is looking pretty close to winning here.]

43.♖f4! Another strong move. White is not losing time and tries to enter Black's position with his king.

43...♗f2 Black is trying to get his knight to d3 to stop White from getting to e5 with the king.

44.♖b1! Another very accurate move by Saric, taking the b2 square under control. [After for example 44.♖a1 44...♗d3+ 45.♖e3 Black has the very important move 45...♗b2! followed by Nc4, with probably a draw.]

44...♖xh5 [44...♗d3+ of course didn't work since after 45.♖e3 the black knight has no more squares.]

45.♖e5 So the h-pawn played its role perfectly. The black king had to lose time to pick it up and the white king managed to enter Black's position. Now both the e6 and b6 pawns are weak.

45...♖g5 After this move the position is lost by force. [45...♖g4 would have given Black more chances for escape. 46.♖xe6 ♖f4 47.♖xd5 ♗g4 and of course White is a pawn up and should win the game, but Black would still have some tricks.]

46.♖g1+! A very strong move again.

46...♗g4+ 47.♖d6 White doesn't even need to waste time on a move like Kxe6, after which the position would of course be

winning too.

47...♔f4 White's threat was also to play Ne5.

48.♔c7 e5 Black is trying his last hope, to at least get a passed pawn.

49.♖xg4+ Saric is finishing the game in style. [Of course the position after 49.♔xb6 would also be winning for White. It is just impossible to stop the b-pawn.]

49...♔xg4 50.♖xe5+ For the moment Black is a full exchange up, but his position is totally hopeless. White is going to take the b-pawn and there is nothing Black can do to stop White from promoting the pawn.

50...♔f5 51.♔xb6 ♔e6 Eljanov tries to bring his king as close as possible, in the best case to the 8th rank.

52.♔a7 White already wants to end the game by playing b6-b7. Of course 52.Kxa5 would have won the game too.

52...♖h7+ 53.♔a6 ♔d6 54.b6 ♖h1 There is still some small hope of stopping the b-pawn...

55.b7 ♖b1 Black wants to play Kc7 next.

56.♖d3! Of course such a move is hard to miss. Black is not in time for Kc7-Kb8, because of 56...Kc7 57.Nc5 and now White threatens to play Ka7 so 57...Kb8 58.Nd7+ Kc7 59.b8, with an easily winning pawn endgame. We just saw great endgame technique by the still young Croatian Ivan Saric, who probably had by far the best year in his chess career so far, winning the Corsican Rapid, the B group in Wijk aan Zee and qualifying for the World Cup in the European Championship. **1-0**

(16) Gareev, Timur(2653)
- Akobian, Varuzhan(2643)

US Championship,
2014.05.12

GM Csaba Balogh
Best rating: 2672

Despite the material equality, Black has realistic chances to play for the win because the doubled a-pawns cannot be counted as healthy ones and Black has a c6 passed pawn, which might become dangerous in all the endgames.

41...♖e4+! Black rightly aims for simplifications. The power of the c-pawn increases with the exchanges of the pieces.

42.♗xe4+ ♕xe4 43.♔h4? White probably blunders the deep idea which comes two moves later. [White should have entered to the endgame 43.♕xh5 43...♖g7+ 44.♔f4 ♕xg2=+ and the position should be drawn due to the limited material, but of course Black can still press very long without any risk of losing.]

43...♕xf3 44.♖xf3

44...♖h7!! It is easy to miss such moves, because the human mind usually follows the principles that one should play actively in rook endgames and if the h5 pawn can be defended from h7 and from e5, then he starts to calculate only the latter one, because it also attacks the a5 pawn. However the key is that the b7 pawn is protected and Black simply wants to advance his c-pawn. [On 44...♖e5 White could have played 45.♖f7! ♖xa5 46.♖xb7 and the game should be drawn.]

45.a4 A slightly mysterious move, but White was already in a difficult situation. [45.♖f5 does not help 45...c5 and the h5 pawn cannot be taken, because the king is not in the square of the c-pawn.; 45.♔g5 would have been the most logical reaction, with the idea to play Kg6 followed by attacking either the h5 or the b7 pawn, depending on where the rook moves. Although Black can continue with 45...♖g7+ 46.♔xh5 ♖xg2 47.♖f7 ♖b2 The white king is very far from the queenside where the action is going on... 48.♔g4 ♖b3 49.♔f4 ♔d5 followed by c5. 50.♖d7+

50...c4 It is difficult to establish if Black is winning or not, but in any case this would have been the only chance for White to hold.]

45...e5!? Black plays very subtle chess. He only wants to advance his c-pawn after avoiding his opponent's idea to get rid of his a-pawn. [However there was no need for such deepness, as Black could simply have played 45...c5 46.a6 bxa6 47.f6+ Only this could be White's idea, but Black is winning after 47...d5 48.xa6 c4 49.a8

49...c7! The c-pawn is too advanced. The only saving idea could be to sacrifice the rook for it, grab the h-pawn and try to promote the g-pawn, but it is just too slow... 50.xh5 c3 51.d8+ e4 52.d1 c2 53.c1 d3 54.g4 d2 55.a1 c1= 56.xc1 xc1 57.g5 e3 58.g6 f4 59.g7 f5!—+ And it is over because of the mate threat.]

46.g3 Another mysterious move, but it was already hard to be clever... Black's task is easy in any case. [46.f8 46...c5 47.c8 d4 Slowly but surely promoting the pawn.; 46.g5 also loses after 46...c5 47.g6 c7 48.xh5 c4 like in the 45...c5 line. 49.c3 d4 50.c1 c3 51.g4 c2 52.g5 c3 The black b-pawn remains on the board, so it does not matter if White succeeds to promote his g-pawn, Black will take it and collect the a-pawns one by one.]

46...c5 47.g5 [On 47.f4 Black wins for instance after 47...g7 with the threat of trading the rooks with Rg4 and after taking twice he plays Ke4, cutting the king's route to catching the c-pawn... 48.xh5 xg3—+ The white king is just too far to hold...]

47...c4 The rest of the moves are automatic for Black.

48.g6 c7 49.xh5 c3 50.f1 c2 51.c1 d4 52.g4 c3 And White resigned. It was instructive how hopeless White was against the c-pawn, but the key of the success was 44... Rh7! **0-1**

Editorial Preface

Once again a lot of top events came to an end in the current week:

The US Championship was won by Gata Kamsky after tiebreak since 3 players (Kamsky, Lenderman, Akobian) had finished on an equal score of 7/11. In the first tiebreak game Lenderman was eliminated by Akobian and then in the final match Kamsky had no trouble to secure another US Championship Title.

In the women section we had a similar situation, where Krush, Zatonskih and Abrahamyan all managed to finish on 6.5/9 and had to play the tiebreak as well. First Abrahamyan won her mini match against Zatonskih but in the final the title once again went to Krush, who already crushed for the 6th time the US Championship.

In the Capablanca Memorial in Cuba, Wesley So made his way to the top with a great result of 6.5/10. 2nd place went to Bruzon with 5.5/10 and 3rd to Dominguez with 5/10.

The super tournament in Poikovsky was won by Morozevich with 6/9, followed by Jakovenko with 5.5/9 and Shirov and Bacrot shared the 3rd place with 5/9.

The 22nd Siegeman and Co Chess Tournament was won by Fressinet with 3.5/5.

The next week seems to be a bit empty from major chess events, so we hope you enjoy the current issue with the best moment from the biggest chess events!

**(1) Motylev, Alexander(2687)
- Eljanov, Pavel(2732) [C84]**

15th Karpov GM 2014(6.4),
2014.05.17

GM Arkadij Naiditsch
Best rating: 2737

We are going to see a very nice positional win by the current European Champion Alexander Motylev, who was also the second of Karjakin for many years. It is a very difficult job to combine your own chess career and having somebody for who you are working most of the time, but it seems like Motylev managed to find the right way.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 We are entering the main line of the Spanish opening. Motylev was probably happy not to see 3.. ♘f6 and another Berlin...

4.♙a4 ♘f6 5.O-O ♙e7 6.d3 In the last 5 years, the 6. d3 line got a lot of attention on the top level. The idea is simple, to save a tempo on playing Re1. Currently in the main line with 6.Re1 followed by c3 White is showing "nothing" against the Marshall (one of the main openings of Aronian for example) so to avoid going into deep analyses 6.d3 is a pretty good choice.

6...b5 [6...d6 is another possible way to go on here.]

7.♙b3 d6 Black is threatening to play Na5 now and to exchange the bishop on b3.

8.a3 is quite a new way of trying to achieve a slightly better position. [8.c3 8...O-O 9.♘bd2 ♘a5 10.♙c2 c5 was played in a lot of games, but I think Black should be doing fine here.; 8.a4 has been another main line for quite a while, but it looks like

here as well Black even has a few options which lead to a safe position. 8...b4 (8...♙d7 is also very safe.) 9.h3 O-O 10.♘bd2 ♙e6 and Black is perfectly fine.]

8...O-O 9.♘c3 This is White's idea, to quickly bring the knight to the d5 square.

9...♙g4 Black is threatening to play Nd4 next.

10.♙e3 There is no other good way of defending from Nd4.

10...♘d4 11.♙xd4 exd4 12.♘d5 This position is by far not new and has been analysed a lot lately because of the recent games from the Super Tournaments. At first sight it is hard to imagine White having any advantage, but things are more tricky. White has a better pawn structure and the general idea of playing f4 could theoretically be unpleasant for Black.

12...c5 a very logical move, Black is protecting the d4 pawn and he will also be able to play Be6 next.

13.a4! Very strong and deep play. Usually we can say "never play where you are weaker", but this time things are looking a bit different. White needs to have an extra threat of opening the a-file at any moment and the bishop on b3 is a very strong piece, holding everything together.

13...♙e6 14.♘xf6+! The next very important positional decision. White does not take the bishop on e7 after which

the position would be around equal, but he is planning a very long term plan where the white knight is going to be a better piece than Black's bishop.

14...♙xf6 15.♙xe6 fxe6 16.♚e2 The 16.Qe2 move is not really made for threatening e5, but more for connecting the rooks and be more flexible.

16...♚d7 17.b3 Of course White doesn't allow bxa4.

17...♚c7 I find this move a bit strange. [The main question for me is, does White get a real chance after 17...e5 followed by the simple b4 and then Rf7-Raf8. Of course White can be doing better with a maneuver like Nd2-Nc4 and somewhere try to break Black's position with the f4 push, but I still think that Black has excellent chances to keep the balance, although of course his position would be a bit passive.]

18.♖fe1 Motylev tries to force a decision of Black as to play e5 or not, to have a more clear situation in the center.

18...♙e5?! This move just can't be good. Black should not look for play on the kingside as it just helps White.

19.g3 A good move. White's main idea is still to play f4 at some point and now Nh4-Ng2 is an excellent plan to support it.

19...h6 20.♗h4 ♚f7 Black doesn't really seem to have a plan.

21.♗g2 Motylev is playing very safely. [I think it was time to play f4: 21.f4 21...♙f6 (21...g5? 22.fxe5 gxh4 23.♚g4+) 22.♗f3 and I think White's position is already a bit better.]

21...♙f6 is directed against the f4 move.

22.♖a2! A very nice move. By threatening Rea1 White is forcing Black to make a decision. To play b4 and close everything on the queenside, which would make things easy for White to focus on the play on the kingside, or the resign the a-file, which is always a very dangerous decision.

22...e5 Better later than never, but the white knight on g2 is now0 better placed than on f3 before.

23.♖ea1 So what to do now for Black, b4 or Rac8?

23...♖ac8?! I think this is already quite a serious positional mistake. To give up the only open file just can't be good. [23...b4 24.♖f1 With maybe a minimally better position for White because of the upcoming f4, but nothing too dramatic has happened. Black also has an easy plan with Rae8 and maybe d5 next, so I think there is nothing to worry about as Black.]

24.axb5 Of course White is taking control over the a-file.

24...axb5 25.♖a7 Smart play om Motylev. By exchanging a pair of rooks, White's combination of queen+knight is becoming stronger.

25...♖c7 Of course Black cannot let White dominate on the 7th rank.

26. ♖xc7 ♜xc7

27. ♘e1! A strong move! The white knight has nothing more to do on g2 and is getting into the game over the f3 square. Another idea of White could for example be to play h4-Nf3-Nh2-Ng4.

27... ♜c6 Very straightforward play for the d5 push, but does it bring anything good to Black?! [27... ♜d7 Not allowing White to play Qg4 on the spot. Black's position is worse, but still pretty safe.]

28. ♜g4 The white queen took a great spot on g4.

28... d5? It is clearly not Eljanov's day, who is pushing d5 in almost the worst possible moment. Now the white knight is going to be the hero on his perfect e4 square.

29. exd5 ♜xd5 30. ♘f3 Too easy to miss. The Nd2-Ne4 maneuver is almost deadly to Black. Queen+rook+knight is a very dangerous combination in the attack.

30... c4 Black tries to create at least some play on the queenside.

31. bxc4 bxc4 32. ♘d2 c3 Black's hope now is clear, to somehow reach a rook endgame where White's c2 pawn could be a possible weakness, but all this is not really realistic.

33. ♘e4 Motylev reached the maximum he could dream of. He has a position where his knight is clearly stronger than the black bishop, the rook is active on the open file, the queen has a great position on g4 and the white king is very safe. From a practical point of view, White's position could already be almost winning!

33... ♜b7 Stopping the white rook from entering the 7th rank.

34. ♙g2 ♙h8

35. h4 Typical and logical. White is not only preparing to play Kh2 and get out of the pin, but Qh5-g4-g5 could also be a dangerous break.

35... ♜a8 What else can Black do?!

36. ♜xa8+ ♜xa8 37. ♜f5 This move does not change anything, because Black just doesn't have any play at all. [37. ♜g6 could also have been played immediately.]

37... ♜d5 38. ♜g6 ♙d8 Black's position is so hopeless and White has a lot of different plans to improve.

39. ♜e8+ ♙h7 40. h5 Motylev decides to play for the total control of the white squares. Now the easy threat is to play Kh3-Kg4-Kf5 and the funny thing is that Black has no ways to even give a check.

40...♗g5

41.♔h3 ♚a2 Eljanov ends his suffering by making a fatal error, but I guess there was really no pleasure in suffering a slow death here anymore.

42.♘d6! Black cannot defend against Nf7 next. We just saw a great example and a deep strategical plan which Motylev started in the opening phase of the game and could fulfill in a perfect way, although of course with a bit of help of his opponent. A great game to learn understanding pawn structures and how dangerous things can become in case of resigning the only open file. **1-0**

**(2) Kamsky, Gata(2713)
- Akopian, Varuzhan(2643) [D00]**

ch-USA TB 2014(2),
2014.05.20

GM Arkadij Naiditsch
Best rating: 2737

This is the tiebreak for the US Championship final. Of course Kamsky was a clear favorite, especially knowing his excellent skills in playing important games where he can very often prove what excellent nerves he has and his great play in rapid chess. As usual Kamsky just tried to reach a solid position out of the opening, then slowly outplayed his opponent move by move and secured the US Championship title and a nice price money!

1.d4 d5 2.♗f4 Once again we see Kamsky playing his favourite 2.Bf4.

2...c6 Black is starting a very solid setup.

3.e3 ♗f5 Before playing e6, the bishop of course has to be developed to f5.

4.♘f3 White does not hurry with the moves of the c-pawn to keep the c4 move as an option.

4...e6 5.♗e2 ♗d6 Black continues playing the most safe moves.

6.♗g3 [In my opinion White has no advantage after 6.♗xd6 6...♚xd6 followed by Black's setup with Nf6-Nbd7-O-O and maybe e5 or c5 later.]

6...♘f6 7.♘bd2 [Maybe a try for White could be to include 7.♘h4 7...O-O! (After 7...♗g6 8.♘d2 White could gain some sort of a tempo.) 8.♘xf5 exf5 and I think Black is doing perfectly fine here because Ne4 is coming next.]

7...O-O 8.c4 White is gaining a bit of space and now we see why Kamsky was not in a hurry to play c3 before. Another very tricky thing is that White does not castle kingside to keep some attacking chances in mind in case Black played Bxg3.

8...♘e4! A strong and solid move! It is exactly the right way to play this kind of position. Black needs to exchange one pair of knights to be able to play Nd7-Nf6.

9.♖b3 White tries to avoid the Nd7 move.

9...♙xg3?! Not the most accurate move. [9...♘xg3 looks much more logical to me. 10.hxg3 and after the important 10...♖b6! I think the position is just equal.]

10.hxg3 ♘d7 Akobian correctly evaluates that the b7 pawn is not hanging.

11.♘xe4 [After 11.♖xb7 11...♖b8 12.♖xc6 ♖xb2 Black has great play for the pawn.]

11...♙xe4 12.O-O Good and solid play. In such a position White could be tempted to try some attack on the kingside, but usually it doesn't bring much. Black could be very fast with his counterplay in the center by playing c5, which would open the position and now already the white king on e1 would feel quite uncomfortable.

12...♖b8?! Akobian continues playing the most safe moves which slowly brings him into some little trouble. [12...c5 looked much more logical. White still cannot take the b7 pawn because of Rb8. 13.♖fd1 ♖b6 and I think that if White has some advantage, it should be minimal.]

13.♘d2 ♙g6 14.♖a3! Very strong positional play! White is not only attacking the a7 pawn, but also acting against Black's c5 move. We can already see that White has some advantage as he has more space.

14...a6 15.♖ac1 An immediate b4 could have been another option.

15...♖e8 16.b4 White is slowly taking over the space and preparing to have good play on the queenside.

16...♖e7 17.♖b2 dxc4?! Akobian again plays the most safe move, but his position is getting worse and worse... [Of course after 17...e5 18.cxd5 cxd5 19.♖c7 White would also be better because of the control over the c-file.; But I think that after the simple 17...♘f6 with the idea of playing Ne4 next and exchanging another pair of knights, Black's position is still very solid. If White tried to play c5 with the idea of a4-b5, Black always has the e5 move in mind.]

18. ♖xc4 e5 We can see similar motives with dxc4 and e5 in a lot of games in the Slav, but this time White is already better prepared and the position of the black bishop on g6 is not ideal, as the bishop belongs to the e6-f5 squares.

19. ♖fd1 exd4

20. ♖xd4 To control the d-file is one of the most important things for the evaluation of the position here.

20... ♖f6 21. ♖cd1 White's advantage is getting stronger. The d-file is under control and White's future idea could be in playing a4-b5. Even the exchange of one pair of rooks would not save Black from having an unpleasant position.

21... c5?! Black panics. [Black had to play 21... ♖ed8 and defend a bad position, but at least the exchange of a pair of rooks would make it a bit more possible.]

22. bxc5 ♖xc5 23. ♖d6! Kamsky evaluates the things right in the tactics and goes for the b7 pawn. As we can see, the black bishop on g7 is almost out of game!

23... ♖f8 [23... ♖e7 also lost a pawn too 24. ♖xa6!]

24. ♖xb7 Kamsky has no fear of the pin on the b-file and there are not many reasons to be afraid. White always has the Rb4 move just in case.

24... ♖a7 [White would have more technical problems after 24... ♖e5]

25. ♖b4 ♖e4 Black brings the bishop back into the game, but he is already a full pawn down.

26. ♖d6 ♖xb4

27. ♖xb4 Suddenly we can see that the game is almost over. The a6 pawn could be a theoretical target, the white knight on d6 is a fantastic piece and the black rook on f8 is still out of the game.

27... ♖d5 [27... ♖g6 28. ♖a5 and White should collect the a6 pawn soon.]

28. ♖f5! A strong move. White is not only threatening a small tactical blow, but also preparing a dangerous attack on the black king.

28... ♖e8 [After 28... ♖e6? White would be able to win with a small tactical motif: 29. ♖e7+ ♖h8 30. ♖g6+! hxg6 31. ♖xf8+ with a totally winning position.]

29. ♖f4 ♖e6? Akopian gives another pawn, after which the position becomes totally hopeless. [29... ♖b6 would be the only way to fight in a very bad position.]

30. ♖xg7! A small tactic which decides the game.

30... ♔xg7 31. ♕g5+ ♔f8 32. ♕xf6 I guess that in a standard game Akobian would just resign here, but in a rapid games theoreticly everything can happen, so Black makes a few more moves.

32... ♔g8 33. ♕g5+ 2 pawns up plus the attack make things too easy here...

33... ♔f8 34. ♕d3 And the greedy Kamsky collects the 3rd pawn. The h7 pawn can't be saved anymore.

34... a5 35. ♕xh7 Now it was really time to resign...

35... ♖c8 but Akobian continues his suffering.

36. ♕f5 ♕xf5 37. ♕xf5 3 pawns up and the attack!

37... ♕c5

38. ♖d8+ And only the win of the rook could stop Akobian from keeping this game going on. Of course it is a rapid game and Black did not play too well, but Kamsky showed us very nice positional play and how quickly things can turn in a peaceful looking position. **1-0**

(3) Jakovenko, Dmitry(2730) - Sutovsky, Emil(2642) [D71]

15th Karpov GM 2014(5.2),
2014.05.16

GM Csaba Balogh
Best rating: 2672

We are going to examine a fine positional win by Jakovenko in the style of Karpov from his best period.

1.d4 ♘f6 **2.c4** g6 Sutovsky is a Gruenfeld expert and Jakovenko goes for the g3 system.

3.g3 ♙g7 **4.♙g2** d5 Black has many options here. The one played in the game is mostly in the spirit of the Gruenfeld, Black opens the position and gives his opponent the opportunity to occupy the center, but he is intending to put it under pressure with his minor pieces.

5.cxd5 ♘xd5 **6.♘f3** ♘b6 **7.♘c3** ♘c6 **8.e3** O-O **9.O-O** This is considered to be the initial position of this variation. Black's main option by far is Re8 (a preparation to the e5 break in the center). GM Le Quang Liem recently tried the move that happened in the game and Sutovsky decided to repeat it...

9...a5 This move is typical in the 9... Re8 system as well. Black takes some ground on the queenside with a5-a4.

10.♙e2! I guess this is the right move. Actually the same continuation as White recently plays against the 9...Re8 line. White wants to strengthen his center with Rd1, preparing for a central offensive with d5-e4. [Giri has prevented the the a5-a4 idea with the direct 10.b3 but this allows Black to execute the central break 10...e5! with the idea of 11.d5 e4! showing us the drawback of the weakening of the long diagonal.]

10...♙e6 This move is also known from the 9...Re8 line. Black tries to confuse the arrangement of the white pieces with the threat of Bc4. [On 10...a4 White could follow his plan with 11.♖d1 with the d5-e4 idea.]

11.♘d2! The most direct way to prevent the threat and White keeps in mind the idea of transferring one of his knights to c5 through the e4 square. [11.b3 would allow 11...a4!; 11.♖d1 is now met by 11...♙c4 and the queen has no good square to leave. Qc2 and Qe1 move into Nb4, while Qd2 is clearly not the place where the queen should stay. Black could simply continue with a4.]

11...a4 **12.♖d1!** A deep multifunctional move. White creates the x-ray on the d-file to sometimes threaten with d5. He also leaves from the Bc4 move to prepare the Nde4-c5 plan.

12...♖a5 Another standard plan by Black to control the d5 square. [12...♙d7 would have moved into 13.♘de4 and Nc5

tempo.; There is no time for 12...♔c8? and Rd8, because of 13.d5 That is why Black plays Ra5...]

13.♖b1! Another subtle plan. Jakovenko makes use of the placement of the a5 rook and he wants to solve the pressure on the queenside by playing b4, which would be a huge achievement for White, while if Black takes it then Nxb3 comes with tempo and then it jumps to c5 with another tempo.

13...♟f5 Trying to confuse the pieces by forcing one of the knight to the pin, but Jakovenko continues the game in style...

14.b4!! After this excellent intermediate move, White gets a serious positional advantage!

14...axb3 [14...♟xb1? 15.bxa5+- drops a piece.; 14...♖a8 15.♟de4± followed by b5 and Ba3 and later Rbc1 Nc5, with excellent prospects for White. In this case the a5-a4 plan would just create a weakness, it was more principled to take on b3.]

15.♟xb3 ♟xb1 [Another positive point of the excellent placement of the knight on b3 is that the pawn on d4 is well protected and in case of 15...♖a8 White can occupy the center with 16.e4! ♟d7 17.♟e3± again with a clear positional advantage. It is clear that Black is unable to create any pressure on the center now, therefore his entire strategy fails.]

16.♟xa5 ♟xa5 17.♟xb1 White claims a clear edge now. He gained the bishop pair and he still has a strong center. The undermining strategy of e5 is not the same anymore as it opens the position for the two bishops. White has clearly won the opening battle and Black is forced to defend passively...

17...♔a8 18.♟a3! The bishops start to work.

18...♖e8 19.♖c1! Small, but very strong moves. White improves his pieces with each move. He also takes under control the c4 square to avoid knight jumps and additionally attacks the c7 pawn.

19...c6 There was nothing better, but now the a5 knight is kind of trapped, it has no way back to its camp. Jakovenko continues his subtle play based on the new target on a5!

20.♟c5! A very unpleasant move! The knight has no good square to leave from b6.

20...♔d8 [20...♟d5 moves into 21.e4 with tempo.; 20...♟d7 21.♟b4! with the threat of Qd2, as Black has no Nc4 anymore with the knight on d7.]

21.♟b4! The play against the a5 knight has started, Black must try to find different kind of tactical ideas to save it from the direct loss.

21...♘d5 22.♙e1 [White could have already won a pawn with 22.♙xd5 22...cxd5 23.♚b5 ♘c6 24.♚xb7 ♘xb4 25.♚xb4± with a big advantage, but Jakovenko decided to keep the tension, as Black suffers even more with his knight on a5.]

22...♚b6 Black wants to strengthen his knight with the rook from a8. [On 22...e6 White can win a pawn with 23.♚c5 b6 24.♙xa5! bxa5 25.♚xc6± White has an extra pawn and a better position.]

23.♘c3 [23.♘a3 was probably even stronger with the idea 23...♚a8 24.♚c5!± and it is not easy to prevent the threat of Rxa5 Rxa5 Nc4!]

23...♘xc3 [The only move was 23...e6 but White has a big advantage anyway after 24.♘e4 (Or 24.♚c2 with the idea of Rb1.)]

24.♚xc3 Now the trouble around the a5 knight is even bigger. There are already direct threats to trap it with Rc5 or Ra3 and on Ra8 Qd2 and the knight falls.

24...♚b1 [Black could have tried a last desperate attempt to get some counterplay with 24...e5 25.♚a3 exd4 26.♚xa5 dxe3 but after 27.♚a3 exf2+ 28.♙xf2!+- there are only two pawns for the bishop, which is clearly not enough.]

25.♚d2! One more eye on the a5 knight. The threat is Rc1, winning the piece.

25...♚a8 [25...b6 weakens all the pawns on the queenside. White wins after 26.♚c1 ♚b5 27.♙f1 ♚d5 28.♚b4+- all pawns are hanging.]

26.♚c1! ♚b5 [26...♚b6 27.♚c5+- is also over.]

27.♚c5 ♘c4 28.♚c1! and Black resigned in view of losing the knight. A perfect game by Jakovenko. We can mention that he passed the half of the board just a few times, but his manoeuvres and deep positional threats were so strong in his own camp that it led to the quick collapse of Black. **1-0**

(4) Jakovenko, Dmitry(2730) - Saric, Ivan(2666) [D78]

Poikovsky RUS(7.2),
2014.05.18

GM Csaba Balogh
Best rating: 2672

And here comes another positional masterpiece by Jakovenko...

1.d4 **f6** **2.c4** **g6** **3.g3** The g3 system again, but this time his opponent goes for the most solid c6-d5 setup.

3...c6 **4.** **g2** **d5** **5.** **f3** **g7** **6.O-O** We have reached the initial position of this variation, where White has a very wide range of choices...

6...O-O

7. **b3** With the idea to develop the knight to c3, which was not so good immediately because Black could have taken on c4 and it was not easy to win the pawn back.

7... b6 The standard reaction to Qb3. Neither side wants to take the other queen, because it would just improve the opponent's pawn formation and open the a-file. Black covers the b7 pawn and frees his c8 bishop to develop.

8. **c3** **d8** Black strengthens his d5 pawn. The alternative 8...Bf5 has also been played in many games.

9. **d1** **a6?** A positional blunder. [9... f5 happened in the previous games and it is the right way to continue.]

10. **xb6!** White releases the tension for concrete reasons. He is able to create favorable changes on the pawn structure. [10.cxd5 is premature in view of 10... xb3 (10...cxd5 11. xb6 axb6 would be what White is aiming for, when the doubled b-pawns are separated and weak.) 11.axb3 xd5 12. xd5 xd5 Black is fine.]

10...axb6 **11.** **a4!** This is the only this way White can force his opponent to recapture on d5 with the pawn. Without this move, the trade of the queens would just have helped Black. [On 11.cxd5 11... xd5 12. xd5 xd5 and b5 next, with a perfect game for Black.]

11... d7 There was no other way to protect the b6 pawn, but now... [The black knight gets trapped after 11... b4 12. xb6 xa2 13. xa2 xa2 14. d2± and Ra1 next.]

12.cxd5! **cx****d5** White achieved what he wanted. He got the structure with the separated doubled b-pawns. It is instructive to follow how Jakovenko converts this advantage into a full point.

13. ♖f4 The most active square for the bishop, keeping an eye on the c7 square.

13...e6 14. ♘c3 [14.a3! was also strong to prevent any kind of counterplay along the a-file connected with Nb4. It is important that Black cannot get rid of his doubled pawns by playing 14...b5? 15. ♘c3 b4 because the knight is pinned. 16.axb4]

14... ♖f6 15. ♘a4! Admitting the mistake. White forces the knight back to d7 to avoid the development of the c8 bishop.

15... ♖d7 16. ♖e5 In the game it works perfectly and White has an edge in all the lines, but I would still prefer the a3 move, mentioned in the 14th move. Jakovenko tries to deflect the defender of the b6 pawn, while if he takes on e5 with the bishop, the dark squares are becoming extremely weak...

16... ♗xe5 [16... ♖xe5? was refuted by the intermediate move 17. ♘xb6!+-; However 16... ♖ac5! could have solved Black's biggest problems. 17. ♖xd7 (On 17. ♖c3 17... ♖xe5 works already.; 17. ♘xb6 17... ♘xb6 18.dxc5 ♖a4 is also fine for Black.) 17... ♖xa4

18. ♘xb6! ♘xb6 19. ♖c7 This was probably in Jakovenko's mind when he played 16.Ne5. White indeed wins a pawn,

but Black gets strong compensation after 19... ♖d7! 20. ♖xb6 ♖dc8 with active pieces. Black wants to invade the 2nd rank. 21. ♖c5 can be met by (21. ♖d2 21... ♖f8! and Bb4 next, sending the rook away and then the rook goes to c2.) 21...b6! 22. ♖xb6 ♖cb8 23. ♖c5 ♖xb2 and Black equalized.]

17.dxe5 The doubled e-pawns are rather strong this time. The one on e5 squeezes Black and makes all the dark squares weak and the f4 bishop can use that. Another very important fact is that White is ready to push e4, undermining the d5 pawn, getting rid of the doubled pawn and opening the diagonal of the g2 bishop. Black has still problems with developing the c8 bishop.

17... ♖b4 [17... ♖ac5 is also met by 18. ♖c3!± keeping the structure.]

18. ♖c3 ♖g7 Black would like to release the tension on the dark squares by pushing his pawn to h6 (to prevent the Bg5 ideas). [18... ♖c6 would have been met by 19. ♖g5! ♖f8 20.f4 and e4 comes next, with an undisputed advantage, but it was still better than the game for Black.]

19.e4! The opening of the position would mean the end for Black. He must try to find some tactical ideas to stay alive...

19...d4 [19...c5 could have been met by 20.g5 e8 21.f6+ g8 22.a3 b3 23.ab1+- after parrying the concrete threats the d5 pawn falls and the game is over.]

20.b5 [Of course not 20.xd4? 20...c2]

20...c5 [20...d3 does not change much. 21.a3 c2 22.ac1 The days of the d3 pawn are counted... 22...c5 drops a piece to 23.xc2! dxc2 24.xd8+-]

21.xd4 [21.g5!? 21...d7 22.d6 was also about to be winning.]

21...xd4 [Perhaps 21...bd3 was a better practical chance, although White is much better after 22.e3 with the idea that both Nxb2 and Nxe5 run into Nf5 and an exchange drops. 22...d7 (22...d7!? Maybe Black should have played some ugly move like this, but it cannot end well for him...) 23.g5 Finally Black could develop his bishop, but now the d4 knight is not hanging anymore, therefore White drives his bishop to f6. 23...dc8 24.f6+ g8 25.b3±]

22.xd4 c2 23.ad1 xd4 24.xd4 xa2 The situation has clarified. White still preserves his big advantage because

the doubled b-pawns are still on the board, the c8 bishop is still poor and kind of trapped and the threats around the dark squares with Bg5-f6 are even more dangerous because the position is more opened. But the next move is very important!

25.h4! Opening the back rank is more important than the b2 pawn! [25.b4 was wrong in view of 25...a1+ 26.f1 d7! and Black is back in the game.]

25...d7 [25...xb2 was refuted by 26.d8 d7 27.g5! The black king gets into a mate net. For instance after 27...c6 28.f6+ g6 29.g4 xe4 30.f3 g5 is coming with mate: 30...xf6 (30...g5 31.xe4 xe4 32.hxg5+ g6 33.g8#) 31.g5+ g7 32.exf6#]

26.c4! a1+ [26...c5 already runs into 27.b4!+-]

27.h2 a8 All black pieces are paralyzed.

28.c7 [28.b4 was also very thematic in order to take the c5 square under control, the last place where the knight could have jumped out to and now all three black pieces are in a cage. 28...h6 29.c7+- with Bf1-b5 next.]

28...h6

29.♙f1! Jakovenko transfers his bishop to b5 to further paralyze the black pieces. Black soon gets into zugzwang.

29...♘c5 30.♙b5 ♘a6 [30...♘xe4 was refuted by 31.♙e8!+- The black king gets into a mate net again. There is no way out from it with such poor pieces.]

31.♞e7 ♘c5 Black succeeded to prevent the Be8 threat, because now it runs into Kf8!

32.♞c7 White repeats twice to get closer to the time control.

32...♘a6 33.♞e7 ♘c5 34.♙e3! ♞a5 [34...♘xe4 loses to the subtle 35.♞c7!+- refreshing the threat of Be8, which Black cannot parry.; 34...♙d7 does not help either. 35.♞xd7! (35.♙xd7 is less clear because of 35...♙f8! 36.♞e8+ ♞xe8 37.♙xh6+ ♙e7 38.♙xe8 ♙xe8 39.♙e3 ♘xe4 40.♙xb6 White still has decent winning chances, but compared to what Black had before, things are already unclear. 40...♘d2) 35...♘xd7 36.♙xd7+- with a technical win.]

35.b4! Jakovenko finds the winning simplification.

35...♞xb5 36.bxc5 bxc5 [36...♞a5 37.♞c7 ♞a8 38.cxb6+- is a real zugzwang, the white king marches around and goes to d8. Black can only watch...]

37.♞c7 Finally the bishop fulfills its destiny. It is lost and the game is over. Black prolongs the game with some moves...

37...b6 38.♞xc8 ♞b4 39.♞b8 ♞b5 40.♙g2 ♞b4 The timetrouble is over. White is just a piece up for nothing. All moves are winning, Jakovenko decides to catch the black king in the corner...

41.♞b7 ♞b5 42.f4 ♙g8 43.h5 gxh5 44.♙f3 ♞b3 45.f5 b5 46.f6 h4 47.gxh4 b4 48.♞b8+ ♙h7 49.♞f8 ♙g6 50.♞h8 Black finally resigned the hopeless struggle. **1-0**

(15) Almasi, Zoltan(2693)
- Ivanchuk, Vassily(2753)

Capablanca memorial,
2014.05.16

GM Csaba Balogh
Best rating: 2672

Black has reached an endgame with an extra pawn, but the passed pawn on b4 gives White excellent drawing chances.

44. ♖f3 f5 Black tries to fortify his knight on e4 to avoid losing the c3 pawn, but this allows further exchange of some pawns and White gets closer to the draw. [44... ♖d6 could have been met by 45. ♖e3 ♖f8 46. ♖d4 ♖e7 47. ♖d3 and the pawn is lost. Black could only avoid this by keeping his knight on e4.]

45. ♖f4 ♖f7 Black gets into the square of the b-pawn. [45... g6 46. g4 is similar to the game.]

46. g4 White wants to restore the material balance, but this allows Black to maintain some practical chances. [46. ♖xf5 46... ♖xg3+ 47. ♖f4 ♖h5+ 48. ♖e4 was an even simpler draw. Kd3 comes next.]

46... ♖d6! Ivanchuk finds his chance. A pair of pawns gets off the board and White ends up with a weak h-pawn.

47. gxf5 [47. ♖e5? would have been a blunder because of 47... fxg4 48. ♖xd6 g3]

47... ♖f6 White has a wide range of choices here and it is easy to go wrong. However Almasi finds the most precise way to hold the draw. He trades his kingside pawns for the one on c3...

48. ♖e3 [Other moves, for instance 48. h5 48... ♖xf5 49. b5 are not so clear anymore. 49... ♖d6 50. b6 ♖e6 Black quickly runs to catch the b-pawn and the one on h5 is still weak. White already has some problems. 51. ♖e3 ♖c4+ 52. ♖d3 ♖xb6 and Nd5-f6 next.]

48... ♖xf5! This small tactical trick allows Black to continue his pressing for the win.

49. ♖d5+ ♖e6 50. ♖xc3 ♖xh4 The idea behind going for this simplification is clear. White wants to lure the black king or the knight with his b-pawn and at the same time get between the black pawns with the king and sacrifice his knight for them.

51.b5 ♖f5 [51...♔d6 does not change much, White achieves what he wants after 52.♗e4+ ♔d5 53.b6 ♔c6 54.♕g4 ♗g6 (54...♗g2 55.♕f5= and Kg6 next.) 55.b7 ♔xb7 56.♗c5+ ♔c6 57.♗e6=]

52.b6 ♗d6 The last task for White is to attack the pawns with the knight.

53.♗e4 ♔d5 The pawn endgame is winning for Black, but White is not forced to trade knights. [53...♗b7 54.♗g3 ♔f7 Black could save his pawns like this, but without his knight he cannot make progress. White simply waits with his pieces on the kingside. 55.♕g4 g6 56.♗e2 ♔f6 57.♗f4= Black has no chance to win, the knight is always ready to get sacrificed.; Of course not 53...♗xe4?? 54.b7+—]

54.♗g3 g6 [54...♔c6 leads to a draw after 55.♔e5!= when the knight loses its outpost on d6, White will be able to play Nf5!]

55.♗e4 ♔c6 56.♗f6 ♔xb6 Black finally won the pawn, but his king is too far away from the kingside and White is able to catch the pawns...

57.♗g8 [And the draw was agreed in view of 57.♗g8 57...♗f7 (57...h5 58.♗e7=) 58.♗xh6! ♗xh6 59.♕g5= We can see that in such endgames there is no real chance to win and White even had several ways to hold. It is very important to study such practical endgames to be able to make the right decisions in our own games. If we are on the stronger side, we should not simplify to such endgames, while if we are defending a difficult position, we might aim for such endgame with a pawn down to hold the game easily.] **1/2-1/2**

**(16) Krush, Irina(2489)
- Abrahامyan, Tatev(2366)**

ch-USA TB w 2014(1),
2014.05.20

GM Arkadij Naiditsch
Best rating: 2737

We are in the final rapid tiebreak game match for the US Championship. Krush is of course a big favourite, but sometimes it is just a matter of better nerves to decide the winner. In this rapid game, the evaluation of the position had changed a lot of times, until Krush managed to reach a totally winning rook endgame, but suddenly things got out of control and this 4 rooks endgame appeared. Does Black have any drawing chances here?

66. ♖c6! A good move. At first sight it is not that clear where the white king is going, but Krush found the best hiding spot for her king.

66... ♜f6+ It is difficult to advice anything better to Black.

67. ♖b7 ♜xg4 White is just a pawn up and as we know rook endgames have a tendency of ending in a draw. On the other hand, the white king supports the movement of the a-pawn

while his colleague on h8 is very far away from the action. In case of a rook exchange White should be totally winning.

68. ♔a8!! This move ends the game! Black cannot defend against White's Rb8 and the exchange of one pair of rooks. It is a bit funny that the white king needed to reach the a8 square to finally decide the game in Krush's favour.

68... ♚g8 The black king is trying to come closer, but it is too late.

69. a5 The Rb8 move is not going to run away.

69... ♜a4 70. a6 Once again there is no reason to hurry with Rb8.

70... ♜f8+ 71. ♜b8 ♜b4 This move makes things easy. [A more difficult win for White would have occurred after 71... ♜xb8+ 72. ♚xb8 ♚f8 Black is trying to keep the rook active on a4 and at the same time to get his king as close as possible to the a-pawn.

73. ♜a8! An excellent move. White has the double idea of playing Kb7 check and maybe at some good moment a7 as well. 73... ♚e7 (73... ♚g7 didn't help as after 74. ♔a7 followed by Rb8-Rb6 and Kb7-a7 White is winning.) 74. ♔c7 ♜a2 and now 75.a7! and Black is losing the game.]

72. ♜b7! The last exact move which was needed.

72...♖a4 73.♖xf8+ ♔xf8

74.a7 Now White just wants to play Kb8 next and Black has no defence against it.

74...♔e8 75.♔b8 ♔d8 76.a8=♚ A really funny rook endgame where the black king was just a bit too far away to save the game. **1-0**

Clash of the Titans

GM Kamil Miton
Best rating: 2655

1.d4 ♖f6 **2.c4** c6 **3.♗c3** d5 **4.cxd5** cxd5 We have the Slav Exchange Variation.

5.♗f3 [5.♗f4 This move order gives White the possibility to create pressure on the queenside a bit faster. The knight can also be developed to e2.]

5...♗c6 **6.♗f4**

6...e6 After this move the bishop will be a bit passive. Nowadays more solid are moves like [6...♗f5 or; 6...a6]

7.e3 ♗e7 [7...♗h5 The idea of exchanging the bishop can be used immediately. 8.♗g5 ♖b6 9.a3 With the trap that is not possible take on b2 because of Na4. (9.♖b1 doesn't help because of 9...h6 10.♗h4 g5 11.♗d2 ♗g7 12.♗g3 ♗f5∞) 9...h6

10.♗h4 g5 11.♗g3 ♗xg3 12.hxg3 ♗g7 Black has a good game, soon he will be play g4 and then open the position after e5.]

8.♗d3 [8.h3 with the idea to save the bishop after Nh5.]

8...O-O **9.O-O**

9...♗h5! This idea to exchange the bishop looks good for Black.

10.♗e5 f5 [10...f6?? 11.♗g5! g6 12.♗xh7+–; 10...♗xe5 11.dxe5 (11.♗xe5 11...♗f6 12.♖c1 ♗d7 White can try to create an attack after f4-Rf3-Rh3 but Black's position is very solid anyway.) 11...g6 The black knight is temporarily out of the game but on the other hand without the dark squared bishop White is not able to create some serious threats.]

11.♖c1 ♗f6 **12.♗xf6** [12.h3 forces Black to exchange. 12...♗xe5 13.♗xe5 ♗d7 14.♗f3 a6 with the idea b5-Bb7.]

12...gxf6 Black takes control of the e5 square. [12...♗xf6 13.♗a4 (13.♗b5 The idea to take control of the e5 square is too slow. 13...♗d7 14.♗xc6 ♗xc6 15.♗e2 ♗b5=) 13...♖d6 14.♗b5 ♗e7 15.♖b3 White is slightly better.]

13.♗h4 ♖h8 **14.f4** ♖g8 **15.♖f3** This is probably not the best plan. White should have played on the queenside.

15...♙d7 16.♖h3

16...♙e8 is a bit risky because it gives White possibilities to sacrifice on f5. [16...♙d6 was an interesting idea to put the knight on e7 to protect the d5-f5 pawns in order to avoid sacrifices. 17.♘xd5?! exd5 18.♘xf5 ♙xf5 19.♙xf5 ♖g7 20.♙h5 ♙g8=+]

17.a3 [17.♘xf5 17...exf5 18.♙xf5 ♙g6 19.♙e6 ♖g7 20.♙xd5

20...♘b4! Black gets counterplay. If White now plays 21.♙c4? then Black has 21...♙c8! with a double attack against the bishop and the rook as well, because of Qxh3 and Bc2 next.]

17...♖g7 18.♖g3 There was nothing to do for the rook on h3 anymore.

18...♖xg3 19.hxg3 ♖c8

20.♙f2 White missed the chance to get the initiative after [20.g4! Now comes a very forced line: 20...fxg4 21.♙xg4 f5 22.♘xf5 exf5 23.♙xf5 ♖c7 24.♙e6 ♙d7 25.♘xd5 ♙xe6 26.♙xe6 ♘xd4! 27.♙e5+ ♙f6 28.♙xc7 ♘e2+ 29.♙f1 ♘xc1 30.♙xb7 and it looks like White has the more active pieces and too many pawns.]

20...♘a5 [20...♖c7 was more accurate to avoid g4 ideas because compared to the previous line the rook on c8 will not be hanging.]

21.♙f3?! [21. g4 was more aggressive, White has no time to put the rook on h1 first as Black is on time with his counterplay on the queenside.]

21...♟c4 [21...♟xa3 22.♞h1! An interesting idea. White gives the pawns but wins some tempi by creating pressure. (22.bxa3 22...♟b3 23.♞c2 ♟a1 24.♞c1=) 22...♟xb2 23.♟d1 ♟a3 24.g4→]

22.♞e2 It looks like the Cuban grandmaster is not strict in his plans Black already has a good position.

22...♟d6 23.♞h1 ♟e4+!? 24.♟xe4 fxe4 [24...dxe4 25.g4 fxg4 26.♞xg4 f5 27.♟xf5 exf5 28.♞xf5 ♟g6 29.♞xg6 ♟h4+ 30.♞xh4 ♞xh4+ 31.♞g3 ♞h5 With unclear play.]

25.♞g4

25...f5? [25...♟f7 26.♟g6+ (26.f5 26...exf5 27.♟xf5 ♟f8∞) 26...♟xg6 27.♞xg6 ♞g8 28.♞xg8+ ♟xg8 With equal play. White is not in time to destroy the structure because after 29.f5 Black has 29...♟xa3!; 25...♟xa3]

26.♟xf5! exf5 27.♞xf5 h5 28.g4↑ White has two pawns for the piece and pressure against the weak black king. [28.♟xd5 28...♞c2+ 29.♟g1 ♞d6 is an important move to prevent Qe5, with unclear play.]

28...♞c6 29.g5 [29.♟xd5!?]

29...♟g8 looks logical to escape from the h-file, but White could play g4 anyway.

30.♟xd5?! [30.g4!→]

30...♟f7 31.♟xe7+ [31.♟c3 31...♞b6 White lost many tempi to win the d5 pawn, which is why Black gets counterplay now: 32.♟xe4 ♞c2+→]

31...♞xe7 32.g4 hxg4? is a mistake. Black should not have given White the possibility to attack over the h-file. A better move was [32...♞c2+ 33.♟g3 ♞e2 34.g6

34...h4+! A very important move. (34...♞xe3+ 35.♟f2 ♞f3+ 36.♟g2 ♟e8 37.♞xh5 ♞g7 38.♞d5+ ♟f8 39.♞f5+ ♟g8 40.♞e6+ ♟f8 41.♞h7+→) 35.♞xh4 ♞xe3+ 36.♟g2 ♞e2+ 37.♟f1 ♞e1+!=]

33.♞h7+ ♟f8 34.♞h6 ♟g8 [34...♞xh6 35.♞xh6+ ♟g8 36.g6 ♟e6 with the hope to stop the f5-d5 moves but now comes 37.g7!+→]

35.♞f5+ ♟g7 [35...♞f7 Now White can win another pawn or play 36.♞e5 The queen is very active here and White is not in a hurry with winning the black pawns to avoid counterplay over the light squares.]

36. ♖xc6 bxc6

37. ♔g3 [37. ♖xg4 37... ♖b7 Black is looking for counterplay. 38. b4 ♖b5 39. ♖h5 ♖d3 40. ♖h6+ ♔f7 41. ♖f6+ ♔e8 42. ♖xc6+ ♔f8 43. ♖c1 ♕c4 44. ♖e1 and the white pawns should advance soon.]

37... ♖e6? The decisive mistake. The only one chance was to keep the queens on the board, for example by playing [37... ♕d5 38. ♖xg4 ♖b7⇐]

38. ♖xg4 ♖xf5+ 39. ♖xf5+- Now White is easily winning.

39... ♕d5 40. b4 a6 41. ♖g4 [41. ♖e5 41... ♖g6 42. a4]

41... ♕c4 42. f5 ♕b3 43. ♖f4 ♕c2 44. ♖e5 ♖f7 45. a4 ♖g7 [45... ♕xa4 46. ♖xe4+- And the b4 pawn holds both black pawns!]

46. d5! ♕xa4 47. d6 c5 48. bxc5 ♕c6 49. ♖e6 a5 50. f6+ 1-0

Editorial Preface

The Asian team championship was dominated by China one more time in both sections, men and women. We of course have to add that almost none of the teams were represented by the country's best players.

Clearly the event of the week is the French team championship, with a lot of top chess players participating in it like Vachier Lagrave, Jakovenko, Fressinet, Riazantsev, Navara, Van Wely and many more.

As usual, the team of Clichy seems to be unstoppable and has a perfect score of 6 wins in 6 games, beating their strongest rival, the team of Bischwiller, with the great score of 6-2. It is hard to imagine now that anybody could take the title away from them.

A strong open in Hungary, Zalakaros, is also under way. The fight for the first places is still on, with top seated players like Rapport, Berkes, Beliavsky, Erdos and many other grandmasters.

That's all for this week! We can already be very excited for next week, when the super tournament in Norway is going to begin, including Carlsen himself fighting for the victory in his home country.

Enjoy this issue with the most exciting games from the World's best chessplayers!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Sasikiran, Krishnan(2669)
- Yu, Yangyi(2675) [E12]

Asian Nations Cup 2014(5.2),
2014.05.25

GM Csaba Balogh
Best rating: 2672

A very convincing positional victory, with which India beat China in the Asian Nations Cup.

1.d4 f6 2.c4 e6 3.f3 b6 4.a3 The a3 system of the Queen's Indian is a bit out of fashion nowadays, but of course it is still a very serious opening. White wants to develop his knight to c3 and prevent Bb4. The main line is 4...Bb7 5.Nc3 d5, but Black has an alternative as well.

4...f6 Just like against the 4.g3 system, Black has this option to create some discordination between the white pieces by attacking the c4 pawn.

5.f3 This is a main line in the 4.g3 system and a sideline here. Black reacts with the same move as in the other line, but there will be differences. [5.f3 c2 5...f6 6.f3 c3 c5 is the main line and here we can see the point of 4...Ba6, that the queen does not support the thematic d5 push anymore, which can be taken twice now.]

5...c6? A concrete move to threaten with Na5, but at this moment it looks rather dubious to develop a piece in front of a pawn. [Black had many other options, for instance 5...c5 6.d5 exd5 7.cxd5 d6 followed by g6, Bg7 with a playable position for both sides.]

6.f2! This is the first big difference. White is going to occupy the center with e4! The same move is senseless in the 4.g3 line, because Black has Nb4 with tempo and the queen has to go back to b3...

6...a5 Here comes the second difference. In the 4.g3 system the bishop is supposed to develop to g2, but here it has a more natural destination.

7.e4! White has created a beautiful center and he develops his bishop to d3. It is be clear now that Black has completely misplayed the opening with this dubious Nc6-a5 maneuver...

7...f7 [7...d5 would be thematic, but here comes a third point why the a3 pawn is better than the g3. White wins a piece after 8.b4! fxc4 9.f4 a4++ and the bishop falls on a6.]

8.c3 c5 9.d5 It is difficult to dream about more in this opening from White's point of view. He gained a nice space advantage, the a5 knight is poorly placed and b4 is always hanging in the air to trap it. The bishop has spent 2 tempi to reach the b7 square, but it would stand better on its initial c8 square.

9...exd5 10.exd5

10...♙e7 Another sad necessity, but Black could not develop his bishop to the more active long diagonal, because after d6 or after reaching the g7 square, White wins the knight with b4. The bishop is obliged to control the b4 square.

11.♙d3 ♙a6 Black desperately looks for a way to improve the situation of his a5 knight.

12.b3 O-O 13.O-O ♘b7 The knight goes to d6, but it is not clear if it will be any better placed there than it was on a5. Black has no chance to open the queenside with b5 and the bishop on a6 remains dead. Sasikiran continues the game with the most natural developing moves...

14.♖e1 ♘d6 15.♙f4 ♖e8 16.h3 A useful move to open the back rank and to secure the bishop's position on the h2-b8 diagonal.

16...♙f8

17.♙e5! I like this move a lot as it follows the principles that in a position with space advantage, the stronger side should avoid trading pieces. White would have a clear edge also after trading a pair of rooks, but why allow Black to ease his position.

17...g6 18.♖e3! Bringing the last inactive piece to the game, the a1 rook also joins to the battle. Black cannot even make an active move like Bh6, because the knight is hanging on d6. He is forced to continue his artificial maneuvers, but his position is getting worse and worse with each move.

18...♘h5 19.♖ae1 ♘g7 Black would like to jump out from the squeezing with Ndf5 and d6, but with his next move Sasikiran deprives his opponent even from this possibility...

20.g4! ♙b7 Well...The move makes no sense, but it is hard to suggest anything better. As the saying goes, in a bad position all moves are bad...

21.♙d2 Sasikiran is eyeing the h6 square with his queen, in connection with some Ng5 mating ideas.

21...a6 22.a4! The counterplay on the queenside was neutralized in one move.

22...f5 Kind of suicide, but the game was already over from a positional point of view. [22...b5 was just dropping a pawn

after 23.cxb5 axb5 24.♖xb5 ♖xb5 25.♗xb5+- Black has no compensation.]

23.♗xd6! Sasikiran finds the direct refutation of Black's active attempt to break out. The move is only justified by concrete reasons, otherwise White would never have given up his strong bishop...

23...♖xe3 [23...♗xd6 loses to 24.♖xe8+ ♖xe8 25.gxf5 gxf5 26.♗xf5+- White is a pawn up and continues attacking with Ne4 and Qh6...]

24.♖xe3 ♗xd6 25.♖h6! This is the point! The threat of Ng5 is decisive.

25...♗e7 26.gxf5! White opens the lines in front of the king.

26...♗xf5 [On 26...gxf5 the prettiest and strongest move is 27.♗e4! to refresh the Ng5 threat and on 27...fxe4 28.♗xe4+- Black gets mated very soon.]

27.♗xf5 gxf5

28.♖h1! The most effective move again. The end is near...

28...♗f6 [Black did not want to allow the following nice finish of the game: 28...♖f8 29.♖g1+ ♖h8 30.♗e5! and Ng6 wins next move! 30...♖xh6 31.♗f7#]

29.♖g1+ ♖h8 30.♗h4! [Black resigned. 30.♗h4 Ng6 cannot be parried. 30...♗xh4 31.♖g7# A very nice and easy game, which all happened due to one unfortunate plan in the opening with Nc6-a5.] **1-0**

(2) Sokolov, Ivan(2650)
- Navara, David(2708) [D14]

Saint-Quentin FRA(1.1),
2014.05.24

GM Csaba Balogh
Best rating: 2672

A tense and entertaining battle with many nice tactical shots.

1.d4 d5 2.♘f3 ♘f6 3.c4 c6 4.cxd5 The exchange Slav used to be a coward opening in the past, where the weaker players tried to force a draw, but nowadays, thanks to the research of some top players it can also be used as a very sharp weapon.

4...cxd5 5.♘c3 ♘c6 6.♙f4 ♙f5 Things have developed symmetrically so far and this is the moment where White has the chance to break it with the following move.

7.♙b3 [7.e3 7...e6 is considered to be the drawish line. Bd3, Qb3, Bb5; all moves are leading to draws.]

7...♘a5 8.♙a4+ ♙d7 9.♙c2 After forcing back the bishop, the queen occupies its diagonal. Many games have been played recently in this position, even on the highest level. Navara goes for one of the most critical lines.

9...e6 10.e3 ♙e7 11.♙d3 ♘c6 The knights at the edge of the

board are never good and the move also prepares for the upcoming maneuver... White has to prevent the positional threat of grabbing the strong bishop with Nb4.

12.a3 [12.♙e2 is the alternative with the idea to have Bb1 on Nb4, followed by sending back the knight with a3. Black plays the same moves as it happens also in the game here.]

12...♘h5! The knights are jumping to get one of the bishops. The next move is very important for White too and it is also known from many different openings.

13.♙e5! White is ready to give up his bishop, but only at the cost of a weakening with f6 or after Nxe5 dxe5 the other knight on h5 remains completely misplaced at the edge of the board. [13.♙g3 could be met by 13...♘xg3 14.hxg3 g6 without having forced the f6 weakening, Black just gets a perfect structure.]

13...f6! This move can only be played in connection with the next move. [13...♘xe5 14.dxe5 White is threatening with g4, trapping the knight. Black has to do some artificial maneuvers to rescue it with g6-Ng7, but the knight is going to be misplaced there too. Additionally White has gained a nice outpost for his own knight on d4.]

14.♙g3 [The greedy 14.♙xh7 14...fxe5 15.♙g6+ ♙f8 16.♙xh5 loses a piece after 16...exd4 17.exd4 ♙e8! 18.♙h3 ♙g6. It is never advisable to enter such a pin.]

14...f5! Black had to close the b1-h7 diagonal. [It was wrong to include the grabbing of the bishop in view of 14...♘xg3?! 15.hxg3 f5]

White could have exploded the structure with 16.g4! g6 (16...fxg4 17.♗xh7 and Bg6 threatens.) 17.gxf5 gxf5 and once more: 18.g4! fxg4 19.♗xh7± with a strong attack. White is going to castle queenside.]

15.♗e5 White saves the bishop again, with the same idea as before. Nxe5 could be met by dxe5 and the knight on h5 remains misplaced, while the other knight is going to be excellently placed on d4.

15...O-O 16.h3 A move with double purpose. White wants to launch an attack with g4 and also frees the h2 square for his bishop. We are still following some theoretical games.

16...♗f6

17.g4!? The most critical continuation. Opening the h-file by taking on g4 looks very scary, while allowing gxf5 exf5 might leave the d5 pawn to be loose. The game becomes very concrete now. [17.♗h2 17...♖c8 18.O-O is a rather positional alternative, but Black gets an equal game after 18...♗e4=]

17...♗e4 18.gxf5 ♖xf5! The top Ukrainian GM Pavel Eljanov introduced this move last year with very deep analysis behind it. Positionally this reaction is kind of suicidal because the e4 knight loses its outpost. However as we know chess is a concrete game and all direct lines prove that Black gets counterplay in any case.

19.♗xe4 This is the novelty, definitely a prepared one. [19.♗xe4 was played before. 19...♖xf3 20.♗d2 White won a pawn, but after 20...♗xe5! 21.dxe5 ♖f8 22.♗xh7+ ♖h8 Black got excellent compensation. White cannot really continue his attack, while the black pieces are coming with Rc8, Bh4. White has serious problems finding some kind of shelter for his king. 23.♖e2 ♖c8 24.♗b1 d4! Eljanov opens the lines in front of the king. 25.♗d3 dxe3 26.fxe3 ♗e8! Bh5 was coming next, Black won few moves later.]

19...dxe4 20.♗xe4 White won a pawn, but he lost his strong bishop. Black still needs to continue with direct and precise moves to get adequate compensation.

20...♖b6! Threatening to win a piece with Qxb2 and Black also wants to bring his other rook to f8 to collect the f2 pawn.

21.b4 [21.O-O-O does not seem to work properly. Black gets a decisive attack after 21...♖c8! Too many threats are hanging in the air. The main one is the simple Nxe5 and on Nxe5 Bxa3! and the c3 knight falls. White has no defence according to the machines.]

21...♖af8 Bringing the last inactive piece into the game.

22. ♖g1 This time it is White who needs to look for counterplay. Black's pieces are all prepared for a blow. Threats such as Nxb4 axb4 Bxb4 with a dangerous pin are hanging in the air.

22... ♖f8 If the f3 knight moves, Black could already take on e5 and the f2 is also hanging. The next move suggests itself to close the f-file.

23. ♕f4 [23. ♖g3 leads to problems after 23... ♖a6! creating a double threat of Qc4 and Nxe5 Nxe5 Rxf2 Nxf7 Qf1 mate. 24. b5 loses to 24... ♖a5 25. ♖d2 ♖xe5 26. dxe5 ♕xb5—+ with a crushing attack.]

23... ♖xb4! A very tempting sacrifice, which was also kind of forced to gain counterplay. This is a move that we should play by intuition, as it is impossible to calculate until the end, but we can feel that Black is going to have something for the piece.

24. axb4 ♕c6 A human reaction, winning back the piece. [The computer suggest 24... ♕xb4 25. ♖d2 and here the highly unhuman 25... ♖f8! followed by Rc8 with adequate compensation, but of course if a human plays like nowadays, he will be accused of cheating.]

25. ♖xe6 [25. d5 can be met by the intermediate move 25... ♕xb4 and the d5 is hanging next.]

25... ♖xb4? This is actually a blunder. Navara did not want

to enter an inferior endgame after Bxf3 Qxb6 axb6, therefore he left the pin first, but his queen could have ended up in trouble.. . [25... ♕xb4! 26. ♖d2 ♖f6! was the way to play, when White needs to force a draw: (26... ♕xf3 leads to a worse endgame after 27. ♖xb6 axb6 28. ♖a8+ ♖f8 29. ♖xf8+ ♖xf8 30. ♖d3+= White has the better structure and the connected d- and e- passed pawns might become very strong. Also the doubled b-pawns are quite useless, but Black might still hope for salvation with his two bishops.)

27. ♖xg7+! (Other moves are risky, for instance 27. ♖c8+ 27... ♖f8 28. ♖g4 ♖g6 29. ♖g5 (29. ♖h5 29... ♕xf3 30. ♖xf3 ♕xc3+ 31. ♖xc3 ♖c8+ Black mates soon.) 29... h6 Black wins back the piece and continues attacking.) 27... ♖xg7 28. ♖g1+ All black moves lead to perpetual check: 28... ♖h8 (28... ♖f8 29. ♕h6+ ♖xh6 30. ♖xh6+ ♖e7 31. ♖g5+ ♖f8 32. ♖g8+ ♖e7 33. ♖g5+=) 29. ♕e5 ♕xc3+ 30. ♖xc3 and this time it is Black who needs to force a draw by 30... ♖a5+! White has nothing better than 31. ♖b2 ♖b4+ 32. ♖a2 ♖a4+=]

26. ♖d2! Centralizing the king! :) Of course it looks very scary, but the c3 knight becomes an extremely good defender of the king.

26... ♖b2+ [On 26... ♕xf3 White suddenly traps the queen with 27. ♖gb1! that could have been an unplesasant surprise...]

27. ♖d3 ♜xf3 The knight on c3 covers all the checks on e2, e4 and b5. White does not need to take any defensive measures and he can focus on his own attack.

28. ♖xg7+!? This is also winning, but there was a much simpler way. [28. ♖xa7 28... ♜f8 29. ♖a8 and Black has no good defence against Rxf8 Kxf8 Qc8 check. 29... ♜h8 loses to 30. ♜e5+- creating a new threat of Rxf8 Rxf8 Bxg7 mate.]

28... ♜xg7 The following couple of moves are forced:

29. ♖g1+ ♜h8 30. ♜e5+ ♜xe5 31. ♜xe5+? This is a mistake. White might still be winning, but that would have required a very brave king maneuver... [31. ♜xf7 was the way to win. Black cannot defend against the mate on g8, he must try to force a perpetual check with his remaining pieces. The c3 knight covers everything, therefore only a bishop sacrifice comes into consideration: 31... ♜e2+ 32. ♜xe2 ♜b5+ 33. ♜d2 ♜b4+ (It is very important that after 33... ♜b2+ 34. ♜d1!+- the f7 queen covers the b3 square, while other checks on the first rank are met by Nc1.) 34. ♜c3 ♜xc3+ 35. ♜xc3 ♜a5+ Black soon runs out of checks. 36. ♜d3 ♜a3+ (36... ♜a6+ 37. ♜c4+-) 37. ♜e2 ♜a6+ 38. ♜f3 ♜c6+

39. ♜g4! ♜e4+ 40. f4+- It is over now. No more checks for Black and White is coming with Qf8, dxe5 or Qf6 followed by Kh4 mate.]

31... ♜f6 32. ♜xe7 The story is the same as in the 31. Qxf7 line. Black has no defence and he must try to force a draw with his remaining pieces. The next sacrifice is obligatory to allow new checks.

32... ♜e2+! 33. ♜xe2 Objectively a mistake, but noone should blaim Sokolov for this. It allows perpetual check. [33. ♜e4 would still have given him an advantage, but who could go for such a line... White was probably also low on time, because the game was very tense before and then it is just impossible to go for a king walk. 33... ♜c2+

34. ♜d5! ♜f5+ (34... ♜b3+ 35. ♜e5+-; 34... ♜f3+ 35. e4 ♜b3+ 36. ♜e5+-) 35. ♜e5 ♜d7+ 36. ♜e4 After a nice slalom between the pawns White is winning in the end. It is important that Black cannot use his rook due to the pin and the queen and bishop are not enough to create decisive threats. White still

needs some only moves... 36...♖c6+ 37.d5 ♖c4+ 38.♗d4 ♗d3+ 39.♕e5 ♜f5+ Finally the rook joins to the attack, but suddenly (39...♖c7+ 40.♕xf6+-) 40.♕e6++- is check!! Black needs to trade queens, but then the endgame is lost due to the strong d-pawns.]

33...♖b5+ 34.♕d2 [34.♕e4?? 34...♖f5#; 34.♕c3?? 34...♜c6+]

34...♖b2+ 35.♕d3 A draw was agreed in view of Qb5. [The difference to the 31.Qxf7 line can be seen after 35.♕d1 now the b3 square is not covered and Black can force the draw with 35...♖b3+! 36.♕e1 ♖b1+ 37.♕d2 ♖b2+= A great fighting game. There were some mistakes, but in such sharp positions only computers are able to play perfect chess.] **1/2-1/2**

(3) Schlosser, Philipp(2586) - Navara, David(2708) [A06]

TCh-FRA Top 12 2014(5.1),
2014.05.28

GM Arkadij Naiditsch
Best rating: 2737

We don't often see White being crushed in such a peaceful opening as the one in the current game and Schlosser is usually very solid with the white pieces, but Navara's great idea 12...Bc5! put him in front of huge problems. A good game to learn from as to how to unbalance the position early on and simply overrun the defensive lines of your opponent.

1.♘f3 d5 2.e3 A rare move order, but a very possible one. Sometimes White chooses this move order to avoid the main Slav, or maybe the main Queen's gambit.

2...♘f6 3.c4 Now Black has to decide whether to go for a Slav or Nimzo pawn structure.

3...e6 Navara prefers to keep the game symmetrical for now.

4.d4 ♗e7 [Black more often plays 4...c5 5.♘c3 ♘c6 For now Black doesn't break the symmetry. 6.a3 a6 7.dxc5 ♗xc5 8.b4 ♗a7 9.♗b2 A lot of games have already been played in this position and actually it is not that easy for Black to equalize the game completely.]

5.♘c3 [Maybe a slightly more precise move order for White could be to start with 5.b3]

5...O-O Black continues waiting to see what White will do next.

6.b3 A logical move. White need to somehow develop the bishop from c1. [Of course White can't hope for any advantage after 6.♗e2 6...dxc4 Now that White has moved the bishop

from f1, Black can take on c4, winning some sort of a tempo.
7. ♖xc4 c5 The position is just equal now.]

6...c5! This is the right reaction on White's b3 move. Black is trying to quickly develop fast play in the center.

7.cxd5 [7. ♖b2 doesn't bring any advantage since after 7...cxd4 8.exd4 ♖c6 the position of the white pieces on b2 and c3 isn't great.]

7...cxd4 Before taking on d5, Black is luring the white queen to d4.

8. ♖xd4 [After 8. ♖xd4 8... ♖xd5 the position would just be equal.]

8...exd5 In fact this is still theory, but we can already see the plans of both side. White is trying to consolidate and play against the isolated pawn on d5 and if he was is in time to castle kingside Black would be slightly worse, but on the other hand Black will quickly try to develop some play in the center.

9. ♖b2 White is just 2 moves away from being better: Be2 and 0-0.

9... ♖c6 10. ♖d3 At first sight this move might seems strange, but on the other hand White is planning to play Rd1 in the future. 10.Qd1 would not bring any advantage because of 10...Bg4 with a fast d4 push and equalization but probably it

would already be the best White could reach here.

10... ♖b4 Black is acting in the right way, trying to use the better development for quick actions.

11. ♖d2 ♖g4 A very nice move. It is not really clear how to act now for White.

12. ♖d4 What can be more logical than to put the knight on d4. [Black's idea becomes clear after 12. ♖e2 12... ♖e4 13. ♖xe4 dxe4 14. ♖d4 ♖xe2 and by exchanging the bishop on e2 the black knight can take a fantastic position on d3.]

12... ♖c5!! What a fantastic and unusual move. Black is ready to give up a nice bishop and even lose a tempo for it, but in the current position it is exactly the right decision. The white knight on d4 is stabilizing the position and again White is still undeveloped, so Black should try to do everything to open the position immediately.

13. ♖c1?! Not careful enough... White should already have felt the danger. [After 13.f3 13... ♖xd4 14.exd4 ♖f5 15. ♖f2 the white king is on f2, but the e4 square is covered well and White's position is safe. The position looks about equal to me.]

13... ♖xd4 Now Black is starting his rush!

14. ♖xd4 exd4 is already not possible because of the check on the e-file.

14...♘c6 Of course Black is using the moment to push d4, which is the key move in all positions with an isolated pawn.

15.♚a4 After this move Black's attack is just becoming unstoppable! [White would maybe keep better chances to survive after 15.♚d3 15...d4 16.♘b5 White is giving away a full pawn, but at least the queens are being exchanged. 16...dxe3 17.♚xd8 exf2+ 18.♙xf2 ♖fxd8 19.♙xf6 and White would keep some chances to survive, although the endgame is of course very bad for him.]

15...d4! Black's dream is coming true.

16.♘d1 It is a pity, but White already doesn't have anything better.

16...♖e8 A preparation for the d3 move. [It is hard to say why Navara did not play immediately 16...d3 as it is difficult to find a decent reply for White. 17.♙c3 ♖e8 With the threat of playing Ne4 next. It is hard to imagine White surviving here with a bishop on f1.]

17.♙b5 At least White is getting the bishop out now.

17...d3 Black is at least winning an exchange now.

18.0-0 White has nothing better to avoid Black's d2 or Ne4 moves.

18...♙e2 Black is an exchange up now as Re1 is never possible

because of d2.

19.♖xc6 This move is losing, but hard to give White a better advice. [19.♙xc6 didn't help because of 19...d2! 20.♖c2 bxc6 with a totally winning position for Black.]

19...bxc6 20.♙xc6 White is trying to have at least a pawn for the exchange, but Navara is not letting him survive at all.

20...d2! An excellent move to include before playing Rc8.

21.♙d4 After this move, all is lost. [White should at least have tried to keep up the fight a bit longer by playing 21.♙xa8 21...♚xa8 Cool and strong, Black is going to be an exchange up. 22.♙xf6 gxf6 23.f3 ♖d8 Black's king's position is a bit open, but the strong pawn on d2 takes away any hopes White could have. Black's position should be winning, even if some small technical troubles could appear.]

21...♖c8 Now Black is just 2 exchanges up, plus he kept the pawn on d2 alive. The game is over.

22.♘c3 White could have kept the knight on d1 to suffer a bit longer, but this would not have changed the final result of the game.

22...♙xf1 23.♙xf1 And here comes the last small tactic:

23...Rxe6! Chasing away the bishop from c6 to play Rxc3. Game over.

24. Bf3 Rxc3 A great game by Navara, even if things went a bit too smoothly and White could have put up a bit more resistance. Especially the idea of 12...Bc5 can be very useful to remember! **0-1**

(4) Volokitin, Andrei(2638) - Baklan, Vladimir(2636) [C11]

TCh-FRA Top 12 2014(2.3),
2014.05.25

GM Arkadij Naiditsch
Best rating: 2737

It is a bit strange to see Volokitin on a rating of 2638. For many years Andrei was very close to 2700 and over it a few times. In the current game, White got a promising position out of opening, but a very sharp one and with just one greedy move things turned completely and Black could develop a deadly attack.

1.e4 e6 Baklan is a big specialist in French playing it almost all life long

2.d4 d5 3. Nc3 3.Nc3 is clearly the most principled move, putting a lot of pressure on Black's position from the start.

3... Nf6 [3... Bb4 4.e5 c5 5.a3 Bxc3+ 6.bxc3 Ne7 7. Bg4 Bc7 8. Bxg7 Bg8 9. Bxh7 cxd4 10. Ne2 is the other very sharp line which is quite critical in the current theory.]

4.e5 [4. Bg5 is the other main move.]

4... Nfd7

5.f4 Quite typical for the French, the game will involve a fight

for the central pawns. Black will as usual attack the d4 pawn with c5 and Nc6 and White will try to keep solid and develop some play on the kingside, where he has more space.

5...c5 6.♘f3 ♘c6 7.♙e3 Of course this is all still theory.

7...♙e7 Black is preparing to castle kingside, followed by the usual a6-b5.

8.dxc5 [8.♙d2 followed by Be2 and 0-0 is the other possible way to go on. Also the idea of Nd1 and c3 is interesting.]

8...O-O 9.♙d2 White is preparing to castle queenside.

9...♘xc5 10.O-O-O a6 is one of the main moves for Black. The idea is simple, to play b5-b4 with a quick play.

11.♙f2 White chooses a very aggressive setup. [11.♘d4 would be a more solid way to go on.]

11...b6! A very nice move. Black must keep his knight on c5 at any costs. Of course Black is cancelling his idea of playing b5, but he has a new one.

12.g4?! I am not sure if this move was really needed. [12.f5!? 12...♙h8 13.h4 and things are very unclear.]

12...f6 Now we can see Black's idea behind 11. ...b6. The white queen on f2 is now getting exposed and the f4 pawn could become a weakness.

13.exf6 White already has no choice but to take on f6, stopping Black from playing fxe5 himself.

13...♙xf6 This is the critical position.

14.♙xc5? And this is already a serious positional mistake. Whatever you do, you just can't give up the black squared bishop, who is holding almost everything together. Another very negative point for White is that Black's play on the b-file could lead to a very dangerous attack, as the combination of Bf6 and Rb8 is very strong. [A possible way to go on was 14.♙e1 14...♙c7 15.♙g2 and the position would remain complicated.]

14...bxc5 15.♙xc5 White was greedy and went for the pawn, but now Baklan is showing us perfectly why moves like Bxc5 should never be played.

15...♙c7! A perfect move. Black is defending the knight on c6 and at the same time attacking the f4 pawn.

16.f5 Opening the position even more when it is clear that the black pieces are going to be dominating the entire board is not the best decision either. [Maybe the best move was 16.♘e2 trying to keep things together as much as possible, but of course after 16...♙b8 17.c3 ♙d7 Black's attack is also going to be very dangerous.]

16...♖b8! Another excellent move by Baklan. Black is fixing the b2 pawn and is ready for the final blow.

17.fxe6 Volokitin continues not feeling the danger and opens the position even more.

17...♟xe6 Black is not getting tempted by a possible win of material. [17...♖f4+ was not the best since after 18.♖d2 ♖xf3 Black is a piece up, but White has a nice "zwischenzug": 19.♟g2! and the game would be back in unclear waters.]

18.g5 Volokitin finally tries to get rid of the monster bishop on f6, but it is already too late to save the game.

18...♟xc3 Black does not care anymore about exchanging the perfect bishop and is forcing a direct end of the game.

19.♖xc3 ♖f4+ From now on everything is very forced.

20.♘d2 This was the only possible reply because of the Qxf3 threat.

20...♘b4! This is probably the last important move in the game. Black is attacking the a2 pawn and at the same time he wants to play Rfc8 to put pressure on the c2 pawn. White has no decent defence against it anymore.

21.♖a3 The only way to avoid a direct loss of material. [21.♖b1 21...d4 and the a2 pawn is going to fall.]

21...♖fc8 What a perfect domination of the black pieces. We don't see this kind of attack against the white king very often, especially in the French defence.

22.♟d3 [22.c3 was losing to 22...d4 as dxc3 is unavoidable.]

22...♘xc2 The most simple. 22...Bf5 was of course winning too.

23.♟xc2

23...♟f5 The game is over. Rxc2 can't be avoided.

24.♖c3 ♖xc3 25.bxc3 ♖e3 A pretty way to finish White. Black just wants to play Qxc3 next.

26.♖df1 ♟e4 27.♖hg1 ♖xc3 28.♘xe4 dxe4 We just saw a very beautiful game and a great example of what White should never do. **0-1**

French league,
2014.05.24

GM Csaba Balogh
Best rating: 2672

The following pawn endgame looks very drawish, but actually that is far from being true...

39...♔b5 The first task is to activate the king as much as possible.

40.♔b3 White had to prevent Ka4. [Other moves, for instance 40.h4 were losing easily after 40...♔a4 41.♔b2

41...b5!—+ and b4 is coming next, opening the path towards the d4 pawn. Black inevitably wins the pawn and the game afterwards.]

40...♔a5 41.a4 White wanted to prevent Black's plan of playing b5, with the idea that when White gets into zugzwang and he is forced to move with his king, Black plays Ka4 and wins with b4, like it was pointed out in the 40.h4 line. [41.f4 could be met by 41...h5 42.g3 b5! 43.h3 f6! Every tempo plays an important role now. Black's task is to be the last one who makes his pawn move on the kingside to put his opponent into zugzwang. 44.h4 (44.g4 44...h4 45.f5 g5—+ leads to the same.) 44...f5 and White is forced to move with his king, but it allows 45.♔b2 ♔a4 46.♔a2 b4 47.axb4 ♔xb4 48.♔b2 ♔c4—+]

41...f6 Actually 41...g5 and 41... h5 were equally good. The only important thing was to preserve the decisive b7-b6 tempo until the last moment. Black wins with the same motif in all the lines, but let's check all the possibilities. The key is that the kingside is going to be locked after both sides make their available pawn moves and the outcome of the battle will be decided on the queenside. Black should play b5 in the moment when the white king stands on b3 in order to win the fight for the opposition. Therefore, when the white king goes to a3, Black must have the relevant tempo of playing b6 and

only after Kb3 b5. But this only comes at the last stage, first all tempi must be spent on the kingside...

42.♔a3 [42.f4 42...h5 43.g3 g5 43...f5 would have been a huge mistake as it would have left White with two more tempi with his h-pawn... 44.f5 g4 45.♔a3 and here comes the breakthrough, as there are no more moves left on the kingside. Black must play b5 when the king is on b3, therefore he now plays 45...b6! 46.♔b3 b5! 47.axb5 ♖xb5 48.♔c3 ♔a4—+ squeezing out the king and collecting the d4 pawn.; 42.g4 loses to 42...h5 43.♔a3 (43.gxh5 43...gxh5 44.♔a3 h4 45.♔b3 h3 46.♔a3 the kingside is basically locked, because f4 can be met by f5, therefore it is time to execute the winning plan: 46...b6! 47.♔b3 b5 48.axb5 ♖xb5 49.♔c3 ♔a4—+) 43...h4 44.h3 g5 45.♔b3 Now the king is on b3, so the b6 tempo should not be spent. 45...b5! 46.axb5 ♖xb5 47.♔c3 ♔a4—+; 42.h4 42...h5 43.g4 If Black calculates well, he sees that White does not have any more tempo on the kingside, so he can play (43.g3 43...g5 44.♔a3 (44.hxg5 44...fxg5 45.f4 The pawns would be promoted in the same time, but there is one big difference that the black king is still in the square of the f-pawn... 45...gxf4 46.gxf4 ♔b6! 47.f5 ♔c6—+ and the h-pawn cannot be stopped.) 44...gxh4 45.gxh4 b6! 46.♔b3 b5 47.axb5 ♖xb5 48.♔c3 ♔a4—+) 43...b5 44.axb5 ♖xb5 45.gxh5 gxh5 46.f4 f5 47.♔c3 ♔a4—+]

42...h5 Black wins with the same motifs like it was demonstrated in the lines above.

43.g3 g5 44.g4 [44.h3 makes no difference. 44...h4 45.gxh4 (45.g4 transposes to the game.) 45...gxh4 46.♔b3 b5 47.axb5 ♖xb5—+]

44...h4 45.h3

45...b6! As we already know, Black plays b5 only when the white king goes to b3 to win the fight for the opposition.

46.♔b3 b5! 47.axb5 ♖xb5 [White resigned in view of 47...♖xb5 48.♔c3 ♔a4 Black wins the d4 pawn automatically. 49.♔d3 ♔b3 50.♔d2 ♔c4 51.♔e3 ♔c3 Black has squeezed out the king move by move and he has the tempo of Kc4-c3 forever to finally collect the d4 pawn. 52.f4 ♔c4 53.f5 ♔c3—+ An instructive endgame.] **0-1**

**(16) Rapport, Richard(2701)
- Fodor, Tamas Jr(2462)**

33rd Zalakaros Open 2014(4.6),
2014.05.26

GM Arkadij Naiditsch
Best rating: 2737

After a long and fighting game, Rapport finally finds himself in a position with a clear advantage. The passed a-pawn and the chance of winning the h-pawn give White good chances to win. Still it is not clear if the position is winning or not because of the very few pawns left on the board.

46. ♖g5+ White has no chance to bring his rook to the a-file to protect the a-pawn, so Rapport decides to take Black's h-pawn- what can be more logical?!

46... ♔d6 47. ♖xh5 ♖a8 But now White's a-pawn is getting lost.

48.g4 Strangely enough this move seems to lead to a forced draw! [White would keep quite some winning chances after 48. ♔d2 48... ♖xa6 49. ♔d3 The white king would feel very comfortable on c4 and only after this the push of the g-pawn could become very unpleasant for Black.]

48... ♖xa6 49.g5 At first sight Black's position seems to be lost.

49... ♖b6!! Fantastic calculation by Fodor. In case of a passive defence like 49...Ra8 White should be close to winning after 51.g6 followed by g7 and Rh8. Every chess position is based on tactical motives so even when things seems to be going very wrong, it is never too late to search for tactical defence possibilities.

50.g6 White's pawn is almost "there".

50... ♗b4! This was of course Fodor's plan before playing Rb6. Black is entering a rook endgame which is very forced.

51. ♔d2 ♔e6 [51... ♗xc3+ 52. ♔xc3 ♔e6 would lead to the same position as in the game.]

52. ♖g5 is White's only chance. [Of course after 52.g7 52... ♔f7 53. ♖g5 ♗xc3+ 54. ♔xc3 and now 54... ♔g8 Black is reaching an easy draw rook endgame.]

52... ♗xc3+ 53. ♔xc3 ♖b8 is the only way to defend from g7-g8.

54. ♖g3 Winning half a tempo.

54... ♜f6 Black wants to play Kg7.

55. g7 ♜g8 Fodor continues to calculate things very precisely.

56. ♜d4 All moves are forced.

56... ♜xg7 57. ♜xg7 ♜xg7 58. ♜c5 ♜f6! The black king can't save the c-pawns, but he doesn't need to.

59. ♜xc6 ♜e5 60. ♜xc7 ♜d4 What a great defence by Black, based on exact calculation in a very bad looking position!
1/2-1/2

Clash of the Titans

(17) Alekhine, Alexander
- Erdelyi, Stefan[B40]

Prague ol (Men)(13),
1931.07.21

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 e6 3.c4 ♘c6

4.d4 is premature. White could play [4.♘c3 4...♘f6 5.♕e2 The idea is to wait a bit with the d4 move. 5...d5 6.exd5 exd5 7.d4 Fighting for the center. 7...♕e6 8.cxd5 ♘xd5 9.O-O ♕e7 10.dxc5 ♘xc3 11.bxc3 ♔xd1 12.♖xd1 ♕xc5 13.♘g5+= After exchanging this bishop White will keep a stable advantage.]

4...cxd4 5.♘xd4 ♘f6 6.♘c3

6...d6 leads to a hedgehog structure but Black had a better move. [6...♕b4 In the Paulsen Variation there is a similar line but instead of the knight on c6 Black has a pawn on a6, so the big difference is that thanks to his good development Black is ready to put pressure on the white central pawns. 7.♘xc6 White is forced to improve the black structure. 7...bxc6 8.♕d3 (8.e5 8...♘e4) 8...e5 With good play for Black.]

7.♕e2 a6 8.O-O Usually in this structure the black knight is placed on d7. In this case one of Black's ideas is to exchange on d4 and then develop the bishop on the h1-a8 diagonal. [8.♘c2!? 8...♕e7 9.O-O O-O 10.f4∞]

8...♔c7 9.b3 White develops his bishop on an active diagonal. The alternative was [9.♕e3 9...♘xd4 10.♕xd4 ♕e7 11.♔d3 O-O 12.♔g3 A typical square for the queen to pressure the g7 pawn. (12.♘a4 12...♘d7 13.♔g3 ♕f6 14.♖fd1 ♕xd4 15.♖xd4 e5 From a strategical point of view after the exchange of the dark squared bishops this move is usually possible. 16.♖d2 ♘f6 17.♘c3 ♕e6 With an equal position.) 12...e5 (12...b6 13.e5†) 13.♕e3 ♕e6 14.♖ac1 ♖fc8 15.b3 ♔a5 A strong move. Black is preparing the thematic b5 or Bd8-Bb6 and because of the bad queen on g3 Black should get counterplay.]

9...♙e7 10.♙b2 O-O [10...♘xd4 11.♙xd4 O-O 12.♘a4+= and Black is not able to play Nd7-b6.]

11.♘c2 White wants to keep the pieces on the board since he has more space.

11...♖d8 12.♘e3 ♘e5 With the idea to transfer the knight to d7. [12...b6 13.♖c1 ♙b7?

14.♘cd5!± This trick is the main problem for Black when the knight is placed on c6 and not on d7.]

13.♙e1 Probably after f4 White wants to put the queen on g3. [13.f4 13...♘ed7 14.f5 b6 Because the knight is already on e3 White is not able to create pressure on the e6 square. 15.fxe6 fxe6 16.♘cd5 is interesting but doesn't work: 16...exd5 17.♘xd5 ♙c5+ 18.♙d4 ♘xd5 19.♙xc5 ♘c3 20.♙c2 ♘xe2+

21.♙xe2 bxc5± In this position three pieces are much stronger than a queen.]

13...♙c5 Temporarily preventing f4, but the queen is not perfectly placed on c5. [13...b6 14.f4 ♘ed7 15.♙g3 ♙b7 16.♙h1 ♙f8∞Protecting g7. Now the e4 pawn is hanging.]

14.♘a4 ♙a7 15.♖d1 An interesting concept based on the weak b6 square.

15...♖b8 [15...♘xe4!? 16.♙d4 ♙b8 17.♘b6 ♖a7 18.♘xc8 Maybe White should not hurry with this move. 18...♖xc8 19.♙xa7 ♙xa7 In my opinion Black has good compensation.; 15...♘ed7 16.♙d4 b6 17.f3 ♙b7 18.♙b4 ♖ab8 (18...a5 19.♙d2) 19.♘xb6 ♙xe4 20.♘xd7 ♙xd7 21.♙a5 ♙b7∞; 15...b5!? A typical idea. Black exchanges the b-pawn for the e- one, which is usually good for them. 16.cxb5 (16.♙d4 16...♙b7 17.♘b6 ♖b8∞) 16...axb5 17.♙xb5 ♘xe4∞]

16.c5! A good move. Black is not in time with Nd7-b6.

16...♘c6 [16...♘g6]

17.cxd6 ♖xd6 18.e5? This move gives Black good play. White missed a nice idea after [18.♖xd6 18...♙xd6

And now comes the unexpected 19.♟xf6! Paradoxically without the bishop White will get pressure over the dark squares. 19...gxf6 20.♞g4 ♔d4 (20...♟e7 21.♚c1! h5 22.♞h6+ ♔g7 23.♟xh5 ♞d8 24.♞xf7 ♞xf7 25.♚c7 ♔f8 26.♞b6+—) 21.♚c1 ♟e7 22.♟f3 Threatening Qh6-Rd1 and the black king is in trouble.]

18...♚xd1 19.♟xd1 ♞d7 20.f4 b5 21.♞c3 ♟c5=+ After e5-f4 the white king can be weak, which is why Black gets the initiative here.

22.♟c1 ♞e7 [22...♟b7 23.♞e4 (23.♔h1) 23...♞cxe5! 24.♞xc5 ♚xc5 25.fxe5 ♚xc1 26.♚xf7 ♞xe5 Black is just a pawn up.]

23.♔h1 ♟b7 24.♟c2 ♚a8 25.♚e2 ♞g6 [25...♚c8=+]

26.f5? Alekhine feels that his position is slowly getting worse and worse, so he decides to give onw pawn to at least

complicate the position a little bit. [26.♞ed1 With the idea to exchange the active bishop on b7 after Be4. 26...♚c8=+]

26...exf5 27.♟xf5 ♞dxe5+ Black has better pieces and a material advantage.

28.♞g4 ♚e8 29.♞xe5 ♚xe5 30.♚g4 ♞h4

31.♟xh7+ ♔f8? Black could easily win after [31...♔xh7 32.♚xh4+ ♔g8 33.♚g3 ♚e6 and White is not able to hold the weakness on g2.]

32.♟e4! A great tactical defending idea.

32...♚xe4 White forces Black to temporarily close the pressure over h1-a8 diagonal and thanks to this White has time to create his threats. [32...♟xe4 33.♞xe4 ♚xe4 (33...♚xc5 34.♚c8+ ♚e8 35.♚xc5+ ♔g8 36.♚f2 f6=) 34.♚h5 The same idea as in the game. 34...♔g8 35.♚xf7+ ♔h8 36.♚h5+ ♔g8=]

33.♚h5 The g2 pawn is not hanging now and White creates the Qxc5, Qxf7 and Qh8 threats.

33...g6?? A huge mistake. Black has two better options: [33...f5 34.♖xf5+ ♜xf5 35.♜xf5+ ♖g8 36.♜xe4 and Black has nothing better than 36...♙xe4 (36...♙a7

Now comes the nice 37.♜f6+! gxf6 38.♜g6+ ♖f8 39.♜xf6+ White is now mating by force: 39...♙e8 40.♜e6+ ♖d8 (40...♙f8 41.♙h6#) 41.♙g5+ ♖c7 42.♜e7+ ♖c6 43.♙f4 b4 (43...♙b8 44.♜e6+ ♖c5 45.♙e3+ ♖b4 46.♜e7+ ♖c3 47.♜c5+ ♖b2 48.♙d4+ ♖b1 49.♜c3 ♙xg2+ 50.♖g1) 44.♜c7+ ♖b5 (44...♖d5 45.♜d6+ ♖e4 46.♜e5+ ♖d3 47.♜e3+ ♖c2 48.♜d2+ ♖b1 49.♜c1+ ♖xa2 50.♜c2+ ♖a1 51.♙e5+) 45.♜c4+ ♖a5 46.♙c7+ ♙b6 47.♜c5#) 37.♜xc5 ♙xg2+ 38.♖g1 White will silly prevent the mate on g2 after Qf2 next and the position is drawish.; 33...♖g8 34.♜xf7+ ♖h8 35.♜h5+ ♖g8=]

34.♜xc5+?? White could simply win after [34.♜h8+ 34...♙e7 35.♙g5+ ♖d7 36.♜xa8 ♙xa8 37.♜xe4 ♙xe4 38.♙xh4+—]

34...♜e7?? The second huge mistake in a row. Black could still fight after [34...♖g8 35.♜xe4 ♙xe4 36.♖g1 ♙xg2 White must be careful because of his weak king. For example now the best move is 37.♜f6 The idea is not to allow Black to improve his queen's position. For example now after 37...Bh3 White will answer 38.Qc6 or after 37...Qd8 38.Qd6, but in general the position is unclear.]

35.♙g5! ♙xg2+ 36.♖g1 ♙xf1 37.♜xe7+ ♖g8 [37...♖g7 doesn't change anything. 38.♜f6+—]

38.♜d8+! After the queens exchange two black pieces will be under attack.

38...♜xd8 39.♙xd8+— ♜f3+ [39...b4 40.♙xh4 bxc3 41.♖xf1 c2 42.♙g5+—]

40.♖xf1 ♜xh2+ 41.♖e2 ♜g4 42.♜d5 1-0

Editorial Preface

Let's first discuss the events of the past week:

The French Team Championship was won for the 3rd time in a row by the team of Clichy: Vachier Lagrave, Jakovenko, Fressinet, Van Wely and many more. It was not really a surprise for such an amazingly strong team, which clearly dominates the league.

The 2nd place went to Bischwiller and the 3rd to Mulhouse Philidor.

22 The 33rd Zalakaros Open in Hungary was won by Kovalenko with 7/9.

26 Now let's get to what is clearly the main event of the week: the Norway Chess tournament.

28 After the 3rd round, Caruana leads with 2.5/3 and we can say that Carlsen was very lucky to draw his game against the Italian, who was very close to make a perfect start with 3/3. At the moment Caruana has also crossed the 2800 mark in the live rating list. Congratulations!

Grischuk had a bad start, blundering in the first game, but with 2 victories in a row he is back in the tournament, also achieving his best live rating ever of 2797.

The main attention was of course focused on Carlsen's games, who had a slow start with just 3 draws.

And clearly the main surprise of the event is the great play of Simen Agdestein, who is now on 1.5/3, but could easily be on 2/3 with a bit more precise calculation.

There are 6 more rounds to go and the tournament is going to be super exciting, especially since Carlsen is clearly planning to win at least 3 out of his next 6 games.

The Russian higher league in Vladivostok is under way, which is an amazingly strong open tournament. Just 3 rounds have been played here too, so the main excitement is still to come.

As usual we hope you enjoy our comments from the main events played by the best players in the world!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Grischuk, Alexander(2792)** **- Aronian, Levon(2815) [A18]**

2nd Norway Chess 2014(3.2),
2014.06.05

GM Arkadij Naiditsch
Best rating: 2737

We don't often see Aronian having trouble in the opening, usually the World Number 2 is very well prepared. He might even be the best prepared player in the world. But this time it was different. It seems like Grischuk managed to surprise Aronian in an opening which Aronian likes to play himself with White! After 8...Nc6 it seems like Black is already in trouble. Basically the game already ends on move 14(!), when Grischuk manages to catch the black queen in the middle of the board! Amazing!

1.c4 ♘f6 Aronian usually plays 1...e5, but it seems like for this game he was not in the mood to go for his main repertoire.

2.♘c3 White usually chooses this move order against Nimzo players, who don't like to play e5 or c5, but Aronian plays them both, so it is a bit strange to see Black play 2...e6 now.

2...e6 3.e4 This is the key idea of 1.c4 and 2.Nc3. Of course nothing too dramatic has happened but now Black needs to be accurate to equalize.

3...d5

4.e5 [4.cxd5 makes less sense. 4...exd5 5.e5 ♖e4 6.♗f3 ♕f5 7.♕e2 c5 8.d4 ♗c6 9.O-O cxd4 10.♗b5 d3 11.♕xd3 ♕c5 and Black has an excellent position. Aronian-Lysij, World Cup 2013.]

4...d4 is the main move.

5.exf6 dxc3 6.bxc3 ♖xf6 Now in this position White has two major choices:

7.d4 This is probably the very main move. [In the line 7.♗f3 7...e5 8.♕d3 it is important for Black to remember to play 8...♕g4!? and it seems that it is hard to gain any advantage here for White, even if there are still a lot of complicated lines. 9.♕e4 ♗d7 10.♕xb7 ♖b8 11.♕d5 c6 12.♕e4 ♗c5 13.♖e2 ♗xe4 14.♖xe4 ♕xf3 15.♖xf3 ♖xf3 16.gxf3 ♗d7 Black is a pawn down, but White's bad pawn structure and the domination on the b-file give him enough compensation to evaluate this position as equal. Naiditsch-Movsesian, Wijk aan Zee 2013.]

7...e5 We are following the main stream. Black's idea is to launch fast play against White's center.

8.♗f3 ♗c6 A very rare move and a move which seems to be very risky because Black's development is far from being fine. [The main line continues with 8...exd4 9.♕g5 ♖e6+ 10.♕e2

♕e7 11.O-O O-O 12.cxd4 ♕xg5 13.♗xg5 ♖e7 14.♗f3 c5 with a very slight advantage for White.]

9.♕g5! A good move. Before playing d5, White is making sure that the black queen will be placed on g6.

9...♖g6 10.d5 Of course! Black's idea is clear, to hold on to the black squares, try not to lose anything immediately, but all this is harder to do than it looks like.

10...♗b8 This is nothing new for the theory either.

11.h4 A strong move, which has already been played by Najer back in 2012.

11...♗d7 Black almost managed to consolidate, so White needs to act quickly and directly.

12.♕d3! This novelty seems to be very effective and it hides a very tricky trap.

12...e4? After this move Black's position already seems to be lost. [12...♖h5 doesn't look good either since after 13.♕e2 ♖g6 White is a tempo up, because usually the white bishop is still on f1 here.; Maybe the best try for Black is to play 12...♖d6 13.O-O f6 Keeping the idea to play on the dark squares. 14.♕e3 ♗c5 But now White has a strong idea: 15.♕xc5 ♖xc5 and

16.♘d2! followed by Ne4 and c5. It is hard to imagine Black being ok here.]

13.h5 It is hard to say if Grischuk knew everything until here, or maybe just found the great idea of catching the queen over the board.

13...♔f5 Nothing else makes sense. To give up the e4 pawn equals being almost lost, so Aronian played 13... Qf5 without thinking for too long.

14.♖h4!! What a fantastic move and a surprising idea! The black queen on f5 is being caught by the h1 rook! WOW!

14...exd3 Nothing really helped anymore already... [14...♘c5 was losing on the spot: 15.♙xe4 ♘xe4 16.♔e2 with a totally winning position for White.]

15.♖f4 The black queen has no more squares, but at least

Black has a piece and a rook, which maybe gives some chances for survival.

15...♘c5 16.♖xf5 ♙xf5 White's first target is clear, the d3 pawn has to be taken.

17.♘d4! Grischuk continues playing the best moves! First of all the bishop from f5 has to move, and secondly the white knight is going to take a perfect position on b3, chasing the black one from his perfect position on c5, so the d3 pawn is getting lost.

17...♙d7 There is nowhere else to go...

18.♔f1 Grischuk does not hurry with Nb3 as this move is not going to "run away".

18...♙d6 19.♘b3 f6 This move doesn't make things better, but Black's position was lost anyway. [19...♘e4 didn't help either. 20.♙e3 Solid and good. 20...O-O 21.♔xd3 After the d3 pawn is getting lost, there is no more hope for Black. 21...♖fe8 22.c5 The game should be over soon.]

20.♙e3 b6 Aronian is hoping to create a blockade.

21.♘xc5 bxc5 22.♔xd3 O-O Black's chances for a draw are not very big, but still White needs to continue playing well.

23.♔d2! Another excellent move by Grischuk. The idea is to

play Bf4 next and Bxd6, after which the d6 pawn is going to be a potential target for the white queen.

23...♙e8 Aronian is trying all he can to keep the game going. By provoking the white pawn to go to h6, Black is hoping to avoid the bishop exchange with g5.

24.h6 g5 But now Grischuk finds a new target:

25.♖b2! The c5 pawn is going to fall.

25...♙d7 26.♖a3 ♜fe8 27.♙xc5 I guess many players would have resigned here, but maybe Aronian's practical hope was that Grischuk really likes to get into deep time trouble and as we saw in round 1 - when Grischuk blundered in 1 move to Caruana in a slightly better position - in time trouble anything can happen.

27...♙h2 Black keeps on trying to create some counter chances.

28.♜e1 ♙f5 29.♜xe8+ ♜xe8 30.♙e3 The position of the white king is secured.

30...♙f7 31.♙e2 Before starting the final action, White is putting his king on the most safe square and that is d2.

31...♙e5 32.♙d2 ♙g4 I guess by now Aronian's moves were more random than anything else.

33.♜xa7 That's another pawn gone...

33...♙g6 34.a4 ♙xh6 35.a5 c6 Aronian keeps on fighting when it is even hard to imagine how White could make a mistake...

36.dxc6 ♜c8 37.f3 ♙f5 38.g4 ♙e6

39.♜e7 Only one more move to play until move 40...

39...♙xc4 40.♙d4 Additional time was added to Grischuk and the position is totally winning, so the game is over. A really nice opening trick gave the World Number 3 a very important victory over the World Number 2. **1-0**

On the other hand, White is going to start an attack on the kingside and the d4 square can be nice for the knight from b3.

13. ♖e2 of course White is going for 0-0-0. To put the queen on e2 followed by a possible g4-Bg2 is quite a standard plan.

13... ♘d7! Personally I like this move a lot. Black needs to put his knight on e5 and there is no reason to keep the knight on f6 which could get under attack after g4-g5, so Grischuk decides to bring it directly to e5.

14. 0-0-0 ♘ce5 [Trying to exchange the dark squared bishops is usually the right choice, but not here as after 14... ♗g5 15.g3! the exchange on f4 would leave White with a great pawn structure.]

15. ♘d5 [White could also have played 15. ♖b1 15... 0-0 16. ♘d4 with a very unclear position.]

15... ♗xd5 Once again I think this is the right decision for Black. He should not allow White to take on e7.

16. ♖xd5 [After 16.exd5?! 16... 0-0 the position can only be in Black's favor.]

16... 0-0 17. ♖b1 So far both players are playing a very good game. A move like Kb1 is a very useful one anyway, so Topalov decides to make it instantly.

17... ♖c7 Another typical and very useful move. Black wants

to play Nb6 or b5. [17... ♘b6?! was premature as after 18. ♖d4! White is covering the c4 square.]

18. ♖d1 ♘b6 A very hard decision to judge. Black would ideally like to play: Nec4-Bf6-Rfc8 and Na4, but it is a very long term plan. [Maybe a more simple solution could have been 18...b5 19.h4 ♘c4 20.g4 ♗f6 and I don't think that Black's chances are worse here.]

19.h4! A very strong move and a manoeuvre to remember.

19... ♘ec4 20. ♖h3 This was the main point of 19.h4! The rook from h3 is going to control the 3rd rank which is very important!

20... ♗f6 21.c3 So Black did what he wanted to do, but what's next?! White's plan is very clear: in case Black is going to be passive, g4-g5-h5 could be a very dangerous for the black king.

21... ♖fe8 22. ♘d4 I don't think this is the best move. [To me the logical 22.g4 looks pretty strong. It is not an easy task now to find a "good move" for Black and a sacrifice afterwards. 22... ♘xb2?! doesn't seem to work since after 23. ♖xb2 ♘a4 and the very important 24. ♖f2! ♘xc3+ 25. ♖xc3 ♖xc3 26. ♖c1 White should be better.]

22... ♖c5! Black is preparing the d5 push.

23. ♖f5 We are now entering very big complications. [23. ♖f3 wasn't better since after 23... ♖ac8 White already needs to be very careful because Black's Nxb2 is hanging in the air.]

23...d5 24.e5!? A very interesting and practical move.

24... ♗xe5?! This move gives White a strong attack. [24... ♗xe5 looked stronger, but here too White has a lot of different options like 25.Rg3 or 25. Qc2. It is easy to see that White has some compensation for the pawn, but Black should probably not be worse in any case. A pawn is a pawn.]

25. ♖g4! Exactly! The pawn on g7 is a clear target now.

25...g6 [When he played 24...Bxe5 Grischuk had probably blundered that after 25...h5 26. ♖g5 ♖f2 he seems to be winning thanks to the double attack against the bishop f4 and b2, but after the simple 27. ♗c1! Black would be in big danger to get mated.]

26.h5?! Topalov misses his chance... [26. ♗h6+ was very strong. 26... ♖g7 27. ♗c1 with the threat of playing h5 next.]

26... ♖f2 As we can see, the position is very sharp.

27. ♗h6+ The only way to go on.

27... ♖g7 28. ♗c1 White wants to play Rf3 next, so Black's move is forced.

28...f5! This is why 26.h5 was a clear inaccuracy.

29. ♖f3 Unluckily for White, there is no escape from the queens' exchange.

29... ♖xf3 30. ♖xf3 Things continue to be very sharp. White remains a pawn down, but the threat of playing g4 or maybe Bxc4 keep a lot of tension in the position.

30... ♖ad8 A very logical move. Now White only has the idea with g4 left.

31.g4 d4?! As usual Grischuk was in time trouble and he makes a miscalculation. [31...f4 would lead to an about equal endgame. 32.g5! White wants to play Ng4 next. 32...gxh5 33. ♗f5+ ♖h8 34.b3 ♗d6 35. ♗xd6 ♖xd6 36. ♗xf4 and the game would most probably end in a draw.]

32.hxg6? What a present by White! [It is obvious that it is not an easy calculation, but we have to admit it is not the most difficult move to find either. 32.gxf5! 32...dxc3 In this crazy position, White has an amazing mating idea: 33.fxg6! Could it be that Topalov has missed this?! 33... ♗d2+ (33... ♖xd1 34. ♖f7+ ♖h8 35. ♖xh7#) 34. ♗xd2 ♖xd2 35. ♗f5+ ♖g8 36. ♖xd2 cxd2 37. ♖c2 and it is hard to say if White is winning or Black can hold the draw, but White is clearly better.]

32...hxg6 33. ♖fd3? Topalov is totally losing the control over

his position. [The best way to go on was still 33.gxf5 33...dxc3 34.♖xd8 ♜xd8 35.bxc3 with good chances for a draw.]

33...♘d5! Grischuk doesn't miss his chances. White's problem is that the knight on h6 is caught.

34.cxd4 [34.gxf5 already didn't help since after 34...♘ce3 Black is winning the h6 knight.]

34...♙f4 And the game is over!

35.♙xf4 ♜xf4 36.♖f3 Giving Black a chance for a very nice finishing move:

36...♖e1! Of course after 37.Rxe1 Black plays Nd2 and 28...Nxf3. A very nice fighting game with a lot of tension and nice positional manoeuvres from which we can learn a lot. **0-1**

**(3) Jakovenko, Dmitry(2730)
- Ipatov, Alexander(2613) [E15]**Saint-Quentin FRA(9.3),
2014.06.01GM Csaba Balogh
Best rating: 2672

Another classic win by Jakovenko in his usual positional style.

1.d4 ♘f6 2.c4 e6 3.♘f3 b6 4.g3 ♙b7 5.♙g2 The g3 system of the Queen's Indian defence. Black has a wide range of options here. The most common continuation by far is 5...Be7, but Black would like to drive the game onto a less explored territory.

5...g6 Black fianchettoes both of his bishops.

6.O-O ♙g7 7.♘c3

7...♘e4 Carlsen played like this in a blitz game last year. This is a standard reaction in this variation. White was ready to occupy the center with d5 followed by e4, therefore Black initiates exchanges to make it less effective. [7...O-O 8.d5! and e4 next gives White a comfortable edge.]

8.♘xe4 ♙xe4 9.♙g5! Developing with tempo and preparing to trade the bishop on the long diagonal with Qd2 and Bh6.

[9.d5 is already much worse, because it does not lock the b7 bishop. Black could simply undermine it by playing 9...c6]

9...f6 This move was played by great players like Spassky or Eljanov, but on the other hand it is a clear achievement for White to weaken his opponent's pawn structure. [9...♖c8 was played by Carlsen, but White can claim an edge after 10.♖d2 intending to trade the bishops with Bh6 and after 10...h6 11.♙e3 Black has difficulties with castling because of the h6 pawn.]

10.♙e3 ♘c6 11.♖d2 O-O 12.♖fd1! White activates his rook and strengthens his center. [The text move is also a last preparation for Bh6, which, if played immediately, could have been met by 12.♙h6? 12...♙xh6 13.♖xh6 ♙xf3! 14.♙xf3

14...♘xd4! Black overtakes the initiative with this exchange sacrifice. **15.♙xa8 ♘xe2+** An important intermediate move. **16.♖g2 ♖xa8+ 17.f3 ♘d4=+** followed by e5 or c5, consolidating the strong knight on d4. Black has two pawns for the exchange and enjoys a clear advantage.]

12...♘e7 Black improved his knight and he is ready to grab the bishop pair with Nf5, but White was intending to play his next move anyway.

13.♙h6 ♙xh6 14.♖xh6 d5 It was time for Black to fight for the center. [He could not do it by playing 14...c5?! because of

15.dxc5! bxc5 16.♔e3! and Black is forced to give up his strong bishop in order to save the c5 pawn.]

15.♔e3! A strong positional move! The queen has already done its job on h6 by trading the bishops and White cannot hope for any kind of mating attack. The queen is the most valuable piece and of course Jakovenko wants it to participate in the battle, therefore he pulls it back.

15...♘f5 16.♔c3 c6 Black wanted to avoid ending up with a backward pawn on c7. White had in mind to take cxd5 and on exd5 Rac1 followed by b4-b5 and a longterm pressure against the c7-a7 weaknesses.

17.♘h3! A known move in this system! Black has fortified his bishop on e4 and it seems like a strong one, which controls the entire board and should be exchanged. However instead of some moves like Nd2, Jakovenko plays much more ambitiously and by removing his bishop from the long diagonal he is threatening to play Nd2 with the ideas of f3 and Nxe4. In some other lines this move does not work properly, but White plays Bf1 with the same Nd2 idea. Black is now forced to give up his bishop for the knight, but then White might claim a small but stable advantage.

17...♘xf3 18.♔xf3 We can now feel the damage of the f6 move. Black's pawns are much weaker and especially the e6

pawn is a clear target. White might even think about pushing e4 dxe4 Qxe4 followed by returning the bishop to g2, with strong pressure on both the e6 and c6 pawns. Black decides to change the structure.

18...dxc4 19.♔xc6 ♔d5

20.♔a4! Another excellent positional decision. White has serious potential on the long diagonal after the bishop is coming back to g2, but he can only use it effectively if he keeps the queens and does not change the pawn structure. [20.♔xd5 20...exd5 21.♘xf5 gxf5 In the endgame, White could not make use of damaged kingside, it is rather Black who might think about some edge with his passed pawn on the queenside.]

20...♘d6 Black would like to close the diagonal by putting his knight on e4, followed by f6-f5. [20...♘xd4 would have dropped some material after 21.♘g2! ♘xe2+ 22.♔f1 ♔e5 23.♔e1+-]

21.♘g2 ♘e4 22.♔ac1! The most logical and the strongest move. [It was very tempting to play 22.f3 22...♘d6 23.e4 and now the only move is 23...♔b5! (23...♔a5 24.♔d7! wins a pawn.) 24.♔xb5 ♘xb5 Here White has a choice between two moves, but none of them gives him a clear advantage: 25.♘f1 (On 25.♔ac1 25...♘d6 26.e5 ♘f5 the c4 pawn cannot be

taken because of Ne3!) 25...♖ac8 26.♖ac1 In comparison to the game, Black could bring his a-rook to c8, which changes the evaluation because the f3 pawn is hanging at the very end of the line: 26...♘d6 27.e5 ♘f5 28.♙xc4 (28.♖xc4 28...♘e3 29.♖xc8 ♖xc8 30.♖d3 ♘xf1 31.♙xf1 ♖c2 White has won a pawn, but the active rook gives Black excellent drawing chances.) 28...♖xc4! 29.♖xc4 ♘e3 30.♖dc1 ♘xc4 31.♖xc4 fxe5 32.dxe5 ♖xf3 and Black holds. Jakovenko had probably calculated this line and he rightly took the decision to play 22.Rac1!]

22...b5 [22...♖fc8 White was intending to play 23.f3! ♘d6 24.e4 ♖b5 (24...♖a5 25.♖d7+- We can once again see the drawback of the f7-f6 move: the e6 pawn becomes vulnerable.) 25.♖xb5 ♘xb5 26.♙f1! ♘d6 27.e5 ♘f5 Now White can play 28.♙xc4 ♖xc4 29.♖xc4 ♘e3 30.♖dc1 ♘xc4 31.♖xc4± with a healthy extra pawn and a more active rook.; 22...♖ac8 simply drops the a7 pawn: 23.♖xa7±]

23.♖a6! The pawn chain had to be separated. White is ready to undermine the pawns with a4! and prevented Black from playing a6. Additionally White is threatening to win a pawn with Bxe4 and Qxb5, therefore the next move is forced.

23...f5 24.a4! Consequently following the right plan. Black's pawn chain falls apart and the rooks are joining the game.

24...♖ab8 25.♖c2 White prepares for the opening of the b-file

and protects his b2 pawn.

25...f4 Black decides to look for counterplay on the kingside. [An alternative was 25...♖f7 trying to keep things together, but White could have simplified to a very pleasant endgame with the following more or less forced line: 26.axb5 ♖xb5 27.f3 ♘f6 28.f4 ♘e4 (There was nothing better as 28...♖d7? loses to 29.♙c6) 29.♖c8+ ♔g7 30.♖xc4 ♖xc4 31.♖xc4 ♖xb2 32.♙xe4 fxe4 33.♙f2± and the e4 pawn is extremely weak and when it falls the game should be lost.]

26.axb5 fxg3 27.fxg3 ♖xb5 [Black could not increase the pressure on the f-file with 27...♖f5 because of 28.♖f1! ♖g4 29.♙f3±]

28.e3! A perfect consolidating move! White protects the d4 pawn to free his rook and he opens the second rank to cover the f2 square with the other rook.

28...♖b3 29.♖e1! Jakovenko plays some temporary defensive moves to keep his structure and suddenly the black pawns on a7, c4 and e6 are getting loose.

29...♖fb8 30.♖xa7! [30.♖xc4 was less clear in view of 30...♖xb2 31.♖d3 and Black is able to escape from the pin with 31...♖a5!]

30...♖xb2 31.♖f1? The only mistake by White in the game,

which could have given Black some saving chances... [The winning continuation was 31.♖xb2! 31...♖xb2

32.♕f3!! An extremely hard move to find. White first gave up the second rank, then he plays a waiting move to prevent the Rxf2 ideas. Black has simply no defence against Rf1, when White is mating with his queen and rook. Anytime the queen leaves the pin from d5, White wins the knight with Qa8 check. 32...♖b7 does not help. (32...♗f5 33.♗a8+ ♔g7 34.♗xe4+-; 32...c3 33.♖f1+-) 33.♗a8+ ♔g7 34.♖f1! Threatening mate on f8 after Bxe4, which cannot be prevented... 34...♖f7 35.♕xe4!+-]

31...♖b1? [31...♖b7 was the only move. 32.♗a2 Here Black has a difficult choice. He has some options and in all of them he must suffer in a worse position, but he has good saving chances as well. 32...c3 (32...♗g5 33.♖e1 ♗f5 34.♗xc4 ♖b1 This kind of active counterplay also gives chances, but of course White is a pawn up.) 33.♗xd5 exd5 34.♕xe4 dxe4 35.♖xc3 ♖b3 As Black I would go for this endgame, where I believe in Black's saving chances, but of course it is going to be a long torture...]

32.♖f2! White manages to keep the important f-file with this move! Black cannot escape from the pin between the bishop and the queen. [The difference as to why White did

not include the check on f7 was that after 32.♗f7+ 32...♔h8 33.♖f2 ♖xf1+ 34.♖xf1 ♗g5! Black succeeds to leave the pin, while in the game the b8 rook was hanging.]

32...♖b7 [32...♖xf1+ 33.♖xf1 ♖f8 does not change the outcome. 34.♖xf8+ ♔xf8 35.♗b8+ ♔e7 36.♗f4+-]

33.♗a3! Keeping the eye on the f8 square. Rf8 is actually threatening with mate, against which Black can only defend by dropping material. White is additionally threatening to play Rf4, winning the piece. The game is over.

33...♗d6 [33...♔g7 34.♖f4+-]

34.♗xd6 ♖xd6 35.♕xb7 ♖xb7 36.♖f6 ♖e7 37.d5 1-0

(4) Carlsen, Magnus(2881) - Giri, Anish(2752) [A34]

2nd Norway Chess 2014(1.3),
2014.06.03

GM Csaba Balogh
Best rating: 2672

Carlsen is back in action in the Norway Super tournament. In the first round he was trying hard to squeeze out the full point, but Giri neutralized all his attempts with very precise defence.

1.c4 c5 2.♘f3 ♘f6 3.♘c3 d5 4.cxd5 ♘xd5 Giri is considered to be an excellent theoretician and recently employs the Gruenfeld defence, therefore Carlsen tries to drive the game to some Anti-Gruenfeld territory.

5.e3 ♘xc3 [5...g6 immediately can be met by some tricky lines, such as 6.♗b5+ ♗d7 7.♞b3 ♘xc3 8.♘e5! White grabs the initiative.]

6.bxc3

6...♞c7!? A novelty right in the 6th move and a very clever one I must say. We can see the point in the 6...g6 line, which was played in almost all the games before. [On 6...g6 7.h4!? (7.d4 transposes to the game.)]

7.d4 Obviously the h4 move made no sense now, because Black would develop his bishop on the other diagonal after occupying the center with e5. White had nothing better than d4, but now we are back the Gruenfeld structure, which is what Black was aiming for.

7...g6 8.♗b5+ A standard idea in this structure, White would like to confuse the development of the black minor pieces.

8...♗d7 [8...♘d7 is strongly met by 9.♗a3 when it is very hard to deal with the c5 pawn. 9...cxd4 (9...b6 now loses to 10.♘g5! Black has no good way to parry the Qf3 double threat on f7 and a8. 10...♗b7 11.dxc5±) 10.♞xd4 forces some artificial move like Rg8 or f6, but neither of them is something what Black would like to play.]

9.a4! This move is connected to the previous check on b5. White would like to keep his annoying bishop on b5. Black has two direct choices to deal with it, but none of them are satisfactory. Bxb5 axb5 is clearly a structural improvement for White, while a6 weakens the queenside a lot and after retreating the bishop to d3 or e2 White could put the b7 and b6 squares under long term pressure with Ba3, Qb3 and Rb1.

9...♗g7 10.O-O O-O 11.♗a3! Carlsen follows his opening strategy. He wants to get some benefits on the queenside. It is important to mention that in comparison to many Gruenfeld

systems, the white pawn stands on e3 instead of e4, therefore it is much more difficult for Black to create some counterplay against the center, especially against the d4 pawn.

11...b6! Black would like to keep the structure. [11...cxd4? 12.cxd4 is clearly rse for Black. The a3 bishop becomes very strong now and the rook is coming to c1 with tempo, whereafter the queen does not have a good square to leave.]

12.dxc5!? This move is always critical in this structure. It is a double-edged choice, it might work well if White manages to gain some benefits against the weak c5 pawn, but on the other hand if White cannot make any direct use of it, the opening of the g7 bishop only favors Black.

12...bxc5 13.♔d5 The consequent follow-up after taking on c5. If the c5 pawn was traded against the one on c3, the opening of the c-file would clearly favor White as the rook could come to c1, creating many unpleasant threats against the queen.

13...♙xb5 Forcing the changing of the pawn formation is already an achievement by White. Obviously the rook cannot be taken, because the queen gets trapped after Bc6.

14.axb5 ♘d7 15.♖fd1 ♖fd8! The most logical move, but it required good calculation. [The alternative was 15...♙xc3 16.♖ac1 ♘b6 but White gets a pleasant edge after 17.♔b3 ♙f6 18.♖xc5 ♔b7 19.♘e5! White would like to install his knight to c6, from where it attacks the e7 weakness and establishes control over both opened files (c- and d-files). 19...♙xe5 20.♖xe5+= Black might miss his bishop on the long diagonal and the e7 pawn is also weak.; 15...♖ad8? is now strongly met by 16.♔c6!± and the c5 pawn is in trouble.]

16.♘g5 Carlsen feels that he must push hard for the advantage now, otherwise if Black consolidates with Rac8 and Nb6 he equalizes completely. [On 16.♔c6 Black has 16...♖ac8 and White cannot strengthen his position.]

16...e6 17.♔c6 ♔xc6 Giri chooses the direct way to play. [The calm 17...♖ac8 was also possible. Giri was probably afraid that after provoking the e6 move, White might establish his knight on d6, but I doubt it could create real problems for Black. For instance: 18.♔xc7 ♖xc7 19.♘e4 (19.♖ac1 was probably Carlsen's intention, but Black has no problem after 19...♖b8 20.c4 a6 21.bxa6 ♖a8 22.♖d6 ♙f8= and taking back the a6 pawn next.) 19...♖b8! Leaving the pin. 20.♖ab1 f5 21.♘g5 (21.♘d6? 21...♘b6± The knight is actually trapped on d6!) 21...♖b6 and Black is fine.]

18.bxc6 ♘e5 19.c7! The only attempt to put Black further problems. [White could have forced a draw by playing 19.♖xd8+ 19...♖xd8 20.c7 ♖c8 21.♙xc5 ♖xc7 22.♙xa7 ♖xc3=]

19...♖dc8! The only move!

20.f4 Carlsen had probably foreseen this position very long ago and pinned his hopes to the invasion of his rook to d7, creating real problems against the f7 pawn. However, Giri also had something in mind to make this entire idea less effective.

20...h6! A very strong intermediate move, which sends the knight away from attacking the f7 pawn. [20...♖c4 21.♚d7± was problematic for Black.]

21.♗e4 ♗c4 22.♚d7 ♗b6! Black gets access to the c7 pawn. Carlsen once again finds the only way to fight for an advantage with a stylish exchange sacrifice.

23.♚ad1! ♗xd7 24.♚xd7 The rooks have no opened files and the c7 pawn remains very dangerous, therefore the sacrifice seems to be completely justified even after first sight. Nd6 is a deadly threat now, the next move is an onlyone!

24...♗f8! 25.c4 [25.♗xc5 seems to lead to a forced draw after 25...♗xc5 26.♗xc5 ♖f8! (26...a5 is wrong in view of 27.♗a4!± and Nb6 next!) 27.♗e4 ♖e8 The move was forced because

of the Nd6 threat and now White has no other choice, than repeating the moves with 28.♗f6+ ♖f8 29.♗e4= otherwise Black pushes a5...]

25...a5! With the idea to win the main enemy with Ra7!

26.♗c3 Carlsen drives his knight to b5 to avoid the Ra7 threat. [26.♗f6+ was tricky, but it does not bring anything in case of the correct reaction: 26...♖h8! (26...♖g7? loses to 27.♗b2! as Black has no good way to parry the Nd5-b6 manoeuvre. 27...♚a7 28.♗e5!+- Black is doomed.) 27.♚xf7 (Also after 27.♗b2 27...♗g7 works well.) 27...♗g7 Black is alright.]

26...a4 27.♗b5

27...♚e8! Suddenly the knight got far away from the f6 square and Giri finds a clever manoeuvre to neutralize the strong rook on d7. Whatever White plays he will make a last preparation with Rac8 and then Re7 is coming next.

28.e4 ♚ac8! [Of course not 28...♚e7? 29.♚xe7 ♗xe7 30.♗a7!]

29.♗a7! [On 29.♖f2 Black can already play 29...♚e7! with the idea that after 30.♚d8? (30.♚d2 It makes no sense to continue to play like this, since Black can always give back the exchange on c7.) 30...♚exc7!+- wins for Black as the d8 rook is hanging.]

29...♖a8 30.♘b5 ♗ac8 31.♘a7 ♗a8 32.♘b5 A correct draw!
We can see that if someone wants to hold Carlsen, they must defend precisely in the entire game without the slightest inaccuracy. **1/2-1/2**

GM Arkadij Naiditsch
Best rating: 2737

After a long fight and a good game by Black, it seems like he should have some chances to win the game here, but as we know, in such endgames where the pawns on both sides are running, exact calculation decides the game. Sometimes a bishop can also be almost as strong as a rook because he covers the entry squares of the opponent's pawn and at the same time helps to promote his own pawn.

54...f4 This move is a must. Black needs to try and advance the f-pawn as far as possible.

55.a5 And this is also the only way to go on for White.

55...f3? After this natural move the position is just a draw. [Black could have won the game based on a very exact calculation, which is hard to make during the game. 55...♔e6! A very important move. Black is winning a decisive tempo in comparison to the position in the game. 56.♔b5 (56.♔b7 is not possible because of 56...♖g7+! 57.♔c6 ♖g2! and Black's threat of playing Rxc2 is deadly. White is totally lost.) 56...♖g2 Now we are getting a similar position to the game, just with a clear tempo up for Black because the white king is on b5 and not on b7. 57.a6 ♖xc2 58.a7 ♖c8 It is still not that easy to see that Black is in time to win the game. 59.♔a6 f3 60.♔b7 ♖e8 61.a8=♖ ♖xa8 62.♔xa8 But after

62...♔e5! White cannot do anything against Black's d4 push. 63.h4 d4 Black is winning.]

56.♔b7 Now White is just in time to save the game.

56...♖g2 57.a6 ♖xc2 58.a7 As in the lines above, Black gives his rook for the a-pawn in the hope to be in time with the d4 push.

58...♖a2

59.h4 [59.a8=♖ should also lead to a draw: 59...♖xa8 60.♔xa8 ♔e6 61.h4 ♔e5 62.h5 and White is just in time.]

59...♔f6 60.h5 ♔g5 By luring the black king to the h-pawn, White can now comfortably come back with his own king.

61.a8=♖ ♖xa8 62.♔xa8 ♔xh5 63.♔b7 And the position is a draw because Kc6 comes next. We just saw a very exciting endgame which can be used for practical calculation in any training session and of course this is a big pity for Agdestein, who could be on 2/3 in one of the world's strongest tournaments! **1/2-1/2**

French league, 2014.05.29

GM Csaba Balogh
Best rating: 2672

The last move was Rb2, White has protected his h2 pawn with check and he is ready to promote his b5 passed pawn. However, it is still far away from b8, meanwhile Black should be able to create his counterplay with the f-pawn. The first very critical moment is here, where should the black king go now?!

48...♔f3?! Black decided to turn back and support the f-pawn on the most direct way. [The best was 48...♔g1! Black had to be afraid of 49.♔e5! (49.b6 is too slow 49...f4 50.gxf4 gxf4 51.♔c7 ♖f8 52.b7 f3 53.b8=♖ ♖xb8 54.♖xb8 f2 White king is too far away, he should force a draw by 55.♖g8+ ♔xh2 56.♖f8 ♔g2 57.♖g8+=) 49...♖f8! The f-pawn is Black's only hope for salvation, he must keep it at any cost. 50.b6 f4 51.gxf4 gxf4 52.b7 f3 53.b8=♖ ♖xb8 54.♖xb8 f2 55.♖f8 f1=♖ 56.♖xf1+ ♔xf1 57.♔f5

After a couple of more or less forced moves, we have reached the last critical position...The next move is very important: 57...♔f2! Or 57...Ke2 is also good for draw with the same idea. (However the most obvious 57...♔g2?? is losing in view of 58.h4 ♔f3 59.h5+- and Kg6 next wins the game.) 58.h4 ♔e3! This is the point of Kf2, Black must approach with his king from the side! 59.h5 (59.♔g6 59...♔f4 60.♔xh6 ♔f5!= is an important theoretical drawn. Kg7 is met by Kg4, while h5 Kf6 squeezes the white king to the h-file.) 59...♔d4! Only this way Black can hold the draw! 60.♔g6 ♔e5 61.♔xh6 ♔f6= 62.♔h7 ♔f7 63.h6 ♔f8 64.♔g6 ♔g8=; 48...♔h3? is also logical, to keep the h2 pawn under attack, but it loses because Black cannot support the f2 square with his king... 49.b6 f4 (49...♔xb6+ 50.♔xb6 ♔xh2 51.♔e5+-) 50.gxf4 gxf4 51.b7 ♔xb7 (51...f3 52.♔c7 ♔xb7+ 53.♔xb7+- Here is the problem. Black cannot make progress, his f-passed pawn is completely useless now.) 52.♔xb7 ♔xh2

White is just in time to catch the f-pawn: 53.♔f7! ♔g3 54.♔e5 f3 55.♔e4 f2 56.♔e3+-]

49.b6 f4 50.gxf4 gxf4 51.♔c7

51...♔f8?! It is amazing! This most obvious move to support the pawn from behind, what everybody would play without thinking with the idea to spare some time for the forthcoming critical moments might be the losing mistake. .. [51...♔h8! 52.b7 ♔e3 should have been played. We need to think very deeply to understand the point...The next move is White's key resource to continue playing for the win: 53.♔b6! (53.b8=♔ leads to draw after 53...♔xb8 54.♔xb8 f3 55.♔e8+ ♔d3 56.♔f8 ♔e2 57.♔d6 f2 58.♔e5 f1=♔ 59.♔xf1 ♔xf1 60.♔f5 and we reached the same position as in the 48...Kg1 line, where we already know, that Kf2 and Ke2 are holding the draw, while Kg2 loses after h4!) 53...f3 54.♔xh6! ♔xh6 55.b8=♔ f2= White does not have any real winning chances, because the f-pawn is too far advanced and it keeps the queen busy...]

52.b7 h5? The decisive mistake. [52...♔e3 53.♔b3+ ♔e2 54.♔b6! This is the critical test of Black's defense again. Promoting the pawn would transpose to the same draw as in the 51...Rh8 line. 54...f3 55.♔e6+ ♔d3 56.♔f6! ♔xf6 57.b8=♔

The difference to the 51...Rh8 line is, that the black pawn could only reach the 3rd rank now. It is very difficult to give a correct evaluation, what happens after 57...♖f4! (57...f2? is refuted now by 58.♔d8+ ♕e2 59.♔e7+!+- after this important intermediate check White can already capture the rook.)]

53.b8=♔ ♖xb8 54.♕xb8 ♕e4 Black has just realized his mistake in the 52nd move... [He was intending to play 54...♕e3 but White wins after

55.♖b5! White has enough time to collect the h-pawn and the catch the f-pawn... 55...f3 56.♖xh5 f2 57.♖f5 ♕e2 58.h4+-]

55.♕c7 The rest is already easy. White can choose between different wins. Fressinet calculates the most principled way of winning to bring the king closer as fast as possible...

55...f3 56.♕d6 h4 [56...♕e3 loses now to 57.♕e5 f2 58.♖b1

♕e2 59.h4 f1=♔ 60.♖xf1 ♕xf1 61.♕f4 and Black misses one tempo... 61...♕e2 62.♕g5 ♕e3 63.♕xh5+- Black should play Kf5 now to hold...]

57.♖b4+ ♕e3 58.♕e5 f2 59.♖e4+ ♕d3 [The trick was 59...♕f3 60.♖xh4! f1=♔ 61.♖f4+ ♕g2 62.♖xf1 ♕xf1 63.h4+-]

60.♖f4 ♕e2 61.♕f5 f1=♔ 62.♖xf1 ♕xf1 63.♕g4 and the game is over. Black is not in time to squeeze his opposition to the h-file.

63...♕f2 [63...♕g2 64.h3 ♕f2 65.♕xh4 ♕f3 66.♕g5+-]

64.♕xh4 Black resigned. **1-0**

Clash of the Titans

(17) Tal, Mihail
- Grigorian, Karen [A29]

GM Kamil Miton
Best rating: 2655

1.c4 e5 2.♘c3 ♘f6 3.♘f3 ♘c6 4.g3

4...♙b4 Black also has other options: [4...d5 5.cxd5 ♘xd5 6.♙g2 ♘b6 (6...♙e7? 7.♘xe5) 7.O-O ♙e7 8.a3 O-O 9.d3 ♙e6 10.b4 f6 leads to very complex play. This line has recently been popular on the top level.; 4...♘d4 5.♙g2 (5.♘xe5? 5...♙e7) 5...♘xf3+ 6.♙xf3 ♙c5 7.O-O O-O with more or less equal play.]

5.♘d5 Another kind of position is possible if White allows the exchange on c3: [5.♙g2 5...O-O 6.O-O ♙xc3 7.bxc3 d6 8.d3 h6 Black's position is very solid. White can try to transfer the knight to d5 (Ne1-Nc2-Nb4) or play e4 with the idea Nh4-f4.]

5...a5 [5...e4 6.♘h4 O-O 7.♙g2 ♙e8 8.O-O d6 Threatening g5, but after 9.d3+= White is better.]

6.♙g2 d6 7.O-O O-O 8.e3 White is preparing d4 to occupy the

center and limit the black bishop. [8.d3 8...h6 Preventing Bg5 and now White needs to play e3-d4 anyway.]

8...♙c5 9.b3 [9.d4 9...♙a7]

9...♘xd5 10.cxd5 ♘b4 11.d4 [11.♘e1 With the idea to force the black knight to go to the bad a6 square but after 11...c6 the knight will go back to a central place.]

11...exd4 12.♘xd4 ♙xd4 [12...♙e8 13.♙b2 gives White a stable advantage.]

13.exd4

White's bad structure is compensated by the bad knight.

13...♙e8? I think this is a mistake. Black had a last chance to solve the problems with the knight by playing [13...c6 14.dxc6 bxc6 with Be6-Bd5 next and Black's position should be good.; 13...♙f5?! 14.a3 ♘d3 15.♙e3 ♙d7 16.♙d2]

14.a3 ♘a6 15.♙d2 b6 16.b4! ♘b8 [16...axb4 17.axb4 ♙b7 18.♙c2 And Black will soon have problems with the c7 pawn.]

17.bxa5 bxa5

It is clear that Black wants to develop the pieces as soon as possible, as then the position will be good for him. Tal stays true to his style since he now starts to play in a very dynamic way.

18. Re1! A nice move. Tal is preparing to put pressure on the kingside, which is why he exchanges the rooks.

18...a4 19. Wh5 d7 20. de4 [20. dg5 This move also develops a huge attack and below are some example variations: 20...Re1+ (20...f6

21. de4! Re4 22. Re4 fxg5 23. Rae1 with the idea to play Re8. 23...g6 (23...a6 24. Re7 with the idea to play Qf7.) 24. Wh6 Wf8 25. Wxg5 a6 26. Rf4+-) 21. Re1 Wf8 22. de4 h6 23. d3 a6 24. dd2 and the g4-g5 plan should be decisive.]

20...g6 [20...h6 21. dxh6!+- No calculation is needed for this sacrifice!]

21. Wh6 Wf6 The queen is coming to help in defence but after the g6 move the black king is too weak.

22. dg5 Wxd4 This pawn doesn't mean anything.

23. Wh4 Threatening Bf6.

23... Wg7 [23... df5 24. dxf5 Re1+ 25. Re1 Wxh4 26. dxh4 gxf5 27. Re8+-]

24. dh6 Wh8 The only square to hold the diagonal. If the black queen had gone to c3 or d4 then the rook would have attacked it.

25. df5! The begining of a fantastic combination. White could also have won after [25. dd3 25... a6 26. dxa6 Rxa6 27. Re8+ dxex8 28. We7! Wxa1+ 29. dg2+-]

25... Wc3 [25... Rc8 26. We7!+- White has many tactical ideas because of the weak back rank.]

26. Re8+ dxex8 27. Rc1 We5

28. ♔d8! gxf5

29. ♔f1! The most accurate move. The idea is of course Re1. [29. ♔d2 doesn't seem to make any difference, but after 29... ♘c6! 30. ♔xa8 ♘d4 Black gets counterplay over the weak light squares!] **1-0**

Editorial Preface

The main event of the week in Norway just came to an end. Sergey Karjakin took the clear first place with 6/9 for the second year in a row.

The young Russian played a lot of long games, showed great fighting spirit and great physical shape. The 2nd place went to Magnus Carlsen with 5.5/9. It is hard to imagine him being too happy about his performance, especially considering his missed win in round 8 against Svidler.

The 3rd place went to Grischuk with 5/9. He had an up and down tournament but managed to finish it with a victory over Kramnik with the black pieces.

The Russian higher league had 3 winners, all on 6.5/9. Igor Lysyj had the best tie-break, followed by Zvjaginsev and Jakovenko.

It was a very fighting event with a lot of great games played in it.

We can be very happy about the fact that already in 3 days the World Championship in Rapid and Blitz is going to start in Dubai, with almost everyone from the Top 10 participating in it, including Carlsen, Aronian, Nakamura, Karjakin, Grischuk and Anand. We can expect a lot of tension and excitement.

With best chess wishes,

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Svidler, Peter(2753)
- **Carlsen, Magnus(2881) [A27]**

2nd Norway Chess 2014(8.4),
2014.06.12

GM Arkadij Naiditsch
Best rating: 2737

We don't often see Carlsen missing big winning chances, but this time it is definitely the case and one more time against Svidler (we still remember his game in the last Candidates, where he lost with White in a much better position). After the opening Black manages to reach a very nice position, followed by a great attack and finally when it seems like White would already resign in a couple of moves, Carlsen makes a huge miscalculation which leads the game into total unclear waters.

1.c4 1.c4 seems to be more fashionable again.

1...e5 And 1...e5 is probably the most played answer for Black right now.

2.♘c3 ♘c6 3.♘f3 f5 is quite a rare line, but personally I think it deserves a lot of attention. Black is quickly getting strong in the center, which helps develop attractive play. [3...♘f6 is the main move.]

4.d3 [Maybe another option is 4.d4 4...e4 5.♘g5 with an interesting position.]

4...♘f6 5.g3 is also pretty standard development for White. The bishop is taking place on g2, where he will control the a8-h1 diagonal.

5...♙b4 Strategically interesting play. Black makes 2 moves to give up his bishop against the knight on c3, which seems to be strange. In fact Black is trying to create a damaged pawn structure for White and on the other hand doesn't want to lose time with g6-Bg7.

6.♙g2 ♙xc3+ 7.bxc3 d6 And already on move 7, we are in a very fighting position which was clearly Carlsen's goal.

8.O-O O-O The first moment of the game where White needs to have a thought about the future plans. Black's idea is simple, to play Qe8-Qh5 and develop an attack on the kingside.

9.♖b1?! A normal move, but it is hard to see Svidler's idea, especially since he is playing already on the next move Qb3, which makes the move Rb1 look very strange. [The immediate 9.♙b3 looks much more logical to me. White's play should be connected with pushing c5.]

9...♙e8 Black continues with the usual plan.

10.♙b3 b6! A very strong move! Black is stopping White from his only play connected with c5. Of course 11.c5 doesn't work now because of 11...Be6.

11.♘h4 What else to do?! It is hard to find a clear plan for White.

11...♘a5 Black is preparing to create a strong attack.

12. ♔a3?! Another move by Svidler which I can hardly explain. The white queen is taking a very bad position on a3 without obvious reasons. [12. ♔c2 seems to be a lot more normal to me.]

12... ♖b8 13. ♙e3 Once again Svidler seems not to be afraid of Black's play on the kingside and the only question is "why"?!

13...f4! All black pieces are nicely placed, so it is time to launch the action. With this pawn sacrifice Black is bringing almost all his pieces into the attack, which looks pretty deadly, especially since the white queen on a3 is totally out of the game.

14.gxf4 To take on f4 is already a must.

14... ♔h5 15. ♘f3 ♙h3 16. ♙xh3 ♔xh3 17. ♙h1 White is fighting not to get mated on the spot.

17... ♖be8!? In a position with a lot of good moves, Magnus continues bringing all his pieces into the attack and doesn't care about temporary material losses.

18. ♔b2 Defending from the exf4 threat. [In case of 18. ♔g1 18...exf4 19. ♙xf4 ♖xe2 Black's position is just winning.]

18...e4! Black continues playing a great game, totally outplaying his opponent. By playing 18...e4 Carlsen is putting his opponent in front of a difficult decision. In case the knight

from f3 is going to move the threat of playing Ng4 could be deadly, and in case of taking on e4, the black knight from a5 is joining the attack with Nxc4. What a horrible position for White!

19. ♘g5 ♔h5 Black wants to play Ng4.

20.dxe4 [20. ♔g1 wasn't better since after 20...exd3 21.exd3 h6 the knight has no squares to escape.]

20... ♘g4 21. ♘f3 ♘xc4 The game seems to come to an end.

22. ♔b3 ♖xe4 The material is equal and Black has a very strong attack...

23. ♖g1 d5 Carlsen is securing the last open diagonal, not giving White any chances at all.

24. ♔b5 It is hard to call Svidler's play a fight, it is more like waiting for the end of the game.

24... ♖xf4? What a miscalculation by Carlsen! We don't often see the World Nr.1 blundering something, but this time it is clearly the case. [One of the easy options for Black was to play 24...c5 and White is totally paralyzed.; Another easy line is 24... ♘cxe3 25.fxe3 ♘f2+ 26. ♔g2 ♘h3 which should be enough for an easy win.]

25. ♙xf4 Probably when playing 25.Bxf4 Svidler still could not believe his luck.

25...♖xf2+ 26.♔g2 ♜xe2 Maybe now comes the move that Carlsen blundered or underestimated:

27.♕f1! The only move, but it is more than White could expect having a lost position. The game is getting very tricky now.

27...♖e4 [27...♜xf3 already didn't work since after 28.♜g3 ♜e4 29.♜d7 only White can be better.]

28.♜xg7+ Svidler finds his best chance to fight. [After 28.♕xe2 28...♖xc3+ 29.♕f2 ♖xb5 30.♜xb5 c5 we would reach quite a strange material situation, but one thing is clear here and that is that Black cannot be worse and is probably even better.]

28...♕f8 After this move, Black will probably not have any more chances to play for a win. [Of course it is looking dangerous, but maybe the best way to continue was still 28...♕xg7 29.♜d7+ ♜f7 30.♕h6+ ♕f6 In this very sharp position, it is not that simple to find moves for both sides, but it seems like Black has better chances overall.]

29.♕xe2! Since the mistake of 24...Rxf4 Svidler keeps on finding the only moves to stay in the game.

29...♖xc3+ Black can't do anything better than winning the white queen.

30.♕f2 ♖xb5 31.♜bg1 And suddenly we can see that the

position has become totally unclear! From a material point of view, Black of course has a big advantage, but White has a very dangerous attack.

31...♖c3 Black is trying to get the knight to e4.

32.♜xc7 Not a bad move, but why not get the rook from g1 first to g7?! [32.♜g8+ looks more logical. 32...♕f7 33.♜1g7+ ♕f6 34.♜xc7 ♖e4+ 35.♕g2 and I think White would keep excellent practical chances to win the game. It is really hard as Black to keep all the white threats in vision.]

32...♖e4+ 33.♕e1 In this very dangerously looking position for Black Carlsen finds a great move:

33...♖c5! A very strong move. Black wants to play Nd3 as well as Ne6. [Of course not 33...♜xf3? 34.♕h6+ ♕e8 35.♜g8+ with mate.]

34.♜c8+ ♕f7 35.♜c7+ ♕f8 36.♜c8+ Black can't avoid the perpetual check.

36...♕f7 37.♜c7+ ♕f8 We just saw a slightly unusual game. Black totally outplayed White and it seemed like the game was over, but with a huge blunder and later on missing again some chances Carlsen could even have gotten himself into trouble. Overall, chess is based on tactics, so it is never too late to blunder! **38.♖g5 1/2-1/2**

**(2) Caruana, Fabiano(2791)
- Karjakin, Sergey(2771) [A35]**

2nd Norway Chess 2014(9.1),
2014.06.13

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round and Karjakin is the tournament leader with 5/8, followed by Carlsen and Caruana with 4.5/8. In the current game, Caruana maybe got some little advantage out of opening and tried his best to push Black's position to the limit. It seems like White has maybe pushed too hard and suddenly Black got excellent winning chances, which Karjakin converted in a perfect manner. Actually we have to admit that it seems like Karjakin is going to be very soon the contender for the WCC match against Carlsen. Sergey has improved a lot during the last 2 years, he has a huge preparation and just amazing physical shape.

1.♘f3 A slow start of the game by Caruana, but it is just the beginning.

1...♞f6 2.c4 c5 Karjakin sticks to his main lines. Already in the last events he showed how well he is prepared, for example in the games against Mamedyarov or Nakamura.

3.♘c3 ♞c6 4.g3 [4.d4 is the other main move.]

4...d5 [4...g6 is possible as well.]

5.cxd5 ♞xd5 6.♙g2 ♞c7 From the structure, we are some sort of "Benoni reversed".

7.a3 In many line s, White's main idea is to play a3-b4 which would make the bishop on g2 even stronger. Why start with 7.a3 and not first 7.d3 or 7.0-0, this can show only very deep

analyses of the players. One thing is clear, 7.a3 is played against 7...e5, when 8.b4 is looking strong.

7...g6 A very solid move. The bishop is going to take a nice position on g7.

8.h4!? A very interesting move. White is trying to include the moves h4-h6 to have the option of playing Be3 and Qd2 with the attack on h6 and winning half a tempo.

8...h6 Of course to play 8...h5 is not an option for Black, which would make the g5 square just perfect for the white knight, and 8...Bg7 also looks risky because of 9.h5.

9.d3 ♙g7 10.0-0 ♞d7 The bishop has to be developped on d7 in any case, so the black rook can take a nice position on c8. [10...♞e6 seems to lead to the same position over a different move order.]

11.♙e3 ♞e6 The lack pieces are nicely placed so we can be sure that in case White is better here, it should be very minimal.

12.♞b1 Caruana chooses the most logical plan in the position, to play b4. [A plan to keep the black king from castling would lead to nothing after 12.♞d2 12...♞cd4 followed by Bc6, with an excellent position for Black.]

12...♞c8 Karjakin continues his healthy, solid play.

13.♘e4 b6 14.b4 cxb4 The right reaction. Of course Black should not give White a chance of playing bxc5.

15.axb4 ♘cd4 Might be premature, but it is not a bad move of course. [Maybe a bit more precise would be to start with 15...O-O and now it is really hard to find an idea for White. 16.b5 (16.h5 16...g5; 16.♖d2 16...f5) 16...♘cd4 We are back to the position in the game, just without giving White any extra chances of playing b5.]

16.♙xd4 ♘xd4 17.♘xd4 ♙xd4

18.e3 Very logical and good play. The black bishop will be blocked by the "wall" of white pawns. [18.h5 18...g5 doesn't change much.]

18...♙g7 19.b5 It is also logical to block the black pawn structure with b5, but maybe White could have tried to create some more direct play on the kingside. [19.h5!? looks like an interesting option. 19...g5 20.d4 O-O 21.♖e2 followed by Rfd1 and maybe White can keep on putting some pressure in the hope to be able in the future to create some play on the kingside.]

19...O-O 20.d4 ♖c7 Black continues being very solid. [20...e5 seems premature since after 21.dxe5 ♙xe5 22.h5 g5 23.f4 Black could get into some trouble.]

21.f4 Caruana is playing against the e5 move e5, but I think 21.f4 is a too drastic measure. In the long run the white pawns could become targets and the black bishop from g7 is going to join the game after Bf8-e6. [I believe White could try to be a bit better after 21.h5 21...g5 22.♖e2 with some pressure.]

21...♖c8 Black is trying to provoke exchanges on the c-file, after which Black should not be in danger anymore.

22.♖b2 To let Black play Rc2 is not an option.

22...♖d8 [Maybe Black could have tried to play 22...♙e6 with the idea of playing Qd7-Rfc8. I can't imagine White being better here.]

23.♙h2 ♙e6 24.♖ff2 ♙f5 Another very solid move, but now maybe White is taking the initiative back. [Maybe an option was to play 24...f5 which is usually a mistake, but this time Black is controlling the c-file, which helps a lot. 25.♘d2 ♖c3 with good play for Black.]

25.♖bc2 White has finally covered the c-file.

25...a5! A very good move. Black is getting rid of his only weakness, the a7 pawn.

26.♖c1 Caruana is clearly playing for a win. [26.bxa6 26...♖xc2 27.♖xc2 ♖xa6 would lead us to a position where a draw should be the most expected result.]

26...♖xc2 27.♖xc2 ♔b8 All Black needs to do now is to exchange one pair of rooks.

28.♖c6! Caruana finds a nice idea to create at least some trouble.

28...♗d7 29.♘c3 The key move behind 28.Rc6.

29...e6 Finally the black bishop is close to be back into the game, just one move is missing. [Of course it would be a serious mistake for Black to be greedy and play 29...♗xc6? 30.bxc6 followed by Nb5, with a close to winning position for White.]

30.♖c4 [Playing 30.h5 30...gxh5 wouldn't bring White anything.]

30...♗f8 [30...♖c8 didn't equalize since after 31.♗c6 White keeps on putting pressure.]

31.♗c6 ♔d6 It seems like White has managed to achieve some advantage, but it is still hard to say if this little better can be enough to create some serious threats. White's main idea is clear, to play Na4 and put pressure on the b6 pawn.

32.♘a4? The right idea in the wrong moment. [A simple move like 32.♗c2 with the idea of playing Na4 next could be quite unpleasant for Black. White should also not forget about the h5 push...]

32...♗xc6! Black is using the fact that White cannot play bxc6 in this moment.

33.♖xc6 [After 33.bxc6 33...b5 34.c7 bxc4 35.cxd8=♔ ♔xd8 36.♗xc4 only Black could be better.]

33...♗b4 White doesn't have a decent way to defend the b5 pawn.

34.♘c3 What else to play?! 34.Nxb6 Qxb5 would lead to a much better position for Black.

34...a4! 35.♗c2 a3 36.♖xb6 Now maybe White's position is already becoming lost, but it is hard to blame Caruana for this mistake, as it is really difficult to find a better option. [Maybe White should have tried his practical chances after 36.h5 36...gxh5 37.f5 and of course Black has a lot of solid moves, but White would at least have plenty of tricks which could be unpleasant in a practical game.]

36...♖c8 Now things are developing really badly for White...

37.♖c6 ♖xc6 38.bxc6 ♗c4 39.c7 ♗xc7 40.♗b3 ♗a5 The time trouble is over and it is very unclear how White is going to survive such a position. One of the main problems is that f4 is already played, which doesn't only make the e3 pawn a target, but the white king is also not feeling in a great shape seeing the 2nd rank "naked". I think we could evaluate the current position as lost in a practical game.

41. ♖c2 [Maybe White would have had better chances after 41.e4 followed by d5, but it is also hard to imagine anything else than a victory from Black here.]

41... ♜b4! A very strong move. Black wants to play Qc4 next which makes White move his knight away from c3.

42. ♘a4 ♜e1 And the queen is entering White's position. The game is over.

43. ♘c5 Caruana is starting his last attack, but of course Karjakin is not very impressed.

43... ♜xe3 44. ♘d7 ♜xd4 45. ♜c8 ♜b4 Another very solid move, not even giving White hopes of thinking for a chance to escape.

46. ♘f6+ ♜g7 47. ♘e8+ ♜h8 All black pieces are protecting each other.

48. ♜c7 ♜e7 Karjakin is accurate until the end. With the last little calculation Sergey is making his triumph perfect by winning the Norway Chess tournament for the second time in a row in front of Magnus Carlsen.

49. ♜e5+

49...f6 This move is just too simple to miss.

50. ♘xf6 ♜g7 51. ♜b8+ ♜f8 What to say about such a game, where White is pushing and suddenly one inaccuracy costs him the game. Of course we have to admire how Karjakin proves again and again to be a really great defender with an eagle eye which is never missing a counter chance in case there is one! **0-1**

**(3) Rapport, Richard(2701)
- Gajewski, Grzegorz(2650) [D38]**

HUN-POL Friendly Match m 2014(2.3),
2014.06.09

GM Csaba Balogh
Best rating: 2672

Rapport won a nice attacking game in his usual creative style.

1.♘f3 d5 2.d4 ♘f6 3.c4 e6 4.♘c3 ♙b4 This is the initial position of the Ragozin defense. Recently it is frequently employed even by Carlsen and Aronian.

5.♙b3!? A relatively rare line with a lot of poison in it. If Black is not well prepared, he might quickly end up in a worse position.

5...c5 6.dxc5 ♘c6 The main continuation. [The second of Carlsen, GM Jon Ludwig Hammer recently tried 6...♘a6 7.a3 ♙xc3+ 8.♙xc3 ♘xc5 9.cxd5 ♙xd5 10.♙e3 ♘ce4 11.♙e5 ♙xe5 12.♘xe5 ♘d5 Black was fine in Goganov-Hammer, Yerevan 2014 game.]

7.♙g5 Theory is developing rapidly in this line. According to the games, it is unclear at the moment whether Black should play 7...Qa5, 7...h6 or 7...dc4. One top player chooses this one, another that one...

7...♙a5 [However 7...d4?! is considered to be bad because of 8.O-O-O! ♙xc5 9.e3 White makes use of the pin.]

8.♙xf6 dxc4 9.♙xc4 gxf6 10.♖c1 We are still following plenty of high level games, both players were blitzing out their moves. White strengthens his c3 knight in order to be able to save his queen from the exchange after Qxc5.

10...♙xc5 11.♙h4

11...♙e7 Black's pawn structure is damaged and he would like to find shelter for his king behind his pawn phalanx. White intends to develop his bishop to g2, therefore castling queenside is very risky, while castling kingside is does not look a very safe place neither.

12.g3 ♙xc3+ This capture would have sooner or later become necessary, because after leaving the pin with Bg2 and O-O, White was threatening with Ne4.

13.bxc3! White weakens his pawnstructure in order to keep his attacking chances. [On 13.♖xc3 13...♙b4 would have forced the trade of the queens and Black equalizes.]

13...b6 14.♙g2 ♙a6 This is the novelty. A logical one to prevent castling, but a deeper look shows us, that it is a dubious one. [14...♙b7 15.O-O h5 was played by Leko, although he did not manage to equalize due to the powerful moves

of Radjabov 16.♘d4 ♖ac8 17.♞b1 ♜c7 18.♞fd1 ♘xd4 19.cxd4 ♚g5 20.d5! ♚xh4 21.d6+ ♚e8 22.dxc7! ♚c4 23.♞bc1 ♚xc1 24.♞xc1 ♙c8 25.♞d1+= With a clearly better endgame for White. Radjabov-Leko, Zug 2013]

15.♘d2! White transfers his queen to the more active e4 square. Black must waste an important tempo on protecting his knight and he cannot offer the queen's exchange with Qg5. [15.♘d4? was not possible to use the pin in view of 15...♘xd4 16.♙xa8 ♘xe2+- Black wins material.]

15...♞ac8 16.♘e4 ♚f5

17.g4! Sending the queen to a really awful place.

17...♚g6 It is going to take a lot of time to bring back the queen to the game, but other moves would have lost even faster. [17...♚f4? loses to 18.e3 ♚e5 19.f4+- and the f6 falls.; 17...♚e5? 18.O-O!+- and Black has no defense against f4, after which the f6 falls.]

18.f4 Very strong move to create different attacking ideas such as f5 to open the f-file on the main weakness on f6. [However 18.♚g3! was even stronger with the following ideas: Black has to cover the d6 square 18...♘e5 (The most natural 18...♞hd8

is refuted by the hidden 19.c4!! and Black has no defense against Qa3! Not only the king is in trouble, but also the a6 bishop is hanging.) 19.g5!± (19.c4 19...♘xc4 is now less clear.)]

18...♘d4 Black desperately searches counterplay, but he creates even bigger problems. [18...♞hd8 suggested itself, but White gets a very strong attack here as well after some powerful dynamic moves 19.O-O! ♙xe2 20.f5 White should do everything in order to strengthen the pressure on the f6 square 20...♚g7 21.g5! White seems to crush, but Black also has his resources (21.♞f2 is too slow because Black is in time to get rid of the strong knight on e4 21...♙d3! 22.fxex6 ♙xe4) 21...fxg5 22.f6+ ♚xf6! Only move to stay in the game, but the attack continues after 23.♘xg5! ♙xf1 24.♞xf1 ♚g6 25.♘xf7+-it looks extremely dangerous, although the computer still believes in the defensive resources.]

19.♞d1! A subtle move , which forces the knight to an unfortunate square due to a small tactical trick.

19...♘c2+ [19...♘xe2 loses to 20.♘xf6! ♚xf6 21.♞d7+! ♚xd7 22.♚xf6+-]

20.♙f2! The knight is clearly misplaced on c2. The Nd4-c2 manoeuvre has sent the rook to a better place and also helped White to connect his rooks. It has a small achievement too, that

the plan to put the rook to f1 and push f5 is more difficult to execute.

20...♖hd8 21.♙f3! A very deep move! The main point can be seen in the 21.Ng3 line. [21.♘g3 was in White's mind with the idea of Be4, doubleattack on g6 and c2 and also to transfer the knight to h5 afterwards. However Black had a brilliant defense here 21...♖xd1 22.♖xd1

22...♘e3!! 23.♙xe3 ♖c2 and suddenly Black gets very strong counterplay. An illustrative line is 24.♖e1 only move according to the computer 24...♙xc3+ 25.♙f2 ♖d4+ 26.♙f1 ♙xf4+ 27.♙g1 (27.♙f3?? 27...♙xf3+) 27...♖c1 with an unclear game.]

21...h6 Black probably wanted to defend against another threat of g5 and on f5 Bh5 followed by g6 check. [21...♙b7 could have strongly met by 22.f5! exf5 (22...♙g7 23.fxe6 fxe6 24.g5! is also crushing.) 23.♘g3! ♙xf3 24.♘f5+ ♙f8 25.exf3+- and Black is completely dominated. The main differences are in the situation of the knights and the queens.]

22.♘g3! The sacrifice of Ne3 and Qc2 makes no sense anymore since the king has a route back to f2-g2. White is threatening with Be4 winning a piece.

22...♖xd1 23.♖xd1 ♖c4 [23...♖xc3 loses to the motif what we had already seen 24.♙e4 ♙g8 25.♘h5 ♙h8 26.♘xf6! ♙xf6

27.♖d7+! ♙xd7 28.♙xf6+-]

24.♘h5! Creating the "usual" threat of Nxf6 Qxf6 Rd7!

24...♙b5 Black manages to cover the d7 square, but now the problems are coming from different direction:

25.♙g3! Another subtle attacking move! White gives up the pressure on the f6 square for an even bigger threat. The new target is on the d6 square, the queen is ready to go there after the f5.

25...♙g8 Black leaves from the f5 tempo, but it does not solve the problems...

26.f5 e5

27.♘xf6! The situation of the white pieces and the

misplacement of the black pieces were calling for a final tactical blow. Rapport does not miss such a chance.

27...♔xf6 28.♖d6+ ♔g7 [28...♔e7 leads to quick mate after 29.♕xe5+ ♔f8 30.♖d8+--]

29.♕h4! Another silent attacking move, but it was already easy to find. Black has no defense.

29...♕f8 [On 29...♕h8

the fastest and prettiest mate is 30.♖g6+! fxf6 (30...♔f8 31.♕d8+ ♔e8 32.♕d6#) 31.♕e7+ ♔g8 32.♕d5#]

30.♕xh6+ ♔g8 31.♖g6+! [Very nice final blow! Black resigned in view of 31.♖g6+ 31...fxg6 32.♕d5+ ♕f7 33.♕xg6+ ♔h8 34.♕xf7--] **1-0**

GM Csaba Balogh
Best rating: 2672

We are in the final round of the Russian Higher league. The tournament, where the first 5 players qualify to the Russian Superfinal, where they join to Kramnik, Grischuk, Karjakin and the other top players. The winner of this game had a guaranteed place there, but draw were not enough for them. My good friend Vadim Zvjaginsev manages to win a brilliant tactical game. The game is full of unusual, but beautiful tactical motifs.

1.d4 d5 2.♘f4 White tries to drive the game to less explored territories.

2...♞f6 3.e3 g6 4.c4 An ambitious move. Usually the players who quickly develop their bishop to f4 like to set up a very solid position with c3, but in this game White logically wanted to create complications. Now we reached a Gruenfeld-like position and both sides played in the spirit of this opening and used many typical tactical and positional ideas.

4...c5!? In the spirit of the Gruenfeld to play against the center. [4...♞g7 5.♞c3 would have transposed to a huge main line of the Gruenfeld, but Zvjaginsev himself does not employ this opening, therefore he handles the opening with the typical moves but in the same time he avoids some theoretical discussions.]

5.dxc5 ♞c6 Zvjaginsev consequently continues his idea to avoid transpositions. We have already reached a new position. [However if Black had played 5...♞g7 6.♞c3 we have again transposed to a position with thousands of games...]

6.♞f3 ♞e6 [The most natural and objectively stronger move 6...♞g7! would have been a transposition again after 7.♞c3]

7.♞c3 ♞a5 The most consequent move again, but White can make use of, that the bishop has not developed yet to g7 and the pressure on c3 is that big at the moment. [7...dxc4 was dubious in view of 8.♞g5! White wins the c4 pawn.]

8.♞b3! White attacks the b7 pawn and suddenly it is not easy to deal with this simple threat. Black has no adequate way to protect it, some passive moves like Nd8 obviously does not come into consideration, neither the trade of the queens with Qb4 because White is pawn up. Black is basically forced to do the following intuitive sacrifice.

8...♞g7! 9.♞xb7 0-0! Who says A must say B too. A piece

does not count now, Black must focus on the e1 king, which still needs two tempi to castle kingside and Black should find his counterplay on the c3 square. Ne4 is a very dangerous threat.

10. ♖xc6?! Too greedy! [10. ♖b5! White should have been satisfied with two extra pawns and offered the trade of queens. White would have had the advantage in this case, but who could refrain to a "free" piece on c6...]

10... ♘e4! We have reached the dream of all Gruenfeld players. Such a dynamic position.

11. ♘d4 White tries to close the bishop and prevents the main Bxc3 threat. [On 11. ♘d2 11... ♘xd2 12. ♖xd2 dxc4 is very unpleasant. All diagonals and files are opened on the exposed king. White has nothing better than 13. ♖e2 ♖b4 14. ♖b5 but then Black wins back the material and gets a good position after 14... ♗xc3 15. ♖xb4 ♗xb4]

11... ♗xc3 12. a3! Very nice resource also from White! Black was threatening with different kind of discovered checks with the knight, but all of them could be met by b4! Only one check prevents it, but first Black activates one of his rooks.

12... ♖ac8 13. ♖b7

13... ♘a2+!! What an amazing move, which forces the king

to run! [13... ♘e4+ 14. b4 ♖a4 15. ♖b5+- forces the trade of the queens and White wins.; 13... dxc4 14. ♖b4 ♖xb4 15. axb4+- also with a winning advantage.]

14. ♖d1 [14. b4 could now be met by 14... ♖xa3! this is the point of the unexpected Na2 move to close the rook on a1!]

14... ♖a4+ 15. ♖e1 [15. ♖b3 White obviously would like to trade queens with such a vulnerable king, but it did not work tactically in view of 15... ♖xb3+ 16. ♗xb3 dxc4 17. ♘d4 ♖fd8! The dynamic plays continues even without the queens on board. 18. ♖xa2 c3 19. ♖a1 ♗xd4 20. exd4 ♖xd4+ 21. ♖c2 cxb2 22. ♖xb2 ♖xf4+- Black soon ends up with material advantage.]

15... ♖a5+ Unfortunately Black is forced to repeat moves. [15... dxc4 might look good at first sight, but Black does not have enough compensation after 16. ♖xa2! ♗xd4 (16... c3 17. b3) 17. exd4 c3 18. ♖a1 ♖xd4 19. ♖b4!+- and White covers everything.]

16. ♖e2?! Objectively a mistake after which Black is better, but it was impossible to foresee what will be the outcome of the complications.. White should have agreed to the repetition with 16. Kd1, but the tournament situation also forced White to continue this exciting fight.

16... ♖xc5! Grabbing some material and indirectly protecting the a2 knight.

17. ♘xe6 [17. ♖xa2? 17... ♖xc4+ 18. ♖f3 ♖xa2+-]

17... fxe6 [17... ♖xc4+ was also strong, but Zvjaginsev did not want to send the king to the kingside, he preferred to keep it in the center... 18. ♖f3 (On 18. ♖e1 Black wins with the pretty blow

18...c3+! 19.bxc3 xc3+ 20.e2 xa1 21.f8 White is still ahead materially, but there is a forced mate... 21...c3+! 22.f3 d1+! 23.g3 e4+ 24.h3 h5#) 18...e4+ 19.g3 fxe6 with a promising position for Black!]

18. ♖b3 White tries to bring back the queen to the defense and also would finally like to take that knight on a2 off the board...

18...dxc4! Excellent reaction! Black sacrifices a piece again, but he locks the white queen to the corner, which gives him more space to build up his attack against the king, which is still standing in the center.

19. ♖xa2 e5!? Zvjaginsev decides to advance his pawn to e4 to squeeze white even more and to avoid defenses like f3-Kf2.

[However Black had an even stronger move, which leads to win in beautiful lines:

19...xf4!! Eliminating the defender of the b8 square. 20.exf4 b8! 21.b1

21...b3!! This would have been just amazing! Black is a full rook down, but he basically caged all white pieces. Black is winning in all lines: 22.h4 Nice idea to bring a defender and exchange an attacker with Rh3, but it is too slow (22.e1 trying to free the bishop, but Black does not allow it 22...a5+! 23.d1 d5+ 24.e1 and the winning combination is: 24...c3+! 25.bxc3 e4+ 26.d2 xb1-+) 22...f5 23.h3 c2+ 24.e1 xh3 25.gxh3

25...c3+! 26.bxc3 ♖xa2—]

20. ♗g3 e4 21. ♖d1 A desperate attempt to hide the king on the queenside, but it is easy to feel, that it should not be successful. However to find its refutation requires enormous play. [Unfortunately for White 21.f3 trying to hide the king with Kf2 and Be2 did not help in view of 21...exf3+ 22.gxf3 ♗h6! 23.f4 e5! is going to be crushing! Black opens all the lines on the king.]

21... ♖fd8+ 22. ♖c2

22... ♖f8!! This is shocking! The idea itself is very nice and logical, Black would like to push c3 with a crushing attack and first he leaves the pin. But why he moves with his king to f8 and why not to h8? Actually only Kf8 was winning and the reason could not be calculated, Zvjaginsev could only believe to his intuition. [22... ♖h8 could have met by exactly

the same moves as White was defending in the game 23. ♖d1! ♖xd1 24. ♖xd1 c3 it looks over, but it is actually not 25.b3! ♖d8+ (25...c2+ 26. ♖c1 ♖c3 seems to be over, but White saves himself with 27. ♗c4! ♖d8 28. ♖xc2! and Black does not have more than perpetual check. 28... ♖a1+ 29. ♖b1=) 26. ♖c1 ♖d2 27.b4! completely unexpected at such attacking pieces, but White survives 27... ♖h5 28. ♖b3 ♖b2 29. ♖a4!!+— And here is the difference! White is threatening with Qe8 mate! This is the reason, why Black had to put his king to f8, to cover the backrank mate! Amazing!]

23. ♖d1 [There was no time for 23. ♗e2 23...c3—+ is over, Rd2 or cxb2 is coming next.]

23... ♖xd1 24. ♖xd1 c3 25.b3! Perfect defensive skills, but it does not help this time. White would like to close the c-file by developing the bishop to c4. [25.bxc3 25... ♖xc3—+ leads to mate soon.; 25.b4 25...c2+ 26. ♖c1 ♖c3]

25... ♖d8+! Only this wins! [25...c2+ 26. ♖c1 ♖c3 looks also very tempting, but it leads only to draw after 27. ♗c4! White is ready to take on c2. 27... ♖d8 28. ♖xc2 ♖a1+ 29. ♖b1 ♖c3+ 30. ♖c2=]

26. ♖c1 ♖d2 27.b4

27... ♖h5!! Zvjaginsev finds again the only way to win! The d1 square is the key in Black's attack.

28.♔b3 ♖b2! 29.♙c4 Kind of resignation, but there was nothing better. [And in comparison to the 22...Kh8 line, on 29.♔a4 there is no threat on e8, so Black has time to play 29...♙d5!-+; 29.♔c4 leads to forced mate after the pretty 29...♖b1+! 30.♙xb1 ♔d1+ 31.♙a2 ♔c2+ 32.♙a1 ♔b2#; 29.♔d1 29...♖b1+-+]]

29...♖xb3 30.♙xb3 ♔e2 31.♙c2 ♔a6! The most precise move. Before going to c4, Black first weakens the b4 pawn.

32.a4 ♔c4 33.♖d1 ♙e8 34.♖e1 ♔a2 White resigned. What a game!! **0-1**

Endgame section

(15) Kramnik, Vladimir(2783)
- Caruana, Fabiano(2791)

Norway Chess 2014,
2014.06.08

After defending stubbornly in a very difficult position, Caruana has achieved the following drawish rook endgame. Despite having only 2 pawns against 2, White can still continue pushing, because after the following strong manoeuvre he manages to get dominating pieces.

47.♖d5! a4 [There was no time for active defense with 47...♙e6 48.♞xa5 ♜b1 with the idea of giving checks from behind, because White is in time to send back the king with 49.♞a6+]

48.♞a5 a3 49.♙e5! This is what White was aiming for. He succeeded to activate his king and his rook is perfectly placed on a5, because it stops the a-pawn and is ready to squeeze the black king to the backrank with a check.

GM Csaba Balogh
Best rating: 2672

49...♙f7! Black had no useful move, but this one is a clever waiting move to see how White wants to proceed.

50.♞a7+

50...♙e8?? But this is a terrible blunder, after which White is winning. Caruana simply forgot about the g7 square. [50...♙f8 would have saved the game, although White might continue pressing for a while 51.♙d6 (51.♙f6 makes no sense now because after 51...♞b6+ the king must retreat) 51...♞b6+ 52.♙c5 (52.♙d7 52...♞b5! forces the king back, otherwise the g5 falls and the e-pawn cannot be advanced. 53.♙e6 ♞b6+= (Of course not 53...♞xg5?? 54.♙f6+--)) 52...♞b3 53.e5 Black has several ways to hold here. An easy one is 53...♙e8 54.♙d6 (54.e6 54...♞d3= and the king is cut. White has no chance to win.) 54...♞b6+ 55.♙d5 ♞b5+ 56.♙e6 ♞b6+= White cannot make progress.]

51.♙f6 ♞b6+ 52.♙g7! [Black - perhaps a bit prematurely - resigned in view of the following lines: 52.♙g7 52...♞b3 (52...♞e6 53.♞xa3 ♞xe4 (53...♞b6 54.♞f3 ♞e6 55.♞f6 ♞xe4 56.♙xg6+-- is also lost, because the king cannot get in front of the pawn.) 54.♙xg6+--

This is a theoretical win, because the black king cannot get in front of the pawn. With the king on g8 and the rook on e8, the game was drawn, but now White gives Ra8 check next move followed by Kg7 and g6 and wins by using the "bridge building" method.) 53.♔xg6 ♔f8 is the best chance, but White wins slowly 54.e5 ♖e3 55.♔f5 ♖f3+ 56.♔e4 ♖g3 57.♔f4 White is finally ready to advance one of his pawns 57...♖b3 58.e6 ♖b4+! The is again the only move to put up further resistance. (58...♖c3 59.g6 And the game is over because from the checks White can hide his king on f6, while otherwise White is threatening to promote his pawn with 59...♖b3 60.e7+! ♔e8 61.g7+- and the king goes to h7 from the checks.) 59.♔f5 ♖b3 60.g6 ♖f3+ That is why Black had to give the check on the 4th rank two moves ago. Now he can continue harassing the pawns along the 3rd rank. 61.♔e4 ♖g3

White still needs to show good technique to convert the

advantage. The winning manoeuvre is 62.♖a8+! ♔e7 63.♔f5! ♖f3+ 64.♔e5! If the black pawn and the rook was on the 2nd rank the game would have ended in a draw. However now the line is not long enough for the rook to give checks... 64...♖g3 (64...♖e3+ 65.♔f4 ♖xe6 66.g7+-) 65.♖a7+ ♔f8

Here comes the next step for White. It is still very easy to go wrong, but the win is the following: 66.e7+! ♔e8 67.♔f6 Important to note that without the a-pawn Black could achieve the draw by stalemate after Rxc6! Kxc6, but now there is no hope for such things. 67...♖f3+ 68.♔g5 ♖g3+ 69.♔h5 White uses the same technique as before. Making use of the fact that the line is not long enough for the rook, he can give only one more check on the 3rd rank. 69...♖h3+ (69...♖b3 70.g7 ♖g3 71.g8=♖+ ♖xc6 72.♖a8+ ♔xe7 73.♖xc6+-; 69...♖g2 70.♖xa3 ♔xe7 71.♔h6+-) 70.♔g4 ♖h1 71.♖xa3 ♔xe7

72.♖f3!+- The last nuance!

The only way to win is to cut the king along the f-file. White proceeds with Kg5 and g7, while after checks he goes with his king to g7 and wins with the "bridge building" method. Black was lost in the final position and I am sure, that Kramnik would have won the game, but I recommend to all of you to continue such positions because the win is far from obvious. It is never too late to resign.] **1-0**

(16) Karjakin, Sergey(2771)
- **Kramnik, Vladimir(2783)**

2nd Norway Chess 2014(8.5),
2014.06.12

GM Arkadij Naiditsch
Best rating: 2737

After a long fighting game, where White was pushing for many moves, the victory was finally close. White has 2 passed pawns supported by the king on b3, so the position should just be winning, but still exact calculation is needed. Black's h4 pawn is very dangerous and White cannot protect it in the usual way, from h8, because of the second black pawn on h6. Let us take a look at how precisely Karjakin is converting his advantage.

57.a6! It is always a good idea to push your own pawns as far as possible.

57...♖g3+! Black is also trying to make things as hard as possible for White. Before bringing the h-pawn into action, Black is trying to get the white king into a bad position.

58.♔c4 The right decision. [58.♔a4? would lead to a crazy position. Now Black has the very strong 58...♖g1! The black rook is going to take care of the a-pawn from a1. 59.♖b5+

It seems like White already doesn't have anything better.
59...♔g4

60.♖a5 White protects from Ra1. 60...h3 Now both sides are queening. 61.a7 h2 62.a8=♚ h1=♚ Of course White cannot be worse here, but it is hard to say if he has winning chances.]

58...♖g4+ Before trying to stop the a-pawn, Black is trying to get the white king away from the pawns a bit.

59.♔d3 ♖g8 [59...h3 was losing on the spot: 60.a7 ♖g3+ 61.♔e2 ♖a3 62.♖b5+ ♔g4 63.♖a5]

60.♖b5+ White chooses the most simple way. The white rook is going to a2 to stop the black pawn from moving.

60...♔g4 61.♖a5 h3 62.♖a2 Things are still very forced because Black has 2 h-pawns.

62...♖a8 63.b5 h5 And the double h-pawns are running.

64.♔e3 Karjakin continues playing very well. [64.♔c4 seems to win a tempo, but it is a dangerous move to make in a practical game. 64...♔g3 65.♔b4 h2 66.♖a1 ♔g2 67.♔a5 h1=♚ 68.♖xh1 ♔xh1 69.b6 h4 70.b7 ♖h8 71.a7

71...h3 and White is only winning because of 72.a8=♚!]

64...♔g3 Black needs to try and force h2.

65.a7! The last important move. After this things are getting too easy to miss.

65...h2 Black doesn't have a choice since b6 was coming.

66.♖xh2 This was the idea behind 64.Ke3.

66...♔xh2 [66...♖xa7 would lead to a totally lost rook endgame: 67.♖xh5]

67.b6 ♔h3 Kramkin is trying to create a fortress.

68.b7 ♖xa7 69.b8=♚ ♖g7 Black's position is hopeless, there are no drawing chances with a pawn on h5. But still maybe White would have to show a bit more technique in case of 69...Ra3.

70. ♔e5 ♖g3+

71. ♔f2 h4 72. ♔e4 and the game is over. The black rook has no more squares left and Black is losing the pawn, which leaves him with no chances to survive the game. A great demonstration of exact play from the beginning until the end by Karjakin. **1-0**

1.e4 e5 2.♘f3 ♘c6 3.♗b5 a6 4.♗xc6 dxc6 5.O-O We have the Ruy Lopez Exchange Variation.

5...f6 One of the main lines. Instead of this move Black has a lot of different other options to play.

6.d4 exd4 7.♘xd4

7...♘e7 A rare move. Usually Black plays the endgame after [7...c5 8.♘b3 (8.♘e2 8...♖xd1 9.♗xd1 ♗d7 10.♘bc3 O-O-O 11.♗e3 ♗e8 12.♗d2 ♗c6 13.♗ad1 b6 14.f3 (14.a4! Maybe White doesn't need to lose time for the f3 move. The idea is to force Black to play a5 and then the white knight gets the important b5 square.) 14...♘e7 With a more or less equal position.) 8...♖xd1 9.♗xd1 ♗g4 In this case Black forces the f3 move to have a check on c5 later on. 10.f3 ♗d7 (10...♗e6 11.♗f4 c4

12.♘d4 O-O-O 13.♘c3 ♗f7∞) 11.♗f4 O-O-O 12.♘c3 c4 13.♘a5 ♗c5+ 14.♖f1 b5 Because of the knight on a5 White has to go for a forced variation: 15.♘d5 ♘e7 16.♗xc7 ♘xd5 17.♗xd5 ♖xc7 18.♗xc5+ ♖b6 19.b4 cxb3 20.♘xb3 ♗e6 It looks like Black should have enough compensation for a draw.]

8.♗e3 ♘g6 9.♘d2 ♗d6 10.♘c4 O-O 11.♖d3 Both sides very logically finish their development.

11...♘e5 As he has less space, Black reduces the material. [11...♖e7!?]

12.♘xe5 ♗xe5 13.f4 ♗d6 [13...♗xd4 The idea to equalize the position with different colored bishops is not enough, for example: 14.♗xd4 b6 (14...f5 15.♖c3 ♗f7 16.♗ad1) 15.♖e3 c5 16.♗c3 ♗b7 17.f5! With the idea to improve the position over e5. White has a stable advantage.]

14.f5! Because White controls the dark squares very well Fischer decided to limit the light squared bishop first. This thematic idea was used in a famous game between Lasker and Capablanca. [14.♖b3+!? This alternative was interesting too. 14...♖h8 (14...♗f7 15.e5±) 15.♘f3! (15.♘e6 The idea to get rid of the black pair of bishops is bad because of 15...♗xe6 16.♖xe6 ♗e8 17.♖c4 ♖e7 and White has problems on the e-file.) 15...♖e7 16.e5! fxe5 17.fxe5 ♗c5 18.♗xc5 ♖xc5+ 19.♖h1! With the threat Ng5 or simply e6.]

14...♔e7

15.♟f4! White is preparing a long term plan with an e5 break.

15...♟xf4 16.♞xf4 ♟d7 [16...c5 17.♞b3! and Black is losing the c5 pawn because of Qd5.]

17.♞e1 [17.♞b3+ 17...♟h8 18.♞xb7?? ♟d6--+]]

17...♞c5 This move looks unnecessary to me. Anyway Black's idea is to activate the bishop over c5-Bc6. [17...c5!? 18.♞b3+ ♟h8 19.♞f3 ♟c6 20.e5 ♟xf3 21.♞xf3 fxe5 22.♞xb7 ♞ab8 23.♞xa6 ♟h4! An important and active place for the queen. (23...♞xb2 24.♞c4+=) 24.♞fe3 ♞xb2 With good drawing chances because the position has a tendency to reduce.]

18.c3 ♞ae8 [18...♞d6 19.♞e3 (19.♞c4+ 19...♟h8 20.♞h4 ♞ae8 21.♞e3 h6 and Black has very easily prevented all of White's tactical ideas.) 19...c5 20.♞f3 ♟c6 21.e5 fxe5 22.♞xe5 ♞ae8 is similar to the game, but the white pieces are worsely coordinated in this case.]

19.g4 White is playing accoridng to the plan just to take advantage of the extra pawn on the kingside.

19...♞d6 20.♞g3 ♞e7 [20...g5!? 21.♞f3 (21.fxg6 21...hgx6 and now White's structure is weaker.) 21...♞xg3+ 22.♞xg3 c5 23.♞f3 ♟c6 24.e5 ♟xf3 25.♞xf3 ♞xe5 26.♞xe5 fxe5 27.♞d3 It looks like White is clearly better because of the strong f5 pawn and he has the simple plan to come to e4 with the king and control the d-file, but Black has counterplay ideas: 27...♟g7 28.♟f2 (28.♞d7+ 28...♞f7 29.♞xf7+ ♟xf7 The pawn endgame is drawish.) 28...♟f6 29.♟f3 h5!⇒ With the idea to activate the rook over the h-file.]

21.♞f3 c5 [21...♞fe8 doesn't change anything. 22.e5 fxe5 23.♞fe4↑]

22.e5! [22.g5 was also possible.]

22...fxe5 23.♞fe4 ♟c6 24.♞xe5 ♞fe8 25.♞xe7 ♞xe7 26.♞e5 h6 Black took the decision to prevent the pawns from advancing. We should note that one kind of defending is "active defence", for example: [26...h5!? 27.g5 (27.h3 27...h4 28.♞h2 This position doesn't look promising for White.; 27.gxh5 27...♟e8⇒) 27...h4! 28.♞f4 ♟d5 29.♟f2 (29.♞e2∞) 29...♞g2+ 30.♟e3 ♞xb2 (30...♞d5 31.♟f2=) 31.f6 ♞xc3+ 32.♟f2 ♞e6 33.f7+ ♟f8 34.♞d1 ♞b2+ 35.♞d2

35...Qxd2+! 36.Qxd2 Rxe5 37.g6 ♔d5 38.Qf4 ♚e7 39.Qxh4 ♕xf7 40.gxf7 ♚xf7+ 41.♖g2 ♚f6 and even without pawns on the queenside, this position would be drawish. Black just keeps playing Rf6-Rh6 and White is not able to improve the position.]

27.h4 ♕d7 Passive defending, Black prevents the g5 move but takes out the bishop from the active diagonal. [27...♚d2 active 28.♚f2 ♚d5 29.♘xc6 ♚xe1+ 30.♚xe1 bxc6 and it is not easy to improve the position because of potential perpetual checks.; 27...♕d5 28.g5 hxg5 29.hxg5 ♕xa2 30.f6 ♚e6 31.f7+ ♖f8 32.♖f2±; 27...♚f6]

28.♚f4 ♚f6 Preventing g5.

29.♚e2! A strong prophylactic move.

29...♕c8 30.♚c4+ ♖h7 31.♘g6 [31.♚xc5 31...♚xh4=+]

31...♚xe2 32.♚xe2 So far we can say that Black is defending quite well.

32...♕d7? But here comes the decisive mistake! Black allows White to exchange queens and after that he cannot get any counterplay anymore. [32...♚d6! was the correct move which gave Black possibilities to check the white king, for example after: 33.♚e8 ♚d1+ 34.♖f2 ♚d2+ 35.♚e2 ♚d6±]

33.♚e7! ♚xe7 34.♘xe7 g5 The only way to activate the king.

35.hxg5 hxg5 36.♘d5 ♕c6 37.♘xc7! The most accurate move. [37.♘e3 37...♖g7 38.♖f2 ♖f6 Thanks to his active pieces and the potentially weak g4 pawn Black has practical chances for a draw.]

37...♕f3

38.♘e8! Another very accurate move because the bishop is a

strong fighter on both sides! Fischer save the g4 and f5 pawns at the same time. [38.♖e6 38...♙xg4 39.♖xc5 ♖b6 (39...♙f3 40.♙f2 ♙c6 41.♖e6 ♙h6 42.♙g3±) 40.♖d7 ♙xf5 41.♖xb6 ♙g7 and Black still has some chances.]

38...♙h6 39.♖f6 ♙g7 40.♙f2 ♙d1 41.♖d7! A nice trick which Fischer of course saw a few moves earlier.

41...c4 [41...♙xg4 42.f6+ ♙g8 43.f7+--]

42.♙g3 1-0

Editorial Preface

Carlsen made one of his dreams come true, to become a triple World Champion in the same year! With his convincing victories in the World Championship in Rapid and in Blitz, which were held in Dubai, Carlsen proved once again to be quite unreachable in all the different time controls. The final standings in rapid saw Carlsen on top with 11.0/15 and the 2nd place was shared by Caruana, Anand, Aronian and Morozevich, all with 10.5/11. The final standings in blitz once again saw Carlsen on top with 17/ 21 and the 2nd and 3rd places were shared by Nepomniachtchi and Nakamura, both with 16/ 21.

The women's Grand Prix in Georgia has begun with a good start for the two main contenders, Hou Yifan and Koneru, who have 2/2 and 1.5/2.

We hope you enjoy the analysed games from the World Rapid and Blitz Championship!

1.♘f3 d5 2.c4 e6 3.g3 ♘f6 4.♗g2 The idea of this move order is to play a Catalan structure but not hurry with d4.

4...d4 [4...dxc4 5.♖a4+ leads to the main lines.]

5.b4?! A typical idea in this kind of the structures. White is going to take space on the queenside but unfortunately for him this move is not accurate. White should play [5.O-O 5...c5 6.d3 ♘c6 7.e3 ♗e7 8.exd4 cxd4 with typical play for the Benoni.]

5...♗xb4! The best and most concrete reaction.

6.♖a4+ ♘c6 7.♘e5 ♖b8 The only strong move. The rook escapes from the long diagonal and will also protect the bishop on b4 after the exchange on c6.

8.♘xc6 [8.♗xc6+ 8...bxc6 9.♘xc6 ♖d7-+; 8.♗a3 8...♖d6 (8...♗xa3 9.♘xa3 O-O 10.♘xc6 bxc6 11.♖xa7 ♖b6 12.♖a5 ♖e7 The black pieces are better coordinated and the simple plan c5-e5-e4 gives Black a good initiative.) 9.♘d3 a5 10.♗xb4 axb4 11.c5 ♖e7 12.♘xb4 ♗d7 13.♗xc6 bxc6 14.♘a6 ♖b7 15.♖xd4 e5 16.♖c4 ♗e6 17.♖c3 O-O 1/2-1/2 Landa,K-Mista,A/Bochum GER 2014 (58)]

8...bxc6 9.♖xa7 ♖b6 10.♖a4 The white queen needs to escape from this unsafe place.

10...O-O 11.O-O e5 12.d3 ♗g4 13.♖c2 ♖e7 White gets a better structure but Black has a big advantage in development. The black initiative is very strong.

14.h3

14...♗h5! Anand doesn't let Karjakin develop the knight to d2. This way he provokes the g4 move which weakens White's position. [14...♗f5 Preparing a break over e4. 15.♗g5 (15.♘d2) 15...♖fb8 16.♘d2 ♗c3 17.♖ab1 ♖b2 18.♖c1 h6 19.♗xf6 ♖xf6 20.♖xb2 ♖xb2 21.♘e4 ♗xe4 22.♗xe4 And it is not clear if Black should hurry to capture on e2 22...♖xe2 because after (22...c5) 23.♖a3 the white pieces will be activated.]

15.♗g5 ♖fb8 16.g4 ♗g6 17.♘d2 ♗xd2 18.♖xd2 h6 [18...♖b2 19.♖d1 h5 20.a4! The only chance to get rid of the black pieces' activity is to advance a pawn! 20...hxg4 21.hxg4 ♖e6

22. ♟xf6 gxf6 23. f3 ♔g7∞]

19. ♟xf6 ♚xf6 20. ♖fc1 [20. a4 20... ♖b2 21. ♚d1 c5 22. a5 ♚a6 23. ♖e1 And it is not easy to improve Black's position.]

20... h5 21. a4 hxg4 22. hxg4 e4 This move activates the black pieces.

23. dxe4 ♖b2 24. ♚d1 [24. ♖c2?! 24... ♖xc2 25. ♚xc2 d3! 26. ♚c1 d2 27. ♚d1 ♚c3 And the d-pawn will be decisive.]

24... ♚e5 25. ♖cb1 [25. f3 This move doesn't look nice. The bishop on g2 is very limited but the one on g6 is not active either. The most important thing is that at least the white king is safe.]

25... ♟xe4 26. ♖xb2 ♖xb2

27. ♟xe4? White's position is very unpleasant because of the very active black pieces and weak white king. The only counterplay chance for White is the a-pawn. [27. a5! White needs to hurry! 27... ♟xg2 28. a6 (28. ♟xg2 28... ♚f4→) 28... ♟e4 29. a7 ♟h7 30. a8=♚ ♚g5 31. ♖a3 ♚h4 32. ♖f3 (32. f3 32... ♚g3+ 33. ♟f1 ♚h3+=) 32... d3! 33. ♚e8 f5! A strong move which closes the diagonal and makes it possible to take on f3. (33... ♟xf3? 34. ♚xd3+; 33... ♚xg4+ 34. ♖g3 dxe2 35. ♚e1 ♚h4 36. ♖h3 ♚xh3 37. ♚xe4+ ♟g8 38. ♚e8+ ♟h7 39. ♚e3±) 34. gxf5 ♟xf3 35. ♚g6+ ♟g8 36. ♚e8+ With perpetual check.]

27... ♚xe4 28. ♚d3 ♚xg4+ 29. ♟f1 [29. ♚g3 29... ♚xe2 30. a5 d3 31. a6 d2→ Black is faster.]

29... ♚h4 30. ♟g2 ♚g4+ 31. ♟f1

31... ♚h4? Anand repeats the moves. He overlooked a good possibility to continue the game after [31... ♚h5 Compared to the move in the game the e2 pawn will be hanging. 32. ♚f3 (32. ♟g2 32... ♖xe2 33. a5 ♖e6→) 32... ♚xf3 33. exf3 c5 34. a5 ♖b7 35. a6 ♖a7 36. ♟e2 f6 37. ♟d3 ♟f7 38. ♟e4 ♟e6 With the plan c6-Kd6-Kc7-Kb6.]

32. ♟g2 ♚g4+ 1/2-1/2

**(2) Riazantsev, Alexander(2692)
- Harikrishna, Pentala(2726) [E12]**FIDE World Rapid 2014(1.17),
2014.06.16GM Arkadij Naiditsch
Best rating: 2737

1.d4 After the opening, White managed to get a solid advantage which made him go for a very tempting sacrifice which looked really promising. With a great defence and because of a miscalculation by White, Black managed to defend from all threats, which left him with extra material. All in all a very interesting game.

1...♟f6 2.c4 e6 3.♟f3 Riazantsev has been a second of a lot of players and last year he was also the coach of the Russian women's team. His theoretical knowledge is on a really high level, but somehow from time to time he misses very nice practical chances.

3...b6 4.a3 The idea of the a3 move is simple, not to allow Black to play Bb4 on White's Nc3.

4...♟b7 5.♟c3 ♟e4 A rarely played move and to me it looks a bit strange because Black is just getting a bit worse straight from the opening. [5...d5 is of course the main continuation.]

6.♟xe4 Of course White should not let Black play Nxc3.

6...♟xe4 The most solid reply.

7.e3 [7.♟g5 This move is really tempting, but it seems to give Black good play. 7...♟e7 8.♟xe7 ♟xe7 9.♟d2 ♟b7 10.e4 White has covered the center but Black has the very strong 10...c5! and White doesn't have 11.d5 because of exd5.]

7...♟e7 8.♟d3 ♟b7?! This is already clearly not what Black

should have done. Now White's position is getting clearly better. [A possible way of playing was 8...♟xd3 9.♟xd3 d5 and White is minimally better but nothing too important has happened.]

9.e4! A strong move! White is immediately taking the center, which guarantees him better play.

9...O-O 10.O-O d6 Black is trying to be passive-solid.

11.b4 White is preparing to put his bishop on b2 or to play d5 and c5 in the future. [11.d5 would also give White some positional advantage and now it is easy to see that Black's bishop on b7 is bad.]

11...c5 It is hard to say if it is really a useful move for Black, maybe to continue being solid was a better choice with 11...Nd7.

12.bxc5! A strong move! Before closing the center with d5, White is opening the b-file, which is clearly a good idea!

12...bxc5 13.d5 Limiting the black bishop on b7.

13...♞d7 14.♞b1 ♞c7 15.♞c2 h6 16.♞b2 ♞ab8 17.♞fe1 ♞fe8
 [17...♞f6 Exchanging these bishops is a logical idea. 18.♞xf6
 ♞xf6 And now the only chance for White to look for an
 advantage is 19.dxe6 fxe6 20.e5 but after 20...♞g4 21.exd6
 (21.♞h4!?) 21...♞xd6 the white king finds himself under some
 pressure.]

18.e5! A good move which activates the white pieces.

18...exd5?! [18...♞f8∞]

19.♞h7+ The beginning of a nice tactical idea.

19...♞h8 20.e6 fxe6 21.♞xg7+ ♞xg7 22.♞g6+ ♞h8
23.♞xh6 ♞f8 24.♞h4 ♞f6 [24...♞e5 25.♞g5+-]

25.♞g6+ [25.♞c2+ 25...♞g8 26.♞xf6 ♞g7 27.♞h4+-]

25...♞h7 [25...♞g7 26.♞g5 ♞h7↔]

26.♞g5 After some forced moves we got a position where White's attack is decisive.

26...♞e7 27.♞xe6 ♞xe6

28.♞xh7?? What an amazing blunder, probably caused by time trouble. White could win after [28.♞xe6 28...♞e7
 29.♞xh7+ ♞xh7 30.♞xh7 ♞xh7 31.♞xf8+ ♞xf8 32.♞xb7+ ♞g6
 33.cxd5 ♞f5 34.♞e7! Objectively the position should be
 winning, but White still needs to show accurate play.]

28...♞h6! [28...♞xg6 29.♞xf8+ ♞g7 30.♞h7+-]

29.♞f5 [29.♞xh6 29...♞g7 Black consolidates on the time.]

29...♞e7 0-1

(3) Jobava, Baadur(2688)
- Mamedyarov, Shakhriyar(2799)
[A45]

World Rapid Ch 2014(3.1),
 2014.06.16

GM Csaba Balogh
 Best rating: 2672

We are in the 3rd round of the World rapid Championship. The ratings should not confuse anyone, those are the rapid ratings. The tournament was played with 15+10 time control. Jobava won a brilliant game in his usual creative style.

1.d4 ♘f6 2.♘c3 d5 3.♙f4 Jobava likes this kind of unusual openings. He already played it in several games.

3...♙f5 The most natural reaction. Black develops his bishop before playing e6 and c5. If he succeeds to do this he might quickly overtake the initiative because of the misplacement of the white knight on c3, therefore White should continue with unusual moves.

4.f3 e6 5.g4! Consequent play. There is no way back for White, he must do something extraordinary in the spirit of the position to keep the initiative.

5...♙g6 6.h4 h6 7.e3 c5 This is the deviation to the previous Jobava game. [It seems to be more circumspect to take control over the b5 square before pushing c5. 7...a6 8.h5 ♙h7 9.♙d3 c5 followed by Nc6 was completely fine for Black in the Jobava-Hovhannisyan, Yerevan 2014 game.]

8.h5 ♙h7

9.♘b5! White is finally able to consolidate his pawn formation with c3.

9...♘a6 There was no other way to parry the Nc7 threat, but now the knight on b5 becomes extremely annoying, because it cannot be sent away with a6 or c6. To be able to play a6, Black should go away with his knight, but it has the duty to control the c7 square and the rook cannot replace it from c8, because it is also busy guarding the a7 pawn.

10.c3 ♙e7 11.♙d3 It is time to finish the development.

11...♙xd3 12.♙xd3 ♘d7 Black prepares to castle, but first he prevents the g5 attacking potentials. [Black cannot get rid of the b5 knight with 12...♙b6 with the idea of c4, because White can fortify it with 13.a4]

13.♘e2 [Grabbing the bishop with 13.♘d6+? would positionally be a good idea, but it does not work directly in view of 13...♙xd6 14.♙xd6 ♙b6! with a double attack.]

13...O-O The first stage of the game is over. We can say that White has some space advantage, but Black has a flexible position without any weaknesses. White might play on a kingside attack, while Black should aim for a central break with e5. We have reached a playable position for both sides with mutual chances and two highly creative players start to play very exciting chess.

14.a4 A useful waiting move to stabilize the situation of the b5 knight.

14...♟f6 Mamedyarov chooses the most direct way to push e5, but it allows White a good possibility to prevent it and in the same time improve his position. [14...♞e8 followed by Bf8 and e5 was probably stronger, but the text is also very natural.]

15.♟d6! ♞e8 16.f4! Preventing the e4 break forever and the f4 pawn supports the g5 break as well. The only drawback could be the hole on e4, but Black is first of all very far from driving his knight there and even if he succeeds White could trade it with Ng3.

16...♞b6 Black hopes to get his knight to c4. [16...♟h4+ It doesn't make much sense to force the king to move, because

the position is closed and the king even feels comfortable at the middle of the board. 17.♞f1 followed by Kg2 or Kd1-c2 is also possible.]

17.g5! Jobava has very good tactical feelings. He sacrifices a pawn to explode the pawn structure in front of the king. [17.b3? is wrong because it only helps the black knight to occupy the c4 square. 17...c4!; 17.dxc5 It is not logical to open the center because White has just launched a flank attack and to lead it successfully, the center should be closed. 17...♞c4]

17...hxg5 18.h6! g6 Black must keep the h-file closed.

19.fxg5 ♟xg5 20.h7+ ♞g7 The best chance. Black should control the f7 and g6 squares with the king. [20...♞h8 is worse in view of 21.♟e5+! f6 22.♞d6! Nf7 is threatening. 22...♞f8 23.♟f4! The g6 pawn is hanging and the attack seems to break through. 23...♟xf4 24.♞xf4 ♞xd6 loses to 25.♞xg6+ ♞g7 26.O-O-O+- and Rdg1 next wins.]

21.♟e5+! White must lead the attack energetically, otherwise Black consolidates his position and maintains an extra pawn.

21...f6 [On 21...♟f6 22.♞d6 ♞f8 White wins nicely with 23.♞xf7! ♞xf7 24.♞f4!+- There is no defence against the Qxg6 and Nxe6 threats.]

22. ♖d6 [The winning move was 22. ♖f4! 22... ♗xf4 (22... ♗xe5 is nicely refuted by 23. ♖h8=♖+! ♖xh8 24. ♖xg6+ ♔f8 25. ♖xh8+ ♔e7 26. ♖xe6#)]

23. ♖g1!! It is very difficult to find such moves in a rapid game, even for such a resourceful player like Jobava. Black has no adequate defence. 23... ♗g5 (23... ♗g5 does not help because of the pin. 24. ♖xg5+-) 24. ♖xf4+- And the attack is breaking through: 24... ♗xe5 25. ♖xg5+ ♔h8 26. ♖g6 ♖e7 (26... ♖e7 27. ♖f6+-) 27. ♖d6! Trying to deflect the queen from the g7 square with the threat of ♖f7. 27... ♖f8 28. O-O-O And Black gets mated. An illustrative line is: 28... ♖c4 29. ♖g8+! ♖xg8 30. ♖xg8=♖+ ♖xg8 31. ♖h1+ ♖h7 32. ♖f7#]

22... ♖h8 White is behind in material and his pieces are hanging. There is no time to retreat, he must create new threats in each move. [Objectively the only move was 22... ♗xe5 23. ♖xe8+ ♖xe8 24. ♖h8=♖+ ♖xh8 25. ♖xh8 ♖xh8 26. O-O-O and despite the material advantage, the machine says Black has good drawing chances, but I believe the extra queen should give White excellent winning chances.]

23. ♖f4! ♗xf4 24. ♗xf4 [The same idea as in the 22. ♖f4 line was winning again: 24. ♖g1!! 24... ♗g5 (24... ♗g5 25. ♖xg5+-) 25. ♖xf4 ♗xe5 26. ♖xg5+ ♔f8

27. ♖g8+! ♖xg8 28. ♖xg8=♖+ ♔xg8 29. ♖g6+- And mate on f7 will follow on the next move, either with the queen or the knight.]

24... ♗g5 25. O-O-O! Bringing the other rook to the attack. ♖d6 followed by sacrifices on g5 are in the air.

25... ♖c4 [On 25... ♖xf4 White wins after all moves, but the most beautiful is 26. ♖g6+!! ♔xg6 27. ♖d6#]

26. ♖h6!? What a fantastic move! White wins material because Black can only prevent the ♖g6 threat if he sacrifices his queen. [However it was even stronger to play 26. ♖xc4 26... ♖xc4 27. ♖e2 with the idea to continue the attack with ♖h5. 27... ♖xh7 (27... ♖xf4 28. ♖g2+ ♔f7 29. ♖hg1+-) 28. ♖xh7+ ♔xh7 29. ♖h5+ ♔g7 30. ♖h1 ♖h8 (30... ♖xf4 31. ♖g1+ ♔f8 32. ♖h7!+- A silent move instead of some checks, White

creates the inevitable mate threat on g7.) 31. ♖f3! ♜c8

32. ♕xg5!! fxg5 33. ♖f1! and Black cannot prevent the Qf6/Qf7 threats followed by Rh1. 33... ♜f8 34. ♜xb7+-]

26... ♖xh6 is the only move to avoid getting mated, but now the queen falls. [26... ♖xd6 27. ♜g6+ ♜f8 28. ♕xd6+ ♜xd6 29. ♜xf6+ ♜e8 30. ♜xh8+-]

27. ♖f7+ ♜g7 28. ♖xd8 ♜axd8 We have reached another critical position. White is just slightly ahead materially and after some harmless moves like Bg3 Rxd7 the position would already be fine for Black. White needs to continue his attack and he can do it in different ways:

29.b3 It is logical to push back the active knight with tempo. [29. ♖g1!? was also good with the idea of 29... ♖xh7 30. ♕xg5! fxg5 31. ♖xg5+ ♜h8 32. ♜f1!! ♜g7 33. ♜f6 ♜d7 34. ♖h5+ ♜g8 35. ♜xe6+ ♜df7 36. ♖xd5+- Black has serious problems.]

29... ♖b6 [Opening the g-file should not come into Black's mind: 29... gxf4 30. ♖g1+ ♜f8 31. ♜g6 ♜e7 32. bxc4+-]

30. ♖g1! Jobava prepares the decisive blow on g5.

30... ♖xh7

31.e4! Another very spectacular attacking move, just as 26. Rh6. Without a sacrifice White wants to destroy his opponent's pawn structure in front of the king with e5, while dxe4 Qxe4 opens new threats on b7 and e6. [31. ♕xg5 was also winning. 31... fxg5 32. ♖xg5+ ♜h8 33. dxc5! With a deadly threat on d4, so Black has to play 33... ♖d7 but now 34. c6! and the knights are losing their stability. Black loses material.]

31... ♜h8 [31... dxe4 32. ♜xe4+-; 31... cxd4 32. e5!+-]

32.e5! The final blow! Black is helpless against the threats, but Jobava had to foresee the key move few moves later.

32... gxf4 33. ♜g6 ♜f8 34. exf6 [Black resigned in view of 34. exf6 and f7 is coming next in any case with mate in the next moves. For instance after 34... ♖d7 35. f7 with the threat of Qg8 Rxd7 36. f8Q mate! 35... ♜xf7 (35... ♜hxf7 36. ♖h1+-) 36. ♜g8#] **1-0**

(4) Caruana, Fabiano(2840) - Jobava, Baadur(2688) [C10]

World Rapid Ch 2014(5.2),
2014.06.16

GM Csaba Balogh
Best rating: 2672

A nice attacking game by Fabiano Caruana, who intuitively sacrificed two pawns for longterm compensation.

1.e4 e6 2.d4 d5 3.♘c3 ♘c6 Jobava has tricky rare lines, which are especially dangerous in rapid games, where his opponents do not have enough time to work out the right plans. However in this game, Caruana manages to find a very unpleasant reply...

4.♘f3 ♘f6 White has a wide choice here and Caruana continues with a rare move.

5.♙d3 [5.e5 is the main, when Black continues with 5...♘e4 6.♙d3 ♙b4 with hundreds of games.]

5...♙b4 6.♙g5

6...dxe4 Jobava deviates from his own blitz game. [He played 6...♘e7 before but after 7.♙xf6 gxf6 8.O-O c6 9.♘e2! ♘g6 10.c4!+= White was better in Fressinet-Jobava, Beijing 2012.]

7.♙xe4 ♘e7 Black unpins his queen and would like to install his knight to d5. [Black had an option to gain the bishop pair with 7...h6 because 8.Bh4 runs into g5, but White gets an advantage after 8.♙xf6! ♙xf6 9.O-O Despite Black having two bishops, the one on c8 is very passive, while on the other hand the e4 bishop is doing an excellent job. 9...O-O If White wants to he can get rid of the two bishops with 10.♘b5 ♙a5 11.c3! followed by the Na3-c4 plan! The e4 bishop continues dominating.]

8.♙d3 ♘ed5

9.O-O! The first intuitive sacrifice. I must say that it is a very tempting one, especially because the alternatives were pinning himself with Qd2 or retreating passively with Bd2. White has an obvious lead in development and all his minor pieces are standing perfectly. A pawn in the opening should be worth one more tempo.

9...♘xc3 [Black would miss the dark squared bishop if he goes for the pawn with 9...♙xc3 10.bxc3 ♘xc3 11.♙e1! (White must be careful not to fall for 11.♙d2? 11...♘ce4! when Black manages to simplify the position. 12.♙xe4 ♘xe4 13.♙xd8 ♘xd2 14.♘d2 ♙xd8) 11...♘cd5 12.c4 followed by Rd1 with more than enough compensation.]

10.bxc3 ♙xc3 11.♙b1 One more piece occupies an active

position. White intends to play Rb3, sending back the bishop and later the rook might participate in a very strong kingside attack along the 3rd rank .

11...h6 12.♘h4 White maintains the pin and keeps all his active pieces on board.

12...c6! A clever move. Black prepares to take on d4 in case of Rb3, which was not possible right away because at the end White would have won the queen with Bb5+. [12...O-O is strongly met by 13.♖b3! ♘a5 (13...♘xd4?? loses to 14.♘xd4 ♙xd4 15.♘h7+!+-) 14.♙c1! This is very strong, because Black has no more hope to unpin his queen. g5 will always be taken now. Ne5-g4 is threatening, Black is in trouble. For instance: 14...b6 15.♘e4 ♖b8 16.♘e5! ♙xd4 17.♘xf6 ♙xe4 18.♖g3+- and finally the rook plays an important role in the attack.]

13.♖b3!? Here comes the second intuitive sacrifice. This kind of moves comes again by feeling. White could first have defended his pawn with Be2 and only then Rb3, also with very strong compensation, but still, one does not want to make a passive retreating move when the opponent is trailing in development.

13...♘xd4 Black had no choice, but now White gained new hopes for counterplay to quickly activate his rooks on the d-file. [13...♘a5 could have been met by 14.♘e5! ♙xd4 15.♘xf6 gxf6 16.♘xf7! ♙xf7 17.♘g6+!+-]

14.♘c4 Caruana wants to occupy the d-file with tempo.

14...♘b6 15.♖d3 ♙e7

16.♘e5! This is what White was aiming for. All his pieces are attacking. The c8 bishop is still stuck and it also locks the rook to the corner. Black also has serious problems with his king. He cannot keep it in the center for long, but castling is not better either.

16...g5 Jobava understandably wanted to leave this pin. [Despite the bad circumstances, Black could have solved his situation by 16...♙c5! 17.♙e2 ♘c7! and it looks like White has nothing better than 18.♖fd1 but now we can reach a drawish endgame after 18...b5! 19.♘b3 ♙xe5! 20.♙xe5 ♘xe5 21.♖d8+ ♙e7 22.♖xh8 ♘b7 23.♖xa8 ♘xa8 Black has two pawns for the exchange, he should not face any difficulties.; 16...O-O? was wrong in view of 17.♘g4! and 17...g5 loses to 18.♘xh6+ ♙g7 19.♘xg5+!-]

17.♘g3 ♘e4 Black welcomes all kinds of simplifications. To get rid of the g3 bishop is a special achievement, but he still did not solve the problems of his c8 bishop and his king. [17...O-O could have strongly been met by 18.♙h1! unpinning the f-pawn to be able to launch a very dangerous attack with f4 next.]

18.♙e2 ♘xg3 19.hxg3 ♘c7

20. Rfd1 Black is still two pawns up, but there is no doubt that he felt very bad in the current position. It is hard to find a move for him.

20... Rf6 [The problem was 20...O-O? would have dropped material after 21. Rxd7! Bxd7 22. Rxd7 Rf6 23. Rxc7+-; The only move was 20... Bxe5 21. Rxe5 O-O temporarily solving the problems around the king, but it is still unclear how Black could bring his c8 and a8 pieces to the game. Black will face serious difficulties after 22.g4!? with the idea of Rh3, sometimes switching the rook to the attack.]

21. g4 Rg7 [21... Rf5 runs into 22. Rxd2!+- with the big threat on d8 and 0-0 loses to Nxe6.; On 21... Rxe7 22. Rxe1! is very strong, to switch the queen to the a1-h8 diagonal. It is very difficult to defend. An attempt to use the c8 bishop with 22...e5? loses to 23. Bxe5! O-O (23... Bxe5 24. Rxd8+ Rxd8 25. Rxe5+ Bxe6 26. Rxe8+-) 24. Bxf7! Rxe1+ 25. Rxe1 Rxf7 26. Re7+-]

22. Rf3! The game is objectively over here. Even the machines admit that the compensation is getting too strong now. The king cannot find a shelter...

22... Bd8 Black tries to cover the f6 square to be able to castle kingside. [22...O-O does not help in view of 23. Rf6!+-; 22... Re7 cannot lead to anything good after 23. Rxe3+-;

22...h5 23. Rf6+ Rf8 White has different wins, but the easiest is probably 24. Rxe3 Threatening Qc5+. 24... Rg6 (24...b6 25. Rxe4+-) 25. Bd3 Rh6 26. Rxc5+ Rg7 27. Re7+- Creating too many threats. Qxc7 or Ne8 followed by mate on f7.]

23. Rxd8+!! Another sacrifice which screams to be played. The king will be mated soon in the middle of the board...

23... Rxd8 24. Rf6! A silent move to lock the queen. It is just terrible to look at the black pieces, they can only watch how the 4 white pieces haunt the exposed king in the middle of the board.

24... g4 [24... Re7 25. Rxe5 Rxd8 loses to 26. Rxc5+ Rxd6 27. Re4! and on 27... Rxd4 the key is: 28. Rxf7+! Rxf7 29. Bxd6+- and the queen falls.]

25. Rxd2+ Re7 [25... Re7 26. Rb4+ also leads to mate in few moves.]

26. Rf4+ [Black resigned in view of the mates in few moves. 26. Rf4+ 26... Re6 27. Rb3+ Ra5 (27... Rc5 28. Re5+ Rxc4 29. Rxc3#) 28. Rxd2+ Ra4 29. Rb4#] **1-0**

I have just seen the following fantastic study-like endgame. White is a pawn down, but if we take a deeper look, he is the only one who can play for win if he goes with his king to the queenside to collect the c-pawn and then to trap the knight on a8. He is going to sacrifice his knight for the g- passed pawn.

57.♔e3! ♕g4! [An amazing position arises from the line 57...g4 58.♔d4 ♕h4 59.♔xc4 g3 60.♖xg3 ♕xg3 61.♔c5 ♕f4 Here we are! The white king should go to b7, but if he does so immediately, the black king squeezes him into the corner with Ke5-d6-c7. However we can realize that the position when the white king is on c6 and the black one is on e5 is a mutual zugzwang. If it was Black's move, he must move his king, but then after Kb7 he does not have Kd6-c7 anymore. White only needs to work out the execution of the winning plan.

62.♔d6! (62.♔c6? 62...♔xe5 63.♔b7 ♔d6 64.♔xa8 ♔c7=) 62...♕f5 And here comes the shocking move: 63.♔d7!! ♔xe5 64.♔c6!+- and zugzwang. Kb7 wins next.]

58.♔d4 ♕f4 59.♖xg5! White's strategy is the same as in the 57...g4 line.

59...c3 [59...♔g5 is actually the simpler way to draw, but only in a study-like way again. 60.♔xc4

60...♔g6!! Only this move holds. If we already know the motifs, this move is easy to find. Black must drive his king to c7 on the shortest way, without getting into zugzwang with king on e5... (60...♔f4? 61.♔c5 ♔xe5 62.♔c6+-) 61.♔c5 ♕f7 62.♔d6 (On 62.♔c6 Black is in time to play 62...♔e7 63.♔b7 ♔d7 64.♔xa8 ♔c7=) 62...♔e8 63.♔xe6 ♖c7+ and the game is drawn, because 64.♔d6 is not possible in view of 64...♖b5+=]

60. ♖h3+ ♜f5! [60...♔g3? loses to the same motif again, the black king gets too far... 61.♔xc3 ♜xh3 62.♔d4 ♜g4 63.♔c5 ♜f4 64.♔d6! +- And we have reached the same position as in the 57...g4 line. 64...♜f5 65.♔d7!! ♜xe5 66.♔c6+-]

61. ♖g1! The tasks of the white pieces are the same as before. The knight must stop the passed pawn and the king should go for the knight on a8.

61... ♖c7? The decisive mistake. It was very difficult to calculate the lines, especially with only seconds on the clock... [61...c2 62.♖e2 ♜g6!! should have been played. We actually have the same position like without the e2 knight and c2 pawn on board. We will soon understand why... 63.♔c5 (63.♔c3 63...♜f5=) 63...♜f7 64.♔c6 ♜e7 65.♔b7 ♜d7 66.♔xa8 ♜c8= And the game is drawn because the knight cannot leave the c1 square and Black only plays Kc8-c7.]

62. ♜c5 ♜xe5 63. ♖e2! c2 64. ♜c6 ♖a8 We have reached the same position again as without the c2 and e2 pieces on board. We already know that Black is in zugzwang now, therefore the next move is obvious.

65. ♖c1!! And Black resigned because of the zugzwang. Kb7 is coming next. [65.♔b7? would have spoiled the win again in view of 65...♔d6 66.♔xa8 ♜c7=] **1-0**

**(16) Carlsen, Magnus(2881)
- Anand, Viswanathan(2785)**FIDE World Rapid 2014(12.1),
2014.06.18GM Arkadij Naiditsch
Best rating: 2737

Carlsen was better for most of the game, but after a terrible blunder Anand got excellent winning chances.

44...♖b8! Black's position looks winning, but White still has a lot of pawns and all White needs to do is to win the a3 pawn after which the game would be a draw. With the silent **44...Rb8!** Anand is putting White into a first zugzwang.

45.g5 What else to do?! [45.♘c1 doesn't help. 45...♖c8+ 46.♔d2 ♔d5 And Black is easily winning since the white king is cut on the c-file.]

45...♟f5 Black is starting to collect the white pawns.

46.d5 Once again White has nothing better than this.

46...♟xe5 47.g6 By giving away the pawns White manages to finally lure away the black rook from the b-file, which will allow him to play Kb3.

47...♟xd5 48.g7 ♟e6 Black wants to collect the last pawn by

playing Kf7.

49.g8=♚+ ♖xg8 50.♟b3 The white king has finally managed to get to b3, but does it save the game?!

50...♖g3+! The most precise way of winning the game. [50...♖a8 was probably also winning. 51.♘c3 ♟e5 52.♟a2 ♟d4! The black king has to get to b4. 53.♘b5+ ♟c4 Black is just in time to win the game: 54.♘xa3+ ♟b4]

51.♟b4 [51.♘c3? of course doesn't work because of 51...a2]

51...♟e5 52.♘c3 All Black needs to do now is to bring his king to b1 to end the game.

52...♖e3 Preparing the march for the king. The rook on e3 will cut the white knight's checks.

53.♟c4 ♟f5 54.♟b4 ♟g4 55.♘a2 ♟f3 56.♘c3

56...♔g2 Avoiding the trap... [56...♔f2 would have been a huge mistake. 57.♘d1+ ♔e2 58.♘xe3 a2 59.♘c2 And the white knight is just in time to stop the a-pawn.]

57.♘d5 ♖f3 58.♘c3 ♔f1 The black king is finally coming closer.

59.♔c4 ♔e1 60.♔b4

60...♖h3 White can't do anything about Kd2 next. The position is hopeless. Carlsen managed to win the Rapid and the Blitz Championship in a very convincing manner anyway, but I guess that Anand was very happy about his win, especially because of the upcoming World Championship match in November.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙c4 e6
7.a3 A slightly passive move for a Sicilian. The idea is to save the bishop on the diagonal but why not play for example 7.a4. The main line is 7.Bb3 and 0-0 next, or Bg5-Bd2.

7...♙e7 8.♙a2 O-O 9.O-O b5 10.f4 ♙b7

11.f5! A thematic plan. White is going to get control of the light squares and activate the bishop on a2. The most important is to do that very quickly. [11.♙e2 is probably already too slow. 11...♘bd7 12.e5 (12.♙xe6 Usually this idea makes sense when the black king is still in the center. 12...fxe6 13.♘xe6 ♙b6+ 14.♙e3 ♙c6 15.♘xf8 ♙xf8=+ Black is better because of

the weak e4 pawn.) 12...dxe5 13.fxe5 ♙c5 14.♙e3 ♙b6 break over e5 looks not good because white gets limited bishop and weak pawn. 15.♙ad1 ♘e4 (15...♘xe5 16.b4∞) 16.♘xe4 ♙xe4=+ Xe5]

11...e5 12.♘de2 ♘bd7 [12...♘xe4 In case black decides to take the pawn White will quickly get the initiative on the kingside. 13.♘xe4 ♙xe4 14.♘g3 ♙b7 (14...d5) 15.f6 This pawn sacrifice activates the white pieces. (15.♙g4 15...♙f6 16.♘h5 ♙h8∞) 15...♙xf6 16.♘h5 ♙e7 17.♙g4 g6 18.♙h6 With strong pressure.]

13.♘g3 ♙c8 14.♙e3

14...♘b6 Black could also play : [14...♙xc3!? A typical idea. Black sacrifices an exchange, but for that he gets the central pawn and destroys the white structure. 15.bxc3 ♘xe4; 14...a5 With the idea to fight for the d5 square. 15.♙d3 (15.♙f2 Protecting the c2 pawn. 15...b4 16.axb4 axb4 17.♘d5 ♘xd5 18.♙xd5 ♙xd5 19.♙xd5 ♘f6∞ Followed by d5.) 15...b4 16.axb4 axb4 17.♘d5 ♘xd5 18.♙xd5 ♙xd5 19.exd5 ♘f6 With an unclear position.]

15.♙xb6 This exchange weakens the dark squares, but on the other hand White takes control of the important d5 square.

15...♔xb6+ 16.♔h1 ♔e3 An interesting move. Black activates the queen and starts regrouping his pieces. The bishop will go to b6. [16...a5!? leads to an interesting variation: 17.♘h5 0Nde2-Ng3-Nh5 is a typical plan. White is going to exchange the important f6 knight which defends the king and fights for the d5 square. 17...♘xh5 18.♔xh5 b4 19.axb4 axb4 20.♘d5 ♕xd5 21.♕xd5 ♖xc2

22.f6! We already saw this idea! White opens the f-file to activate the rook. 22...♕xf6 23.♔xf7+ ♖xf7 24.♖a8+ ♕d8 25.♖xf7 h6 26.♖c7+ ♔h7 27.♖xc2 And two rooks are clearly better than a queen. White has a big advantage.]

17.♘d5 [17.♖f3 17...♔h6 18.♔e2 followed by Rd1 would be more solid.]

17...♕xd5 18.♕xd5 ♕d8 A typical maneuver which we can mainly find in the Sveshnikov. Black just improves the bishop. [18...♘xd5 19.exd5 ♖c4]

19.a4 White activates the rook over the a-file. [19.c3 19...♕b6 20.♖f3 ♘g4!↗; 19.♕b3 19...♘xe4 20.♘xe4 ♔xe4 21.♔xd6 With a more or less equal position.]

19...♕b6 20.axb5 axb5 21.♖a6 b4

22.♘h5?! White wants to create pressure against the king. Unfortunately for him the black pieces are already very active and Black gets good counterplay. Saving the bishop was a better option. [22.♕b3 22...♕c5 23.♔f3∞]

22...♘xd5 23.♔g4 [23.exd5 23...♖c4 24.♖f3 ♔d4 25.♖d3 ♔f2=+ And slowly the white king becomes weaker than the black one.]

23...g6 24.exd5 ♖xc2 25.fxg6 hxg6 26.♘f6+ ♔g7 White doesn't even have a perpetual check.

27.♘h5+ [27.♔h4 Because of the weak first rank Black is on time with his counterplay: 27...♖f2! (27...♖h8? 28.♘h5+! ♖xh5 29.♔f6+ ♔h6 30.♖a8+-) 28.♔xf2 ♔xf2 29.♖xf2 ♕xf2 30.♘e4 ♕d4 31.b3 ♖c8⊕]

27...♔h6 [27...♔h8 28.♔h4 g5⊕]

28. ♖f6

28... ♖f2! A strong move which eliminates the active white rook.

29. ♖a1 ♖a8 30. ♗xb4 [30. ♖ae1 30... ♔g7 (30... ♖xf6? 31. ♗h4+) 31. ♖h5+ ♔f8 The black king escapes to a safer place. Black has a winning position.]

30... ♔g7 31. ♗xd6 [31. ♖g4 31... ♗f4 32. ♗xf4 ♖xf4—+ And the white pieces completely lost their coordination.]

31... ♗e2 The weakness of the first rank doesn't allow White to continue the game.

32. ♖e8+ ♖xe8 33. ♖fe1 ♗b5 0-1

Editorial Preface

After a very turbulent and exciting time at the World Rapid and Blitz Championships, things became calmer this week.

In a Chinese Island Province Hainan the 5th Danzhou Super tournament is taking place, but this year with the participation of 2 European players (usually it was a round robin with 10 Chinese players), Ruslan Ponomariov and your weekly commentator Arkadij Naiditsch. The tournament has just begun, so more excitement is to be expected from the next week.

In the 9th Edmonton International tournament there are no surprises. The tournament is dominated by Ivanchuk and Wesley So, as both are on 4.5/5. The level difference is pretty easy to see between the two Super Grandmasters and the rest of the field. It will be interesting to follow how many points both players will have at the end of the tournament.

The Greek team championship has also begun, with the participation of Csaba Balogh, but this year it seems to be more like a nice holiday event.

That's all for the current week, we hope you enjoy the games from the current issue of your weekly newsletter.

Arkadij Naiditsch & Csaba Balogh

- Bu, Xiangzhi(2693) [B31]

5th Hainan Danzhou 2014(4.5),
2014.06.28

GM Arkadij Naiditsch
Best rating: 2737

Bu Xiangzhi is a Chinese player from my generation. The first time we met, if I remember correctly, was at the World Juniors U-12, so about 16 years ago. Later on Bu has always been one of the World's strongest juniors, but strangely he never made it to the Top 20 in the World. I was preparing for a very tough fight, because Bu is actually a positional player who is very strong in defence and very hard to beat.

1.e4 c5 2.♘f3 ♘c6 Black's opening choice was not a surprise for me, in December 2013 we had the same opening in the World Team Championship.

3.♗b5 g6 This is also an often played move by Bu, but not the main line. [3...d6 4.O-O ♗d7 5.♖e1 a6 6.♗f1 ♘f6 7.c3 ♗g4 This happened in our last game, with a long theoretical battle after which I got a very promising endgame, but could not convert it into a full point.]

4.♗xc6 bxc6 Not a very popular move, but some of the Chinese players like this line. [4...dxc6 is of course the main move.]

5.O-O ♗g7 6.♖e1 Now Black has a couple of choices.

6...♘f6 is the main move. [6...♘h6 7.c3 O-O 8.d4 ♗b6 is the other possible line, but here White seems to be doing better. I played it myself with Black a couple of times without any big

success.]

7.e5 ♘d5 8.c4

8...♘c7 At first sight the knight jumps are looking a bit strange, but in fact things are very complicated here. Black's idea is simple, to play d6 at some point and open the way for the bishop pair. For White the idea is clear as well, try to develop clear play as quickly as possible, using the development advantage.

9.d4 cxd4 10.♖xd4 The white queen is going to take an excellent position on h4.

10...♘e6 This is a very rare move. [A more usual position would appear after 10...O-O 11.♖h4 f6 12.exf6 exf6 13.♗d2 and maybe White has a minimal advantage, but Black's position is very safe.]

11.♖h4 White already wants to play Bh6 now. It is very important to exchange the black squared bishop.

11...d6?! It is hard to say if this was Bu's preparation, or maybe my opponent just mixed up some move order because it seems like from now on I am getting clearly better play. [11...h5 is for example a very playable option for Black.]

12.exd6 The most logical and simple move. [12.♖d1 is the other move about which I was thinking during the game. It

is really hard to say what could be Black's next move here. 12...h6 Maybe this was Black's idea?! 13.exd6 g5 14.♔e4 O-O?! and Black is trying to play for compensation.]

12...♔xd6 [In case of 12...exd6 13.♕g5!? f6 14.♕h6 White is reaching his target of exchanging the bishops, which leaves Black with a clearly worse pawn structure.]

13.♖c3 A natural move, so I played it quickly.

13...h6 After quite some thinking Bu decided to play very riskily. Of course it is easy to understand that Black does not want to let White play Bh6, but now the black king is getting stuck in the center.

14.♕e3 I also played this move quickly. My next idea is clear, to play Rad1 and maybe Nd4.

14...♕f6? I think here Bu thought for almost half an hour. [During the game I was mostly calculating 14...♔b4 and now I thought of these 2 options: 15.♖ab1!? (After the tempting looking 15.♔e4 15...♕b7 (15...O-O 16.♔xc6 ♕b7 17.♔b5 gives White a clearly better endgame.))]

15.♖e4 Now I am getting a much better endgame. [Another possibility was 15.♔e4 15...♖c5 (15...♖g5 was losing to 16.♕xg5 hxg5 17.♖b5) 16.♕xc5 ♔xc5 17.♖a4 ♔d6 18.♖ad1 ♔c7 19.♖d4 and White's position should be clearly better, but

I thought that the move in the game could be even stronger.]

15...♕xh4 16.♖xd6+ exd6 17.♖xh4 It is easy to see that Black's position is very dangerous. The pawn on d6 is very weak and the opposite colored bishops give White an extra piece for the attack.

17...♔d7 This was clearly my opponent's idea. Black wants to play c5 next, then put his king to c7 or c6 and defend the d6 pawn with Rd8. A good plan, but it is clear that my opponent missed my next move.

18.f4! Maybe the key move of the game. From now on the game will develop into only one direction. It is very hard for Black to find a solution as to how to defend from the coming f5.

18...♕a6 This is not a solution, but other moves also lead to a bad position. [In case of 18...♔c7 19.f5 gxf5 20.♖xf5 h5 21.♖ad1 ♔d8 I have the strong and silent 22.♕f2! with the idea of playing Bg3 next. White's advantage should be enough to win the game here.]

19.b3 The black bishop on a6 is going to spend the rest of the game as a "dead" piece.

19...g5 This move is already losing a pawn but there is not really a much better option available in the position.

20.fxg5 hxg5 21.♘f5 The white knight took a perfect position on f5 and Rad1 is coming next.

21...d5 [Not much better was 21...♙c7 22.♖ad1 ♜hd8 23.♙d2! with the idea of playing Ba5 next. White should be close to winning here.]

22.♖ad1 ♙b7 And now a small tactical blow decides the game:

23.♙xg5! A move which is clearly not very difficult to find, but a nice one anyway.

23...♜h5 [Of course Black can't take on g5 because of 23...♘xg5 24.♖e7+ ♙c8 25.♘d6+ and the bishop is lost.]

24.h4 I am a pawn up, all my pieces are protected and still Black is clearly suffering with his king on d7.

24...♜g8 25.♘g3 The white knight is going to f6 over e4.

25...♜hxg5 Already a clear sign of despair... [In case of 25...♜hh8 26.♘e4 ♙c7 27.♘f6 ♜d8 28.♙d2 ♙b6 29.h5 White's position should also be very close to a winning one.]

26.hxg5 ♜xg5 My position is totally winning, but still it is better not to give any chances and finish the game as quickly as possible.

27.♘e4 ♜g6

28.b4! The last exact move of the game. My knight is going to c5 and the black bishop on b7 is never going to enter the game.

28...♙c7 Nc5 was coming in any case.

29.♘c5 ♙c8 The last moves of the game are not really interesting anymore.

30.cxd5 ♘xc5 [After 30...cxd5 31.♖xd5 ♜xg2+ 32.♙xg2 ♘f4+ 33.♙f3 ♘xd5 34.♖c1 the endgame would be very easily winning for White.]

31.d6+ Of course 31.bxc5 was also possible, but this looks prettier.

31...♖xd6 32.bxc5 Now the exchange of rooks is forced.

32...♖xd1 33.♖xd1 ♙e6 34.a3 ♙b7 35.♖b1+ ♙a6

36.♖b4 The white king will slowly go to d6 and the c6 pawn is going to fall. After the game I was very happy because usually beating Bu Xiangzhi is a very difficult task and from the tournament situation it was a very important win for me, because Bu was leading with 2.5/3 and I was on 2/3 before the game. **1-0**

**(2) Panjwani, Raja(2440)
- So, Wesley(2744) [A09]**

9th Edmonton Int 2014(3.2),
2014.06.23

GM Arkadij Naiditsch
Best rating: 2737

We will see a very crazy game and another proof of how well Wesley So is feeling in tactical positions.

1.♘f3 d5 2.c4 For quite some time White has stopped to play this move order and we will see one more time why.

2...d4! Exactly the right reply. Black is taking over the center.

3.b4 This could be the preparation of Panjwani, but this line is considered to be bad for White. [In the line 3.e3 3...♘c6 4.exd4 ♘xd4 5.♘xd4 ♔xd4 6.♘c3 c6 7.d3 Black has the excellent move 7...♘h6! and of course Black is not afraid of Bxh6 and otherwise the black knight is going to d4 over f5, with a nice position.]

3...f6! Another good move. Black wants to play e5 next, with just a better position.

4.e3 White needs to do something and to do it as quickly as possible.

4...e5 5.c5 We are just on move 5 and the game is already very sharp. [Of course not 5.exd4 5...e4 and Black is much better.]

5...a5 Of course. Black is trying to crush White's pawn structure and from now on things start to be pretty forced.

6.♗b5+ This move is hard to understand, but it seems like preparation. Why White is trying to provoke the c6 move of Black is hard for me to understand. Maybe to avoid Nc6 in some lines, but it is only a speculation.

6...c6 7.♟c4 axb4 Black is trying the most principled move. [I think that after 7...dxe3 8.fxe3 e4 9.♞d4 axb4 Black's position should be better.]

8.♞xe5 Let the fun begin! [8.exd4 8...exd4 followed by Bxc5 and Black's position is clearly better.]

8...fxe5 We have a very strange position. It is funny to see that the first 8 moves of Black were only with pawns. [8...♞h6 9.♞d3 ♟f5 and probably Black has at least equalized.]

9.♞h5+ g6 [9...♞d7? would of course be a mistake since after 10.♞f5+ ♞c7 11.♞xe5+ White would be winning.]

10.♞xe5+ ♞e7 11.♞xh8 ♞f6 White is an exchange up, but the queen is trapped on h8. As well the position of the bishop on c1, knight on b1 and rook a1 is everything else but great. The game is very dynamic.

12.d3 A logical move. White wants to play Nd2 next and develop the pieces, but the question is why not play Bb2 with the threat of playing Bxd4. [The simple 12.♟b2 looks just killing, but Black also has an excellent reply: 12...♟e6!! Nobody cares about the d4 pawn! (12...♞bd7 13.♟xd4 ♞e5 14.O-O and White is just winning.) 13.♟xd4 ♞bd7 14.♟xe6 ♞xe6 followed by O-O-O and Bh6. The white queen is trapped on h8 and is going to be taken.]

12...♟e6! A strong move. The idea of Black is Nbd7 and O-O-O.

13.♞d2 [In case of 13.♟xe6 13...♞xe6 14.♟b2 ♞bd7 15.♟xd4 O-O-O followed by Bh6, Black is better.]

13...♞bd7 14.a3 White is trying to open the a-file to have axb4 after Black's O-O-O.

14...dxe3 A logical move. With the queen still trapped on h8, Black is trying to open the position as much as possible to gain some attacking chances. [Another very interesting position would appear after 14...♞e5 15.♞e4 is probably White's best reply. 15...♞xe4 16.♞xe5 ♟xc4 The strange thing is that although we are entering an endgame now and White is an exchange up, the black pieces are so nicely placed that probably Black's chances are even better. 17.♞xe7+ ♟xe7 18.dxc4 d3 I would rather be Black here.]

15.fxe3 b3! What a great move by So! Black is not only getting a very strong pawn on b3 now, but also wants to play O-O-O and Bh6.

16. ♖e4? And finally White is making a mistake. [It is really not an easy task for White to find a good reply here, but let us take a look at one of the most logical moves possible: 16.O-O 16...O-O-O Now it is clear that White will not be able to save the queen from h8, but at least it would be good to get as much material as possible. 17. ♕b2 ♕f5! This is the key move, Qxe3 and Bh6 or Bg7 are the threats now. 18.e4 (18. ♖e4 didn't help: 18... ♕g7 19. ♖xg7 ♖xg7 20. ♖xf6 ♖xc5 With a winning position for Black.) 18... ♕h6 19. ♕xf6 ♖xf6 20. ♖xf6 ♖xf6 21. ♖xb3 ♖e5 And although things are far from clear, Black's material advantage should be enough to give him better play.]

16... ♖xe4! So doesn't miss his chance and calculates the complications perfectly!

17. ♕xe6 ♖h4+ Could it be that White missed this unpleasant check?!

18.g3 [18. ♖e2 was losing immediately. 18... ♖f2+ 19. ♖d1 ♖df6 With mate to follow very shortly.]

18... ♖xg3 19. ♖g1 [19. ♕xd7+ was also losing. 19... ♖xd7 20.hxg3 ♖xh1+ 21. ♖f2 The material is equal now, but it is clear that the white king is much weaker than his colleague. 21... ♖d8! A nice finishing move. Black wants to play Kc8 next, bringing all his pieces to the attack. The game is basically over.]

19... ♖e4+ It is nice to see how nicely the black pieces are dominating the game.

20. ♖d1 ♖dxc5 and another Black piece is entering the attack with a tempo.

21. ♖e5 [After 21.dxe4 21... ♖xh2 Black is mating with the upcoming Rd8.]

21... ♖f2+ Now Black is winning another pawn on d3 with tempo.

22. ♖e2

22...fxd3 Black has at least 100 deadly threats. What a powerful game by Wesley So!

23.♔d4 ♕f2+ A great end of a fantastic game. I guess not many players would like to repeat the current opening anymore after seeing such a crush. **0-1**

(3) Moiseenko, Alexander(2707) - Lu Shanglei(2546) [A80]

FIDE World Rapid 2014(8.36),
2014.06.17

GM Csaba Balogh
Best rating: 2672

Let's examine a very nice miniature with some unusual sacrifices.

1.d4 f5 2.♘g5 A very rare move with the idea to confuse the development of the black pieces a bit. White pins the queen and he prepares to create doubled pawns in case of Nf6.

2...g6 The standard development of the Dutch variation. [2...h6 is positionally wrong because after 3.♘d2 the weakness in the black pawnchain (h7-g6-f5) will cause longterm problems for Black.]

3.♘c3 The whole idea of the white concept is a quick development of the pieces and to launch an attack with either h4-h5 or with e4 opening the center in front of the king.

3...♘f6 Black was clearly not familiar with this opening and he makes a dubious move. [3...♘g7 is more natural and also the main line, where White has two choices: 4.e4 (Or 4.h4) 4...fxe4 5.♘xe4 Actually Moiseenko has recently tried both options and both lines lead to very original positions.]

4.h4! [4.♗xf6 is premature, because after 4...exf6 5.e3 Black can lock the center with 5...d5! If White could have developed his bishop to c4, he might have hoped for an advantage, but now Black is fine, the doubled pawns are not bad at all as they control all the important central squares.]

4...h6 Another inaccuracy, Black critically weakens his g6 pawn and damages his own pawn structure. [Black wanted to prevent 4...♗g7 5.h5! with the idea of a nice exchange sacrifice after 5...♘xh5 6.e4! It is better to include this move first to open the position on the king and only after 6...fxe4 7.♖xh5! gxh5 8.♙xh5+ ♖f8 9.♘d5! ♘c6 10.♗c4→The attack looks very dangerous around the f7 square, which cannot be neutralized with Qe8, because after the trade of the queens, the c7 and the a8 fall.]

5.♗xf6 exf6 6.♘h3! White immediately points out to drawback of the h6 move and drives his knight to the f4 outpost to attack the weakness on g6.

6...h5 Logical, but too slow. Black wanted to avoid the demolition of his kingside pawn structure with Nf4 and h5. [6...♗b4 should have been played, although White has a clear advantage here as well. 7.♘f4 ♖f7 8.h5 (8.♙d3 is also good.) 8...g5 9.♘d5 ♗xc3+ 10.♘xc3 and the f5 pawn becomes a longterm target, which could be attacked effectively with e3, Bd3 and Qf3.]

7.♘f4 ♖f7 8.e3 The bishop is coming to c4 with tempo.

8...♗h6 Another logical move to get rid of the strong knight, but it is already the decisive mistake...The refutation is quite nice. [8...c6 would have been principled to lock the center again with d5, but White retains a big advantage with the strong 9.d5! avoiding Black to build up his ideal formation. Bc4 is coming next.]

9.♗c4+ ♖g7

10.♘xg6! This is the momentum that White had to use. Moiseenko manages to punish his opponent for his mistakes in the opening.

10...♖xg6 11.♙xh5+!! This beautiful queen sacrifice is the point!

11...♖h7 [11...♖xh5 leads to mate after 12.♗f7+! ♖g4

13.♘e2 White is threatening with mate in one with f3, the only move to delay it is (Or 13.f3+ 13...♖g3 14.♖f1! and Ne2 or Rh3 mates next move.) 13...f4 but now 14.f3+ ♖f5 15.e4# is quite nice.]

12. ♔f7+ ♘g7

13. ♘d5! White is a piece down, but his attack is crushing! The Nd5 move was a very important attacking move to prevent Black's main defensive sources with Qe8 or Qf8, as both now lose to Nxf6!

13... ♖f8 [13... ♔f8 14. ♘xf6+ ♔h6 15. ♔h5#; 13... d6 14. h5+- and h6 or Qg6 wins next.; 13... c6 also loses to 14. h5! cxd5 15. ♔g6+ ♔g8 16. ♘xd5+ ♔f8 17. ♔f7#]

14. ♔h5+ ♘h6 15. ♔xf5+ ♔h8 [15... ♔g7 does not change anything, White wins for instance after 16. h5 with the threat of Qg6. Or 16. Rh3 is also strong enough to bring another attacker... 16... ♔e8 17. ♘xc7+-]

16. ♔g6! The bishop is trapped on h6, the game is over!

16... ♘g7 17. ♔h5+ [Black resigned in view of 17. ♔h5+ 17... ♔g8 18. ♘e7# Theory is very well developed nowadays and we can rarely meet such 11. Qxh5 sacrifices in grandmaster games at such an early stage of the game.] **1-0**

FIDE World Blitz 2014(1.7),
2014.06.19

The next game is from the World blitz Championship. Despite the very short time control (3 minutes plus 2 seconds per move) Mamedyarov leads a very nice attacking game.

1.d4 d5 [Usually we reach the game's position from the following move order: 1... ♘f6 2. c4 e6 3. ♘f3 d5 4. ♘c3 dxc4 5. ♘g5 ♘b4 6. e4]

2.c4 e6 3. ♘c3 ♘b4 4. ♘f3 ♘f6 The game starts as a Ragozin defence, but two moves later they transpose to the...

5. ♘g5

5...dxc4 The Vienna variation. This used to be a very popular opening not so long ago even on the highest level, but now it went completely out of fashion for some reason...

6.e4 h6 This is the new way to handle this opening, introduced by Kramnik in 2009 on the highest level. [The classical Vienna goes with 6...c5 with very sharp and

interesting lines.]

7. ♖xf6 ♜xf6 8. ♙xc4 White has a nice center, but if Black succeeds to explode it with c5, he might quickly equalize thanks to the pair of bishops.

8...c5 White has tried many different setups at the early stage of the development of this line, but the only unpleasant option which might cause problems is already clear. It is the one which was used by Mamedyarov in this game.

9.e5 ♜d8 10.O-O O-O [10...cxd4 11. ♘e4! will lead to the game with transposition.]

11. ♘e4 cxd4 This is the critical moment of this opening, where the white players have found a great attacking idea to retain the initiative:

12. ♜e2! The point is that if White restores the material balance and takes back the pawn on d4, Black gets a very easy development with Bd7 and Nc6. The pieces are coming with tempo, the d-file is opening quickly, which will be occupied by the rooks soon and the mass of exchanges would lead to equality. However, the strategy of White is to keep the d4 pawn on the board, which gives a good shelter for his pieces to launch an effective attack and also limits the movement of the black pieces. The attacking idea is the following, White brings back his bishop to d3, followed by Ng3 and Qe4... [12. ♘xd4

12... ♜c7 is strong now because of the double attack. In some similar lines this does not work, but even then Black is fine with Bd7 and Nc6.]

12... ♜b6 A flexible move. Black does not decide yet where he develops his knight, he decides according to White's play. Sometimes it might go the c6, but in other cases Nd7-f8 is an important defender of the long diagonal (after Bd3-Qe4).

13. ♙d3! White follows his plan, other ideas do not come into consideration now.

13... ♜d8 [The problem is that

13... ♙d7 with the idea of 14.Ng3 Bc6 to prevent Qe4 does not work in view of the nice 14. ♘f6+! gxf6 15.exf6 Qe4 is threatening and after most defensive moves, like 15... ♙c6 16. ♘e5!+- wins the game. Mate is coming soon with Qg4.]

14. ♘g3! [14. ♘f6+? is not dangerous now, because the d7 square is not occupied by the bishop and Black has 14...gxf6 15.exf6 ♘d7!+-]

14... ♙d7 [The alternative was 14... ♘d7 15. ♜e4 ♘f8 when White should continue with an unexpected move: 16. ♜h4! With a very hidden idea to take control over the e7 square and threatening to trap the b4 bishop with a3 and b4. (The most natural 16. ♘h5 or 16.Qg4 could be met by 16... ♙e7! 17. ♜g4

g6 Black is alive.) 16...♖e8 Giving the option for the bishop to retreat to e7, but now (16...♙d7 loses to 17.a3!+- and b4 next.) 17.♘h5 ♙e7 18.♘f6+! gxf6 19.exf6 White is threatening to play Qxh6, therefore Black is forced to give back his extra piece, but then his king remains exposed and faces a very strong attack. 19...♙xf6 20.♖xf6 e5 21.♖h4→Of course White keeps the queens on board and brings his rook to e1. Black really misses his g-pawn here.]

15.♖e4 g6 16.♖g4 The most natural attacking move to prepare some sacrifices on g6. [16.♖f4!? 16...♙f8 17.♘e4 was a very strong alternative. After the most natural move 17...♙c6 with the idea to take on e4 or Nd7 and retain the extra pawn, but Black gets into serious trouble after 18.♘f6+ ♖g7 (18...♖h8 is also bad in view of 19.♘g5!! hxg5? (19...♖c7 20.♙xg6! fxg6 21.♘xe6 ♖e7 22.♘xd8 ♖xd8 23.♖ad1 with a very strong attack. White will be fine even materially, but Black's undeveloped queenside will cause even bigger problems.) 20.♖xg5! ♖g7 21.♖h4!+- Black gets mated.)

19.♘h4! Black has no good way to parry the threats around the g6 square. 19...♙d7 20.♘h5+! gxh5 (20...♖g8 21.♘xg6! fxg6 22.♙xg6+- Black cannot prevent Qf7!) 21.♖g3+ ♖h8 22.♘g6+! fxg6 23.♖xg6+- could have been a very nice attack too. 23...♙f6 24.exf6 ♖c7 25.f7+- and Qh7 next.]

16...♙e8 This was the other point of Bd7, Black wanted to strengthen his kingside with his bishop, he only needs to drive his knight to f8 to consolidate. Black has successfully parried the direct threats, but Mamedyarov advances his h-pawn to make to kingside even more vulnerable:

17.h4! ♘d7 18.h5 ♘f8 [18...g5 was more natural, although the attack seems to be very strong after 19.♘e4! preparing to sacrifice on g5! (19.♘xg5 did not work immediately because of the intermediate move 19...♙xe5!) 19...♙e7 20.♘exg5! hxg5

21.h6! This is given to be very strong by the machine. The main idea is to create the mate threat on g7 with the queen. A possible finish could be 21...♖dc8 with the idea to consolidate with Qd8, but White wins after 22.♘xg5! ♘xe5 23.♙h7+!! ♖h8 (23...♖f8 24.♘xe6+! and Qg7 mates next.) 24.♘xf7+! ♙xf7 25.♖g7#]

19.♘h4 [Perhaps it was even stronger to play 19.hxg6 19...fxg6 20.♖h4! ± White wins the h6 pawn because of the motif that we already know from the 14...Nd7 line, that White is threatening to trap the bishop with a3 and b4, as he just has taken under control the e7 square. 20...♖g7? 21.a3+-]

19...♔h7

20.f4! Very nice attack leading, f5 is coming next with sacrifices to destroy Black's kingside.

20...♙e7! Black cannot create any counterplay, his only hope is to bring all his pieces to the defence.

21.f5 exf5 22.♘gxf5 ♙g5? The decisive mistake, but it was impossible to defend against such an attack, especially in a blitz game, but even with an hour on the clock, I am quite sure that Black would have been mated. [However the position is perhaps not that bad yet if Black plays 22...gxf5 23.♘xf5 ♙g5 although after 24.♘d6+ ♔g8 25.♖f6→I would be worried of getting mated. White is threatening to take on h6 and also to activate the last inactive piece on a1 is quite unpleasant.]

23.hxg6+ ♘xg6 [23...fxg6 also loses after 24.♘d6! ♖xd6 25.♖xf8 ♖e6 26.♖af1+- It is not a surprise that Black has no defence. White is only one pawn down for such a]

24.♘xh6! Mamedyarov finishes the game in style. The white pieces are calling for a final blow!

24...♙xh6 [24...♔xh6 25.♘f5+ ♔h7 26.♖xg5+-]

25.♖f6 ♙e3+ 26.♔h1 ♖c7 27.♖af1 White had many other wins too, but it is nice to invite the last attacking piece too. The game is over.

27...♖xe5 28.♖xf7+! ♙xf7 29.♖xf7+ ♔h8 [29...♔g8 30.♖xg6+-]

30.♘xg6+ Black resigned . A very high quality game, which could have been played even with classical time control. **1-0**

Endgame section

(15) Aronian, Levon(2815)
- Carlsen, Magnus(2881)

World blitz Championship,
2014.06.20

GM Csaba Balogh
Best rating: 2672

The following rook endgame is a theoretical draw despite the two extra pawns. It is very useful to remember this position, so we could save some difficult endgames in our own practice. Actually the strategy to hold is quite simple: Black sends the king back with side checks and in the certain moment he puts his king between the pawns...

69...♖a7+ 70.♔f6 [Avoiding the checks by approaching the rook does not change anything: 70.♔e6 70...♖a6+ 71.♔d7 ♖a7+ 72.♔c6 Black gives all the checks to lure the king far away and then plays 72...♔g6=]

70...♖a6+ 71.♔e5 ♖a5+ 72.♔f4 ♖a4+ 73.♔g3 White would like to hide his king from the checks on h5. Giving more checks would already make no sense, therefore it is time to make the key move:

73...♔g6! 74.♖f8 The g5 pawn is indirectly protected because of h7 and promotion and White is threatening to play Rg8 with a winning check! [On 74.♖e5 Black could simply wait with 74...♖b4 followed by moving with the rook along the 4th rank, waiting for White to make some progress. The only winning attempt will be Aronian's idea to go to the 8th rank with the rook sooner or later.]

74...♖a3+ This is the easiest way to hold. The king cannot go to h5 anymore, and the only way to continue the game is to bring back the rook. [It is useful to remember the other defensive method as well: 74...♖a7 Let's say, if there was no chance for giving checks from the side, Black could also hold with this motif. The idea is 75.♖g8+ (75.♔g4 75...♖a4+ transposes to the game.) 75...♔h7!= and there is no check on g7 thanks to the Ra7 move. The rook is forced to go away along the 8th rank, but then the king also retreats to his ideal square to g6!]

75. ♔g4 ♖a4+ 76. ♖f4

76... ♖a6! This is the famous theoretical draw. Black has prevented the checks on the 6th rank and in the next moves he only waits with his rook along the 6th rank. White cannot make progress.

77. ♖b4 [77. ♖f6+ 77... ♖xf6 78. gxf6 ♔xf6 79. ♔h5 ♔f7= is obviously a draw.]

77... ♖c6 78. ♖e4 ♖b6 79. ♔f4 ♖a6 Of course both players knew exactly that the game is drawn. Aronian tries a last attempt, but Carlsen simply neutralizes it.

80. ♖e8 ♖a4+ 81. ♔e5 ♖a5+ 82. ♔f4 ♖f5+ Black is already forcing a draw. [82... ♖a4+ 83. ♖e4 ♖a6= was also good enough.]

83. ♔e4 ♖xg5 84. ♖g8+ ♔xh6 85. ♖xg5 ♔xg5 1/2-1/2

GM Arkadij Naiditsch
Best rating: 2737

All game long White tried to hold a difficult position and finally we are in a very interesting rook endgame. Let us take a look at how the game developed.

62... ♖a2+ Of course Black should not hurry with playing a2 after which the rook on a1 would have no moves. Black's idea in a perfect case should be to get his king to a2 and at the same time not to lose the e5 and g5 pawns.

63. ♔g3 White of course just keeps on waiting.

63... ♔d6 64. ♔h3 The correct move. To move the rook from a5 would be a crucial mistake because the black king would immediately cross the 5th rank.

64... ♔c6! Black is trying his only winning chance. [Let us take a look at how White would hold the position in case Black would push the pawn to a2: 64... ♖a1 65. ♔g2 a2 all White

needs to do now, is to keep the rook on the a file 66. ♖a8 ♔d5
67. ♖a7 ♔d4 68. ♖a8

68... ♔e3 69. ♖a3+ ♔e2 70. ♖a4 and Black is not able to make any progress.]

65. ♖xe5 Of course the e5 pawn needs to be taken. Black wanted to play Kb6 and in case of Ra8 just Kb5 and the black king would help the a-pawn to promote.

65... ♔b6 66. ♖e6+ The most simple way of making a draw. White is planning to keep on checking the black king until it will be possible again to bring his rook to the a-file.

66... ♔b5 67. ♖e5+ ♔b4 68. ♖e4+ [Of course not 68. ♖xg5?? 68... ♖a1 69. ♖g8 a2 and Black is easily winning.]

68... ♔c3

69. ♖e3+! A good practical decision. Before getting the rook

on the a-file, White is trying to lure the black king as far away from the a-pawn as possible.

69... ♔d2 70. ♖e5 White is defending very well and not giving Black any winning chances. White not only wants to play Ra5 but Rxg5 is also already a threat.

70... ♖a1 [Black can not play for a win with 70... ♖b2? 71. ♖xg5 a2 72. ♖a5 ♔c1 73. g5 as the white pawns are too fast.]

71. ♔g2 a2 72. ♖a5 And finally we are back in a theoretical draw position.

72... ♔c3 73. ♖a8 White keeps the passive defence which secures an easy draw.

73... ♔b3 Black wants to play Rc1 next.

74. ♖b8+ The last exact move. From now on nothing exciting can happen anymore.

74... ♔c3 75. ♖c8+ ♔b3 76. ♖b8+ ♔c3 77. ♖c8+ ♔b3 78. ♖b8+

78... ♔c3 79. ♖a8 ♔b3 80. ♖b8+ ♔c3 Irina Krush showed a great defence in a not so easy rook endgame. **1/2-1/2**

Clash of the Titans

(17) Capablanca, Jose Raul
- Czerniak, Moshe[B22]

Buenos Aires ol (Men) fin-A(3),
1939.09.04

GM Kamil Miton
Best rating: 2655

1.e4 c6 2.d4 d5 3.exd5 cxd5 4.c4 ♖c6 [4...♗f6 5.♗c3 e6 6.♗f3 leads to the main positions. Black has two plans, with Bb4 and Be7.]

5.♗f3 [5.♗c3 probably transposes to the main lines after 5...Nf6 because taking the pawn should be very risky for Black, for example : 5...dxc4 6.♗xc4 ♗xd4 7.♗f3 ♗xf3+ 8.♖xf3 ♗f6 9.O-O and White has a strong initiative for the pawn.]

5...♗g4 6.cxd5 ♖xd5 7.♗e2 e6 8.O-O ♗f6 9.♗c3 ♖a5 10.h3 ♗h5

11.a3 White is not only preparing b4, but Qb3 as well. [If White immediately plays 11.♖b3 then Black plays 11...♖b4! since without the queens Black will have less problems.]

11...♖d8 12.g4 Capablanca decides not to lose any time since

he is better developed and plays very actively. [12.♖b3!? 12...♖d7 13.♗e3 With the idea of Rd1-d5 or g4-Ne5 at some point.]

12...♗g6 13.b4 [13.♗b5 13...♗d6=+]

13...♗xb4!? Black decides to play very concretely. More solid was [13...♖c7 14.♗e3 ♗e7 15.♖c1 O-O 16.♖b3 (16.b5 16...♗xa3 17.bxc6 ♗xc1 18.♖xc1 ♖xc6 19.♗e5∞) 16...♖b8 17.♖fd1 If black manages to stop the d5 break then the position should even be better for him. 17...♗e4↔]

14.axb4 ♖xa1 15.♖b3 Now White is hunting for the black queen.

15...♖xd4 [15...O-O 16.♗b2 (16.♗a3 16...♗c2!) 16...♗a5 17.bxa5 ♖xa5 The material situation is not bad for Black but after 18.♗a3 the white pieces get strong activity. 18...♖fe8

19.♙b5 ♘d7 20.♞e5 (20.d5!?) 20...♞xe5 21.dxe5 ♙d3
22.♙xe8 ♙xf1 23.♙xf7+ ♖xf7 24.♖xf1 ♜xe5 25.♜xb7+ ♖g8
Black needs to be very careful now.]

16.♙a3 [16.♞xd4 16...♞xd4 17.♜c4 ♜xc3—+]

16...♙c2 17.♜xc2?! White could create more practical problems after: [17.♜xa1 17...♙xb3 18.b5 ♜d8 19.bxc6 bxc6 Once again we have a situation where the material is not enough for Black, as White has a strong initiative thanks to his active pieces. 20.♞e5 ♞d5 21.♞b5↑]

17...♜xa3 18.♞b5

18...♜xb4?! Probably more accurate was to reduce the material after: [18...♜xg4+ 19.hxg4 ♜xb4 20.♞e5 (20.♞c7+ 20...♙d7+) 20...O-O 21.♞xc6 (21.♜b1 21...♜f4 22.♞xc6 bxc6 23.♞xa7 ♞xg4∞) 21...bxc6 22.♜xc6 ♞xg4 Black can't be worse here.]

19.♞fxd4 ♞xd4 20.♞xd4?! White missed the chance to leave the black king in the center and get strong pressure after [20.♜c8+! 20...♙e7 21.♜c7+ ♞d7 22.♞xd4 ♜xd4 23.♜d1 ♜a4 24.♜d6+ ♙e8 25.♜c1→XKe8]

20...O-O 21.♜d1 ♞d5 [21...♜d8 22.♜c7↑; 21...♜e7 22.♙f3 ♜d8 With a solid position for Black.]

22.♙f3 ♞f4 23.♙h2

23...e5?! I don't like this move at all because now the d5 and f5 squares will be useful for White. [23...♜e7 A very solid move which prevents Qc7 and prepares Rd8 or Qh4.]

24.♞f5 g6 25.♞e3 [25.♜b1 With the simple idea just to check on e7 and then win the b7 pawn, so Black plays 25...♜a3 26.♜b3 ♜a1 with the counterplay idea Qf1. 27.♜b2 ♜f1 (27...♜xb2 28.♞e7+ ♖g7 29.♜xb2 b6 30.♞c6 White is winning a pawn.) 28.♞e7+ ♖g7

29.♜xe5+ f6 30.♜e3 Taking the knight on f4 would lead to a draw by perpetual check. 30...♜xh3+ 31.♙g1± The white pieces are more dangerous than the black ones.]

25...♞e6 [25...♜e7 26.♞d5 ♞xd5 27.♜xd5 b6 28.♜a4 After the e5 move Black has weakened his light squares, which is

why White is better here.]

26. ♖d5 ♙a3 **27.** ♖d3 ♙a1 **28.** ♖d1 ♙a3 **29.** ♖d3 ♙a1
30. ♙d2 With the idea Qh6.

30... ♔g7 **31.** ♙e2 With the idea Rd1.

31...f6 **32.** ♙e3 We still have material equality but the white pieces already have great active positions, which is why Black's position is very difficult. White is preparing Ra3.

32...a6? Black could still fight after [32... ♙a6 with the idea 33. ♖a3 ♙d6 and is not possible to take the pawn on a7.]

33. ♖d1 The white pieces are very well coordinated. The black pawns and king are weak. White has a decisive initiative.

33... ♙b2

34. ♖c3! ♖d4 **35.** ♖b1 ♙c2 **36.** ♙e4 1-0

Editorial Preface

The 5th Hainan Danzhou super tournament ended with a double victory of the Chinese players Bu and Ding Liren, both with a very good 6.5/9. The 3rd-4th places were shared by your commentator and Ponomariov with 5.5/9.

In the Edmonton International, as expected, we saw a total domination by Ivanchuk and So who totally crushed the field. Ivanchuk finally scored 8/9 and So came second with 7.5/9.

The Greek league been won by PS Peristeriou.

There is not much else going on from the main chess events, but from next week on we can look forward to the start of the Dortmund Schachtage with Caruana, Kramnik, Leko,...

We hope you enjoy this week's issue with some nice positional wins.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Bu Xiangzhi(2693)**
- **Wei Yi(2634) [A15]**

5th Hainan Danzhou GM(6),
2014.07.01

GM Arkadij Naiditsch
Best rating: 2737

Bu seems to know his countrymen very well as he scored an amazing 4,5/5 score with the white pieces. In the current game against the probably strongest/ youngest GM in the world, Wei Yi, who is just 15 years old, Bu chooses a very solid opening and enters a slightly better endgame, which doesn't seem to be so serious at first, but slowly but surely he outplays his opponent which makes Wei Yi panic and lose the game on the spot at some point.

1.♘f3 ♘f6 2.c4 g6 The best Chinese players usually choose the Slav or KID.

3.b3 Well, not the most aggressive opening choice. Bu's strategy was probably just to play a chess game without going too deep into the theoretical lines.

3...♗g7 4.♗b2 0-0 5.g3 A double fianchetto opening is actually more tricky than it looks like, how to react now for Black?!

5...d6 is a possible reply, but I don't think it's the strongest one. To me the best reaction seems to be 5...c5 followed by Nc6 and d5. I think White should have no advantage there. In case of 5...c6, with the idea of playing d5 next, White could get a small advantage by playing d3 (not d4) and then Nbd2.

6.d4 was probably played against the e5 move.

6...c5 is another possible move, but I think one more time Black is not playing the most principled. [6...e5!? seems to be the right way of playing to me, so in case of White's 7.dxe5 Black always has Ng4 or Nfd7, so there is no reason to be afraid of it. The next black move could be Nbd7, with an interesting position.]

7.♗g2

7...♔a5+ Quite a creative move. Black is provoking the white bishop to c3 to have the d5 idea, but on the other hand maybe it is too creative because the black queen is not going to have the best position on c7.

8.♗c3 [8.♘bd2 8...♗e4 looks more promising for Black.]

8...♔c7 9.♘bd2 Black wanted to play Ne4.

9...cxd4 Now we can see Black's idea.

10.♘xd4 d5 If we look at the position from a logical point of view, Black lost a tempo with playing d6 and then d5 and the queen on c7 is only going to stand under attack, so I think White's position should be better here.

11.0-0 Bu continues with logical moves. White should never be afraid of e5 because of Nb5.

11...♖d8 12.♖c1 ♔d7 A cool move by Black in what is already quite a difficult position. It is not easy to find a way to develop

the pieces. [12...dxc4 was losing on the spot: 13.♖xc4 e5 14.♗a5]

13.♘c2 Black already threatened to play e5 and it seems like the white knight has to move from d4, so Bu decides to play Nc2 with the future idea of playing Ne3-Nd5, which is quite logical. [Also possible was 13.♘4f3 and White would take the e5 square under control, which would make the g2 bishop even stronger.]

13...dxc4

14.♗a5! Very strong play! [After the peaceful 14.♖xc4 14...♗c6 Black should be fine because of the bad position of the white knight on c2.]

14...♖e8 15.♗xc4 Now the black rook is much more passively placed on e8.

15...♗c6 16.♗b4 I guess Bu planned this move when he played 13.Nc2. It looks quite strange to give up the bishop, but on the other hand the white knight and the bishop on g2 give White a clear initiative. The black bishop on g7 is somehow out of the game.

16...♗xa5 Black has to take on a5.

17.♖xd7 [Of course not 17.♗xa5? 17...♖b5!]

17...♗xd7 To play 17...Nxd7? is of course not an option.

18.♗xa5 b6! The only move after which Black is not losing the b7 pawn.

19.♗c4 White is transferring his knight over e5 to c6. [After 19.♗ac6 19...a5 20.♗d3 ♖ac8 Black keeps on fighting for equality.]

19...♖ac8 20.♗e5 The position almost looks like a draw, but White still keeps putting pressure, so Black needs to continue being very accurate.

20...♗f5 Maybe after this little inaccuracy Black is already finding himself in a bad position. [It seems like the best way to fight was 20...♗b5 Of course White has different options too, but let us take a look at the most logical one: 21.♗c6 ♗xc6 22.♗exc6 ♖c7 Black is very passive but also very solid. 23.♗a6 ♖b7 24.♖fd1 e6 Of course White is still better, but it is very hard to prove that there are realistic chances for a win here.]

21.♗bc6! Another very strong move by White. The idea is to win the control over the c-file.

21...♖c7 22.♗d4 Attacking both the f5 bishop and the c7 rook.

22...♗d5?! Once again Black doesn't take his best chance. [After 22...♖xc1 23.♖xc1 ♗e4 24.♗dc6 White has a solid

advantage.; The right way to defend seems to be 22...♖ec8! 23.♖xc7 ♖xc7 24.♘xf5 gxf5 25.♖d1 h6 and of course White is better here, but Black's chances for a draw are not that bad. In case White tried to win material with 26.♖d8+ ♔h7 27.♘xf7? Black could even take over the game with 27...♖c1+ 28.♕f1 ♘e4 as the position is already totally unclear.]

23.♘xf5 gxf5 24.♖xc7 ♘xc7 25.♘c6 After some forced exchanges, we are entering a position where White has a huge advantage. Not only the knight on c6 guarantees White a small plus, but the black knight from c7 doesn't have any good squares either and White just wants to enter with his rook to d7 by playing Rd1-Rd7. Black's position is on the verge of being lost.

25...♘b5 26.♖d1 Of course not letting Black play Nd4.

26...♕f6 27.a4 Another nice move by White. It is clear that Black's only option is to somehow get an opposite colored bishop endgame with a pawn down and try to save it. By playing a4 White doesn't give Black any hope for it.

27...♘c3

28.♖d7 a5 Black continues defending passively. [Black should have tried 28...♘xe2+ 29.♔f1 ♘c3 30.♖xa7 and of course White's position is close to winning, but maybe Black could hope for some tricks with moves like e5, followed by e4

with some practical chances. In case Black just waited, White is just going to play b4-a5 and the a-pawn is going to be very hard to stop.]

29.♕f3! Solid and strong. White also keeps the Bh5 idea in mind.

29...b5?! Black panicks and after this move the game is lost. [To a very bad, but still a fighting position would lead 29...e5 30.♕h5 ♖f8 and there doesn't seem to be a forced win for White, although Black's position is just horrible.]

30.axb5 ♘xb5 31.♖d5 Now White just ends up a pawn up.

31...♘c3 32.♖xf5 a4 It is too late for exchanges...

33.bxa4 ♘xa4

34.e4! Accurate until the end. Black can't stop White from playing e5 and Bh5 next. It is game over.

34...♕g7 35.♕h5 A very clean positional win by Bu, showing great domination of the bishop+knight, which is quite typical for Catalan structures where White often has a strong bishop on the a8-h1 diagonal. A nice game to learn from! **1-0**

**(2) Xiu Deshun(2550)
- Ding Liren(2714) [D45]**

5th Hainan Danzhou GM(9),
2014.07.04

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the tournament and Ding Liren really needs a win to catch up with Bu and if he had a better tie-break it would even mean a tournament victory. It is never easy to win with Black, but we will see how he clearly shows a better understanding of the position and finally White blunders under pressure and transposes into a pawn endgame, which was very well calculated by Ding Liren.

1.d4 d5 I guess this was a little opening surprise for Xiu Deshun, as most of the Chinese players mainly play the Slav.

2.c4 e6 3.♘f3 ♘f6 4.♘c3 c6 And we are back to the Slav.

5.e3 ♘bd7 Actually one thing is quite funny and that is that most of the Top Chinese players are working together, which means they should have quite similar opening preparation. Now the question is, how do they manage to get a good or bad position after the opening, having almost exactly the same files?! I have been wondering about it for a long time...

6.♚c2 ♕d6 7.♕d3 dxc4 8.♕xc4 b5 9.♕d3 ♕b7 This is a not very often played move order for Black, but not a rare one either.

10.0-0 White wants to enter the main position in case of Black's 10...0-0. [I think the critical line should be 10.e4 10...e5 11.dxe5 ♘xe5 12.♘xe5 ♕xe5 13.f4 with a very fighting position, Bacrot-Nakamura, Biel 2013]

10...a6 This is the difference to 9...0-0 or 10...0-0. Black is trying to use the tempo to prepare the c5 push as fast as possible.

11.♘g5 This is usually a typical move, but here it is just wrong. Black did not castle yet so he doesn't need to defend the h7 pawn. [White could still play 11.e4 ; or 11.a4]

11...♚c7! Black is attacking h2 and at the same time preparing the c5 push, typical but nice anyway.

12.h3 [In case White would try a pawn sacrifice with 12.♘ge4 12...♘xe4 13.♘xe4 ♕xh2+ 14.♚h1 ♕d6 I don't see any compensation for White at all. 15.♘xd6+]

12...c5 So Black managed to play c5, which is always the key move in this kind of structures. Now White already needs to play very accurately not to get into a worse position.

13.♘ge4 The white knight has nothing to do anymore on g5.

13...♕e7 14.♘xf6+ [In case White tried to be tricky with 14.dxc5 14...♘xc5 15.♘xf6+ (15.♘xc5 15...♚xc5 We are back into the position from the game.) 15...gxf6! would crush all White hopes. Black's next moves could be Rg8 or even 0-0-0. White's position could be close to lost here!]

14...♘xf6 15.dxc5 ♚xc5 As we can see, Black is better developed with the symmetrical pawn structure which clearly

gives Ding Liren a small advantage. Of course with exact play, White should be able to hold his position.

16.e4 A little provocation by White, but of course the e4 move should be the right idea, just White could have started with 16.a3 first and only then have played e4.

16...♖c8 Ding Liren doesn't seem to be too interested in an endgame with a pawn up. [16...b4 looks quite tempting, but after 17.♙e3 (17.♞b3 doesn't lead anywhere. 17...♞c6 18.♘e2 ♘xe4 19.♘d4 ♞d5 With a pawn up for Black.) 17...♞c6 18.♘e2 ♞xc2 19.♙xc2 ♙xe4 20.♙a4+ ♚f8 21.♞ac1 the question is how much better is Black here?! White has some drawing chances because it is not that simple for Black to get the rook from h8 into the game.]

17.a3 O-O 18.♞e2 White is putting his pieces very solidly.

18...♞e5! A very tricky move.

19.f4 It is not great for White to play f4-e5 in such pawn structures, there can never be an attack on the black king and by playing f4-e5 White is weakening his own king. But what else to do?! Black just wants to play Rfd8 next and White has no nice development moves. [Of course 19.♙e3? 19...♘xe4 just loses a pawn.]

19...♞b8 20.e5?! too early, White could have waited with

playing e5 at least till Black really forces it [For example 20.♙e3 looks very normal. 20...♞fd8 21.♞ac1 With a slightly forced position for White, but it is pretty holdable.]

20...♘d5 21.♘xd5 ♙xd5 At first sight, this position looks equal, but in fact it is very unpleasant for White and during the next moves Ding Liren is going to show us why.

22.♙e3

22...g6! A strong positional move. The g6 move is useful anyway and Black is preparing to play h5-h4 in the future, to fix the white pawn structure even more.

23.a4?! The idea of exchanging the pawns is of course the right one, but currently it is not the right moment for it. [23.♞ac1 looks more solid. White's idea should clearly be to exchange both pairs of rooks as fast as possible.]

23...♙c4! Another right decision by Black. The white squared bishops have to be exchanged, which will make it easier for Black to expose the domination on the white squares and the white king is also getting weaker.

24.♞fc1 ♙xd3 25.♞xd3 ♞xc1+ One pair of rooks is going to be exchanged anyway.

26.♞xc1 bxa4 [After 26...♞d8 27.♞e4 bxa4 28.♞xa4 White seems to be holding somehow.]

27. ♖xa6 ♜b3 28. ♜e2 ♜b8 29. ♜c2 Black has improved his position almost to the maximum. Now Black's advantage is already more visible, White has a weakness on b2 and the f4 pawn could also be a potential target.

29...h5! Another excellent positional move. Black wants to play h4 next, fixing White's bad pawn structure.

30. ♜c1 Xiu Deshun is playing too passively. [30. ♜d4 would probably give better chances.]

30...♜d8 Black is bringing his rook into the attack.

31. ♜h2 ♜d3 Of course a move like Rd3 can't be a bad one, but was it really needed?! If I was Black, I would have kept the rooks on the board and played a move like 31... Kg7. I think in a practical game White's position is very hard to defend.

32. ♜d2! White is using the moment and exchanges the rooks.

32...♜xd2 33. ♜xd2 Now the defensive task is getting a bit more easy for White, but the position is still bad. Almost any endgame could be lost for White because of the horrible pawn structure.

33...h4 It can't be a bad thing to fix the white pawn structure.

34. ♜f2 ♜f8! Once again Black finds the right way to go on.

35. ♜e3 ♜e8 36. ♜d2 ♜b4?! This kind of move is really hard

to explain but it is obvious that Black blundered something. [Black should have played the more solid 36... ♜c4 with the idea of playing Bb4 next and then if possible Kd7-Kc6. White's position is really difficult to defend.]

37. ♜d4 ♜e7 Well, it is better to recognize one's own mistake as fast as possible.

38. ♜f2 Another strange move by White. [38. ♜e4! would not let the black king stand in the center. 38... ♜d7 would be too dangerous now. 39. ♜d4+]]

38...♜c2 is not the best move either, but probably both players were in time trouble. After move 40 the games gained in quality again.

39. ♜e3 ♜b3 Qe4 was possible again.

40. ♜f2 After the 40th move both players got extra 30 minutes, so Ding Liren had to think about how to get the best winning chances and he finds it.

40...♜b4! With the exchange of the queens Black's winning chances are not getting worse because of the great position of the black king on e8, who gets to the center faster than White's one from h2.

41. ♜g1 It seems like White doesn't have anything better already.

41...♔xd4 42.♙xd4 ♕d7 43.♖f2 ♖c6 And here comes the move with which White throws away the game:

44.♖e3? A clear miscalculation in a bad position. [44.♖e2 was a more resistant move, but after 44...♖b5 45.♖d3 ♖b4 46.♖c2 ♖c4 47.♙f2 Black clearly keeps good winning chances, with the g5 idea in a good moment.]

44...♙c5!! Black perfectly calculates the pawn endgame and evaluates it as winning!

45.♖d3 ♙xd4 46.♖xd4 ♖b5 From now on all moves are pretty forced.

47.♖c3 ♖c5 Black is winning the opposition and is entering the 4th rank with his king.

48.♖d3 ♖b4 49.♖c2

49...♖c4 And again White cannot stop the black king.

50.♖b1 White is trying to go for the a4 pawn, but nothing helps anymore. [50.♖d2 50...♖d4 and the game would be over immediately.]

50...♖d3! The last precise move of the games, but it is just too easy too miss.

51.♖a2 ♖e3 Now we are entering a totally winning queen endgame.

52.♖a3 ♖f2 [52...♖xf4 was of course also possible.]

53.♖xa4 ♖xg2 54.b4 The pawns are running...

54...♖xh3 55.b5 ♖g4 56.b6 h3 57.b7 h2 58.b8=♖ h1=♖ Black is a pawn up and the f4 pawn is going to fall. There is no hope for White to survive here.

59.♖f8

59...♖e4+ All in all we saw a nice positional win by Black from which we can clearly see what White should not do in Slav and of course how dangerous such a peaceful looking pawn structure can actually be. **0-1**

**(3) Balogh, Csaba(2648)
- Petrov, Marijan(2438) [B45]**Greek league,
2014.07.03GM Csaba Balogh
Best rating: 2672

I have managed to win a nice attacking game. The attack itself was already quite easy and I had a wide choice of good moves, but I was very happy about one of my moves in the middlegame, which had a deep idea behind it. After my opponent played the most obvious move and missed my point, it determined the entire game...

1.e4 c5 2.♘e2 Usually I don't do such things in the opening and I actually wanted to transpose to the open Sicilian, just with this move order I wanted to avoid a particular line, that my opponent plays from time to time.

2...♗c6 3.♗bc3 e6 4.d4 cxd4 5.♗xd4 We are back to the classical Sicilian main lines.

5...♗f6 [The highly popular continuation nowadays is the Taimanov Defence: 5...♖c7]

6.♗db5

6...♗b4 A quite annoying line, especially when the White

player wants to win, because it leads the game to a one sided position, where White has a very small, but longterm advantage, but Black's position is solid and very hard to crack. [More common is 6...d6 7.♗f4 e5 8.♗g5 when we have suddenly transposed to the Sveshnikov variation with an unusual move order.]

7.a3 ♗xc3+ 8.♗xc3 Gaining the pair of bishop without even having to damage the pawn structure should be an achievement for White.

8...d5 9.exd5 exd5 10.♗d3 O-O 11.O-O d4 12.♗e2 We have reached the initial position of this line, where Black can choose between several plans. At the moment, White has the pair of bishops and a well blockaded isolated pawn on d4. Black should aim for trading the light squared bishops, which would definitely ease his defensive task. [12.♗e4 is more logical, but less good because Black can get rid of the two bishops by playing 12...♗f5! 13.♗g5 (13.♗xf6+ 13...♖xf6) 13...♗xe4! 14.♗xe4 h6! and one of the bishops must take a knight, but then the advantage evaporates. 15.♗h4 (15.♗xf6 15...♖xf6) 15...g5 16.♗xc6 bxc6 17.♗g3 ♖d5= is considered to be equal.]

12...♗g4 The most natural move with the idea of creating an annoying pin and trading the bishops with Bh5-g6. [Another option with the same idea is 12...♖d5 White should prevent the Bf5 plan with 13.♗f4 ♖d6 14.♗h5! and theory gives an edge for White.]

13.f3 This unpinning move is necessary, even though it creates a hole on e3 for the black knight. [The best would be if White could play 13.♗g5 13...♖d6 14.♖d2 but here Black has 14...♗xe2! 15.Bxe2 moves into Ne4. 15.♖xe2 ♗fe8 16.♖f3 (16.♖d1 16...♗e5 Black either becomes very active or he takes the bishop pair.) 16...♗e5 17.♖g3 ♗h5 and Nxd3 next solves

the opening problems.]

13...♘h5 14.b4 Actually I played this move without thinking from memory, but after taking the conclusions of this game, I would rather say it is an inaccuracy. The idea would be a quick attack against the d4 pawn with Bb2 or b5, but Black has his resources to neutralize it. [More natural and better is 14.♘g5 14...♖d6 15.♗d2 when White should have a small edge.]

14...♗b6! Well played, Black has to strengthen his d4 pawn.

We have reached the moment when I played the move I was proud of after 30 minutes of thinking.

15.♗f2!? The novelty of the game. I started my calculation with the three most natural moves, but I was unable to find an advantage in any of them, which forced me to check some artificial alternatives. The main point of the move is to create the threat of Bb2 followed by taking on d4, which wins a pawn, because Black cannot take it twice in view of Bxh7 discovery check, winning the queen. As long as the rook was on f1, Black would have taken on d4 with check. The move is also useful in the sense that it leaves from the Ne3 fork in some lines, when White plays Bb2 and Black replies with Nd5. My opponent realized my idea of Bb2 and strengthened his d4 move with the most logical Rad8, but it runs into the second part of my plan... [The most common move was 15.♘f4 15...♘g6

16.♘g6 hxg6 Black threatens to play Ne5, therefore 17.f4 is possible, with the idea to launch a very dangerous attack, but I was worried about 17...♘e7! 18.♗f3 ♘f5 and Black prevents the attack and starts to jump on the e3-e4 squares. With the pawn on f2, White would have an edge, but now the e3 square is just too weak.; On the direct 15.♘b2 15...♗ad8 consolidates the d4 pawn. 16.b5 ♘e5 17.♘xd4 ♗xd4 18.♘h7+ ♖xh7 19.♗xd4 ♗xb5 Black is fine.; 15.♘g5 15...♘d5 16.♗d2 ♘g6 is also OK for Black.]

15...♗ad8? Black defends against the Bb2 threat, but moves into another idea. [A natural move which ignores White's idea like 15...♗fe8 runs into 16.♘b2 ♗ad8 17.b5 ♘e5 18.♘xd4! wins a pawn as Qxd4 at the end is not a check anymore. 18...♗xd4? 19.♘xd4 ♗xd4 20.♘h7++-; 15...a6 is also wrong because of 16.♘g5 ♘d5 17.♘e4! This is another point of Rf2, that there is no d3 check now. White gets a big advantage. 17...♘e3 18.♗d3 The e3 knight is not supported well and White wins a pawn in view of the double threat on h7 and Nxd4. 18...♘g6 19.♘xg6 hxg6 20.♘xd4!±; However after the strong 15...♘g6! Black seems to equalize. That is why I believe that 14.b4 is an inaccuracy.]

16.♘g5! White has not determined the situation of the c1 bishop and after Black has prepared for the real threat, Bb2, suddenly the bishop develops on the other diagonal more effectively.

16...♘e5 Black could not allow me to take on f6, seriously damaging the structure and he seemingly just improves his position with each move. He safely covers the f6 knight now, is ready to take on d3 or to play Bg6. However a plan changes the entire evaluation:

17. ♖g3! ♜g6 18. f4! Suddenly the bishop on g6 gets trapped!

18... ♜xd3 The only move, but it burries the g6 bishop for the entire game. [The tactical justification of the idea was that 18... ♜eg4? drops a piece in view of 19. ♜xf6! ♜xf2 (19... ♜xf6 20. f5+-) 20. ♜xd8! ♜xd1 21. ♜xb6+- White ends up with an extra piece from the complications.; 18... ♜xd3? also loses to 19. fxe5]

19. cxd3 h6 Black had to give a square to his bishop because of the f5 threat.

20. ♜xf6 ♜xf6 21. f5 ♜h7 This was the position I was hoping for when I played 15. Rf2 and surprisingly I did not make any miscalculation this time. White has gained a big advantage due to the difference between the strong knight either on e4 or h5 and the poor bishop on h7, which just has a really small chance to enter the game again.

22. ♜f3 White brings his heavy pieces to the game with tempo.

22... ♜d7 23. ♜e1 The most important opened file belongs to White now as well. The advantage is increasing with each move.

23... ♜h8 As they say, in a bad position there are only bad moves.

We have reached another critical moment. White is better in any case, but he has to decide about his next plan. He can play positionally with Rfe2 for instance, with a great positional advantage thanks to the h7 bishop, or try to launch an attack with f6, which on the other hand opens the diagonal of the bishop. I decided to go for the latter one... [Black could not fight for the e-file with 23... ♜e7 because it moves into 24. ♜e4 ♜e5 25. f6! and Black faces a very a strong attack.]

24. ♜h5! I think that this is the most effective way to attack in connection with f6.

24... ♜d8 [I expected 24... ♜g5 but it was also bad in view of 25. f6 g6 (25... gxf6 26. ♜xf6 ♜c7 and in the worst case White wins a pawn after 27. ♜xh7 ♜xh7 28. ♜e4+ Taking on d4 next and maintaining good attacking chances.) 26. ♜g3+- and the bishop is dead.; Objectively the best was 24... ♜c6 but who would like to enter an endgame where he is practically a piece down and moreover Black also destroys his pawn structure with this move. 25. ♜xc6 (25. ♜g4 25... f6 26. ♜fe2 is also promising.) 25... bxc6 26. ♜e5!± Black has 3 weak pawn on the queenside and his bishop is stuck.]

25. f6 gxf6? This helps, but Black was lost anyway. [On 25... g6 26. ♜g7! is strong. Black cannot even trade a pair of rooks with Re8, while White is sometimes threatening to play Rfe2-e8, creating problems on the back rank. But a

simple attack on the h6 pawn with the queen is also quite unpleasant. 26...♔c7 (26...♖d6 is always met by 27.♖e7+-) 27.♔h3

White has a pretty finish here with: 27...h5 28.♘h5!! gxh5 29.♖f5!! Rxh5 is killing and on 29...♙xf5 30.♔xf5+- Black cannot prevent the mate.; 25...g5 White has many good moves. Perhaps the most effective is 26.h4 ♖d5 (26...♖g8 27.hxg5 ♖xg5 28.♘g7! I like this knight a lot, which excludes the black rook from g8 and supports Re8!; 26...gxh4 27.♔f4+-) 27.♖e7+-]

26.♔f4! My opponent missed that White was not forced to take on f6, but the loss of the h6 pawn will cause even bigger problems. [White was also winning after 26.♘xf6 26...♖e7 27.♖ef1 ♙g6 This was his idea, trying to consolidate with Kg7 next, but White wins after 28.♔f4 ♙g7 29.♘g4+-]

26...f5 The only move, but it is equal to resignation. [26...♖g8 27.♘xf6+-]

27.♔xh6 f6 All moves are winning here, which is not a big surprise if we look at the position.

28.♖e6 [28.♖xf5 was also good.]

28...♖e7 [28...♖df7 29.♖xf5+-]

29.♖fe2 ♖ef7 [29...♖xe6 30.♔g7#]

30.♖xf6! White already has an extra pawn and he still maintains the mating attack. The game is over...

30...♔c7 [On 30...♔c8 I was ready to play the pretty 31.♖e7! as the c1 square is covered by the queen. Black gets mated.; 30...♖xf6 31.♔g7#]

31.♖xf7 ♔xf7 32.♘f4 White is threatening to play Ng6 Qxg6 Qxf8!

32...♖c8 [32...♖e8 loses to 33.♖xe8+ ♔xe8 34.♔f6+ ♙g8 35.♘e6+- Mate is coming soon.; 32...♖g8 33.♔d6+- is equally hopeless.; 32...♙g8 33.♔g5+ ♙h8 (33...♔g7 34.♔xg7+ ♙xg7 35.♘e6+-) 34.♖e7+-]

33.♖e7! Everything else was also winning, but I could not resist playing such a move.

33...♖c1+ 34.♙f2 ♖c2+ 35.♙f3 [Black resigned. The knight stands perfectly on f4, from where it doesn't just prevent the check on d5, but also wins the queen in case of 35.♙f3 35...♔xe7 36.♘g6+ ♙g8 37.♘xe7+- Objectively 15.Rf2 is not an improvement because Black equalizes after Bg6!, but definitely a very tricky attempt to get an edge.] **1-0**

(4) Azarov, Sergei(2610) - Korley, Kassa(2412) [C42]

2nd DC International 2014(3.1),
2014.06.27

GM Csaba Balogh
Best rating: 2672

White wins this game in very nice style. First he gets an edge by obtaining a space advantage, then he improves all his pieces to the maximum and at the end, when all the circumstances justify it he launches a decisive attack against the black king and finishes the game with some spectacular blows.

1.e4 e5 2.♘f3 ♘f6 Black tries to be safe by choosing the super-solid Petroff/ Russian defence.

3.♘xe5 d6 4.♘f3 ♘xe4 5.c4 A rare line, which hardly causes serious problems for Black, but it might be very effective as a surprise weapon. White would like to avoid the standard strengthening of the center with d5.

5...♙e7 [The point is that if Black plays 5...d5 6.♘c3! ♘xc3 (6...♘f6 7.d4 is also a good Petroff for White.) 7.dxc3+= White gets an edge because taking on c4 would leave the black king vulnerable on d8, even without the queens on board.; Perhaps the best reply is 5...♘c6 and on 6.d4 (6.♘c3!? 6...♘xc3 7.dxc3 is interesting.) 6...d5 is a much better version compared to the 5...d5 line. 7.♘c3 ♙b4!]

6.d4 O-O [6...d5 is met by 7.♘c3 when playing Bb4 in two moves makes no sense, while 7...♘xc3 8.bxc3 should be a favorable exchange for White.]

7.♙d3 ♘f6 This move is already kind of admitting that something went wrong in the opening and White can claim an edge thanks to his space advantage.

8.h3! A very useful move before castling. White restricts the mobility of the c8 bishop, which wanted to go to g4, but now has no useful development.

8...♞e8 9.O-O ♘bd7 Black has much less space for manoeuvring with his pieces, but it is going to be tough to beat him anyway as he has no weaknesses at all. He intends to transfer his knight to g6, play Bd7, c6, Qc7 and Bf8. This setup is known in another line of the Petroff too, but here White has a better version.

10.♘c3 ♘f8 11.♞e1 Azarov chooses the most natural development to all his pieces.

11...♘g6

12.♞c2! This is also the best square for the queen to create a battery on the b1-h7 diagonal. White can sometimes play Bg5,

because h6 might weaken the outpost of the g6 knight.

12...c6 Black delays the Bf8 retreat to avoid the pin after Bg5. That is why White developed his queen first to keep this extra option for his bishop.

13.♖d2 The rooks are also connected now.

13...♗d7 Everything went smoothly for White so far, here is the first question how to improve the position. In my opinion the transfer of the knight to the kingside with Ne2-g3 would also make sense, but Azarov chooses another plan. As my coach said when I was younger, when Karpov does not find plan in a position, he always doubles his rooks...

14.♖e2 ♗f8 It was time to trade a pair of rooks to ease the position and to have more space for manoeuvring. [If Black starts with 14...♖c7 15.♖ae1 and only then 15...♗f8 16.♗g5 is unpleasant as it is not easy to deal with the f6 knight.]

15.♖xe8 ♗xe8 16.♖e1 h6 This is an unnecessary weakening. Black was clearly annoyed by the Bg5 options after Qc7, but it would have been more important to keep the safe outpost of the g6 knight. Additionally this move allows a very nice attacking option for White, which was executed effectively by Azarov in the game... [16...♗d7 should have been played, followed by Qc7 and Re8. Ignoring the Bg5 idea, allowing the capture on f6, just to get rid of some pieces and try to hold the endgame afterwards. Of course it is suffering, but in the current circumstances, this was the least worse option.]

17.♗e2 ♗e7 Black is becoming more and more passive. [Probably he was afraid of 17...♖c7 18.♗xg6!? fxg6 19.♗f4 creating some weaknesses and the knight jumps to e6 next. Still, it would have been a better try.]

18.g4! Black's passive pieces are calling for punishment. By using the h6 pawn, White launches an attack (and also takes space) in front of his king. According to the principles the right counterplay to such ideas is the opening of the center, but here White is able to keep it locked after both c5 and d5 by pushing through his own pawn.

18...♗d7 [18...d5 or 18...c5 would not achieve its goal, Black should have tried 18...b5 when White has to keep the structure with 19.b3 bxc4 20.bxc4 Opening the b-file is not a huge achievement, but it might only favor Black later on to find some counterplay. But of course White is better and c5 is still met by d5 while d5 is met by c5.]

19.♗g3 A last improvement before opening the new front.

19...♖c7 Black finally wants to bring his rook to e8 to initiate exchanges, but it is already too late. White breaks through!

20.g5! hxg5 21.♗xg5 Due to the threat of the two moves mate with Bh7 followed by Nxf7, Black cannot play Re8.

21...♗e8 Black protects his f7 pawn. White finds a brilliant idea to strengthen his attack. [It would have been better to parry the Bh7 threat with 21...g6 although White has a great position after the subtle 22.♖d1! transferring the queen to a more active position on f3! Black has no time for 22...♖e8 because of 23.♖f3 ♗g7 24.♗3e4!+- with decisive problems

around the f7 pawn.]

22. ♖h7+! ♔h8

23. ♖e4!! A very nice exchange sacrifice with the idea to transfer a heavy piece to h4.

23...g6 [Black has no defence after 23... ♖xe4 24. ♖xe4 f6 (24...g6 25. ♖h4 ♔g7 is refuted by 26. ♖xg6! ♖xg6 27. ♖f5+ ♔f6 28. ♖e4!+- White has other wins too, but this is the most precise according to the computer. Nh7 wins next.) 25. ♖e6! ♖c8 26. ♖h4! The only move to temporarily avoid mate is 26...g5 but White wins after 27. ♖xg5! fxg5 28. ♖xg5+- and the game is over.; The best chance would have been 23... ♖g6 but White has a winning advantage here as well after 24. ♖xg6 fxg6 25. ♖xe8! ♖xe8 26. ♖xg6+- Nf5 is coming next with decisive threats.] **24. ♖h4 ♔g7**

25.d5! Another great tactical blow! White brings another extremely strong attacker as Bc3 will create a deadly pin next! The game is over.

25...♖d7 26. ♖c3 ♖f5 27. ♖h5+! [Black resigned in view of 27. ♖h5+ 27...gxh5 28. ♖xf5 Black cannot hold the pin of his f6 knight for long. One possible finish could be 28... ♖e7 29. ♖xd7 ♖xd7 30. ♖h7+ ♔f8 31. ♖xf7#] **1-0**

GM Csaba Balogh
Best rating: 2672

The following study-like position was reached. Black's last move was Rd5-f5 to avoid the promotion of the pawn after Bb4 check, followed by f7-f8. Despite being a pawn down and the limited amount of pieces, White is able to create brilliant threats...

56. ♖b4+! ♔g8 [56... ♕e8 immediately loses to 57.f7+! ♜xf7 58.♜b8#]

57. ♜g7+! Squeezing the king into the corner, but the key is the next move...

57... ♔h8

58. ♕c3! As simple as that! This battery on the a1-h8 diagonal is creating beautiful threats... Black has only one move here to survive, which he did not manage to find. I recommend to everyone to stop here for a while and try to calculate the lines.

58... ♘e6? [58...b4 is refuted by

59.f7! bxc3 60.♜g8#; 58... ♘h5 is the most natural, but White wins after the shocking...

59. Rg5!! Rxf6+ and the trick is that White is not forced to take the rook, but he simply leaves from the check and then both the knight and the rook are going to fall. (59... Rxf6 60. f7+-) 60. Rxb5+-; The only defence was 58... Nd5! which leads to an important theoretical endgame after 59. Rg5 (59. f7 now runs into 59... Rxf7!! Another only move! 60. Rxf7+ Nxc3 and Black survives.) 59... Rxf6!! Other moves were losing again. (59... Rxf6+ 60. Rxd5+-) 60. f7+ Nxc3 61. f8=Q+ Rg8 62. Qf6+ Rg7 63. Qxc3

Here we are! This position is a theoretical draw (of course the b-pawn does not matter). Black has to put his pawn on h6. 63... h6 64. Rxb5 Rb7 65. Rc6 It is very important that Black should not let the white king pass the 7th rank and reach the f8 square. If he gives a check, White goes Kd7-e8 and at the end, there will be no check on g7. Therefore the right defence

is to wait with the king. 65... Rh8! 66. Rd6 Rh7 67. Re6 Rh8 68. Rf6 Rh7 69. Re5 Rh8

This is the maximum that White could reach and now he cannot make progress if Black defends accurately. Let's check some attempts: 70. Qe8+ Rh7 71. Qh5 (71. Qf8 71... Rg6+ 72. Rf7 Rg5 And the king will be forced to retreat by checks due to the unfortunate situation of the queen. Actually the f8 square is the only place where the white queen controls both the g7 and the g8 square, but he still cannot win. He is in a kind of zugzwang, White is forced to retreat with the queen, but then Black sends back the king too with checks...) 71... Rg5 72. Qf7+ Rh8 Actually the position Black must be careful about is the one with the king on f7 and queen on f6, which is winning for White and let's examine the reasons why: 73. Qe8+ Rh7 74. Qe4+ Rh8 75. Qd4

Here the only move is: (75.♔f7 is still useless because of the checks: 75...♖g7+) 75...♖g7!! (Other moves are losing, for instance 75...♔h7 76.♔f7 ♖g8 77.♜f6 ♖g5

This is the winning position for White and the method is very subtle: 78.♜e6!! sets Black into the decisive zugzwang. The rook has 3 protected squares, on g5, g7 and g8, but soon he loses all of them... 78...♖g8 79.♜f5+ ♔h8 80.♜f6+ ♔h7 81.♜e6! Another zugzwang in order to let the white king reach the ideal f8 square! 81...♖g5 82.♔f8+- This is the end, because the black rook is forced to go to a square where it is not protected... 82...♖g7 (82...♖g1 83.♜e4+ ♔h8 84.♜d4+ ♔h7 85.♜xg1+-) 83.♜f5+ ♔h8 84.♜f6+-)]

59.♖e7! White not only threatens to play f7, but also with backrank mate on e8.

59...♖c5+ 60.♔d6 ♔g8 [60...♖xc3 61.♖e8+ ♔f8 62.♖xf8#]

61.♕d2 Black resigned. There was nothing left to do. **1-0**

(16) Ma Qun(2609)
- Naiditsch, Arkadij(2705)

5th Hainan Danzhou GM(9),
2014.07.04

GM Arkadij Naiditsch
Best rating: 2737

In a very interesting game I blundered in time trouble and got into a very bad endgame. After inaccurate play by my opponent, I managed to reach this drawish looking endgame, but making a draw is still not as simple as it looks. In case the white king manages to get to f5, it would be the end of my h-pawn as well. The idea of White is simple, to get his knight to d5 and after to play f5 and maybe Nf4, provoking my pawn to h4, where it would be an easier target.

53...♕a5! I find the right way to hold the position. I need the bishop on the diagonal a1-h8 to stop White from playing Ke5 later on. [Of course the pawn endgame is just lost for Black: 53...♕xd4? 54.♔xd4 ♔f5 55.♔e3 ♔f6 56.♔e4 ♔e6 57.f5+ ♔f6 58.♔f4 h4 59.♔g4 and I am losing the h-pawn too.; Keeping the bishop on the diagonal b8-h2 would be a mistake: 53...♕c7 54.♔f5 ♕b8 55.♔e3 ♕d6 56.♔d5+ ♔e6 57.f5+ ♔f7 58.♔f4 h4 59.♔f3 followed by Kg4, with very good winning chances for White.]

54. ♖f5 ♜c3 55. ♘e3 White is getting the knight to d5 as planned.

55... ♜b2 56. ♘d5+ And here comes the difference where we can see why it was so important to have the bishop on the right diagonal:

56... ♜g6! Not allowing White to play f5 that easily because of Kg5.

57. h4 White can't improve the position without playing h4, but now the h4 pawn is standing on the black square and is a perfect target for the black bishop. [57. f5+ 57... ♜g5 leads to an immediate draw.]

57... ♜g7! The most simple way of making a draw. White doesn't have anything better than playing f5 anyway and I am already preparing the transfer of my bishop to d2.

58. f5+ ♜f7 59. ♘f4 After this move the position is of course a draw. [The last chance for White was hoping for my mistake after 59. ♜f4 59... ♜h6+ 60. ♜e5 but now I had planned 60... ♜d2! followed by Be1 with a draw.]

59... ♜f6 60. ♘g6 The white knight can't move away from g6 because the h4 pawn is hanging, so White's only chance is to protect the pawn with his own king from g3 and to play Nf4 to attack the h5 pawn. All this is just too long and Black now

easily holds this endgame.

60... ♜e8 61. ♜d5

61... ♜d7 The white king can't enter anywhere.

62. ♘e5+ ♜e7 63. ♘f3 My opponent decides to give a try with the knight on f3, but it is basically the same.

63... ♜d7 64. ♘g5 ♜e7 I just keep on waiting...

65. ♘f3 ♜d7 66. ♘g5 ♜e7 67. ♜e4 ♜d6 68. ♜f4 ♜d5 69. ♘h7 So finally the game is coming to an end...

69... ♜xh4 70. f6 ♜e6 71. ♘g5+ ♜xf6 72. ♘e4+ ♜g6 73. ♘g3 ♜f6 74. ♘h5 Maybe the game looks like an easy draw, but believe me, it took me a while to figure out where to keep my bishop and to find 53...Ba5! **1/2-1/2**

1.e4 d6 2.d4 g6 3.♘c3 ♘f6 4.♗f3 ♕g7 5.♕e2 O-O 6.♕f4

For me this is not the best place for the bishop. The main move is [6.O-O Here Black has a few possibilities to develop, for example: Bg4-Nc5 with the idea e5 or a6-b5/ b6-Bb7.]

6...♗c6

7.d5 [7.O-O 7...♕g4 With the idea to play e5 to fight for the d4 and e5 squares.]

7...e5 8.dxe6?! After this move Black will easily equalize. The way to try and get an advantage was [8.♕g5 8...♗e7 (8...♗b8 9.h3 Preventing Bg4 and also preparing the typical g4 move. 9...h6 10.♕e3 ♗h5 (10...c6!? to fight for the center.) 11.g3 f5 12.exf5 gxf5 13.♗xe5 ♗xg3 14.fxg3 dxe5 15.♖d2↑ White is going to castle queenside and keep the pressure on the kingside.

15...b6) 9.♖d2 h5!? 10.O-O-O ♗h7 11.♕h4 f5 Black is not forced to hurry with the f5 move. 12.exf5 gxf5 13.♗g5 ♗f6 With very complex play.]

8...♕xe6 9.O-O White can usually fight for an advantage in this structure thanks to his space white advantage, but in this case the white pieces, especially the bishops, are not well placed and Black will soon equalize the position in the center after the logical d5 move.

9...♖e8 10.♖e1 [10.♕b5 10...♕g4 11.♕xc6 bxc6 12.h3 ♕xf3 13.♖xf3 ♗d7 Black is fine.]

10...h6 Black could immediately play [10...d5 11.exd5 (11.e5 11...♗e4∞) 11...♗xd5 12.♗xd5 ♕xd5 With a completely equal position. 13.♕xc7? ♖xc7 14.♖xd5 ♕xb2 with Bc3 next.]

11.h3 g5 12.♕e3

12...d5= 13.exd5 ♗xd5 14.♗xd5 ♖xd5 15.c3 ♖xd1 16.♖exd1 ♖ad8 17.♕b5 ♕d5 18.♗d4 [18.h4 Compared to the game White could first play this move to weaken the black structure. 18...g4 (18...♕xf3 19.gxf3 gxh4 20.♖xd8 ♖xd8 21.♕xc6 bxc6 22.♕xa7 ♖d2 23.a4! White has the initiative thanks to the strong a-pawn. 23...♖xb2 24.a5 ♕xc3 25.a6↑) 19.♗d4 ♕xd4 20.♕xd4 a6 21.♕xc6 ♕xc6 22.♖e1 with the idea Kh2-Kg3.; 18.♕xc6 18...♕xc6 19.♕xa7?? b6-+]

18...♗xd4 19.♗xd4 a6 20.♗xc6 ♗xc6

21.♖e1 The position should of course be drawish but thanks to slightly more active pieces Black is trying to create problems.

21...f5 Preparing Kf7 and f4, which limits the white bishop and fixes the weaknesses.

22.f3 ♗b5 Preparing b6-c5 which helps Black to take control of one of the files and come to the second rank. Otherwise White simply plays Kf2 and exchanges both rooks.

23.b4 White secures the bishop on d4, but on the other hand this move weakens the structure and the light squares as well.

23...b6

24.♖xe8+?! Why give up the e-file for nothing? [24.♖f2 24...♖xe1 25.♖xe1 c5 26.bxc5 bxc5 27.♗xc5 (27.♗e3? 27...f4 28.♗c1 ♖d3=+ XBc1) 27...♖d2+ 28.♖g1 ♖xa2 29.♖e6! White is on time with his counterplay. 29...♖h7 30.♗f8=]

24...♖xe8 25.a4 ♗c4 26.a5 White wants to secure the bishop on d4 and build a position where all pieces will protect each other. How we will see soon this task is not easy.

26...♖e6 27.axb6 cxb6 This structure is already better for Black, but the position should still be drawish. However the far passed pawn almost always gives chances to create practical problems.

28.♖f2

28...♖f7 One of the plans to improve the black position can be to transfer the king to the queenside. [28...♖e2+ 29.♖g1 and the b6 pawn is hanging.]

29.♖e1 ♖xe1 30.♖xe1 a5 31.bxa5 bxa5 32.g3 White prevents f4. [32.f4 32...gxf4 33.♗e5 a4 34.♗xf4 a3 35.♗c1 a2 36.♗b2 Because of the passive bishop Black is easily winning. 36...♖e6 37.♖f2 ♖e5 With the idea Ke4-Kd3.]

32...a4

33.♔d2? The critical moment! White should not let Black advance the pawn to a2. [33.♙c5! A logical move! White stops the a-pawn and also the bishop will attack the black pawns from behind. 33...♙e6

34.f4! A very important move! White has to escape with the pawns to dark squares! Otherwise Black would fix them on light squares and then easily win. (34.♙d2 34...f4! (34...h5 is a bad move ,now White has two drawish moves: 35.f4 (35.♙e3 35...a3 36.♙c2 a2 37.♙b2 ♔f6 38.f4! (38.h4? 38...gxh4 39.gxh4 ♙e5! with f4 next! 40.f4+ ♙e4 The white bishop is too passive here. 41.♙d2 ♙f3 with Kg3 next.) 38...g4 39.hxg4 fxg4 40.♙b6 ♙e7 41.♙a1 with an easy draw because in case

Black transfers the king White will put the bishop on h4.) 35...gxf4 (35...h4 36.gxh4 gxf4 37.h5 ♙f6 38.h6 ♙g6 39.♙f8=) 36.gxf4 ♙d5 37.♙f8 ♙e4 38.♙h6 a3 39.♙c2 h4 40.♙g5 ♙f3 41.♙xh4 ♙xf4 42.♙b1 With a draw because White will give up the bishop for the f-pawn.) 35.g4 ♙f1 36.♙e1 (36.♙f8 36...♙xh3 37.♙xh6 a3 38.♙c1 ♙f6 With an easy win because of the weak f3-g4 pawns.) 36...♙xh3 37.♙f2 ♙f7 (37...♙d5 38.♙a3 ♙c4 39.♙f8 ♙b3 40.c4! ♙xc4 41.♙xh6 a3 42.♙xg5 a2 43.♙f6=) 38.♙a3 ♙g6 39.c4 h5 40.gxh5+ ♙xh5 41.c5 ♙d7 42.♙b4 ♙g6 The black bishop will force the white king to protect the f-pawn and then the black king comes to the queenside to help promote the a-pawn.) 34...gxf4 35.gxf4 ♙d5 36.♙f8 ♙e4 37.♙d2 h5 38.♙h6 h4 39.♙g5 a3 40.♙c2 a2 41.♙b2 ♙f3 42.♙xh4 ♙xf4

And the position is a draw because after the bishop sacrifice for the f-pawn we will get a theoretical situation with the wrong corner on a1.]

33...a3 34.♙c2

34...h5! This important move gives Black options to create a second passed pawn.

35.h4 [35.♙e3 35...♖g6 After h4 next Black will fix a weak pawn. 36.f4 (36.h4 36...f4 37.gxf4 gxf4 38.♙f2 h3 39.♙g3 h4 40.♙h2 ♗f5 41.♗b1 ♙e2 42.♗a2 ♙xf3 43.♗xa3 ♙g4 with Ke4-Kf3-Kg2 next.) 36...h4! 37.gxh4 (37.♙f2 37...g4 38.hxg4 h3 39.gxf5+ ♗xf5 40.♙g1 ♗g4 Black is coming to g2.) 37...gxh4 38.♙f2 ♗h5 39.♗b1 ♙f1 40.♗a2 ♙xh3 41.♗xa3 ♗g4 42.♗b4 ♙f1 43.♗c5 h3 44.♙g1 ♗g3 And once again after Kg2 White is not able to stop the h-pawn.]

35...f4! 36.♙e5 [36.♙f2 36...gxh4 37.gxh4 ♖g6—+]

36...♗e6 37.♙c7 gxh4 38.♙xf4 [38.gxh4 38...♗f5 39.♙d6 a2 40.♗b2 ♙d5 41.♙c7 ♙xf3 42.♗xa2 ♙d5+ 43.c4 ♙xc4+ 44.♗b2 ♗g4! The most accurate! (44...♗e4 45.♗c3 f3 46.♙b6=) 45.♗c3 f3 46.♙b6

46...♗xh4! (46...♙a6 47.♙f2 ♗h3 48.♗d2 ♗g2 49.♗e3 White is on time!) 47.♗xc4 ♗g3—+ White is not able to stop both pawns.]

38...h3 39.g4 h4 40.♙h2 ♙e2

The winning plan after 41.Kb3 is to take both white pawns and come with the king to g2, you can check if White manages to do that on time? **0-1**

Editorial Preface

The European Women Championship in Bulgaria is under way. After 6 rounds Gunina is leading with 5.5/6, followed by Zhukova and Javakhishvili, both on 5/6. There are still 5 rounds to go and everything can happen.

In the Dutch Championship Sipke Ernst is leading with 3.5/5. Giri and Smeets are not participating, while the favourite Loek Van Wely is on a modest 2.5/5.

From tomorrow on we can be very excited about the start of the Dortmunder Schachtage, with Kramnik, Caruana, Adams, Leko, Ponomarev and the 3 German players Naiditsch, Meier and Baramidze. 8 players, 7 rounds round robin.

The double round robin in Biel is also starting in a couple of days, with : Vachier Lagrave, Giri, Wojtaszek, Harikrishna, Motylev and Yifan Hou. It is going to be very exciting to see if the Women World Champion can compete with the top male Grandmasters.

We hope to bring you great games from the Top level chess events next week and hope you enjoy this week's issue!

2nd DC International 2014(9.2),
2014.06.30

GM Csaba Balogh
Best rating: 2672

We are in the last round of the DC International tournament and two Cuban GMs are fighting for the top prizes. The game becomes very sharp as both players need a win and White comes out victorious from the complications...

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 a6 The Najdorf Sicilian is a very good option to obtain an imbalanced game. White also goes for the sharpest variation.

6.♕g5 ♗bd7 This sideline has become quite fashionable nowadays. The idea is to wait with the e7-e6 move and in some lines play e7-e5 at once. [6...e6 is the main move.]

7.f4 ♔c7 8.♔f3 [Another main move is 8.♔e2 when Black could make use of sparing the e7-e6 move and play 8...e5 9.♗f5 h6 10.♕xf6 ♗xf6 Theory considers Black to be alright.]

8...b5 [The alternative is 8...h6 9.♕xf6 (On 9.♕h4 Black could play again 9...e5 10.♗f5 exf4 with the idea of g5.) 9...♗xf6 10.f5! followed by 0-0-0 with very interesting positions.; 8...e6 would be a transposition to the old main lines.]

9.0-0-0 [9.e5 does not win material, since Black has the intermediate move 9...♕b7]

9...♕b7 10.♕d3 The standard development of the pieces. White quickly wants to bring his rook to e1 and put or even

sacrifice his knight on d5 (after Black plays e6) to create problems for the king on the e-file.

10...g6!? Here comes the point of restraining the e7-e6 move. Black can develop his bishop to a more active place on the long diagonal, because the d6 pawn is not weakened. When the pawn is on e6 and the black bishop leaves the d6 pawn, the different kind of sacrifices on b5 (lets say Bxb5 axb5 Nxb5 followed by Nxd6 check) are very dangerous. [10...e6 is still a transposition to the huge theoretical lines.]

11.♗d5 The most natural reaction to open the e-file. If Black had time to play Bg7 and 0-0, he would have obtained a perfect position.

11...♗xd5! The right capture, despite the fact that it weakens the e7 target even more. It is more important to keep the b7 bishop to control the c6 square. [11...♕xd5 12.exd5 is bad because Nc6 is coming next.]

12.exd5 ♗b6? A mistake, perhaps a decisive one, because it gives White enough time to lead a successful attack. [The right move was 12...♕g7! 13.♔he1 ♕f6! is quite an unusual motif to neutralize the pressure on the e7 square, after which Black seems to be fine. It was actually played in some games. I tried the most direct way to punish Black before allowing him to castle kingside: 14.♗c6 but Black has 14...♕xg5 15.fxg5 ♕xc6

16.dxc6 ♖e5

Black seems to overtake the initiative, but White has a beautiful tactical shot to force a perpetual check: 17.♖xe5! dxe5 18.♗xg6!! hxg6 19.♖d7 And there will be the same finish, wherever the black queen goes: 19...♗a5 20.♖xe7+! ♔xe7 (The ambitious 20...♗d8?? loses after 21.♖d7+ ♔c8 22.♗g4!+- and Black cannot solve the pin.) 21.♗f6+ ♔e8 22.♗xh8+ ♔e7 23.♗f6+=]

13.♖he1! White knows that he has no time to waste on protecting the d5 pawn. He must use the fact that the black king is still in the center.

13...♗xd5 [13...♖xd5 allows 14.♗e4! with a decisive pin.]

14.♖xb5!! This great tactical blow refutes Black's entire idea of playing 12...Nb6.

14...axb5 [14...♗c6 15.♗e2 looks like a crushing attack. Black cannot even take the knight because the simple Bxb5 wins the queen.; 14...♗c5 is refuted by 15.♗e4! ♗xe4 16.♗xe4 and there are too many threats to parry. White wins. 16...axb5 17.♗xe7+-]

15.♗xb5+ ♔d8 16.♖xd5! This is the point, after which the sacrifice on b5 does not even cost that much material to White. He is going to have a pawn for the exchange, but it is more important that the black king is extremely vulnerable and all white pieces are excellently placed for a decisive attack.

16...♖xd5 [On 16...♖xa2 17.♖d3! is very strong with the idea of Rc3! Black cannot prevent it with Bg7 because the e7 pawn is hanging, while after 17...♖a1+ 18.♔d2 ♖xe1 19.♖c3!+- (19.♔xe1 19...♗g7)]

17.♗xd5 ♖b8 18.a4! Simple and strong! White protects his bishop in order to threaten Qxf7. It is not easy to protect this pawn and if it falls the game will be over.

18...h6

19.♗f6! Another nice attacking move, which keeps the black pieces totally under domination. The bishop can never be taken in view of the mate on e8. [19.♗xf7? was premature because first Black parries the e8 mate with 19...♖xb5! and

only then he takes on g5.]

19...♖h7 At least the f7 pawn is protected, but Black has no useful move.

20.a5! Well played again! White wants to promote his a-pawn with a6, Bd4 and a7. It not easy to parry this simple idea as Black is lacking useful moves.

20...♙c5 [20...♙xa5 loses to 21.♙xd6+!+-; The key line was 20...♙c8 21.♘d4 e6 (21...♙xa5 22.♘d7+! ♔xd7 23.♙xa5+-) when Black could hope for salvation, but...

22.♖xe6!! beautifully refutes the entire idea... **22...fxe6** **23.♙xe6+ ♔b7** (23...♙d8 **24.♙e8#**; 23...♖d7 **24.♘b6+-** is over.) **24.a6+ ♔a8** **25.♙d5+-**]

21.♙xc5! The last accurate decision. White correctly calculates that the simplification leads to an easy technical win for him.

21...dxc5 22.♖d1+ ♔c8 [22...♙c7 **23.♘e5+-**]

23.♘a6+ ♖b7 24.♘xb7+ ♙xb7 25.♘xe7! Other moves were also winning, but this is the easiest from a human point of view because the arising rook endgame is completely hopeless for Black.

25...♘xe7 26.♖d7+ ♔a6 27.♖xe7 ♙xa5 There is a saying that all rook endgames are drawn and it is true that often the

defensive side can hold very difficult looking positions even when they are material down. However in our case, White is not only a pawn up, but he also has the active rook. The position wins by itself as Black cannot use his rook. The game is practically over.

28.♙d2 ♙b5 29.♙c3 ♖g7 30.♙d3 g5 An attempt to free the rook, but of course White keeps it locked in with his next move.

31.f5! g4 32.f6 ♖g5 [32...♖h7 **33.♙e4+-** is also completely lost of course.]

33.♖xf7 ♖f5 34.♖f8 ♙c6 35.f7 ♙d7 36.♖a8 1-0

**(2) Kaufman, Larry(2329)
- Bruzon Batista, Lazaro(2696)
[E80]**

42nd World Open 2014(1.2),
2014.07.02

GM Csaba Balogh
Best rating: 2672

I have chosen this game because of its amazing tactical motif in the middlegame, with which Bruzon has gained a decisive advantage.

1.d4 ♖f6 **2.c4** g6 **3.f3** ♙g7 **4.e4** d6 **5.♗c3** The initial position of the King's Indian defence, Saemisch variation. Bruzon is a very strong positional player with solid openings, but in the first rounds of the open tournaments, he must play sharper openings and he can show his tactical skills as well.

5...a6 **6.♙e3**

6...c6 A rare line, which might get bigger popularity in view of the recent Carlsen-Grischuk game, that we discuss here a bit later. White has built a strong center and Black would like to get counterplay on the queenside with b5. If White prevents it with the most direct a4, Black gets a very nice hole on b4 for his knight, which he uses with the plan of a5 and Na6-b4.

7.c5 A standard reply in this line to make b5 less effective. It has a positional point, that dxc5 dxc5 would leave Black with a big hole on b6

7...0-0 **8.♗ge2** The drawback of the Saemisch variation is that White has to make some artificial manoeuvres to finish the development.

8...b5 Black must continue playing actively, otherwise White finishes his development and obtains a clear advantage due to his strong center.

9.cxd6 **exd6** **10.♔d2** A natural move in this line, but it might be a waste of time in the current position. White should have focused on developing his minor pieces rapidly to settle his king into safety with 0-0. [The mentioned Carlsen-Grischuk game continued with 10.♗f4 10...♔e8 11.♙e2 but Grischuk outplayed the World Nr.1 with extremely strong and energetic moves: 11...b4 12.♗a4

12...♗d5! Grischuk uses the pin on the e-file. In case of Nxd5 cxd5, the e4 pawn gets under pressure, therefore Carlsen was forced to retreat 13.♙c1 ♗b6! The knight was already hanging, but now Black again prevents White from castling because the d4 pawn is hanging after Nxa4.

14. ♖xb6 ♔xb6 15. ♕e3 d5! White was missing only one move again to consolidate, but Black was in time to explode to center! 16. ♔d3 (16.e5 runs into 16... ♕xe5!) 16... dxe4 17. fxe4 The hanging pawns on e4-d4 are becoming a clear target for the black pieces. Black continues playing energetically. 17... a5! With the idea Ba6! 18. ♖d1 Carlsen desperately tries to cover his central pawns... 18... ♕a6 19. ♔c2 ♕xe2 20. ♖xe2 ♖d7 21. O-O ♖f6 22. ♖g3 ♖g4 23. ♕f2 ♖ad8 White was in big trouble in the Carlsen-Grischuk, Dubai 2014, World rapid championship game, but due to the stubborn defense and some blunders of Grischuk in time pressure, Carlsen not only saved, but even won the game... Bruzon was definitely familiar with this game and he tried to use similar motifs in his own game.]

10... ♖e8 11. ♖c1 ♖bd7 Black prepares to explode the center with c5!

12. ♖d3?! White tries to fight against c5, but this is too slow... [Black is fine even after 12. ♕e2 12... c5! 13. O-O (13. dxc5 13... ♖xc5 14. O-O ♕b7 also looks good for Black.) 13... cxd4 14. ♕xd4 White once again only needs one or two moves to gain a perfect position with Nb3 and Rad1, but this is enough for Black to launch his counterplay and get rid of his isolated d-pawn with 14... b4! 15. ♖a4 d5! 16. exd5 ♔a5! 17. ♕d1 ♕b7! Black overtakes the initiative. One must play the King's Indian and Gruenfeld defence in such style to be successful.]

12... ♖b6! Black is threatening Nc4 and prepares the following hidden tactical blow...

13.b3

13... ♖bd5!! A brilliant strike, similar to Grischuk's plan. Bruzon had to foresee the keymove, which comes 3 moves later... The opening of the e-file and the pin of the e3 bishop give Black a decisive advantage.

14. exd5 [14. ♕f2 leads to a very suspicious position as well if Black continues playing the most energetic moves: 14... ♖xc3 15. ♔xc3 ♖xe4! 16. fxe4 ♖xe4+ Forcing the king to move to the center. 17. ♔d2 (On 17. ♕e2 17... ♕g4 18. ♖c1 ♔e7 Black wins back the sacrificed piece and gains a material advantage.) 17... c5! → With a very strong attack. White's pieces are disorganized.]

14... ♕h6! Obviously the point of the sacrifice on d5 was to make use of the pin on the e-file.

15. f4 [15. ♖d1 loses to 15... ♕xe3 16. ♖xe3 ♖xd5—+]

15... ♖g4! Black pressures the e3 bishop with all his pieces, but White still seems to cover everything with his next move...

16. ♖d1 White needs only one move, Be2 to consolidate, but...

16...Ra7!! This is just great! Black sacrifices a piece and then such a subtle move, Ra7! White cannot parry the Rae7 threat, Black wins material in any case. [16...Qe7 was much worse because White is able to give back the piece in a good version: 17.dxc6 Qxe3 18.Qxe3 Qxe3+ 19.Qxe3 Rxe3+ 20.Qf2 Without the queens on the board, the attack is not dangerous. White is fine here.]

17.Qe2 [17.dxc6 17...Qae7 is very bad. White faces an enormous attack. 18.Qe5 A pretty attempt to close the e-file, but it does not help: 18...Qxe3 19.Qxe3 (19.Qxe3 19...dxe5 20.dxe5 Qxe5—+) 19...Qxf4—+]

17...Qxe3 18.Qxe3 Qae7 Black wins back the piece and gets a big advantage due to his very active pieces.

19.0-0 [19.Qf2 is also bad. 19...Qxe3 20.Qxe3 Qxe3 21.Qxe3 And here the strongest is probably 21...c5—+ followed by Bg7!, creating very serious threats with the bishops and the queen.]

19...Qxe3 20.Qae1 cxd5 The simplest solution. Black has ended up with an extra pawn and two strong bishops. [However it was even stronger to play 20...Qg7 Of course such moves are rather for computers, humans are satisfied and we are not searching for better than the 20...cxd5 option. 21.Qb4 (21.dxc6 21...Qxd4 22.Qh1 Qf5—+ The pins are winning

for Black. If the knight moves, Bc3 wins material.) 21...c5! 22.Qc6 Qxd4! 23.Qxd4 (23.Qxd8 23...Qd3+ 24.Qh1 Qxd2—+) 23...cxd4—+ with an extra passed pawn plus the deadly pin on the e-file.]

21.Qf3 White rightly goes for simplifications and he gets some practical hopes for survival.

21...Qxe1 22.Qxe1 Qg7! The bishop had nothing left to do on h6 and he attacks the new weakness on d4.

23.Qxe8+ Qxe8 24.Qxd5 Qxd4+ 25.Qf1 White successfully avoided the big losses, but the healthy extra pawn and the two bishops should give Black a technically winning position.

25...Qb6 26.Qf2 Qf5! Activating the bishops and preventing Ne4.

27.g3 [White cannot send away the bishop from the b1-h7 diagonal with 27.g4 because Black has 27...Qb1! and on 28.Qb2 Qe3!—+ wins.]

27...a5 [Here probably it would have been more precise to play 27...Qe7 with the idea of Qf6, creating new threats with the two bishops against the exposed king. However Bruzon was already satisfied with his achievements and he decided to allow his opponent to trade queens and he wanted to convert his material advantage in the endgame.]

28. ♖e2 ♜f8 29. ♖xe8+ ♜xe8 30. ♗c6+ The best chance again to trade the pair of bishops. Otherwise Black could have fixed the weakness on a2 with b4 and would have threatened with Bb1!

30... ♗d7 31. ♗xd7+ ♜xd7

32. ♘e4 White gets some very small practical hopes to build a fortress. However the problem is not only the extra pawn, but also the principle that in the endgames with pawns on both sides, the bishop is superior to the knight. Bruzon wins the game with good technique...

32... ♗h6 Black wants to activate his king with Ke6 and prevents Ng5.

33. ♖e2 ♜e6 Black does not decide yet, which direction he will go with his king. He might very quickly march to h3, but the same is true about going to d5-d4-d3. White waits with his king on e2, to have Kf3 on Kf5 and Kd3 on Kd5.

34. ♗c3 [On 34. ♖d3 34... ♗c5 protecting the d6 pawn and Kf5-g4 is coming next. 35.g4?! only helps Black in view of 35...f5! and the king gets activated.]

34... ♗b4 35. ♗e4 f5! Restricting the movement of the knight and preparing the forthcoming idea...

36. ♗d2

36...g5! Very well played! Before starting any actions with his extra pawn, Black creates new weaknesses on the kingside for his bishop by fixing the pawns on dark squares. Black is threatening to play g4 now!

37.h3 [37.fxg5 37...hxg5 38.h4 Creating a passed pawn does not change much. 38...g4! fixes the weakness on g3. 39. ♗c4 ♗c7 40. ♖f2 d5 41. ♗b2 f4! 42.gxf4 ♗xf4 43. ♗d3 ♖f5—+ With an easy technical win, similar to the game.]

37...g4! Black again fixes the weakness on g3. Now the white king is forced to stay on e2 to cover the f2 square, but this gives much more space for Black to improve his position.

38.hxg4 fxg4 39. ♗c4 ♗c7 The bishop temporarily goes into passivity, but he sends back the knight with d5 and then he drives back his bishop to b6.

40. ♗e3 h5 41. ♖d3 d5 42. ♗g2 ♗b6 43. ♖e2

43...♔f5! It is very nice to see how Black improves his position move by move. If we compare what we had after 32.Ne4, Black has already progressed so much by advancing effectively his pawns.

44.♘e1 ♔e4 45.♘d3 ♙d4 Black restricts the mobility of the knight again. [45...h4!? 46.gxh4 g3 was also good, but Bruzon does not hurry with the final break. 47.♘e1 ♔xf4--+]]

46.♘e1 ♙f6 47.♘d3 h4! 48.♘c5+ [48.gxh4 48...♙xh4-- is also hopeless.]

48...♔f5 49.gxh4 ♙xh4 50.♘b7 ♔xf4 51.♘xa5 g3 [White resigned as the pawn promotes in a few moves: 51...g3 52.♔f1 ♔f3 53.♘c6 g2+ 54.♔g1 ♙f2+--+] A nice game, especially the combination with Nbd5 and Ra7, but the endgame technique was also instructive.] **0-1**

(3) Zhukova, Natalia(2451) - Muzychuk, Mariya(2521) [A57]

15th ch-EUR w 2014(5.2),
2014.07.10

GM Arkadij Naiditsch
Best rating: 2737

We will see a very nice attacking game by Zhukova who seemed to surprise her Olympic team colleague in the opening, then outplayed her in the middle game and when things almost seemed to be over they almost slipped away, but luckily White's position was too winning.... A very interesting game is awaiting us!

1.d4 ♘f6 2.c4 c5 What is nice with women chess is that we see a lot of random openings.

3.d5 is of course the main move, but 3.Nf3 is possible too.

3...b5 In one of the top events, Bologan played 3 Volga games in a row and he ended up not scoring too many points... On a high level it is considered to be a very risky opening for Black, especially after the games of Carlsen with White.

4.a4!? Wow, what a move! I have never seen 4. a4 before in any games I can remember, but it actually makes perfect sense. At 4.Nc3 of course Black is planning to play 4...b4.

There is as well a line with 4.Bg5 and now Nisipeanu liked to play 4...b4, but the move in the game is provoking Black to take on c4, which makes the development of the Nc3 and e4 possible. [4.cxb5 4...a6 5.bxa6 ♟xa6 6.♟f3 would lead us back to the main lines.]

4...bxc4 5.♟c3 The a4 move made the b4 square weak, but it is hard for Black to make use of it.

5...d6 The usual way to play for Black.

6.e4 g6 [Maybe Black was afraid of playing 6...♟a6 because of 7.f4 followed by Nf3 and e5 and Black's position looks dangerous.]

7.♟xc4 The c4 pawn has to be taken sooner or later.

7...♟g7 8.h3! A very important positional move. [To play 8.♟f3 and allow 8...♟g4 would lead to quite an unclear position in my opinion. Black would develop the pieces with Nbd7, 0-0, Ne8 and Rb8, getting good play on the b-file.]

8...O-O 9.♟f3 ♟a6 I think Black is not choosing the right piece. It is important for Black to exchange the useless bishop from c8. [9...♟a6 looks like the right move to me. I would not say that White is doing better here, but the position is very unclear.]

10.O-O ♟b4

11.♞e2 Zhukova is using the mistake of her opponent and already not letting Black even dreaming of playing Ba6. The white queen is well placed on e2 and the key idea of White is to push e5 now.

11...♟d7 Stopping e5 and planning to play Nb6 next.

12.a5 Of course White does not allow the Nb6 move.

12...♟e5 Generally in the Benoni structures, it is very important for Black to exchange one light piece because Black sort of lacks space, but now White is getting very fast play connected with the f4 push. As we can also see, the knight on b4 is very poorly placed and is totally out of the game and what is even worse, in some lines he is blocking Black's active play on the b-file connected to Rb8.

13.♟xe5 ♟xe5 14.♟h6 The most natural, before playing f4 White is putting her bishop to h6.

14...♞e8 15.f4 ♟d4+ 16.♞h1 White wants to play f5 now and maybe later on double on the f-file, so Black needs to hurry.

16...e6! A good move. There is no time to waste for Black.

17.dxe6 A logical move, but maybe not the best. [17.♟g5!? also looks interesting. 17...f6 The black queen had no good squares. 18.♟h6 The provocation of the f6 move is clearly huge for White, now the black king is already in big trouble.]

17...♟xe6 18.f5 Zhukova starts to go for the black king.

18...♟xc4 19.♞xc4 White's attack is looking pretty dangerous, so Black needs to act very accurately.

19...g5?! I think Black clearly underestimates White's next move. [19...♔d7 looks more solid, but after 20.♖ad1 White seems to keep a promising position with good attacking chances.]

20.f6! Excellent play! By sacrificing the f-pawn, White is fully opening the position in front of the black king and gaining strong play on the f-file.

20...♟xf6 Black can't do anything else. White just wanted to play Qe2-Qh5.

21.♖f5 Chess can be easy! White wants to double up on the f-file.

21...♖e6 22.♖af1 ♔e7 Black wants to get the last piece into the game by playing Re8 and putting a nice trap for White.

23.♖f3! Zhukova shows no mercy! [The very tempting 23.♟d5?! would lead to nothing for White. 23...♟xd5 24.♖xd5 (24.exd5 is not winning because of 24...♖e1! 25.♖xf6 ♖xf6 26.♖xe1 ♖xh6) 24...♖e8 25.♟xg5 ♟xg5 26.♖xg5+ ♖g6 with good chances to save the game for Black.]

23...♟xc3? Black panics... [Black had to find the difficult move 23...g4! 24.♖g3 ♟e5 25.♖xg4+ ♖g6 and White's position looks better, but things are far from clear.]

24.♖xg5+ Now White is just mating on the dark squares and the knight on b4 is still totally out of the game.

24...♖g6 25.♖xc3 ♖d8 Black already didn't have anything better but at least Mariya is trying her chances to push d5.

26.♖xg6+ Not a bad move, but not the most accurate one either. [26.♖g7+ wasn't great either, as after 26...♖xg7 27.♖xg7+ ♟h8 28.♖gx7 ♖e6 29.♖f8+ ♖xf8 30.♖xf8+ ♖g8 31.♖xg8+ ♟xg8 it is not easy to say if this endgame is winning or not.; But 26.♖ff5! with the idea of playing h4-h5 next seems to be very strong. I can't see any defence for Black.]

26...fxg6 27.♖c4+ White's position really looks winning, but actually it is not that simple to achieve a full point.

27...d5 28.exd5 ♟xd5 Now the question is how to end the game. Black seems to be totally paralyzed, but it is not that simple for White to find how to improve the position either.

29.a6! Not finding anything concrete, White just improves her position. The pawn on a6 is fixing the black pawn on a7, which could become a potential weakness in many lines.

29...♔d6 Black doesn't really have many options to improve either and needs to keep on waiting.

30.♔b5 This move does not do any harm, but is a bit strange... The white queen has nothing to do on b5. [30.♕e3 looks very strong now. Not only the c5 pawn is going to fall, but with it also the a7 pawn.]

30...♖b8 31.♔c4 ♖e8 32.♖f1 So after moving back and forth a bit the situation hasn't changed a lot.

32...♗h8?! Black finally blunders in what is a close to lost position, but still in case of 32...Rd8 it would be interesting to see how Zhukova wanted to improve on her play of the last moves. Objectively of course Be3 would still be a killer.

33.b4! White is using the moment for the final blow! The 7th rank of Black is unprotected, so the b4 pawn can't be taken. The game is over.

33...cxb4 34.♔d4+ We just saw a great attacking game by White, where good positional play was supported by aggressive play towards the black king. I guess any player would be happy after winning such a game! **1-0**

(4) Van Wely, Loek(2657)
- Van Kampen, Robin(2636) [D35]

ch-NED 2014(1.1),
 2014.07.06

GM Arkadij Naiditsch
 Best rating: 2737

For very many years Loek Van Wely was the Dutch Superstar, playing regulary in Wijk aan Zee and other top events, but lately things didn't develop too well for the Dutch man as we can see on his ELO rating and probably as well we will not see him anymore on the top board from his country because of Anish Giri who almost 100 ELO points ahead of him already. Anyhow, we will see now a great attacking game by Loek, who first tricks his young oponent in the opening a bit and finishes the game with a great attack.

1.c4 ♘f6 2.♘f3 There are a lot of tricky move orders in the closed systems where both players need to be very careful in the opening stage.

2...e6 3.♘c3 d5 4.d4 So we are back in the Queen's Gambit.

4...♘bd7 [4...♙e7 is the other main move.]

5.cxd5 Usually White does not take that early on d5. There are 2 main moves, 5. Bg5 and 5.Bf4. Why in the current game White took on d5 we can only guess. Maybe Loek was afraid of some forced line in 5.Bg5 c6 (back to Slav) or maybe a line with 5.Bf4 dxc4, who knows....

5...exd5 [5...♘xd5 6.e4 would lead to a better position for White.]

6.♙f4 6.Bg5 is also possible, but now that Black can't play Bd6 immediately the move 6.Bf4 makes sense.

6...c6 7.♙c2 A move like Qc2 includes 2 ideas: 1) White is maybe preparing 0-0-0 and 2) never to let the black bishop out from c8 to f5.

7...♘h5 It is hard to say if this is the right way to go on for Black, but personally I don't like this move too much. [7...♙e7 would lead us to one of the main positions where Black is usually playing Nf8-Ng6 and 0-0, with a very solid position.]

8.♙d2 A very solid move. [8.♙e5!? also clearly deserves attention here. 8...♘xe5 9.dxe5 followed by 0-0-0 and e4 and White has the initiative.]

8...♘hf6 is quite a typical move. It looks like a loss of a tempo, but the white bishop is badly placed on d2.

9.e3 ♙d6 10.♙d3 White still keeps on waiting with 0-0-0, which is a smart decision. Still the typical idea for the Queen's Gambit with 0-0 and then a3-b4 is an option.

10...0-0?! A very risky move and there was no reason for Black to give White such a clear play. Moves like 10...Nb8 or even 10...Nf8 would still have led to a safe position.

11.g4! This is exactly what White was playing for! Now that Black castled kingside, White is immediately starting the action on the kingside! Black is already in some trouble.

11...♖xg4 Not a nice move to play, but nothing else was already possible. The threat of playing g5 next can't be stopped. After a move like 11. ...g6 12.h4 followed by h5 would finish the game quite early and the usual pushes like 11...c5 are just too late already because of White's g5.

12.♙xh7+ ♔h8 13.♖g1! Another strong move by White. The rook should anyway take the position on g1, so White is trying to chase away the knight from g4 as soon as possible to castle queenside.

13...f5? This is already a heavy mistake. Black should have tried to keep things as solid as possible and not open his king's position even further. [To a still dangerous but playable position would lead 13...♖gf6 14.♙d3 ♖b6 15.O-O-O ♙g4 16.♙e2 ♖c8 and Black keeps on fighting.]

14.♙g6 [Of course White is not falling into the trap that after 14.♙xf5? White has

14...♗de5! This move is not very hard to find but a beautiful one anyway! 15.♗xe5 ♙xf5 16.♗g6+ ♔g8 And Black is already better here.]

14...♖f6 Clearly before playing 13...f5 Black was aiming for this move, but it all looks like a bad road trip which Van Kampen is taking.

15.h3 The most simple and strong move.

15...♗h6 [15...♖xg6 wasn't any better since after 16.hxg4 followed by O-O-O White gets a very strong attack on the black king.]

16.O-O-O The last preparations for the decisive attack are done.

16...♖g8 Black is trying to consolidate his pieces by defending the g7 pawn with the rook and he wants to play Nf8 next. Not a bad idea, but it is just too late...

17.♗e2 White is just playing a perfect game. The white knight is going to take a fantastic position on f4 and White is also preparing a great spot for the d2 bishop which is very soon going to be the key piece of the game.

17...♘f8

18.♗e5! Exactly! Who cares about a pawn when all the pieces going to be in the attack!

18...♙xe5 Black's position is probably already just lost. In case Black didn't take on e5, White would just play Nf4 next.

19.dxe5 ♔xe5 20.♙c3 Now we can see how important the 17.Ne2 move was. The bishop which was standing so passively on d2 is now a monster piece.

20...♔e4 21.♔d2 Of course no exchange of queens!

21...♙d7 Black still hopes to be in time with his development, but Van Wely has another great finishing idea in mind...

22.♗f4 [22.f3 22...♔h4 23.♗f4 would also lead to a position with a big advantage for White.]

22...♙e8 How to finish the game?! All white pieces are perfectly placed and there must just be something...

23.f3!! And indeed, Loek does find a beautiful finishing move. White finds a way to activate the queen from d2 and combine it with the threat of playing Qxh6 mate!

23...♔xf3 24.e4 This is of course the follow-up move of the 23.f3 idea.

24...d4 Nothing helps anymore. There are no good moves in a lost position... [After 24...fxe4 25.♔df1 Black is losing his queen.; And after 24...♔xe4 25.♗h5 the threat of playing Qxh6 would force Black to resign on the spot.]

25.♙xd4 ♔d8 And the game comes to an end after the very practical

26.♗e6 The rook on d8 is hanging and Qxh6 is a deadly threat. Black is forced to lose too much material. After 26...Rxd6 27.Nxd4 Qxe4 28.Rge1 the bishop on e8 is lost, so White would be a rook up. A very beautiful and powerful game! **1-0**

Endgame section

(15) Kamsky, Gata(2717)
- Priyadharshan, K.(2433)

World Open,
2014.07.03

GM Csaba Balogh
Best rating: 2672

We have reached a typical Berlin pawn endgame. When Black plays for a draw and aims for simplifications at any cost, he might end up in this lost pawn endgame. The point is the following, White has 4 vs 3 pawns on the kingside and he can easily create a passed pawn with f4-f5, while on the other side, Black has 4 vs 3 too, but due to the doubled c-pawns he is unable to create a passed pawn. The only chance for Black is to create a fortress somehow, but as we will see, he is unable to do it successfully. This factor decides the outcome of the game. Kamsky's technique is very instructive.

27.b4! This is a strong positional move, to fix the black pawns on the queenside. At the later stage, when the time comes to break through on the kingside, all tempi will be very important. White has time to take these prophylactic measures before starting his own plans, because Black cannot do anything anyway.

27...♔e7 [27...g5 does not prevent White from creating a passed pawn. White would continue with 28.♔g3 ♔e7 29.f4! h6 This is the best chance to try and keep the kingside closed, but White manages to invade with his king anyway... (29...gxf4+ 30.♔xf4 ♔f7 loses easily to 31.♔g5 ♔g7 32.♔h5 b6

33.g5+— Black soon runs out of tempi, he will be forced to move with his king, but then Kh6 followed by g6 wins, because White gets access to the e6 pawn.) 30.h4 ♔f7 (30...gxf4+ 31.♔xf4 ♔f7 loses easily again. This time, White does not have Kg5-h6, but he wins after 32.h5! ♔g7 33.g5 b6 34.gxh6+ ♔xh6 35.♔g4+— Again with the same method. Black soon gets into zugzwang and when he moves with his king, Kg5-f6 will decide the game.) 31.fxg5 hxg5

32.hxg5! looks like a dubious decision at first sight, but actually White must open a way for his own king to invade on

the kingside. 32...♔g6 33.♔h4 b6 34.c4 It is time to spend all the tempi on the queenside for both sides and then the king manoeuvres with zugzwang part begins... 34...a5 35.bxa5 bxa5 36.c5 a4 White is the first who gets into zugzwang, otherwise if he could have played Kh5 and g6, then it would have been over immediately. However, losing one of the g-pawn does not change anything, White wins after 37.♔h3 ♔g7 A tricky attempt to keep a fortress. (37...♔xg5 38.♔g3 ♔h6 39.♔h4 ♔g6 40.g5 ♔f5 Other moves transpose to the 37...Kg7 line. 41.♔h5 ♔xe5 42.g6 ♔f6 43.♔h6+--)

38.g6! This is the only way to break through. Otherwise Black waits with his king on h7-g7 and when White goes Kh4, Black replies with Kg6. 38...♔xg6 39.♔h4 ♔h6 40.g5+ ♔g6 41.♔g4 ♔f7 42.♔h5 ♔g7 43.g6 ♔g8

This is a very important position! We can use this motif in

many pawn endgames. White wins by a triangulation, giving the tempo to his opponent. .. 44.♔h4! Or 44.Kg4 is also good with the same idea. (White should not fall into the trap with 44.♔h6 44...♔h8 45.g7+?? ♔g8 46.♔g6 a3 leads to stalemate!) 44...♔h8 (44...♔g7 45.♔g5+-- is over as White invades on f6!) 45.♔g4! ♔g8 46.♔h5! The triangulation is done! Black cannot play Kg7 in view of Kg5 and zugzwang and after 46...♔h8 47.♔h6! ♔g8 48.g7+-- there is no stalemate anymore. Black must play Kf7, but then Kh7 wins.]

28.h4 Kamsky improves the circumstances before executing the plan of f4-f5.

28...g6 [If Black decides to go for a waiting policy with 28...♔f7 29.♔e4 ♔e7 30.f4 ♔f7 31.f5 ♔e7 32.♔f4 ♔f7 White wins after 33.♔g5 ♔e7 (33...h6+ creates a hole on g6. 34.♔h5+-- Black soon runs out of tempi again and then Kg6 wins.) 34.h5! ♔f7 35.h6!+-- and the king invades.]

29.♔e4 h6 30.f4 b6

31.f5! The time has come for the final break. It is important to mention that White saves all his tempi on the queenside for the later stage of the game, when he needs to set Black into the final zugzwang.

31...g5 This is the only chance to temporarily keep the white king away from the camp, but it does not help either... [31...gxf5+ 32.gxf5 ♔f7 33.fxe6+ ♔xe6 34.h5+- wins easily. Black soon needs to move with this king and then Kf5 wins. White does not even need his tempi here, because Kf4-e4 is another way to set Black into zugzwang.]

32.hxg5 hxg5 33.fxe6! ♔xe6 This is the moment when perfect calculation is required. White must count how to spend the pawn moves to set Black into zugzwang and let his king invade on f5.

34.c4! Black loses after all the moves:

34...a5 [34...a6 is met by 35.c5! bxc5 (35...b5 36.b3+-) 36.bxc5 a5 37.b3+-; 34...c5 35.b5+-; 34...b5 35.c5! a6 36.b3!+- in all lines Black gets into zugzwang and Kf5 wins next.]

35.b5!! The last accuracy! [35.bxa5 spoils the win, because after 35...bxa5 36.c5 a4 it is White who gets into zugzwang... 37.♔d4 ♔f7=]

35...cxb5 [35...c5 36.b3+-]

36.cxb5 a4 White is in zugzwang again, but the huge difference to the 35.bxa5 line is that White has gained another invading square for his king, now he can enter to the black camp through d5!

37.♔d4! ♔e7 38.♔d5 ♔d7 39.e6+ ♔e7 40.♔e5 Black resigned! An instructive endgame and a flawless technique by Kamsky! **1-0**

**(16) Ionescu, Irina(2253)
- Gunina, Valentina(2501)**

15th ch-EUR w 2014(1.4),
2014.07.06

GM Arkadij Naiditsch
Best rating: 2737

Black was trying to win all game long, but the much lower rated Ionescu defended well and finally reached this difficult looking endgame. Let us take a look at how bravely White defended it.

44...♙f8 Black is making a waiting move, but not the best one. The bishop on f8 is getting under attack. [White would have to make a much more exact calculation after 44...♙a3! The only square where Black is preparing to play Kf3 after White's Kd1. 45.♙d1 ♙f3 Now things are getting very forced. 46.♘e1+ ♙xf4 47.♘d3+ ♙e3 (47...♙g4 would lead to about the same position as in the game.) 48.♙c2 f4 49.♘xf4 Not such an easy line to calculate from the beginning... 49...♙xf4 50.♙xc3 ♙g4 (50...♙xe5 51.♙d3 ♙f4 52.♙e2 ♙g3 53.♙f1

53...♙c5 And we would end up in this very complicated, but drawn position. Actually for those who enjoy studies, it is an interesting position to take a look at.) 51.♙d3 ♙xh5 52.♙e2 ♙g4 53.♙f2 ♙h3 54.♙g1 The white king is just in time to save himself in the corner with an obvious draw.]

45.♙d1! A good move! It is very important to take away the c3 pawn, which is the most dangerous threat.

45...♙e7 [45...♙d3 didn't help because of 46.♘e1+; And after 45...♙f3 46.♘h4+ Black can't take the pawn on f4 because of Ng6+. Now we can clearly see why 44...Ba3 was Black's best try.]

46.♙c2 [46.♙e2 would give Black another try to go for Ba3.]

46...♙f3

47.♘e1+ As usual, the knight is going to d3 to stop the f-pawn from promoting.

47...♔xf4 48.♘d3+ ♔g4 Black is trying to get the h-pawn, which is the most difficult to hold for the knight. [To a similar position as in the line above would lead 48...♔e3 49.♔xc3 f4 50.♘xf4 ♔xf4 51.♔d3 ♔g3 52.♔e2 ♔g2 53.e6 With a totally drawn position.]

49.♔xc3 ♔xh5 50.♔d4 [50.♔d2 would have been the more careful move. The basic idea of White remains the same, to get the King to h1 and to sacrifice the knight for the f-pawn.]

50...♔g4 51.e6 h5 52.♔e3 ♔g3 53.♔e2 The h-pawn is advancing, but the white king finally found the right direction and goes to h1.

53...h4 54.♔f1 h3

55.♔g1 What is funny now is that the e6 pawn saves the game! In case White didn't have the e6 pawn, Black would just have put White into an easy zugzwang and it would be very difficult to predict the outcome of the game.

55...♕d6 56.♔h1 Now all White needs to do is keep on waiting with the king in the corner.

56...♕e7 [56...h2 doesn't lead anywhere. 57.♘e5 f4 58.♘c4 ♕e7 59.♘d2 And White plays Nf1 next.]

57.♔g1 ♕g5 58.♔h1 ♕f6 59.♔g1 ♕e7 60.♔h1 After having no success with the bishop manoeuvres, Black tries her last

chance, to try and win the e6 pawn without losing the h3 pawn- which is of course impossible.

60...♔g4 61.♘e5+ ♔g5 62.♔h2 And the h3 pawn is falling.

62...♔f6 63.♘c6 [63.♘f3 would secure the draw as well.]

63...♕c5

64.e7 An easy calculation which leads to a drawn pawn endgame.

64...♕xe7 65.♘xe7 ♔xe7 66.♔xh3 ♔e6 Not a perfect, but all in all a nice defence by White and a deserved draw. Sometimes a very promising position is just a dead draw in chess... **1/2-1/2**

Clash of the Titans

World Championship 05th(4),
1894.03.23

GM Kamil Miton
Best rating: 2655

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♙c5 4.c3 [4.b4 We should mention that the Evans Gambit was a very popular opening at this time.]

4...♘f6 5.d4 [5.d3 leads to the Italian Game.]

5...exd4 6.e5 [6.cxd4 6...♙b4+ 7.♙d2 ♙xd2+ 8.♘bxd2 d5! 9.exd5 ♘xd5 10.♙b3 ♘ce7 Black controls the d5 square. The position is equal.]

6...d5 7.♙b5 ♘e4 8.cxd4 ♙e7 [8...♙b6 That move is more popular probably because of the fact that the bishop on b6 is placed more actively.]

9.♘c3 O-O

10.♙d3 White is going to get rid of the active knight from e4.

10...f5 A thematic move. [10...♙f5]

11.exf6 ♘xf6 is a slightly passive move, Black should have played [11...♙xf6! 12.♙e3 (12.O-O 12...♘xd4 13.♘xd4 ♙xd4 14.♘xe4 dxe4 15.♙b3+ (15.♙xe4 15...♙xf2+) 15...♙h8 16.♙xe4 ♙f6 Black takes the initiative because of the pressure on b2 and f2.) 12...♙f5 13.O-O ♙d7 Black managed to hold the knight on e4. The position is unclear.]

12.♙e3 [12.h3 12...♙e6 13.a3! Preventing Nb4. 13...♙d7 14.♙c2+=]

12...♘b4 usually doesn't make much sense because the knight will have to go back anyway. [12...♙g4 13.h3 ♙xf3 (13...♙h5 14.g4 ♙f7 15.a3 With the idea of Qc2 and O-O-O.) 14.♙xf3 ♘b4 15.♙b1 c6 16.a3 ♘a6 17.♙d3 ♘c7∞]

13.♙b1

13...♘g4 Black decides to go for concrete action but it will not bring anything good.

14.a3 ♘xe3 15.fxe3 ♙h4+ 16.g3 [16.♙e2 16...♘c6 17.♘xd5 ♙g4 For the pawn Black has a chance to get the initiative on the e- and d-files.]

16...♙g4 17.O-O ♙e8 18.axb4 [18.gxh4 18...♙xe3+ 19.♙g2 Black doesn't have any compensation here. 19...♘c6 20.♘xd5 ♙xf3+ 21.♙xf3 ♙xf3+ 22.♙xf3 ♙xf3 23.♙xf3 ♘xd4+

24.♔e3 ♘b3 25.♘xc7 followed by Ba2.]

18...♖h5 19.♘xd5 [19.gxh4 19...♙xf3 20.♖e1 ♖ae8 21.♖g3 ♖xe3 22.♙c2+- With the idea Re1 or Qg5. White's position is safe.]

19...♖xf3 20.♘f4 ♖xf4 21.♖b3+ ♖f7 22.♖xf7? White could easily win after [22.♖a5+-]

22...♖xf7 23.♙a2 [23.♙xh7+?! 23...♙f8 24.♖xf7+ ♙xf7 25.gxh4 g6 26.♖a5 ♙h5 27.♖d5 ♙e7]

23...♖xb3 24.♙xb3+ ♙f8 25.gxh4

25...♙e7 White is pawn up in the endgame but because of his weak pawn structure, the winning way is still long.

26.♙d5 [26.b5!?]

26...c6 27.♙e4 a6 28.♖a5 h6 29.b5 White gets rid of the weak pawn. From a logical point of view this is good but on the other hand it will allow Black to create a distant passed pawn.

29...cxb5 30.♙xb7 ♖a7 31.♙c6 ♙d7 32.♙xd7 ♙xd7 33.♙f2 ♙c6 34.♙e2 ♙b6 35.♖a1 [35.b4?! 35...♖c7↪36.♖a2 ♖c3 37.♖b2 ♙c6 38.♙f3 ♙d5 Black's pieces are very active.]

35...a5 36.♙d3 a4 37.e4 ♖f7 Black activates his rook.

38.e5 ♖f3+ [38...♖f4 39.e6 ♙c7 40.♖e1 ♖f8 41.e7 ♖e8 42.♙c3+-]

39.♙e4 ♖f2 40.♖b1 White saves material, but the idea to push the pawns immediately was good too. [40.♙d5 40...♖xb2 41.e6 ♖e2 42.♙d6 ♙a5 43.e7 b4

44.♖c1! (44.♙d7 44...b3 45.e8=♖ ♖xe8 46.♙xe8 b2 47.♖b1 a3-+)]

40...♙c6 41.d5+ ♙d7

42.♙d4 [42.♖g1! 42...g5 43.hxg5 hxg5 44.♖xg5 ♖xb2 45.♖g7+ ♙d8 46.e6 White is clearly winning as his pawns are more advanced.]

42...♖d2+ [42...♖xh2 43.e6+ ♙e7 (43...♙d6 44.♖e1 ♖xh4+ 45.♙d3 Black is not able to stop the white pawns. 45...♙e7 46.d6+--)] 44.♖f1 ♖xh4+ 45.♙c5 ♖c4+ 46.♙xb5 ♖c2 47.♖f7+ ♙e8 48.d6 ♖xb2+ 49.♙xa4 ♖d2 50.d7+ ♙d8 51.♖f8+ ♙e7

52.♖e8+ ♔f6 53.d8=♚+ ♖xd8 54.♖xd8 ♔xe6 55.♔b3 White will easily take the black pawns.]

43.♔c5 ♖c2+ 44.♔xb5 ♖e2 45.e6+ [45.♖g1 A strange move, but maybe winning as well. 45...♖xe5 46.♖xg7+ ♔d6 47.♔xa4 ♖e2 48.b4 ♖xh2 49.b5 ♖xh4+ 50.♔a5 ♖h1 51.b6 And the b-pawn decides the game.]

45...♔d6 46.♖d1 [46.♔xa4 46...♔xd5 47.b4 ♔xe6 48.b5 ♔d7 49.♖g1 ♖xh2 50.♖xg7+ ♔c8 51.♔a5 ♖xh4 52.♔b6 ♖h1 53.♖g8+ ♔d7 54.♔a6 (54.♔b7 54...h5 55.♖g3 ♔e6) 54...♔e6 55.♖f8 h5 56.b6 h4

57.♖f3! (57.b7 57...♖a1+ 58.♔b6 ♖b1+ 59.♔a7 ♖a1+ And the white king cannot escape the checks.) 57...h3 58.♖a3 A perfect place for the rook. White is winning now.]

46...♖xb2+? Black starts to take the pawns in the wrong order. More accurate was [46...♖xh2! 47.♔xa4 ♖xb2 48.h5! Fixing the black pawns. (48.♖e1 48...♖b8) 48...♖b8 49.♔a5 (49.♖d4 49...♖b1 50.♖e4 (50.♖b4 50...♖a1+) 50...♖b8 And White is not able to improve the position here.) 49...♔c5 50.♔a6 ♔d6

51.♔a7 White needs to get back with his king, otherwise he won't be able to promote his pawns. 51...♖g8 The king from a7 has a long way to back to the center so Black is on the time with his counterplay. (51...♖b2 52.♖e1!+-) 52.♔b6 g5 53.hxg6 ♖xg6 54.♔b5 h5 55.♖e1 (55.♔c4 55...h4=) 55...♖g7 56.♔c4 h4 57.♖e4 h3 58.♖h4 h2 59.♖xh2 ♖g4+ 60.♔d3 ♔xd5 With a draw.]

47.♔xa4 ♖xh2 48.♖e1 ♖a2+ 49.♔b5 Compared to the previous variations the white king is already much closer to the pawns!

49...♖a8 50.♔c4 [50.e7 50...♖e8 51.♔c4 g5 (51...♖xe7 52.♖xe7 ♔xe7 53.h5+-) 52.♖e6+ ♔d7 53.♖xh6 gxh4 54.d6 ♔c6 55.♔d4+-]

50...g5 51.hxg5? A big mistake! White should have played [51.e7+- leads to the previous variations with 50.e7, where White was winning.]

51...hxg5 52.♔d4 ♖a4+ Black is just losing time as he will have to go back to the 8th rank anyway. [52...g4 53.♔e4 (53.♖c1 53...♖a4+) 53...g3 54.♖d1 g2 55.♔f3 g1=♚ 56.♖xg1 ♔xd5=]

53. ♔d3

53... ♖a3+? This is already the decisive mistake, it was the last chance to go back with the rook and keep counterplay with the g-pawn. [53... ♖a8 54. ♕e4 ♜f8! 55. ♕d4 g4 56. ♜e3 ♜f4+ 57. ♜e4 ♜f8 58. e7 (58. ♜xg4 58... ♜f5=) 58... ♜e8 59. ♜xg4 ♜xe7 60. ♜g6+ ♕d7 61. ♕c5 ♜h7 62. ♜a6 ♜h1 63. ♜a7+ ♕c8 64. ♕c6 ♜c1+ 65. ♕d6 ♜h1 66. ♜a8+ ♕b7 67. ♜e8 ♜h6+ And Black is defending from the long side.]

54. ♕e4 g4 55. ♕f4 ♜a8 [55... g3 56. e7+-]

56. e7? After this blunder the position is drawish again. [56. ♕xg4 56... ♕xd5 (56... ♜f8 57. ♕g5+-) 57. e7 ♜e8 58. ♕f5 ♕d6 59. ♕f6+-]

56... ♜e8 57. ♕f5 g3 [57... ♜xe7=]

58. ♕f6

58... ♕d7?? And what a huge blunder yet again! [After 58... g2 the game is drawn unless White blunders with 59. ♕f7?? ♜xe7+]

59. d6! g2 60. ♜g1 After 60... Kxd6 White will play 61. Rd1+ and Kf7 next. **1-0**

Editorial Preface

Loek Van Wely is the new Dutch Champion after beating Tiviakov 2-0 in a tie-break match. In normal chess they both scored 4.5/7. It is already the 7th time that Van Wely holds the Dutch trophy in his hands.

In the female section nobody could stop Anne Haast who scored a great 5.5/7. Second place went to Bianca Muhren with 5/7.

The European Individual Women's Chess Championship was won very convincingly by Gunina with a great 9/11. Tatiana Kosintseva won silver with 8.5/11 and the 3rd placed was shared by a lot of players with 8/11.

In the current week three super tournaments are still under way:

In the Dortmund Schachtage Caruana is leading with an amazing score of 3.5/4. With only 3 rounds to go, it is hard to imagine somebody possibly stopping him from winning the event. A big surprise is Kramnik's 1.5/4. Usually things are running very smoothly for the Russian in Dortmund and he already won the tournament an impressive 10 times!

In Biel things are pretty tight, but what is very nice to point out is that Hou Yifan is doing great! Maybe she can become the second woman in the history of chess to be able to fight on the top level. We analyse for you her great win against Anish Giri from the first round.

In the ACP Golden Classics 2014 (a very strange name for a private tournament) it is a fight between Wesley So and Jobava for the first place. The other top, GM Nepomniachtchi things are running far from smoothly and he is only on 2/5.

We wish you a great week and enjoy the games from the world's best chess players.

Arkadij Naiditsch & Csaba Balogh

Najdorf Memorial(7),
2014.07.18

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.g3

A very rare line against the Najdorf Variation.

6...g6 Black could also play: [6...e6 ; 6...e5]

7.♗g2 ♗g7 8.O-O O-O 9.h3 White is preparing to develop the bishop on e3 and also prevents Bg4.

9...♘c6 10.♗e3 [10.♘de2 Sometimes White avoids the knights exchange, but is hard to believe that this passive move could bring White any chances for an advantage, for example: 10...♖b8 11.♘d5 ♘d7 This is also a typical reaction. Black is going to chase the knight from d5 after e6. 12.c3 b5 13.♘d4 ♘de5 14.f4 ♘xd4 15.cxd4 ♘c6 16.♗e3 e6 17.♘c3 ♖b6 1/2-1/2 Sharapov,E-Zhigalko,S/Cappelle la Grande FRA 2011 (22)]

10...♗xd4 [10...♕d7 With the idea Rc8-b5. Black is not in a hurry with the exchange on d4. 11.g4 White castled kingside so to attack on the kingside makes no sense at all. 11...♖c8 12.g5 ♗e8 13.♗xc6 ♕xc6 14.♖d2 f5! Black takes the initiative. 15.gxf6 ♗xf6 16.♕d4 ♗h5 17.♕e3 ♖a5 18.♖ab1 ♖f7 19.♖fd1 ♖cf8 20.♗e2 ♖e5 21.♖d3 ♖f6 22.♖b3 ♗h8 23.♖d4 g5 24.♖d2 ♖g6 With a huge advantage for Black. 0-1 Alekseev,E-Istratescu,A/Poikovsky RUS 2007 (38)]

11.♕xd4 ♕e6 12.♖e1 White is preapring to move the knight to d5. [12.e5 The idea to activate the bishop after e5 is not enough as Black will very easily manage to solve the problems with the b7 pawn. 12...dxe5 13.♕xe5 ♖c8↑]

12...♖c8

13.♗d5 [13.e5 13...dxe5 14.♕xe5 b5=]

13...♕xd5 is maybe premature. Black should not hurry with opening the e-file. [13...♗d7 14.♕xg7 ♖xg7 15.♖d4+ ♖g8 16.♖e2 (16.c4 16...♗e5 With a double attack on c4 and h3.) 16...b5 17.♖ae1 ♖e8∞And at least White has no pressure over the e-file yet.]

14.exd5 ♖e8 15.♖e2! This structure is very well-known.

White's idea is to create pressure over the e-file and on the kingside after the pawns advance. Black should look for counterplay on the queenside.

15...♗d7 [15...♖c4 16.♖d3 ♖c7 17.♖ae1+=]

16.♕xg7 ♖xg7 17.♖d4+ ♗f6 18.g4↑ ♖g8 19.♖ae1 Black should not have any problems with defending e7 pawn. The more important task for him is to create counterplay in time.

19...♖a5 20.c3 [20.♖xe7? 20...♖xe1+ 21.♖xe1 ♖xe1+ 22.♗h2 ♗d7=+]

20...♖c7 21.a3

21...♖b5? I don't like this move. Black is losing too much time to offer the queens exchange, which of course White will refuse. Instead of this Black could try to create weaknesses, for example with [21...b5 22.f4 ♖a4 23.♖d2 a5! 24.f5 b4 and Black is more less in time.]

22.♗h2! Avoiding the queens exchange after f4.

22...♖f8 23.f4 ♖c4 24.♖d2! Of course the white queen is needed for the attack.

24...b5 Now it is already too late, White is much faster with his attack.

25.f5 a5

26.♖e4! The decisive blow! The white rook can now be connected to the attack over the 4th rank.

26...♙xd5 [26...♘xe4 27.♖xe4 ♙c5 28.♙h6+ ♔g8 29.♖xe7! followed by f6.; 26...♙c5 27.♙h6+ ♔g8 28.g5 ♘xe4

29.f6! exf6 30.♖xe4 ♖xe4 31.gxf6 With mate to follow.]

27.♙h6+ ♔g8 28.♖e6 A nice game by the Polish GM whose play seemed to be very easy and logical, but very effective.
1-0

(2) Hou, Yifan(2629)
- Giri, Anish(2750) [B51]

Hans Suri Mem 2014(1.3),
2014.07.14

GM Arkadij Naiditsch
Best rating: 2737

In the history of chess, only one woman could play on the highest level and this is Judit Polgar. At her best shape she even managed to enter the Top 10. Hou Yifan, the current Women's World Champion and clearly the strongest female player ever (after Polgar) seems to do fine as well against men. Yifan is very close to enter the Top 100 and already proves in the first round of Biel...

1.e4 c5 2.♘f3 d6 3.♙b5+ is a very popular move at the moment. There have always been a few Top GMs who liked 3.Bb5, but especially after the games of Carlsen this move went into big fashion.

3...♘d7 is the most fighting reply for Black. [The main line is clearly 3...♙d7 and now in the latest games White seems to push a bit after 4.c4!? and strangely Black did not show a clear way to equalize so far.]

4.d4 The most principled. White also has moves like 4.0-0 or 4.c3.

4...cxd4 5.♙xd4 a6

6...♙e2!? Quite an interesting and rare move. [We would be in the main lines after 6.♙xd7+ 6...♙xd7 7.O-O and now White's idea is usually connected with the c4 move.]

6...♞gf6 7.O-O e5 Giri is already planning a pawn sacrifice which just looks too dangerous. [The simple 7...e6 8.c4 b6 9.♞c3 ♙b7 would lead us to hedgehog structures where the white queen is not so perfectly placed on d4. Anyhow he might be in time to regroup and get some small plus.]

8.♚e3 d5 It is clear that Black had planned the d5 move before playing e5.

9.exd5 Of course!

9...♙c5? It seems like Giri does not take his opponent too seriously. There was no reason for Black to take such rushed actions. [After 9...♞xd5 10.♚d3 ♞5f6 Black's position is maybe a bit worse, but White has nothing too spectacular.]

10.♚d2! The queen is taking a perfect position on d2 not only to protect the d5 pawn, but as well to prepare the c4-b4 pawn pushes.

10...O-O 11.c4 So Black is a full pawn down and in case White will be in time to play something like b4-Nc3-Bb2 the game could already simply be over. Black needs to react very quickly here.

11...e4 is probably the best try for Black, as at least the knight is going to take a great position on e5.

12.♞d4 ♞e5 White's position is clearly better, but Black has many tricks for example connected with Nfg4-Qh4 or Qc7 with the idea of playing Ng4 next. White needs to be careful.

13.b4! Another strong decision by Hou Yifan, the move in the game is much stronger than something like 13.Nc3. Now White will have the idea of playing c5-d6 to totally kill all of Black's hopes.

13...♙a7 14.♞c3 ♙g4 Black continues to try and create some complications. [Maybe a slightly better try to save the game could have been 14...♞d3 15.♞c2! (15.♙xd3 is premature since after 15...♙xd4 16.♙e2 ♙e5 the black bishop on e5 gives Black some attacking chances.) 15...♞xc1 16.♚axc1 and of course White is a full pawn up and has a much better position, but Black's bishop pair could give him some theoretical chances to survive the game.]

15.c5! Another very good move by White based on an exact calculation. White is using the moment that the pawn on d5 can't be taken to get the bishop on a7 completely out of the game.

15...a5 [15...♞xd5 didn't really help since after 16.♞xe4 White is just a clear pawn up.]

16.a3 Of course the structure must be kept.

16...♖xd5 This is not the best move order. [To get a better version Black should have played 16...♗b8 Before taking on d5 Black is provoking the bishop to b2. 17.♗b2 ♖xd5 18.♖xe4 ♗xe2 Of course White is a clear pawn up, but Black might keep some fighting chances.]

17.♖xe4 ♗b8 And now we see the difference to 16...Bb8, White has another move than to play now 18.Bb2:

18.f3 Hou Yifan is playing a perfect game. There is no reason for White to exchange the bishop on e2 who is controlling the knight e5.

18...♖f4?! A mistake never comes alone. Giri makes another clear miscalculation, but I must admit that it is difficult to find a good move in a bad position. [18...♗h5 would lead to the same result as in the game since after 19.♖f5 the threat of playing Qxd5 gives White enough time to put the knight to d6.]

19.♖d6! The last important move of the game. Black is losing material.

19...♗xd6 [19...♖xe2+ 20.♗xe2 would lead to the same position as in the game over a different move order.]

20.cxd6 ♖xe2+ 21.♗xe2 ♗xd6 22.♖b5 I guess this is the

move Giri blundered.

22...♗f6 [22...♗b6+ didn't help since after 23.♗e3 Black is losing the g4 bishop.]

23.fxg4 The most simple. White has a big material advantage and the attack too!

23...♖f3+ 24.♗xf3 ♗xa1

25.♗e3 Precision until the end. White wants to play Bc5 next, putting pressure on the f7 pawn. The game is totally over.

25...♗f6 26.♗xf6 gxf6 27.♖c7 The white knight is coming to d5.

27...♖ac8 [27...♖ad8 28.♗h6 and the f8 rook has no squares.]

28.♖d5 A great game by Hou Yifan who perfectly used the mistakes of her opponent. I guess with this win she gained a lot of respect from the top players who will not try to play with her like with a little girl, sacrificing pawns for a doubtful initiative. **1-0**

(3) Kramnik, Vladimir(2777) - Meier, Georg(2632) [A30]

Dortmund GER,
2014.07.12

GM Csaba Balogh
Best rating: 2672

A shocking game by the former World Champion Vladimir Kramnik, who completely misplays the opening part with White and gets convincingly outplayed by his much lower rated opponent, Georg Meier.

1.c4 c5 2.♘f3 ♘f6 3.g3 ♘c6 4.♙g2 d5 5.O-O Kramnik likes hiding his main repertoire against "weaker" opponents, but this time it does not work out properly. I would already consider this move to be an inaccuracy, because it allows Black to occupy the center and obtain a space advantage. [From a theoretical point of view the critical move is definitely 5.cxd5 5...♘xd5 and here either 6.♘c3 (or 6.d4)]

5...d4!

6.a3 Another dubious decision, giving Black a free tempo to consolidate his center. [After White allowed d4, it would have been necessary to play like a Benoni defence with reversed colors and undermine the center with 6.e3 6...e5 7.exd4 and Black has a choice between 7...exd4 (7...cxd4 8.d3 We have a

reached the Benoni with reversed colors, which means that White has an extra tempo, which can be useful for him.)]

6...e5 7.d3 a5! A typical prophylactic move against the b4 idea, which is the most common counterplay in this kind of Benoni structures. [Some developing move like 7...♙e7? would have allowed White to give sense to his previous moves with 8.b4! and the pawn should not be taken in view of 8...cxb4 9.axb4 ♙xb4 (9...♘xb4 10.♘xe5 is a good trade for White, giving up a side pawn for a very important central one.) 10.♘xe5! White wins back the pawn with this little combination, which is known again from the Benoni with reversed colors. 10...♘xe5 11.♙a4+ ♘c6 12.♙xc6+ bxc6 13.♙xb4± followed by Ba3 with a huge advantage.]

8.e4 I believe that the opening the position with 8.e3 would have been preferable again. The text move locks the center and leaves Black with more space for manoeuvring the pieces due to the d4 pawn.

8...♙e7 9.♘e1 This is White's hope to gain space and counterplay on the kingside with the f4 plan.

9...h5! The standard reaction in this structure! The center is locked, therefore an attack on the side is justified. As the following lines show, this move is a perfect preparation for White's only existing plan of playing f4.

10.f4 White decided to allow h4, but his position was already difficult and in my opinion clearly worse. It is incredible that such a strong player and theoretician could end up in a worse position with White after only 9 moves. [Stopping the attack with 10.h4 creates a hole on g4. Playing f4 does not come into consideration anymore after this move and White has no other counterplay, therefore he should look for another solution.; 10.h3 is a usual reaction to counter the sideattack with the idea to have g4 on h4 and keep the g4 square under control to be able to push f4. But it also has the huge drawback that after 10...h4! 11.g4 ♖d7 Black has weakened the dark squares a lot. He intends to trade the bishops with Bg5 and another plan to consolidate the control of the dark squares could be Nf8-g6 and settling a strong knight on f4 after trading the bishop. In case of 12.f4 the weaknesses of the dark squares are still there. 12...exf4 13.♗xf4 ♘de5=+ followed by Bd6 and Ng6, working out the f4 and e5 squares for the knight. Black has a clear advantage.]

10...h4! 11.f5 White tries to lock the position, otherwise if Black gets a knight on e5 and the position opens the attack on the kingside would become even more dangerous.

11...hxc3 12.hxc3

12...g6! Another strong positional decision! Black

undermines the advanced pawn and opens new files in front of the white king to be able to lead a successful attack. Black also wants to open the diagonal of his c8 bishop.

13.♘d2 White decides to allow gxf5 with the hope of obtaining a strong light squared bishop after opening the long diagonal and square for the knight on e4. However the opening of the g-file turns out to be a more relevant factor... [13.fxc6 13...fxg6+ is also a positional disaster for White. Black could use the g4 square with his minor pieces.]

13...gxf5 14.exf5 Meier rightly evaluates that one strong bishop on g2 does not solve White's problems. It is relevant that he controls e4 and White cannot settle a knight there.

14...♖g8! An important intermediate move before focusing on the development of the queenside pieces. Black not only attacks the g3 weakness, but also prevents the positional idea of g4-g5 and if possible f6, sending away the f6 knight to be able to install his own knight on e4.

15.♔f3

15...♗d7! Black prepares to castle queenside and the bishop will play an important role on d7, because he wants to remove his knight from c6 and replace it with his bishop to get rid of the only strong piece of his opponent.

16. ♖f2 It is very hard to suggest something for White and Kramnik does not find plan either, but this allows Black to complete the development and make all the useful moves. In my opinion White is already strategically lost!

16... ♜b6 Black prepares for long castling to connect his rooks. The king will be perfectly safe there, because the only way to open the position with the b4 break is controlled by 5 black pieces and supported by only one white one.

17. ♖e2 O-O-O 18. ♘e4 ♜b3 An annoying move that destroys even more the harmony between the white pieces. Black occasionally wants to invade on d1.

19. ♘f2 Kramnik decided to control the d1 square, but now his pieces are tied up even more. [19. ♘d2 allows 19... ♜d1! and White has no time for trapping the queen with 20. b3 and Bb2, because of 20... ♖xg3! 21. ♜xg3 ♜xe2-+]

19... a4 Meier had the plan of freeing the c6 square for his bishop and he had in mind to drive his knight to b3.

20. ♙h6

20... ♙f8! An excellent positional move again. Black happily trades the dark squared bishops, because then he more easily doubles his rooks on the g-file. White faces a very unpleasant choice again, he either supports his opponent idea, or he

retreats with his bishop, but it cannot go to d2 because of the b2 pawn, while going to c1 is extremely ugly...

21. ♙xf8 ♖dxf8 22. g4 ♖g7! Very consequent and straightforward play by Meier!

23. ♘e4 ♘xe4 24. ♜xe4 ♖fg8 25. ♙f3

25... f6! Black makes progress with each move. What should be the next plan?! To make the g4 pawn more vulnerable, he should trade the light squared bishops. For this he needs to remove his knight, but it leaves the e5 pawn unprotected. Therefore the next move already suggests itself again:

26. ♖g2 ♘d8! Black finds an excellent place for his knight on f7, from where it can go to g5, might attack the g4 pawn from h6 or sometimes even Nd6 is possible and of course Black is ready to play Bc6 as well.

27. ♜e2 ♙c6 28. ♙xc6 bxc6! This is the most direct. The doubled pawns are not bad now at all, I would even call them useful, because they control the d5 square against the possible invasion of the queen. Black also does not want to waste a tempo to take his knight into a wrong direction, as it is already on his way to f7-h6.

29. ♜e4 ♙c7 Black wants to continue his plan of Nf7, but first he had to protect the c6 pawn.

30. ♖f3 ♖f7 The game is over! White cannot avoid losing material and his position collapses.

31. ♖f1 [31. ♖h4 with the idea of Ng6 is refuted by 31... ♗g5 32. ♖e2 ♖h3+—+ and Nf4 next.; 31. ♖h2 also loses to 31... ♗g5 White must protect the d3 pawn. 32. ♖e2 ♖h3+ 33. ♖h1 ♖f4—+]

31... ♖d6! The g4 pawn falls, which means the end of the f5 pawn as well.

32. ♖e2 ♖xg4 33. ♖f2 ♖xf5 White could have resigned here, but Kramnik decided to continue until his opponent passes the timecontrol...

34. ♖d2 ♖xg2+ 35. ♖xg2 ♖xg2+ 36. ♖xg2 ♖xb2 37. ♖f3 ♖d6 38. ♖h2 ♖xa3 39. ♖e2 ♖b2 40. ♖h7+ ♖b6 41. ♖e7 ♖b7 The knight covers all the checks. A positional masterpiece and a huge success by Georg Meier and a disaster for Kramnik, who clearly had a terrible day. **0-1**

(4) Caruana, Fabiano(2789) - Ponomarev, Ruslan(2723) [C42]

Dortmund GER,
2014.07.13

GM Csaba Balogh
Best rating: 2672

Fabiano Caruana won a very nice game against the Petroff defence. In a well-known position he introduces a new plan (or rather he brings back an old plan), which seems to create some problems for Black.

1.e4 e5 2. ♖f3 ♖f6 3. ♖xe5 d6 4. ♖f3 ♖xe4 5. ♖c3 The most popular setup nowadays against the rock-solid Petroff defense. Somehow the biggest experts, Kramnik, Gelfand, Giri have started to play other openings as Black.

5... ♖xc3 6.dxc3 ♗e7 7. ♗e3 White prepares to castle queenside after Qd2. Black has a choice here between two very serious plans, which will determine the later course of the game. One is to castle kingside, which often leads to sharp attacking positions with h4 or quickly developing the pieces and castle queenside is considered to be a more safer option.

7... ♖c6 8. ♖d2 ♗e6 9.O-O-O ♖d7 10. ♖b1 ♗f6 [It is important not to hurry with 10...O-O-O because White gets an edge after 11. ♖d4! White is threatening Bb5 and also to simply take on e6, getting a longterm advantage due to the two bishops. Black cannot play 11... ♖xd4 12. ♖xd4± because of the double attack on g7 and a7.]

11.h3 This is the forgotten plan, which probably will come back to the fashion after this game. White wants to take ground on the kingside and fianchetto his bishop with g4 and Bg2. [Another plan is 11.♕g5 11...♕xg5 12.♖xg5 O-O-O 13.♗xe6 ♔xe6 Black is very slightly worse, but he should be able to hold.; 11.h4 was the main move and after 11...h6 White has a wide choice. Ponomarev is a big expert here, he played 3 games recently with white. The last one went with 12. Be2 and he tried before 12.Bb5 and 12.Nd4.]

11...h6 An useful waiting move to avoid the Ng5 ideas of grabbing the bishop pair. [11...O-O-O is still premature because of 12.♗d4 ♗xd4 13.♕xd4 and Black must allow the destroying of his pawn structure with Bxf6, otherwise he faces the double attack on g7 and a7. 13...♕xd4 14.♔xd4]

12.b3 White also replies with an useful move. Black plays Ne5 many times in this line with the threat of Nxf3 and Nc4. White takes the c4 square under control, therefore he could play Nd4 in this case!

12...a6 Another useful preparation for O-O-O, which fits the structure perfectly. Black wants to avoid the double attack which was seen in the 11...O-O-O line.

13.g4 O-O-O 14.♕g2 g5 Knowing what happened in the game, we can say that this move was wrong and White was

better afterwards. However if we take a deeper look, we will see that it is not so easy to play with Black. [The most natural move would have been 14...♔b8 but after

15.♗e1! which I am quite sure was the deep home preparation of Caruana and the worry of Ponomarev. White plays Nd3 next followed by f4 or even Nf4 and I don't see how Black could equalize... 15...h5 is logical to disturb the structure, but still White gets an edge after 16.g5 ♕e7 17.♗d3+]

15.♗d4! Caruana perfectly reads the new situation after Black has changed the pawn structure and he also changes his plan. The pawn on g5 becomes a target...

15...♗xd4 16.cxd4 d5 White was threatening to play d5, but now...

17.f4! This is the point! White is threatening to play f5 (also to take twice on g5), therefore Black is forced to trade on f4, but it leaves him with two pawn islands (f7-h6). We can conclude that White has a small, but longterm edge because of this.

17...gxf4 18.♗xf4 h5

19.g5! Of course, White should not help his opponent to get rid of his weak pawns. Keeping the tension is very important.

19...♗g7 20.♖de1 [It seemed to be more circumspect to play 20.h4!? to stop Black from playing this move and fix a target on h3.]

20...h4! Black has a passive position, but small hopes like fixing the pawn on h3 are increasing his drawing chances, because it pins two white pieces to protecting the pawn.

21.♗e5! Another strong positional move by Caruana. He trades the dark squared bishops and intends to organize his play on the freshly weakened squares, rook to e5, queen to f4 and so on. [21.♖e3 was tempting, but Black can parry the Rc3 threat with 21...♗b8 22.♖c3 ♖c8 followed by Bf8-d6.]

21...♖dg8 22.♖f4 ♖d8 Black wants to keep an eye on the g5 pawn, but it is never really hanging because the rook will defend it from e5. Black has a difficult position anyway, he is lacking active plans and the only question is how White

should make progress. Caruana slowly starts to improve his pieces before making any concrete decisions.

23.♗f1! White transfers his bishop to d3, from where it is threatening sometimes with g5-g6, destroying the outpost of the e6 bishop or trading it with Bf5, making the f7 weakness more vulnerable.

23...♖b8 24.♗d3 ♗c8! Ponomarev was rightly afraid of the g6 threat and leaves from the x-ray of the rook. [In case of 24...♖d7 25.♗xg7 ♖xg7 26.♖f6! ♖hg8 27.g6!± would have worked because Bxh3 runs into Re7!]

25.♖b2! Caruana continues improving his position, he does not change anything to let his opponent suffer in his cramped situation.

25...♗xe5 26.♖xe5 ♖g7 27.a4! Another small improvement. White takes ground on the queenside, he is ready to squeeze Black with a5.

27...a5 [After 27...♖hg8 White reaches a better endgame with 28.♖xh4 ♖xg5 29.♖xg5 ♖xg5 and here he can choose between two pleasant options: 30.♖f2+= (30.♖xg5 30...♖xg5 31.h4 ♖h5 32.♗e2 ♖h6 33.h5+= is also clearly better for White with the distant passed pawn, but perhaps it is better to keep the queens on board.)]

28.♔a2 Caruana was already in some time pressure and he decided to make some waiting moves as his opponent is lacking useful plans anyway.

28...♔a7 [Trying to jump out with 28...♖h5 does not help. 29.♖he1 Black must avoid the invasion of the rook on the back rank. 29...♖h8 30.♖1e3+= White just improved his rook.]

29.♖d2 ♔b8 30.♖f4 ♔a7 White was just getting closer to the time control, but of course the game does not finish with a repetition...

31.♖he1!? Finally White changes the character of the game by trading the h-pawns. His idea is to open the position and trying to make use of the difference in the activity between the rook on e5 and the one on g7.

31...♙xh3 32.♖h1 ♙c8 [Perhaps it was better to play 32...♙e6 33.♖xh4 ♖hg8 (33...♖xh4 34.♖xh4+=) 34.♖h5 c6+= Building a kind of fortress by pressing the g5 pawn with full power. Black starts to play Ka8-a7 from now on and wait how White makes progress. It is not so easy because the white heavy pieces are also quite busy with protecting the g5 pawn.]

33.♖xh4 ♖xh4 34.♖xh4 b6? A positional blunder. Ponomariov misses the nice regrouping of the queen to c6. [34...c6 should have been played. 35.♖f4+= White is clearly better, but the situation is the same as in the 32...Be6 line, that White still needs to show the winning plan, but his pieces are pinned to the defence of the g5 pawn.]

35.♖h6! ♖g8 36.♖c6! Suddenly Black is in deep trouble. The d5 pawn is hanging and it is not easy to deal with it.

36...♙e6 [36...♙b7 is met by 37.♖f6! ♖xf6 38.gxf6 and the rook invades to e7! Black should play Be6 now, but White nicely deflected the bishop to b7 first. Black had probably forgotten about this idea.]

37.g6! This breakthrough seems to be decisive. The e6 bishop loses its stability and Black collapses.

37...♖g7 Allowing a beautiful finish, but other moves were also bad. [37...♙d7 38.♖xd5 fxg6 39.♙e4 The king becomes too weak. 39...c6 (39...♖c8 40.♖e7+-) 40.♖d6+-; The endgame is lost after 37...♖d6 38.♖xd6 cxd6 39.♖e3 White is threatening to take on f7 and checking the bishop with Re7 and if Black avoids it by playing 39...♔b8 he moves into another motif: 40.♙f5!! ♙xf5 41.gxf7 ♖f8 42.♖e8+- Somehow the black king could not find its place...]

38.gxf7 ♙xf7

39.♖e7!! This brilliant combination wins the game on the spot. Caruana found it with only one minute on his clock, but of course that is why he is a 2800 player...

39...♖xe7 40.♙a6!! This is the point and Black gets mated in any case. Ponomariov was also impressed by Caruana's performance and allowed his opponent to mate him.

40...♔xa6 41.♖a8# 1-0

(15) Sutovsky, Emil(2620)
- Nepomniachtchi, Ian(2730)

ACP Golden Classic 2014(5.3),
2014.07.17

GM Arkadij Naiditsch
Best rating: 2737

After the opening White had a clear advantage in the endgame, but step by step Black outplayed his opponent so we finally see this very dangerous rook endgame for White. Black is going to be a pawn up because it is impossible to save the h2 pawn and the black king is also very active. At first sight White's position just looks lost, but Sutovsky finds a way to finally get a draw.

44.c4! The only move! White's only chance is to use the passed c- and b-pawns to get the black king's attention and in the meantime try to get rid of the e6 pawn, after which we will find ourselves in the theoretically drawn rook endgame with f- and h-pawns, which is still quite hard work to hold. ..

44...♖xh2+ The pawn on h2 has to be taken either way... [To nothing would lead 44...♙e5 45.c5 ♖d5 and now White has the very important

46.♖b6! White is giving up the c5 pawn but taking the e6 pawn, which secures a draw. 46...♖xh2+ 47.♙f3 Black can't avoid Rd6 next, so the position is a draw.]

45.♙d3 ♖h3+ 46.♙d2 The position of the white king on d2 is also solid and the main idea remains to play c5 and Rb6.

46...♙e5 Unluckily for Black, there is nothing better. For example pushing the h-pawn would not bring any success: [46...h5 47.c5 Now c6 is already a serious threat. 47...♖g3 48.c6 ♖g8 Black just lost too much time and White is achieving a comfortable draw: 49.♖c4 ♙e5 50.b4 ♙d6 51.b5 Black is even the one that should be careful now.]

47.c5 White is playing for the Rb6 idea

47...♖h2+ 48.♙c3 ♙d5

49. Rxc4 is of course a possible move, but actually it was not really needed. [49. Rxb6 would lead to a draw: 49... Kxc5 50. Rxe6 Rf2 Now in the best case Black can reach the h-f pawn and rook endgame. 51. Kd3 Kd5 52. Rb6 White is keeping the b-pawn alive, which secures an easy draw.]

49... Kc6 White wanted to play c6 of course.

50. b4 Rh3+ 51. Kd2 Ra3 [Black needed to be bit careful because of the nice trick which we can see after 51... f5? 52. b5+! Because of the bad position of the black rook on h3 all this is working... 52... Kxb5 53. c6 Kxc4

54. c7 And there is no way to stop the c7 pawn from queening.]

52. Rh4 The most simple. Now the exchanges of pawns are unavoidable.

52... Kb5 53. Rh6 And the pawns are falling on both sides.

53... Kxb4 54. Rxf6 Ra6 55. Kd3 Kxc5

56. Rf4 Any move already leads to a draw...

56... Ra3+ 57. Ke2 Kd5 58. Rh4 e5 59. Rb4 e4 60. Rb8 Kd4
And once again we could see that even a very promising looking rook endgame has a huge tendency to end up in a draw... **1/2-1/2**

(16) Adams, Michael(2743)
- Kramnik, Vladimir(2777)

Dortmund,
2014.07.13

GM Csaba Balogh
Best rating: 2672

In a very complex middlegame, Kramnik succeeded to outplay Adams, but he failed to convert the winning advantage into a full point.

47...a4? Kramnik miscalculates something. He gives back one of his extra pawns to get rid of the rooks and he thought that the arising endgame should be winning for him because he collects the kingside pawns. But things are not so easy... [47...b6—+ should be a technical win for Black. He can already advance his a-pawn next, followed by b5 as he prevented Kc5.]

48.♔c5 ♜e4 49.♔b5! Adams had no choice. He must take the pawn and hope for a miracle. [49.♔d5? did not work in view of 49...♜e5+! 50.♔d4—+ and b5 next.]

49...♔e6 50.♜xa4 In this kind of position it is much easier to be on the defensive side. We always have to play only moves, while our opponent must calculate hard each move to not miss anything in the winning line.

50...♜xa4 51.♔xa4 ♔d5 The path to the h3 pawn is not shorter if Black plays Ke5, he must go through the e4 square anyway. [Another winning attempt was 51...♔e5 52.♔b5 ♜g5 53.♔b6 h5 54.♔xb7 h4 Advancing the h-pawn is a big achievement for Black and he only now goes towards the h3 pawn, but this takes too much time and White is in time to bring his king back... 55.♔c6 ♔f4 56.♔d5 ♔f3 57.♜d6 ♔g2 58.♔e4 ♔xh3 59.♔f3 ♔h2 60.♔f2!= Squeezing the black king to the h-file. White plays Ne4 next and Black cannot make progress.]

52.♔b5 ♔e4 53.♔b6 ♔f3 54.♔xb7 ♔g2 55.♔c6 ♔xh3 56.♔d5 ♔xg4 All moves were more or less forced so far. Kramnik must have foreseen this before playing 47...a4, but the arising position is drawn...

57.♔e6! White wins back one of the pawns, but the position still remains tricky...

57...h5 [Both 57...♜g5 and 57...Kg5 run into 58.♜xh6+!=]

58.♔xf6 ♜c1 The last hope for Black is to somehow set White into zugzwang and force him to move with his knight, when the pawn could be advanced.

59.♔e5! The most natural and best move. White approaches to the corner with the idea to sacrifice the knight sometimes as the h1 square does not fit to the bishop's color. [59.♔g6?

to protect the knight and keep the h5 pawn under attack is a mistake because after 59...♙g5! White gets into zugzwang. 60.♘d6 h4 61.♗e4 ♙e3 The bishop dominates the knight now. 62.♘f6+ ♔f3—+ and the pawn promotes automatically.]

59...♙d2 60.♔e4! [Another moment to go wrong was 60.♔f6? but here the win is much more complex than in the 59.Kg6 line: 60...♙f4 61.♔e6

61...♔g5! White is in zugzwang again. Only the knight can move. 62.♘d4 White temporarily prevents the advance of the pawn, but he gets into zugzwang again... 62...♙b8! 63.♘f5 (63.♘f3+ is met by 63...♔g4 and Black advances his pawn next.) 63...♙c7! 64.♘d4 ♔f4! 65.♘f5 ♙d8!—+ Here we are! The next zugzwang. Only the knight can move again, but this time it does not have any good squares. Black pushes h4 next.]

60...♙g5 Before playing the thematic 60...Bf4, Kramnik tries some other ideas to set black into zugzwang.

61.♔e5 ♔f3 62.♘d4+! White did not have Ke4 now, but this time he could give a check and then go back to f5.

62...♔g2 63.♘f5 White is ready to wait with Ke4, there is no chance for a zugzwang here.

63...♔f3 64.♘d4+ ♔g4 65.♘f5 ♙d2 66.♔e4 ♙f4 It seems like Black achieves what he wants, but Adams has a nice resource to save the game.

67.♘h4! And Kramnik admits that he cannot make progress and agrees to a draw... [Actually 67.♔d3! was also drawn and quickly going to h1!]

67...♔xh4 68.♔xf4 ♔h3 69.♔f3 1/2-1/2

Clash of the Titans

(17) Botvinnik, Mikhail
- Tal, Mihail [E81]

World Championship 24th(17),
1961.04.28

GM Kamil Miton
Best rating: 2655

1.d4 g6 2.e4 ♘g7 3.c4 d6 4.♞c3 ♞f6 5.f3 We have the Samisch Variation.

5...♞bd7 6.♙e3 O-O

7.♙d3 [7.♞h3 Sometimes White develops the knight to f2, especially if Black is going to transpose to the Benoni after c5.; 7.♞d2 ; 7.♞ge2]

7...e5 [7...c5 Because the white bishop can come to d3 very quickly, Black could try this to fight in the center. 8.♞ge2 (8.d5 This move makes no sense with the bishop on d3 because Ne5 will come with tempo. 8...e6) 8...cxd4 9.♙xd4 (9.♞xd4 9...e6 10.O-O d5! A typical idea.

Black equalizes the position in the center and after all the exchanges on d5 he will play Nb6.) 9...b6 10.O-O ♙b7 followed by e6, with solid position for Black.]

8.♞ge2 Let's check what could happen if White closed the center: [8.d5 8...♞c5 (8...♞e8 9.♞d2 (9.♞ge2 is not accurate because of the tricky 9...♙h6! and Black activates the bishop or will exchange him.) 9...f5 10.O-O-O a6 Preparing to play b5 at some moment. 11.♞b1 ♞h8 12.exf5 gxf5 13.♞ge2∞ (13.g4 13...e4! is a typical idea to open the bishop and get the useful e5 square. 14.fxe4 fxe4=+) 9.♙c2 ♞h5 10.♞d2 f5 11.exf5 gxf5 (11...♙xf5 12.♙xc5!? An interesting idea to take control of the light squares, especially e4, and play against the limited bishop on g7. 12...dxc5 13.O-O-O e4!?) 12.O-O-O∞]

8...♞h5 9.dxe5 With the Samisch setup (Bd3-Ne2-f3) this move can not bring anything good for White. Most logical was [9.d5 9...♞c5 10.♙c2 ♞f4!? is an interesting idea to get active play. 11.♞xf4 (11.O-O 11...♞g5↑) 11...exf4 12.♙xf4

12...f5! 13.O-O g5 (13...fxe4 14.fxe4 ♞d7 also with compensation.) 14.♙e3 f4 15.♙d4 ♞d7 Black is blocking the e5 square and then creates pressure on the kingside with h5-g4 etc.]

9...dxe5 10.O-O c6 11.♖d2 ♕e7 12.♗ad1 ♘c5 13.♙b1 The bishop on b1 and knights on c3 and e2 are very limited and the d4 square can also be weak, so Black has not problems at all.

13...♘e6 14.♖e1 ♙f6 Black is trying to exchange the bishops, as then the dark squares will become weaker.

15.♙h1 ♘hf4 16.g3 ♘xe2 17.♘xe2 h5 With the idea to weaken the white king after h4 and then maybe play Kg7-Rh8.

18.♖f2 b6

19.f4 is the only way to activate the pieces, but on the other hand this pawn advance further weakens the white king.

19...exf4 20.gxf4 ♙b7 21.e5 [21.c5 To close the bishop is too optimistic: 21...♘xc5 22.e5 ♙g7 23.♙xc5 ♖xc5 24.♖xc5 bxc5 25.♘c3 ♗ad8 with Rd4 next.; 21.f5 This move could give White the initiative. 21...♘g7 (21...♘g5 22.♖g2 c5 23.♘c3 ♙xc3 24.♙xg5 ♙f6 25.♙h6 g5 Of course not Bxf8 but 26.♙xg5!±) 22.fxg6 fxg6 23.♘f4 c5 24.♖g2 Black has big problems with the weak g6 pawn here.]

21...c5+

22.♗d5!? An original idea.

22...♙g7 23.♙g1 [23.f5 23...♘c7--+]

23...♘c7 24.♘c3 ♘xd5 [24...♗ad8 25.♙e4∞]

25.cxd5 ♗ad8 26.♙e4 What an interesting position. Black is an exchange up but White has compensation thanks to his strong central pawns. The problem in Black's position is the fact that the pawn is on h5 and is not possible to push f6 with the idea to break the white structure.

26...♙a8 27.♖g3

27...b5?! Tal is very impatient, he is trying to complicate the position, but after this move Black simply loses the pawn. But

on the other hand is hard to suggest some plan for Black, maybe Rd7-Rd8.

28. ♖f2 [28.d6 28... ♖e6 29. ♗xa8 ♖xa8 30. ♗xc5 ♖c4 31.b4 a5 32.a3 axb4 33. ♗xb4 ♖fc8 34. ♖f3 with Nd5 next.]

28... ♖d7 [28... ♖c8 29. ♗xb5]

29. ♗xc5 ♖fe8 30. ♖g3 ♖c8 31.b4 ♔h8 32. ♖f3 White missed a win based on very deep calculation: [32.e6! 32...fxe6 33. ♖xg6 ♗xc3

34. ♔h1!! A very difficult move to find. (34. ♖xh5+ 34... ♔g8 35. ♔h1 ♖xc5! The back king will escape over f8-e7.) 34... ♗xd5 (34... ♖xc5

35. ♖g1!! What a fantastic move again! White doesn't care about material, he just wants to mate. Black has not defence.) 35. ♖xh5+ ♔g8 36. ♖g1+ ♖g7 37. ♖h7+ ♔f7 38. ♖xg7+ ♗xg7 39. ♗xd5 exd5 40. ♗d4 ♖g8 41. ♖f5+ ♔e7 42. ♖g5+ ♔f7 43. ♖xd5+ White should win because of the weak black king.]

32...a6 33. ♔h1 Botvinnik is not in a hurry. A break over e6 was possible here as well, but it would lead to very complex play. [33.e6 33...fxe6 34. ♗xg6 ♔g8 35.f5!; 33. ♖g2 With the idea to keep the f3 square for the bishop after f5.]

33...f5! 34.exf6 [34. ♗c2 34... ♗f8]

34... ♗xf6 35. ♗xg6 The white structure is finally destroyed, but Black had to sacrifice two pawns for it.

35... ♖g4 36. ♖d3 [36. ♖xg4 36...hxg4 37. ♗xe8 ♖xe8 38. ♖c1 ♗xc3 39. ♖xc3 ♗xd5+ 40. ♔g1 ♖e2 And Black should quite easily hold the draw.]

36...♖g8

37.♙e4? Botvinnik is looking for consolidation, which is why he takes back the pieces from their active places. More promising was [37.♖g1! 37...♙xf4 (37...♙xg1+ 38.♙xg1 ♖xg6+ 39.♙f2 (39.♙xg6 39...♖g8) 39...♙g7 40.♘e4± White is two pawns up and has the more active pieces.) 38.♙e2 Suddenly Black has problems with the king. 38...♙h6 (38...♙e5 39.♙d2! Xh6.) 39.♙e3 ♙xg6 40.♖xg6 ♖xg6 41.♙xh5+ ♙g7 42.♙h6+ ♙f7 (42...♖xh6 43.♙g4+) 43.♘e4!]

37...♖ce8 38.♙f3 ♙xf4 [38...♙h3 39.♖d1 ♖g3 40.♙f2 ♖xf3 41.♙g6 ♖xf4 42.♙xe8+ ♙g7 43.♖g1+ ♖g4 44.♖xg4+ hxg4 45.♙g1 ♙xc3 46.♙xa8 ♙f3 With a draw after perpetual check Qd1-Qf3.]

39.♘e2 [39.♙e4 39...♙h4 40.♖xf6 ♙xf6 41.♙d4 ♖e5—+]

39...♙h4 40.♙f2 ♙g5 41.♘g3 White loses the pawn and Black's pieces are active as well. Now Black's position is almost winning.

41...♖d8 42.♙e3 ♙e5 43.♖d1

43...♖g4! Activating the rook.

44.a3 [44.♙xg4 44...♖xd5—+]

44...♙b7 These are just waiting move without any deep idea. [44...♖h4±]

45.♙b6 ♖d7 46.♙e3 ♖h4 47.♘f1 Again too passive, why not play [47.♙g2]

47...♖c4 48.♙g2 ♖g7 49.♙d2 h4 50.h3 ♙b2 The most practical way. Tal starts to reduce the material. [50...♙h5 With the unpleasant idea Rxg2 Kxg2 Qg6+ and Rc2 next could finish this game faster.]

51.♙xb2 ♙xb2 52.♙c5 ♖d7 [52...♙xa3 53.♙d4 ♙xb4 54.♙xg7+ ♙xg7 55.d6 ♙xg2+ 56.♙xg2 ♖c8 57.d7 ♖d8 58.♘e3 ♙f7 59.♘d5 ♙d6 (59...♖xd7 60.♖f1+) 60.♖a1 ♖xd7 61.♖xa6 With drawing chances.]

53.♘e3 ♖c1 54.♖xc1 ♙xc1 55.♙d4+ ♙g8 56.♘g4 The white pieces came back to active squares but it is already too late, as without heavy pieces on the board the black king is safe.

56...♙g5 [56...♖e7 57.d6 (57.♘e5 57...♙f4) 57...♖e1+ 58.♙g1 ♙xg2+ 59.♙xg2 ♖d1 60.♙c5 ♙f7 61.♘e5+ ♙e6—+]

57. ♔g1

57... ♜xd5 Black decides to change the material situation but it is enough for him to win the game anyway.

58. ♞e5 [58. ♜f6 58... ♜c1--]

58... ♜xg2 [58... ♜d8 59. ♜b6 ♜d6 60. ♜c5--]

59. ♞xd7 ♜xh3 60. ♞c5 ♜c8 61. ♔f2 ♔h7 62. a4?! The last chance was to take control of the h-pawn first. [62. ♜e5 62... ♔g6--]

62... bxa4 63. ♞xa4 ♜f4 Now White is not able to stop the h-pawn.

64. ♔f3 h3 65. ♜g1 h2 66. ♜xh2 ♜xh2 67. ♔e4 [67. ♞c5 67... ♜d6--]

67... ♜d7 68. ♞c5 ♜b5 69. ♔d5 ♔g6 70. ♞e4 ♔f5 71. ♞c3 ♜f1 72. ♔c5 ♜e5 [72... ♜g1+]

73. ♞b1 ♔e6 74. ♞d2 ♜d6+ 75. ♔b6 ♜g2 76. ♞b3 ♜xb4 77. ♔xa6 White managed to exchange the last pawns but the endgame with two bishops against a knight is theoretically lost, especially in this case when the white king is already on the rim.

77... ♜f1+ 78. ♔b6 ♔d6 79. ♞a5 ♜c5+ 80. ♔b7 ♜e2 81. ♞b3 ♜e3 82. ♞a5 ♔c5 83. ♔c7 ♜f4+ And the white knight will be caught very soon... **0-1**

Editorial Preface

A fantastic week of chess has come to an end. A lot of top tournaments have finished. Let us start with the main ones:

Dortmunder Schachtage: Nobody could face up to Caruana who crushed the event with 5.5/7 and is now officially over 2800 ELO on the next rating list. The World Nr3 showed strong and powerful play and totally deserved the tournament win. The big surprise was the 2.5/7 result from Kramnik, who already won the Dortmund supertournament 10 times. It started with the disaster game against Meier and continued in a similar way until the end...

The Biel Chess Festival was dominated by the young French Vachier-Lagrave who finally won it with a score of 6/10 and he could even have scored more. The 2nd place went to the solid Wojtaszek and the 3rd place was shared by Hariskrishna, Hou Yifan(!) and Giri.

It was great to see the current women's World Champion doing very well against some top players and we might soon have a new Judit Polgar.

A very strange tournament in Italy which was called ACP Golden Classics (what it has to do with ACP is hard to understand, except for the participation of Sutovsky) ended with a one-way victory of Wesley So, who scored a great 4.5/6.

During an open tournament in Israel, a rapid match between Gelfand and Svidler was organized, where Svidler could once again prove his great rapid skills with a final score of 5-3 for the Russian.

That's all for this week from the top world events. Already on the 1st of August we can be excited about the start of the Chess Olympiad in Tromsø. Your two commentators are both going to play for their respective teams of Hungary and Germany.

We hope you enjoy this week's issue!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

Hans Suri Mem 2014(7),
2014.07.21

GM Arkadij Naiditsch
Best rating: 2737

A very exciting game which ended in a strange way is awaiting us. It is hard to say how far each player knew the theory and actually it doesn't matter, White played a very powerful game with a great piece sacrifice but the position remained quite complicated. Just when things seemed to be developing very well for him, Motylev made a horrible blunder which just left him a piece down in a hopeless position.

1.e4 c5 Vachier remains one of the few players from the very top who did not switch to the Berlin and shows again and again how good his Najdorf is.

2.♘f3 d6 3.d4 Motylev's games are also great to watch, he has no fear from the main lines, even against stronger opponents.

3...cxd4 4.♗xd4 ♘f6 5.♗c3 a6 6.♙e3 One of the most popular lines in the Najdorf. Probably 6.Bg5 still remains the main move.

6...♗g4 This could not have been a surprise for White. We commented a great victory from Maxime already in previous issues over Adams in the same line.

7.♙g5 h6 8.♙h4 g5 9.♙g3 ♙g7 We are in a sort of main position in the 6...Ng4 line and White has to choose which line to play now.

10.♘e2 Motylev goes for a very concrete line.

10...h5 Other moves are also possible for Black, but of course 10...h5 is clearly the main move. In general Black should not allow White a control over the white squares in such structures and needs to play in a very dynamic way as every tempo counts.

11.h4 This was clearly the plan behind Be2. As we can easily see, things are already very complicated, but of course it is still theory.

11...♗c6! A strong move.

12.♗b3 White doesn't have anything better. [The promising-looking 12.♗xc6 12...bxc6 13.hxg5 doesn't lead anywhere for White after 13...♖b8! followed by Qa5 and only Black can be better here.]

12...gxf4 Now the pawn on h4 already needs to be taken:

13.♗xh4 [Usually a move like 13.♖xh4 is not that good because of 13...♗ce5 followed by maybe Ng6 and the rook on h4 is clearly misplaced.]

13...♗e6 This is also very typical play. Black is going to be strong on the queenside, so Vachier-Lagrave frees the c8 square for his rook.

14.♖d2 White wants to castle queenside.

14...♖b6 Black is fixing the f2 pawn to avoid 0-0-0. [14...♖c8 is the other possible move and all this is still well-known.]

15.♗d5! This move looks very strong to me and it might even question the 14...♖b6 move as now the game is becoming very forced.

15...♗xd5 16.exd5 Where to put the black knight now, to d4 or e5?!

16...♗d4 Probably the right choice. [In case of 16...♗ce5 17.c3! White is in time to block the bishop on g7 and the pawn h5 could be a potential target in the future.]

17.c3!? Motylev clearly had this in mind when he played 15.Nd5! [In case of the more passive 17.♗xg4 17...hxg4 18.O-O-O ♗f5 19.♗g5 ♖xh1 20.♖xh1 the position already doesn't look better for Black, but after 20...a5!? I think I would clearly choose to be Black here.]

17...♗f5 [To be greedy would be a bad decision now: 17...♗xb3 18.axb3 ♖xb3 19.♗d1 ♖b6 20.♖a4! The white rook is joining the game from a4, which brings a lot of trouble to Black.]

18.♗xg4 White needs to act quickly too. To let the bishop h4 get exchanged is not an option.

18...hxg4 19.♖g5 We have quite a strange position with both

kings still uncastled.

19...e6 A nice move at first sight, but it might have been a mistake. [I think the right way for Black to go on was 19...♘h4 20.♙xh4 ♙xh4 21.♙xh4 The pawn on g4 can't be saved, but Black clearly has compensation for it. 21...a5! Typical play against the b2 pawn. 22.♙xg4 ♔f8 I think it is hard to say who is better here, as Black's threat of playing a4 next is very powerful and after 23.♙a4 ♙a6 Qd3 or b5 are coming next. The position seems unclear to me.]

20.♙xg4! A strong move in quite a complicated position. [20.dxe6 doesn't give White any advantage since after 20...fxe6 21.♙g6+ ♔f8! the black king feels perfectly safe on f8.]

20...♙f6 Black is going for the h4 bishop.

21.dxe6! A perfect sacrifice in a position, where it is not easy at all to see that White will have enough for the piece. [21.g3 would lead to an unclear position since after 21...O-O-O Black definitely has compensation for the pawn.]

21...♘h4 22.O-O-O It might be that this was all White's preparation... It is hard to say, but in any case it is great play by the Russian. Black has a lot of moves now, White is having no concrete threat, but the two pawns and Black's open king give White strong compensation for the piece.

22...♙xf2! A very strong move which was not easy to make at all. Black is not only taking a pawn which is never wrong, but he also wants to play Qf5 next, which is a very important move in many lines.

23.♙xd6?! doesn't seem to be the best possible continuation of the attack... [23.exf7+ looked more promising for White. 23...♙xf7 (23...♙f8 didn't work because of 24.g3 ♙f5 25.♙xh4!) 24.♙hf1 Now the king's position on f7 is very dangerous. 24...♙e3+ 25.♙b1 ♙e6 26.♙b4 I think White's attack should give him some advantage here.]

23...♙d8?! Not a bad move, but not the best either... [It seems like Black could equalize the game after 23...♙f5! 24.exf7+ A difficult move to find... 24...♙f8! 25.♙xf5 (25.♙b4 25...♙e7 and Black is winning.) 25...♘xf5 26.♙xh8+ ♙xh8 27.♙b6 And we are in an endgame which would probably end in a draw.]

24.♙xd8+ ♙xd8 Once again White is in a position with a huge choice of moves...

25.♘d2! Motylev handles everything perfectly well. The threat of playing Ne4 can be deadly in many lines and at the same time the knight on d2 is protecting the white king from checks and Rf1 is also a threat now.

25...♙e3 is probably also the only move for Black.

26.exf7+ Actually this move is strong in case Motylev calculated all the complications correctly, which he didn't, otherwise a move like 26.g3 could have given White safer play.

26...♖xf7 27.♔f1+ ♕f6 Black was defending well and we should not forget that in case White doesn't find anything concrete then Black is going to remain a piece up with a better position.

28.♔d7+? A huge mistake which costs White the game when the win was so close... [

28.♔e4! 28...♔xe4 (28...♔g5 29.♔xb7+ White already has 3 pawns for the piece and the attack, which gives him a clear advantage.) 29.♖xe4 ♖h6 30.g3 ♖g2 I guess until here things were easy to calculate, but now Motylev missed the amazing

31.♖d2!! The trick is that the black knight on g2 doesn't have

any squares and the white king is capturing it. A rare thing! 31...♖e7 32.♔xf6 ♔xf6 33.♖xf6 ♖xf6 34.♖e2 followed by Kf2 with a winning pawn endgame for White.]

28...♔e7 Now somehow all the black pieces are protecting each other and the young Frenchman is taking over the game.

29.♔d3 Another inaccuracy... [29.♔g4 Keeping the black king on f7 for some time would give White good chances to escape.]

29...♖g7 30.♖e4 ♕e5 White doesn't have any more threats left, which is a very bad sign. All Black needs to do now is to bring his knight back from h4.

31.♔e2 ♖g6 Of course...

32.g3 What else, it is not an option to let Black play Nf4...

32...♔e8! A good move. The pressure on the e-file is very dangerous now for White.

33.♔g4

33...♔e6! A strong decision, not letting White any chances.

34.♔h5 After this move the game is basically over. [34.♔xe6 was a tougher defence, but after 34...♔xe6 35.♖c2 I think Black should still have very good winning chances in the endgame.]

34...♔xa2 And the game is over...

35.♘c5 The blunder of the rook makes no difference anymore.

35...♔a1+ It is a really big pity for White to lose the way it happened, but in fact White only had one moment where very creative thinking combined with exact calculation could lead to victory. Chess is a cruel game! :) **0-1**

(2) Svidler, Peter(2751)
- **Gelfand, Boris(2753) [D81]**

Gelfand-Svidler Rapid 2014(5),
2014.07.23

GM Arkadij Naiditsch
Best rating: 2737

In a very interesting rapid match out of 8 games Svidler managed to defeat Gelfand with a score of 5-3 but as we will see in the current game, Gelfand also had his moments in the match. After the opening, the position quickly became very sharp and then Gelfand completely crushed the defence lines of the 7-times Russian Champion with very active and powerful play.

1.c4 g6 The move order does not really matter for the current game, soon we will be in the Gruenfeld.

2.d4 ♘f6 3.♘c3 d5 Gelfand continues with his favourite opening for the past years, with which he was very successful in the match against Anand for the WC title. The Gruenfeld has also been the main opening of Svidler for at least the last 10 years. The strange thing in chess is that sometimes it is really hard to play against your own main repertoire...

4.♔b3 is not the main move, but it is of course nothing new either.

4...dxc4 As usual Black immediately starts his play against the white center.

5.♔xc4 ♕e6 6.♔b5+ ♕d7 7.♔b3 [To take the pawn is very dangerous for White: 7.♔xb7 7...♘c6! The pawn on d4 is hanging, which gives Black enough time to get great play. 8.e3 ♖b8 9.♔a6 ♘b4 10.♔e2 c5! Such positions are very usual for the Gruenfeld... Who cares about pawns when all the black

pieces will be in the game. White's position is already very dangerous.]

7...c5! Of course this is still theory, but it is a great move anyway. Black doesn't waste any time and is looking for active play.

8.d5 [8.dxc5 is the other possible move which leads to more or less equal play.]

8...b5! Another strong move by Black. Of course in case White has enough time to play e4 and develop the pieces to castle kingside, Black's position would be pretty poor.

9.xb5 10.a5+ 10.c3 a6 A move with multiple ideas. Of course the simple Rb8 can be strong, especially with the idea of Bg7 and putting pressure on the b2 pawn, but we will also soon see the other move which Gelfand had in mind.

11.f3 White is preparing the e4 push. [In case of 11.e4 it seems like Black has the strong 11...c4! The black knight wants to take a great position on c5. 12. a3 It is dangerous for White to keep the queens on. (12. xc4 12... b4 and Black's play is very dangerous again.) 12... xa3 13.bxa3 c5 14.e5 g4 with big complications.]

11...c4 This was the second idea behind 10...Na6. For White it is usually too dangerous to take the pawn on c4 and the black

knight is getting the excellent c5 square.

12. d1 [12. xc4 didn't work: 12... b4 Nc2 is a heavy threat. 13. b3 b8 Nd2 is the next threat. which gives Black clearly more than just compensation for the 2 pawns.]

12...e6!? Black continues playing very dynamically. Of course a move like 12... Bg7 was possible, but maybe after 13.e4 White could keep some advantage. Right now the game is getting totally messy.

13.e4 Playing 13.dxe6 is not an option because of 13...Bxe6 followed by Rd8.

13...exd5 14.e5? And this looks like a clear miscalculation by Svidler... [To a very unclear position would lead 14.exd5 and now Black has a lot of different ways to continue, maybe even 14...0-0-0 could be an option! 14... c5 15. xc4 O-O 16. e2 ab8 Black is 2 pawns down, but the white king is still in the center. It is really hard to say who is better here. Maybe White is able to keep things together, but it might also be that Black is doing perfectly fine here. A very interesting position...]

14...d4! This is the move that Svidler clearly underestimated. What to do now for White?!

15.exf6 [Not better is 15. xd4 15... b4 and White has no good defence against Nc2 next. 16. d1 xe5+ with a mating

attack for Black.]

15...dxc3 We have a funny position. Many of the black pieces are out, while ALL of White's pieces are still placed on their starting positions! This just can't go well!

16.bxc3 How to mate the white king now?

16...O-O-O!? Oh yes, Gelfand in on a rush! Black also had other nice moves like 16...Bc5 or just 16...Nc5, but clearly 16...O-O-O looks like the most beautiful move!

17.♔d2 It is hard for White to find a better defence.

17...♕a4 Before starting the final attack, Black is putting the white queen on a very passive position on c1 and at the same time opening the d-file for the rook.

18.♖c1 [18.♖e2 18...♖e8 and the game is over.]

18...♖e5+ Once again Black picks the best move. Before playing Nc5 Gelfand is putting his queen on the best central square possible.

19.♕e2 Trying to escape with the king to f1 to avoid getting mated immediately...

19...♖c5 What a domination of the black pieces!

20.♖f1 It is clear that Black has "almost" won the game, but still White is sort of fighting. His idea could be to play Nh3-Nf2.

20...♖d3! The last important move of the game. Usually the exchange of pieces is not the best way in case of an attack, but this time it is a perfectly correct decision. The bishop on e2 holds things together and the black rook will take a great position on d2, while the bishop from f8 is going to c5.

21.♕xd3 ♖xd3 22.♖e2 [22.♖e1 22...♖f5 with similar ideas as in the game.]

22...♕c5 Black's pressure will soon explode into a nice mating net around the white king.

23.♖g3 ♖hd8 The last black piece is in the game, just fantastic!

24.♖e1 Svidler tries to exchange queens...

24...♕e3 But of course there is no escape from Black's attack!

25.♕xe3 ♖xe3 It was just too much for Peter... Now at 26.Qf2 the simple 26...Qxc3 is winning. What a powerful game by Boris Gelfand, who is already a chess oldtimer and one of the few players who is able to keep a great chess level with over 40. **0-1**

(3) So, Wesley(2744) - Jobava, Baadur(2713) [A40]

ACP Golden Classic 2014(6.3),
2014.07.18

GM Csaba Balogh
Best rating: 2672

Wesley So is improving very quickly. He is convincingly winning one tournament after another and he already has a live rating of 2755. We examine one of his victories from his latest success in the ACP Golden Classics Bergamo.

1.d4 e6 2.c4 b6 Jobava is known for his creative style and he often likes choosing unusual openings. So was very well prepared even for this line.

3.e4 The most direct way to fight for the initiative is to occupy the center.

3...♟b7 4.♟d3 ♟b4+ [4...f5 and; 4...♞c6 with the idea of Nb4 are the main alternatives for Black.]

5.♞f1!? This is already a very rare move, which was played instantly by So. Positionally it is perfectly principled, because White has a space advantage and therefore keeps all pieces on the board. Black cannot make use of the temporary weakness of the king on f1 due to the closed structure and White will execute a kind of artificial castling with g3-Kg2 soon.

5...♟e7 Black had to retreat the bishop to finish the development and avoid getting it trapped.

6.♞c3 d6 7.♞f3 White develops all his pieces to their most natural squares and enjoys a longterm space advantage. White keeps the game locked against any kind of freeing breaks, c5 is met by d5, d5 is met by cxd5 exd5 e5 and e5 is met by d5.

7...♞f6 8.g3 It is time to connect the rooks. The king will stand safely on g2 as Black has no chance to open the a8-h1 diagonal for his bishop.

8...O-O 9.♞g2 ♞bd7 10.♞e2 c5 It was time to gain some space, Black had no more useful developing moves.

11.d5 It is not much fun to stand like this, especially for such an active player like Jobava. He often employs the Benoni, where both of his bishops are standing better on g7 and on c8.

11...♞e8 12.♞d1 ♟f8

13.dxe6!? A committing decision. White changes the structure for another kind of superior formation. [13.♞c2+= leaving the pin and keeping the structure was also good enough for an advantage.]

13...fxe6 Black would like to have control over the d5 square,

but he remains with a backward pawn on d6 against which White focuses all his pieces in the next moves. The capture on e6 was well timed by Wesley, because after fxe6, both rooks and the bishop would have been better placed on f8 and e7. [13...Rxe6 14.Ke2+ and Nd5 next also looks quite good for White.]

14.♟c2! White opens the d-file for the attack against the d6 pawn and also intends to disturb his opponent with the annoying Ba4 move, pinning the black pieces.

14...a6 [14...d5? would be tempting to use the pin on the e-file, but unfortunately for Black, White is not forced to take on d5, but rather plays 15.e5!]

15.♟f4 ♖c7 16.♞d2! The tension is growing. White would like to provoke the e5 move, after which Black ends up with a horrible structure, lacking any counterplay, only passive pieces and a hole on d5.

16...♞e5! This is the only chance. Creating doubled pawns on e5 is not necessarily good for White, since if Black could install a piece on d4 afterwards, that might end up badly for him.

17.♞ad1 ♟c6?! Black would like to get counterplay with b5, but he misses a positional idea...

[17...♞f7 should have been played, followed by Bc6, Qb7 and

if White allows it, b5. But White is still better, for instance after 18.♟a4 ♞ed8 19.♞g5 ♞xg5 20.♟xg5+ with f3 next, followed by Bf4 back and e5.; The handy 17...♞ad8? did not work in view of 18.♞xe5 dxe5 19.♞xd8 ♞xd8 20.♟xe5!+- winning a pawn.]

18.♟xe5! dxe5 19.♟a4! A very strong positional decision! After trading the strong light squared bishop, the doubled e-pawns become rather weak and what is more important is that Black ends up with his poor bishop on f8. The queen is forced to protect the e5 weakness, therefore to initiate exchanges along the d-file is not an easy task.

19...♟xa4 [The tactical justification of the manoeuvre was that 19...♞xe4? is met by 20.♟xc6 ♞xc3 21.bxc3 ♖xc6 22.♞g1! ± This is the point and White jumps to e5 with his knight. Black is lost positionally. 22...e4 23.♞e5+-]

20.♞xa4 b5?! Jobava did not want to suffer in a passive position and tries to create counterplay on the queenside, but White is well prepared for it. [20...♟e7 should have been played to support the exchanges on the d-file. 21.♞c3 ♞ad8 22.♞xd8 ♞xd8 23.♞xd8+ ♟xd8 I guess Jobava did not like this option because of 24.♞d1!? creating the threat of Nxe5 and also to play Qa4 next move, but Black has a defence: 24...♞d7! (24...♟e7 25.♞a4± provokes a5, which seems to be too much for Black, giving up even the b5 square.; 24...♞d7 has a nice refutation: 25.♞a4 ♖b7 26.♞xe5! ♞xe5 (26...b5 27.♞d1+-) 27.♞e8#)]

21.cxb5! So calculates well and accepts the sacrifice.

21...axb5 22.♞xb5 Black was hoping for something against the a4 knight and the e4 pawn is also hanging, but nothing seems to work...

22...c4 A very tricky attempt to trap the queen with Ra5!

Reb8 is another threat to win the a4 knight. However White had expected this move before capturing the b5 pawn and found the refutation beforehand. [22...♖eb8 23.♔c4 and the e6 pawn is hanging with check after Rb4.; 22...♗xe4 simply runs into 23.♖e2! ♗d6 (23...♗f6 24.♗xe5+--) 24.♔xc5! ♔b7 25.♔b6! preserving the extra pawn and the superior pieces.]

23.♖c2! As simple as that! White attacks the c4 pawn and also leaves from the Nxe4 tempo. Both Ra5 and Reb8 are met by Qxc4 and all pieces are recovered! [23.♗c3? 23...♖a5; 23.♗b6? 23...♖ab8]

23...♖ec8 24.b3 White attacks the c4 pawn once more and finally frees his queen from protecting the a4 knight. He is also threatening to play Qxe5 now. [24.♖dc1+-- was also winning.]

24...♔b8 is kind of admitting that Black got outplayed. Jobava tries to search some practical chances in the endgame, but converting the extra material should not cause any problems for White. [24...♖a5 would have been met by 25.♔b6! and White preserves his material advantage.]

25.♔xb8 ♖axb8 26.bxc4 ♗xe4 27.♗xe5 White ended up with two extra pawns. Despite the fact that those are slightly isolated from each other, White is able to save both of them.

27...♖b4 28.♗b2 ♗c5 29.f4 White naturally would like to stabilize his excellent knight on e5.

29...♗e7 30.♗bd3 Simplifying the position and exchanging the blockader of the c-passed pawn.

30...♖a4 31.♗xc5 ♖xc5 32.♖b1 The rook also invades along the b-file. The rest is very easy.

32...♖c8 33.c5! White advances his c-pawn by using the weakness of the back rank.

33...g5 34.c6 ♗d6 [34...gxf4 for instance loses to 35.c7 ♗d6

36.♖b8! ♖xb8 37.cxb8=♔+ ♗xb8 38.♖c8+ ♔g7 39.♖xb8 ♖xa2+ 40.♔h3 fxg3 41.hxg3+-- The extra piece decides the game.]

35.♗d7! gxf4 36.♗b6 f3+ 37.♔f2 Black resigned. So managed to catch Black in the opening and Jobava could not use his creative style in the passive position. **1-0**

(4) Adams, Michael(2743) - Baramidze, David(2616) [C95]

42nd GM 2014(7.4),
2014.07.20

GM Csaba Balogh
Best rating: 2672

In my opinion, Adams played great chess, but was unlucky to be on -1 before the last round. In the last round he was able to come back to 50

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.O-O ♙e7 6.♖e1 Baramidze only plays the Breyer variation from the Ruy Lopez main lines, therefore Adams does not avoid the Marshall Gambit with the recently popular 6.d3, but goes for the old main lines.

6...b5 7.♙b3 d6 8.c3 O-O 9.h3 The initial position of the classical Ruy Lopez. Black has a wide choice of playable options here, all with thousands of games in it.

9...♞b8 This is the Breyer variation. Black transfers his knight to the more healthy square on d7 in order to be able to occupy the center with c5.

10.d4 ♞bd7 11.♞bd2 ♙b7 12.♙c2 ♖e8 White also has numerous setups here. Adams goes for the old main line and executes the standard Ruy Lopez manoeuvre of driving his

knight to g3. Another plan involves actions on the other side with a4 and Bd3, when the d2 knight might sometimes be used on the queenside.

13.♞f1 ♙f8 14.♞g3 g6 Another crossroads has been reached. Recently it was more common to play 15.b3 here, but a few days earlier Ponomarev easily reached a winning position against Baramidze with the old main move and Adams decided to repeat it...

15.a4

15...c5 This is the standard reaction to a4. Black wants to take twice on d4 followed by some d5 break, therefore White is forced to lock the center with d5. But then Black has c4 with the idea of Nc5 and the undermining plans of b3 are already not dangerous, because White cannot take back on b3 with the pawn. Without the a4 move, Black would rather have played Bg7 or c6.

16.d5 White not only gains a space advantage with this move, but also restricts the mobility of the b7 bishop.

16...c4 17.♙g5 A multipurpose move. White creates a pin and intends to sometimes trade the bishops with Qd2 and Bh6, after which the king might face a dangerous attack if White gets his queen to h6 and the knight jumps to g5. As a prophylaxis, Black often plays h6, but this is a weakening of

the kingside.

17...h6 [Two days earlier Baramidze tried the following sideline: 17...♖b8 18.♙d2 ♘c8 Black tries to improve his bad bishop by transferring it to d7. Our main game shows well what happens if Black leaves it on b7... 19.axb5 axb5 20.♖a7 ♗c5 21.♖ea1 ♘g7

22.♘e3 White had an advantage, but Baramidze blundered with his next move: 22...♖e7? 23.♘xc5! dxc5 24.♖xe7 ♙xe7 25.♙g5! and the e5 pawn is lost. Despite this, Black miraculously survived this hopeless position... Ponomariov-Baramidze, Dortmund 2014.]

18.♘e3 ♗c5 The old school said that Black should not be afraid of creating doubled pawns on c5, because it leaves White with his bad bishop on c2 and Black might get a very strong one on the missing diagonal with h5-Bh6. However the computers forced us to reconsider this option...

19.♙d2 First White develops his queen with tempo and forces another weakening.

19...h5 20.♘xc5!? This is a move that would never come to the mind to an old generation GM, but the new computer style shows that the weakness of the black queenside pawns will play a more important role than lacking the strong bishop. [20.♘g5 was the main move, which was played in hundreds of

games and Black replied with 20...♘e7 followed by Nfd7 with mutual chances.]

20...dxc5

21.♖eb1! A very nice follow-up of the previous move. White prepares to open the queenside with b3 after which the b5 pawn becomes a real target.

21...♗d7? Black wants to consolidate his situation on the queenside by driving the knight to b6, but this is too slow and it does not work properly because of some subtle ideas... [In my opinion, Black should have played 21...♖b8 with the idea to transfer the bishop to c8-d7, which was not possible immediately because of axb5 and Black is pinned. 22.♗f1!? looks very interesting. After giving up the dark squared bishop, White should forget about giving mate and focus his pieces on the queenside. (22.b3 22...cxb3 23.♘xb3 has concrete problems, as Black could answer with 23...h4! 24.♗xh4 ♗xe4 25.♗e4 ♙xh4 and the trade of a flank pawn against the strong central one should favor Black.) 22...♘c8 23.♗e3 ♘d7 24.♙e2 ♘h6 White should be better, but it is unclear how White should make progress.]

22.b3! ♗b6 The consequent continuation, but Black misses the next move. [Objectively it was better to play 22...cxb3 although White is better after 23.♖xb3 b4 (23...c4 24.♖b2+=

White quickly puts pressure on the b5 pawn.)

24.a5!+= This was the key move of Adams's plan. He not only separates the b4 pawn by preventing a5-Ba6, but also prepares to settle his own bishop on a4 from where it is going to confuse the coordination between the black pieces.]

23.♖e2! Another subtle move, which creates real problems for the b5 pawn. The idea is simple, White wants to take on c4 and he leaves from the Nxc4 tempo, therefore the b5 pawn is going to hang. Black is in deep trouble, he has no good way to solve the problems on the queenside...

23...cxb3 24.♙xb3 c4 [On 24...♞d7 25.c4! is very important positionally. 25...♞xa4 (25...b4 drops an exchange after 26.a5 and Ba4.) 26.♙xa4 bxa4 The two knights and the superior pawn structure will dominate the two bishops. 27.♞d2± with

the ideas of Qa5 and Ne2-c3-a4.; 24...b4 is also bad because of 25.a5! ♞d7 26.♙a4±]

25.♙d1! This is very deep again. Adams keeps the second rank opened to not waste any time on putting pressure on the b5 weakness.

25...♙c8 Black realized that the pawn is lost and he starts to improve his pieces, hoping for longterm compensation. [25...♞d7 would have strongly been met by 26.♞b2! winning a pawn.]

26.axb5 a5 27.♞d2! The new target is on c4! White focuses all his pieces on that pawn.

27...♞c7 28.♞gf1! Bringing another piece to attack the weakness.

28...♙d7 29.♞e3 ♞ec8 Black seems to control the situation around the c4 square and hopes to create his counterplay on the dark squares, but Adams finds a subtle plan again to increase the pressure.

30.♞f3! White frees the e2 square for the bishop, after which the c4 pawn is hanging again.

30...a4 [Saving the pawn by giving up the dark squared bishop (the last hope) should come into consideration: 30...♙h6 31.♙e2 ♙xe3 32.♞xe3+- White has an extra pawn

and his pieces are better. He might improve his position by doubling his rooks on the a-file, forcing the a4 move and then drive one of his rooks to b4, after which the c4 pawn falls.]

31. ♖e2 Another pawn is lost. Black does not have enough compensation, the game is gone.

31... ♖a5 32. ♘dxc4 ♘xc4 [32... ♖xb5 had a nice tactical refutation.

33. d6! ♘xd6 (33... ♖c6 34. ♖xb5 ♖xb5 35. ♘xb6 ♖xb6 36. ♘c4+- wins. This is the main point of the 33.d6 move!) 34. ♖xb5 (34. ♖f6+- is also winning.) 34... ♘xb5 35. ♘xd6 ♘xe2 36. ♖f6! The game is over because the rook is hanging, but the main threat is the mate after Nef5! 36... ♖d8 37. ♘ef5 gxf5 38. ♘xf5+-]

33. ♘xc4 This is already the second extra pawn. The blockade on the dark squares is not a real hope for Black. The rest is only a matter of technique.

33... ♖e8 Black strengthens his f7 pawn to parry the d6 threat.

34. b6 ♖d6 35. ♘d3 White frees the c4 square for his knight.

35... ♖ac5 36. ♘c2 ♖xc3 37. ♘xa4 ♘xa4 38. b7! A strong intermediate move to avoid any kind of counterplay. [38. ♖xa4 38... ♖c1+ 39. ♖xc1 ♖xc1+ 40. ♖h2 ♖xb6 41. ♖a8+- is also winning, but the text is much better as White preserves

his b-pawn.]

38... ♖b8 39. ♖xa4 ♖c7 40. ♖a7 ♖g7 The time trouble is also over. There is no more hope for Black. Adams finds a pretty way to finish the game...

41. ♖h2 Avoiding all kinds of check on c1.

41... ♘e7 42. ♖a8 ♖xb7

43. ♘f5+! [Black resigned in view of 43. ♘f5+ 43... gxf5 44. ♖xh5! and Black cannot neutralize the 8th rank. 44... ♘d8 45. ♖xb7 ♖xb7 46. ♖xd8+- A well-deserved win for Adams, who outplayed his opponents in some other games too, but spoiled the wins in time trouble.] **1-0**

Endgame section

(15) Gunina, Valentina(2501)
- Kosintseva, Tatiana(2476)

European Woman Championship,
2014.07.16

GM Csaba Balogh
Best rating: 2672

This was the endgame between the European Champion Valentina Gunina and the silver medalist Tatiana Kosintseva. The material is balanced, but we can quickly realize that Black is facing serious difficulties due to the c7 passed pawn and the strong pair of bishops. White has a direct threat as well, he wants to make use of the pin and push e5!

44...♘a6! A clever decision. Black tries to escape into an opposite colored bishop endgame, but this required very good evaluation of the arising endgame. [Trying to bring the king closer with 44...♙d7? drops a piece after 45.♙xc5! dxc5 46.♙a6+-; 44...f6 with the idea of preventing e5 does not really reach its aim, because White can anyway push 45.e5! fxe5 46.fxe5 ♖e6 47.♙d4 Black is in trouble.]

45.♙xa6 White accepts the sacrifice and grabs the material with e5 next move. [Perhaps, if White had been aware of

the consequences, it would have given her more chances to keep both bishops on the board and play 45.♙a5!? 45...♘c5 46.♙b6 Black must suffer, but at least he managed to get out of the pin. The bishop was better placed on b4.]

45...♙xa6 46.e5 ♔d7 47.exd6 This is the critical position that both players had to evaluate. Of course those protected passed pawns on c7-d6 are extremely scary, but as we know in opposite colored bishop endgames, the defensive side might hope for salvation even in hopeless-looking positions. Black is safe on the kingside, he can cover all his pawns with his light squared bishop. The question is whether White is able to do something with his passed pawns or Black is able to create a blockade...

47...♙c4 To avoid any kind of zugzwang, Black must block the king's path with his own king. When White wants to invade on e7, he must put his king to d7, while if White tries on b7, he should stand on c8.

48.♙d4 ♙e6 49.♙e5 h5 Black keeps all his pawns on light squares to avoid getting them under attack.

50.h4 ♙f5 51.♙f6 ♙e8 [51...♙e6 52.♙c5 ♙e8 (To illustrate the possible zugzwangs, it might arise after 52...♙c8 53.♙e7 when Black is forced to give up his f7 pawn.)]

52.♟c3 ♟e6 53.♔g7 White cannot invade there, but why not try...

53...♟d7 54.♟f6 ♟e6 55.♟e7 ♟d7 56.♔f6 ♟e6 57.♔e5 Gunina admits that there is no chance to invade on the kingside, therefore she drives her king to the other side, but Black is able to set up a successful blockade there too.

57...♔d7 58.♔d4 ♔c6! This is the easiest and now White has no chance to break through.

59.♔e4 ♔d7 60.♔e5 ♔c6 61.♔f6 ♔d7 62.♔g7 ♔e8 63.♟f6 ♟d7 64.♟d4 ♟e6 65.♟c5 ♟d7 66.♟a3 ♟e6 67.♔f6 ♟f5 [67...♔d7 was another easy draw.]

68.♔e5 ♔d7 [A wrong defensive plan would be 68...♟c8 69.♔d5 ♔d7 70.♔c5 ♟a6 71.♔b6 ♟c8 The movement of the bishop and the king is limited, so White is able create a decisive zugzwang:

72.♟c5! White waits with bishop moves on a3-b4-c5 until Black loses all his tempi on the kingside. The c8 bishop cannot move, while after 72...♔e6 73.♔c6! wins, because Black finds himself in another zugzwang. 73...♟d7+ 74.♔b7+-]

69.♔d5 ♟e6+ 70.♔c5 ♟f5 71.♔b6

71...♔c8! and Black starts waiting with his bishop on the h3-c8 diagonal. The game is drawn.

72.♟b2 ♟g4 73.♔c6 ♟d7+ 74.♔d5! 1/2-1/2

**(16) Melkumyan, Hrant(2647)
- Sandipan, Chanda(2597)**

Najdorf Mem Open A 2014(8.6),
2014.07.19

GM Arkadij Naiditsch
Best rating: 2737

White was pushing all game long and finally this very promising rook endgame arose. Melkumyan is demonstrating very good technical skills from which we can take a good example on how to proceed in similar rook endgames.

31.a5! A strong move! In rook endgames with a passed pawn White should usually try to push the pawn as far as possible and get the rook behind the pawn.

31...♖d6 The only black rook move which makes sense. The pawn has to be stopped as soon as possible. [Black would lose immediately after 31...♗b3 32.♗e8+ ♕h7 33.a6 and there is no way to stop a7-a8.]

32.♗a1 Of course. Fixing the black rook on a very passive position on a6.

32...♗a6 33.♕f1! Another right decision. The white king should go in the direction of the passed pawn.

33...♕g8 Black also doesn't have anything better than bringing his king to the center.

34.♖e2 ♖f7 35.♖d3 ♖e6 36.♖c4

36...♖d7 Black is hoping to activate his rook by sacrificing the c5 pawn. [36...♖d6 wasn't better since after 37.♖b5 ♗a8 38.♗d1+! White is cutting off the black king from the queenside. 38...♖e6 39.a6 Black is not able to stop the white pawn because of Ra1-a7 next and in case of 39...♗b8+ 40.♖xc5 ♗xb2 41.♗a1 White is also easily winning.]

37.♖b5! A good decision. White does not care about the c-pawn and first puts the black rook into a very passive position. [37.♖xc5? would be a mistake since after 37...♖c8! followed by Rf6 the position is probably still winning, but White would now face technical problems.]

37...♗a8 [Black is not in time for 37...♗f6 because of 38.a6 followed by a7-a8]

38.a6 Precision until the end. The threat is now to play a7-Ka6.

38...c6+

39. ♖b6 Kb7 next is a deadly threat.

39...♜b8+ 40. ♖xc5 Finally White takes the c5 pawn in the best possible moment.

40...♖c7 41.a7 Fixing the black rook on a8.

41...♜a8 And here comes the last exact move:

42. ♜e1! The threat of Re7 is deadly. In case of 42...Kd7 White is winning with 43. Kb6 and of course the pawn endgame after 42...Rxa7 43.Re7 Kb8 44.Rxa7 Kxa7 and 45.Kxc6 is totally winning. It was an easily winning endgame for White, but it is still important to know how to convert the advantage. **1-0**

Editorial Preface

There are just a few days left until the beginning of the biggest chess event in the world, the 41st Chess Olympiad for men and women in Tromsø, Norway.

In the men's section it is going to be very hard to stop Russia from taking gold.

The first seed in the women's section are China, with Hou Yifan on board 1.

Meanwhile a few big opens came to an end:

The Politiken Cup 2014 was won by Bu Xiangzhi with an amazing score of 9/10. 2nd place was shared by some players on 8/10 and according to the tiebreak Jones Gawn came second, followed by Matlakov Maxim.

The 101st British Chess Championship 2014 had 2 winners, both with 8.5/11: David Howell and Jonathan Hawkins.

The huge open tournament in Pardubice was won convincingly by Nisipeanu with 7.5/9.

In the round robin in Lake Sevan 2014, Sjugirov took the lead with 3/4 followed by Santosh Vidit, Fedoseev and Melkumyan, all on 2.5/4.

We wish you a lot of fun watching the Chess Olympiad and of course to enjoy this week's issue of your weekly chess newsletter.

25th Czech Open A 2014(7.2),
2014.07.24

GM Arkadij Naiditsch
Best rating: 2737

We will see an easy win from the future tournament winner in a nice and dynamic manner. After the opening White managed to get some advantage and used a little mistake of Black to quickly get a promising position and convert it into a mating attack.

1.d4 d5 2.♘f3 ♘f6 3.c4 c6 4.e3 So we have a Slav with e3. Now Black has a couple of major lines, such as 4...Bg4 or 4...e6 or 4...a6.

4...♙f5 5.♘c3 e6 6.♘h4 Logical and of course nothing new. White wants to exchange the bishop in order to get a minimal advantage thanks to the bishop pair.

6...♙e4 Black is going for a forced line. [6...♙g6 is the other main line, which is more positional.]

7.f3 Of course White is consistent in hunting down the black bishop.

7...♙g6

8.♙b3 This move is also pretty standard. White develops his queen to a nice position on b3 and at the same time asks Black to put his queen on not such a great position.

8...♙c7 Of course this is still theory. From c7, the black queen is ready to create extra pressure on the h2 pawn which is now going to be under attack in case of Nxg6 and hxg6.

9.♙d2 ♙e7 10.g3 This move sort of has to be played anyway. White still does not hurry with taking on g6 and first tries to play all the prophylactical moves.

10...♙h5?! In my opinion this move is a clear mistake. The idea of saving the bishop is great, but now the black pawn is going to go to g5, which leaves the black king open and Black is also just losing a lot of time. [The normal 10...♘bd7 would lead us to a well-known position.]

11.♙e2! A simple and good move. White is defending from g5 and Bxf3 and at the same time maybe preparing to castle kingside, which is quite smart, since after Rc1 the black queen could be really misplaced on c7.

11...g5 Black does not feel the danger and continues with the wrong idea.

12.♘g2 ♕g6 13.O-O! A simple but strong move. White already has a lot of tactical ideas in mind.

13...♘bd7 It is hard to blame somebody for such a development move, but maybe after 13...Nbd7 Black's position is already very difficult. [13...h6 also didn't help much because White can anyway play 14.e4! dxe4 15.fxe4 ♘xe4 16.♘xe4 ♕xe4 17.♕h5 and White's attack is just crushing.]

14.cxd5! A very nice move! How to take back now?!

14...cxd5 It is not great at all to open the c-file, especially with the knight on d7, but on the other hand Black already didn't have anything better. [14...♘xd5 15.e4 just leads to a horrible position for Black.; And after 14...exd5 15.e4! we can see that cxd5 was an important move because of the double attack on f7. 15...dxe4 16.fxe4 and Black can't take on e4 because f7 is hanging, which gives White an almost winning position.]

15.♖ac1 Of course White is taking over the c-file.

15...♔b6 Black has no other move because of the Nb5 threat.

16.♔xb6 Usually in such situations White should keep the queens on the board to have better attacking chances, but in our concrete situation Nisipeanu makes the right choice.

16...axb6 Of course not a nice move to make, but Black didn't

have a choice. [16...♘xb6 wasn't any better since after 17.♘b5 Black has no good way of defending from the Nc7 threat. 17...♔f8 18.e4 and the whole black position is falling apart.]

17.e4! Another excellent move, White is doing much better in development so the point is to open the position as much as possible. [Of course 17.♘b5 was possible too, but after 17...O-O the white pawn on a2 is hanging, which makes White lose an extra tempo on a move like a3 and that would give Black chances to defend his position.]

17...h6 Black continues to "die slowly". [Maybe from a practical point of view a slightly better move was 17...dxe4 18.♕xg5 but here it is hard to find a good move for Black too. 18...exf3 19.♕xf3 O-O 20.♕xb7 ♖a5 would lead to a position with a pawn down for Black, but maybe some practical chances for a draw.]

18.exd5 A simple and strong move.

18...♘xd5 19.♘xd5 exd5 The black king is still on e8 and White can combine the ideas of Rc7 and moves like Ne3 or f4.

20.♖c7?! Quite a serious mistake which could lead to unclear play. [20.♘e3 would lead to a very big advantage: 20...♘f6 21.a3! with the idea of playing Rc3-Rfc1 next or Rc3-Rb3, attacking the b6 pawn. All black pieces are badly placed and

it is hard to imagine Black not losing any material during the next moves.]

20...♔d8 21.♖fc1 ♜b8? Haba misses his undeserved chance to come back into the game... [Black should have continued with 21...♙f6! 22.♖xb7 (The threat becomes visible after 22.♙e3 22...♞c5! and White is losing an exchange.) 22...♙xd4+ 23.♙e3 ♙xb2 The position looks really unclear now.]

22.♙b5 Now White is totally crushing the black defensive lines.

22...♞f8 23.♞e3 The d5 pawn is going to fall.

23...♙d6 Black has a little hope to at least get rid of the rook from c7 but Nisipeanu has a different plan than going back with it...

24.♞xd5! A pretty finishing move!

24...♙xc7

25.♙b4! White wants to mate the black king by playing Be7 next and Rxc7. There is no decent defence.

25...♞d7 26.♙e7+ A lot of moves are winning here already.

26...♔e8

27.♖e1 with the double threat of playing Nxc7 and Nf6.

27...f5 And indeed there is no more reason to play on here because of 28.Nxc7 Kf7 and 29.Bxd7, with a big material advantage for White plus a deadly attack. A nice game by White which shows pretty well how dangerous it is to play without development in a position where your center could become a target at anymoment. **1-0**

(2) Wojtaszek, Radoslaw(2733) - Harikrishna, Pentala(2726) [D85]

Hans Suri Mem 2014(9.2),
2014.07.23

GM Csaba Balogh
Best rating: 2672

After Black chose a bad line in the Gruenfeld, Wojtaszek nicely outplayed his opponent.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 4.cxd5 ♘xd5 5.e4 ♘xc3 6.bxc3 ♙g7

7.♙b5+!? A rare line with the idea to confuse the development of the black pieces. It clearly came as a surprise to Harikrishna and he wanted to avoid a theoretical battle and rather replied with a dubious sideline.

7...♘c6?! In the Gruenfeld defence White usually gets a strong center and Black should quickly set it under pressure. The most effective way to do it is the c7-c5 break, but now the black knight prevents this option. [The critical position arises after 7...c6 8.♙a4 O-O 9.♘e2 when Black has various setups, such as b5 followed by c5, or e5. In any case Black should attack the center with his own pawns.; If Black plays 7...♘d7 he must for get about the most effective way to attack

the d4 pawn with c5 and Nc6.; 7...♙d7 is met by 8.♙e2 and the bishop is slightly misplaced on d7.]

8.♘f3 [8.d5 is wrong because Black can unpin himself with 8...a6! (8...♙xc3+ is not as good since after 9.♙d2 White gets strong compensation. 9...♙xa1 10.♙xa1) 9.♙a4 b5 Black saved the piece and White only weakened his own structure.]

8...O-O 9.O-O ♙a5 Black refreshes the c5 idea, but this costs too much time, which allows White to consolidate his center and obtain an advantage.

10.♙f4 This strong novelty was played without thinking by Wojtaszek, clearly showing that he is still in his preparation as it was also the best move according to the machines. The bishop was developing before to e3 and g5, but on f4 it appears to be more useful.

10...♙d7

11.♙e2! A very logical retreat to keep the light squares under control. Now the knight is misplaced on a5, otherwise it could have jumped to c4.

11...c5 12.d5! If White is able to create this passed pawn without being afraid of some direct ideas, he should go for it. It will bring him benefits at the later stage of the game and also limits the movement of the black pieces.

12...♟g4 [12...♟xc3 was wrong in view of 13.♞c1 and the trade of the c-pawns would favor White as he is better prepared for the opening of the position, while protecting it with Bb4 and thus leaving the important long diagonal should not come into consideration.; However 12...e6 would have been more principled to undermine the center, although White has an clear advantage here as well. 13.♞d2 exd5 14.exd5+= followed by bringing the rooks to e1 and d1.]

13.e5! This is the reason why the bishop is standing better on f4. It supports the march of the center, which is getting stronger and stronger with each move. White must be careful with such decisions, because these pawns might quickly get under attack, but Wojtaszek calculates well that he will be able to consolidate.

13...♞d7 With the double threat of Rad8 and Qf5 after which Black wins the e5 pawn. [13...e6 14.h3 (14.d6 is also good.) 14...♟xf3 15.♟xf3 exd5 16.♟xd5 with a clear advantage.]

14.♞e1! The key move, which White had to see before advancing his e-pawn. This prevents the Qf5 idea as White could simply retreat to g3 with the bishop and after Bxf3 Bxf3 the e5 is protected! [14.h3 immediately was wrong in view of 14...♟xf3 15.♟xf3 ♞f5!]

14...♞ad8 [14...♞f5 15.♟g3±]

15.h3! Another important intermediate move to ensure the safety of the central pawns. The bishop does not find its place, White is threatening to trap it, while giving it up for the knight would help White to consolidate his center. [On the direct 15.c4 Black could have played 15...♟xf3 16.♟xf3 and 16...♞xc4]

15...♟f5 [15...♟xf3 16.♟xf3± Black stands without counterplay, the e5-d5 pawns are safe.]

16.c4 The right timing and now it becomes clear that White has won the opening battle as Black has no adequate counterplay against the center.

16...e6 17.♞d2 Developing with tempo.

17...b6 18.d6 [18.♞ad1 was also good to keep the tension. All the black attempts to strengthen the pressure are failing: 18...exd5 (18...♞a4 is met by 19.g4! ♟e4 20.♞g5! and the bishop gets into trouble. 20...♞xc4 (20...exd5 loses to 21.♞xe4 dxe4 22.♞xd8 ♞xd8 23.♞xd8+ ♟f8 24.♟h6+-) 21.♟xc4+- winning a piece.) 19.cxd5 ♟e4 20.d6±]

18...♟e4! Black was rightly afraid of some Bf1 and g4 ideas, trapping the bishop, therefore he transfers it to the long diagonal.

19.♞g5 ♟b7 20.♞ad1 [20.♞ac1± was possible to avoid the 20... h6 option.]

20...♞h8 This is sort of admitting that things are going badly as it gives White a free move. [The only chance would have been 20...h6 21.♞f3 ♟xf3 22.♟xf3 ♞xc4 23.♞c1 b5! and at least Black has an extra pawn, although the compensation is more than enough after 24.h4 (24.♟xh6? does not work because of 24...♞xe5! and Black takes on f3 with check.)

24...♔h7 25.h5 g5 26.♕h2 followed by Be4 and f4 with a very strong attack, but at least Black is materially ahead.]

21. ♖e3 ♘c6

22. ♘f3! Preventing the Nd4 move and now all black pieces are doomed to passivity, while White has many different ways to increase his advantage, for instance he can start to advance his h-pawn. It is instructive to see the effect of having space advantage!

22...♘b4 23. ♖d2 ♖a4 Trying to obtain some counterplay, but White has many resources to push Black back.

24. ♕d1 Preventing the Nc2 threat with tempo.

24...♖a6 After the black queen has gone to the queenside, Wojtaszek suddenly focuses his pieces to a final attack.

25. ♕g5! ♖d7 26. ♕f6! Trading the dark squared bishops significantly weakens the black king. White is threatening to win on the spot with Qh6!

26...♕xf6 [26...♔g8 could be met by 27. ♘h2!? ♖xc4 28. ♘g4 Black gets mated. For instance after 28...♘d5

29. ♖h6! is pretty! 29...♕xf6 (29...♘xf6 30. ♘xf6+-) 30. ♘h6#; 26...♖xc4 loses to 27. ♖h6! ♖g8 28. ♘g5+-]

27. exf6 ♕xf3 Otherwise Qh6 followed by Ng5 is coming with mate.

28. ♕xf3 ♖c8 Black would like to drive his knight to d4, which could finally give him some counterplay.

29. ♖e4?! White misses the direct win. [On 29. ♖h6 Black could still save himself with 29...♖g8 30. ♖e4 ♖f8; However 29. ♖g5!! was winning. Black is helpless against the following mating attack: 29...♖g8 30. ♖e4! ♖f8 31. ♖h4 Black has no counterplay and the threat is simply Rh6, Qh4 and Rxh7. Black can only watch until White executes this plan. 31...♖xd6 always loses to 32. ♖xd6 ♖xd6 33. ♖xh7+ ♔xh7 34. ♖h4#]

29...♖g8 30. a3 ♘a6

31.♘d1! Having more space allows more manoeuvres with the pieces. White transfers the bishop to a4, from where it prevents the Nc6-d4 counterplay and also supports the d-pawn.

31...♖b8 32.♘a4 ♜dd8 33.g4!? White has time to do whatever he wants. Wojtaszek wants to strengthen his f6 pawn, after which a rook transfer to h4 will be decisive.

33...♞a6 [33...♘d7 34.g5+-; 33...g5 cannot be played because White is changing the diagonal again: 34.♘c2! ♜g6 35.♞e3! ♜xf6 36.♞xg5 ♘d7 37.♞h4 h6 38.f4+- and g5 next wins.]

34.♞c2 White does not even give up his a-pawn.

34...♞b7 Trying to get the knight again to d4.

35.♞c3! This subtle move lays a hidden a trap and Black falls into it.

35...♘c6? Black was happy to finally get his knight out to d4, but this turns out to be the final mistake. [35...♘d7 36.g5+- was also quite hopeless.]

36.♘xc6 ♞xc6

37.♜xe6! This was the point of allowing Nc6. White wins material.

37...♜gf8 [37...fxe6 loses to 38.f7+ ♜g7 39.♞f6 (Or 39.d7 39...h6 40.♞f6 ♞a8 41.f8=♞+ ♜xf8 42.d8=♞+-) 39...♜f8 40.d7+-]

38.♞e5! The rook is still untouchable, therefore White overprotects his d6 pawn and is ready to invade with Re7.

38...♞f3 [38...fxe6 39.f7#]

39.♞e3 ♞c6 [39...♞xe3 40.♜xe3+- The endgame is also hopeless. Re7 is coming next.]

40.♜e7 ♜d7 [Black resigned in view of the upcoming mate: 40...♜d7 41.♞h6 ♜g8 42.♜e8+- and Qg7 next.; 40...♜xd6 would not change anything: 41.♞h6 ♜g8 (41...♜xf6 42.♞xf8#) 42.♜xf7+-] **1-0**

Best rating: 2737

We are going to see a very fighting and interesting game. Early in the opening White is trying a piece sacrifice, when actually it is very hard to say if he really has enough compensation for it. But...the French board 4 does not manage to find the best moves and quickly finds himself under a heavy attack which ends with a material win for White.

1.e4 e6 Over the years, the French defence finds less and less fans on the top level.

2.d4 d5 3.♘c3 ♘f6 4.e5 [The other main move for White is 4.♙g5 but now usually Black is playing 4...dxe4 5.♘xe4 ♘bd7 One of the biggest experts in this line is Meier Georg.]

4...♘fd7 5.f4 c5 6.♘f3 ♘c6 7.♙e3 From a logical point of view this line looks really dangerous for Black, as White captured the center and the black bishop on c8 is badly placed. The only black advantages are the play against the d4 square and the very solid pawn structure.

7...♙e7 is one of the main lines. [The very forced line starting with 7...cxd4 8.♘xd4 ♙b6 9.♙d2 ♙xb2 10.♙b1 is just very dangerous for Black as the latest games have shown.; And the current line seems to give White a clear advantage: 7...♙b6 8.♘a4 ♙a5+ 9.c3 c4 10.b4]

8.♙d2 O-O Here White has a choice between different options. The main question is whether to castle king- or queenside.

9.dxc5 Negi goes for the most aggressive continuation.

9...♘xc5 10.O-O-O ♙c7 This is al so a theoretical move. I think this line looks really strange for Black. What is the black queen doing on c7?! To play f6 is never a threat and White is going to start a strong attack on the kingside very soon.

11.♙b1 A good prophylactical move.

11...a6 12.♙e1 White is transferring the queen to the kingside, which is very logical, but why not over the f2 square?! [12.♙f2 Now Black would probably continue with 12...b6! followed by f6! next and the white queen will be badly placed on f2.]

12...b5 What can be more logical than the idea of playing b4 next.

13.♙xc5 White wants to develop the bishop to d3, but it is such a pity to give up the bishop for it. [13.f5!? was leading to very interesting complications: 13...♘xe5 14.♙g3 with very unclear play, but it seems like White is not risking much.]

13...♙xc5 14.♙d3 Maybe White wants to play Bxh7 next, or maybe a move like f5.

14...♙e7 Defending from the direct threats, but sort of a bit too passive play. [I think 14...f6 looks more natural as now that White does not have the black squared bishop anymore, the f6 move is getting more powerful. 15.♙h4 h6 16.♙h5 White

wants to play Qg6. 16...♘b4 and the position is very unclear.]

15.f5!? Negi is starting a direct attack on the black king. The only advantage of this is that White is never risking to lose because of the perpetual check which White can give during the next couple of moves.

15...b4 the only move for Black

16.f6! Of course this move is the key of all white attempts.

16...gxf6 [16...bxc3?? was losing on the spot: 17.♙xh7+ ♔xh7 18.♚h4+ ♔g8 19.♘g5 and White is mating.]

17.♚g3+ [White could make a draw by playing 17.♙xh7+ 17...♔xh7 18.♚h4+ ♔g7 19.♚g4+]

17...♔h8 18.♚h3 The game is becoming very sharp and it is obvious that White is not too happy with a draw.

18...f5 19.♙xf5! Of course this move is not too difficult to find, but it is a nice one anyway. [A move like 19.g4?? leads to nothing for White because after 19...bxc3 20.gxf5 exf5 Black is just a piece up.]

19...exf5 20.♘xd5 So far things were very forced, but now Black needs to take a decision about where to put the queen. Of course it should be the 7th rank to be able just in case to be able to play f6 at some point, but whether to play Qb7 or Qa7 is a difficult question.

20...♚b7! This is probably the right choice and it was probably made by intuition. The black queen will have more options from b7 than from a7 in the future.

21.♘f6?! Once again White is clearly playing for a win, but is it not too much to wish for?! [To a drawish endgame would lead 21.♚h6 21...♔g8 and now comes the difference compared to 21.Nf6: 22.♘xe7 ♚xe7 23.♚xc6 White has won back the piece, but after 23...♙b7 the active black pieces probably give Black enough for equality.]

21...♙xf6 22.exf6 It is really hard to evaluate such a position without going into deep calculations. For now White wants to play Ng5 and for some time it is going to be his only threat.

22...♔g8 23.♚h5 White keeps the idea of playing Ng5 and also the idea of playing h4 and Ng5 next.

23...♙e6

24.♔d3!? An interesting slowplay of the attack, but Black is a full piece up!! [24.♘g5 24...♔xg5 25.♚xg5 ♔g8 and Black is much better.; 24.h4 also didn't work because of 24...♙xa2+!! and now Black is already the one who has a direct attack on the king. 25.♔a1 (25.♔xa2 25...b3+ 26.♔a1 bxc2 and White is just lost.) 25...♔g6 26.♘g5 h6 and here things also look very badly for White.]

24...♖c7?! In a complicated position Black makes a mistake. [To move the bishop away from e6 is very important to avoid the trick with h4 and Ng5, as the bishop is hanging on e6 in many lines. 24...♗c4! 25.♖d2 (25.h4 doesn't work because of 25...♗g6 26.♗g5 h6) 25...♖b5 followed by f4 and I think Black should be better here.]

25.h4 Now we can see why it was so important not to have a bishop on e6.

25...♗g6 only defense from Ng5

26.♗g5 ♗xa2+ The only move. [26...h6 was losing to 27.♗xe6]

27.♖xa2 h6 What a crazy position. The material on the board is totally even and both kings' positions are open. It is very hard to say who is better here...

28.♖hd1 White is threatening to play Rd7 next.

28...♗e5?! Once again Black doesn't pick the best move. [The right move was 28...♖g8! which is of course not so easy to find. 29.♖d7 b3+! The position is very forced again. 30.cxb3 ♖a5+ 31.♖b1 hxg5 It seems like Black is on top, but here comes

32.♖xf7!! ♖xf7 33.hxg5 and once again we are back into a total mess. Black is probably not risking much to lose here,

but it is hard to say if Black really has more than a draw.]

29.♖d6 A good move. [After 29.♖e3 29...♖g8 and the silent 30.♖b1 the position of course remains very complicated but it seems like slowly White is taking over.]

29...♖f8 Taking under control the f7 pawn. [After 29...♖c8 White has the very strong 30.♖a1! (30.♗xf7+ of course didn't work immediately because 30...♖xf7+ comes with check.)]

30.♖b1 ♖c8 31.♖1d2 A solid move, but as well as in previous lines 31.Ka1 would also be good.

31...♖g8 After this move it is all over, but could Black still save the game?! [Maybe 31...♖e8 could be a try, but now White also has the very strong 32.♖e2! The idea becomes clear after 32...♖xd6 33.♗xf7+ ♗xf7 34.♖xg6! with a totally winning position for White. But such moves are really hard to find during a practical game.]

32.♖d1! A very nice finishing move. Black can't keep the control over the 8th rank.

32...hxg5 33.♖d8+ Now everything is forced...

33...♖h7 34.♖xc8 ♖xc8 35.♖d8 ♖xd8 Black didn't have a choice. [35...♖c6 was losing to 36.♖h5+ ♖h6 37.♖h8+ ♖xh8 38.♖xh6+ ♖g8 39.♖g7#]

36.♖xd8 After all the excitement White ended up in a totally

winning position with a queen up.

36...gxh4

37. ♔e7 The last exact move. Black has a choice between losing the f7 pawn or the knight on e5 and both mean losing the game. A great win by Negi who dealt perfectly well with the complications and a lot of nice tactical motifs. It would also be very interesting to know whether this could all be Negi's preparation?! **1-0**

(4) Matlakov, Maxim(2685) - Timman, Jan H(2610) [A20]

Politiken Cup 2014(9.3),
2014.07.28

GM Csaba Balogh
Best rating: 2672

After a long theoretical battle, White leads a very nice mating attack...

1.c4 e5 2.g3 ♘f6 3.♗g2 d5 4.cxd5 ♘xd5 5.♘c3 ♘b6 6.♘f3 ♘c6 7.O-O

7...♗e7 We are at the very beginning of the English opening. Recently it is getting more and more popular. The point is to play a Sicilian opening with reversed colors, where White has an extra tempo. We are actually in the Sicilian Dragon now, but instead of the very sharp lines with opposite side castling, Black plays the more solid Be2, 0-0 system. White has a wide choice here, the young Russian GM chooses one of the main lines.

8.a3 O-O 9.b4 ♖e8 This is the standard idea also in the Sicilian. Black would like to strengthen his e5 pawn with Bf8, followed by Bg4 and Nd4. [However, probably because of the game's continuation, it is more popular on the highest level to

continue with 9...♗e6 10.♖b1 (Now on 10.b5 10...♘d4 11.♘xe5? ♗b3! 12.♖e1 ♘c2 wins.) 10...f6 with hundreds of games.]

10.b5!? White grabs the central pawn. It is actually a rare line, but it looks very dangerous to me. [10.d3 10...♗f8 is more common, again with hundreds of games.]

10...♘d4 11.♘xe5 ♗f6 12.f4! The right decision! White gives back the material advantage, but gets the pair of bishops instead. [Otherwise the compensation becomes too strong, for instance after 12.♘f3? 12...♘xe2+! works. 13.♘xe2 ♗xa1--+]]

12...♗xe5 13.fxe5 ♖xe5 At sight things are going badly for White because the b5 pawn is under attack and there is an even bigger threat to develop with tempo, Bg4, followed by Qe7 and Re8, putting very big pressure on the backward e2 pawn. White is basically forced to continue with another sacrifice...

14.e3! ♘xb5 15.♘xb5 ♖xb5 Black is already a pawn up, but the rook on b5 is misplaced and the position has opened up, so the power of the two bishops might become real.

16.a4 We are still following some games. White would like to strengthen the pressure on the h1-a8 diagonal by advancing the a-pawn with tempo to a6. [The machine actually suggests an interesting alternative, which I like even

more than the game: 16.♔c2!? followed by Bb2, with longterm compensation. In my opinion this position is much easier to play with White.]

16...♖a5 Quite an unusual middlegame and the task of the rook on a5 is to block the pawn. [It seems to be better to play 16...♗f5! aiming for simplifications. (16.Qc2 also prevents this idea.) 17.♗xf5 (On 17.a5 17...♗xf1+ 18.♔xf1 ♘d5 followed by Be6. Black successfully closes the h1-a8 diagonal. White still has strong compensation, but the trade of the rooks favors the defensive side to realize his extra pawn in the future.) 17...♕xf5 18.a5 (White could restore the material balance with 18.♕xb7 but then the black pieces become too active: 18...♖b8 19.♕g2 ♘c4 It is better to keep the initiative than letting the pieces out...) 18...♘c4 (18...♘d5 could now be met by 19.♔b3!) 19.♔b3 ♘d6 Black seems to consolidate. The point is that after 20.a6 b6! 21.♕xa8 ♔xa8 suddenly it is Black who has very strong pressure on the h1-a8 diagonal.]

17.♔b3 ♕e6 18.♔b4 White wants to advance his a-pawn at any cost.

18...♘c4? Timman wants to keep his blockader on a5, but after the next move it gets completely out of the game. Black was ready to give back his b7 pawn for active piece play after Rb8, but White has a much better choice.

[18...♖h5! should have been played to escape with the rook and if White continues his plan with 19.a5 ♘c4 20.♔xb7 ♕d5 21.♕xd5 ♖xd5 Black is fine. We can notice that the right defensive strategy always consists of giving back the pawn for some other kind of benefit. Either getting the pieces quickly activated or trading the strong g2 bishop.]

19.♗f4! This was probably missed by Timman. White is threatening to take on c4. Black has only one move to avoid losing material, but it is extremely ugly.

19...c5 A sad necessity. Black can go away with his knight next move as he protected his a5 rook, but now it turns out to be even more misplaced on a5 because it cannot come back into the game along the 5th rank.

20.♔c3 ♘d6 21.♕b2 The bishops start to work!

21...f6

22.g4! Principled and strong! White needs open the a1-h8 diagonal to launch a mating attack. It is not easy to deal with the g5 threat.

22...♘e8 Timman tries to cover the g7 square. [22...h6 just delays the faith, as White plays 23.h4!; On 22...♘f7 White

again plays 23.h4! refreshing the g5 threat. 23...h6 24.♖af1 Preparing for sacrifices on f6. For instance after 24...c4 25.♖xf6! gxf6 26.♖xf6 Black gets mated on the long diagonal: 26...♘e5 27.♖xe6+–; If Black prevents g5 with 22...c4 he suddenly gets into trouble after 23.♖d4! Creating a deadly pin. Rxd6 is threatening to win a piece because the a5 falls and if it goes away along the 5th rank then Qb4 or Ba3 decides the game, while Ra6 moves into Bxb7.]

23.g5! White happily sacrifices a pawn just to open the diagonal.

23...f5 [On 23...fxg5 White simply retreats. 24.♖f2 Ra6 is coming with the mate threat on f8. Black cannot prevent it with Qe7, because the a5 rook is also under attack. There is no adequate defence for him. A possible finish could be 24...c4 25.♖af1 ♘f6 26.♖xf6! gxf6 27.♖xf6+– again with a mate on the long diagonal.]

24.♖e5! White does not give Black any time to consolidate. He is always punishing his opponent with the most direct moves.

24...♖d6

25.♖xf5!! Black collapses after this exchange sacrifice. White gets rid of the important defender on e6 and brings new pieces to the attack with the other rook to f1 and the g2

bishop, which might go to d5 or e4.

25...♙xf5 [25...♖xe5 is also hopeless. 26.♖xe5 ♙b3 White has several wins here. One of them is 27.♖a3 ♙xa4 28.♙c3 ♖a6 29.♙xb7+– and the two bishops are too strong.]

26.♖xf5 [It was actually even stronger to give an intermediate check 26.♙d5+! 26...♙h8 (26...♙f8 cannot lead to anything good after 27.♖xf5+ ♙e7 28.♙c3 ♖a6 29.♙xb7+–) 27.♖xf5 White is threatening with Qf7 and mate on g8, because the knight is obliged to defend the g7 square. 27...c4 28.♖f1! the new attacker is coming with tempo. Qf8 is threatening and after 28...♘c7 29.♖f7!+– wins.]

26...♖e7? This is a blunder, but Black's situation was already very difficult. [26...♘c7 was the last chance, but White gets a decisive advantage after some energetic moves: 27.♙e5 ♖e7 (27...♖e6 loses to 28.♖xe6+ ♘xe6 29.♙c3! ♖a6 30.♙xb7+– This motif is coming back in many lines.) 28.♙e4! g6 29.♖f6! ♖xf6 30.gxf6 and Black loses material. The knight is hanging and the other threat is the usual Bc3 Ra6 Bxb7. 30...♘e6 31.♙c3 ♖a6 32.♙xb7+–]

27.♙e4 The game is over, Black gets mated. [27.♙d5+!? 27...♙h8 28.♙e4!+– was also winning on the spot.]

27...c4 [27...g6 28.♙d5+–]

28.♖xh7+ ♙f7 29.♖f1+ ♙e6 30.♖h3+ ♙d6 31.♙a3+! ♖c5 32.♙xc5+ ♙xc5 33.♖f5+ [Black resigned in view of 33.♖f5+ 33...♙d6 34.♖d5+ ♙c7 35.♖xb7+– A very nice game by Matlakov! It was instructive to see the work of the bishop pair, but the misplacement of the a5 rook played another important role in the success.] **1-0**

Endgame section

(15) **Giri, A.(2750)**
- **Vachier-Lagrave, M.(2766)**

Biel, 2014.07.23

GM Csaba Balogh
Best rating: 2672

The material will be balanced after White takes back the g4 pawn, but the active pieces - especially the rook on the 7th rank - allow White to continue fight for an advantage.

33. ♖xg4 h6 The knight had to be stabilized on g5 to avoid getting mated on h7.

34. ♘d7!! A very subtle line-closing move, with the idea of preventing the black rook to get activated along the d-file. An additional point is to threaten with Ne5! [34.h4 was tempting, but Black survives after 34... ♖d4+! and the king is forced to move into 35. ♖g3 ♘e4+! 36. ♘xe4 ♖xe4 37. ♖a7 ♖xc4 38. ♖xa5= with an obvious draw.]

34... ♘f7! The best defence! Black not only defends against Ne5, but also creates the threat of the little combo Rxd7 Rxd7 and Ne5 checks the rook.

35. ♖f4 White still enjoys the more active pieces and also his king is closer to the battle field. In case of the exchanges of some pieces, this might play a very important role!

35...g5+! The most stubborn defence again! Black pushes back the king to the 3rd rank, in view of all active moves running into some tactical motifs. Ke4 and Kf5 blunders Nd6, while Kg4 loses to Rxd7.

36. ♖e3 The most logical reply, to get the king closer to the vulnerable queenside. [Knowing what could have happened in the game, it made sense to try 36. ♖g3!? 36... ♘d6 37. ♖c7! (37. ♖b8 now is less strong because after 37... ♖xb8 38. ♘xb8 c5 39. ♘d7 ♘xc4 40. ♘xc5 ♖g7= in comparison to the game, the white king is very far from the a-pawn.)]

36... ♘d6? Black was under big pressure in the entire game, therefore he also got into timetrouble. Vachier-Lagrave plays the most natural move again and attacks the c4 pawn with tempo, but this time it turns out to be the decisive mistake. [Black should have activated his rook with 36... ♖e8+! 37. ♖d3 ♖e1 (37... ♘e5+ is a mistake because 38. ♘xe5 ♖xe5 39. ♖c7± looks very suspicious from Black's point of view as his king is terribly placed and cutted into the corner.)]

37. ♖b8! A surprising simplification, but a deeper look proves that it is extremely logical since Black cannot save his queenside pawns because his king is too far from the action.

37... ♜xb8 38. ♘xb8 ♙xc4+ 39. ♔d4 White is temporarily down a pawn, but now his moment is coming.

39... ♗b6 40. ♘xc6 a4 41. ♕c5 ♘c8 42. ♖b4 ♗b6 43. ♕c5 White just repeats once, of course he does not want to make a draw.

43... ♗c8 44. ♖b4 ♗b6 45. ♖b5! ♗d5 46. ♖xa4 ♖g7 Black finally has some time to bring his king closer, but it is too late. The a-pawn decides the game. [Going for the pawns was also slow. White wins easily after 46... ♗e3 47. ♖b5 ♗xg2 48. a4 ♗f4 49. a5 Black cannot sacrifice his knight for the a-pawn. 49... ♗d5 (49... ♗e6 is met by 50. ♖b6!+- and a6 next, the pawn promotes.) 50. ♕c5 ♗c7 51. ♖b6 ♗d5+ 52. ♖b7+- and the pawn is unstoppable.]

47. ♗b4 ♗e3 48. ♖b5 ♖f7 49. a4 ♖e6 50. a5 ♖d7 51. a6 ♖c8 [51... ♖c7 loses in the same way as the game: 52. ♖c5!+- and Nd5 next.]

52. ♖c5! A very nice final move! After other moves Black could have fought on. [Black resigned in view of the following lines: 52. ♖c5! White is threatening with Nd5, sending away the well-placed knight from e3. 52... ♖b8 (On 52... ♗xg2 White can already play 53. ♖b6 ♖b8 54. a7+ ♖a8 55. ♗d5+-) 53. ♗d5! ♗xg2 54. ♖b6+-; 52. ♖c6?! 52... ♖b8 53. ♗d5 ♗c4 Black could still have hoped...; 52. ♖b6?! 52... ♗c4+ was less clear.]

1-0

(16) Jones, Gawain C B(2665)
- Bu, Xiangzhi(2693)

Politiken Cup 2014(9.1),
2014.07.28

GM Arkadij Naiditsch
Best rating: 2737

We are in a very interesting opposite colored bishop endgame. Usually these endgames with a pawn down are drawish, but here Black has the a-pawn plus the chance of creating a passed pawn on the h-file, which could be very dangerous for White

40.f4 Jones is trying to solve the problems in a tactical way and it might be the right decision although it doesn't work. [In this line we can see Black's threat in case White would put his pawn on c6 and the bishop to d7: 40.♖e8 40...g5 41.c6 ♜b6 42.♜d7+ ♖e5 43.♖c4 ♖f4 and there is no way to stop Black from playing Kg3 and Kxg2 followed by h3, with a winning position.; In case White would keep on waiting on the long diagonal with 40.♖c4 40...♖e5 41.♜b7 g5 42.♜c6 ♖f4 43.♜b7 ♖g3 44.♜d5 the last accurate move of Black is 44...f4 not falling for the following trick: 44...Kxg2 45. f5! and fxe5.]

40...♜e3 Of course Black is going for the f4 pawn.

41.♜e8 ♖f6 42.♖c6?! This move is definitely losing. [42.c6 was also losing by one tempo: 42...♜xf4 43.♖a6 g5 44.♖xa7 g4 45.♖b7 As we can see, things are very forced. (White is not in time to get back to e2 with his king. 45.♖a6 45...h3! Using the fact that White can't play Bc6. 46.gxh3 gxh3 47.c7 White needs to give up the c-pawn to be able to stop the h-pawn. 47...♜xc7 48.♜c6 ♖e5 49.♖b5 ♖d4 with an easy win for Black.) 45...♖g5 46.c7 ♜xc7 47.♖xc7 f4 48.♖d6 The white king is not in time to stop the black pawns. 48...f3 49.gxf3 gxf3 50.♖e5 f2 51.♜b5 h3 52.♖e4 h2 53.♖f3 h1=♚+]]

42...♜xf4 43.♖b7 g5 44.♖xa7 g4 We have a similar position as in the line above, just that White already had the pawn on c6.

45.♖b6 ♖e5 The black king is moving in the direction of the g2 pawn.

46.♖b5 ♖d4 Of course Black doesn't give White the chance to play Kc4-Kd3-Ke2.

47.♜d7 The last trick...

47...h3! Of course Black is not blundering anything.

48.gxh3 gxh3 49.♜c6 h2 50.♜h1 All Black needs to do now is to play Ke3 and f4-f5.

50...♜b8 51.♖c6 f4 White can't do anything against Ke3 and f3 next.

52.♖b7 ♖xc5 Of course 52...Be5 was winning too.

53.♖xb8 ♖d4 54.♖c7 ♖e3 55.♖d6 As we can see now, Black had a winning endgame from the beginning thanks to the bad position of the white king, as well as White's unlucky pawn structure, which allowed the black king to enter to g3 so easily.

55...f3 0-1

Clash of the Titans

(17) Petrosian, Tigran V

GM Kamil Miton
Best rating: 2655

1.d4 ♘f6 2.♘f3 g6 3.♗g5 ♗g7 4.♘bd2 This setup cannot give White any advantage.

4...d5 5.e3 O-O 6.♗d3 ♘bd7 7.c3

7...♞e8 Black decides to get an advantage in the center after play e5. The alternative was [7...c5 8.O-O b6 with the idea Bb7-Ne4 or Qc8-Ba6, exchanging the light squared bishops.]

8.♗f4 ♘h5 9.♗g5 ♘hf6 [9...h6 10.♗h4 g5 11.♘e5! is probably the way to get the initiative. (11.♘xg5 11...hxg5 12.♞xh5 gxh4 and there is no mate on h7.; 11.♗g3 11...♘xg3 12.hxg3 g4 13.♘e5 ♘xe5 14.dxe5 ♗xe5 15.♞xh6 ♗g7 16.♞h1 e5! The king on g8 is safe and Black has a strong center.) 11...♘xe5 12.dxe5 gxh4 13.♞xh5 c5 14.♘f3!]

10.♞b3 Developing the queen and delaying the e5 move a bit.

10...c6 [10...e5?! 11.♗xf6 ♗xf6 12.♞xd5 exd4 13.cxd4 ♘e5 (13...c5!?) 14.♗c4 ♘d3+ 15.♞f1 ♞xd5 16.♗xd5 ♘xb2 17.♞b1 ♘a4 18.♗xb7 ♗xb7 19.♞xb7 c5 With some chances for compensation, but objectively White is better.]

11.O-O e5

12.e4! It is time to play a bit more actively! White is fighting for the center.

12...exd4 13.cxd4 dxe4 [13...h6 14.♗xf6 (14.♗h4 14...g5 15.♘xg5 hxg5 16.♗xg5 ♞b6+) 14...♘xf6 15.e5 ♘h7∞It is not easy for White to improve the position on the kingside.]

14.♘xe4 ♞b6 [14...♞c7 looks more accurate. Black forces the exchanges of pieces, which is good for them. 15.♞fe1 (15.♘c3 15...♘b6; 15.♘e5 15...♘xe5 16.♘xf6+ ♗xf6 17.♗xf6 ♘g4+) 15...♘xe4 16.♗xe4 ♘f6 With equal play.]

15.♘d6! ♞e6 16.♘xc8 ♞xc8 By exchanging this bishop White stopped Black from controlling d5.

17.♗c4 Black cannot exchange the queens because of the a7 pawn.

17...♞e7 18.♞a3! Of course White needs the queens to be able to develop an initiative.

18...♖ee8

19.♕d2! A strong move. White creates the threats of Ba5 and Ng5.

19...♕f8 20.♖a4 ♖c7 [20...♖xb2 21.♖ab1 b5 22.♖xb2 bxa4 23.♖b7 With a strong initiative.]

21.♖b3 ♖b6 22.♕a5 White is fighting for the important d5 square.

22...♖e4 23.♖ac1 Preparing potential breaks over d5.

23...♖d6 24.♕d3 ♕g7

25.h4! ↑ A fantastic move. It looks like the black king is more or less safe but with this move White is creating pressure against the g6-f7 pawns.

25...♖cd8 26.h5 gxf5? Black should not destroy the structure around the king, but the position was already unpleasant. [Better was 26...♖h8 27.g3 with the idea Kg2-Rh1 and a huge initiative.]

27.♖c5 ♖e4 28.♖xh5 ♕xd4 These complications will not help Black... His position is lost because of his weak king.

29.♖h4 ♖c5 30.♕xh7+ ♖g7 31.♖b4 White's position is so good that even a queen sacrifice was enough to get an almost winning position. [31.♕xd4 31...♕xb3 32.♕f5+ ♖f6 (32...♖f8 33.♖g4) 33.axb3→]

31...♕f6 32.♖g4+ ♖f8 33.♕b4 ♖d5 34.♖h5 ♖d7

35.♖g8+?! [35.♖xd5 35...cxd5 36.♖d1 ♖c6 37.♖g8+ ♖e7 38.♖e1+ ♖e5 39.♕xe5+-]

35...♖e7 36.♖e1+ [36.♖xd5 36...cxd5 (36...♖xg8 37.♖xc5 ♕xc5 38.♕xc5+ ♖d8 39.♕xg8+-) 37.♖e1+ ♖e5 38.♕xc5+ ♖xc5 39.♕xe5 ♖xg8 40.♕d3+ ♖d6 41.♕xc5 ♖g7 42.♕xb7+ ♖c7 43.♕c5 ♖xh7 44.♕d3 White is only a pawn up here.]

36...♖e5 37.♖g3 ♖d8 38.♕xe5 ♖dx5?? What a blunder! [38...♕xe5 The rook on d5 should protect the knight on c5. 39.♖g4 a5→]

39.♖hx5 ♕xe5 40.♖h4+ ♖c8

41. ♕f5+?? Both players were probably in time trouble.
[41. ♕xc5 41... ♕h2+ 42. ♖f1+-]

41... ♖b8?? [Why not 41... ♗e6 and White only has a small plus thanks to the bishop pair.]

42. ♕xc51-0

Editorial Preface

The 41st Olympiad in Tromso is under way and as we are both playing here, we will come back with a detailed report in the next issue.

Today Arkadij beat Magnus Carlsen with the black pieces.

We hope you enjoy watching the Chess Olympiad and wish you a lot of fun with this week's issue of CEWN!

Arkadij Naiditsch & Csaba Balogh

(1) **Shirov, Alexei(2709)**
- **Sulskis, Sarunas(2544) [C57]**

41st Olympiad Open 2014(2.36),
2014.08.03

GM Csaba Balogh
Best rating: 2672

Shirov has managed to show again what he likes the most in chess and he won a great attacking game.

1.e4 e5 2.♘f3 ♘c6 3.♗c4 ♘f6 4.♘g5 A well known line, which leads to huge complications. The Italian opening starts with 4.d3 and it leads to more solid positions.

4...d5 5.exd5 ♘xd5? A brave decision! This practically invites White to sacrifice a piece for a huge attack. Of course, one should not ask Shirov twice to go for it... [The classic main line goes with 5...♘a5 6.♗b5+ c6 7.dxc6 bxc6 8.♗e2 h6 with an extra pawn for White, but his pieces end up a misplaced, which gives Black strong compensation for it.]

6.♘xf7! This sacrifice was played in more than thousand games. The king is forced to move into the center, where White can quickly develop an attack against it, based on the pin of the c4 bishop. On the other hand, Black takes a piece

and if he manages to consolidate he is going to win the game.

6...♔xf7 7.♗f3+ ♔e6 8.♘c3! Developing with tempo and putting further pressure on the main target on d5.

8...♘b4 We are still following hundreds of games. Black not only defends the d5, but also counterattacks the c2 pawn and intends to strengthen his d5 knight with c6!

How to continue with White? [The alternative is 8...♘e7 which is strongly met by 9.d4! opening the center. White intends to pin the other knight with Bg5, followed by queenside castling with a very dangerous attack.]

9.a3!! Another great sacrifice based on excellent intuitions. White gives his useless a1 rook for the d5 knight before Black could have played c6. This move is justified even materially, because White only gives an exchange, but the knight is going to be trapped on a1.

9...♘xc2+ Black has no choice, he must accept the gift.

10.♔d1 ♘xa1 11.♘d5! Creating is deadly pin and bringing a new attacker is more important than giving a check. [11.♗xd5+ 11...♔d7 followed by c6 and Kc7 is fine for Black. 12.♗g4+ ♔d6]

11...♔d6

12.d4!! Excellent and very principled play! White opens the center in front of the king. With this move he wants to bring his last two unemployed pieces to the game, the rook could quickly come to e1, while the bishop might appear on f4!

12...♟e6 Black tries to ensure a path for the king back to c8.

13.♞e1! White must lay the most energetic moves, otherwise his rook down is going to tell. [13.dxe5+? 13...♔d7]

13...b5 [Other moves lead to beautiful mates as well. For instance after 13...c6 14.♞xe5! cxd5 (14...♟xd5 15.♞xd5+ is the same as 14...cxd5.) 15.♞xd5+! ♟xd5 16.♞xd5+ And the queen cooperating with the bishop pair of bishops successfully haunts down the black king... 16...♔c7 17.♟f4+ ♟d6 (17...♔c8 loses to 18.♞f5+! ♞d7 19.♟e6+-; 17...♔b6 18.♞b5#) 18.♞c5+! ♔d7 19.♞xd6+ ♔e8 20.♞e6+ ♞e7 21.♟b5+ ♔d8 (21...♔f8 22.♟d6+-)]

22.♟g5! ♞xg5 23.♞d7# We can be sure, that Shirov would have finished the game like this if his opponent would have chosen 13...c6.; 13...♔d7 loses to the brilliant

14.♟b6+!! It is very important to keep the king in the center and not allow it to c8-b8.. 14...axb6 15.♟xe6+ ♔xe6 16.♞xe5+ ♔d7 17.♞f5+! All checks are based on preventing ♔c8 and meanwhile it is going to lead to mate. 17...♔c6 18.d5+ ♔b5 19.♞d3+- and mate is coming soon.]

14.♘b4! Another spectacular move, which leads to a technically won position. [However, it was even stronger to play 14.♞xe5!! 14...bxc4 15.♘f4! and Black is helpless against the threats... 15...♙f7 (15...♙d7 16.♘xe6 ♞f6 17.♞d5+ ♙d6 18.♘c5+ ♙d8 19.♞xa8#) 16.♞d5+! is the point! 16...♙xd5 17.♞xd5+ ♙e7 18.♞e6#]

14...bxc4 [On 14...♙xc4 15.♞xe5! is the most precise, Qc6 is threatening with mate 15...♞d7 16.♙f4+- is over.]

15.♞c6+ ♙e7 16.♙g5+ ♙f7 17.♙xd8 ♞xd8 18.♞xc7+ ♞d7 19.♞xe5+- Lets stop to count the material. Black has two bishops and a rook for the queen and two pawns, which could be unclear, but the right evaluation of the position is out of question, because the black pieces are undeveloped and misplaced...

19...♞d6 20.d5! But of course, Shirov continues playing the most straightforward moves to not give any breath to his opponent!

20...♙d7 21.♞f4+ [21.♞e4+- was also winning.]

21...♙g8 22.♞xc4 White eliminates the c4 pawn in order to trap the knight on a1, since it has lost its escaping square on b3.

22...a5 [22...♙a4+ 23.♙d2 ♘b3+ does not change anything.

The knight is still trapped after 24.♙c3 ♘a5 25.♞c7+-]

23.♘d3 a4 Trying to rescue the knight, but of course it is too slow.

24.♘c5 Threatening to send away to d6 rook with Nxd7, Ne4 or Nb7 and then d6 check is coming with mate.

24...h5 Trying to give some air to the king.

25.♘xd7 ♞xd7 26.d6+ ♙h7 27.♞e6! Total domination!

27...g6

[On 27...♘b3 the easiest is 28.♞xa4 ♘c5 29.♞c2+- winning the knight and the game.]

28.♞xg6! Finishing the game in style! [Black resigned in view of 28.♞xg6 28...♙xg6 29.♞e6+ ♙g5 (29...♙g7 30.♞xd7+-) 30.f4+! ♙xf4 31.g3+ ♙f3 (31...♙g5 32.h4#) 32.♞e2# Well, we must admit, that it is bit a risky to play such opening against Shirov or at least we should not be surprised to end up losing like this.] **1-0**

(2) Gelfand, Boris(2753) - Amonatov, Farrukh(2590) [E94]

41st Olympiad Open 2014(2.10),
2014.08.03

GM Csaba Balogh
Best rating: 2672

A fantastic game, which shows how important is the preparation in today's chess. Gelfand practically wins this game without making a single move by himself. The only difficult thing was to recall the home analysis.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♙g7 4.e4 d6 5.♘f3 O-O Amonatov is considered to be a King's Indian expert, but this time he chooses wrong line in it.

6.♙e2 e5 7.O-O exd4 This is already a bit dubious, the main line starts with 7...Nc6.

8.♘xd4 ♖e8 9.f3 c6 10.♙h1

10...♘h5 This concrete line was played recently by the biggest King's Indian experts, such as Radjabov, Grischuk and Topalov, but the latest development of the theory shows, that Black faces big problems here. Black is threatening with Qh4 followed by Ng3 or Qe5. Without knowing anything about this from the white side, this could be very dangerous. However Gelfand shows us all the details...

11.g4! ♘f6 12.♙f4 Black has been pushed back and White intends to put big pressure on the backward d6 pawn with Qd2 and Rad1. The only critical move was considered to be

12...h5 with the idea to make use of the g4 weakening and trying to change the structure to Black's favor.

13.♘f5!! This has already been played in several games and it seems to refute to entire idea of Black! Black is forced to accept the sacrifice, otherwise White simple takes on d6 with the knight, but then the attack on the open g-file appears to be crushing. [In the previous games, White mainly played 13.g5 13...♘h7 14.♙d2 ♘d7 with a very complicated game.]

13...gxf5 14.gxf5 d5 The most principled reaction. Against a flank attack, one must search counterplay and open the center! [Arkadij has commented the Shomoev-Ganguly game in a previous issue of our newsletter, which continued with 14...♘bd7 15.♖g1 ♙h8 16.♙e1 ♘e5 17.♙h4 and White won later with another brilliant mating attack.]

15.cxd5 cxd5 16.♖g1! This is the novelty and it seems to be crushing. [Last year, the Kasimdzhanov-Topalov game had seen the continuation of 16.e5 16...♙xf5 17.exf6 ♙xf6 18.♘xd5 ♙xb2 with a very complicated game, which later finished with a draw.]

16...♙h8 Leaving from the pin and the Bh6 direct threat. [The

alternative was 16...dxe4 which is strongly met by 17.♘xe4! Despite being able to trade queens, Black ends up in trouble in beautiful lines... 17...♚xd1 is objectively the best defense, but it also leads to difficult position. .. (17...♘xe4 18.fxe4 ♚xd1 19.♖axd1 White is still threatening with Bh6. 19...♙h8 seems to solve the problems, but here comes the unpleasant surprise.

20.f6! ♘xf6 21.♖d5! and suddenly Black misses his undeveloped pieces on the queenside to defend successfully. 21...♙g4 22.♙xg4 hxg4 23.♖xg4 ♙g7 The only way to avoid the Rh5 mate, but it also loses to 24.♖h5+ ♙g8 25.♖hg5+-; 17...♙xf5 18.♘d6 ♙g6 looks very good to close the g-file, but it also fails to save the game if White finds the following nice attacking moves: 19.♙c4! Pinning the king creates the threat of Rxc6. 19...♙h7 20.♙xf7! ♙xf7 21.♚c2+! ♙g8

22.♖xg7+!! There is no way back in such positions! On the

other hand it is also possible to find such moves by logic, because White must eliminate the main defender of the king, but of course calculation plays the most role in this phrase of the game... 22...♙xg7 23.♙h6+! ♙g8 (23...♙xh6 24.♘xf7+ ♙g7 25.♘xd8+-) 24.♖f5!+- and White is helpless against the mate with Qg5 or Rg1.) 18.♘xf6+ ♙h8 (After 18...♙f8 White uses the motif, what we had already seen in the 17...Nxe4 line 19.♘h7+! ♙g8 20.♖axd1 ♙xh7 21.f6! and the rook joins to the attack along the 5th rank. 21...♙xf6 22.♖d5 ♙g4 23.♙d3+ ♙h8 24.fxg4+-) 19.♖axd1 ♙xf6 20.♖d6! ♘d7 21.♙b5 White will end up with some extra material and he keeps on attacking.]

17.♖xg7!! Without the preparation it is an extremely difficult move to make, because White has to foresee the very deep 21st move!

17...♙xg7 18.♚g1+ ♙h8 It is important to keep the h7 square free for the knight against the Qg5-h6 threats, but it also has a drawback, that the king stands on a dark square in the perspective of the bishop. The next move points it out. .. [18...♙h7 19.♚g5+- is crushing as Black cannot play Nh7.]

19.♙g5! ♙xf5 Black is a 2 rook up and he tries to give back some material in order to quickly bring the a8 rook into the defense. I must admit, de Amonatov defends resourcefully, but this time it does not help. Other moves were also

losing: [On 19...♖g8 20.♘xd5 ♘xd5 21.♙xd8 ♖xg1+ 22.♖xg1 ♘c6 23.♙h4 and White wins back the piece and gets a winning position, because if the d5 knight moves it leads to even bigger problems... 23...♘f4 24.♙f6+ ♔h7 25.♖g7+ ♔h6 26.♖g8+- and mate on h8.; 19...♘bd7 20.♘xd5+-; 19...dxe4 20.♘d5! ♘bd7 21.♖d4!+- Beautiful cooperation of the white pieces. He focuses all the forces on the f6 knight and Black cannot keep it anymore and he collapses.]

20.♘xd5! [20.exf5 is too slow 20...♘bd7 and Black could continue resisting with Rc8-c6 or Rg8 next move.]

20...♘bd7 Black is still a rook up and he seems to consolidate finally, but the cold shower is just about to come:

21.♖d1!! A silent attacking move creates the deadly pin on the d-file. This destroys all the efforts of Black. It is interesting to mention, that I was speaking to another top GM about this game and he told me, that he also knew about the 21.Rd1!! winning move, but Gelfand was the lucky one, who could play it in the practical game. This is how the best players are prepared to the game and where the current computer chess stands at the moment.

21...♖g8 Black had nothing better, but he ends up materially down and his king remains exposed.

22.♘xf6 ♖xg5 23.♖xg5 ♖xf6 24.♖xh5+ ♔g7 [24...♙h7

25.♖xd7+- is also hopeless.]

25.exf5 White has two extra pawns and he continues attacking. The rest is matter of technique, Gelfand does not give any chance to his opponent.

25...♘b6 [Black could not even centralize his knight 25...♘e5 is met by 26.f4! and the knight does not have a good place to leave 26...♖c6+ 27.♔g1 ♖b6+ 28.♔f1 ♘c6 29.f6+- Black gets mated after Qh6 next move.]

26.♖g4+ ♔f8 27.♖b4+ ♖e7 28.♖c3! Spectacular!

28...f6 [28...♖xe2 loses to 29.♖e1!+- and Qh8 mates next move!]

29.♖g1 ♖c8 30.♖d2 Black resigned, there was no way to put up more resistance. **1-0**

**(3) Carlsen, Magnus(2877)
- Wojtaszek, Radoslaw(2735) [B26]**

41st Olympiad Open 2014(4.3),
2014.08.05

GM Kamil Miton
Best rating: 2655

1.e4 c5 2.♘c3 After the game Carlsen said he played the Closed Sicilian because Wojtaszek is a good active player and we will see it turned out to be a perfect decision.

2...d6 3.g3 ♘c6 4.♙g2 g6 5.d3 ♙g7 6.♙e3

6...e5 White also had two other options to develop: [6...e6 7.♙d2 ♘ge7 8.♘ge2 ♘d4 is very important, otherwise White will play d4! 9.♘c1 O-O 10.O-O ♖b8 11.♘d1 (11.f4 11...f5 A typical move which stops White from putting pressure on the kingside.) ; 6...♘f6 7.h3 O-O 8.♘ge2 ♖b8 A typical plan with the idea of looking for counterplay after opening the position on the queenside. 9.f4 Now 9... b5 is premature because of 10.e5! and White wins the piece so 9...♙d7 10.O-O b5 11.♙d2 with the idea g4-f5 and attacking the black king. The position is very complex.]

7.♘h3 An original idea, but this is not the best place for the knight. [7.♙d2 7...♘ge7 8.♘ge2 (8.h4 8...h5∞; 8.♙h6 8...O-O 9.h4 f6! There is a nice trap here: 10.h5?? ♙xh6 11.♙xh6 g5--+ with Kh8-Ng8 next.) 8...O-O 9.O-O ♘d4 10.f4∞]

7...♘ge7 8.f4 ♘d4 9.O-O O-O 10.♙d2 ♙d7 [10...b6 was possible as well. 11.♘d1 (11.f5 11...gxf5 12.exf5 ♙xf5!) 11...♙b7 12.c3 ♘dc6 13.f5 gxf5 14.exf5 f6 and Black gets counterplay in the center with d5 next move.]

11.♘d1 A typical idea. White is preparing the c3 move.

11...♙c8 12.♘df2 ♘dc6 13.c3

13...b5? A huge strategical mistake! After this move Carlsen slowly starts to kill Black's position! It was necessary to stop White from activating the knight from h3 too easily. [13...b6! 14.♖ad1 gives more or less equal play where both sides need to play some waiting moves.]

14.fxe5! Because the pawn on c5 is hanging Black needs to recapture on e5 with a piece, but then White gets the advantage in the center and the f4 square for the knight.

14...♞xe5

15.♙h6! A good move which weakens the black king and we will later see how strong White's pressure gets over the dark squares.

15...♞7c6?! I don't like this move which doesn't prevent d4 anyway and Black only loses the control over the d5 square. [15...♙d8 16.♙xg7 ♞xg7 17.♞f4 ♙b6 18.♞ad1 ♞ac8 19.♙e2 (19.b3 19...b4! Black avoids d4 or exchanging the queens.; 19.d4 19...cxd4 20.cxd4 ♞c4 21.♙e2 b4 22.b3 ♞a3 with the idea Rc2 and Bb5. Black is on time!) 19...b4]]

16.♙xg7 ♞xg7 17.♞f4 ♙d8 18.♞ad1 White is preparing d4.

18...♞c8

19.♙e2! A nice move which prevents Nc4 with tempo and Ng4 as well in case White will push d4.

19...h5 Black was forced to weaken his position even more. [19...♙b6 20.♞d5± and d4 next.]

20.d4 cxd4 21.cxd4 ♞g4 22.h3 ♞xf2 23.♙xf2 White has a better center and the weak black king gives White a decisive initiative.

23...♞e7

24.♞d3! A good place for the rook to be connected to the attack.

24...b4 25.♞f3 ♙e8 [25...♙g8 26.g4 hxg4 27.hxg4 ♙xg4 28.♞g3 ♙d7 29.♙h3 ♙xh3 30.♞xh3 ♙g4+ 31.♙h1 with a decisive attack.]

26.g4! +— White opens another file. Black is lost.

26...hxg4 27.hxg4 ♙b5 [27...♙xg4 28.♞g3 ♙d7 29.♙h3 f5 30.exf5 ♙xf5 (30...gxf5 31.♙g2+—) 31.♞xg6+—]

28.♞e1 ♙d8 29.g5 ♙b6 It is too late for counterplay here.

30. ♖h3 ♜cd8

31. ♖e6! Now White has additional threats with the sacrifice on f7.

31... ♖e8 32. ♖d5 ♜xd5 33. ♖xd5 Black is not able to do nothing, White will mate over the f- or h-file. 1-0

1.d4 ♘f6 2.c4 e6 3. ♘f3 d5 4. ♘c3 ♘bd7 5. ♖f4 dxc4 6.e3 [6.e4 6... ♖b4 7. ♖c2 b5=+]]

6... ♖d6 [6... ♘b6 7. ♖xc4 ♘xc4 8. ♖a4+ ♖d7 9. ♖xc4 ♖d6 10. ♖g3+= White has a better center.]

7. ♖xd6 [7. ♖xc4 7... ♖xf4 8.exf4 O-O 9.O-O White could try to get some advantage here after for example Qe2-Rad1-Ne5 etc but on the other hand White's structure is a bit destroyed and it is not easy to make some break in the center like d5 or f5.]

7...cxd6 8. ♖xc4 a6 [8...b6 9.O-O (9. ♘b5 9... ♘b8 10. ♖b3 a6 11. ♖a3 ♖e7) 9... ♖b7 10.d5 e5 11. ♖c1 a6 12.a4 O-O White is slightly better thanks to more space and the limited bishop on b7.]

9.a4! Fighting for space! [9.e4 9...b5 10. ♖d3 ♖b7 11.a3 O-O! 12.O-O! ♖c8 13. ♖c1 ♖b6 Black is very solid and the counterplay over b4 will come soon.]

9...d5 10.♟d3 b6 11.O-O O-O 12.♞b3 [12.e4 12...dxe4 13.♟xe4 ♟b7 14.♟d6 ♟d5 and Black controls the d5 square.]

12...♞e7 [12...♞c7 13.♞fc1 ♞b8 14.♞c2 ♟b7 15.♞ac1 ♞c8 16.♞b4+=]

13.♞ac1 We have a symmetrical structure where White keeps a little advantage thanks to three factors: the weakness on b6, a better bishop and a potential initiative over the dark squares.

13...♟b7 14.♞c2 ♞fc8 15.♞fc1 The problem in Black's position is the fact that it is not easy to double the rooks on the c-file because of White's tactical ideas.

15...♞d6 doesn't help preventing the Ne5 move. [15...♞c7 16.♟e5 ♟xe5 (16...♞ac8 17.♟xd7 ♟xd7 18.♟xa6 ♞xc3 19.♞xc3 ♞xc3 20.♞xc3 ♟xa6 21.♞c7±) 17.dxe5 ♟d7

18.♟xh7+! ♟h8! Black saved the position, but it was hard to see this variation. (18...♟xh7 19.♟xd5 ♟xd5 20.♞d3+ ♟g8 21.♞xc7 ♞g5 22.e4 ♟c5 23.♞1xc5 bxc5 24.exd5 ♞xe5 25.d6 ♞e1+ 26.♞f1 ♞d2 27.♞xc5 ♞xd6 28.♞c1±) 19.♟e2 ♞c4! 20.♟d3 ♟c5 21.♟xc4 ♟xb3 22.♟xb3 It looks like White

controls the situation very well even without the queen, but Black gets some play now. 22...♞b4 23.♟d4 f6±24.f4∞; 15...♟e4 16.♟xe4 dxe4 17.♟d2 f5 18.♟c4± Xb6]

16.♟e5! ♟xe5 [16...♞c7 17.♟xf7! Another tactical trick. 17...♟xf7 18.♟b5 axb5 19.♞xc7 bxa4 20.♞c2 ♟a6 (20...♞a7 21.♟b5+-) 21.♞xa4 ♟b7 22.♞b3 ♟a6 23.♟xa6 ♞xa6 24.h3+= (24.♞b7? 24...♞c6!+-)]

17.dxe5 ♞xe5 18.♞xb6 ♞cb8

19.♟e2! A good move which activates the rooks and improves the knight.

19...♟d7 [19...d4 20.♞xd4 ♞g5 21.♟g3 ♞d8 22.♞c4 ♞ac8 23.♞xc8 ♟xc8 24.♞xc8 ♞f8 25.♟xa6±]

20.♞d4 In general Black's structure looks good but the problem is the pieces, which are very limited.

20...♞d6 [20...♞xd4 21.♟xd4 ♞c8 (21...♟e5 22.♟e2+=) 22.♞c7 ♞ab8 23.a5 and White keeps a stable advantage.]

21.f4! White wants to save the important d4 square. [21.♖c7 21...e5 22.♙h4 ♘f6 23.♘g3 ♜c8!⇒(23...g6? 24.♘f5 gxf5 25.♙xf5 with a decisive attack.)]

21...e5 [21...♜c8 22.♜xc8+ ♜xc8 23.♜xc8+ ♙xc8 24.b4+= White is slightly better thanks to the distant passed pawn and the control over the dark squares.]

22.fxe5 ♞xe5 23.♙f4

23...♙e7?! This very passive move gives White the opportunity to come on the 7th rank with tempo. It is hard to say why Kramnik didn't want to play [23...♜e8 looks very natural. 24.♜c7 ♜ab8 25.♘d4 g6 26.b4↑; 23...♜c8 This move was the best, but here Kramnik probably missed 24.♙f5 (24.♘d4 24...♜xc2 25.♜xc2 ♜e8∞) 24...g6 25.♜xc8+ ♙xc8 26.♜xc8+ ♙g7!= this great idea!]

24.♜c7 ♙e8 25.♙f5 ♘c4 [25...♙c6 26.♘d4 ♙xa4 27.♙e6 ♙d7 28.♙xd7 ♘xd7 29.♘f5+- White has too many pieces in the attack.]

26.♙d7 ♙f8 [26...♙xe3+ 27.♙xe3 ♘xe3 28.♘d4 Kramnik probably didn't want to get this position where his pieces have no moves at all! 28...♘c4 29.♘c6 is winning by force. 29...♙xc6 30.♙xc6 ♜c8 31.♜xc8+ ♜xc8 32.♙xd5 ♘b6 33.♜xc8+ ♘xc8 34.♙b7 ♘b6 35.a5 ♘c4 36.b4+-]

27.b3 ♘b6 28.♙f5 d4

The last hope to activate the pieces!

29.♜xf7! Not the only move, but still nice! [29.♘xd4 29...♘d5 30.♙h4 g6 31.♘e6+-]

29...♙xf7 [29...♙xf7 30.♙xh7+ ♙f8 31.♙d6+ ♙e7 32.♜f1+-]

30.♙xh7+ Black will get mated soon. **1-0**

Endgame section

(15) Shanava, Konstantine(2563)
- Ipatov, Alexander(2614)

Olympiad,
2014.08.04

GM Csaba Balogh
Best rating: 2672

We are examining a study-like pawn endgame. White seems to be completely winning, as he can sacrifice his distant passed pawns to lure to black king away from the kingside, meanwhile he might collect the pawns one by one with his king. However Ipatov finds a brilliant idea to save the game...

48.♔d4 h5!! This is the start of the fantastic plan. Black needs to find several only moves to hold the draw. [Other moves are losing, for instance 48...♔c6 49.♔e5 ♔b5 50.♔f6 g4 51.♔xf7 ♔xa5 52.♔xe6+- and the black king is too far away.; Black cannot block the king's path with 48...♔d6 because of 49.a6! ♔c6 50.♔e5+-; 48...f6 does not help either 49.♔c5 ♔c7 50.a6 g4 51.a7 ♔b7 52.♔d6 e5 53.♔e6 h5 54.♔xf6+- and in comparison to the game, Black is a tempo down and it turns out to be critical.]

49.♔e5 h4!! Only move again! Even if Black finds the right

idea, he must execute it in the correct moveorder. [49...g4 loses to 50.♔f4! with the threat of Kg5! 50...f6 51.♔g3! Collecting the h5 pawn first. 51...♔c6 52.♔h4 ♔b5 53.♔xh5 f5 54.♔g5 ♔xa5 55.♔f6+-]

50.♔f6 g4!

51.♔g5! White also needs to be careful now. [51.♔xf7?? even loses the game, because Black is able to create passed pawn with 51...e5! 52.♔f6 e4 53.♔f5 e3 54.fxe3 g3+-]

51...g3! 52.fxg3 [Of course not 52.hxg3?? 52...h3+-]

52...hxg3 53.hxg3

53...e5! Another very important move! By sacrificing the g-pawn, Black has successfully created a protected passed e-pawn, but it has to be as far advanced as possible.

[53...♔c6? loses in view of 54.♕f6 ♔b5 55.g4! ♔xa5 56.g5 ♔b5 And White promotes his pawn faster after 57.♕xf7! e5 58.g6 e4 59.g7 e3 60.g8=♚+— This is the reason why Black should reach with his pawn the 5th rank.]

54.g4 [54.♕f5 54...f6= will be the same as the game.]

54...♔c6 55.♕h4!? A last tricky attempt to win the game, but Ipatov continues defend perfectly.

[Now in case of 55.♕f5 55...f6 56.♕xf6 the pawns are promoting in the same time 56...e4 57.g5 e3 58.g6 e2 59.g7 e1=♚ 60.g8=♚= Black can either give perpetual check or just simple take on a5 and the a3 pawn remains useless. 60...♚xa5]

55...f6! The last accuracy! [All the excellent previous moves would have turned to be useless if Black plays 55...♔b5? the point of 55.Kh4 was to put the pawn on g5 to avoid Black protecting his e-pawn with f6. 56.g5! ♔xa5 57.♕g4 ♔a4 58.♕f5+—]

56.g5 There was nothing left to try. Black was ready to collect the a-pawns, White also had to get rid of the kingside pawns...

56...fxg5+ 57.♕xg5 ♔b5 58.♕f5 ♔xa5 59.♕xe5 ♔a4 60.♕e4 ♔xa3 An awesome resource by Black! We can see, that in pawn endgames (also in other type of endgames)

the passed pawns are playing a very important role. White seemed to have all the chances to win due to his a-pawns, but Black found the salvation in creating a e-passed pawn too...

1.d4 ♘f6 2.♘f3 e6 3.c4 d5 4.♘c3 c5 5.cxd5 ♘xd5

6.e3 White more often plays [6.e4 6...♘xc3 7.bxc3 cxd4 8.cxd4 ♘b4+ 9.♘d2 ♘xd2+ 10.♙xd2 O-O 11.♘c4 and White keeps a stable plus thanks to his better center.]

6...♘c6 7.♘d3 ♘e7 8.O-O O-O 9.a3 cxd4 Black has the alternative to not hurry with taking on d4, for example: [9...b6 10.♙c2 ♘xc3 11.bxc3 g6 12.♘b2 ♘f6 Preventing e4. 13.♙ad1 ♘b7 14.♙e2 White should try to push e4 at some moment but in general Black's position is very solid.]

10.exd4 ♘f6 11.♙c2 [11.♙e1 A logical move, in some cases White can try to connect the rooks into the attack after Re4. 11...♘xd4 12.♘xd4 ♘xd4 13.♘h7+ ♙xh7 14.♙xd4 ♘xc3 15.♙xc3 The white pieces are more active and Black needs to play accurately to the equalize position.; 11.♘c2 with the idea Qd3.]

11...h6 12.♙d1 ♙b6 Black creates pressure against the d4 pawn and the other possibility was to play the main plan Nce7-b6-Bb7, with the idea of taking control of the important d5 square.

13.♘c4 [13.♘h7+ 13...♙h8 14.♘e4

14...♙d8! (14...♘ce7 15.♘e5! and White can transfer the rook into the attack after Rd3 next!)]

13...♙d8 14.♘e2 A slightly passive move, but at least White has a concrete idea to regroup the pieces. [14.♘e3 14...♘xe3 (14...♘ce7 15.♘e4→) 15.fxe3 ♘d7 16.♙ac1 ♙ac8 with two bishops Black can not be worse.]

14...♘d7 15.♙e4 ♘ce7 16.♘d3 White creates a threat but it took too much time and Black managed to put a good setup already.

16...♙a4?! Strange, why let White give a check on h7? [16...♘g6! simply gives Black a good position and in case of h4-h5, he will play Nf8 and control the h7 square.; 16...♘f5 17.g4 ♙c6 18.gxf5 ♘c3 19.bxc3 ♙xe4 20.♙xe4 exf5 21.♙xf5+= The three pieces are stronger than the queen.]

17.♙h7+ ♚f8 18.♖e1 ♙b5 With the idea of getting better control over the light squares after the bishops' exchange.

19.♙xb5 ♙xb5 20.♘g3 The knight joins the attack.

20...♘g6 [20...♖ac8 21.♘h5 (21.♙d2) 21...♘f5 22.♙d2 ♘xd4 23.♘xd4 ♙xd4 24.♘g3 ♙xf2+ 25.♙xf2 ♙c5+ 26.♙e3 ♘xe3 27.♖xe3 ♖d2+ 28.♘e2 f5∞]

21.♘e5 ♘de7 [21...♙xe5 22.dxe5 and Black is not able to stop Nh5.; 21...♘ge7 22.b3 with the nice idea to activate the bishop over the a3 square.]

22.♙xh6! Here come the decisive blows!

22...♘xe5 23.♘h5! [23.dxe5 23...♙xe5 24.♘h5 ♘f5 25.♙g5 was winning as well.]

23...♘f3+ 24.gxf3 ♘f5 25.♘xf6 ♘xh6 26.d5! A strong move which prevents Qg5 and opens the e-file.

26...♙xb2 27.♙h8+ ♚e7

28.♖xe6+! White is now winning the queen by force.

28...fxe6 29.♙xg7+ ♘f7 [29...♙d6 30.♘e4+]

30.d6+ ♖xd6 31.♘d5+ ♖xd5 32.♙xb2 b6 Black would have chances to create a fortress after the rook exchange, but in this case there is too much material on the board and the black king is weak.

33.♙b4+ ♚f6 34.♖e1 ♖h8 35.h4 ♖hd8 36.♖e4 ♘d6 37.♙c3+ e5 38.♖xe5 ♖xe5 [38...♖c8 39.♙a1 But not Qb2 because of Nc4!]

39.f4 ♘f7 40.fxe5+ ♚e6 41.♙c4+ 1-0

Editorial Preface

In this issue of the CEWN we want to focus all our attention on the Olympiad and its heroes!

Let us start with the winners:

In the women section the Russian team seemed to be unstoppable after beating China with 2.5/1.5, in a match where Lagno (who just changed the federation from Ukraine to Russian) beat Hou Yifan, the undisputed strongest women player in the history of chess after Polgar. Hou Yifan played a great event and even managed to gain some more ELO points, but this central match was lost by China, which freed the way for the Russian team.

In the 10th round, the girls from Ukraine managed to beat Russian with 2.5/1.5, thanks to a victory of Zhukova, but this did not matter any longer because of the lead of 3 points of the Russian team.

So the final ranking was not really a big surprise:

1) Russia 2) China 3) Ukraine.

In the open section there were a lot of surprises and many ups and downs.

Before the event it seemed like the Russian team would just be unstoppable with Kramnik, Grischuk, Svidler, Karjakin and Nepomniachtchi, but as it already happened in many team events before, Russia is somehow just unlucky and this Olympiad was not different. By winning the last 3 games, the Russian team only managed to finish in shared 2nd and finally took the 4th place, which is a clear disappointment for a team of such superstars.

The real stars of the event were the team of China! In 44 games played, the Chinese players lost just one single game, which

is simply sensational. The main scorer of the team was Yu Yangyi, with an amazing performance of 9.5/11. Ding Liren also played an excellent event, scoring 7.5/10.

The 2nd place went to Hungary, and this a lot to do with the great performance of one of your commentators, Balogh Csaba, who was the top scorer of his team and brought very important points on numerous occasion. With a score of 7/9 and a performance of 2839, Csaba practically pushed his team to one of its biggest successes!

Many congratulations to Csaba for this amazing performance!!!

The 3rd place went to the team of India (without Anand, Harikrishna, Ganguly) which came right out of nowhere, beating Germany in the 10th round with 2.5/1.5, then getting lucky with the pairing in the ultimate round, where they defeated Uzbekistan with a score of 3.5-0.5, securing a tiebreak which would be enough to take the 3rd place at the Chess Olympiad.

So once again the final ranking:

1) China: the first victory for China in the open section of Chess Olympiads and a totally deserved one.

2) Hungary: 4 solid results and the phenomenal play of Csaba Balogh, this was the secret of the Hungarian team.

3) India: who left the superstars at home and worked up the tournament step by step, playing solid and good chess.

Not only the Russian team was very disappointed on the way home from Tromso, the French team clearly had a lot to think about too. In the 10th round France and China were the 2 leading countries and China won their match very luckily with 2.5-1.5. In the last round, France got unlucky another time with the pairing to get Russia and then losing 2.5-1.5 again.

The team of Azerbaijan also deserved more than shared 2nd place and finally taking 5th position. They played a great event, having very tough pairings.

Another sad hero was the team of Bulgaria, which was playing really well and collapsed in the last rounds. Veselin Topalov anyhow took the gold medal on the 1st board with a fantastic result of 6.5/9 and a performance of 2872.

Magnus Carlsen also didn't have anything to laugh about as he lost 2 games. One with Black to Ivan Saric from Croatia and one with White to your weekly commentator Arkadij Naiditsch.

In the FIDE elections nothing too spectacular happened. As expected, Ilyumzhinov will rule the Chess World for another 4 years. The ECU elections saw the expected victory of Azmaiparashvili.

All in all, it was a friendly Chess Olympiad with a lot of great games, good hospitality from the organizers and of course thousands of great fighting chess games!

In 2 years from now, the next Chess Olympiad will be hosted in Baku, Azerbaijan, which according to the current rumours is going to be something very special.

We also want to apologize for the lately delay of the CEWN, but both your commentators were playing and we didn't want to lower the level of our weekly newsletter. Already from the next issue onwards everything should be in time again. We hope for your understanding!

Have a great week of chess!

Arkadij Naiditsch & Csaba Balogh

41st Olympiad Open 2014(10.1),
 2014.08.12

GM Csaba Balogh
 Best rating: 2672

Carlsen played a dubious opening and he got convincingly beaten by the Croatian grandmaster.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘d4 A rare move. The Bird defence of the Ruy Lopez. Black aims to change the pawn structure and obtain an unusual position where he could later outplay his opponent.

4.♙xd4 exd4

5.♙c4!? A counter-surprise! It actually has the idea to prevent the main development of the black pieces by putting immediate pressure on the f7 pawn. [The most common move is 5.O-O but here Black could play 5...♙c5 followed by Ne7 and O-O.]

5...♘f6 [Now 5...♙c5 loses a pawn after 6.♙xf7+! ♔xf7 7.♙h5+-- and Qxc5.]

6.O-O! [6.e5 seems very strong at first sight, because the knight has no good place to leave, but he can play 6...d5! and Black is fine!]

6...d5 Carlsen was already out of book and this time he did not manage to find the right solution. White turns out to be clearly better a few moves later. [6...♘xe4 is the critical move, but it does not equalize either: 7.♙xf7+! ♔xf7 8.♙h5+ g6 9.♙d5+ ♔g7 10.♙xe4 ♙f6 11.d3+= followed by Bf4 and Nd2 with a stable advantage due to the better pawn structure and the weakened position of the black king.; Now on 6...♙e7 7.e5 already works as d5 drops a piece.]

7.exd5 ♙e7 Black must hurry to finish the development to avoid big problems around his king. [7...♘xd5 is met by 8.♙h5! c6 9.♙e5+ and the d4 falls, while Ne7 should not come into consideration as it blocks the development.]

8.♙f3 White protects his extra pawn and obtains a clear advantage after only 8 moves against the World Champion...

8...♙g4 [8...O-O 9.d3±]

9.♙f4 O-O Carlsen decided to not count the pawns anymore and tries to create compensation with quick development. However there is no logical reason why Black should have any counterplay for the sacrificed pawns.

10.h3 It is useful to open the back rank and ask the bishop where it wants to go before grabbing the d4 pawn.

10...♙d6 11.♙xd4 c5 Black tries to improve his pieces with tempo. He keeps on attacking the queen to confuse the coordination.

12.♙d3 [White should not fall into the trap of 12.dxc6?? 12...♙h2+!-+]

12...♙h5 13.♘c3 White is two pawns up, but it takes some

time to connect his rooks by developing the c1 bishop. Black has 2-3 moves to find counterplay, but there is no good solution to solve this problem.

13...♖e8 [On 13...a6 White always responds with 14.a4 avoiding the trap of the bishop with b5 and c4.; 13...♘g6 is met by 14.♙f3 ♘xc2 15.d3+- and the bishop is trapped on c2 and there is still an extra pawn left.]

14.f4! A very strong move! White wants to play d3 and Bd2, but first he needs to remove the queen from the d3 square. With his last move, Saric closed the diagonal of the d6 bishop and prepares to play Qg3!

14...a6 15.a4 ♙d7 16.♙g3! Continuing the plan. White only needs d3 and Bd2 to be completely winning.

16...♘e4 [16...♖ab8 is not serious in view of 17.a5 simply parrying the b5 threat.]

17.♘xe4 ♖xe4 18.b3! After the trade of the knights, the a1-h8 diagonal is opened and the bishop developing to b2 might create very unpleasant threats. [18.d3 18...♖e2 is also good for White, but less clear than the game.]

18...♙c7 Black attacks the f4 pawn and provokes d3 in order to be able to invade to the 2nd rank. [18...♖ae8 19.♘b2 ♘f8 20.♘d3 ♖4e7 21.♘f6+- and the rook is trapped.]

19.d3 ♖e2 20.♙g5! Very concrete play! Suddenly the bishop on h5 feels uncomfortable.

20...g6 [20...♘g6 loses to 21.f5 h6 (The same would have happened after 21...f6.) 22.♙g4!+- with a doubleattack on g6 and e2.]

21.♘b2 Thanks to the Qg5 move, the long diagonal became vulnerable. Qf6 is a decisive threat.

21...♘e7 [21...♖xc2 is refuted nicely by 22.♙f6 ♖xb2 23.♙xb2 ♘xf4 Black cannot hope for counterplay on the dark squares because of the following tactical strike:

24.d6! ♙xd6 25.♘xf7+! ♙xf7 26.♖xf4+! ♙xf4 27.♖f1+-]

22.♘f6! White is ready to trade the bishop because if he gets his queen to f6, d6 becomes a decisive threat. Additionally White is still two pawns up. [22.♙h6 22...♘f8]

22...h6 23.♘e5!? [23.♙h4 was also winning, but the text move is nicer.]

23...♙d8 [23...hxg5 24.♘xc7+- is also hopeless. White is threatening with g4 or d6 and he is two pawns up.]

24. ♖xh6! Very well calculated by Saric, he had to foresee to upcoming ideas before playing 23.Be5.

24... ♜xe5! Carlsen has pinned his hopes to this small tactical trick that after fxe5 Bg5 traps the queen, but Saric has prepared a counterblow!

25. d6!! The key is to open the diagonal of the bishop and the threat of take on f7 becomes decisive. [25.fxe5? 25... ♙g5]

25... ♜e2 [The point is after 25... ♙f8 26. ♙xf7+! ♔xf7 27. ♖h7+-- and fxe5 wins.]

26. dxe7 ♜xe7 27. f5+— The rest is easy. White has decisive material advantage and keeps on attacking.

27... ♖h4 A last trap...

28. ♖f4 [Actually even if White misses the trap with 28.fxg6 28... ♜xg2+! 29. ♔xg2 ♙f3+ 30. ♜xf3 ♖xh6 31.gxf7+-- White remains winning.; The easiest would have been 28. ♙xf7+ 28... ♔xf7 29.fxg6+ ♔e8 (29... ♔e7 30. ♖g7+--) 30.g7+--]

28...g5 29. ♖xh4 gxh4 White decided to trade queens and win the endgame with the material advantage.

30. ♜f4 ♜xc2 31. ♜xh4 ♙e2 32. ♜e4 White is ready to invade on the 7th. The bishop has no safe square on h5 anymore after eliminating the h4 pawn, because g4 traps it.

32... ♜d2 [32... ♔f8 33. ♜e1 is also over.]

33. ♜e7 ♙xd3 34. ♙xf7+ ♔f8 35. f6 ♜d8 36. ♙h5 ♔g8 37. ♜e8+! [A nice finish to the game. Black resigned in view of 37. ♜e8+ 37... ♜xe8 38.f7+!+--] **1-0**

(2) Kramnik, Vladimir(2760) - Vallejo Pons, Francisco(2698) [D37]

Tromso NOR(8.1),
2014.08.10

Kramnik has obtained a comfortable advantage in the opening part with precise play, but then he chose a wrong plan, which allowed Vallejo to find adequate counterplay and win the game in style.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 dxc4 The Vienna defence. It used be a very popular opening, but recently it went out of fashion.

5.e4 ♗b4 6.♗g5 c5 7.♗xc4 cxd4 8.♘xd4

8...♞a5 This is a sideline and it is considered to lead to slightly worse positions. Kramnik also manages to prove it in the game. [The main lines are starting with 8...♗xc3+ 9.bxc3 ♞a5]

9.♗d2 In comparison to the 8...Bxc3 line, White is able to save his healthy pawn structure, but on the other hand Black also keeps his bishop pair.

GM Csaba Balogh
Best rating: 2672

9...♞c5 10.♗b5+! The only way to avoid the loss of a piece.

10...♗d7 11.♘b3 ♞c7 This is Vallejo's preparation and basically the new move. Only a few games have been played with it before. [11...♞e7 happened mainly before when White keeps all the pieces on board with 12.♗d3!]

12.♞c1! The idea is the same again, White would like to avoid any exchanges. He is threatening with a discovery attack by a knight jump and Bxb5 loses to Nxb5 and Nc7. Bxc3 just gives up the pair of bishops after Rxc3. Basically Black has nothing better than playing

12...♘c6 but now the bishops stay on the board.

13.O-O O-O 14.♞e2 ♞fd8 Both players develop their pieces to the most natural squares.

15.♗g5!? This move connected with the next one is a very deep plan. White forces back the bishop to e7 to unpin himself and then the plan of f4-e5 can be more effective. [On the direct 15.♗e3? White loses the important e4 pawn after 15...♗xc3; However 15.♗d3!? makes sense. The bishop is better placed on d3, it protects the e4 pawn, therefore White could follow up with Be3 and f4! 15...♞ac8 16.♗e3; 15.f4 is premature in view of 15...e5 16.f5 and White has no time to jump to d5 with his knight, Black comes first with 16...♞b6+! 17.♞h1 ♘d4 and Black has suddenly the advantage.]

15...♗e7 16.♗e3! White is threatening now with f4-e5 and if Black plays e5 Nd5 is very strong! [It was more natural to start with 16.f4?! however it did not work tactically because of 16...h6! 17.♗h4

17... Nxe4!! Suddenly Black wins a pawn with this nice combination: 18. Bxe7 Qb6+! An important intermediate check to attack the b5 bishop. 19. Kh1 Nxe7! 20. Bxd7 (20. Qxe4 20... Bxb5 Black is also a pawn up here.) 20... Nxc3! Another intermediate move. 21. Rxc3 Rxd7+ and Black has ended up with an extra pawn from the massacre.]

16...a6 17. Bd3 Be8 Vallejo lays a small trap and Kramnik surprisingly falls for it.

18.f4?! This is of course the right idea, but the execution is wrong. [White should have prepared to the f4 move with 18. Bb1 and only next f4.]

18... Ng4! A very unpleasant blow! Suddenly White is forced to give up one of his strong bishops.

19. Qxg4 [It was actually much stronger to play 19. Nd5!

19... exd5 20. Qxg4 dxe4 21. Bxe4 maybe White still keeps some initiative, but Kramnik definitely got confused by missing Ng4 and he makes a wrong decision again.]

19... Rxd3 20. Bf2 Black made a huge improvement, but he must find a resource to oppose the idea of Kramnik to play e5 and Ne4 next move.

20... Qd8! I like this multifunctional move a lot. One point is to leave the pin on the c-file and e5 can strongly be met by Nb4! The other point is that when the white knight arrives to e4, it is threatening on the dark squares with Nf6 for instance, but the black queen controls it well.

21.e5 Nb4! Creating the threat of Nxa2 and also the knight is ready to occupy the nice central d5 square.

22. Nc5 [On 22. Ne4 Black does not need to worry about anything and can just play 22... Nxa2! ; 22.a3 22... Nd5 is also fine.]

22... Rd2 Another big improvement for Black, as having a rook on the opponent's 2nd rank is always a big achievement.

23. B3e4 [23. Bxb7 leads to a worse endgame for White after 23... Qb8! 24. Nd6 Bxd6 25. exd6 Rxf2! 26. Rxf2 Nd3 Winning back the exchange and then the d6 pawn. In the arising endgame, the bishop will be superior to the knight and the

white king will be more vulnerable due to the f4 weakening.]

23...♖xb2 24.♖fd1 [24.♘xb7 24...♙d5+ Black is dominating.; 24.♘d6 comes to mind with the point that Bxd6 is met by the Nxb7 intermediate move and Nxd6 next, but Black could simply play 24...♘xa2! 25.♖cd1 ♕xd6 26.exd6 ♕c6 with material advantage and active pieces. The d6 passed pawn is well blockaded and Black can also close the d-file anytime by putting a minor piece to d5.]

24...♘d5 25.♘f6+ Kramnik uses the fact that Black cannot take twice on f6, because Bd4 comes with double attack at the end. But Black has better alternatives. [25.f5 was another natural attacking move, but Black defends successfully here too after 25...exf5 26.♙xf5 ♕c6! 27.e6 f6!+ and everything is under control. After some defensive moves Black's moments are about to come.]

25...♕xf6 26.exf6 g6! [26...♙xf6? 27.♕d4! was the point of 24.Rfd1.]

27.♕d4 ♖xa2 At first sight it looks a bit scary with such an exposed king on g8. But actually White can only threaten with Qh6-g7 mate, but it can easily be parried by removing the bishop and playing Qf8. Black is already two pawns up. If he manages to avoid getting mated in the next few moves, he will be end up winning.

28.♙h4 ♕c6! Perfect! Attacking on g2 and defending with Qf8 at the same time.

29.♘e4 [An important detail is that 29.♘e6 runs into 29...♖xg2+! (29...fxe6 30.f7+ and Qxh7 is ok for White.) 30.♙xg2 ♘xf4+ 31.♙g1 ♘xe6—+ With a winning advantage. Even materially Black is fine with his 3 pawns for the exchange, but both of his minor pieces are excellently placed, they parry all the threats of the opponent and suddenly the

white king turns out to be more exposed.]

29...♖e2 30.♘g3 [30.♘g5 30...h5 (30...♘xf6 is also good 31.♕xf6 ♙xf6 32.♙xh7+ ♔f8 should win for Black, but 30...h5 is less scary.)]

30...♘xf4! This pretty combination wins the game. The weakness of the g2 square turns out to be decisive.

31.♙xf4 [31.♘xe2 31...♘xe2+ 32.♙f1 ♘xc1 33.♙h6 ♙f8—+ The three extra pawns win the game.]

31...♙d5! This is the point and White must go into a totally lost endgame to avoid getting mated...

32.♘e4 [32.♙f3 is refuted by 32...♖xg2+!—+]

32...♙xe4 33.♙xe4 ♖xe4 The rest is easy. White could have resigned, but he decided to reach move 40, as probably Black was in some time trouble.

34.♕b6 g5! A perfect technical move! Black gives air to his king and intends to drive him to g6 to pin one of the white pieces to the protection of the f6 pawn.

35.♖d2 h6 36.♕d8 a5 37.♕e7 a4 38.♖c3 ♙h7 39.h3 ♙g6 40.♙h2 ♖f4 The time trouble is over and Kramnik resigned the hopeless fight. **0-1**

**(3) Ding, Liren(2742)
- Gajewski, Grzegorz(2659) [E00]**

41st Olympiad Open 2014(11.2),
2014.08.14

GM Arkadij Naiditsch
Best rating: 2737

This is the game which secured China the gold medal for the first time in the history of Chess Olympiads. Ding Liren played a really fantastic tournament and in the last round it was not any different. After quite a long theoretical line, Gajewski just made one unprecise move which was enough to get into deep trouble and get crushed by the Chinese superstar.

1.d4 Strangely there are not many Chinese players who start their games with 1.e4.

1...♘f6 2.c4 e6 3.g3 Sometimes White chooses this move order to avoid some lines in the Catalan or Benoni.

3...♙b4+ Gajewski is a very original player with a lot of different "strange" opening ideas, as maybe some of you know his famous Gajewski variation in Spanish, which stood for quite some time...

4.♙d2 ♙e7 5.♙g2 d5 But in the final game of the Chess Olympiad even Gajewski is going for a solid opening like the Catalan.

6.♘f3 O-O 7.O-O c6 So we are in one of the main lines. White has a choice now between 2 moves, 8. Qc2 or 8.Bf4.

8.♙c2 ♘bd7 Black can also start with 8...b6.

9.♖d1 b6

10.b3!? Quite an interesting and rarely played move. [10.♙f4 would lead us to the main lines.]

10...a5 Black is going for the plan with Ba6 and b5, which is very logical and this is why to include the a5 move is standard, but maybe Black could also go for the plan with c5. [In my opinion the best for Black is 10...♙b7 11.♙c3 (11.♘c3 11...♖c8 followed by c5.) 11...♖c8 12.♘bd2 c5 and I think the position should be close to equal.]

11.♙c3 To put the bishop on c3 and the knight on d2, this was the plan of the b3 move.

11...♙a6 12.♘bd2 b5 The idea of b5 is of course right-but only in case Black is in time.

13.e4! A very typical and the only right reaction. White has to act quickly in the center.

13...bxc4 14.bxc4 ♘xe4 [In case of 14...dxc4 15.♙f1 White is a bit better but still it would probably have been the best option for Black to go on.; 14...dxe4 15.♘e5 does not help Black at all.]

15.♘xe4 dxe4 Here comes the key idea:

16. ♖e5! The pawn on c6 and the pawn on e4 are hanging.

16...f5 A very risky decision! [Probably a better option would have been to play 16... ♖xe5 17.dxe5 ♙c7 18. ♘xe4 h6 19. ♙a4 and of course White is much better here, but Black would keep drawing chances after for example 19...Rfc8.]

17. ♖xc6 ♙e8 18. ♘xa5 White has no fear and this is the right choice.

18... ♖f6 19. d5 The young Chinese player wants to crush his opponent totally. [A bit more careful play would also give White a solid plus: 19. ♖xe7+ 19... ♙xe7 20. a3 ♖fc8 21. ♘b4 ♙e8 22. ♘f1 and it seems that White is able to avoid having to play the c5 move, which would give Black some chances to be solid on the white squares.]

19... ♘b7 After this move Black's hopes are becoming very small... [The only chance to fight was 19...exd5 20.cxd5 (After 20. ♖xe7+ 20... ♙xe7 21.cxd5 ♘d3 Black is perfectly fine.) 20... ♘d6 and the position is of course better for White, but Black has some counter chances with Bd3 or maybe Qh5 and Ng4. The position is not that clear from a practical point of view.]

20. ♖xe7+ ♙xe7

21. ♘c3 Quite a strange move. [Why not just play 21.d6 21... ♙d7 22. ♘b4 and I think White's position should be close to winning.]

21...exd5 22. ♖ab1 ♖f7 This move is too slow. [22... ♖fd8 was probably better and after 23. ♘xf6 gxf6 24. ♙b3 ♘c6 25. ♙b6 of course Black's position is very dangerous, but the pawns are equal so there are always drawing chances because of the limited material on the board.]

23. ♘xf6 ♙xf6 24. cxd5 White is a full pawn up.

24... ♖d8 Another little mistake. [Of course Black should not allow the d6 move: 24... ♙d6 and still Black's position would be a hard nut to break...]

25. d6! The pawn on d6 can't be taken, so White is very close to fix such an important victory.

25... ♘a6 [25... ♖xd6 was of course losing on the spot: 26. ♖xd6 ♙xd6 27. ♖xb7 ♖xb7 28. ♙c8+]

26. ♙c6 The most simple.

26... ♘d3 There is nowhere else to go...

27. Rxd3! With this exchange White is basically securing the victory because sometimes even a passed a-pawn could be enough for the victory.

27...exd3 28. Qd5 It is even impossible for Black to find a way not to lose the game immediately.

28...Qf8 Everything else is losing as well...

29. Qxf7 Qxf7 30. Rd1 is good enough to win the game, but even faster would have been [30. Qc7 30... Qd7 31. Rb8 and it is over.]

30...Qxa2 31. Qc7 Qa8 32. d7 White does not need to hurry with taking on d3, as the d-pawn is not going to run away...

32...d2 33. Rxd2 Qa1+ 34. Kg2 Qf6 Black has transferred his queen to f6 but it does not really matter anymore. The pawn on d7 is just too strong and the black king is going to get under attack sooner or later...

35. Re2 The black pieces are totally paralyzed.

35...f4

36. Qc5+! This is the winning move. The white queen is going to h5.

36...Qf7 37. Qh5+ Qg6 Black can't do anything else.

38. Qd5+ Qf8 39. Re5 Rf5 next is a deadly threat.

39...fxg3 40. hxg3 What a great victory by Ding Liren in another very powerfully played game and overall a performance of over 2830! Great play. **1-0**

(4) Mamedyarov, Shakhriyar(2743) - Nakamura, Hikaru(2787) [D10]

41st Olympiad Open 2014(11.1),
2014.08.14

GM Arkadij Naiditsch
Best rating: 2737

We are in the last round of the Olympiad and in case of victory, both teams would have a chance to share the 2nd place. It was clear that this was going to be a very fighting game, especially between such fighting players like Mamedyarov and Nakamura.

1.d4 d5 2.c4 c6 3.♘c3 dxc4 Already very soon we will enter a very sharp line of the Slav.

4.e3 b5 Black keeps on holding on to the c4 pawn.

5.a4 is of course the main theoretical move. White is forcing Black to play the b4 move.

5...b4 6.♘e4 The pawn on c4 is hanging again.

6...♔d5 We are in a very rare line but for sure White has prepared this nice idea at home.

7.♘d2 c3 The most logical move. [In case of 7...♙a6 8.♔c2 the c4 pawn is going to fall and White should be better because of a slightly better development.]

8.♘df3! An excellent opening idea! White does not take first on c3 which would give Black extra options, but is trying to play for development.

8...♔a5 A logical move, White is going to play Ne5 next anyway with the idea of playing Bc4, so the black queen has to move from d5.

9.♘e5

9...♘f6 I think that with this move Black has missed his best chance to equalize. [I think the critical move is 9...cxb2 10.♙xb2 b3+ White has to exchange the queens now: 11.♔d2 ♕xd2+ 12.♔xd2 ♘f6 and of course White can't be worse here, but Black's idea is simple as well, to play e6, c5, Bb7 and Nbd7. I think Black has good chances to be doing fine here.]

10.♘gf3 e6 The position is of course still unclear, but somehow White's initiative seems to be more than enough for the pawn down.

11.♙d3! Another good move. White tries to castle as quickly as possible.

11...♙a6 [After 11...cxb2 12.♙xb2 ♙e7 13.O-O O-O 14.♔e2 followed by Rfc1 I think White should be better.]

12.bxc3! Now that White can castle next move to take on c3 is the right choice.

12...bxc3 13.O-O Black's position is already really hard to play. How to develop the knight from b8, or how to stop White just from playing Qc2 next and the c4 pawn is going to fall very soon.

13...♘bd7 Nakamura wants to try his chances in complications and maybe this is the right practical decision.

[After 13...♙d6 14.♙a3 White's position is just much better.]

14. ♖xc6 Of course!

14... ♔b6

15. ♗fe5! Another very right decision by Mamedyarov. White should keep on going with the active play. Right now the move a5 is a threat.

15... ♙b7 Defending from the a5 move and attacking on c6 at the same time.

16.a5 ♔c7 17.♔a4 White's play is perfect once again. The next move of White could be a6 or Ba3.

17... ♙d6 [17... ♙xc6 didn't help much since after 18. ♖xc6 ♖c8 19. ♗e5 White's position should already almost be winning.]

18.a6 Logical, but maybe not the best. [18. ♙a3 looks very strong. 18...O-O 19. ♙xd6 ♔xd6 Maybe now the move that Mamedyarov underestimated is 20. ♔a3! and after the exchange of queens the c3 pawn would fall immediately. 20... ♔c7 21. ♗xd7 ♗xd7 22. ♗e7+ ♖h8 23. ♖fc1]

18... ♙xc6 19. ♔xc6 O-O After this move Black's position is looking almost lost to me. [Maybe the best chance to go on was 19... ♖c8 20. ♔xc7 ♙xc7 but after 21.f4 Black also has to defend a very unpleasant endgame.]

20. ♔xc7! Sometimes the strongest move are the most simple ones.

20... ♙xc7 21. ♗xd7 ♗xd7 22. ♙a3 White is using the moment that Black can't play Rfc8.

22... ♖fd8 [22... ♖fc8? 23. ♙e4! The white bishop is getting to b7. 23... ♖ab8 24. ♙b7 ♖d8 25. ♖fc1 and the c3 pawn is falling.]

23. ♖fc1 Black can't protect the c3 pawn any longer.

23...e5 Nakamura tries to complicate the game at least a little bit. [23... ♙a5 24. ♙e7 and White is winning.]

24. ♙e4 [24. ♖xc3 was of course possible as well.]

24... ♖ab8 25. ♖xc3 ♙a5 26. ♖cc1 The most safe and solid move. White is a pawn up, he has the bishop pair and another potential object of attack is Black's a7 pawn. All this should be enough to win the game.

26... ♙b4 What else to do?! White just wanted to play Bb7 next.

27. ♙xb4 ♖xb4 White's position is winning, but still some exact calculation is needed.

28.♖c7! White's play is accurate until the end. Black's tricks are not working.

28...exd4 29.♖xa7 Now Black has 2 options:

29...dxe3 [The other option was 29...♘c5 30.♙d5! attacking the f7 pawn makes Black's position resignable... 30...d3 31.♙xf7+ ♔f8 32.♙h5 with an easy win for White.]

30.♖xd7! A small but nice tactic, which White of course had to calculate before playing 28.Rc7.

30...♖xd7

31.a7 Black can only stop the a-pawn by giving a rook for it.

31...exf2+ Nothing else is possible... [31...♖xa7 was also losing since after 32.♖xa7 g6 33.f3 White even managed to keep 3 pawns, which gives Black no hopes at all for a draw.]

32.♙xf2 ♖xa7 33.♖xa7 White is a piece up for a pawn which means a winning position, but still Mamedyarov is showing us how things should be done here.

33...g6 Black's best chance is to have the king on g7 and keep on protecting the f7 pawn.

34.♙e3 White wants to play Bd5 next.

34...♖b6 Black's only chance is to get the rook to the f-file.

35.♙d5 ♖f6 So Black is almost paralyzed, but how to win this position with White?!

36.g4 White is preparing the g5 push in the right moment.

36...h6 37.♙e4 ♙g7 38.h4 White is almost ready to play g5 now, which would lead to a winning pawn endgame.

38...♖f1 39.♖b7 [The immediate 39.g5 39...hxg5 40.hxg5 ♖f5 with the key idea

41.♖xf7+! ♖xf7 42.♙xf7 ♙xf7 43.♙d5 ♙e7 44.♙e5 ♙f7 45.♙d6 ♙g7 46.♙e7 was also winning for White.]

39...♖f2 40.g5 This of course also leads to an easy win.

40...hxg5 41.hxg5 ♖e2+

42.♔d4 White easily escapes to d6 with his king after which Rxf7 would decide the game. A really great victory by Mamedyarov and such an important one for his team which won against the Americans with a result of 2.5-1.5 and shared the 2nd place! Congratulations! **1-0**

(15) Eljanov, Pavel(2723)
- Balogh, Csaba(2637)

Olympiad,
2014.08.14

GM Csaba Balogh
Best rating: 2672

White is a pawn up and has a strong protected passed pawn on f5, but it seems I created a perfect blockade. It looks like White cannot make progress, because he cannot access to the black pawns with his king. My opponent tries his last chance.

48. ♖c4! White would like to enter the black camp with his knight. Black faces a very difficult decision, he should either defend passively with Nc8, allowing the knight to enter but keeping the king outside or accept the sacrifice and create two more passed pawns for White.

48... ♖c8! This is the clean way to hold. Black is able to defend both of his weaknesses with his knight from c8 and a7, the white knight cannot win the game alone. [However it is very interesting to analyze what happens after 48... bxc4+ 49. bxc4

49... ♖c8 50. c5 ♖e7 51. ♖c4 (51. c6 is wrong as the knight is able to stand between the two passed pawns. 51... ♖b6 52. b5 ♖f6 Whenever the white king goes to a5 53. ♖c3 Black makes use of his h-pawn and creates a passed pawn with 53... h5! 54. gxh5 g4 55. ♖d3 ♖g5 56. ♖e2 ♖xh5 57. ♖f2 ♖g5 58. ♖g3 ♖c8 59. ♖g2 ♖b6= and the draw is inevitable. Both sides are forced to block the opponent's passed pawns.)

51... ♖f7!! This is the only move to make a draw! As we will see, in comparison to the 51. ..Kf6 line, it is very important to avoid the promotion of the d-pawn with check. (The most natural move 51... ♖f6? loses after 52. b5! dxc5 (52... h5 53. b6 dxc5 54. ♖xc5 transposes to 52... bxc5.) 53. ♖xc5 h5 54. b6! ♖xb6 55. ♖xb6 hxg4 56. d6! g3 57. d7 g2 58. d8=♔+ Check! This is the point!; 51... h5 loses to 52. gxh5 ♖f6 53. ♖d3 g4 54. h6+- the white king catches the g-pawn and Black is lost.)

52.b5

52...h5!! The only move again. (52...dxc5? is a wrong move order as White wins after 53.♔xc5 h5 54.d6! ♜xd6 55.♔xd6 hxg4 56.b6 g3 57.b7 g2 58.b8=♚ g1=♚ 59.♚c7+ ♔g8 60.f6+—) 53.b6 Compared to the 52...dxc5 start, White cannot advance his d-pawn. 53...dxc5! with the idea of Nd6 check after b7! 54.♔xc5 ♜xb6! 55.♔xb6 hxg4 56.d6 g3 57.d7 g2 58.d8=♚ g1=♚+ and this time Black promotes with check and gives perpetual check! So the objective evaluation is draw after 48...bxc4, but it was much easier to avoid the capture of the knight.]

49.♜a5 ♔f7 Black only its with the king and if White attacks the d6 pawn he goes Nc8, while after Nc7, he goes Na7...The defence is pretty easy from now on.

50.♜c6 ♔f6 51.♜d8 h6 Not necessary, but I decided to protect the g5 pawn. Keeping it on h7 does not change the outcome.

52.♜e6 ♔f7 53.♜c7 ♜a7 54.♔d2 [54.♜xb5? makes no sense, because after 54...♜xb5 55.♔c4 ♜a3+ the king must retreat and he cannot advance the b-pawn.]

54...♔e7 55.♔c2 We were both down to 2 minutes.

My opponent decided to make some extra time with the 30 seconds increment per move before trying the last attempt to make progress. In general, this technique is advisable. If the position was winning, some extra time would definitely help to convert the advantage.

55...♔f7 56.♔c1 ♔e7 57.♔d1 ♔f7 [Black obviously should not go for 57...♔d7?? because of 58.f6! and the black king is unable to block the f-pawn.]

58.♔e1 ♔e7 59.♔f2 ♔f7 60.♔f3 ♔e7 61.♔e3 ♔f7 62.♔d2 ♔e7 63.♔d3 ♔f7

64.f6!? Here comes the last attempt, but it does not change the logical result. White gains back the h-pawn later.

64...♔xf6 65.♜e8+ ♔e7 66.♜g7 ♜c8 67.♜f5+ ♔f6 68.♜xh6 Of course, the trade of the passed f-pawn for the useless h-pawn helps Black in the succesful defense, but White had no way to progress anyway.

68...♜e7 69.♔e3 ♜c8 [The pawn endgame after 69...♔g6 70.♜f5 ♜xf5+ 71.gxf5+ was also drawn, but I did not want to calculate such things. Keeping the blockade with the knights on the board was riskless. 71...♔g7 72.♔f3

72...♔h7! Black waits on g7-h7 and when the king goes to g4, Kh6 blocks the way to h5. 73.♔g4 ♔h6 74.f6 ♔g6 75.f7 ♔xf7 76.♔xg5 ♔g7! holding the opposition and the draw.]

70.♖f5 ♘f7 71.♔d3 ♔f6 72.♗e3 ♔f7 73.♗d1 ♔e7 74.♗c3 ♗a7 Here my opponent agreed to a draw, with which Hungary held Ukraine 2-2 and gained the silver medal in the Olympiad. **1/2-1/2**

(16) Carlsen, Magnus(2877) - Naiditsch, Arkadij(2709)

41st Olympiad Open 2014(7.1),
2014.08.09

GM Arkadij Naiditsch
Best rating: 2737

It is never easy to comment your own game and especially such an emotional one like against the current World Champion, but I will try to stay objective. I didn't play too well in the opening and was quickly a pawn down in a bad endgame, but strangely enough Carlsen started to give me chances and already before the time trouble we had a very messy position. With very little time on the clock, my opponent played few "uncontrolled" moves which finally led to the position we see on the board.

41.♔f1 There is no other move to stop Black from playing d2.

41...♗d4 The time trouble was over, so I took a fresh look at the position. With not too complicated calculations, I could see that I was going to be a pawn up but it was still hard to judge whether this endgame was winning or drawn. I was very motivated to give my absolute best as it is not often I have the chance of beating the best chess player in the world...

42. ♖e1 This move is also forced as I wanted to play d2.

42... ♟xb5 The white pawns are falling.

43. ♜b8 The bishop from b2 is attacking the a7 pawn which does not allow Black to play e5 now because of a4.

43... ♟xa3 44. ♖d2 [44. ♜xa7 was losing to 44... ♟c4 and the black king is going to f3.]

44... a5 In any case I need to push the a-pawn.

45. ♜xd3 So far things were pretty forced, but now I had a couple of moves to choose from.

45... ♜g6!? The right decision. I don't need to hurry with the a4 move, based on the line in the next variation.

46. ♜e4 is White's only chance. [46. ♜c3 was losing as after 46... ♜f5 we will see why 44... Kg6! was the right decision: 47. ♜b3 It seems like White has caught the black knight, but... 47... ♟b5 48. ♜c4 now comes the very important 48... a4! 49. ♜xb5 a3 The white bishop from b8 can't stop the a-pawn. 50. ♜a7 e5 and Black is winning.]

46... a4 Of course my idea should be to push the a-pawn as far as possible.

47. ♜e5 ♟c4 48. ♜c3 a3 It is still not that clear if this position is a winning one or not because so little material is left on the board.

49. ♜f4 [In case of 49. ♜d4 49... ♟b6 (49... ♟b2 was another possible option.) 50. ♜e5 ♟d5 51. ♜d4 ♜f7 Black should be winning because White does not have the option of playing Kf4.; Maybe the best chance for White was 49.f3!? 49...gxf3 50. ♜xf3 and now Black needs to choose the right square: 50... ♜f5! (50... ♜g5 just leads to a draw: 51. ♜e4 ♜g4 52. ♜d4

52... ♟b2 53. ♜e5 ♜xg3 54. ♜xe6 ♜f3 55. ♜d5 ♜e3 56. ♜c5 ♜d3 and White is just in time with 57. ♜b4) 51. ♜e2 (Now 51.g4+ was already working: 51... ♜g5 52. ♜e4 ♜xg4 53. ♜d4 ♟b2 54. ♜e5 ♜f3 55. ♜xe6 ♜e4 and as we can see White is missing the important tempo from the line above.) 51... ♟b2 and it seems like Black's winning chances are good here.]

49... ♜h5 Of course I need to hold on to the g4 pawn.

50. f3 e5+! This move was not very hard to find, but still a very important one. I need the control over the g5 square.

51. ♔e4

51... ♘d6+ 52. ♔e3 And here comes the key move:

52... ♔g5 Now I already want to play exf3 and e4 and White does not have the Kf4 move anymore because my king is on g5.

53. fxg4 [Of course not 53. ♙xe5?? 53... ♘c4+]

53... e4 [53... ♔xg4 was also possible.]

54. ♔d2 ♘b5 I wanted to be sure to have the e3 move in the future, in case the white king would try to go to b3, which is why I decided to chase away the bishop from c3 first.

55. ♙e5 ♔xg4 Kf3 is the threat.

56. ♔e3 ♔f5 57. ♙a1 ♘d6 and I am back with the knight to d6. Next move is Kg4.

58. ♔d2 ♔g4 59. ♔e3 Of course I can't take on g3 immediately, so I improve my position even more.

59... a2 The g3 pawn is falling next.

60. ♙c3 [60. ♔f2 60... ♘c4 does not help White at all.]

60... ♔xg3 The g3 pawn is gone, so my next plan is to bring the king back to f5 and to play Nc4.

61. ♙a1 ♔g4 62. ♔d2 Everything else is losing as well.

62... ♔f3 With the moment of the handshake I understood that I won a game with Black against the strongest oponent I have ever played before. My team also won with the smallest score of 2.5-1.5. A moment of happiness! :) **0-1**

Clash of the Titans

(17) Petrosian, Tigran V
- Hort, Vlastimil[D32]

Sarajevo 15th(7), 1972

GM Kamil Miton
Best rating: 2655

1. Nf3 c5 2. b3 d5 [2... Nf6 3. Bb2 g6 Black is not on time with this move because of 4. Bxf6! exf6 5. d4 with e3-c3-g3 next, with the idea to limit the dark squared bishop and then White can look for a positional advantage thanks to his better structure.]

3. e3 Nf6 4. Bb2

4...e6 5.c4 Nc6 6.cxd5 exd5 [6... Nxd5 this move was possible as well but now Black needs to solve the problems with the g7 pawn.]

7. Be2 Be7 8. O-O [8.d4 8...cxd4 9. Nxd4 Bb4+ 10. Bc3+ =]

8...O-O [8...d4!? 9. Bb5! White immediately fights for the d4 square!]

9...O-O (9...dxe3 10. Bxc6+ bxc6 11.dxe3 With a clear advantage for White because of the weak pawns. The two bishops will not help Black in this position.) 10. Bxc6 bxc6 11.exd4 cxd4 12. Nxd4 In case Black manages to activate the bishops, he might be able to get compensation, but it looks like Black will be not on time, for example: 12... Bd6 13. Wf3+ =]

9.d4 Bg4 10.dxc5 Bxc5 11. Nc3

11... Nc8? ! In my opinion more accurate is [11...a6 Black prevents the typical Nb5 move and keeps the opportunity to escape with the bishop to the very flexible a7 square. 12. Rc1 Ba7 (12... Wd6 13. Na4 Ba3! ? 14. Bxa3 Wxa3 15. Wd2 Rac8 and the black queen is creating practical problems.) 13. Na4 Rc8 (13... Ne4 14. Bxa6) 14. Bxf6 Now comes some complex and forced play, but in general it looks like Black has good compensation thanks to the pair of bishops and the weak white queenside. (14. Nc5 14... We7 15. Bxf6 Wxf6 16. Nxb7 (16. Wxd5 16... Nb4 ⚡) 16... We7 17. Bxa6 Nb4+) 14... Wxf6 15. Wxd5 We7 ⚡ 16. Bd3 With the idea of escaping with Qe4. 16... Nb4 17. We5 Wxe5 18. Nxe5 Rxc1 19. Rxc1 Nxa2 20. Ra1 Nb4 21. Bxa6 bxa6 22. Nxc4 f5 23. Ne5 f4↔]

12. Rc1 [12. Nb5! ?+=]

12...e7?! A very passive move. Usually the side with isolated pawns should try to play actively. [12...a6 is too late now because of 13. dxd5!; 12...d6 is probably the best. Of course Black allows Nb5, but at least he saves the bishop on an active diagonal. 13. dxb5 b8 14. exf6 gxf6 15. gxd5 g2+]]

13. d4! Now White very easily takes the d4 square under control.

13...xe2 [13...xd4 14. exg4 e6 15. f3±]

14. cxe2 d7 15. f4+= f8 16. d3 With the idea to get the useful f5 square.

16...e4 [16...e5 17. g5+=]

17. xc6! A very deep positional move. Petrosian decides to change the plan, he is now going to play against the hanging pawns.

17...bxc6 [17...xc6 18. ccd1 with unpleasant pressure against the d5 pawn.]

18. c2 Black is running out of plans, so he needs to wait as the ideas with pushing the central pawns are too slow.

18...f8 [18...d6!? 19. h5 (19. ffc1 19...xf4 20. exf4 e8 21. d4 f6 22. a4) 19...f6 20. ffc1 f5 21. f4 xf4 22. exf4 gxf4 23. f3 d6 24. xc6 xc6 25. xc6 (25. xd5+? 25...d7 26. xc6 e3+ 27. h1 e2 and White has a problem!) 25...d5+ Black should have counterplay because of the slightly weak white king.; 18...f6 19. xf6 dxf6 20. d4+= With a typical blockade on the c5 and d4 squares.]

19. ffc1 b7 Probably with the idea to take control of the a6 square and prepare c5.

20. e2! A nice idea! White has already put his pieces on optimal positions so it is time to create some weaknesses.

20...e8 21. g4 The idea is to provoke the f6 or g6 moves, which would weaken the black position.

21...g6? is losing immediately. [21...c5 22. d1 (22. g5 22...cd8 23. f3 d6 24. xd5 xe3 25. xc5+=) 22...d4 23. exd4 cxd4 24. xc8 xc8 25. xc8 xc8 26. xd4 c2 (26...d8 27. d2) 27. f3 d3 28. xc3 xc3 29. d2+=]

22. ♔d1 White could win after [22. ♘xd5 22...f5

23. ♔d1!! What a nice move! 23... ♖ed8 (23...cxd5 24. ♖xc8 ♖xc8 25. ♖xc8 ♗xc8 26. ♗xd5+-) 24. ♗d4+-]

22... ♗d6? The decisive mistake, but the position was already very unpleasant for Black. [22... ♗g7 23. ♗xg7 ♖xg7 24. ♗d4+ ♗g8 25. ♘d3±]

23. ♘xd5! ♖cd8 [23...cxd5 24. ♖xc8 ♖xc8 25. ♖xc8+ ♗xc8 26. ♗d4 f6 27. ♗xd5+-]

24. ♖xc6 ♗b8 25.f4 Avoiding Be5.

25... ♖e6 26. ♗d4 1-0

Editorial Preface

The Chess Olympiad has just finished and many new tournaments have already begun, here are just a few of them:

In Latvia the Riga Technical University Open 2014 is under way with many strong GMs, including the best Latvian player Alexei Shirov.

Melkumyan and Rapport are leading with 7/8 and one round to go.

The French Championship (without Vachier-Lagrave) is as expected dominated by Fressinet, who had an amazing start with 4.5/5, and Bacrot who quickly recovered after the first round loss and is now on 3.5/5.

In the 21st Abu Dhabi Masters 2014 the favorite Wang Hao is not doing great, with a very slow start of 2/4. The other favorites like Kryvoruchko or Areschenko had better results so far.

The Turkish team Championship is also taking place with players like Mamedyarov, Ding Liren, Wang Yue and many more.

For the current week, we still bring you some games from the Chess Olympiad as well as the fresh games from running events. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Bok, Benjamin(2587)**
- **Rapport, Richard(2704) [C41]**

Riga Tech Open A 2014(8.2),
2014.08.23

GM Arkadij Naiditsch
Best rating: 2737

Richard Rapport is just 18 years old and only a week ago he became a Silver Medalist with the Hungarian team and it seems like he just can't get enough of chess. The future will show if the young Hungarian will be the next Caruana, but for the moment he is crushing all the players under ELO 2650, while having big difficulties with stronger opponents. In the current game, White is quickly choosing a very wrong plan and finding himself in a bad position where Rapport finds a beautiful way to finish his opponent's suffering.

1.e4 d6 It is very hard to predict the openings of Rapport, who likes to start with White for example with 1.b3 or 1.f4 and doing similar things with the black pieces.

2.d4 f6 3.c3 e5 4.f3 bd7 So we are entering the Philidor. Actually quite a tricky opening, as it is not that easy for White to prove a clear advantage, one of the experts of the opening is Jobava who likes a lot playing it with Black, and even tried few times with the reverse color, who likes it can watch the game: Jobava-Adams.

5.e4 e7 6.a4 Usually White is choosing the move order 6.0-0 but it does not really matter.

6...c6 7.0-0 c7 Black does not hurry with castling, actually to me it is unclear why...

8.a2 Quite a typical move. White wants to develop the pieces with h3, Be3 and Qd2.

8...h6?! This is already too much. In many lines the move h6 will be contra-productive for Black because of the weakness of the g6 square which gives White a chance to play Nh4 with a double threat of Ng6 and Nf5-of course in case of Black's castle, which must happen during the next moves.

9.dxe5?! Why play such a move?! Quite a serious positional mistake. [9.h4! looks very strong and it is hard to see what Black would play now?! It is impossible to stop White from playing Nf5 next with a clearly better position and something like 9...Nb8 I do not really consider an option...; 9.h3 9...O-O 10.e3 would lead to the usual play.]

9...dxe5 Now Black is gaining the very important c5 square for the knight. Don't play moves like 9.dxe5?! in your own games! :)

10.h4 Not a bad move, but already too late to hope for an advantage.

10...c5 And here comes the difference with 9.Nh4...

11...♖xf5 12.exf5 Usually the exchange of the knight against the c8 bishop is good for White in case it is possible to keep the pawn structure. In the current situation White will not be able to make use of the bishop pair and the f5 pawn will quickly become a target for the black pieces.

12...0-0 13.♖e3 White's position is still looking solid, but Black has a nice move in mind.

13...e4! Very strong play! The black queen is going to take a fantastic position on e5 now and it is not that clear how to protect the f5 pawn in the near future.

14. ♔e2 ♚e5 15. ♖ae1 White is trying to escape to a draw.

15...♖ae8 No draw—at least for now. [A handshake would follow quickly after 15...♔xf5 16.♙xc5 ♘xc5 17.♘xe4 with an equal position.]

16. ♔c4? This move is even hard to explain... Probably White has miscalculated something, but I have no idea what. Black is going not only going to be a full pawn up, but he will also have a very dangerous attack on the white king. [16.f3! was the only way to go on. 16... ♖d6 17.g3 ♜xf5 And now White needs to find a difficult move like 18. ♔d1! Black's position is of course not worse here, but it is hard to say if Black is really better. Probably the position should be around equal.]

16...♟d6 Before taking the f5 pawn, Black is weakening the white structure on the kingside.

17.g3 ♔xf5 Qh3 and Ng4 is a deadly threat now.

18.♔d4 Bok is trying to get rid of the knight on f6, but this mission is mission impossible... [18.♖d1 18...♔h3 and the game should also be over soon.]

18...♘cd7! A very nice move. Black is keeping the threat of playing Qh3 alive plus at some point a move like Ne5 could become a threat as well.

19.♙e2 [White could have defended a bit tougher after 19.♙xf6 19...♘xf6 20.♙e2 with the hope of playing f3 at some moment but of course Black's position is superior, being a full pawn up with great play.]

19...♘e5! After this it is all over... Black is gaining the e5 square for the knight which basically ends the game.

20.♘xa7 Better to die greedy than just to die! :)

20...♘xc3 21.♙xc3 ♘e5 22.♘c5 ♘f3+ 23.♙g2 Black already has quite a few winning moves and Rapport is finishing the game in style!

23...♖e5 24.♘xf8

24...♙h3+ 10/10 for the beauty! :)

25.♙xh3 ♖h5+ 26.♙g2 ♖xh2# WOW, we don't often see White get mated this way already on move 26! A very nice game on what White definitely should not do in the Philidor and of course some great mating motives. **0-1**

(2) Bacrot, Etienne(2720) - Maze, Sebastien(2565) [E91]

89th ch-FRA 2014(2),
2014.08.18

GM Arkadij Naiditsch
Best rating: 2737

We will see a great positional victory of the long-term French Nr1 who was just overtaken during the last years by Vachier Lagrave. After a long theoretical fight, Black had a positionally dangerous position and missed his chance to make things complicated after which they started to get worse and worse. The final position in the game is a just a very ugly picture from Black's point of view.

1. ♘f3 ♘f6 2. c4 g6 3. ♘c3 ♗g7 4. e4 d6 5. d4 O-O 6. ♗e2 So we are in the main line of the KID, which is also the main opening of Bacrot with Black. The funny thing here is that Maze was the team captain of the French team for the last European Team Ch and the current Olympiad, so he clearly knew how well Bacrot's preparation could be-or maybe the other way around?! We will see in just a few moves from now...

6... ♘a6 Of course 6...e5 is the main line, but this is also an interesting line.

7. O-O e5 8. ♗e3 ♘g4 9. ♗g5 ♖e8 10. ♖e1 All is theory and all is well-known.

10... exd4 11. ♘d5 f6 12. ♗f4 And here comes the important move without which Black couldn't continue playing this line:

12... d3! Known-but important and nice.

13. ♗xd3 ♘e5 14. ♗xe5 A shocking looking move, but still theory, otherwise I guess nobody would ever give the dark squared bishop for the knight. White's idea is to launch very fast play on the queenside.

14... dxe5 [14...fxe5 does not stop White from playing 15.c5!]

15. c5 This was of course the main idea behind 14.Bxf4. Black can't save the knight on a6 from being taken which will ruin the pawn structure forever.

15... ♖f7 Defending the c7 pawn and preparing Bf8- a very solid choice. [Another option for Black could be 15...c6 16. ♗xa6 cxd5 17. ♖xd5+ ♗e6 18. ♖xb7 ♖b8 but the white queen finds the only spot: 19. ♖c7 ♖xb2 and of course White is better here, but maybe things are not that bad for Black either.]

16. ♗xa6 bxa6 And here comes the second very important move:

17.c6! Of course in case Black was in time to play c6 and hunt the white knight away from the d5 square, Black's position would be just excellent with the bishop pair.

17...Rb8 Maze is trying to bring his rook from a8 into the game, which is very logical. [17...Qxc6 doesn't work since after 18.Rc1 Qb7 19.Rxc7! Rxc7 20.Nxc7 Qxc7 21.Qd5+ the rook on a8 is lost.]

18.Qc2 The pawn on c6 was already hanging and needed protection.

18...Bf8 The black bishop will take a nice place on d6.

19.Red1! A very good move with quite a deep idea. The main thing White needs to do is to transport his knight from f3 to c4 or d3 or if possible to c3 to make the position perfect. In the meantime Black of course must do anything to stop White from the transportation of the knight and maybe start annoying the knight on d5 or maybe try to get some play on the b-file or even push f5.

19...Be6 20.Rac1 Rb5 So far the play from both sides was very logical. Black wants to play Rc5 now, or maybe Bxd5 could be an option as well, with the idea of playing Bd6 and then f5-e4.

21.Qe2 Protecting from Rc5 and at the same time attacking

at some moment the a6 pawn which could limit the moves of the rook from b5.

21...Qb8 A risky move because the black queen is going to take a passive place on b8, but on the other hand it gives Black a bit of dynamic play for a couple of moves. [21...Bxd5 doesn't look bad either. 22.Rxd5 (22.exd5 22...Qd8! and it is hard for White to find a way to defend the d5 pawn.) 22...Rxd5 23.exd5 Qb8 Of course White is a bit better, but it would be hard to prove a real advantage here.]

22.b3 Bxd6 Black is trying to prepare as much as possible the Bxd5 move.

23.Nc3 The most important move in the game. Once we will see how the game went, 23. Nc3 was clearly the right decision, but Black could have done much better. [23.Ne3 doesn't seem to bring anything. 23...Rb6 24.Nd2 Qe8 and Black is quickly attacking the c6 pawn.; But probably an interesting choice to go on could have been 23.Rc4 The white rook would be very useful on the 4th rank in case of Bxd5. 23...Bg7 24.Qd3 with a positional game and a small plus for White.]

23...Rb6? A huge mistake after which White will finally be able to get the knight from f3 into the game. [23...Rc5 was the only right decision! 24.Qxa6 (In case of 24.Na4 24...Rxc1 25.Rxc1 Qb5 Black is in time to take a perfect position on

b5 and the next moves could be Rf8-Rb8. What is the most important is that the white knight is still on f3.) 24...♔b4 This is the key move and without having foreseen it of course 23...Rc5 would just be a mistake. 25.♔d3 White has no other move. 25...♖xc6 and I think the position should be close to equal.]

24.♘a4! An excellent move. Winning another important tempo for the upcoming Nd2.

24...♖b5 25.♘d2 White managed to do what he dreamed about, the knight from f3 is coming!

25...♔c8 It is really difficult to give any advice to Black. The position doesn't seem to be so bad, but in fact things could already be terrible in couple of moves. There is no clear plan for Black how to escape from Nc4 next.

26.h3 A prophylactical move, not allowing Black to play Bg4, which would force White into a move like f3 which is better avoided.

26...♔g7 27.♘c4 The first step is done, the knight is on c4.

27...♘f8

28.♘cb2! White continues his great positional play. Now the knight is going to c5! The key square. Black just has no choice but to avoid this maneuver, but how?!

28...h5 Desperation, but there are just no more good moves in the position... [An attempt to stop White from the maneuver with 28...♙a3 29.♖c2 doesn't lead anywhere since after 29...♙xb2 30.♖xb2 ♖f8 31.♖bd2 White's domination on the d-file is decisive.]

29.♘d3 ♙h7 30.♘dc5 The knight is on c5, which means that Black has to exchange the white squared bishop and the d7 square is getting weak. White's position is almost winning!

30...f5 After this move all is lost... [30...♙d6 would probably make the game a bit longer. 31.♘xe6 ♙xe6 32.♘c3 with fantastic position for White.]

31.♘xe6 ♙xe6 32.exf5! Simple and strong, using the moment that Black can't play gxf5 because of Qxh5.

32...♙xf5 33.♘c3 The white knight is getting back into the game and hoping to take a place on e4.

33...♖b4 Avoiding Ne4.

34.♖d5 Attacking e5 and preparing Rcd1-Rd7.

34...♖f4 [In case of 34...♙g7 35.♖cd1 followed by Rd7 next and the game would not last for many more moves either...]

35.♖xe5 ♙c8 36.♘e4 ♙h6 37.♖d1 What a domination of the white pieces. The game is just over.

37...♔h8

38.♖e6 There is no reason for White to hurry to win as quickly as possible, Etienne clearly enjoys his position.

38...♖4f5 39.g3 White just continues to improve his position...

39...♔g7 40.h4 a5 The time trouble is over.

41.♔g2 And so is the game... Black's position is just a disaster and all because of one wrong decision taken in the middle game. A great game on the topic that patience is often rewarder better than direct actions in chess! **1-0**

**(3) Topalov, Veselin(2772)
- Wojtaszek, Radoslaw(2735) [B90]**41st Olympiad Open 2014(10.5),
2014.08.12GM Csaba Balogh
Best rating: 2672

Veselin Topalov won the gold medal on the first board at the Olympiad. He played really great chess during the entire tournament, let's examine one of his victories.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6

The Sicilian Najdorf defence. Perhaps, since Kasparov retired, Topalov became the biggest expert of it, he plays it successfully with both colors. However Wojtaszek also knows it extremely deeply as he is one of the main seconds of Anand. We are facing a huge encounter in the opening.

6.♙e3 e5 7.♘b3 ♙e6 8.f3 ♘bd7 [It is interesting that in 2013, in the same encounter, Black had won a nice game with 8...h5 but it was Wojtaszek who deviated from that game...]

9.g4 [9.♙d2 is the other option.]

9...b5 10.g5

10...b4! A standard intermediate move in this line. The point

is, White has advanced his g-pawn in order to send away the knight from f6 and then to settle his knight on d5. With this b4 push, Black is ready to trade knights, which would be favorable for him and if the knight goes away he can already play Nh5, while in case of Nd5 Black can preserve his bishop. [10...♘h5 11.♙d2 followed by 0-0-0 and Nd5 later.]

11.♘d5! Black's plan turns out to be succesful to eliminate the d5 knight with his own knight and preserve the bishop, but this was still the best option for White, otherwise his knight gets misplaced, while now he at least slightly improves the pawn structure.

11...♘xd5 12.exd5 ♙f5 13.♙d3! This bishop had to be traded. The white one had no other perspective, while the one on f5 was standing perfectly.

13...♙xd3 14.♙xd3 ♙e7 15.h4 O-O

16.a3!? This novelty came without thinking, clearly a prepared one. It has its pluses and minuses too. The positive side is that it makes use of the b4 push and after the undermining the a6 pawn becomes vulnerable and White also gets closer to his standard improvement of his position by transferring his knight to a5-c6! The drawback is the situation of the white king. So far, its safest place could have been

on b1, but after opening the queenside, it is hardly an option anymore... [The previous games continued with 16.O-O-O 16...a5 17.♘d2 a4 18.♙b1 f5 19.f4 with a very sharp position in the game Leko-Kasparov, Bled 2002.]

16...bxa3 This is the right decision. Wojtaszek knows that he is going to lose the a-pawn after this move, but he aims for compensation. [16...a5 would probably have been met by 17.axb4 axb4 18.♖xa8 ♖xa8 19.♙d2!+= followed by Ra1-a7 with very active pieces and a weak b4 pawn. Black is very far away from creating some danger against the king on d2.]

17.♖xa3 a5 18.♙b5! Black cannot protect the a5 pawn anymore, but he goes for quick counterplay.

18...♙c7! Black attacks the c2 pawn and he is ready to bring his f8 rook into the game with tempo.

19.♘xa5! Topalov still follows his preparation! Quite an impressive one. [19.♙c6 looked promising, but Black is fine after 19...♙xc6 20.dxc6 ♘b8 21.♘xa5 d5! as the rook is hanging and Black is also threatening with Rxa5 followed by check on b4, Bd2 Bxa5 Bxa5 and Nxc6.]

19...♖fb8! Wojtaszek feels the position very well and he keeps on finding the best moves over the board. [The alternative was 19...♙xc2 but after 20.O-O!+= the white king is out of danger temporarily. It is important that the knight is hanging on d7, therefore Black is forced to lose a tempo, but then the white knight arrives to c6, which guarantees him an edge because suddenly the e7 bishop does not find its place on the board.]

20.♙c6

20...♙xc6?! This is the moment when Wojtaszek goes wrong. [20...♘d8! would have been the right move, when Black gets adequate compensation in all lines: 21.♙xc7 (21.O-O 21...♖xa5 22.♖xa5 ♙xa5 23.♙xd7 ♘b6 24.♘xb6 ♙xb6+ 25.♖f2 ♙c5 Black wins back one of the pawns and the game should be drawn.) 21...♘xc7 22.♘b3 ♖xa3 23.bxa3 ♖a8 wins back the pawn and equalizes.; 20...♙d8 is also bad because of 21.♙c3! and Nc6 next with an extra pawn for White!]

21.dxc6! [21.♘xc6? did not work due to the unfortunate placement of the white king. 21...♖xa3 22.♘xe7+ ♙f8 23.bxa3 ♖b1+]

21...d5 Black has pinned his hopes to this intermediate move and it indeed looks like very strong compensation, but somehow White consolidates with a simple move.

22.♖a2! ♘d8 [White is better also after 22...♘f8 as he can for instance go for 23.c7 ♖c8 24.♘c6! ♘d6! The only move, otherwise Black loses a piece. 25.♖xa8 ♖xa8 26.♙e2 d4 (26...♘xc7? 27.♘e7+ ♙h8 28.♘xd5) 27.♖a1! ♖c8 28.♘d2 ♖xc7 29.♖a6± Black won back the pawn, but positionally he is doing very badly. The white pieces are dominating and he dangerously starts to advance his pawn with b4-b5. Additionally the d6 bishop is pinned, White often threatens

to take on d4 and the bishop cannot leave the e5 pawn unprotected.]

23.cxd7 ♖xa5 24.♖xa5 ♗xa5+ 25.♔e2 We have reached an endgame with an extra pawn for White. However at the moment it is very hard to evaluate if it is going to be enough, because it is very difficult to ensure the safety of the d7 pawn.
